

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

CYCLOPÆDIA

OF

BIBLICAL, THEOLOGICAL, AND ECCLESIASTICAL LITERATURE.

RH.

Rhabanus (more properly **Rabanus**) MAURUS, a distinguished German theologian and prelate, was born of French parents, named *Raban*, at Mentz, about 776. On the completion of his early studies at Fulda, in Hesse, he was there made a deacon in 801; and he betook himself to Tours the following year to enjoy the tuition of the famous Alcuin, who is said to have surnamed him *the Moor*, from his dark complexion. It is also apparent from his writings that he had in his youth made a pilgrimage to Palestine. In his twenty-fifth year he became head of the convent school at Fulda, where his successful teaching drew around him many pupils, and not a few of the nobility intrusted him with the education of their sons. In 822 he was consecrated abbot; but he still directed the seminary, which supplied many able teachers for the Frankish and German churches. On a complaint of the monks that his absorption in literary pursuits hindered the discharge of his more active conventual duties, he retired in 842. He was, however, drawn out of this voluntary seclusion, in 847, by being made archbishop of Mentz, whence he is supposed by some to have received the epithet of *Magenius*. In this situation he was the opposer and persecutor of Gottschalk (q. v.), who advocated the doctrine of predestination. Rabanus founded the monastery of Mont St. Pierre, and rebuilt that of Klingemünster. In 850 he showed great devotion in relieving the poor who had suffered from a flood. In 852 he presided at a council held in his metropolis. He died Feb. 4, 856. His influence was great among the churches in the diffusion of practical piety, and he had several illustrious disciples. His erudition and general attainments were respectable for the age in which he lived, and, as a lecturer, he instructed his scholars in general literature and science as well as theology. He wrote commentaries on all the canonical books and many of the Apocryphal ones, and left behind him numerous treatises, sermons, and letters. His *Opera Omnia* were edited by Henin and Colvener (Cologne, 1627, 6 vols. fol.). See Herzog, *Real-Encyklop.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v.; Darling, *Cyclop. Bibliog.* s. v., and the literature there cited; also, Johann, *De Vita ac Doctrina Rhab. Mauri Magn.* (Jen. 1724); Schwarz, *De Rabano Mauro* (Heidelb. 1811); Dahl, *Leben u. Schr. d. Rab. Maur.* (Fulda, 1828); Kunstman, *Ueb. Hraban. Maur.* (Mainz, 1841).

Rhabdos ΕΚ ΤΗΣ ΡΗΙΖΕΣ (Ράβδος ἐκ τῆς ρίζης, *a stem out of the root*) is the beginning of one of the odes of St. Cosmas, surnamed "the Melodist," also "Hierosolymitanus," and sometimes "Hieropolites." Like his foster-brother John of Damascus, Cosmas became a monk of St. Sabas, and, against his will, was consecrated bishop of Maiuma, near Gaza, by John, patriarch of Jerusalem, about A.D. 745. He led a holy life, and died in good old age about 760. Cosmas was the most learned of the Greek poets. He wrote on the Nativity, the Transfiguration, and the Purification, and on Gregory Nazianzen. His fondness for types, boldness in their application, and love of aggregating them make him the Oriental Adam of St. Victor. His hymns are much used and praised in the Eastern Church,

IX.—A

and he is commemorated on Oct. 14. We subjoin the first stanza of this ode in Neale's translation:

"Rod of the Root of Jesse,
Thou, Flower of Mary born,
From that thick shady mountain
Cam'st glorious forth this morn:
Of her, the ever Virgin,
Incarnate wast thou made,
The immaterial Essence—
The God by all obeyed!
Glory, Lord, thy servants pay
To thy wondrous might to-day!"

Comp. Neale, *Hymns of the Eastern Church*, p. 127 sq.; Miller, *Singers and Songs of the Church*, p. 16. (B. P.)

Rhanatōsan ΗΕΜΙΝ ΑΝΘΗΝ (Ρανάτωσαν ἡμῖν ἀνθήν) is the beginning of the sixth ode by St. Joseph of the Studium, or the "Hymnologist" (q. v.), of which the following stanza is the translation of Neale:

"Rain down, ye heav'ns, eternal bliss!
The chernub-cloud to-day
Bears Jesus where his Father is,
Along the starry way."

See Neale's *Hymns of the Eastern Ch.* p. 229 sq. (B. P.)

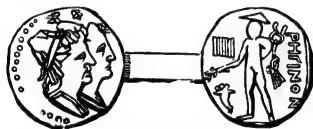

Rhea, SAMUEL AUDLEY, a Presbyterian missionary, was born in Blountville, East Tenn., Jan. 23, 1827. He graduated at the University of East Tennessee in 1847, after which he entered the Union Theological Seminary, New York, at which institution he graduated in 1850, and was ordained Feb. 2, 1851. After his ordination he was appointed missionary to Gawar, Persia, where he labored faithfully for eight years, at the expiration of which time he removed to Seir, another part of the Persian field, where he remained but a year in consequence of declining health. Being advised by his physician to return to the United States, he came to his former home, and on recovering his health returned to his post. From this place he went to Oroomiah, where he labored with zeal and success till his death, Sept. 2, 1865. (W. P. S.)

Rhees, Morgan John (1), a Baptist minister, was born in Glamorganshire, Wales, Dec. 8, 1760. He devoted himself at first to teaching; but having studied theology in the Baptist College at Bristol, he entered the ministry. His liberal views led him to France at the beginning of the revolution in that country, but, disappointed by its excesses, he came back and began expounding his particular views in a quarterly entitled *The Welsh Treasury*. This brought him into some difficulties with the authorities, and he emigrated to the United States in 1794 as the protector of a Welsh colony. Here he travelled through the Southern and Western states, preaching with remarkable success. Having, in connection with Dr. Benjamin Rush, purchased a tract of land in Pennsylvania, to which he gave the name of Cambria, he planned the capital of the county, which he called Beulah, and settled there with a company of Welsh emigrants in 1798. He remained for several years, acting as pastor of the church at Beulah, but finally removed to Somerset, Somerset Co., where he died, Sept. 17, 1804. One of his sons was M. J. Rhees, D.D. (q. v.). His earlier productions were published in the Welsh language, and but few of them have been

translated. He published a few *Orations and Discourses* in this country, which evince great vivacity and eloquence. See Sprague, *Annals of the Amer. Pulp.* vi, 344.

Rhees, Morgan John (2), D.D., a Baptist minister, was born at Somerset, Somerset Co., Pa., Oct. 25, 1802. He devoted himself at first to law, began practicing in May, 1826, and gave promise of great success in that profession; but, directing his attention to the study of theology, he acted for a time as temperance agent, and was finally ordained Sept. 9, 1829, and on April 1, 1830, became pastor of the churches at Bordentown and Trenton, N. J. Here he was also one of the founders of the New Jersey State Convention for missionary purposes in 1829, of which he became secretary, besides being chairman of the executive committee of the State Temperance Society, and editing for a time the *Temperance Reporter*. He closed his connection with the church at Bordentown in 1833, retaining that at Trenton. In 1840 he also resigned the latter to become corresponding secretary of the American Baptist Publication Society, in which position his services proved very useful. In 1843 he became pastor of the Second Baptist Church at Wilmington, Del., where he remained until 1850, when he accepted a call from the First Baptist Church of Williamsburgh, L. I., and here, still acting as recording secretary of the Board of the Missionary Union and the American and Foreign Bible Society, death closed his useful career, Jan. 15, 1853. See Sprague, *Annals of the Amer. Pulpit*, vi, 780.

Rhe'gium (Ῥήγιον, prob. from ῥήγνυμι, alluding to the abrupt character of the coast). The mention of this Italian town (which was situated on the Bruttian coast, just at the southern entrance of the Strait of Messina) occurs quite incidentally (Acts xxviii, 13) in the account of Paul's voyage from Syracuse to Puteoli, after the shipwreck at Malta. But, for two reasons, it is worthy of careful attention. By a curious coincidence the figures on its coins are the very "twin-brothers" which

Coin of Rhegium.

gave the name to Paul's ship. See CASTOR AND POLLUX. Again, the notice of the intermediate position of Rhegium; the waiting there for a southerly wind to carry the ship through the strait; the run to Puteoli with such a wind within the twenty-four hours, are all points of geographical accuracy which help us to realize the narrative. As to the history of the place, it was originally a Greek colony: it was miserably destroyed by Dionysius of Syracuse; from Augustus it received advantages which combined with its geographical position in making it important throughout the duration of the Roman empire. It was prominently associated, in the Middle Ages, with the varied fortunes of the Greek emperors, the Saracens, and the Romans; and still the modern *Reggio* is a town of 10,000 inhabitants. Its distance across the strait from Messina is only about six miles, and it is well seen from the telegraph station above that Sicilian town. See Conybeare and Howson, *St. Paul*, ii, 349; Lewin, *St. Paul*, ii, 217; Smith, *Dict. of Class. Geog.* s. v.

Rhemish Testament, a Romish version of the New Test., printed at Rheims, France, in 1582, accompanied with copious notes by Roman Catholic authors. This version, like the Douay Old Test., with which it is generally bound up, was translated from the Latin Vulgate. See DOUAY BIBLE.

Rhenferd, JAKOB, a German Orientalist, was born at Mühlheim, in the duchy of Berg, Aug. 15, 1654. The son of a Protestant minister, he studied theology at Ham, Groningen, and at Amsterdam. From 1678 to 1680 he was rector of the gymnasium at Franeker, and then returned to Amsterdam to perfect his knowledge of He-

brew, Arabic, and Persian. In 1683 he became professor of Oriental languages at Franeker, which position he held during the remainder of his life. He was a man of great penetration, sound judgment, and possessed a great memory. Rhenferd died Oct. 7, 1712. Of his works we mention, *De Antiquitate Literarum Judaicarum* (Franeker, 1694):—*Observationes ad Loca Hebraea Novi Testamenti* (ibid. 1705-7):—*De Arabarchis Ethnarchis Judaeorum* (ibid. 1702):—*Rudimenta Grammaticae Harmonicae Linguarum Hebraeae, Chaldaicae, Syriacae, et Arabicae* (ibid. 1706).—Hoefer, *Nouv. Biog. Générale*, s. v. Besides editing a *Syntagma* of dissertations by different writers, *De Stylo Novi Testamenti* (1701, 4to), he published several learned dissertations. These have been collected and issued in one vol. 4to, with a preface by D. Mill, and an "Oratio Funebris" by professor Andala, under the title *Jac. Rhenferdi Opera Philologica, Dissertationibus Exquisitissimis Argumenti Constantia* (Traj. Rhen. 1722). Besides discussing such Biblical subjects as the style of the Apocalypse, the meaning of the phrase *ὁ αἰὼν ὁ μέλλων* in the New Test., the meaning of several passages in the same, the author treats largely on points of Jewish literature and archaeology, and takes up the subject of the Palmyrene and Phoenician dialects, and other points of interest to Oriental scholars.

Rhe'sa (Ῥησά) is a name given in the genealogy of Christ (Luke iii, 27) as that of a son of Zerobabel and father of Joanna, being evidently the same with ΣΕΡΑΙΑΙΛ (q. v.), given in the Old Test. (1 Chron. iii, 19-21) as the son of Zerubbabel and father of Hananiah. Lord Hervey fancifully conjectures that Rhesa is no person, but merely the title *Rosh*, i. e. "prince," originally attached to the name of Zerubbabel, and gradually introduced as an independent name into the genealogy (*Genealogies*, etc., p. 111, 114, 356-360). See GENEALOGY OF JESUS CHRIST.

Rhesa, L. JEDEMİN, a German doctor and professor of theology, was born June 9, 1777, at Carwitha, near Memel. In 1800 he was appointed garrison chaplain at Königsberg; in 1807 he lectured as privat-docent at the university there, and in 1810 was appointed extraordinary professor of theology. From 1812 to 1815 he acted as army chaplain, and after 1818 he lectured as professor in ordinary and doctor of theology, being at the same time a member of the consistory in Königsberg. Rhesa died Aug. 30, 1840, leaving some very important pamphlets bearing on the Lithuanian version of the Scriptures, as, *Geschichte der lithuanischen Bibel, ein Beitrag zur Religionsgeschichte der nordischen Völker* (Königsberg, 1816):—*Philosophisch-kritische Anmerkungen zur lithuanischen Bibel* (ibid. 1816-24, 2 parts). Besides these, he wrote: *De Primis, quos dicunt Sacror. Reformatores in Prussia* (ibid. 1823):—and *De Primis Vestigiis Religionis Christ. inter Lithuanos Propagatae* (ibid. 1819). See Wiener, *Handb. der theol. Literat.* i, 809, 837; ii, 731; Zuchold, *Bibl. Theol.* ii, 1061. (B. P.)

Rhetorians. An Alexandrian sect of this name is mentioned by Philaster as founded by Rhetorius, and maintaining the opinion that there was no harm in any heresy whatever (Philast. *Hær.* xci). Augustine remarks that this seems so absurd that he considers it incredible (Aug. *Hær.* lxxii). Philaster is the original authority for the existence of such a sect, but Prædestinatus speaks of them as if they were not unknown to him, adding to Philaster's statement that they advocated Christian fellowship with all who believed in the Incarnation (Prædest. *Hær.* lxxii). Even before Philaster's time Athanasius mentions a person named Rhetorius, whom he accuses of holding the opinion that doctrines are of no consequence, and that all heretics are right in their own way (*Contr. Apollin.* i, 6). And at a later date St. John Damascene enumerates the ῥησισμαχῶν as the eighty-eighth in his catalogue of heresies, who, it seems probable, were "knowledge (or theology) haters" in the sense of being anti-dogmatists,

who had arisen from reaction against the subtleties of the Gnostics, the Antiochean and the Alexandrian schools of theologians, and who are identical with the Rhetorians of Philaster.

Rho, Giacomo, brother of Giovanni, was born at Milan, Italy, in 1593. At the age of twenty he joined the order of St. Ignatius, and, after being ordained priest, he accompanied Nicolas Trigault to China. Being detained at Macao, he aided in defending the town against the Dutch, and in surrounding it with new fortifications (1622). He afterwards penetrated into the province of Shan-si, in 1624, where he preached in the native language with fluency. In 1631 he was ordered to Peking, where he was employed, with P. Adam Schall, in drawing up the imperial calendar. Rho died in China, April 27, 1638. He left only one work, in Italian—an account of his voyage—entitled *Lettere della sua Navigazione e delle Cose dell' Indie* (Milan, 1620), but he is said to have composed many works in Chinese on religion, astronomy, and mathematics. See Kircher, *China Illustrata*.

Rho, Giovanni, an Italian Jesuit, was born at Milan in 1590. In 1606 he was admitted to the Society of Jesus, taught rhetoric at Brera, and, after a time, desired to go as a missionary to India. But his superiors refused to grant his request, and he continued during his whole life to teach in the different cities of Italy. Rho was, near the close of his life, made superior of a convent at Milan, and finally died at Rome, Nov. 9, 1662. He left several works, among them, *Martyrium Trium Beatorum e Soc. Jesu, Pauli Michi, Joh. Goto, et Jac. Ghisai* (Florence, 1628):—*Interrogationes Apologice* (Lyons, 1641):—and orations on various ecclesiastical subjects.

Rho'da (Ρῶδη, *Rose*), the name of a servant-maid who announced Peter's arrival at the door of Mary's house after his miraculous release from prison (Acts xii, 13). A.D. 44. See PORTER.

Rhodes (Ρῶδος, *rosy*), an island in the Mediterranean, near the coast of Asia Minor, celebrated from the remotest antiquity as the seat of commerce, navigation, literature, and the arts, but now reduced to a state of abject poverty by the devastations of war and the tyranny and rapacity of its Turkish rulers.

I. *Scriptural Notices.*—The Sept. translators place the Rhodians among the children of Javan (Gen. x, 4), and in this they are followed by Eusebius, Jerome, and Isidore; but Bochart maintains that the Rhodians are too modern to have been planted there by any immediate son of Javan, and considers that Moses rather intended the Gauls on the Mediterranean towards the mouth of the Rhone, near Marseilles, where there was a district called Rhodanusia, and a city of the same name. They also render Ezek. xxvii, 15, "children of the Rhodians," instead of, as in the Hebrew, "children of Dedan." Calmet considers it probable that here they read "children of Redan, or Rodan," but that in Gen. x, 4 they read "Dedan," as in the Hebrew. In the time of the consolidation of the Roman power in the Levant we have a notice of Jewish residents in Rhodes (1 Macc. xv, 23). Paul touched there on his return voyage to Syria from the third missionary journey (Acts xxi, 1). It does not appear that he landed from the ship. The day before he had been at Cos, an island to the north-west; and from Rhodes he proceeded eastwards to Patara, in Lycia. It seems, from all the circumstances of the narrative, that the wind was blowing from the north-west, as it very often does in that part of the Levant. Two incidents in the life of Herod the Great connected with Rhodes are well worthy of mention here. When he went to Italy, about the close of the last republican struggle, he found that the city had suffered much from Cassius, and gave liberal sums to restore it

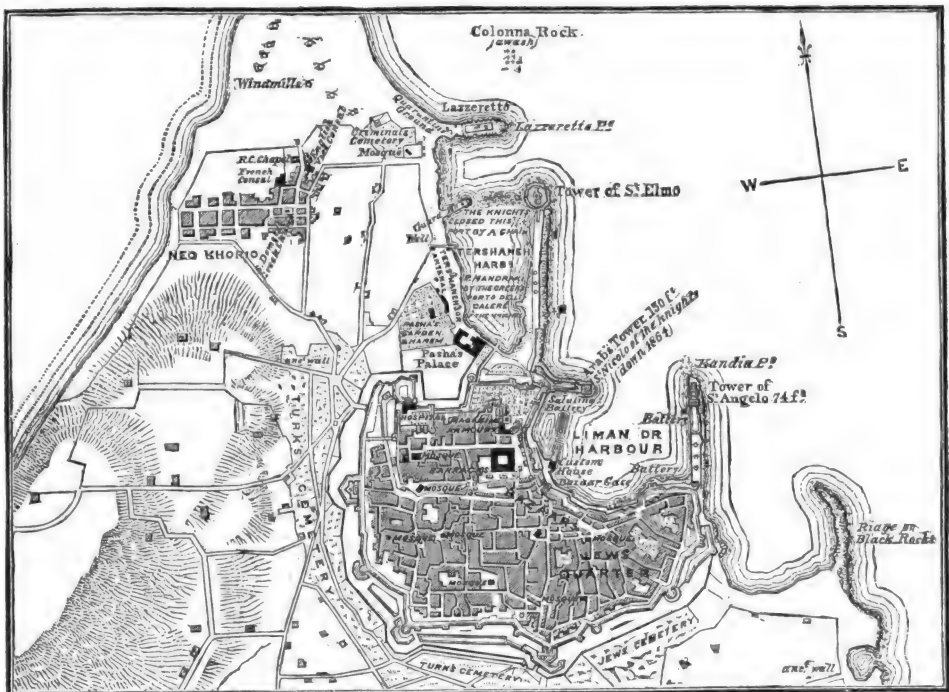

(Josephus, *Ant.* xiv, 14, 3). Here, also, after the battle of Actium, he met Augustus and secured his favor (*ibid.* xv, 6, 6).

II. *History.*—Rhodes was an ancient Dorian settlement made, probably, soon after the conquest of Peloponnesus; but in process of time the different races became fused together and were distinguished for commercial enterprise. They built the superb city of Rhodes at the northern extremity of the island, and thus took advantage of the magnificent harbor which the earlier settlers had overlooked. After this it prospered greatly and passed through various fortunes in a political respect, becoming for a time connected with the Carian dynasty, then with the Persian empire, and at a later period it became famous for a memorable siege it sustained against the arms of Demetrius Poliorcetes, from whom it obtained honorable terms of peace. The citizens now set themselves to clear the Ægean Sea of pirates, an enterprise in which they completely succeeded; and it was to their exertions that merchants owed the safety of their ships and the possibility of extending their commerce. The mercantile tastes and honorable character of this people procured them the goodwill of all the civilized world. They possessed in perfection those virtues in which the rest of the Greeks were so lamentably deficient. They were upright, conscientious, and prudent. While they cultivated trade they did not neglect science, literature, and art; and, though the time of their prosperity was subsequent to the decline of the intellectual supremacy of Greece, the Rhodian æra was a long and a happy one. The people formed an alliance with Rome, and maintained throughout the Roman period their independence; and, while they faithfully kept every article of their treaties, they avoided anything like servility. In the time of Antoninus Pius Rhodes was not only free itself, but extended the advantages of its free constitution to many of the surrounding islands and a considerable district in Caria on the opposite coast. Nor was Rhodes by any means despicable in literary reputation. Cleobulus, reckoned among the seven sages, was a Rhodian; Callimachus and Apollonius were eminent as poets; and eloquence was understood and cherished in Rhodes when it was all but extinct in every other part of Greece. Cicero went to study here, and the young Roman nobles made Rhodes their university as they had formerly done with Athens.

Under Constantine it was the metropolis of the "Province of the Islands." It was the last place where the Christians of the East held out against the advancing Saracens; and subsequently it was once more famous as the home and fortress of the Knights of St. John. The most prominent remains of the city and harbor are memorials of those knights.

In modern times Rhodes has been chiefly celebrated as one of the last retreats of this military order, under whom it obtained great celebrity by its heroic resistance to the Turks; but in the time of Soliman the Great a capitulation was agreed upon and the island was finally surrendered to the Turks, under whom it has since continued. It is now governed by a Turkish pasha, who exercises despotic sway, seizes upon the property of the people at his pleasure, and from whose vigilant rapacity scarcely anything can be concealed. Under this iron rule the inhabitants are ground to poverty and the island is becoming rapidly depopulated.

III. *Description and Remains.*—Rhodes is immediately opposite the high Carian and Lycian headlands at the south-west extremity of the peninsula of Asia Minor. It is of a triangular form, about forty-four leagues in circumference, twenty leagues long from north to south, and about six broad. In the centre is a lofty mountain named Artemira, which commands a view of the whole island; of the elevated coast of Carmania, on the north; the archipelago, studded with numerous islands, on the north-west; Mount Ida, veiled in clouds, on the south-west; and the wide expanse of

Plan of Rhodes.

waters that wash the shores of Africa on the south and south-east. It was famed in ancient times and is still celebrated for its delightful climate and the fertility of its soil. The gardens are filled with delicious fruit, every gale is scented with the most powerful fragrance wafted from the groves of orange and citron trees, and the numberless aromatic herbs exhale such a profusion of the richest odors that the whole atmosphere seems impregnated with spicy perfume. It is well watered by the river Candura and numerous smaller streams and rivulets that spring from the shady sides of Mount Artemira. It contains two cities—Rhodes, the capital, inhabited chiefly by Turks and a small number of Jews; and the ancient Lindus, now reduced to a hamlet, peopled by Greeks who are almost all engaged in commerce. Besides these there are five villages occupied by Turks and a small number of Jews, and five towns and forty-one villages inhabited by Greeks. The whole population was estimated by Savary at 36,500; but Turner, a later traveller, estimates them only at 20,000, of whom 14,000 were Greeks and 6000 Turks, with a small mixture of Jews residing chiefly in the capital.

The city of Rhodes is famous for its huge brazen statue of Apollo, called Colossus, which stood at the mouth of the harbor, and was so high that ships passed in full sail between its legs. It was the work of Chares of Lindus, the disciple of Lysippus; its height was one hundred and twenty-six feet, and twelve years were occupied in its construction. It was thrown down by an earthquake in the reign of Ptolemy III, Euergetes, king of Egypt, after having stood fifty-six years. The brass of which it was composed was a load for nine hundred camels. Its extremities were sustained by sixty pillars of marble, and a winding staircase led up to the top, whence a view might be obtained of Syria and the ships proceeding to Egypt in a large looking-glass suspended to the neck of the statue. There is not a single vestige of this celebrated work of art now remaining. The present antiquities of Rhodes reach no further back than the residence of the Knights of St. John of Jerusalem. The remains of their fine old for-

trese, of great size and strength, are still to be seen. The cells of the Knights are entire, but the sanctuary has been converted by the Turks into a magazine for military stores. The early coins of Rhodes bear the conventional rose-flower, with the name of the island, on one side, and the head of Apollo, radiated like the

Early Coin of Rhodes.

sun, on the other. It was a proverb that the sun shone every day in Rhodes.

See Meursius, *De Rhodo* (Amst. 1675); Coronelli, *Isola di Rodi* (Ven. 1702); Paulsen, *Descriptio Rhodi* (Gott. 1818); Rost, *Rhodus* (Alton. 1823); Menge, *Vorgeschichte von Rhodus* (Cologne, 1827); and especially Rottier, *Les Monuments de Rhodes* (Brussels, 1828); Ross, *Reisen nach Rhodos* (Halle, 1852); Berg, *Die Insel Rhodus* (Brunswick, 1861).

Rhodes, Alexandre de, a French missionary, was born at Avignon, March 15, 1591. In 1612 he was admitted to the Order of Jesuits at Rome, and after long solicitation received permission to go to India as a missionary. In the spring of 1619 he left Lisbon, but on arriving at Goa was detained under various pretexts until 1623, when he went on to Macao. He desired to penetrate into Japan, and devoted a year to the study of the language; but the great severity which was exercised against Christians obliged him to abandon his project. He went into Cochinchina, and at the end of six months began to preach in the native idiom. In 1627 he passed into Tonquin, and gained the confidence of the king; but the jealousy of courtiers destroyed the fruits of his labor. An edict was launched against the Christian religion, and Rhodes was expelled. He re-

turned to Macao and remained ten years, teaching and travelling through the province of Canton. He still desired to return to Cochín-China, and was again met by persecution—this time barely escaping with his life, being sentenced to perpetual banishment (1646). On his way to Europe he was imprisoned at Java, which changed his plan of travel. He embarked for Macassar, visited Bantam and Savata, and in 1648 travelled through the whole kingdom of Persia as well as Armenia, and finally left Smyrna for Genoa. The three years following he spent quietly at Rome, but his passion for travel caused him to start on a second expedition to Persia at the head of a new missionary enterprise. He died in that country Nov. 5, 1660. Rhodes's writings are chiefly narratives of travel, and are generally correct. We may mention, *Relazione di Felici Successi della Santa Fede nel Regno di Turchino* (Rome, 1650):—*Dictionarium Annamiticum, Lusitanum, et Latinum* (ibid. 1651):—*Sommaire des divers Voyages et Missions Apostoliques du P. A. de Rhodes*, etc. (Paris, 1653). See Sotovel, *Bibl. Script. Soc. Jesu*.

Rhodes, Georges de, brother of Alexandre, was born at Avignon in 1597. He embraced the rule of St. Ignatius at Lyons in 1613, taught rhetoric in the College of Notre Dame in that city, and was its director for twenty-seven years. He died May 17, 1661. Of his writings we have, *Disputationes Theologiae Scholasticae* (Lyons, 1661, 1671, 1676):—*Philosophia Peripatetica* (ibid. 1671).

Rhod'ocus (Ῥόδοκος), a Jew who betrayed the plans of his countrymen to Antiochus Eupator. His treason was discovered, and he was placed in confinement (2 Macc. xiii, 21).

Rhodon. See ROSE.

Rho'dus (1 Macc. xv, 23). See RHODES.

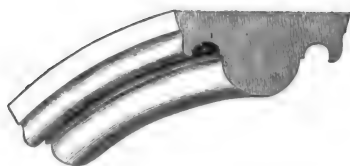

Rhoetus, in Greek mythology, (1) was king of the Marmarians, a son of Phorcyas, and father to Anehemolus, of whom Virgil says that he defiled the bed of his stepmother Casperia. (2) A centaur present at the wedding of Pirithous, who was wounded by Dryas, and fled. (3) A giant who was killed by Bacchus.

Rhopälus, in Greek mythology, was one of the numerous sons of Hercules. His son was named Phæstus, and built a city in Crete, to which he gave his own name.

Rhythia, in Greek mythology, was a nymph beloved of Apollo, by whom she became the mother of the Corybantes. An ancient town on the north-east coast of Crete derives from her its name—Rhythm.

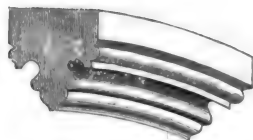

Riario, RAPHAEL GALEOTTO, an Italian prelate, better known as *cardinal Riario*, was born at Savona, May 3, 1451. He was in great favor with Sixtus IV, who raised him to the rank of cardinal in 1477, and afterwards conferred upon him several bishoprics and archbishoprics, together with the abbey of Monte-Casino and Cava. During the fêtes which celebrated his elevation to the cardinalate, Lorenzo de' Medici and his son were assassinated. The new cardinal did not escape the wrath of the Florentines, though he knew nothing of the plot, and was obliged to take refuge near the altar at which he was officiating. Under Alexander VI he took refuge in France, in his see of Tréguier, but returned to Italy on the election of Pius III. He afterwards entered into a conspiracy with cardinal Petrucci against Leo X, who generously pardoned his offence. It is said that cardinal Riario was the first to introduce theatrical representations in Rome. He died July 7, 1521. See *Annal. Eccl.* 1472-84; Panvinio, *Vita di Sisto IV*; Infessura, *Diario Rom.*; Ammanati, *Epistola 548 ad Fr. Gonzagum*, p. 221.

Rib, in architecture, is a projecting band on a ceiling, etc. In Middle-age architecture ribs are very extensively employed to ornament ceilings, both flat and

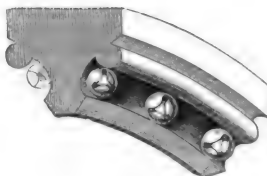

Oxford Cathedral, cir. 1180.

vaulted; more especially the latter, when groined. In the earliest Norman vaulting the ribs generally consist of mere flat bands crossing the vault at right angles, the groins as well as the apex being left perfectly plain. As the style advances the ribs become moulded, and are also applied to the groins, and are sometimes enriched with zigzags and other ornaments peculiar to the style, with carved bosses at the intersections, as in the churches of Iffley, Oxfordshire, and Elkstone, Gloucestershire.

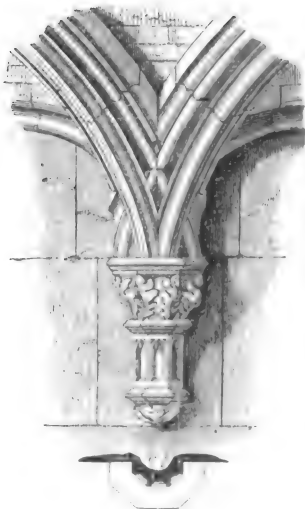

Westminster Abbey, cir. 1220.

Gloucester Cathedral, cir. 1320.

intersections are generally ornamented with bosses or other decorations, as is the case in the chapter-house at Oxford. In the Early English style it is seldom that more ribs are used than those which cross the vault at right angles (cross-springers) and the (diagonal) ribs upon the groins, with sometimes one at the apex.

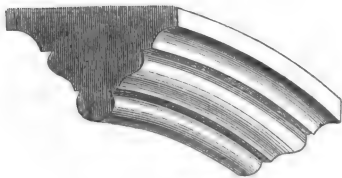

In the *Decorated* style additional ribs are introduced between the diagonal and cross-springers following the curve of the vault, and frequently also in other parts running in different directions, and uniting the whole into a kind of net-work, as at Tewkesbury Abbey, Gloucestershire. The apex of the vault is almost invariably occupied by a rib, which is often slightly curved upwards between the bosses. When they are numerous, it is not unusual to find that the more important ribs are of larger size than the others. In this style the

Thornton Abbey, Lincolnshire, cir. 1420.

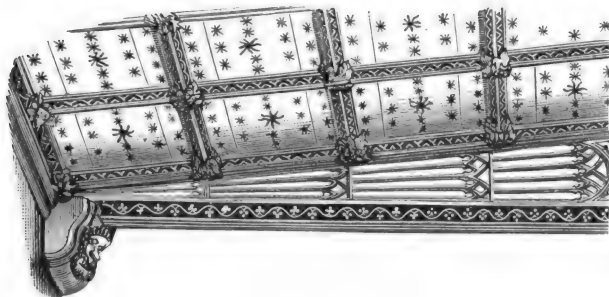

ribs are sometimes ornamented with the characteristic ornament, the *ball-flower*.

In ordinary *Perpendicular* vaulting, ribs are applied much in the same way as in the preceding style, but they are sometimes employed in greater profusion and in more complicated arrangements, by which the effect is by no means always improved, as at St. Mary Redcliffe Church, Bristol. In *fan-tracery* vaulting the ribs radiate from the springing of each pendentive, and generally become multiplied as they rise upwards, so that the whole surface is covered with tracery, which is usually enriched with featherings and other decorations.

Divinity School, Oxford.

Many churches, and some other ancient buildings, have raised ceilings, of wood or plaster, formed on the undersides of the timbers of the roof. A few of these, which are as old as the Decorated and Early English styles, are sparingly ornamented with small ribs; there is generally one along the top and others crossing it at considerable intervals. In some instances the ribs are more numerous in both directions, so as to divide the surface into rectangular compartments, or panels.

Wymington, Bedfordshire.

In the *Perpendicular* style ceilings of this kind are almost invariably formed in *cants*, which are divided into squares by small ribs with bosses, shields, or flowers at the intersections. Flat ceilings also, which are common in this style, are frequently divided into squares, and sometimes into other patterns, by moulded ribs. In the time of queen Elizabeth and James I, ribs were much used on plaster ceilings, and were often arranged with considerable intricacy: at this period the intersections were usually either plain, or ornamented with small pendants. In some districts the purlins of a roof are called ribs.

RIB (רִיב, *tselâ*, Gen. ii, 21, 22, a *side*, as often rendered; Chald. רִיב, Dan. vii, 5), the part of Adam taken to form his wife (Gen. ut sup.). See **EVE**.

In the expression "fifth rib" (2 Sam. ii, 23; iii, 27; iv, 6; xx, 10), the original has simply *fifth* (חֲמִישָׁה, *chômesh*, "fifth part" in Gen. xlvii, 26).

Ribadeneira, PEDRO, a zealous Jesuit, pupil of Loyola, and industrious writer, was born at Toledo, Nov. 1, 1527. He was sent to Rome while young, and received by Loyola into his order in 1540, before it had been confirmed by the pope. In 1542 Ribadeneira removed to Paris for further studies in philosophy and theology, and three years later to Padua, where he completed his studies. In 1549 he became teacher of rhet-

oric at Palermo. In 1552 he returned to Rome and labored effectively for the instituting of the Collegium Germanicum. Loyola sent him to Belgium in 1555, in order to promote the interests of Jesuitism, more particularly to secure permission of Philip II to introduce the order. He succeeded in his mission, and contributed by direct labors as a preacher at Louvain, and by defending the order against attacks of the Sorbonne, towards the realizing of that project. In 1559 he was appointed *prepositus* of the Collegium Germanicum, and in 1560, after having taken the four vows of his order, *prepositus* for the province of Tuscany. In 1563 he was commissary of the order in Sicily, and afterwards assistant to the generals Lainez and Francis Borgia. He attended the second general assembly of his order as the representative of Sicily, and the third as the representative of Rome, and subsequently was made overseer of all the houses of the Jesuits in Rome. Physical sufferings led to his return to Spain in 1584, and to the occupation of a writer in behalf of his order as his chief work. He was engaged in collecting the materials for a work intended to describe the services of the Jesuits in Spain and India when he died, at Madrid, Oct. 1, 1611. His head was found in an uninjured state, it is said, as late as 1633. As a thinker, Ribadeneira was characterized by credulity; as a writer, by a diffuse story-telling style in the manner of the old legends, whence his name was sarcastically transformed into *Peter de Badineria*, i. e. "chatterer." His works were numerous, and are fully given in Zettler's large *Universal-Lexikon*. They are ascetical or biographical in nature, though frequently devoted specifically to the interests of his order. We

mention his *Lives of Ignatius de Loyola, Borgia, Lainez, and Salmeron*:—the *Flos Sanctorum* (transl. into English, 1669)—all in numerous editions:—the *Hist. du Schisme de l'Angleterre* (Valencia, 1588):—*Le Prince Chrétien*, a defence against Machiavelli (Antw. 1597, etc.):—*Catalogus Scriptorum Soc. Jesu*—a catalogue of Jesuit writers, their provinces, colleges, houses, etc. (ibid. 1608); also translations from Albert the Great and Augustine into Spanish. See **ALEGAMBE**.

Rib'ai (Heb. רִיבַי, *pleader* [with Jehovah]; Sept. Ριβᾱί, Ρηβαί),

the father of Ittai, one of David's mighty men of the tribe of Benjamin (2 Sam. xxiii, 29; 1 Chron. xi, 31). B.C. ante 1020.

Ribalta, FRANCISCO, an eminent Spanish painter, was born at Castellon de la Plana in 1551. He studied the works of Raphael and Sebastian del Piombo in Rome, and settled in Valencia. His design, color, and composition are highly commended. Among his works are a *Last Supper*, a *Holy Family*, and *The Entombment of Christ*. He died in 1628.

Riband (Numb. xv, 38). See **LACE**.

Ribas, JUAN DE, a Spanish ecclesiastic, was born at Cordova in 1612. He belonged to the Order of Dominicans, and taught for many years in the convent of St. Paul at Cordova. His death occurred Nov. 4, 1687. Besides sermons and some ascetic treatises, he wrote, *Sueldo al Cesar y á Dios su Gloria* (1663, fol.): this appeared under the name of José de Zais. Many writers have attributed to Ribas the work entitled *Teatro Jesuítico*, etc. (Coimbra, 1654, 4to), which bears the name of Francisco de la Piedad. This treatise speaks with great severity of the Jesuits, and was burned by order of the Inquisition. Ribas denied the authorship of the work, but was known to have written others against the Jesuits, one of which is entitled *Barragan botero*. See **Echard**, *Script. Ord. Prædicat.*; **Goujet**, in **Moréri's Dict. Hist.**; **Peignot**, *Dict.*

des Livres Condamnés, ii, 154; Brunet, *Manuel du Libraire*.

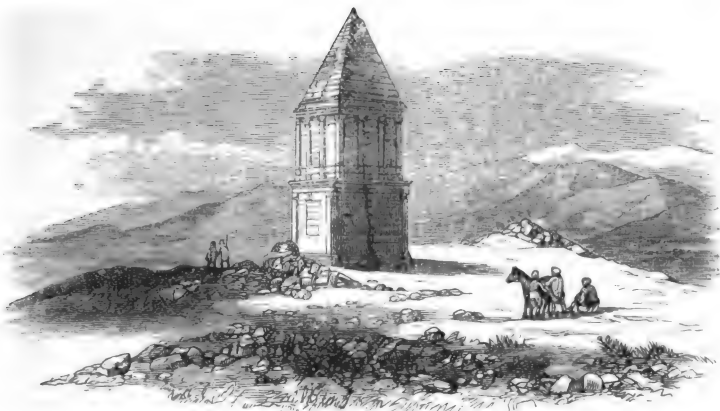

Ribash. See ISAAC BEN-SHESHETH.

Ribera, Francis-co, a Spanish Jesuit and commentator, was born at Segovia in 1537, and was educated at Salamanca. He became a Jesuit in 1570, and from that time was employed in interpreting the Scriptures, filling the chair of professor of divinity in the seminary at Salamanca until his death, in 1591. He wrote commentaries on the minor prophets, on John (Gospel and Epistles), Apocalypse, and Epistle to Hebrews; also a treatise *De Templo*, etc.; and a *Life of St. Theresa*.

Ribera, José, called *Spagnoletto*, a Spanish painter and engraver, was born at San-Felipe, Jan. 12, 1588. In his youth he was sent to the capital of his native province to receive a classical education, but did not give himself to that exclusively. His love for art gradually drew him away from all else, and he studied painting under various masters. It is supposed that his peculiar and rather harsh style was gained while under the instruction of Michael Angelo Caravaggio at Naples. Later he went to Rome, to Parma, and other cities of Italy, studying and working with diligence. He finally settled in Naples, was made court painter, and received many favors. In 1630 he was made member of the Academy of St. Luke, and in 1644 received from the pope the decoration of the Order of Christ. He died at Naples in 1656. The works of Ribera deserve a place among those of the best engravers and etchers. Of his works in this style may be mentioned, *The Martyrdom of St. Bartholomew*: — *Silenus*, and a portrait of John of Austria. His paintings are numerous; in the Louvre is *The Adoration of the Shepherds*, and among many in Naples a *Deposition from the Cross*: this is remarkable for a harmony and vigor of tone hardly equalled by his other works. See CÉAN [Bermudez], *Diccionario Histórico*; Quillet, *Dictionnaire des Peintres Espagnols*; Caballero, *Observaciones sobre la Patria de Riberu* (Valencia, 1824, 4to).

Rib'lah (Heb. *Riblah*, רִבְלָה, fertility; Sept. Δεβλαῖα or Βηλά, v. r. 'Ρεβλαῖα, 'Ραβλαῖα, 'Αβλαῖ, etc.), the name probably of two places.

1. One of the landmarks on the eastern boundary of the land of Israel, as specified by Moses (Numb. xxxiv, 11). Its position is noted in this passage with much precision. It was between Shepham and the sea of Cinnereth, and on the "east side of the spring." There is but one other incidental notice in Scripture tending to fix the site of Riblah; it is said to be "in the land of Hamath" (2 Kings xxiii, 33; xxv, 21; Jer. lii, 9). The land of Hamath lay on the north of the ancient kingdom of Damascus. See HAMATH. It embraced the plain on both sides of the Orontes, extending from the city of Hamath southward to the fountain of the Orontes. This position, however, seems inconsistent with the preceding, inasmuch as Hazar-enan, the starting-point from the extreme north of the east border, lay at a considerable distance to the east of Hamath (the order given being thus: "entrance to Hamath, Zedad, Ziphron, Hazar-enan," Numb. xxxiv, 8, 9), so that a line drawn towards the Sea of Cinnereth (Lake of Tiberias) should have gone (one would think) a good deal to the

The *Kamoa el-Hermel* on the plain of Riblah.

east of Riblah; and the Riblah of the boundary-line also seems to have been greatly nearer the Galilaean lake than the Riblah on the Orontes was, since Riblah was the town in the list nearest to the lake. The renderings of the ancient versions and the Targums only serve to confuse the passage. In the Sept. the division of the Hebrew words is even mistaken. Thus מִשְׁמֵחַ הַרְבֵּלָה is rendered ἀπὸ Σεφραμάρ Βηλά, joining the two first letters of the second word to the first word. The Vulg., too, without any authority, inserts the word *Daphnim*; and Jerome affirms that Riblah is identical with Antioch (*Onomast.* s. v. "Reblatha"). In his commentary on Ezekiel he is still more explicit. He says, "From the end, therefore, of the northern side—that is, from the temple (*atrio*) Enan—the border extends, according to the book of Numbers, to Sepham, which the Hebrews call Apamia, and from Apamia to Rebla, which is now called Antioch of Syria. And that it may be known that Rebla means that city which is now the noblest in Coele-Syria, the words *contra fontem* are added, which, it is manifest, signify *Daphne*" (*Opera*, v, 478, ed. Migne). This singular view appears to be taken from the Targums (Bochart, *Opera*, i, 431). Some suppose that the Daphne here mentioned was the place near the Lake of Merom of which Josephus speaks (*War*, iv, 1, 1); and that therefore *Ain* may mean one of the fountains of the Jordan. With this agrees PARCHI, the Jewish traveller in the 13th and 14th centuries, who expressly discriminates between the two (see the extracts in Zunz, *Benjamin*, ii, 418), and in our own day J. D. Michaelis (*Bibel für Ungelernte*; *Suppl. ad Lexicon*, No. 2313) and Bonfrerius, the learned editor of Eusebius's *Onomasticon*. So likewise Schwarz (*Palest.* p. 28). But Dr. Porter has endeavored to draw the boundary-line in consistency with the position of the Riblah or Ribleh above described (*Hand-book for Syria*, p. 580); and Winer, Gesenius, Van de Velde, and others seem to have found no difficulty in identifying the Riblah of Numbers with that of Jeremiah and the later historical books. But Palestine never actually extended thus far north, and the arguments of Keil (*ad loc.*) appear to us conclusive that another Riblah must there be meant south of Mt. Hermon, perhaps the site afterwards called *Leshem* and *Dan*, the present *Tell el-Kady*. See TRIBE.

2. Riblah of Hamath lay on the great road between Palestine and Babylonia, at which the kings of Babylonia were accustomed to remain while directing the operations of their armies in Palestine and Phœnicia. Here Nebuchadnezzar waited while the sieges of Jerusalem and of Tyre were conducted by his lieutenants; hither were brought to him the wretched king of Judæa and his sons, and after a time a selection from all ranks and conditions of the conquered city, who were put to death, doubtless by the horrible torture of

impaling, which the Assyrians practiced, and the long lines of the victims to which are still to be seen on their monuments (Jer. xxxix, 5, 6; lii, 9, 10, 26, 27; 2 Kings xxv, 6, 20, 21). In like manner Pharaoh-necho, after his victory over the Babylonians at Carchemish, returned to Riblah and summoned Jehoahaz from Jerusalem before him (2 Kings xxiii, 33). Riblah is probably mentioned by Ezekiel (vi, 14), though in the present Hebrew text and A. V. it appears as *Diblah* or *Dib-lath* (q. v.).

This Riblah has no doubt been discovered, still retaining its ancient name, *Ribleh*, on the right (east) bank of el-Asy (the Orontes), upon the great road which connects Baalbek and Hums, about thirty-five miles north-east of the former and twenty miles south-west of the latter place. It lies about twelve miles east by north of its great fountain, which still bears the name *el-Ain*. The advantages of its position for the encampment of vast hosts, such as those of Egypt and Babylon, are enumerated by Dr. Robinson, who visited it in 1852 (*Bib. Res.* iii, 545). He describes it as "lying on the banks of a mountain stream in the midst of a vast and fertile plain yielding the most abundant supplies of forage. From this point the roads were open by Aleppo and the Euphrates to Nineveh, or by Palmyra to Babylon . . . by the end of Lebanon and the coast to Palestine and Egypt, or through the Bukâa and the Jordan valley to the centre of the Holy Land." It appears to have been first alluded to by Buckingham in 1816 (*Arab Tribes*, p. 481). The most singular object in this neighborhood is a monument called *Kamoa el-Hermel*, which stands on a high mound several miles farther up the Orontes than Riblah (that is, farther south), but distinctly visible from it. It stands on a pedestal of three steps, and in the form of two quadrilateral masses rising one above another, the lower ornamented with figures of dogs, stags, hunting-instruments, etc., and terminating in a kind of pyramid, it reaches the height of about sixty feet (as given by Robinson), but Van de Velde makes it about twenty more (ii, 469). One of the corners, the south-west, is in a dilapidated state; in other respects it is entire, and forms a solid mass of masonry built of large square stones. It is known to be of great antiquity; and its precise date and object are unknown; and Abulfeda is the first writer who is known to have mentioned it. Dr. Thomson, who was the first to draw attention to it, would connect it with the ancient Babylonian dynasty (*Bib. Sacra*, May, 1847).

Riccaltoun, ROBERT, an eminent divine of the Church of Scotland, minister of Hobkirk, was born near Jedburgh in 1691, and died 1769. He wrote, *A Sober Inquiry into the Ground of the Present Differences in the Church of Scotland* (1723, 12mo):—*An Inquiry into the Spirit and Tendency of Letters on Theron*, etc. (Edin. 1762, 12mo). After his death, 1771, three volumes of his writings were published, edited by Rev. R. Walker: vol. i, *Essays on Human Nature*, etc.; vol. ii, *Treatise on the General Plan of Revelation*; vol. iii, *Notes*, etc., on *Galatians*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Riccardi, NICCOLO, an Italian theologian, was born at Genoa in 1585. He studied in Spain, joined the Order of Dominicans, and in 1613 was chosen to occupy the chair of theology at Valladolid. He soon became noted as a preacher, and was called to court. Philip III, charmed with his eloquence, called him a prodigy; from this he was familiarly called *Il Padre Mostro*. In Rome his success was equally great; he was in favor with Urban VII, who made him professor in the college of Minerva in 1621, and in 1629 master of the palace. He died at Rome, May 30, 1639. As a preacher he was characterized by great passionateness, grandeur of imagery, and vigor of thought. His writings are, *Ragionamenti sopra le Litanie di Nostra Signora* (Rome, 1626, 2 vols. fol.):—*Historie Concilii Tridentini*

Emaculate Synopsis (ibid. 1627, 16mo), and several minor treatises. He had also gathered materials for several important works, among them a *Commentary on the whole Scriptures*:—*De Christiana Theologia*, 3 vols.:—*Adversaria Sacra*:—*Antiquæ Lectiones*:—besides his *Sermons*. See Oldoino, *Athenæum Ligusticum*; Erythræus, *Pinacotheca*; Echard and Quetif, *Bibl. Script. Ord. Prædicat.* ii, 503; Tiraboschi, *Storia della Letter. Ital.* viii.

Ricchini, TOMMASO AGOSTINO, a learned Italian ecclesiastic, was born at Cremona in 1695. At the age of fifteen he entered the Dominican order, devoted himself to poetry, and published at Milan several religious pieces. He afterwards taught theology in the principal houses of his order in Lombardy, and filled the office of prior at Cremona. Called to Rome in 1740, he became in 1749 secretary of the Congregation of the Index and examiner of the bishops. He enjoyed the favor of Benedict XIV, who often made use of his learning in literary work. In 1759 Ricchini became one of the masters of the pope's palace. He died at Rome in 1762. Among his numerous works are, *In Funere Benedicti XIII* (Rome, 1730, 4to):—*De Vita Vinc. Gotti* (ibid. 1742, 8vo):—*Patris Moneti adversus Catharos et Valdenses* (ibid. 1743, fol.); the first edition of this work was accompanied with notes and a life of the author:—*De Vita et Cultu B. Alberti Villanconensis* (ibid. 1784, 8vo):—*De Vita ac Rebus Cardinalis Gregorii Barbini* (ibid. 1761, 4to), translated into Italian by Fr. Petroni. See Arisi, *Cremona Litterata*; Catalan, *De Secretario S. Congr. Indicis Lib. II*.

Ricci, ANTONIO, called *Barbelunga*, a painter of the Neapolitan school, was born at Messina in 1600. He went to Rome and studied under Domenichino; in that city he left several fine paintings. On his return to his native country he executed numerous works which now decorate its churches. Among them we mention, the *Conversion of St. Paul*:—an *Ascension*:—*St. Charles Borromeo*:—and a very beautiful picture of *St. Cecilia* in a church in Palermo. See Domenici, *Vite de' Pittori Napolitani*; Lanzi, *Storia Pittorica*; Ticcozzi, *Dizionario*; Guida di Messina; Mortillaro, *Guida di Palermo*.

Ricci, BARTOLOMEO (1), an Italian scholar, was born at Lugo, in Romagna, in 1490. He studied at Bologna, Padua, and Venice, and in the last-named city had charge of the education of Luigi Cornaro, afterwards cardinal. He subsequently taught at Ravenna. His reputation as instructor gained for him in 1539 the position of tutor to Alfonso and Luigi d'Este, sons of the duke of Ferrara. In 1561 he received from Alfonso letters of nobility with the title of *lord of Vendina*. Ricci wrote with elegance, but his style has been criticised as harsh and unequal. He died in 1569. His works have been collected into three volumes, *Opera* (Padua, 1748). See G. della Casa, *Discorso sulla Vita di B. Ricci*.

Ricci, BARTOLOMEO (2), an Italian Jesuit, was born at Castelfidardo. He was master of the novices at Nola and at Rome, and afterwards provincial of his order in Sicily. He died at Rome, Jan. 12, 1613. His works are *Vita Jesu Christi ex Evangeliorum Contextu* (Rome, 1607, 8vo), translated into Italian (ibid. 1609, 4to):—*Triumphus Christi Crucifixi* (Antwerp, 1608, 4to):—*Monotessaron Evangelicum* (Poitiers, 1621, 4to). See Tiraboschi, *Storia della Letter. Ital.* vii.

Ricci, LORENZO, an Italian Jesuit, was born at Florence, Aug. 2, 1703. He was of a noble family, and at a very early age joined the Society of Jesus. He was employed in various ways, and finally became secretary-general under Luigi Centurione. At the death of his superior, Ricci was elected to fill his place, May 21, 1758. But there soon arose those difficulties which finally destroyed the order. Its members were ban-

ished from the principal courts of Europe, and Ricci received from France proposals of reform. To all such he replied haughtily that there was nothing to be reformed in the society, *Sint ut sunt, aut non sint*. In January, 1769, several of the states of Europe solicited the abolishment of the order from Clement XIII. This pope died soon after, and his successor, Clement XIV, was also appealed to. He finally yielded, and on July 21, 1773, signed an edict which suppressed the entire order. Ricci, with his assistants, was transferred to the Castle of St. Angelo at Rome, where he died, Nov. 24, 1775. See Caraccioli, *Vie du P. Ricci*; Ch. Sainte-Foi, *Vie du P. Ricci* (2 vols. 12mo); *Ami de la Religion*.

Ricci, Matteo, one of the earliest and most successful missionaries of the Romish Church. He was born at Macerata, in Ancona, Oct. 6, 1552, and was early devoted to a clerical life. After a thorough instruction in languages and the sciences, he entered the Order of Jesuits in 1571. His comprehensive learning, together with his shrewdness, led to his being selected some years later to undertake the work of re-establishing the missions of his Church in China. The Minorite Monte Corvino had founded them so long ago as A.D. 1294; but the hostility of the resident Nestorian Christians, and the opposition of the native religions, Confucianism, Taoism, and Buddhism, followed by the persecutions of the Ming dynasty, had destroyed all the fruits of his labors. The Capuchin Gaspar de Cruz had attempted to reintroduce Christianity into China in about A.D. 1522, but without success. Ricci arrived with two companions in 1583 and was permitted to settle at Tsao-King-Fo. Aided by the Jesuit Roger, he was even permitted to build a Christian church in the immediate vicinity of a Chinese temple. His method was to gain the confidence of the people by conforming to their manners and prejudices. He assimilated his first teachings, for example, to the religious and moral tenets of Confucianism; and he constructed a map of the world in which he grouped all other states about China as their centre. The Chinese priests were eventually successful, however, in exciting suspicion against him, from which he was compelled to flee to the seaport Chow-chu. In 1595 he attempted a visit to Peking, but, being considered a Japanese in disguise, he was unable to secure a presentation at court. Five years later he repeated the undertaking, and was fortunate enough to be selected by the Portuguese as the bearer of presents to the emperor; and he so improved the opportunity that he was thereafter permitted to reside with the other missionaries of his company in Peking itself. Ricci now labored with increased energy in his mission. He acquired the respect of the imperial family and of prominent mandarins through his mathematical proficiency and through the arts of painting and music. Having given much attention to the vernacular, he was able to write a number of books in the Chinese language, and to adapt all his sayings and writings to the promotion of Christianity. His influence extended, in course of time, beyond the precincts of the court and the capital, and was felt to the advantage of his cause in several provinces of the empire. The foundations for a durable work appeared to have been definitely laid when Ricci died, May 11, 1609. The mission immediately felt his loss in the withdrawal of the emperor's favor, and in being obliged to remove from the capital for a time. But the services rendered by the missionaries to the cause of mathematical science, and even to the State, were so valuable that they were soon permitted to resume their appropriate labors. The Jesuits Schall, Verbiest, Pereira, and others are prominent in the subsequent history of Roman Catholic missions to China, and the successes realized were large; but the entrance of other orders upon this work, e.g. the Dominicans and Franciscans, introduced an element of discord among the missionaries themselves which impaired their usefulness and brought them into dis-

favor with the Chinese rulers. Incessant persecutions followed, extending from 1722 to 1845, which have almost obliterated the traces of the work of Ricci and his colleagues. See the art. CHINA in this *Cyclopædia*. See Trigault, *De Christ. Exped. apud Sinas ex Comm. Ricci* (Augsburg, 1615, 4to); Wertheim, *Ricci*, in *Plett's Neue theol. Zeitschr.* (Vienna, 1833), No. 3; Schall, *Relatio de Initio et Progr. Missionis Soc. Jesu apud Chineses* (Ratisbon, 1672, and with Notes by Mannsegg, Vienna, 1834); Du Halde, *Descript. de l'Emp. de la Chine* (Paris, 1736; German, with Mosheim's introd., Rostock, 4 vols. 4to); Gutzlaff, *History of China* (Canton, 1833; German by Bauer, Quedlinb. 1836, 2 vols.; and with continuation by Neumann, Stuttgart, 1847); Wittmann, *Herrlichkeit d. Kirche in ihren Missionen* (Augsburg, 1841, 2 vols.); *Gesch. d. kathol. Missionen bis auf unsere Zeit* (Vienna, 1845); Huc, *Chines. Reich* (Leipsic, 1856, 2 vols.). Comp. Gieseler, *Lehrb. d. Kirchengesch.* III, ii, 658 sq.

Ricci, Michael Angelo, a learned Italian ecclesiastic, was born in Rome in 1619. He was created a cardinal in 1681, and died in 1683. He was skilled in mathematical sciences, and published at Rome (4to) *Exercitatio Geometrica*, which was reprinted in London, and annexed to Mercator's *Logarithmotechnia*. See Landi, *Hist. Lit. d'Italie*; Fabroni, *Vite Ital.* vol. ii.

Ricci (Lat. RICCIUS), Paul, was a convert from Judaism in the 16th century. For a time he was professor at Padua, in Italy, when the emperor Maximilian I appointed him as his physician. Ricci was especially famous as a Cabalist, and translated a large portion of Joseph Gikatilla's cabalistic work entitled *שערי אורה* (*The Gates of Light*), which he dedicated to Maximilian, and which Reuchlin used very largely. Erasmus was his special friend, whom he also defended against Stephen the Presbyter, who had attacked the Cabala, as can be seen from a letter of Erasmus, dated March 10, 1516: "Paulus Riccius sic me proximo colloquio rapuit, ut mira quædam me sitis habebat cum homine sæpius et familiaris conserendi sermones." To his former coreligionists he endeavored to prove the truth of Christianity philosophically. Living in a time when the Turks were the terror of the European nations, he used his influence to bring about a union between the Christians against their common foe by publishing his *In Virulentam Inhumanissimamque Turcarum Rabiem, ad Principes, Magistratus, Populosque Germaniæ* (Augsburg, 1546). Of his numerous writings we only mention, *Statera Prudentium*, a mystical treatise on Moses, the Law, Christ, and the Gospels (s. loc. 1532);—*Opuscula Varia* (printed by Burgfrank, Pavia, 1510, and often). See Fürst, *Bibl. Judaica*, iii, 155; Wolf, *Biblioth. Hebr.* i, 966; Jöcher, *Gelehrten-Lexikon*, s. v.; Adams, *Hist. of the Jews*, i, 346; Bayle, *Dictionnaire*, s. v. "Riccio;" Kalkar, *Israel u. die Kirche*, p. 87; Levita, *Massoreth ha-Massoreth* (ed. Ginsburg), p. 9; Grütz, *Gesch. d. Juden*, ix, 193 sq.; Pick, *Mission among the Jews*, in the *Quar. Rev.* (Gettysburg, 1876; reprinted in the *Jewish Intelligencer*, Lond., Nov. and Dec., 1876), p. 368. (B. P.)

Ricci, Scipione, bishop of Pistoja and Prato, in the duchy of Tuscany, was born at Florence Jan. 9, 1741, of parents belonging to an ancient and honorable family. He was early brought under Jansenistic influence, and developed the tendencies so received while pursuing his theological studies with the Florentine Benedictines. In 1766 he became a priest, and soon afterwards a canon and auditor at the nunciature of Florence. In 1775 he visited Rome, on the occasion of the enthronement of pope Pius VI, and became acquainted with the intrigues of the papal court, which sought in vain to secure his adhesion. He returned to Florence, and became vicar-general to the archbishop, in which capacity he introduced a Jansenist Catechism. In 1780 he was made bishop. In connection with duke Leopold of Tuscany, he now attempted to carry through reforms similar to those effected by Joseph II in the empire of Austria.

The inquiries instituted with reference to the state of nunneries, etc., revealed scandalous irregularities and crimes against morality carried to even unnatural lengths; but the removal of Leopold to ascend the throne of the German empire, soon after the Synod of Pistoja (q. v.), brought the reformatory career of Ricci to a close by depriving him of his protector. The opposition of the populace caused him to resign his bishopric, and the papal bull *Auctorem Fidei* annulled the decrees of the Synod of Pistoja (Aug. 28, 1795). He submitted to the papal decision, after a long struggle, in 1799, was subsequently imprisoned on political grounds, and died Jan. 27, 1810. See De Potter, *Vie de Sc. de Ricci* (Brussels, 1825, 3 vols.; German, Stuttg. 1826, 4 vols.).

Ricci, Sebastiano, a painter of the Venetian school, was born at Belluno in 1659. At the age of twelve he entered the studio of Cervelli, who took him to Milan. He there studied under Lisandrino, and afterwards went to Bologna. Receiving the patronage of the duke of Parma, Ricci was enabled to go to Rome to study design. He remained there until 1694, and spent several subsequent years in travelling through Europe, leaving his pictures in many of the most important cities. He finally settled in Venice, where he remained during the rest of his life. He died in 1734. The paintings of Ricci are noted for the nobility of the figures, grace of attitude, correctness of design, and brilliancy of coloring. Nevertheless, he never seemed able to rid his works of a certain disagreeable mannerism. Among those in Florence are a *St. Charles* and *St. Gregory Celebrating Mass*; at the Museum of Dresden, an *Ascension* and *Christ Giving to Peter the Keys of Paradise*. See Orlandi, *Abbecedario*; Lanzi, *Storia Pittorica*; Ticozzi, *Dizionario*; Bertoluzzi, *Guida di Parma*.

Ricciarelli, DANIELE (called *Daniel of Volterra*), a painter and sculptor of the Florentine school, was born at Volterra, in Tuscany, in 1509. He studied design under Sodoma, and afterwards under Peruzzi at Siena. On going to Rome, he became a pupil of Pierino del Vaga, and assisted his master in adorning the Vatican and other buildings. He became a friend of Michael Angelo, who procured for him the patronage of pope Paul III, and continued his work in the Vatican after the death of his master Pierino. A great deal of the success of Ricciarelli was due to Angelo, who often furnished designs for his paintings and gave him valuable advice. The *Descent from the Cross*, considered one of the three finest paintings in Rome, owes much of its renown to the assistance which Ricciarelli received from his friend. Were this his only work, he would have ranked among the greatest of Italian masters, but many of his other pictures have a sad lack of expression. On the death of Paul III, Ricciarelli lost his position as superintendent of the works of the Vatican, and gave himself thenceforth to sculpture. He modelled the sculptures of Michael Angelo in the chapel of St. Lorenzo in Florence; and while engaged upon an equestrian statue of Henry II of France, he died suddenly, in 1566. In the Louvre is a bas-relief of *Christ Placed in the Tomb*, attributed to Ricciarelli. Among his minor paintings are *Massacre of the Innocents* and *Martyrdom of St. Cecilia* at Florence; at Dresden, a *Holy Family* (after Michael Angelo); and in the Louvre, *David Killing Goliath*. See Vasari, *Vite*; Lanzi, *Storia Pittorica*; Pistolesi, *Descrizione di Roma*.

Riccio, Domenico, a painter of the Venetian school, was born at Verona in 1494. After receiving the instructions of Giolfino, he went to Venice to study the works of Giorgione and Titian. He decorated the ducal palace at Mantua, and at Verona left many celebrated frescos. He died in 1567. Among his works are *Conversion of St. Paul*:—*Murriage of St. Catharine*:—*Resurrection of Lazarus*:—*The Samaritan*, and *The Resurrection of Christ*. See

Ridolfi, *Vite degli Illustri Pittori Veneti*; Bennasuti, *Guida di Verona*.

Riccio, Felice, an Italian painter, son of the preceding, was born at Verona in 1540. A pupil of his father, he continued his studies at Florence under Jacopo Ligozzi. Here he acquired an entirely different style from that of his father. His Madonnas have much grace and delicacy, and he excelled in portrait-painting. He painted many small pictures upon stone. His larger paintings are almost innumerable; among them are *Adoration of the Magi*:—*Descent from the Cross*:—*St. Lucia* and *St. Catharine*:—a colossal *St. George*, and a fresco on the façade of a house at Verona. See Ridolfi, *Vite degli Illustri Pittori Veneti*.

Riccioli, GIOVANNI BATTISTA, an Italian astronomer and Jesuit, was born at Ferrara in 1598, and was professor of philosophy, theology, etc., at Bologna and Parma. By authority of his superiors, he devoted himself to astronomy, that he might confute the Copernican system, which he attempted to do in his *Almagestum Novum* (1651, 2 vols.). According to his theory, the sun, moon, Jupiter, and Saturn revolve around the earth; while Mercury, Venus, and Mars are satellites of the sun. He also published an able treatise on mathematical geography and hydrography in 1661, and *Astronomia Reformata* in 1665. He died in 1671. See Fabroni, *Vita Italorum Doc. Excel.*; Tiraboschi, *Storia della Letteratura Italiana*.

Rice, Aaron, a Methodist preacher, was a native of Green County, Ky. Of his early history and his conversion, little is known. He became a member of the Louisville Conference of the Methodist Episcopal Church, South, and was long esteemed as an able and reputable minister. He died Sept. 9, 1846. See *Minutes of Annual Conf. M. E. Church, South*, 1846.

Rice, David, a Presbyterian minister, was born in Hanover County, Va., Dec. 20, 1733. He began his classical studies under the Rev. John Todd, and went to New Jersey College in 1759, becoming a member of the junior class. He graduated in 1761; was licensed to preach by the Presbytery of Hanover, Nov., 1762; and was ordained and installed pastor of Hanover Church, Va., Dec., 1763. Giving up this charge, he afterwards preached for about ten years in Bedford County, Va., migrating to Kentucky in Oct., 1783, where he labored for fifteen years. In 1798 he removed to Green County, but did not take any pastoral charge. Mr. Rice assisted in the establishment of Hampden Sidney College, was one of the trustees of the Transylvania University, and president of the board from 1783 to 1787. The following is a list of his publications: *Essay on Baptism* (1789):—*Lecture on Divine Decrees* (1791):—*Slavery Inconsistent with Justice*, etc. (1793, 12mo):—*An Epistle* (1805):—*Second Epistle* (1808):—*Letters and Sermons*. See Sprague, *Annals of the Amer. Pulpit*, iii, 246.

Rice, Edward, D.D., an English clergyman, was educated at Christ's Hospital, whence he was elected as an exhibitor to Trinity College, Cambridge, in 1813. He was one of the classical masters of Christ's Hospital in 1820; vicar of Horley, Surrey, in 1827; head-master of Christ's Hospital in 1836; and died in 1853. He published several sermons: *On Liturgies* (Lond. 1820, 8vo):—*On the Coronation of George IV* (ibid. 1821, 8vo):—*Two Sermons on the Romish Church*, etc. (ibid. 1829, 8vo). See *Lond. Gent. Mag.* March, 1853, p. 316. See Allibone, *Dict. of Brit. and Amer. Auth.* s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rice, Henry Leffler, a Dutch Reformed minister, was the son of Henry and Elizabeth (Leffler) Rice, and was born in Washington County, Ky., June 25, 1795. His early education was conducted by the Rev. James Vance, of Kentucky, who took young Rice for some years into his own home. After spending three years in Transylvania University, Ky., he was graduated from

that institution in the class of 1818. Having early experienced the renewing grace of God, in his sixteenth year he united, by a public profession of his faith, with the Presbyterian Church at Corydon, Ind. Immediately after leaving the university, he entered the theological seminary at Princeton, N. J., whence he was regularly graduated in three years, after passing through the full course of study. He was licensed by the Presbytery of New Brunswick, Oct. 3, 1821, and was ordained as an evangelist by the same presbytery, Oct. 2, 1822. After his ordination he spent two years in mission work in new portions of the West, and then returned to New Jersey, where he accepted a call to become pastor of the Dutch Reformed Church at Spottswood, and was installed in September, 1825. Here he labored faithfully and successfully about eight years, until he was released by his classis, April 16, 1834, in order that he might accept a call to the German Reformed Church in Chambersburg, Pa., over which latter charge he was installed in May, 1834, and in which he continued until his death. While residing in Chambersburg, he became profoundly interested in the literary and theological institutions of the German Reformed Church located at Mercersburg, and in the fall of 1836 he was induced to undertake an agency on their behalf, his pulpit being supplied, meanwhile, by neighboring ministers. For a considerable time he was president of the Board of Trustees of Marshall College at Mercersburg. After his removal to Mercersburg he studied the German language, and so thoroughly mastered it as to preach occasionally in that tongue to the German people in his vicinity, to their great delight. While prosecuting the above-mentioned agency with great energy and success, he was stricken down by fever, and died at Chambersburg, May, 3, 1837. Mr. Rice married, in 1821, Miss Gertrude Van Dyke, youngest daughter of Matthew Van Dyke, of Mapleton, four miles from Princeton, N. J. She was a woman of estimable character and fervent piety. She died June 9, 1837, about a month after her husband. Mr. Rice was a man of large culture and of extraordinary piety, energy, and influence. (W. P. S.)

Rice, John H. (1), a Presbyterian minister, was born at Sharon, N. Y., March 9, 1800. He received a good academic education, studied theology in Auburn Seminary, N. Y., was licensed and ordained in 1832, and subsequently became pastor of the following churches: Cambria, N. Y.; Beamsville and Grimsby, C. W.; Rutland, N. Y.; Barton, C. W.; Grand Haven, Mich.; Gowanda and Sheridan, N. Y.; Wattsburg and Wayne, Pa.; Clymer, N. Y.; Middlebrook and Green, Pa. He died in the latter place, June 21, 1858. Mr. Rice was at one time an agent for the American Tract Society. He was a faithful laborer and devoted servant of Christ. See Wilson, *Presb. Hist. Almanac*, 1860, p. 122. (J. L. S.)

Rice, John H. (2), a minister of the Methodist Episcopal Church, South, was born in Middle Tennessee, Dec. 26, 1826. He professed religion and joined the Methodist Episcopal Church in 1839. He was admitted on trial into the Arkansas Conference Nov. 9, 1849, ordained deacon Nov. 9, 1851, and elder Nov. 20, 1853. He continued in active service until 1857, when he located. He joined the Confederate army in 1863, was re-admitted into the Arkansas Conference Oct. 21, 1863, and appointed chaplain of Colonel Shaver's regiment. He was killed in a skirmish with United States troops, March 25, 1864. For many years he had been a faithful minister, an able defender of the doctrines of his Church, and a bold dispenser of truth. See *Minutes of Annual Conferences*, M. E. Church, South, 1864, p. 529.

Rice, John Holt, D.D., a Presbyterian minister, was born near New London, Bedford County, Va., Nov. 28, 1777. He became tutor in Hampden Sidney College, Va., in October, 1796, and on Sept. 12, 1803, was licensed to preach. On Sept. 29, 1804, he was ordained and installed pastor of the church at Club Creek, still

retaining his connection with the college until the latter end of the year, when he resigned his tutorship and removed to a small farm in Charlotte County. Here, his salary being insufficient, he also opened a school, and thus continued until 1812, when he became pastor of Mason's Hall, Richmond, Va. In May, 1816, he came to New York as a representative of the Bible Society of Virginia at the formation of the American Bible Society. He afterwards attended the meeting of the General Assembly at Philadelphia, where he was often sent again as a delegate from his presbytery. He was elected president of the College of New Jersey Sept. 26, 1822, as well as professor in the Union Theological Seminary in Prince Edward County, Va., on Nov. 16 of the same year: he only accepted the latter and resigned his pastoral charge. He entered upon his professorship Jan. 1, 1824. In May, 1830, he came to New York, where he delivered one of the series of the Murray Street Lectures. After this his health gradually declined until his death, Sept. 3, 1831. Dr. Rice started, in 1815, and published for a time the *Christian Monitor*, the first weekly religious newspaper which appeared in Richmond. In January, 1818, he published the first number of the *Virginia Evangelical and Literary Magazine*, which he continued till 1829. His other writings are, a memoir of S. Davies and of Rev. J. B. Taylor; also a number of occasional sermons, addresses, and pamphlets, among which we will notice his *Historical and Philosophical Considerations on Religion, addressed to James Madison, Esq.* (the ex-president), which, after being first published as successive articles in the *Southern Religious Telegraph* in 1830, appeared in a small volume in 1832. See Sprague, *Annals of the Amer. Pulpit*, iv, 325.

Rice, John Jay, a Presbyterian minister, was the son of Gabriel and Phebe (Garrard) Rice, and brother of Rev. Nathan L. Rice, D.D. He was born in Garrard County, Ky., Sept. 7, 1804, and received his early education wholly in the country schools in the neighborhood of his father's residence. At the age of fourteen he entered Centre College at Danville, Ky., but, after staying a short time, he returned home. Subsequently he again entered Centre College and remained two years, but did not graduate. While at college he and his brother Nathan were both converted during a glorious revival which occurred in Danville. Soon after, having devoted himself to the work of the ministry, he began to study theology under Rev. James C. Barnes, a widely known pastor and preacher of Kentucky, at the same time laboring in Mr. Barnes's and neighboring churches. He was licensed by the Transylvania Presbytery, April 2, 1827, but soon became convinced that he was not so well furnished as to make full proof of his ministry, and went as a licentiate to Princeton Theological Seminary, where he studied two years, 1829-31. While a student in the seminary he resided at Dutch Neck, about four miles south of Princeton, and steadily supplied the Church at that place, with frequent help from his brother Nathan. The preaching of the two brothers made a deep impression upon the people of Dutch Neck. Many were hopefully converted. The brothers were regarded with strong affection, and their names are held in tender and loving remembrance to this day among the people of the region. Having returned to Kentucky at the end of his second year in the seminary, Mr. Rice was ordained April 5, 1833, by the Presbytery of Ebenezer, and soon became widely popular as a preacher. In the years 1832-34 he preached as stated supply to the Church at Millersburg, Ky., and from 1834-35 at Maysville, Ky. But, alas! the hand of a fatal pulmonary disease was soon laid upon the zealous and eloquent preacher. After aiding his brother Nathan for two or three years in editing a religious paper which the latter had started, he felt constrained to try a milder climate, and went to Florida. There, from Tallahassee as a centre, he travelled much in Central Florida, and his soul was aroused at sight of the ignorance

of the people and their destitution of Gospel privileges. Although sick, he *must* preach; and he *did* preach until he had utterly exhausted his remaining strength. He was at length seized with a high congestive fever, and died at Quincy, Fla., Sept. 19, 1840. He was a bright and shining light. His abilities were extraordinary. His pulpit gifts were highly attractive. His spirit was Christ-like, tender, loving, full of zeal. Mr. Rice married, May 5, 1829, Miss Emily Craig Welsh, of Lincoln, Ky., and at his death left only one child, a little daughter, who still survives (1878). Had he lived to a good old age, Mr. Rice would unquestionably have been one of the most prominent and illustrious ornaments of the American pulpit. (W. P. S.)

Rice, Luther, a Baptist minister, was born in Northborough, Mass., March 25, 1783, graduated at Williams College in 1810, and immediately entered the Congregational Theological Seminary at Andover. He was ordained as a foreign missionary Feb. 6, 1812, and sailed a few days after for Calcutta; but his views on baptism having, in the meantime, undergone a change, he joined the Baptist Church on his arrival there, and came back to this country for the purpose of waking up the Baptist churches to an effort in behalf of foreign missions. He was the chief motor of the formation of the Baptist General Convention in 1814. He afterwards became agent of the Columbian College, for the establishment of which he had zealously labored, and with which he remained connected until his death, Sept. 25, 1886. See Sprague, *Annals of the Amer. Pulpit*, vi, 602.

Rice, Nathan, a Methodist minister, was born June 10, 1792, in Coventry, R. I. His mother was a member of the Freewill-Baptist Church, and the first sermon he heard by a Methodist minister was from Rev. William Jewett. He united with the Methodist Episcopal Church in Lee, Mass., at the age of seventeen years. In 1819 he joined the New York Conference, and continued in active service until 1854, when, worn down with labor, he took a superannuated relation. Mr. Rice was a true patriot, an example of simplicity, uncomplaining, of a kind and sympathetic nature which delighted in the welfare of others. His death, which occurred at Washingtonville, N. Y., Feb. 21, 1864, was very happy, a fit closing of such a life. See *Minutes of Annual Conf. M. E. Church*, 1864.

Rice, Nathan Lewis, D.D., a Presbyterian minister, was born in Garrard County, Ky., Dec. 29, 1807; died June 11, 1877. To procure funds to enable him to obtain an education preparatory to the study of law, he taught a school at the early age of sixteen. At the age of eighteen he united with the Presbyterian Church. He entered Centre College, Danville, Ky., in the fall of 1826, and during a part of his course was a teacher of Latin in the preparatory department. After remaining some years, without graduating he entered upon the study of theology, and at the close of the year was licensed to preach by the Transylvania Presbytery. Feeling the need of a more thorough preparation for the work of the ministry, he entered Princeton Theological Seminary, where, during his course, he became known for his large attainments and extraordinary ability. He accepted a call to the Presbyterian Church at Bardonia, Ky., and was ordained and installed in 1833. The more effectually to counteract the efforts at proselyting by the Roman Catholic college at that place, he established an academy for girls, and subsequently one for boys, and also founded a newspaper called the *Western Protestant*, which was afterwards merged in the *Presbyterian Herald* of Louisville. He continued in this pastoral relation for eight years, and became, in 1841, stated supply for the Church at Paris, Ky. While here he entered into a discussion with Alexander Campbell, the president of Bethany College, Va., on the subject of baptism. The debate was held in Lexington, Ky. The moderators consisted of some of the most

eminent lawyers of the state, among whom was Henry Clay. This discussion created a wide and intense interest throughout the country, and brought out the full power of Dr. Rice as a disputant, and gained for him the reputation of being the greatest polemic of the age. The debate was written out by the disputants and published in a large octavo volume, which was extensively circulated. Soon after, Dr. Rice received a call to the Central Presbyterian Church, Cincinnati, O., and entered upon his duties as its pastor in 1844. He was installed June 12, 1845. He was in labors more abundant, and in connection with his work as pastor he wrote several volumes, taught classes of candidates for the ministry, held a debate with the now archbishop Purcell of Cincinnati, which was published in a volume, also a debate with the Rev. Mr. Pingree of the Universalist Church of that city. Calls came to him from every quarter, so extensive had become his fame. In 1853, on the death of Dr. Potts, he accepted a call to the Second Presbyterian Church of St. Louis, Mo., and was installed Oct. 9 of the same year. He edited, besides his other labors, the *St. Louis Presbyterian*, and published several books. At the meeting of the General Assembly in Nashville, Tenn., in 1855, he was elected moderator. In 1858 he accepted a call to the North Presbyterian Church, Chicago, Ill. The Church was small and weak, but under his labors it grew strong and flourishing. While there he edited the *Presbyterian Expositor*. In May, 1859, he was elected by the General Assembly to the professorship of didactic and polemic theology in the North-west Theological Seminary at Chicago, which duties he performed in addition to pastoral work. In 1861 he was called to the Fifth Avenue Church in the city of New York, to succeed Dr. J. W. Alexander, deceased. Here his labors proved too great for his strength, and he sought release in 1867, and retired to a farm near New Brunswick, N. J. After resting a year, he was called to the presidency of Westminster College, Mo., where he remained until 1874, when he was elected to the chair of didactic and polemic theology in the theological seminary at Danville, Ky. Here he performed his last earthly labors; and at the close of the session in 1877, having become greatly impaired in health, he sought retirement and rest at the residence of his brother-in-law in Bracken County, Ky., where within the brief space of one month, with a mind full of peace and holy joy, he died June 11. (W. P. S.)

Rice, Phineas, D.D., an eminent Methodist preacher, was born in the State of Vermont in 1786. Having been converted when about sixteen years of age, he was soon called to publicly exercise his gifts. He was received on trial in the New York Conference in 1807, and was sent to labor as junior preacher on the Granville Circuit. The ministry of Dr. Rice extended over a period of fifty-four years, and each year during all that long period he was returned effective, and received regularly his appointment. He labored on circuits sixteen years, in stations eleven, and in the presiding elder's office twenty-eight years, excepting the last year, which was not completed at the time of his death. He was a member of every General Conference from 1820 to 1856, inclusive. He received the degree of D.D. from Wesleyan University. Dr. Rice was a marked man in every respect. His piety was deep, fervent, and abiding, and he was eminently a man of prayer. Scrupulously punctual, industrious, and self-sacrificing, he was a wise counsellor and a true friend. He had a natural vein of pleasantry, and his conceptions were not unfrequently quaint, and quaintly expressed. Even when in the pulpit, at times a facetious remark, evidently unpremeditated, would cause his hearers to smile. These smiles were not seldom suddenly followed by tears as the preacher passed from one phase of his subject to another. His pathos and tenderness were strangely blended with his wit and humor; and if one could have wished that there had been less of the latter qualities, it was

nevertheless evident that there was in them no bitterness, no harshness, no undue severity. As an expounder of ecclesiastical law and an administrator of the discipline Dr. Rice had few equals. During the last months of his life he suffered greatly but patiently, and calmly contemplated the approach of death, which came Dec. 4, 1861. See *Minutes of the Conferences, Meth. Epis. Church*, 1862, p. 70.

Rice, William H., a Presbyterian minister, was born in Shelby County, Ky., July 15, 1827. His early education was thorough; his collegiate studies were pursued in Wabash College, Ind., and Hanover College, Ind. He spent one year in the theological seminary at New Albany, Ind., was licensed to preach in April, 1853, and ordained the same year by Vincennes Presbytery, and preached as stated supply for the Church at Rockport, Ind. In 1854 he removed to Texas, in the hope of restoring his health by a warmer climate. While there he preached for the churches at Palestine and Mound Prairie, in the bounds of the Eastern Texas Presbytery. In 1858 he resigned his charge, went to Alabama, and finally, in 1859, returned to Indiana, where he died, Sept. 27, 1859. Mr. Rice had a mind that was clear and penetrating, and his preaching powers were excellent. See Wilson, *Presb. Hist. Almanac*, 1861, p. 106. (J. L. S.)

Rich, Claudius James, an Oriental traveller, was born March 28, 1787. His researches as a pioneer explorer of Oriental countries were patient and protracted, and, though not able to sink his shafts as deep as Layard and other modern explorers, his labors are equally worthy of regard. Even as scientists have been supplanted by after-discoveries, so the time may come when Wilkinson and Layard, and Schliemann and Cesnola, may be outdone by future explorers. The works of Rich are entitled, *Mémoires sur les Ruines de Babylon* (1812); — *Narrative of a Residence in Koordistan* (1836). He died Oct. 5, 1821. (W. P. S.)

Rich, Edmund, St. (French *Saint-Edme*), archbishop of Canterbury, was born in Abingdon, Berkshire, about 1190. Having studied at Oxford, he graduated in theology at the University of Paris, and lectured there for some time on Scripture. He taught philosophy at Oxford from 1219 to 1226, enjoying also a prebend in Salisbury. On April 2, 1234, he was consecrated archbishop of Canterbury, enforcing discipline, by authority given by the king, in spite of the opposition of clergy and others. Pope Gregory IX appointing Italians to vacancies, Edmund deemed this an abuse of the papal power, and, about 1239, retired to the Cistercian abbey of Pontigny, in France. Being in feeble health, he went to Soissy, in Champagne, where he died. He was canonized in 1246 by Innocent IV. Among his works are, *Constitutiones*, in thirty-six canons, found in Labbé's edition of the *Councils*: — *Speculum Ecclesiæ*, in vol. iii of *Bibliotheca Patrum*. A manuscript *Life* of St. Edmund, by his brother Robert, is preserved in the Bodleian library; another by Bertrand, his secretary, was published in Martène's *Thesaurus Anecdotorum*. See Appleton's *Cyclopædia*, s. v.

Rich, John, a minister of the Methodist Episcopal Church, South, was born in Davie County, N. C., Oct. 10, 1815. His conversion took place in 1837, he was licensed to preach in 1839, and was received into the North Carolina Conference in 1840. During the succeeding ten years of his laborious and useful life he filled many of the most important appointments in the conference with great acceptability. At the conference of 1850 he was superannuated, and on Oct. 25, 1851, he died. His distinguishing traits were clearness and penetration of thought, childlike simplicity, and unaffected piety. See *Minutes of Annual Conf. M. E. Church, South*, 1851, p. 345.

Rich, Obadiah, an American bibliophile, was born in 1783. He published several works bearing on bibliography, but that for which he was most distinguished

was the *Bibliotheca Americana Nova*. He died Jan. 20, 1850. (W. P. S.)

Richard of ARMAGH—whose real name was *Fitz-Ralph*, and whose historical name is *Armachanus*—was born in Devonshire, England, or, according to some, at Dundalk, in Ireland. He was educated at Oxford—first at University and then at Baliol College. He graduated as doctor of divinity, and in 1333 was commissary-general of that university. His first Church promotion was to the chancellorship of the Church of Lincoln, July, 1334; he was next made archdeacon of Chester, in 1336; and dean of Lichfield, April, 1337. At Oxford he opposed the affectation and irregularities of the mendicant friars. In 1347 he was advanced to the archbishopric of Armagh, and still continued his opposition to the friars, who became so incensed at his exposure of them that they had him cited before Innocent VI at Avignon, where he defended his opinions with great firmness, but was decided against by the pope. He died at Avignon, Nov. 16, 1360, not without suspicion of poison. He was unquestionably a man of great talents and sound judgment. Perhaps his best panegyric is his being ranked, by some Catholic writers, among heretics. He is said by Bale to have translated the New Test., by Fox, the whole Bible, into Irish. His published works are, *Defensio Curatorum adversus Fratres Mendicantes* (Paris, 1496): — *Sermones Quatuor ad Crucem* (Lond. 1612).

Richard of BURY, an English prelate, was born at St. Edmundsbury, Suffolk, in 1281. His family name was *Richard Angerville*, or *Angarville*. He was educated at Oxford, and became tutor to prince Edward (afterwards Edward III). Having been sent on a mission to the pope, he formed a friendship with Petrarch, and was appointed bishop of Durham in 1333. He was made high chancellor of England in 1334; treasurer of England in 1336; co-ambassador to France twice in 1338. He died in 1345. Richard was a man of great erudition, for his day, and a liberal patron of learning, as well as a great collector of books, which he devised to a company of scholars at Oxford, and which were deposited in a hall once occupying the site of Durham (now Trinity) College. For an estimate of his character, see Jortin, *Remarks on Eccles. Hist.* ii, 394. His *Philobiblon de Amore Librorum* (Cologne, 1473, 4to) was translated into English (Lond. 1832, 8vo); the American edition was collated and corrected, with notes, by Samuel Hand (Albany, 1861, 12mo and 8vo). See Alibone, *Dict. of Brit. and Amer. Authors*, s. v.

Richard of CIRENCESTER (so called from his birthplace, in Gloucestershire, England)—in Latin *Ricardus Corinensis*—was born in the first half of the 14th century. Nothing is known of his family or circumstances. In 1350 he entered the Benedictine monastery of St. Peter, Westminster (whence he is sometimes called the "Monk of Westminster"), and remained there the rest of his life. His leisure was devoted to the study of British and Anglo-Saxon history and antiquities. In the prosecution of these studies Richard is said to have visited numerous libraries and ecclesiastical establishments in England, and it is certain that in 1391 he obtained a license from his abbot to visit Rome. He died in 1401 or 1402. The work to which he owes his celebrity is his *De Situ Britannia*, a treatise on the ancient state of Great Britain. This work was brought to light by Dr. Charles J. Bertram, professor of English at Copenhagen (1747), who sent a transcript of it, together with a copy of the map, to Dr. Stukely, the celebrated antiquarian. From this transcript Dr. Stukely published an analysis of the work, with the itinerary (1757, 4to; London, 1809): — *Historia ab Hengistu ad Annum 1348*: — *Tractatus super Symbolum Majus et Minus*: — and *Liber de Officiis Ecclesiasticis*.

Richard of DEVIZES was a monk of the priory of St. Swithun, at Winchester, in the 12th century, who

wrote a history of the first years of the reign of Richard I—1189–92: *Chronicon Ricardi Divisiensis de Rebus Gestis Ricardi Primi Regis Angliæ* (Lond. 1838, 8vo):—also Richard of Cirencester's *Description of Britain*; translated and edited by J. Giles (Lond. 1841, 8vo):—*Chronicles of the Crusades* (1848, sm. 8vo). See Wright, *Biog. Brit. Lit.* etc.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Richard of HEXHAM was the first prior of his house before 1138. He compiled a short history of the last two years of the reign of Henry I, and of the more remarkable events of that of Stephen, and a history of the Church of Hexham. Tanner also attributes to him—probably on slender foundation—a history of the reign of Henry II. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Richard of ST. VICTOR, a celebrated mystic and writer of the 12th century, concerning whose life but little is known. He was of Scottish extraction, and at an early age entered the Augustinian convent of St. Victor at Paris, where he became the pupil of the learned and pious Hugo (q. v.). He was made sub-prior of the abbey in 1159 and prior in 1162, and in the latter capacity contended persistently against the bad administration and the unedifying life of the abbot Ervisius, until he effected the removal of the latter from his office. Nothing further has been handed down with reference to the circumstances of his life, save that he was a friend of St. Bernard, and died in 1173. A number of writings from his hand have been preserved, divided, as respects character, into exegetical, ethical, dogmatical, and mystical, or contemplative, works. As the exegesis is little more than mystical allegory, the works in which it is contained possess simply historical value; but those which deal with other subjects have much higher merit, though the mystical element is everywhere apparent. Of his ethical works, mention is made of his tracts, *De Statu Interioris Hominis*:—*De Eruditione Interioris Hominis*:—*De Exterminatione Mali et Promotione Boni*:—*De Differentia Peccati Mortalis et Venialis*. Of his dogmatic writings the following are prominent, *De Verbo Incarnato*, where, in imitation of Augustine, sin is praised as *felix culpa*, because it necessitated the incarnation of Christ:—two books, *De Emmanuele*, against the Jews:—and, very particularly, six books, *De Trinitate*, with which compare *De Tribus Appropriatis Personis in Trinitate*. In these works the author appears as one of the most skillful dialecticians and experienced psychologists of his time. Like his master Hugo, he aims to unite knowledge and faith, scholasticism and mysticism. He acknowledges the right of philosophical inquiry, but insists that for the Christian thinker faith is the necessary prerequisite of knowledge. This principle governs him in the work on the Trinity, which is perhaps the most remarkable product of his mind. He first shows that reason proves the existence of but one supreme substance, which is God. An examination of the divine attributes follows, particularly of power and knowledge, and it is argued that in their perfection they can belong only to the one Absolute Being. The idea of love is then introduced, in order to effect the transition to the subject of the Trinity. As love, like all the attributes of the Deity, must be perfect, it implies necessarily a plurality of Persons. Abstract love (*amor*) cannot become concrete (*caritas*) without an object upon which it may fasten. The Supreme Love can only be expended on a Supreme Object; and as it is eternal, its object must be so likewise. But as it is a proof of weakness not to allow society in love, these two Persons, who love each other, desire a third Person whom they may love with equal fervor. As there can be no inequality in the divine nature, these Persons differ simply in their origin—one being self-originated, and the others deriving their origin from him, though in an eternal sense. In his mystical writings Richard appears as the first to undertake

a scientific theory of contemplation, on which account he bore the name of *Magnus Contemplator*. He begins with a sober psychological analysis, by which he shows that reason (*ratio*) and inclination or will (*affectio*) are the fundamental powers, and that they are aided, the former by the imagination, the latter by the senses. Reason needs to perceive the forms of visible things before it can ascend to the contemplation of the invisible, and the will needs sensual objects in order to the exercise of its powers. The human spirit is the reflection of the divine, and the recognition of self and the purification of the heart are necessary to an apprehension of God, though even then supernatural help and revelation are needed. The highest aim of contemplation can only be realized "per mentis excessum," caused by the direct operation of grace, or brought about by practice, and consisting in a widening (*dilatatio*) of the spirit to greater keenness and comprehension, in an elevation (*subleatio*) by which it is exalted above itself, but retains its consciousness of external things, or in an alienation or transport (*alienatio*) in which such consciousness is lost, and a trance-like state ensues, in which present and future are seen in visions. This entire process of contemplation rests on the idea of love to God, and has for its object the recognition of God. There is no hint of an absorption into the Divine Being. The influence of this theory is seen in the tendency of the more distinguished of the scholastics to rate the objects of contemplation above those of dialectics from this time, and in the more or less complete reproduction of the theory itself in the writings of Bonaventura and in the mysticism of Gerson. With Richard of St. Victor the glory of that school came to an end. The first edition of his works appeared in Paris in 1528; reprinted at Lyons in 1534; at Cologne in 1621. The best edition is that of Rouen (1650, fol.). Concerning the MSS. of unprinted works, see the *Hist. Lit. de la France*, xiii, 486. See Schmid, *Mysticismus d. Mittelalters* (Jena, 1824), p. 308 sq.; Engelhard, *R. von St. Victor u. Joh. Ruyssbrück* (Erlangen, 1838); Liebner, *R. a Sto. V. de Contempl. Doctrina* (Gött. 1837 and 1839, 4to), pt. i, ii; Helfferich, *Christl. Mystik* (Gotha, 1842), ii, 373 sq.; Noack, *Christl. Mystik* (Königsb. 1853), i, 91 sq.; Baur, *Christl. Lehre v. d. Dreieinigkeit*, ii, 521 sq.

Richard I, king of England, surnamed CŒUR DE LION, was the third son of Henry II by his queen, Eleanor. He was born at Oxford in September, 1157. In the treaty of Montmirail, entered into Jan. 6, 1169, between Henry and Louis VII of France, it was stipulated that the duchy of Aquitaine should be made over to Richard, and that he should do homage for it to the king of France; also, that he should marry Adalais, youngest daughter of Louis. In 1173 Richard joined his mother and his brothers Henry and Geoffrey in their rebellion against the king. The rebels submitted in September, 1174, when two castles in Poitou were allotted to Richard. In 1183 a second family feud broke out in consequence of Richard refusing to do homage to his elder brother, Henry, for the duchy of Aquitaine. In this war his father sided with Richard against Henry and Geoffrey. It was ended by the death of prince Henry, when Richard, actuated probably by jealousy of his youngest brother, John, declared himself the liegeman of France for his possessions in that country. This step led to a war between the king of England and Philip of France, in which Richard fought against his father. The balance of success being decidedly with France, a treaty in accordance with this fact was about to be executed, when, by the death of Henry II, on July 6, 1189, Richard became king of England. He landed in his own country on Aug. 15, 1189, and was crowned in Westminster Abbey on Sept. 3 following. In the hope of gaining salvation, and with the certainty of following the occupation which he loved best, he now set out with an army to join the third Crusade, then about to leave Europe. He united his forces to those of France on the

plains of Vezelay, and the two armies (numbering in all 100,000 men) marched together as far as Lyons, where they separated, and proceeded by different routes to Messina, where they again met. Here Richard betrothed his nephew Arthur to the infant daughter of Tancred, king of Sicily, with whom he formed a close alliance. The Sicilian throne was at that time claimed by the emperor Henry VI; and the alliance with Tancred, from this cause, afterwards turned out a very unlucky one for Richard. Having settled a difference which now arose between him and Philip respecting his old engagement to Philip's sister Adelais, the English king, on April 7, 1191, sailed from Messina for Cyprus, carrying along with him Berengaria, daughter of Sancho VI, king of Navarre. He had fallen in love with this princess, and he married her in the island of Cyprus, where he halted on his way to Palestine. But even love did not make him forget his favorite pastime of war: he attacked and dethroned Isaac of Cyprus, alleging that he had ill-used the crews of some English ships which had been thrown on his coasts. Having then presented the island to Guy of Lusignan, he set sail on June 4, 1191, and on the 10th of the same month he reached the camp of the Crusaders, then assembled before the fortress of Acre. The prodigies of personal valor which he performed in the Holy Land have made the name of Richard the Lion-hearted more famous in romance than it is in history. The man was the creation and impersonation of his age, and the reader who follows his career may perhaps be more interested than he would be by the lives of greater men, or by the history of a more important period. On Oct. 9, 1192, he set out on his return to England. After some wanderings and adventures, he became the captive of the emperor Henry VI, who shut him up in a castle in the Tyrol. John, meanwhile, ruled in England, and he and

at Nancy. He taught theology at Paris, was made doctor, and in various ways showed himself the champion of his sect. In 1778 he was obliged to retire to Flanders in consequence of the part he had taken in a controversy concerning the marriage of a converted Jew. When the Revolution occurred, he went into Belgium, and at the time of the second French invasion, in 1794, was living at Mons. On account of his great age he was unable to flee, and, though he remained some time in concealment, was at last discovered, brought before a military commission, and sentenced to be shot. The sentence was executed on Aug. 16, 1794. His crime was that of publishing, before the entrance of the French, a treatise entitled *Parallèle des Juifs qui ont Crucifié Jésus-Christ avec les Français qui ont Exécuté leur Roi* (Mons, 1794, 8vo); and not, as Barbier pretends, one entitled *Des Droits de la Maison d'Autriche sur la Belgique* (ibid. 1794, 8vo). The works of father Richard are numerous; among them are, *Dissertation sur la Possession des Corps et l'Infestation des Maisons par les Démon* (1746, 8vo);—*Bibliothèque Sacrée*, etc. (Paris, 1760, 5 vols. fol.); in this work he was assisted by several other Dominicans; the supplement bears his name and that of Giraud; a new edition, with additions and corrections, appeared early in the present century (ibid. 1821-27, 29 vols. 8vo);—*Examen du Libelle intitulé Histoire de l'Etablissement des Moines Mendicants* (Avignon, 1767, 12mo);—*Analyse des Conciles Généraux et Particuliers* (Paris, 1772-77, 5 vols. 4to);—*La Nature en Contraste avec la Religion et la Raison* (ibid. 1773, 8vo);—*Annales de la Charité et de la Bienfaisance Chrétienne* (ibid. 1785, 2 vols. 12mo);—*Voltaire de Retour des Ombres*, etc. (Brussels and Paris, 1776, 12mo);—*Sermons* (Paris, 1789, 4 vols. 12mo). He also wrote many treatises and brochures, all relative to the civil oath required of the priests and the Revolution. See Guillon, *Les Martyrs de la Foi*; Carron, *Les Confesseurs de la Foi*, vol. iv; *Ami de la Religion*, 1822, vol. xxx; Notice in vol. i of the new edition of the *Bibliothèque Sacrée*.

Richard, Jean-Pierre, a French preacher, was born at Belfort, Feb. 7, 1743. In 1760 he was admitted to the Order of Jesuits, and on its dissolution he went to Lorraine, where he superintended the education of the nephew of the prince-bishop. About 1786 he returned to France, and preached in Paris, but did not take the oath. In 1805 he became canon of Notre Dame. He died at Paris Sept. 29, 1820. His *Sermons* were published in 1822 (Paris, 4 vols. 12mo). See *L'Ami de la Religion*, xxxiv, 65, 77.

Richardot, François, a French prelate, was born in 1507 at Morey-Ville-Église, Franche-Comté. While very young he joined the Order of Augustines at Champ-litte, and was sent in 1529 to Tournay to teach theology. He afterwards taught in Paris. During his visit to Italy, which occurred a little later, he obtained from the pope a release from the vows of his order, with permission to wear the secular dress. He was made canon of Besançon, and in this capacity rendered such efficient service to his bishop that he was made suffragan, with the title of bishop of Nicopolis. On Nov. 11, 1561, he was installed bishop of Arras, but had scarcely taken possession of the see when he obtained from Philip II the creation of the University of Douai. He founded this institution in 1562, and taught there till his death. He was a member of the Council of Trent in 1563, assisted at the provincial Council of Cambrai in 1565, and held several synods. At the taking of Malines by the duke of Alba he was made prisoner, but regained his liberty a month after. He died at Arras July 26, 1574. Of his writings we have, *Ordonnances Synodales* (Antwerp, 1588, 4to);—*Traité de Controverse, Sermons*, translated into Latin by François (Schott, 1608, 8vo);—*L'Institution des Pasteurs* (Arras, 1564, 8vo);—*Oraisons Funèbres*, of Isabella of France, wife of Philip II. His

Castle of Tiernsteigen, the Prison of King Richard.

Philip of France had good reasons for wishing that Richard should never return to his kingdom. He disappointed them; not, however, until he had paid a heavy ransom, and even, it is said, agreed to hold his kingdom as a fief of the empire. On March 13, 1194, he found himself once more in England. His brother John, who had acted so treacherously towards him, he magnanimously forgave, but with Philip of France he could not deny himself the pleasure of a war. In the contest which followed he was generally victorious, but in the end it proved fatal to himself. He was killed by an arrow shot from the castle of Chaluz, which he was besieging, on March 26, 1199. If Richard had the vices of an unscrupulous man, he had at least the virtues of a brave soldier. See Stubbs, *Chronicles and Memorials of Richard I*, from a MS. in the library of Corpus Christi College (1864). See CRUSADES.

Richard, Charles Louis, a French ecclesiastic, was born at Blainville sur l'Eau, Lorraine, in April, 1711. At the age of sixteen he entered the Dominican convent at Blainville, and took the vows of that order

works are all remarkable for great erudition. See Stapleton, *Oraison Funèbre de Richardot*, in his *Œuvres* (1620, 4 vols. fol.); Valère André, *Bibl. Belgica*; Gazet, *Hist. Eccles. des Pays-Bas*; *Gallia Christiana*, vol. iii; Dom Berthod, *Vie MSS. de Fr. Richardot*, in the *Mémoires de la Société Royale d'Arras*, p. 170.

Richardot, Jean, a French prelate, was born at Arras in the 16th century. His father sent him to the best schools in Spain, and his precocity attracting the attention of Philip II, he was admitted to the privy council of that monarch. While in Flanders, somewhat later, he was made ambassador to Clement VIII, and received in 1602 the bishopric of Arras. He was afterwards prior of Morteau, and in 1610 was made archbishop of Cambrai, which office he held till his death, Feb. 28, 1614. See Le Carpentier, *Hist. de Cambrai et du Cambrésis*.

Richards, Elias Jones, D.D., a Presbyterian minister, was the son of Hugh and Jane Ellis Jones Richards, and was born in the valley of the Dee, England, Jan. 14, 1813. While he was yet a child his parents came to the United States, and settled in the State of New York. He was prepared for college at Bloomfield Academy, in the town of Bloomfield, N. J., and was graduated at the college of New Jersey at Princeton in 1834. In early life he gave evidence of conversion, and at about seventeen years of age united with the Brick Church in the city of New York. After leaving college he spent one year in teaching as tutor in a private family at Fredericksburg, Va. In 1835 he entered Princeton Theological Seminary, and passed through a full course of three years. He was licensed by the Presbytery of New York in 1838, and ordained by the same presbytery, *sine titulo*, in New York city in the same year. For one year (1839-40) Mr. Richards preached as stated supply to the Presbyterian Church at Ann Arbor, Mich. From 1840 to 1842 he was pastor of the Second Presbyterian Church at Paterson, N. J., and from 1842 to 1846 he was pastor of the Western Presbyterian Church in the city of Philadelphia. On Oct. 14, 1846, he was installed as pastor of the First Presbyterian Church of Reading, Pa. Here he really began the best and greatest work of his life—a work which was prosecuted with fidelity, zeal, and perseverance to the end of his life. Dr. Richards was a man of great gentleness and amiability of character, yet was endowed with unusual tenacity of purpose. As a scholar, he was far above the average of his profession. As a preacher, he was pleasing, attractive, persuasive, logical, and thoroughly evangelical. As a pastor, he was faithful, kind, and dignified. In all the relations of life he was lovely and beloved, and had a strong hold upon the affections of those who knew him well. Dr. Richards was twice married: the first time to Miss Emily Theresa Ward, of Newark, N. J.; the second time to Elizabeth F. Smith, of Reading, Pa. After more than twenty-five years of active and earnest pastoral labors in Reading, he was attacked by that frightful malady known as Bright's disease of the kidneys, and, after much suffering, departed to be with Christ, March 25, 1872. His last utterance was, "My faith is in Christ." (W. P. S.)

Richards, George, D.D., an English divine, was born at Halesworth, Suffolk, in 1769. He was educated at Christ's Hospital, matriculated at Trinity College, Oxford, in 1785, and obtained a scholarship. He was made fellow of Oriel College in 1790, vicar of Bampton in 1796, and rector of St. Martin's-in-the-Fields in 1820. He died in 1837. His principal work is *The Divine Origin of Prophecy Illustrated and Defended*, in a course of sermons preached in 1800 (Oxford, 1800, 8vo). He also published several *Sermons* and *Poems*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.*, s. v.

Richards, James (1), D.D., a Presbyterian min-

ister, was born at New Canaan, Conn., Oct. 29, 1767. His early education was limited. Having finally succeeded in entering Yale College in 1789, his health soon compelled him to leave it; yet, having afterwards gone through the academical and theological course with untiring energy, the corporation of Yale College conferred upon him the degree of B.A. in 1794. In 1793 he was licensed to preach, and, having been called as pastor by the Church in Morristown, N. J., he was ordained and installed in May, 1797. In 1801 he was made M.A. by Princeton College, and in 1805, when but thirty-seven years of age, he was chosen moderator of the General Assembly of the Presbyterian Church. His ministrations at Morristown were particularly successful, but having in 1809 received a call to the congregation of Newark, he accepted it, and removed there. Here his influence gradually increased. In 1815 he preached the annual sermon before the American Board of Commissioners for Foreign Missions. The theological seminary at Auburn having been established by the Synod of Geneva in 1819, he was appointed its professor of theology in 1820. This he at first declined, but, having been re-elected in 1823, he finally accepted, and entered upon his duties Oct. 29, 1823. His rare qualities fitted him for this service, and he filled the situation with great credit to himself and benefit to others until his death, Aug. 2, 1843. Dr. Richards published a number of occasional *Sermons*, *Addresses*, and *Lectures*. After his death there were published from his MSS. a volume of *Lectures on Mental Philosophy and Theology*, with a sketch of his life by the Rev. Samuel H. Gridley (1846, 8vo), and some twenty *Discourses* (1849, 12mo).—Sprague, *Annals of the Amer. Pulpit*, iv, 99. See also the *Meth. Quar. Rev.* Jan. 1850; Plumley, *Presbyterian Church*, p. 371.

Richards, James (2), a Congregational minister, was born at Abington, Mass., Feb. 23, 1784. He graduated at Williams College in 1809, entered the ministry in 1812, and, having offered himself to the American Board, sailed, with eight others, Oct. 23, 1815, for Ceylon. He was stationed at Batticotta, but, his health failing, he went to Cape Town in 1818, and returned the next winter, after which he was able to labor a year from April, 1820, and died Aug. 3, 1822. See Sprague, *Annals of the Amer. Pulpit*, ii, 596.

Richards, John J., a minister of the Methodist Episcopal Church, South, was born July 16, 1816. He united with the Church in his thirteenth year, and for several years filled the office of class-leader, Sunday-school teacher, and exhorter. In 1837 he was licensed to preach, and admitted on trial in the Georgia Conference in 1839, in which connection he remained until 1844, when he was transferred to the Florida Conference. There he labored until 1860, when, because of failing health, he was superannuated, and held that relation until his death—Sept. 4, 1863—in Madison County, Fla. Mr. Richards was a sound and practical preacher, devoting his time and talents to the service of the Church. See *Minutes of Ann. Conf. M. E. Ch. South*, 1863, p. 467.

Richards, John W., D.D., a Lutheran minister, was born in Reading, Pa., April 18, 1803, and made a public profession of religion in his sixteenth year. His classical studies were pursued chiefly under the instruction of Rev. Dr. J. Grier. In 1821 he commenced the study of theology under the direction of his pastor, Dr. Muhlenburg, remaining with him until 1824, when the Synod of Pennsylvania licensed him to preach. He resigned his first charge (New Holland, Lancaster County, Pa.) in 1834, and removed to Trappe, Montgomery County. In 1836 he accepted a call to Germantown, Pa., where he remained till 1845, when he became pastor of St. John's Church, Easton, Pa. While here he held the professorship of German language and literature in Lafayette College. In 1851 he took charge of Trinity Church, Reading, Pa., and died Jan. 24, 1854. He was made doctor of divinity by Jefferson College in 1852.

He published two *Sermons*, and left in MS. a translation of *Itallische Nachrichten*, and a *History of the American Lutheran Church*. See Sprague, *Annals of the Amer. Pulpit*, ix, 165.

Richards, Jonas De Forest, LL.D., a Congregational minister, was born at Hartford, Vt., Dec. 28, 1809. After attending a grammar school, he entered Dartmouth College, where he graduated in 1836, and became tutor in Marietta College, O., where he remained but a short time, and then entered Lane Theological Seminary, at Cincinnati, O. From thence he went to New York and entered Union Theological Seminary, where he remained one year, and then matriculated at Andover Theological Seminary, where he graduated in 1840, staying long enough at each of these institutions to become acquainted with their policy and modes of instruction. On May 28, 1841, he was ordained and installed pastor of a Church in Charlestown, N.H. After remaining ten years, his pastoral relation was dissolved, and he accepted a call from Chester, Vt., where he remained four years as a stated supply. His next pastorate was Weathersfield, Vt., where he continued five years, at the end of which time he removed to Monroe, Mich., where he remained without charge for three years and returned to Weathersfield. After remaining one year in this place, he went South, and was elected a member of the Alabama Senate, which post he occupied four years, in the meantime being elected to a professorship in the University of Alabama. He died during his professorship, Dec. 2, 1872. (W. P. S.)

Richards, Lewis, a Baptist minister, was born in 1752, in the parish of Llanbadarn Fawr, Cardiganshire, South Wales. At the age of nineteen years he made a public profession of religion, and joined a society of Independents and studied for a short time in Lady Huntingdon's College. He then came to America, intending to pursue his studies at the Orphan House in Georgia. He was ordained in Charleston in 1777, and after travelling about a year in various parts of South Carolina and Georgia he removed to Northampton County, Va. In 1784 he became the pastor of the First Baptist Church in Baltimore. He continued alone in this pastorate till 1815, when Rev. E. J. Reis was elected co-pastor. Mr. Richards resigned his charge in 1818, but continued a member of the Church until his death, Feb. 1, 1832. See Sprague, *Annals of the Amer. Pulpit*, vi, 201.

Richards, Robert R., a Methodist preacher, joined the Methodist Episcopal Church in Thomaston (now city of Rockland), Me., in 1838. Of his birth and early life we have no information. In 1841 he was admitted into the Maine Conference as a probationer, was ordained deacon in 1843, and elder in 1848. For twenty-three years he sustained an effective relation in the conference, but in 1864 failing health compelled him to take a superannuated relation, which relation he sustained until Aug. 9, 1866, the date of his death. He was a man of sound understanding and great perseverance; as a friend, true and faithful; as a preacher, clear, logical, and instructive. See *Minutes of Annual Conf. M. E. Church*, 1867, p. 138.

Richards, Thomas T. S., a minister of the Methodist Episcopal Church, was born in Baltimore, Md., Sept. 13, 1834. He professed conversion when in his thirteenth year, and in due time entered the ranks of the local ministry. In 1864 he was received on trial in the East Baltimore Conference, and continued in active service until the fall of 1868, when failing health compelled him to seek relief in rest. In the spring of 1869 he was transferred to the Baltimore Conference and given a supernumerary relation. He died Dec. 26, 1869. Mr. Richards was a preacher of creditable abilities, and, as a Christian, was ardent and devout. See *Minutes of Annual Conferences*, 1870, p. 19.

Richards, William (1), LL.D., a Baptist minister of distinction, was born in 1749, in South Wales. His

early advantages for obtaining an education were very limited. At the age of twenty-four he entered the academy at Bristol, England, where he remained two years. He became pastor of the Church in Lynn, England, July 7, 1776, and continued his residence in that place the remainder of his life, about half the time as pastor of the Church. He died in 1818. In English and Welsh history and in the Welsh language and literature Dr. Richards was well versed. He wrote, *History of Lynn:—A Review of Noble's "Memoirs of the Protectoral House of Cromwell."*—and a *Dictionary of Welsh and English*. At his death he bequeathed his library—consisting of not far from 1300 volumes—to Brown University. "The library thus bequeathed is in many respects valuable; it contains a considerable number of Welsh books, a large collection of works illustrating the history and antiquities of England and Wales, besides two or three hundred bound volumes of pamphlets, some of them very ancient, rare, and curious. The collection is particularly valuable for its treatises on civil and religious liberty" (Guild, *Manning and Brown University*, p. 145-147). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v. (J. C. S.)

Richards, William (2), a Congregational minister, was born in Plainfield, Mass., Aug. 22, 1792. He graduated at Williams College in 1819, and in Feb., 1822, offered himself to the American Board as a missionary to the Sandwich Islands. He was accepted, ordained Sept. 12, and sailed on Nov. 19, with two others, and four natives of the islands who had been instructed in this country. Mr. Richards was stationed at Lahaina, on Mani Island, and labored with great success until 1837, when he came to the United States, but returned in 1838, and occupied the posts of king's counsellor, interpreter, and chaplain. In 1842—after the organization of an independent government on the islands—he was sent as ambassador to England, where he remained three years. After his return he lived in Honolulu with the king, and died there, Dec. 7, 1847. See Sprague, *Annals of the Amer. Pulpit*, ii, 688.

Richards, William I., a minister of the Methodist Episcopal Church, was born in Fulton County, N. Y., July 30, 1815. He was converted when nineteen years of age, and for several years served as a local preacher, but entered the Black River Conference in 1850. He continued in active service (with the exception of one year) until his death—in Clarkson, Monroe County, N. Y.—May 22, 1875. He was a man of piety and great usefulness. See *Minutes of Annual Conferences*, 1875, p. 137.

Richards, William K., a minister of the Methodist Episcopal Church, was born in Tennessee, Aug. 20, 1816, and in the same year his parents removed to Indiana. In 1837 he professed conversion; he was licensed to preach on Aug. 13, 1844; was employed by the presiding elder in 1851, and the next fall was admitted into the Indiana Conference. He labored until a few weeks previous to April 6, 1861, the date of his death. He was a good man and a strong preacher. See *Minutes of Annual Conferences*, 1861, p. 197.

Richards, William Lyman, a native Indian missionary, was born in Lahina, Southern India, Dec. 2, 1823. He was sent to America to be educated with a view to the ministry. He accordingly entered Jefferson College, Va., where he graduated in 1841. Soon after he left college he became teacher of a classical school in Woodington, Va., where he remained one year, and then entered the Union Theological Seminary, where he graduated in 1846. He received license to preach at the same time, and was ordained to the Gospel ministry in Oct., 1847, and sent as a missionary to Fuh Chau, China, at which place he remained until 1851, when, on account of declining health, he was released and advised to return to the United States for its recovery, but died at sea near St. Helena, in the South Atlantic, June 5 of the same year. (W. P. S.)

Richardson, Chauncey, a Methodist minister, was born in Vermont in 1802. When nineteen years of age he professed conversion, and in 1823 was licensed to preach. In 1826 he was received on trial by the New England Conference, and in 1832, because of impaired health, was obliged to locate. His first residence in the South was at Tuscumbia, Ala., where he labored to build up an educational institution. He was elected president of Rutgersville College, Texas, in 1839, and became a member of the first Annual Conference in Texas, 1840. He was also a member of the convention held in Louisville, 1845, to organize the Methodist Episcopal Church, South; and of its General Conference in 1850. He served the Church as presiding elder, as editor of the Church paper, the *Texas Wesleyan Banner*, and as conference secretary for several years. He died April 11, 1852. Mr. Richardson was a good, gifted, trusty man. See Sprague, *Annals of the Amer. Pulpit*, vii, 721; *Minutes of Annual Conf. M. E. Church, South*, 1852, p. 423.

Richardson, James, D.D., fourth bishop of the Methodist Episcopal Church in Canada after the separate organization of 1828, was born at Kingston, Upper Canada, Jan. 29, 1791. He was trained as a sailor on the lakes; in the war of 1812-15 he served as a lieutenant in the provincial marine, and subsequently as principal pilot of the royal fleet. In the capture of the fort of Oswego he lost his left arm. At the close of the war he settled at Presque Isle, and became magistrate and collector of customs. He was converted in 1817, and joined the Methodist Episcopal Church the following year, serving the Church as steward and local preacher. In 1825 he was admitted on trial into the Conference, and was ordained deacon at Hamilton Conference, 1827, but was not ordained elder till 1830. In 1831 Mr. Richardson was appointed presiding elder of the Niagara district, and in 1832 editor of *The Christian Guardian*. He opposed the union with the British Wesleyans in 1833, but finally acceded to it and accepted appointments under it. But afterwards, being dissatisfied, he removed to the United States, and was preacher in charge at Auburn. In 1837 he returned to Toronto and joined those who continued to adhere to Episcopal Methodism. In 1840 he became agent for the Upper Canada Bible Society, and held the office for eleven years. In 1852 he was appointed presiding elder, and in 1858, at St. Davids, he was elected and consecrated bishop, which office he held until his death, in March, 1875. See Simpson, *Cyclop. of Methodism*, s. v.

Richardson, James J., a minister of the Methodist Episcopal Church, was born in Tennessee in 1808. He experienced religion in 1822, and in 1827 emigrated to Illinois. He was admitted on trial in the Illinois Conference in 1837, and served the Church in active work until 1856, when, because of failing health, he took a superannuated relation. In 1859 he became effective, but in 1862 he was again superannuated. In 1865 he was appointed to Spring Garden Circuit, which he served three years. He then travelled Benton Circuit one year, at the close of which the active labor of his life ceased. His death occurred Sept. 21, 1872, in Marion County, Ill. Mr. Richardson was a plain, practical, and earnest preacher, and a prudent disciplinarian. See *Minutes of Annual Conf.* 1872, p. 136.

Richardson, James Monroe, a Presbyterian minister, was born in Carroll County, Miss., in 1829. He went to Mississippi College, where he graduated in 1849, and entered the Union Theological Seminary and passed through the full course, graduating in 1852. He was ordained in 1853, and became a stated supply of the Church at Marion, Miss., where he remained five years, and began the profession of teacher in Enterprise, Miss. In 1860 he supplied the Church at Flower's Place, Miss. After this he entered the Con-

federate army as an officer, and was killed in battle in Georgia in 1864. (W. P. S.)

Richardson, J. Clark, a Presbyterian minister, was born in East Windsor, Conn., in 1822. He spent some time in Yale College, but was compelled to discontinue because of sickness. Subsequently he passed a year, in the double character of pupil and tutor, in the University of Knoxville, Tenn. In 1847 he acted as colporteur in Kentucky and Tennessee; in 1849 he was licensed by the Presbytery of Tennessee, and was associated with James G. Fee as a missionary until 1860, when he accepted an invitation to Oramel, Alleghany Co., N. Y., where he was ordained by Genesee Valley Presbytery, and where he continued his acceptable labors until his removal to Ossian, N. Y., in 1865. He died Sept. 30, 1865. Mr. Richardson was a devoted, self-denying minister of the Gospel; in spirit, humble and retiring; in the maintenance of truth and the discharge of duty, extremely conscientious. See Wilson, *Presb. Hist. A. Manac*, 1866, p. 222. (J. L. S.)

Richardson, John, bishop of Ardagh, was a native of Chester, England, but took his degree of D.D. at the University of Dublin. Of his early life we know nothing, save that he was appointed preacher to the state in 1601. He was consecrated bishop of Ardagh in 1633, and held the archdeanery of Derry, the rectory of Ardstra, and the vicarage of Granard for a year after. In 1641, being in dread of the rebellion which broke out in October, he removed to England, and died in London, Aug. 11, 1654. He was a man of profound learning, well versed in the Scriptures, and skilled in sacred chronology. His works are, *Choice Observations and Explanations upon the Old Testament* (1655, fol.):—*Sermon of the Doctrine of Justification* (Dublin, 1625, 4to). He also wrote the "Assembly's Annotations" on Ezekiel. See Harris, *Ware*; Lloyd, *Memoirs*, p. 607.

Richardson, John P., a minister of the Methodist Episcopal Church, South, was born in Virginia, 1829, and was admitted into the Memphis Conference in 1848 or 1849. After five or six years his health failed; he located, studied medicine, and graduated as a physician. He was readmitted into the Mississippi Conference in 1860, and after a year's successful labor volunteered as a soldier in the Confederate army, receiving the appointment of chaplain. At the fall of Fort Donaldson, he was taken prisoner and carried to Camp Chase, Ohio, where he died, March 4, 1862. Mr. Richardson was a superior preacher, a close and indefatigable minister, and active and zealous as a Christian. See *Minutes of Annual Conf. M. E. Church, South*, 1862, p. 384.

Richardson, Lyman, a Presbyterian minister, was born in Attleborough, Mass., in 1790. In 1806 his parents removed to Harford, Pa.; he had at this time a fair education, with some knowledge of Latin, and in the winter of 1807-8 he taught his first school, which employment he continued in subsequent years. He was converted in 1809, and immediately turned his attention to the ministry. A friend secured for him the position of assistant in the academy at Wilkesbarre, Pa., of which he subsequently became principal; he remained there three years, devoting all his spare time to his classical studies, and then returned to Harford, Pa., and opened a select school for youths pursuing the higher branches of study. He remained at Harford three years, during which he studied theology under Rev. Ebenezer Kingsbury, and in 1820 was licensed by Susquehanna Presbytery, and soon after entered upon his ministry at Louisville, now Franklin, Pa. Subsequently he was ordained as an evangelist, and as such he preached at Wyalusing, Pike, and Orwell, Pa.; at Windsor, N. Y., three years; at Mount Pleasant and Bethany, Pa.; and at Wysox, Pa. In 1840 he returned to Harford, Pa., to take charge of the academy, then a

very popular institution. This work suited him exactly, and he entered into it with great zeal and success, until 1865, when disease and old age induced him to give it up. He died Dec. 1, 1867. As a preacher, Mr. Richardson was characterized by the power of glowing representations of truth and earnest love for souls; as a teacher, by kindness of manner and spirit, and by his wise counsel. See Wilson, *Presb. Hist. Almanac*, 1868, p. 225. (J. L. S.)

Richardson, Manoah, a Methodist preacher, was born in Lincoln County, Tenn., June 21, 1814; went to Missouri in early life, and settled in Chariton County. He joined the Church in 1831; was licensed to preach Jan. 16, 1841; entered the itinerancy Oct. 16, 1841; and was ordained deacon Oct. 1, 1843; elder Oct. 7, 1845. He did effective work for six years, when he superannuated, owing to failing health, and located at the end of a year. In 1868 he was readmitted into the Missouri Conference, and labored until about four weeks previous to his death, which occurred in Bloomington, Macon Co., Mo., April 18, 1871. He was a good man and a faithful preacher. See *Minutes of Annual Conf. M. E. Church, South*, 1871, p. 606.

Richardson, Marvin, D.D., a prominent Methodist minister, was born in Stephentown, Rensselaer Co., N. Y., June 10, 1789, but went, with his parents, in early youth to Brooklyn. He professed conversion in May, 1806, and united with the Sands Street Methodist Episcopal Church in that city. On Oct. 1, 1808, he was appointed to fill a vacancy on Croton Circuit, and was admitted into the New York Conference in 1809, of which he continued to be a member for sixty-seven years. He received his regular appointment as an effective minister forty-two consecutive years. He was a member of eight successive General Conferences—1820-52. Mr. Richardson in his early ministry endured the hardship, deprivation, and toil of pioneer life. The record of his life is one of early and deep religious experience, of consistent piety, of ardent love to God and the Church, of a successful ministry, and at the close a record of patient waiting and holy triumph. His last words were, "I have no fear." He died at Poughkeepsie, N. Y., June 14, 1876. See *Minutes of Annual Conferences M. E. Church*, 1877, p. 41.

Richardson, Robert Hugh, a Presbyterian minister, was born at Liberty, Va., March 13, 1834. After receiving a preparatory education, he entered the Union Theological Seminary in 1860, and, taking the full course, graduated in 1863. He was appointed—after he had been duly licensed by the New York Presbytery—a city missionary of New York, and remained in that office till he died, Oct. 6, 1863. Though his ministerial life was brief, it was not without its usefulness or good fruits. (W. P. S.)

Richardson, William, D.D., an English clergyman, was born in 1698, at Wilshamstead, near Bedford, and educated at Westminster and Emmanuel colleges, Cambridge. He was appointed curate of St. Olave's, Southwark; and lecturer in 1727. He was collated to the prebend of Welton-Rivall, Lincoln, in 1724; was made master of Emmanuel College in 1736, and its vice-chancellor in 1738, and again in 1769; in 1746 he was appointed chaplain to the king. He died in 1775. He published four sermons on *The Usefulness and Necessity of Revelation* (Lond. 1730, 8vo):—a fifth on *Relative Holiness* (1733).

Richelieu, Alphonse-Louis du Plessis de, called the cardinal of Lyons, elder brother of the great French marshal, was born at Paris in 1582. At the age of twenty-two he became bishop of Luçon, but about 1605 he resigned the see in favor of his brother Armand. In 1606 he entered the convent of Grande-Chartreuse, and for twenty years led a life of great austerity. He was prior of Bonpas when his brother obliged him to leave the cloister to occupy the archbishopric of Aix. In 1628

he was transferred to Lyons, and was made cardinal by Urban VIII, Aug. 21, 1629. Honors were heaped upon him, and he became, successively, grand almoner of France in 1632; dean of St. Martin's of Tours in the same year; abbot of St. Victor's, at Marseilles, and of St. Stephen's, at Caen, in 1640; of the Chaise-Dieu in 1642; and, on the death of his brother, was elected master of the Sorbonne. Meanwhile he was engaged in the work of his diocese, and, during the ravages of an epidemic in Lyons, was untiring in his efforts to aid the suffering. Louis XIII had several times engaged him in ecclesiastical affairs, but after the death of this monarch Richelieu seldom left Lyons, and gave little attention to the court intrigues of the day. He died March 23, 1653. In the Imperial Library are to be found letters written by Richelieu to Louis XIII and the most illustrious persons of his court. See Abbé de Pure, *Vie de Richelieu, Cardinal de Lyon*; Du Tems, *Le Clergé de France*, t. iv; Aubéry, *Dict. des Cardinaux*.

Richelieu, Armand Jean du Plessis de, a noted French ecclesiastic and statesman, was born at Paris, Sept. 5, 1585, and was educated for the military profession at the College de Navarre. His eldest brother resigning the bishopric of Luçon, Richelieu decided to take holy orders in order to succeed to that office. In 1607 he was consecrated bishop of Luçon, and for some time devoted himself zealously to the duties of his office. At the States-General, 1614, being appointed one of the representatives of the clergy, he secured the favor of the queen-mother—Marie de Médicis—by an address delivered in the presence of the young king, Louis XIII. He was appointed almoner to the queen-mother, and in Nov., 1616, entered the council as secretary of state. In 1617 Mary was banished to Blois, and he followed her thither, but was ordered to retire to Avignon. When the queen-mother was recalled to the court she reinstated Richelieu in favor, and from that time he grew in power. Having strengthened his position by the marriage of his niece with the nephew of the duke De Luynes, he received the cardinal's hat in 1622, re-entered the state council, and soon after rose to the premiership. The administration of Richelieu was memorable for several great measures, of which the first and most lasting was that by which the remains of feudalism were swept away and the absolute authority of the sovereign was established. In the pursuit of this object his most powerful adversary was Gaston, the duke of Orleans, brother of the king. But Richelieu triumphed over him, and even the queen-mother was obliged to bow before his unbending spirit and to withdraw into exile at Cologne. Another enterprise was the overthrow of the Huguenots as a political party and a rival of the throne of France. He conducted in person (1628) the siege of Rochelle, but is said to have secured for the Huguenot party a certain measure of toleration, and to have used his success against them with moderation. In 1631 Richelieu was raised to the dukedom and peerage. In the external relations of France the great object of Richelieu's measures was the abasement of Austria. With this view he did not hesitate to foment the internal disaffections of Germany, even allying himself with the German Protestants, and assisted Gustavus Adolphus of Sweden, the great champion of Protestantism. He also took part with the disaffected Spanish provinces in the Netherlands, and favored the Catalonians and Portuguese when they shook off the Spanish yoke. At last Austria was humbled, Portugal was separated from Spain (1640), French influence predominated in Catalonia, England was in full revolution, and France quiet and prosperous. His administration was again threatened by intrigues at court or treason in the camps. Richelieu, however, vindicated his power, and in 1642 came into Paris in triumph, carried on a litter, escorted by an army, and surrounded by the utmost pomp. Two months afterwards—Dec. 4, 1642—he died, and was buried at the Sorbonne, where

his mausoleum (the celebrated Girardon's masterpiece) may be seen. Busy with affairs of state, with war abroad, and dissension, plots, and treason at home, Richelieu nevertheless promoted arts and sciences, founded the Jardin du Roi (now Jardin des Plantes), also the French Academy and the royal printing-office, built the Palais Royal, and rebuilt the Sorbonne. He also found time to write several works and two plays—*Mirame*, a comedy, and *La Grande Pastorale*. He is regarded as the author of *Mémoires du Cardinal de Richelieu* (first published complete by Petitot [Paris, 1823]):—*Le Testament Politique* (1764, 2 vols.):—and of *Le Journal de M. le Cardinal de Richelieu* (Amst. 1643, 2 vols.). His theological works are, *La Défense des Principaux Points de la Foi Catholique*, etc. (1617):—*L'Instruction du Chrétien* (1619). See Aubéry, *Mémoires du Cardinal de Richelieu* (1660); Jay, *Histoire du Ministère de Richelieu*; Capefigue, *Richelieu et Mazarin* (1836); Martin, *Histoire de France*; Michelet, *Histoire de France*; Violart, *Histoire du Ministère de Richelieu* (1649); Caillet, *L'Administration en France sous Richelieu* (1861, 2 vols.); Robson, *Life of Cardinal Richelieu* (1854); Sully, *Mémoires*; Retz, *Mémoires*.

Richer, EDMUND, a noted defender of the liberties of the Gallican Church against papal absolutism, was born, of poor parents, in a village in Champagne, Sept. 30, 1560. He became doctor in theology in 1590, and for a time devoted his energies to pulpit labors; but in 1594 he was made president of the College of Cardinal Lemoine, and soon afterwards censor of the University of Paris, in whose faculty he filled a theological chair. He undertook an edition of Gerson's works in 1605, the publication of which was defeated by the papal nuncio Barberini (subsequently pope Urban VIII), and which called forth the violent condemnation of Gerson's works by Bellarmine. Richer's defence (*Apologia pro J. Gersonio* [1606]) was not published until after his death (Leyden, 1674, 4to); but Gerson's writings appeared in 1607. Appointed syndic of the theological faculty in the following year, he opposed the public defence of the theses on the infallibility of the pope; and, in response to the request of Nicholas de Verdun, the first president, he wrote the book *De Ecclesiastica et Politica Potestate*, in which he developed the idea—always held by the University of Paris—of the superiority of councils over the pope, and of the independence of secular governments in temporal things. This book brought on him the rage of the ultramontane party. He was dismissed from the university, his teachings were condemned by several provincial synods and the papal court, and he was prohibited from replying to the charges promulgated against him. He was even apprehended, but again liberated on the demand of the university. A protracted contest with his enemies ensued, in which he was finally conquered by cardinal Richelieu. He signed a retraction at the point of the dagger of assassins hired to take his life. His death took place Nov. 28, 1631. See Baillet, *La Vie d'Edm. Richer* (Amst. 1715, 12mo).

Riches (the rendering in the A. V. of several Heb. and Gr. words, especially רִכְשׁ, *riksh*). The wealth of a pastoral people, such as the Hebrews in the patriarchal age, consisted chiefly in flocks and herds. Hence we find it assigned as a cause of the separation of Esau and Jacob that "their riches were more than they might dwell together; and the land wherein they were strangers could not bear them because of their cattle" (Gen. xxxvi, 8). It was not until the reign of Solomon that the Jews possessed any abundance of the precious metals; and as the nation never became commercial, its rich men must in all ages have been the great land-holders. Throughout the East the holders of land have ever been remarkable for exacting very disproportionate shares of the profit from the actual cultivators of the soil, and this is the reason why we find "the rich" so often and so severely denounced in Scripture. Riches is frequent-

ly used in a metaphorical sense for intellectual endowments, and for the gifts and graces of God's Holy Spirit, which constitute the treasure to be "laid up in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through and steal."

Richey, DANIEL, a Methodist minister, was born in New Jersey in 1797, and moved when quite young to the neighborhood of Cayuga Lake, N. Y. His connection with the travelling ministry began in the Pittsburgh Conference, 1829, and continued up to the time of the Erie Annual Conference, July, 1845, when he was placed in a superannuated relation, which continued until his death, March 25, 1855. In point of zeal, integrity, and fidelity to duty and principles, he had few equals. See *Minutes of Annual Conferences*, 1855.

Richmond, Francis M., a Methodist preacher, was born in Herkimer County, N. Y., in 1803, and emigrated to Indiana in 1817. Although reared under Baptist influence, he united with the Methodist Episcopal Church at the age of twenty-five years. In 1836 he was admitted on trial into the travelling connection, and, with the exception of a temporary location under pressure of domestic circumstances, he labored faithfully to the close of life. His last appointment was to Greenfield Circuit, North Indiana Conference, but, after laboring a few months, was smitten down in the prime of life, in 1853. He was a sound theologian, and a powerful, practical, and experimental preacher. See *Minutes of Annual Conferences*, 1853, p. 283.

Richmond, Legh, an English clergyman, was born in Liverpool, Jan. 29, 1772. He graduated at Trinity College, Cambridge, in 1794, and was ordained in 1797. He became curate of Brading and Yaverland, in the Isle of Wight, in 1798, and, in 1805, chaplain to the Lock Hospital, London. In the same year he was presented to the rectory of Turvey, Bedfordshire, which he held until his death, May 8, 1827. Mr. Richmond was the author of several tracts—*The Dairyman's Daughter*, *The Negro Servant*, *The Young Cottager*—published separately at first, but afterwards (1814) collected into two volumes 12mo, under the title of *Annals of the Poor*. Of *The Dairyman's Daughter* four millions of copies, in nineteen languages, had been circulated before 1849. He also edited *The Fathers of the English Church* (Lond. 1807–12, 8 vols. 8vo), and published *Domestic Portraiture*:—*Memoirs of his three children* (9th ed. Lond. 1861, 8vo):—*a Missionary Sermon* (1809, 8vo), and a *Memoir of Miss H. Sinclair*.

Richmond, Paul C., a minister of the Methodist Episcopal Church, was born in Barnard, Vt., where he passed his early manhood. He received license to preach in March, 1825, and soon after was received on trial into the New England Conference. After filling several appointments in Vermont, he was in 1829 transferred to Maine Conference, where he did effective work until 1855, when failing health compelled him to take a superannuated relation. He resided in Frysburgh, and continued to labor as his strength allowed. He died there, May 29, 1875. He was well versed in Scripture, apt in illustration, an able and successful minister. See *Minutes of Annual Conferences*, 1876, p. 87.

Richter, Aemilius Ludwig, a distinguished teacher of jurisprudence in Germany, who rendered especially meritorious services in the department of ecclesiastical law. Richter was born at Stolpen, near Dresden, on Feb. 15, 1808, and entered Leipzig University in 1826. After graduating, he became an advocate, and at once began to write in the field of ecclesiastical jurisprudence; and he added to these functions those of a teacher in the university, at first as a tutor, and subsequently, in 1835, as extraordinary professor. His labors were already attracting notice by that time, and obtained for him the doctorate of laws from the University of Göttingen, to which the University of Greifswald, twenty years later, added that of divinity. In 1838,

Richter was made professor of ecclesiastical and civil law in the University of Marburg. Eight years of quiet but productive labors were spent in that station, and he was then transferred to the High-school at Berlin, where he entered on a career which made him felt throughout Germany within the limits of his chosen field. His studies were given to the world in numerous writings, and the conclusions reached by him were brought to bear in the administration of the Department of Religion, under whose ministry he held various important posts; and his thorough learning, and fair yet conscientious spirit, gave him a commanding position with reference to Church laws and methods of administration, not only in Prussia, but in many other German lands. Few laws were passed relating to the churches, and few changes in their administration introduced, during the period of his connection with the government, in respect to which he did not exert a more or less determining influence. He died, after a long and severe illness, May 8, 1864.

The attitude of Richter towards the ecclesiastical issues of his time was largely determined by the principle, fundamental in his view, that the *jus circa sacra* belongs inseparably to the State as a moral power. He believed it wise that the State should allow freedom of action to the Church within its own appropriate field; but insisted that for the regulation of mixed questions, for the restraining of ecclesiastical intrusions into the secular realm, for the repression of notoriously aggressive and thoroughly organized religious parties, e. g. the Order of the Jesuits; for the protection of the rights of one ecclesiastical organization as against the encroachments of others, etc., the right of sovereignty must be retained by the State. He was accordingly opposed to the course of the Raumer ministry, which simply ignored the necessity for restraining the unconstitutional demands of the Roman Catholic Church, in consequence of which the Jesuits flooded the western provinces of Prussia, and formed settlements without corporate titles as required by law, and even without coming under any kind of legal supervision. He was also opposed to the concordats concluded between several states and the pope, as being radically wrong. With regard to the evangelical churches of Germany, Richter condemned the territorial no less than the episcopal system, and favored that in which the sovereign prince is endowed with authority, while the Church itself is thoroughly organized into congregations (not *parishes*), presbyteries, and synods. The merit of Richter as a writer on ecclesiastical law consists in his having based his works on a wide collection of previously unused material as well as that to which reference was ordinarily made, and on a profound investigation of all the sources at command, and also in the absolute fairness of his spirit. These qualities appear as clearly in his works on Roman Catholic law as elsewhere. His earliest publication, the *Corpus Juris Canonici* (1833-39), is the best edition of that book extant. Other early books are, *Beiträge zur Kenntnis d. kanon. Rechts* (Leips. 1834):—*De Inedit. Decretal. Coll. Lipsiensis* (Lips. 1836). In connection with Schulte he also published a large edition of the *Canones et Decret. Conc. Tridentini* (ibid. 1853). An epochal book in its department was his *Lehrbuch des kath. und evangel. Kirchenrechts*, etc. (Leips. 1842; 6th posthumous ed. 1865); and similar importance attaches to the collection entitled *Die evangel. Kirchenordnungen des 16ten Jahrhunderts*, etc. (Weimar, 1846, 2 vols.).

Richter, Christian Friedrich, a German hymnologist, was born at Sorau, in Silesia, Oct. 5, 1676. He studied medicine and theology at Halle, and after the completion of his studies was appointed by Francke superintendent of the academy. After the death of his brother, he was also appointed medical attendant of the Orphan-house there. In conjunction with his brother, Dr. Christian Sigismund Richter, he discovered the celebrated Halle medicine, prepared from gold, and called

essentia dulcis, and which gave a great name to the Orphan-house at Halle. The profits of this medicine he devoted to the benefit of the institution. From his twentieth year he composed hymns, and thirty-three excellent and deeply spiritual Christian hymns are attributed to him. Knapp, in his *Liederschatz*, gives fourteen of his hymns, some of which have also been translated into English, as, *Mein Salomo! dein freundliches Regieren*, by Dr. Bomberger, in Schaff's *Kirchenfreund*, ii, 337 ("Jesus my king! thy mild and kind control"); *Hüter wird die Nacht der Sünden*, in *Sacred Lyrics*, p. 32 ("O watchman, will the night of sin"); *Hier legt mein Sinn vor dir sich nieder*, in the *Moravian Hymn-book*, No. 437 ("My soul before thee prostrate lies"); *Gott, den ich als Liebe kenne*, by Cox, in *Hymns from the German*, p. 190 ("O God, whose attributes shine forth in turn"). Richter was also the author of a remarkable medical treatise on the Crucifixion of Christ. He died October 5, 1711. See Koch, *Geschichte des Kirchenliedes*, iv, 296, 355 sq.; viii, 246 sq., 297, 434, 515; Miller, *Singers and Songs of the Church*, p. 141 sq.; Jöcher, *Gelehrten-Lexikon*, s. v.; *Richter's Leben und Wirken als Arzt, Theolog und Dichter* (published by the Haupt-Verein für christl. Erbauungsschriften in den preussischen Staaten, Berlin, 1865). (B. P.)

Richter, Henry, an English painter, of German extraction, was born in 1772. He resided mostly in London, where he died in 1857. His most important historical work is *Christ restoring Sight to the Blind*, now in a church at Greenwich, England.

Richter, Johann Heinrich, inspector of the missionary institute at Barmen, Germany, under whose administration the missions of the Rhenish Missionary Society were established, was born at Belleben Dec. 11, 1799, and entered on the duties of the station in which he spent his life May 28, 1827. The Barmen Missionary Society did not as yet send out missionaries, nor even own a house, but a number of young men were trained under its direction for work among the heathen. Richter subsequently, aided by his brother William, became their instructor, and after about eighteen months was able to report the readiness of four of his pupils to begin their expected labors. The poverty of the Barmen association now induced them to invite other local societies to aid in forwarding the candidates to their foreign fields, and as a result the Rhenish Missionary Society was organized. Its first mission was among the slaves of the Boers in South Africa, which, in course of time, extended over five stations. Another was begun on the island of Borneo in 1834, but failed to achieve successful results while Richter lived; and a third, among the Indians of North America, was likewise unsuccessful; but the latter gave rise to a flourishing mission among the evangelical Germans of America. Richter's ardent soul was continually employed in devising new means for the extension of Christianity. He was incessantly busy with his pen, issuing reports, spreading information through the periodical press, editing the *Monatsberichte d. rhein. Missions-Gesellschaft*, etc., and with public appeals in sermons and addresses in every section of the land. The institution of a society to preach the Gospel to the Jews was his work, and also the establishing of a German mission in China, which came to pass but a short time previous to his death. Richter was twice married, and became the father of a large family. A brief sickness ended his life April 5, 1847. As an author, Richter gave to the world a number of works; e. g. *Erklärte Hausbibel*, a commentary on the entire Bible (6 vols.), decidedly orthodox according to the Lutheran standard, and everywhere confidently accepting the literal meaning:—*Evangel. u. römische Kirchenlehre* (1844), a polemical work:—*A Life of Gützlaff*, the Chinese missionary, and others. In personal intercourse he was vivacious, stimulating, witty, and yet dignified. A man

of scientific culture, he was an accomplished botanist, mineralogist, etc.; but his writings are characterized by freshness of statement rather than by depth of thought.

Richthofen, CHARLES, *Baron von*, canon of Breslau, was born of evangelical parents Jan. 31, 1832, in Hartwigswaldau, Silesia. In 1838 his father quietly joined the Roman Catholic Church, while his mother remained firm in her belief, and the sons, by law, had to follow the father. From 1845 to 1852 he attended the Matthias Gymnasium at Breslau, and decided to prepare himself for the office of woods and forests. He entered the academy at Neustadt-Eberswalde, and finished his course there, but was not satisfied with the step he had taken. He decided to study theology, attended the theological course at the Breslau University, and in 1860 received holy orders. In 1869 he was stationed at Hohenfriedberg, but would not accept the decisions of the Vatican Council. The government had appointed him canon of Breslau, but bishop Förster, of that city, pressed by the chapter, wished to have the canon sign a paper, according to which he accepted the Vatican decrees. Richthofen refused to sell his conscience to Rome, and the bishop excommunicated him in 1873. He then joined the Old-Catholic party, and acted as priest till 1875. But finding no satisfaction or peace of conscience and mind even in this party, he joined the Lutheran Church at Leipsic, being received by Dr. Ahlfeld as member Dec. 11, 1875. He died March 7, 1876, in the house of his brother at Berlin. Dr. Besser delivered the funeral oration. See *Schneider, Theol. Jahrbuch*, 1877, p. 227 sq.; *Carl Freiherr von Richthofen, früher Domherr in Breslau, ein Lebensbild aus den kirchlichen Kämpfen der Gegenwart* (Leipsic, 1877); *Schüler, Theologische Literaturzeitung*, 1877, p. 616 sq. (B. P.)

Ricius, PAUL. See **RICCI**.

Richards, SAMUEL, an English clergyman, was born in 1795; entered Oriel College, Oxford, in 1814; obtained the Newdigate prize for English verse in 1815, and graduated in second-class honors in 1817. He was fellow of Oriel College in 1819 to 1823, and vicar of Stow, Langtoft, Suffolk, from 1832 until his death, in 1865. He was the author of the *Christian Householder, or Book of Family Prayers* (1849, 12mo).—*Short Sermons for Family Reading* (1849, 8vo).—several other Prayer-books:—also *Religious Tracts*, etc. See *Allibone, Dict. of Brit. and Amer. Authors*, s. v.

Rickman, THOMAS, a distinguished English architect, was born at Maidenhead in 1776. Although unsettled in early life, he seems always to have had a love for architecture, and to have studied it carefully. In 1808 he began to give his full attention to it, and wrote the *Classification of Gothic Styles*, which has rendered him famous. He afterwards resided in Birmingham, and acquired great celebrity by his Gothic churches and other structures. He died in March, 1841. He is well known as an author by his *Gothic Architecture, an Attempt to Discriminate the Styles of Architecture in England*, etc. (Lond. 1817, 8vo). There is a later and better edition by Parker (Oxford, 1862, 8vo). See *Allibone, Dict. of Brit. and Amer. Authors*, s. v.

Riculphus (Fr. *Riculfe*), bishop of Soissons, died about 902. He entered upon this see between 883 and 892, and assisted in the council of Verberie in 892 and of Rheims in 893. In 900, in the latter city, he consecrated archbishop Hervé, and excommunicated the murderers of archbishop Foulques. He made himself celebrated by the constitution which he established in his church in 889. This had for its object the correction of the ignorance of the clergy, and has been reprinted several times since 1615. It may be found in the supplement to the *Conciles des Gaules* of Pierre de la Lande, and in vol. ix of the *Conciles* of Labbé. See *Gallia Christiana*; *Hist. Littér. de la France*; Hoefer, *Novv. Biog. Générale*, s. v.

Rid. See **ISAIAH DI TRANI**.

Riddha, in Arabic mythology, is coincidence with the divine will; one of the five principal virtues which swim about on the sea of passions and tribulations.

Riddle (רִידָה, *chidah*; lit. *complication*, Judg. xiv; Ezek. xvii, 2; Sept. αἰνύμα, πρόβλημα; Vulg. *problema, propositio*; A. V. elsewhere "dark saying," "dark speech," "dark sentence," "hard question;" once [Hab. ii, 6] "proverb"). The Hebrew word is derived from a root cognate to an Arabic one meaning "to bend off," "to twist," and is used for artifice (Dan. viii, 23), a proverb (Prov. i, 6), a song (Psa. xlix, 4; lxxviii, 2), an oracle (Numb. xii, 8), a parable (Ezek. xvii, 2), and in general any wise or intricate sentence (Psa. xciv, 4; Hab. ii, 6, etc.), as well as a riddle in our sense of the word (Judg. xiv, 12-19). In these senses we may compare the phrases στροφή λόγων, στροφαι παραβολῶν (Wisd. viii, 8; Eccles. xxxix, 2), and περιπλοκή λόγων (Eurip. *Phæn.* 497), and the Latin *scirpus*, which appears to have been similarly used (Aul. Gell. *Noct. Att.* xii, 6). Augustine defines an enigma to be any "obscura allegoria" (*De Trin.* xv, 9), and points out, as an instance, the passage about the daughter of the horse-leech in Prov. xxx, 15, which has been elaborately explained by Bellermann in a monograph on the subject (*Ænigmata Hebraica* [Erf. 1798]). Many passages, although not definitely propounded as riddles, may be regarded as such—e. g. Prov. xxvi, 10, a verse in the rendering of which every version differs from all others. The riddles which the queen of Sheba came to ask of Solomon (1 Kings x, 1; 2 Chron. ix, 1) were rather "hard questions" referring to profound inquiries. Solomon is said, however, to have been very fond of the riddle proper, for Josephus (*Ant.* viii, 5, 3) quotes two profane historians (Menander of Ephesus, and Dios) to authenticate a story that Solomon proposed numerous riddles to Hiram, for the non-solution of which Hiram was obliged to pay a large fine, until he summoned to his assistance a Tyrian named Abdomen, who not only solved the riddles, but propounded others which Solomon was himself unable to answer, and consequently in his turn incurred the penalty. The word αἰνύμα occurs only once in the New Test. (1 Cor. xiii, 12, "darkly," ἐν αἰνύματι; comp. Numb. xii, 8; Wetstein, *N. T.* ii, 158); but, in the wider meaning of the word, many instances of it occur in our Lord's discourses. Thus Erasmus applies the term to Matt. xii, 43-45. In the Apocrypha we find (Wisd. xlvii, 15) παραβολαῖς αἰνυμάτων. The object of such implicated meanings is obvious, and is well explained by Augustine: "Manifestis pascimur, obscuris exercemur" (*De Doct. Christ.* ii, 6). The word αἰνύμα, taken in the extensive meaning of its root, αἶνος, certainly applies to an immense portion of the sacred writings—viz. as a narrative or tale, having an application to present circumstances; *Odys.* (xiv, 508), a fable, bearing moral instruction; Hesiod, *Oper.* (p. 202), which nearly approaches to the nature of a parable [see **PARABLE**]; a pointed sentence, saying, or proverb (Theocritus, xiv, 13). See **PROPHECY**; **PROVERB**. According to Lennep, the word αἰνύμα, taken substantively, means "anything obscure."

We know that all ancient nations, especially Orientals, have been fond of riddles (Rosenmüller, *Morgenl.* iii, 68). We find traces of the custom among the Arabs (Koran, xxv, 35), and, indeed, several Arabic books of riddles exist—as *Ketab el-Algaz* in 1469, and a book of riddles solved, called *Akd el-Themim*. But these are rather emblems and devices than what we call riddles, although they are very ingenious. The Persians call them *Algaz* and *Maamma* (D'Herbelot, s. v. "Algaz"). They were also known to the ancient Egyptians (Jablonski, *Pantheon Egypt.* p. 48). They were especially used in banquets both by Greeks and Romans (Müller, *Dor.* ii, 392; Athen. x, 457; Pollux, vi, 107; Gell. xviii, 2), and the kind of witticisms adopted may be seen in

the literary dinners described by Plato, Xenophon, Athenæus, Plutarch, and Macrobius (see Zorn, *De Enigmatibus Nuptialibus* [Lips. 1724]). Some have groundlessly supposed that the proverbs of Solomon, Lemuel, and Agur were propounded at feasts, like the parables spoken by our Lord on similar occasions (Luke xiv, 7, etc.).

Riddles were generally proposed in verse, like the celebrated riddle of Samson, which, however, was properly (as Voss points out, *Instt. Oratt.* iv, 11) no riddle at all, because the Philistines did not possess the only clue on which the solution *could* depend. For this reason Samson had carefully concealed the fact, even from his parents (Judg. xiv, 14, etc.). Other ancient riddles in verse are that of the Sphinx, and that which is said to have caused the death of Homer by his mortification at being unable to solve it (Plutarch, *Vit. Hom.*).

The pleasure of the propounder is derived from perplexing his hearers, and theirs from overcoming the difficulty, which is usually renewed by their proposing another enigma. This kind of amusement seems to have been resorted to, especially at entertainments, in all ages among different nations, and has even been treated as an art and reduced to rules. The chief writers on this curious subject are Nic. Reusner (*Ænigmatograph.*) and F. Menestrier. The principal rules laid down for the construction of an enigma are the following: that it must be obscure, and the more obscure the better, provided that the description of the thing, however covered and abstract, and in whatever remote or uncommon terms, be really correct; and it is essential that the thing thus described be well known. Sometimes, and especially in a witty enigma, the amusement consists in describing a thing by a set of truisms, which tell their own meaning, but which confound the hearer through his expectation of some deep and difficult meaning.

Franc. Junius distinguishes between the *greater* enigma, where the allegory or obscure intimation is continuous throughout the passage (as in Ezek. xvii, 2, and in such poems as the *Syrinx* attributed to Theocritus), and the *lesser* enigma or *ὑπαίνυγμα*, where the difficulty is concentrated in the peculiar use of some one word. As specimens of the enigmatical style of the former kind in the Old Test., Winer points out Prov. xxx, 12-19; Isa. xxi, 12. The speech of Lamech to his wives Adah and Zillah (Gen. iv, 23, 24) is possibly an enigmatical mode of communicating some painful intelligence. In the New Test. we may adduce our Lord's discourse with Nicodemus (John iii, 3), and with the Jews (vi, 51, etc.), where the enigmatical style is adopted for the purpose of engaging attention in an unrivalled manner (Stuck, *Antiq. Conviv.* iii, 17). It may be useful to refer to one or two instances of the latter kind, since they are very frequently to be found in the Bible, and especially in the prophets. Such is the play on the word שֶׁחֶם ("a portion," and "Shechem," the town of Ephraim), in Gen. xlviii, 22; on מַצֹּר (matzôr, "a fortified city") and מִצְרַיִם (Mizraim, Egypt), in Mic. vii, 12; on שָׁקֵד (Shaked, "an almond-tree") and שָׁקָד (shakád, "to hasten"), in Jer. i, 11; on דִּמְאָה (Dumáh, meaning "Edom" and "the land of death"), in Isa. xxi, 11; on שֶׁשַׁח, Sheshach (meaning "Babylon," and perhaps "arrogance"), in Jer. xxv, 26; li, 41. The description of the Messiah under the name of the "Branch" (נֵזֶר, nézer), when considered in regard to the occasion and context, may be taken as a specimen of the lesser enigma (see Lowth upon the passage). See NAZARITE.

It only remains to notice the single instance of a riddle occurring in the New Test.—viz. the *number of the beast*. This belongs to a class of riddles very common among Egyptian mystics, the Gnostics, some of the fathers, and the Jewish Cabalists. The latter called it *Gematría* (i. e. *γωμετρία*), of which instances may be found in Carpsov (*App. Crit.* p. 542), Reland (*Ant. Hebr.* i, 25), and some of the commentators on Rev. xiii, 16-

18. Thus נָחָשׁ (*nachâsh*), "serpent," is made by the Jews one of the names of the Messiah, because its numerical value is equivalent to מָשִׁיחַ; and the names Shushan and Esther are connected together because the numerical value of the letters composing them is 661. Thus the Marcosians regarded the number 24 as sacred from its being the sum of numerical values in the names of two quaternions of their æons, and the Gnostics used the name *Abrazas* as an amulet because its letters amount numerically to 365. Such idle fancies are not infrequent in some of the fathers. Instances occur in the mystic explanation by Clem. Alexandrinus of the number 318 in Gen. xiv, 14, and by Tertullian of the number 300 (represented by the letter T or a *cross*) in Judg. vii, 6, and similar instances are supplied by the Testimonia of the Pseudo-Cyprian. The most exact analogies, however, to the enigma on the name of the beast are to be found in the so-called Sibylline verses. We quote one which is exactly similar to it, the answer being found in the name Ἰησοῦς = 888, thus: I = 10 + η = 8 + σ = 200 + ο = 70 + υ = 400 + ς = 200 = 888. It is as follows, and is extremely curious:

ἦξει σαρκόφορος ζῆντοῖς ὁμοιοῦμενος ἐν γῇ
τέσσερα φωνήεντα φέρει, τὰ δ' ἄφωνα δὲ αὐτῷ
δίσσων ἀστραγάλων (?), ἀριζμὸν δ' ὅλον ἐξουομήνῃ
ὄκτω γὰρ μονάδας, ὅσας δεκάδας ἐπὶ τοῖσι,
ἦδ' ἑκατοντάδας ὄκτω ὑπαστοτέροις ἀνδράποισι
ὄνομα δηλώσει.

With examples like this before us, it would be absurd to doubt that John (not *greatly* removed in time from the Christian forgers of the Sibylline verses) intended some *name* as an answer to the number 666. The true answer must be settled by the Apocalyptic commentators. Most of the fathers supposed, even as far back as Irenæus, the name Λάτρευος to be indicated. A list of the other very numerous solutions, proposed in different ages, may be found in Elliott's *Horæ Apocalypticæ* (iii, 222-234), from which we have quoted several of these instances. See NUMBER OF THE BEAST.

Riddle, John, D.D., a minister of the Associate Reformed Church, was born in Monaghan County, Ireland, in 1758. He graduated at the University of Glasgow April 10, 1782, and entered upon the study of theology, under the supervision of John Brown, of Haddington. He was licensed to preach June 14, 1788, and was installed pastor of the congregation in Donaghoney, County Down, Nov. 18. In this connection he remained till the spring of 1794, when he came to the United States. In August of the same year he was installed at Robinson Run as pastor of the united congregations of Robinson Run and Union, in the vicinity of Pittsburgh. After a few years the congregations so increased that, at his request, he was released from Union, and settled for the whole of his time at Robinson Run. Here he continued to labor the remainder of his life, and died, after a month's illness, Sept. 4, 1829. Dr. Riddle took an active part in the management of the affairs of the Associate Reformed Church, which was in its infancy when he became a member of it. He was among those who opposed the proceedings of the General Assembly Reformed Synod, and who finally, in 1820, resolved to constitute themselves into an independent synod, to be known as the "Associate Reformed Synod of the West." He was a close student, argumentative in his preaching, and an excellent pastor. None of the productions of his pen were ever printed, though he left behind a large MS. on the subject of *Religious Covenanting*, which, had he lived a little longer, it is thought he would have published. See Sprague, *Annals of the Amer. Pulpit*, ix, 57.

Riddle, Joseph Esmond, an English clergyman, of St. Edmund's Hall, Oxford, curate of Harrow, and subsequently incumbent of St. Philip's, Leckhampton, was born about 1801, and died Aug. 27, 1859. He was the author of many works, both theological and educa-

tional, among which are, *Luther and his Times* (Lond. 1837, 12mo):—*Ecclesiastical Chronology, or Annals of the Christian Church* (ibid. 1840, 8vo):—*Manual of Christian Antiquities* (ibid. 1839, 8vo; 2d ed. 1843):—*Natural History of Infidelity* (eight Bampton Lectures; 1852, 8vo):—besides *Sermons, Manuals, etc.*:—also a *Complete English-Latin and Latin-English Dictionary* (ibid. 1836, 8vo), of which several editions have been published. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Riddoch, JAMES, a minister of the Episcopal Church, Scotland, during the last century, was born at Grange, Bamfshire. He was first minister of a chapel at Glasgow, and afterwards became one of the ministers of St. Paul's Chapel, Aberdeen, in 1757, in which charge he continued twenty years. His sermons are distinguished for pathos, persuasion, eloquence, and piety. He published *Sermons on Several Subjects*, etc. (Lond. 1799, 3 vols. 8vo; a fifth edition was published in 1831, 2 vols. 8vo).

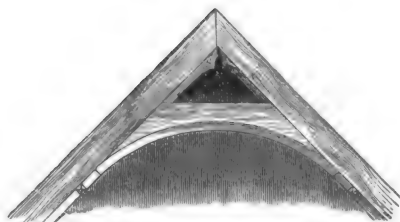

Rideout, URIEL, a minister of the Methodist Episcopal Church, was born in Bowdoin, Me., July 26, 1816. He joined the Maine Conference in 1846, and labored until 1849, when he located for the purpose of attending the Concord Biblical Institute. He resumed his place in conference in 1850, and continued in active service until the session of 1868, when he received a supernumerary relation. After an illness of ten days, he died at Cape Elizabeth Ferry Aug. 30, 1868. His labors were characterized by zeal and discretion, by ability and ministerial fidelity. See *Minutes of Annual Conferences*, 1869, p. 141.

Rider (רוֹכֵב, *rokéḇ*). It is uncertain at what time, or in what place, horses were first used for riding, but there is every reason to believe that it was not until a period long after their having been employed for draught. Instead of cavalry, the Egyptians and Babylonians, and the Greeks of the Homeric age, used war-chariots, the drivers of which are in the earlier books of the Old Test. called "riders," as in Miriam's song of triumph for the overthrow of the Egyptian host (Exod. xv). The book of Job, however, clearly intimates a "rider," in our acceptance of the word, in the description of the chase of the ostrich: "She scorneth the horse and his rider" (Job xxxix, 18). White asses were used as steeds by the nobles in the land under the Judges, and instead of these we find that mules were used in the age of the Kings, horses being almost exclusively reserved for chariots. The Persians appear to have been the first Oriental nation that discovered the superiority of a flexible body of cavalry over a cumbrous and unwieldy corps of chariots. Many of their early victories may fairly be ascribed to their skill in horsemanship. On the other hand, the Jewish armies were always deficient in cavalry, and their alliances with foreign states were generally designed to obtain a supply of auxiliary horse. It is not one of the least proofs of Solomon's political wisdom that he exerted himself to supply this national deficiency. See HORSE.

Rider, JOHN, an Irish prelate, was born at Carrington, in Cheshire, about 1562, and entered Jesus College, Oxford, in 1576, where he took his degree of A.M., and continued in the university for some years, teaching grammar chiefly. He was preferred to the living of Waterstock, Oxfordshire, in 1580, but resigned it in 1581. In 1583 he was admitted to that of South Wokington, which he resigned in 1590. He was also rector of St. Mary Magdalen, Bermondsey, and of Winwick, in Lancashire. He was afterwards archdeacon of Meath, in Ireland, dean of St. Patrick's, Dublin, and in 1612 bishop of Killaloe. He died in 1632, and was buried in his cathedral. He was much respected for his piety and learning. His principal work is, *A Dictionary, English-Latin and Latin-English* (Oxf. 1589, 4to). It was the first Latin dictionary in which the English part

was placed before the Latin part. In addition are given, *A Letter Concerning the News out of Ireland* (Lond. 1601, 4to):—*Caveat to Irish Catholics* (Dublin, 1602, 4to):—*Claim of Antiquity in Behalf of the Protestant Religion* (Lond. 1608, 4to). See Chalmers, *Biog. Dict.*; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Ridge, the upper angle of a roof. It has usually, though by no means always, a piece of timber running along it, called the ridge-piece, upon which the upper ends of the rafters rest; the tiles with which it is covered are called *ridge-tiles*. These are sometimes made ornamental, good instances of which are found at Great Malvern and Lincoln.—Parker, *Glossary of Architecture*, s. v. See RID.

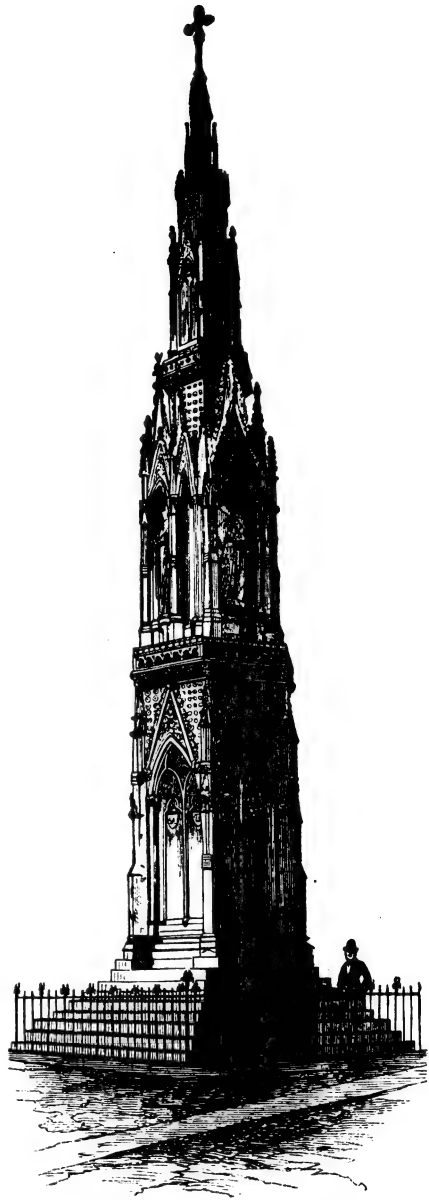

Ridge-piece, Llan Tysilio.

Ridley, THOMAS, D.D., an eminent English Independent minister, was born in London about 1667, and educated at an academy in Wiltshire. Entering the ministry, he was in 1695 chosen assistant to Mr. Thomas Gouge, near the Three Cranes, London, and about four years afterwards became his successor. In 1712 he, with Mr. John Eames, began to conduct an Independent academy in London as divinity tutor. He died March 27, 1734. His principal work is, *A Body of Divinity*, an exposition of the Assembly's Larger Catechism (1731-33, 2 vols. fol.; new edition, with notes, by John M. Wilson, Edinb. 1844, 2 vols. 8vo; Lond. 1845, 2 vols. 8vo; N. Y. 1855, 2 vols. 8vo). He also published *Sermons*, etc. (Lond. 1701-25). See Chalmers, *Biog. Dict.*; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Riding Committees were committees of the General Assembly sent to supersede a presbytery which had refused to ordain a presentee over a reclaiming parish. The first instance occurred in 1717, when a presbytery refused to ordain a Mr. John Hay in the parish of Peebles, and the General Assembly passed an act, "appointing certain brethren to correspond with the Presbytery of Peebles, and to act and vote in their meetings at their next ensuing diet, and thereafter, until the settlement of Mr. John Hay in the parish of Peebles be completed, and to concur with them in his ordination." By this device both the opposition of the people and the conscientious reluctance of the presbytery were surmounted. The last instance of a settlement effected by means of a riding committee was that of Mr. Watson in the Presbytery of Linlithgow, May 30, 1751.

Ridley, Gloucester, D.D., a learned English divine, was born at sea, on board the Gloucester, an East-Indiaman, 1702. He received his education at Winchester and New College, receiving the degree of B.C.L. April 29, 1729. For a great part of his life he had no other preferment than the small college living of Weston, in Norfolk, and the donative of Poplar, in Middlesex, where he resided. To these his college added, some years after, the donative of Romford, in Essex. In 1761 he was presented by archbishop Secker to a golden prebend at Salisbury. He published, *Eight Sermons on the Holy Ghost* (1740-41; Lond. 1742, 8vo; new ed. Oxf. 1802, 8vo):—*De Syriacarum Novi Fœderis Versionum Indole atque Usu Dissertatio*, etc. (Lond. 1761, 4to):—*Life of Nicholas Ridley* (1763, 4to):—besides *Letters*, etc. See Chalmers, *Biog. Dict.*; Hook, *Eccles. Biog.*; Allibone, *Dict. of Brit. and Amer. Auth.*, s. v.

Ridley, Nicholas, an eminent English prelate and martyr, was descended from an ancient family in Northumberland, and was born in the year 1500, in Tynedale, at a place called Wilmontswick. He was educated in a grammar school at Newcastle-upon-Tyne, and entered Pembroke Hall, Cambridge, about 1518. Here he was taught Greek by Richard Crock, who about that time began to teach it in Cambridge. His religious sentiments were those of the Romish Church, in which he had been brought up. In 1522 he took the degree of A.B., in 1524 was chosen fellow of his college, and in 1525 received the degree of A.M. Directing his attention to the study of divinity, his uncle, Dr. Robert Ridley, who had thus far paid for his education, sent him for further improvement to the Sorbonne at Paris, and thence to Louvain. In 1530 he was chosen junior treasurer of his college, and at this time paid great attention to the study of the Scriptures. For this purpose he used to walk in the orchard at Pembroke Hall, and there committed to memory almost all the epistles in Greek. The walk is still called Ridley's Walk. In 1533 he was chosen senior proctor of the university, and while in that office the question of the pope's supremacy came before the university to be examined on the authority of Scripture. The decision was that "the bishop of Rome had no more authority and jurisdiction derived from God, in this kingdom of England, than any other foreign bishop," and was signed by the vice-chancellor, and by Nicholas Ridley and Richard Wilkes, proctors. In 1534 he took the degree of B.D., and was chosen chaplain of the university and public reader. In 1537, Cranmer, archbishop of Canterbury, appointed him one of his chaplains, and as a further mark of his esteem collated him, April, 1538, to the vicarage of Herne, in Kent. In 1539, when the act of the Six Articles was passed, Mr. Ridley bore his testimony against it in the pulpit, although he was in no danger from its penalties; still believing in transubstantiation, unmarried, and leaning to the practice of auricular confession, although not insisting upon it as necessary to salvation. In 1540 he went to Cambridge and took the degree of D.D., and about the same time was elected master of Pembroke Hall, having been also, through Cranmer's influence, appointed chaplain to the king, and appointed a prebend in the cathedral of Canterbury. At Canterbury he preached with so much zeal against the abuses of popery that the other prebendaries and preachers of the *old learning* brought articles against him at the archbishop's visit in 1541, but the attempt failed. Gardiner, bishop of Winchester, next caused articles to be exhibited against him before the justices of the peace in Kent, and afterwards before the king and council, charging him with preaching against auricular confession and with directing the *Te Deum* to be sung in English. The accusation was referred to Cranmer, and immediately crushed by him. The greater part of 1545 was spent by Dr. Ridley in retirement, and he employed himself in carefully examining the truth and evidence of the doctrine of transubstantiation, of which he had been an unsuspecting believer. He consulted the Apology of the Zwinglians and the writings of Bertram (q. v.), and concluded that the doctrine had no foundation, and found that Cranmer and Latimer both joined him in the same opinion. At the close of the year Cranmer gave him the eighth stall in St. Peter's, Westminster. When Edward VI ascended the throne, in 1547, Dr. Ridley, being appointed to preach before the king on Ash-Wednesday, took that opportunity to discourse concerning the abuses of images in churches, and ceremonies, particularly the use of holy-water for driving away devils. About this time the fellows of Pembroke Hall presented Dr. Ridley to the living of Soham, in the diocese of Norwich; but the presentation being disputed by the bishop, he was admitted to the living by command of the king. On Sept. 25 he was conse-

Martyrs' Monument at Oxford.

crated bishop of Rochester, and in 1548 was employed with Cranmer and others in reforming and compiling the Book of Common Prayer. On the suspension of bishop Bonner, bishop Ridley was transferred to London, and was installed April, 1550. In 1551 the sweating-sickness prevailed in London, and although it was fatal to hundreds, yet bishop Ridley remained faithfully at his post. In June, 1550, the bishop directed that the Romish altars should be taken down, and tables substituted, in order to take away the belief of the people that an altar was necessary to the celebration of the sacrament. He was soon after engaged with Cranmer in drawing up the Forty-two Articles. In 1552 he visited his old college at Cambridge, and on his return called at Hansdon, to pay his respects to the princess Mary. The arrogance, insolence, and bitterness of her nature she displayed on this occasion in the insults she

offered Ridley. In 1553 the bishop preached before Edward VI, and so aroused the benevolence of the king that the latter sent to him to inquire how he might best put into practice the duties he had so strongly enforced. The result was the founding and endowment of Christ's, Bartholomew's, Bridewell, and St. Thomas's hospitals. Upon the death of Edward VI, Ridley strove to put lady Jane Grey upon the throne; but failing, he went to Mary, as was expected of the bishop of London, and did her homage. By her command he was sent back from Framingham on a lame horse and committed to the Tower, July 26, 1553, to be proceeded against for heresy. It has been thought that bishop Ridley might have recovered the queen's favor by countenancing her proceedings in religion. But he was too honest to act against his convictions, and, after eight months' imprisonment in the Tower, was taken to Oxford, where he was, Oct. 1, 1555, condemned to death for heresy. The evening before his execution he supped with some of his friends, showing great cheerfulness; and refused the offer of one of them to sit up with him, saying, "I mean to go to bed, and, by God's will, to sleep as quietly as ever I did in my life." On October 16, arrayed in his episcopal habit, he walked to the place of execution between the mayor and one of the aldermen of Oxford. Seeing Latimer approach, he ran to meet him, and, embracing him, exclaimed, "Be of good heart, brother, for God will either assuage the fury of the flames, or else give us strength to endure them." Going to the stake, they both kissed it and prayed earnestly. Refused permission to speak unless he recanted, he said, "Well, so long as the breath is in my body, I will never deny my Lord Christ and his known truth. God's will be done in me." Fire was then applied, and after suffering intensely for a long time Ridley expired. Bishop Ridley, in his private life, was a pattern of piety, humility, temperance, and regularity. The following works are ascribed to him by Anthony Wood: *Treatise concerning Images*:—*Brief Declaration of the Lord's Supper* (1555 and 1586, 8vo):—*A Friendly Farewell*, written during his imprisonment at Oxford (1559, 8vo):—*Account of the Disputation held at Oxford* (1688, 4to):—*A Treatise of the Blessed Sacrament*. Additions are made by other authorities. Many of his letters are in Fox's *Acts and Monuments*, and in Dr. Gloster's *Life of Bishop Ridley*.

Ridolphus (Ital. *Ridolfi*), CLAUDIO, a painter of the Venetian school, was born at Verona in 1574. He was descended from a noble family, and in his youth made great progress in his art. He worked in Verona, Urbino, and other cities of Italy. He died in 1644. The works of Ridolphus show a purity of design and simplicity of composition which are seldom found in the works of the Venetian school. Among his best are, *Presentation of the Virgin at the Temple*:—*The Assumption*:—a *Virgin*, and several *Saints*. See Bumassuti, *Guida di Verona*.

Riegger, Joseph Anton Stephan von, an eminent teacher of jurisprudence, who was also author, imperial councillor, censor of books, etc., and whose principal field of labor was the University of Freiburg, was born at Innsbruck, Feb. 13, 1742. He wrote his first work—a review of the works of Plautus and Terence—when scarcely fifteen years of age, became master in philosophy in 1761, and in 1764 entered on his first position as a teacher in the *Theresianum*. During his preliminary studies he had published a *Bibliotheca Juris Canonici* (1761):—an edition of August. Archiep. Taron. *De Emend. Gratiani Dialogi*, and a new edition of the canonist Cironius, and had also written verses in German and Latin. In 1765 he was called to a professorship at Freiburg, and for the first time delivered lectures on jurisprudence in the German tongue. His promotions were now so rapid that scarcely a year passed without bringing to him new honors of this kind, and his reputation secured for him the charge of

repeated government commissions of importance and delicacy; but the payment of debts incurred by his father and by an insolvent brother so impaired his fortune that a removal from Freiburg became desirable. He became professor of civil law at Prague and government councillor of Bohemia, and died Aug. 5, 1795. He had been actively connected with the reform movements of his age, and had given books to the world which excited much attention in their time, e. g. one on the right of a prince to tax persons of clerical rank. A work on the decretals of popes, etc., in which unpublished MSS. were largely introduced, would have been his crowning labor, but an instalment issued under the title *Bernardi Breviarium Extravagantium* (1778) failed to secure the sympathy of the public and caused him to renounce the undertaking. His numerous writings in the departments of belles-lettres, jurisprudence, and canon-law are given in Mensel, *Lexikon d. v. Jahre 1750–1800 verstorb. deutsch. Schriftsteller* (Leips. 1811), vol. xi; and in Weidlich, *Biogr. Nachrichten*, etc. (Halle, 1751), part ii. See Grünwald, *Biographie d. beid. Rüter von Riegger* (Prague, 1798); Schlichtegroll, *Necrolog auf d. Jahr 1795*, 1st half.

Riegger, Paul Joseph von, father of J. A. S. Riegger (q. v.), and professor of canon-law in the University of Vienna from 1753 to 1775, was born at Freiburg, June 29, 1705, and received his education in his native town. At the age of sixteen years he obtained the degree of master in philosophy, and at the age of twenty-eight he became doctor of both civil and ecclesiastical law. Soon afterwards he was called to the chair of jurisprudence and German history at Innsbruck, where he subsequently attained to the highest honors, being twice elected rector and eight times dean of the university, frequently acting as its chosen agent in transactions with the imperial court, and also serving as counsel to the courts of Lower Austria. The empress Maria Theresa placed him over the Imperial Theresa School and the Academy of Savoyard Knights as teacher of public and canonical law in 1749, and in 1753 he became professor of ecclesiastical law in the University of Vienna, though retaining the positions he already held. His *Institutiones Jurisprudentiæ Ecclesiasticæ* (4 vols.) were generally introduced into the schools of Austria. His next preferment was to the posts of imperial councillor and censor of books, and in 1764 to the knighthood and to the Bohemian branch of the government. Many laws relating to the establishing and execution of spiritual functions owe their origin to him, as does the abolition of trials for magical practices and witchcraft. He is the father of the ecclesiastical system of Austria as subsequently taught in all its schools. The liberal influence exerted by him crowded the ultramontane theories out of use, and caused him to be regarded at Rome as an important promoter of reforms in the Church. It is said that he was threatened with excommunication in consequence, and that his works were placed in the *Index*. He died Dec. 8, 1775. A list of his works is given in Mensel and Weidlich. See *Biographie d. beid. Rüter von Riegger* (Prague, 1798).

Rienzo, COLA DI (*Niccolò di Lorenzo*), Rome's "last tribune," was born of humble parentage, in the year 1313, at Rome. He was endowed with an ambitious and daring spirit, and, as the event proved, with an overweening vanity, and he possessed the gift of a fiery eloquence. His first public appearance was in 1343, in the character of notary to an embassy of Roman citizens sent to greet pope Clement VI and persuade him to return to Rome, where the families of Colonna and Ursini were then contending against each other—the power of the nobles generally having grown to excessive proportions—and the oppression of the people and their sinking into immorality were keeping equal pace. Rienzo became acquainted with Petrarch—subsequently his en-

thusiastic supporter—while at Avignon, and he there received the appointment of papal notary. After his return to Rome he devoted himself to the work of inflaming the passions of the people through the means of popular and patriotic addresses, and with such success that he was proclaimed tribune of Rome and clothed with dictatorial powers in May, 1347. The pope at first confirmed Rienzi's elevation in the hope of securing the people and humbling the nobility, and the tribune's good fortune, power, and just administration recommended him even to princes, e. g. the emperor Lewis and the king of Hungary, who sought his friendship; but the height he had attained made him dizzy. He knighted himself; declared Rome the sovereign of the world; commanded the pope and cardinals to return to Rome; cited the emperor and the king of Bohemia before him in order to restore peace between them; ordered the electors to furnish evidence of their right to elect the emperors, etc. Warnings and outbreaks of discontented factions failed to restrain him, and pope Clement interfered with what was rapidly becoming a reign of terror by issuing (Dec. 3, 1347) a bull against the tribune. The people immediately forsook Rienzi, and he was compelled to flee in disguise from Rome in January, 1348. He subsequently returned secretly to Rome, but soon went to Prague, where he was apprehended by the emperor Charles IV, who delivered him to the pope at Avignon in 1351. Innocent IV soon afterwards became pope, and Rienzi succeeded in disproving the charges raised against him of heresy and tyranny, and even in securing the pope's favor and confidence. In the meantime the conflict of factions had broken out again with fresh fury at Rome, and a papal notary named Barocelli (or Baracelli) had assumed the rôle of tribune. It was seen at Avignon that Rienzi might defeat the projects of that agitator, and he was accordingly attached to the suite of the cardinal Egidius Albornoz, to whom was intrusted the pacification of Italy. The vacillating populace received him with enthusiasm; but no sooner was he in the possession of power than he began once more to abuse it. He disregarded the hatred of the house of Colonna, imposed unwise taxes, and left his body-guard unpaid; and when it became apparent that his firmness had departed and that his administration was undecided and fluctuating, a popular outbreak was brought about by some means, Rienzi's house was burned, and Rienzi himself was slain by the people who just before had almost worshipped him. The date of his death is Oct. 4, 1354 (others, Oct. 7 or 8). The estimates of Rienzi's life and services differ greatly, some (as Schlosser, *Weltgesch.*) representing him as a fantastical charlatan, and others finding in him noble traits, especially an enthusiasm for republican institutions and for justice. Still others deny to him all greatness of character, but find an explanation of his career in the extraordinary conditions of his time and the circumstances of his life. Nationalism, based on the renewed familiarity with the conditions of antiquity, was certainly the leading element in the rapid drama of his life. See Baluzii *Vita Pap. Avinion.*; Bzovius, *Annal. Eccl. ad Ann. 1353*, No. 2; Villani, *Col. di Rienzo*; Schlosser, *Weltgesch.* vol. iv, pt. i; *Hist.-polit. Blätter*, vol. xx; Papencordt, *Col. di Rienzo u. seine Zeit* (Hamb. and Gotha, 1841); and others; also Bulwer's novel, *Rienzi, the Last of the Tribunes*.

Riëti, MOSES BEN-ISAAC DI, of Perugia, a noted Jewish writer, was born in 1388 and died after 1451. He was a physician and philosopher of some renown, and wrote very elegant verses in Hebrew and Italian. He is the author of *מקדש מ"ס*, a *Great Paradiso* in *Terza Rima*, with literary and historical notes. It consists of two parts, viz. חלק האולם and חלק הדרכל, which again are separated into divisions. The first part contains in the first division a prayer to God, and speaks of the plan, name, division, and grouping of

the work; in the second the author treats of theology, revelation, the thirteen articles of faith, the phases of philosophy among Greeks and Hebrews, of the Cabala and its study; in the third he treats of the other sciences, the liberal arts, etc.; in the fourth he speaks of the introduction of Porphyry, the ten categories, the commentary of Ibn-Roshd, and the philosophical labors of Levi ben-Gershon, or Ralbag; in the fifth he continues to speak of philosophy. The second part, which is composed of eight divisions, speaks in the first of Paradise, with its patriarchs, prophets, Sanhedrim, the wise and pious; the second, which is also entitled *הפלה למשד*, is a grand confessional, penitential, and admonitory prayer; in the third, which is called *עיר אלהים*, *The City of God*, the bright abode of Ezra, Daniel, Zerubbabel, Zechariah, etc., is described; in the fourth, called *אמירת הנפש*, the author of the Mishna and his work in the domain of the blessed are described; the fifth speaks of the chapters of the six orders of the Mishna and their contents; the sixth treats of the writings of the Tanaim, Amoraim, Saboraim, Geonim, etc., down to the author's own time; the seventh descants upon the teachers of the Talmud, the theology of the Midrashim, etc.; and, finally, the eighth narrates the exiles of the Jews and their sufferings. In the *Paradiso*, Di Riëti excludes Immanuel of Rome (q. v.) from the regions of the blessed, and he is also said to have repented of his own poetry as a waste of time. "This would show that he possessed more judgment than those who have published this unattractive work as the production of the 'Hebrew Dante'" (Steinschneider). This *Divina Commedia* was first edited after three MSS., by Jacob Goldenthal, with an Italian and Hebrew introduction (Vienna, 1851). Di Riëti wrote some other works, which, however, are yet in MS. See Fürst, *Bibl. Jud.* iii, 158 sq.; Bartolucci, *Bibl. Rabb.* iii, 945 a; Grätz, *Gesch. d. Juden* (Leips. 1875), viii, 143-145; Delitzsch, *Gesch. d. jüdischen Poesie*, p. 54, 145; *Moses Riëti*, in the *Jewish Messenger* (N. Y.), May 18, 1876. (B. P.)

Rietschel, ERNST FRIEDRICH AUGUST, an eminent German sculptor, was born in Pulsnitz, Saxony, Dec. 15, 1804. He studied under Rauch at Berlin, and in Italy. Settling in Dresden, he became professor in the Academy of Arts. Among his works are, *Mary Kneeling over the Dead Body of Christ*:—a bust of *Luther*:—the *Four Hours of the Day*:—colossal statues of *Goethe* and *Schiller* (at Weimar), and the *Christ-angel*. He died at Dresden in 1861.

Rieter, ANTON, a German Roman Catholic theologian, was born at Stadt-am-Hof in 1808. He studied at Regensburg and Munich; was appointed professor of moral philosophy at Amberg in 1835, at Regensburg in 1842, and at Munich in 1852. He died at Stadt-am-Hof, Nov. 6, 1866. He wrote, *Das Leben, das Werk und die Würde Jesu Christi* (Regensburg, 1846):—*Der Weg der Liebe* (ibid. 1856):—*Der heil. Liebe natürliches Licht*, etc. (Munich, 1857):—*Die Moral des heil. Thomas von Aquin* (ibid. 1858):—*Breviarium der christlichen Ethik* (Regensburg, 1866). (B. P.)

Rigand, STEPHEN JORDAN, D.D., the eldest son of John Francis Rigand, was educated at, and afterwards fellow and tutor of, Exeter College, Oxford. He became second master of Westminster School, and headmaster of Ipswich School, Suffolk; mathematical examiner in 1845, and one of the select preachers of Oxford University in 1856. He was appointed bishop of Antigua in 1857, and died there, of yellow fever, May 16, 1859. He published *Sermons on the Lord's Prayer* (Ipswich, 1852, 8vo), and edited vol. i, and published vols. i and ii, of the *Correspondence of Scientific Men*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rigby, ALFRED A., a Methodist Episcopal minister, of whose early history nothing is known. He fought in the Union army during the Rebellion, and it was while in military service that he connected himself with the

Church. He was licensed to preach soon after his return from the war, and in 1870 was received on trial in the Des Moines Conference and appointed to Wheeling Circuit. But overwork and overstudy brought on disease, and he died at New Vernon, July 9, 1872. See *Minutes of Annual Conferences*, 1872, p. 103.

Riggen, JOHN WESLEY, a minister of the Methodist Episcopal Church, South, was born in Maryland Aug. 26, 1794. His parents migrated to Mason County, Ky., and, being poor and in a new country, were unable to give him a proper education. In 1816 he was converted, and joined the Methodist Episcopal Church. He commenced as a local preacher in 1823, and in 1827 was ordained deacon. He joined the travelling connection in 1834, and was ordained elder in 1835. He was a member of the Kentucky Conference until his death, Sept. 30, 1845. See *Minutes of Annual Conferences, M. E. Church, South*, 1846, p. 56.

Riggs, Adam S., a minister of the Methodist Episcopal Church, South, was born in Williamson County, Tenn., near Riggs's Cross Roads, June 6, 1816, and professed conversion June 19, 1836. He united with the Church on the 25th of the same month; was licensed to preach Sept. 21, 1839; was received on trial in the Tennessee Conference in 1839, and served as an itinerant preacher thirty-one years. After an illness of a little over three weeks, he died Oct. 29, 1870. Mr. Riggs was an able and judicious officer of the Church; a wise counsellor; modest, firm, and faithful. He was honored by his brethren, and was chosen several times as a delegate to the General Conference. See *Minutes of Annual Conferences, M. E. Church, South*, 1870, p. 586.

Riggs, Joseph L., a Presbyterian minister, was born at New Providence, N. J., March 19, 1809. He graduated at Amherst College, Mass.; studied theology in Andover Seminary, Mass., and in Princeton Theological Seminary, N. J., and was licensed and ordained Aug. 27, 1845. His fields of labor were, Wells, Bradford Co., Pa.; Millerstown, Pa.; Cumberland, Ill.; and as city missionary in Elmira, N. Y., where he died, Aug. 20, 1865. Mr. Riggs was a faithful preacher, and he loved the work to which he had devoted himself. See Wilson, *Presb. Hist. Almanac*, 1866, p. 223.

Righiel Lambo, in Mongol mythology, is the sacred mountain, in the main identical with the Hindû *Meru*, and varying from it only in minor particulars which grow out of the fancy of the worshippers of the Lama.

Right, as an *adjective*, describes the quality of an action as in conformity with moral law; as a *substantive*, the claim of a person upon others consequent upon the equal subjection of all to moral law. A *right* action (rectum) is an action agreeable to our duty, but a *man's right* (jus) has a very different meaning. What I have a *right* to do, it is the *duty* of all men not to hinder me from doing, and what I have a *right* to demand of any man, it is his *duty* to perform. A man's *right* is that which is vested in him by society, and because its laws may not always be conformable to the supreme rule of human action, viz. the Divine Law, the two words may often be properly opposed. We may say that a poor man has no *right* to relief, but it is *right* that he should have it. A rich man has a *right* to destroy the harvest of his fields, but to do so would not be *right*. See Fleming and Krauth, *Dict. of Phil. Science*, s. v.

Right, Divine. See JURE DIVINO.

Righteousness (צִדִּיק, *dikia*, the quality of being *right* morally). The righteousness of God is the essential perfection of his nature, and is frequently used to designate his holiness, justice, and faithfulness (Gen. xviii, 25; Deut. vi, 25; Psa. xxxi, 1; cxix, 137, 142; Isa. xlv, 25; xlvii, 13; li, 5-8; lvi, 1). The righteousness of Christ denotes not only his absolute perfection (Isa. li, 11; 1 John ii, 1; Acts iii, 14), but is taken for his perfect obedience unto death as the sacrifice for the sin of the

world (Dan. ix, 24; Rom. iii, 25, 26; v, 18, 19; Jer. xxiii, 6; John i, 29). The righteousness of the law is that obedience which the law requires (Rom. iii, 10, 20; viii, 4). The righteousness of faith is the justification which is received by faith (Rom. iii, 21-28; iv, 3-25; v, 1-11; x, 6-11; 2 Cor. v, 21; Gal. ii, 21). Righteousness is sometimes used for uprightness and just dealing between man and man (Isa. lx, 17), also for holiness of life and conversation (Dan. iv, 27; Luke i, 6; Rom. xiv, 17; Eph. v, 9). The saints have a threefold righteousness: (1.) The righteousness of their persons, as in Christ, his merit being imputed to them, and they accepted on the account thereof (2 Cor. v, 21; Eph. v, 27; Isa. xlv, 24); (2.) The righteousness of their principles, being derived from, and formed according to, the rule of right (Psa. cxix, 11); (3.) The righteousness of their lives, produced by the sanctifying influence of the Holy Spirit, without which no man shall see the Lord (Heb. xiii, 24; 1 Cor. vi, 11). See Dickinson, *Letters*, let. 12; Witherspoon, *Essay on Imputed Righteousness*; Hervey, *The-ron and Aspasio*; Owen, *On Justification*; Watts, *Works*, iii, 532, 8vo ed.; Jenks, *On Submission to the Righteousness of God*. Comp. JUSTIFICATION; SANCTIFICATION.

Righter, CHESTER N., an agent of the American Bible Society in the Levant, was a native of New Jersey. He graduated at Yale College in 1846; studied at New Haven and Andover, and afterwards spent a year or two in foreign travel for the benefit of his health. He sailed for the Levant in 1854, and died at Diarbekir, Turkey, in December, 1856, aged about thirty. Extracts from his letters and journals will be found in *The Bible in the Levant*, by Samuel I. Prime. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rigorists, a name given to the Jansenists by their adversaries. They made repentance to consist in the voluntary sufferings which the transgressor inflicts upon himself, in proportion to the nature of his crimes and the degree of his guilt. They went so far as to call those who had shortened life by excessive abstinence and labor the sacred victims of repentance, and said that they were consumed by the fire of divine love; that their conduct was highly meritorious in the sight of God; and that by their sufferings they not only appeased the wrath of God, but drew down abundant blessings upon their friends and upon the Church. See JANSEN.

Rigr, in Norse mythology, was a name of the god *Heimdall*, under which he became the ancestor of the four ranks of men—servants, peasants, nobles, and princes. Two of his descendants likewise bear this name.

Rig-Veda, the first and principal of the four Vedas. See VEDA.

Riley, Henry Augustus, a Presbyterian minister, was born in the city of New York Nov. 21, 1801. In 1815 he was sent to the Jesuit College at Georgetown, D.C., but left in 1817, and, under a private tutor in Philadelphia, he was prepared for the University of Pennsylvania, from which institution he graduated in July, 1820. After this he entered the law-office of Horace Binney, Esq., and continued in the study of the law until the fall, when a severe attack of illness moved him to the study of medicine. To this end he entered a private class of Prof. Nathaniel Chapman, M.D., and attended medical lectures in the University of Pennsylvania, and graduated from its medical department in April, 1825. Returning to his home in New York, he entered upon the practice of medicine, and continued for about three years. In June, 1828, he united with the Rutgers Street Presbyterian Church, then under the pastoral care of the Rev. Thomas McAuley, D.D., and soon after determined to devote his life to the work of preaching the Gospel. With this end in view, he entered Princeton Theological Seminary Feb. 5, 1829, and, after taking the full course, graduated in 1832. He was licensed by the Presbytery of New York in October of the same year, and ordained by the said presbytery in 1835.

After his licensure he went to Philadelphia, and laid the foundation of the Third Church of that city in January, 1833, and labored there until April following. From that time until August he supplied the Presbyterian Church at Mattewan, N. Y., and in April, 1835, took charge of the Eighth Avenue Church—now West Twenty-third Street Church—in New York city, at which time, as above stated, he was ordained. He labored in this field until January, 1839, when he went to Montrose, Pa., and was installed, and there he had a long, most useful, and successful pastorate of nearly a quarter of a century, from which he was released only on account of the loss of his voice, which occurred in 1863. After his resignation, he resumed for a limited time the practice of medicine, and continued to reside in Montrose, where he died, March 17, 1878. (W. P. S.)

Riley, Isaac, a minister of the Presbyterian Church, son of H. A. Riley, was born in the city of New York Feb. 2, 1835. After receiving a preparatory education he entered Yale College, and was graduated, having written the class poem. He next entered the Union Theological Seminary, and, after graduation, was admitted to the ministry. His first pastorate was at Middletown, Del., where he labored three years. He then accepted a call to Pottsville, Pa., and from there went to Newark, where he spent some time as associate pastor with his father-in-law, the Rev. Joel Parker. His next pastoral duties were in New York, where for seven years he occupied the pulpit of the Thirty-fourth Street Church, filling the position with signal ability and success. In 1875 he was called to the pastorate of the Westminster Church, Buffalo, preaching his first sermon on Oct. 20. His work was remarkably fruitful, and during his pastorate the Church enjoyed an uninterrupted prosperity. He was a man of very decided ability, and in him were united qualities very rarely combined in the same individual. His reasoning faculty was strong, and so also was his imagination. He was exact and mathematical, and at the same time poetical and rhetorical. All the varied powers of a disciplined intellect, and also of a strong emotional nature, were imbued with divine love, so that the whole man was consecrated to the work of the ministry. He wrote carefully and spoke fluently, and the best work was what he gave to his people and the public. He was one of the most useful men in Buffalo. In his last illness he suffered much, but bore it uncomplainingly, and sank into the peaceful slumber of death. He died at Buffalo Oct. 23, 1878. (W. P. S.)

Rimah. See WORM.

Rimmon. See POMEGRANATE.

Rim'mon (Heb. *Rimmon'*, רִמְמוֹן, a pomegranate, as often), the name of an idol, of a man, and also of several places; all probably having some allusion to the pomegranate, especially the localities, which were doubtless so named from the abundance of that fruit in the vicinity, although in modern times, owing to the neglect which has for ages prevailed under Turkish rule, that tree is comparatively scarce. See also RIMMON METH-OAR; RIMMON PAREZ.

1. (Sept. *Ῥεμμών*.) A deity worshipped by the Syrians of Damascus, where there was a temple or house of Rimmon (2 Kings v, 18). Traces of the name of this god appear also in the proper names Hadadrimmon and Tabrimmon, but its significance is doubtful. Serrarius, quoted by Selden (*De Dis Syris*, ii, 10), refers it to the Heb. *rimmōn*, a pomegranate, a fruit sacred to Venus, who is thus the deity worshipped under this title (comp. *Pomona*, from *pomum*). Ursinus (*Arboretum Bibl.* cap. 32, 7) explains Rimmon as the pomegranate, the emblem of the fertilizing principle of nature, the personified *natura naturans*, a symbol of frequent occurrence in the old religions (Bähr, *Symbolik*, ii, 122). If this be the true origin of the name, it presents us with a relic of the ancient tree-worship of the East, which we know prevailed in Palestine. But

Selden rejects this derivation, and proposes instead that Rimmon is from the root רָמַם, *rûm*, "to be high," and signifies "most high;" like the Phœnician *Elîum*, and the Hebrew רִמְמוֹן. Hesychius gives *Ῥαμάς, ὁ ὑψιστος θεός*. Clericus, Vitringa, Rosenmüller, and Gesenius were of the same opinion. Movers (*Phôn.* i, 196, etc.) regards Rimmon as the abbreviated form of Hadadrimmon (as Peor for Baal-Peor), Hadad being the sun-god of the Syrians. Combining this with the pomegranate, which was his symbol, Hadadrimmon would then be the sun-god of the late summer, who ripens the pomegranate and other fruits, and, after infusing into them his productive power, dies, and is mourned with "the mourning of Hadadrimmon in the valley of Megiddon" (Zech. xii, 11).

2. (Sept. *Ῥεμμών*.) A Benjamite of Beeroth, and the father of Rechab and Baanah, the murderers of Ishbosheth (2 Sam. iv, 2, 5, 9). B.C. ante 1053.

3. (Sept. *Ῥεμμών* v. r. *Ῥεμμώδ*, etc.) A town in the southern portion of Judah (Josh. xv, 32), allotted to Simeon (xix, 7; 1 Chron. iv, 32: in the former of these two passages it is inaccurately given in the A. V. as "Remmon"). In each of the above lists the name succeeds that of Ain, also one of the cities of Judah and Simeon. In the catalogue of the places reoccupied by the Jews after the return from Babylon (Neh. xi, 29) the two are joined, and inaccurately appear in the A. V. as "En-Rimmon" (q. v.). It is grouped with Ziklag and Beersheba, and must consequently have been situated near the southern border of the tribe. Rimmon would appear to have stood towards the western extremity of Simeon, and thus south of the plain of Philistia; for Joshua, in enumerating "the uttermost cities of the tribe of the children of Judah," begins at the coast of Edom on the east, and Rimmon is the last of twenty-nine, and therefore must have been near the western extremity. The only other notice of it in the Bible is in the prophecies of Zechariah: "All the land shall be turned as a plain, from Geba to Rimmon, south of Jerusalem" (xiv, 10). The land referred to is the kingdom of Judah; Geba lay on the northern and Rimmon on the southern border. Though both Eusebius and Jerome mention Rimmon, their notices are so confused, and even contradictory, that they evidently knew nothing of it. They appear to have confounded three towns of the same name. In one place Jerome calls it a town "of Simeon or Judah;" and yet he locates it "fifteen miles north of Jerusalem." In the very next notice he writes, "Remmon, in tribu Simeonis, vel Zabulon" (*Onomast.* s. v. "Remmon"). Under the name *Eremmon* (*Ῥεμμών*, *Onomast.* s. v.) both Eusebius and Jerome appear to give a more accurate account of the site of this city. They state that it is a "very large village" (*vicus prægrandis*), sixteen miles south of Eleutheropolis. This was no doubt pretty nearly its true position (see Reland, *Palest.* p. 973). About thirteen miles south of Eleutheropolis (now Beit Jibrin) is a ruined village called *Khurbet Um er-Rumanim* ("Mother of Pomegranates"), which in all probability marks the site, as it bears the name, of Rimmon of Simeon. On the top of the hill there are the foundations of an important square building of large well-dressed stones, and lower down there are the bases of three columns *in situ* (*Quar. Statement* of "Pal. Explor. Fund," Jan. 1878, p. 13). A short distance (about a mile) south of it are two tells, both of which are covered with ruins; and between them, in the valley, is "a copious fountain, filling a large ancient reservoir, which for miles around is the chief watering-place of the Bedouin of this region" (Van de Velde, *Memoir*, p. 344). As fountains are extremely rare in this southern district, it seems probable that this one may have given the name of Ain to the ancient town on the adjoining tell; and the proximity of Ain and Rimmon led to their being always grouped together.

4. (Heb. *Rimmono'*, רִמְמוֹן, his pomegranate; Sept. ῥ

'*Ῥεμμών*.) A city of Zebulun belonging to the Merarite Levites (1 Chron. vi, 77). There is great discrepancy between the list in which it occurs and the parallel catalogue of Josh. xxi. The former contains two names in place of the four of the latter, and neither of them the same. But it is not impossible that *Ῥεμμών* (Josh. xxi, 35) may have been originally Rimmon, as the D and R in Hebrew are notoriously easy to confound. At any rate there is no reason for supposing that Rimmono is not identical with Rimmon of Zebulun (xix, 13), in the A. V. Remmon-methoar (q. v.). The redundant letter was probably transferred, in copying, from the succeeding word—at an early date, since all the MSS. appear to exhibit it, as does also the Targum of Joseph.

5. THE ROCK RIMMON (Heb. *Sela ha-Rimmôn*, *הַרְמון* [also without the article] *סֶלָה*; Sept. *ἡ πέτρα τοῦ Ῥεμμών*; Josephus, *πέτρα Ποά*; Vulg. *petra cuius vocabulum est Remmon*; *petra Remmon*), a cliff (such seems rather the force of the Hebrew word *sela*) or inaccessible natural fastness, in which the six hundred Benjamites who escaped the slaughter of Gibeah took refuge, and maintained themselves for four months until released by the act of the general body of the tribes (Judg. xx, 45, 47; xxi, 13). It is described as in the "wilderness" (*midbār*), that is, the wild, uncultivated (though not unproductive) country which lies on the east of the central highlands of Benjamin, on which Gibeah was situated—between them and the Jordan valley. This is doubtless the Rimmon which Eusebius and Jerome mention, locating it fifteen miles north of Jerusalem (*Onomast.* s. v. "Remmon"). About ten miles north of Jerusalem, and nearly four east of Bethel, is a very conspicuous white limestone tell, rising like a cone above the neighboring hill-tops, and overlooking the whole wilderness down to the Jordan valley. Upon it stands a large modern village called *Rummon*. This is unquestionably the "Rock Rimmon" on which the Benjamites took refuge. It is admirably adapted for the purpose. A deep and wild ravine cuts off the approach from the south, and others skirt its western and northern sides, rendering it a natural fortress of great strength. The sides of the tell are steep, bare, and rocky, and could be defended by a few resolute men against a host. The top is rounded, affording ample space for the refugees, while along the sides are some large caverns (Robinson, *Bib. Res.* iii, 290; Van de Velde, *Memoir*, p. 344; Porter, *Handbook*, p. 217; Schwarz, *Palest.* p. 129).

Rim'mon Metho'ar (Heb. *Rimmon' ham-Metho'ar*, *הַרְמון הַמֶּתוֹאֵר*, i. e. *Rimmon the extensive*; Sept. *Ῥεμμωνὰ Μαθαρσοῦζα* v. r. *Ῥεμμωνὰ μαθαρῖν*; Vulg. *Remmon, Amthar*; A. V. "Remmon-methoar"), a place which formed one of the landmarks of the eastern boundary of the territory of Zebulun (Josh. xix, 13 only). It occurs between Eth-Katsin and Neah. *Methoar* does not really form a part of the name, but is the Pual of *מָתַר*, to stretch, and should be translated

accordingly (as in the margin of the A. V.)—"Rimmon which reaches to Neah." The object of the sacred writer is to describe as minutely as possible the exact course of the border-line. This is the judgment of Gesenius, *Thesaur.* col. 1292 a; Rödig, *ibid.* 1491 a; Fürst, *Handw.* ii, 512 a; and Bunsen, as well as of the ancient Jewish commentator Rashi, who quotes as his authority the Targum of Jonathan, the text of which has, however, been subsequently altered, since in its present state it agrees with the A. V. in not translating the word. The latter course is taken by the Sept. and Vulg. as above, and by the Peshito,

Junius and Tremellius, and Luther. Symmachus rendered *הַרְמון*, a descriptive epithet attached to Rimmon, "Rimmon the Renowned" (Rosenmüller, *ad loc.*). This Rimmon does not appear to have been known to Eusebius and Jerome, but it is mentioned by the early traveller Parchi, who says that it is called *Rumaneh*, and stands an hour south of Sepphoris (Zunz, *Benjamin*, ii, 433). If for south we read north, this is in close agreement with the statements of Robinson (*Bib. Res.* iii, 110) and Van de Velde (*Memoir*, p. 344), who place *Rummaneh* on the south border of the plain of Buttauf, three miles north-northeast of Seffurieh (comp. Pococke, *Trav.* ii, 62; Thomson, *Land and Book*, ii, 123; De Saulcy, *Dead Sea*, i, 69).

Rimmon is not improbably identical with the Levitical city which in Josh. xxi, 35 appears in the form of *Dimnah*, and again, in the parallel lists of Chronicles (1 Chron. vi, 77) as *Rimmono* (A. V. "Rimmon").

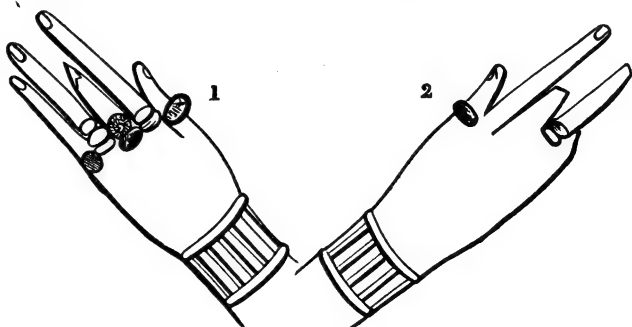

Rim'mon Pa'rez (Heb. *Rimmon' Pe'retz*, *הַרְמון פָּרֵץ* [in pause, *Pa'rets*, *פָּרֵץ*, pomegranate of the breach, so called probably from some local configuration; Sept. *Ῥεμμών Φαρίς*), the second-named station of the Israelites in the desert after leaving Hazereth, and located between Rithmah and Libnah (Numb. xxxiii, 20). It was somewhere in the northern interior of the Desert et-Thor, west of Kadesh-Barnea. See EXODE.

Rin, in Norse mythology, was the name of one of the rivers of hell.

Rinaldi, ODORIC, a learned Italian ecclesiastical historian of the 17th century, was a native of Treviso, and was educated at Parma by the Jesuits. He became an Oratorian at Rome in 1618. After the death of cardinal Baronius (who was also a member of the Congregation of the Oratory), Rinaldi wrote a continuation of his *Ecclesiastical Annals* from 1198 (where the former left off) to 1564, when the Council of Trent was dissolved. Rinaldi's addition to the work consists of ten large folio volumes, published at different periods from 1646 to 1677. Rinaldi was also the author of a sufficiently copious abridgment in Italian of the whole *Annals*, compiled by Baronius and himself.

Rinda, in Norse mythology, was one of Odin's wives, the mother of Wali, who became so strong in a single night that he was able to slay Hoeder, the murderer of Balder.

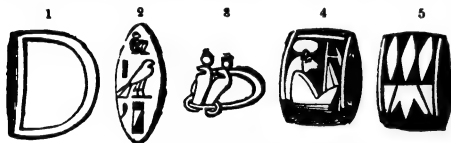

Ring (usually *טַבָּאֵת*, *tabba'ath*; *δάκτυλος*, occasionally *גָּלִיל*, *galil*, a circlet for the fingers, Esth. i, 6; Cant. v, 14, *גָּב*, *gab*, a rim of a wheel, Ezek. i, 18). The ring was regarded as an indispensable article of a Hebrew's attire, inasmuch as it contained his signet, and even owed its name to this circumstance, the term *tabba'ath* being derived from a root signifying "to impress a seal." It was hence the symbol of authority, and as such was presented by Pharaoh to Joseph (Gen. xli, 42), by Ahasuerus to Haman (Esth. iii, 10), by Antiochus to

Hands of a Wooden Figure of a Woman (on the lid of a mummy-case in the British Museum). 1, the left; 2, the right hand.

Philip (1 Macc. vi, 15), and by the father to the prodigal son in the parable (Luke xv, 22). It was treasured accordingly, and became a proverbial expression for a most valued object (Jer. xxii, 24; Hagg. ii, 23; Eccles. xlix, 11). Such rings were worn not only by men, but by women (Isa. iii, 21; Mishna, *Sabb.* 6, § 3), and are enumerated among the articles presented by men and women for the service of the tabernacle (Exod. xxxv, 22). The signet-ring was worn on the right hand (Jer. *loc. cit.*). We may conclude, from Exod. xxviii, 11, that the rings contained a stone engraven with a device, or with the owner's name. See ORNAMENT.

The ancient Egyptians wore many rings, sometimes two and three on the same finger. The left was considered the hand peculiarly privileged to bear those ornaments; and it is remarkable that its third finger was decorated with a greater number than any other, and was considered by them, as by us, *par excellence* the ring finger, though there is no evidence of its having been so honored at the marriage ceremony. They even wore a ring on the thumb. Some rings were very simple; others were made with a scarabæus, or an engraved stone; and they were occasionally in the form of a shell, a knot, a snake, or some fancy device. They were mostly of gold, and this metal seems to have always been preferred to silver for rings. Silver rings, however, are occasionally met with. Bronze was seldom used for rings, though frequently for signets. Some have been discovered of brass and iron (the latter of a Roman time); but ivory and blue porcelain were the materials of which those worn by the lower classes were usually made. The

Ancient Egyptian Finger-rings.

1, a gold ring; 2, the engraved face of it; 3, gold ring with two asps; 4, 5, rings of porcelain or blue glass pottery.

scarabæus was the favorite form for rings; in some the stone, flat on both faces, turned on pins, like many of our seals at the present day, and the ring itself was bound round at each end, where it was inserted into the stone, with gold wire. This was common not only to rings, but to signets, and was intended for ornament as well as security. Numerous specimens of Egyptian rings have been discovered, most of them made of gold, very massive, and containing either a scarabæus or an engraved stone (Wilkinson, *Anc. Egypt.* ii, 337). The ancient Assyrians seem to have been equally fond of similar ornaments. The same profusion was exhibited also by the Greeks and Romans, particularly by men

Ancient Assyrian Finger-rings (now in the British Museum). 1, of glass; 2, of bronze.

(Smith, *Dict. of Antiq.* s. v. "Rings"). It appears also to have prevailed among the Jews of the apostolic age; for in James ii, 2, a rich man is described as χρυσοδακτύλιος, meaning not simply "with a gold ring," as in the A. V., but "golden-ringed" (like the χρυσόχειρ, "golden-handed," of Lucian, *Timon*, 20), implying equally well the presence of several gold rings. See JEWEL.

The principal information we have about ancient rings is derived from Pliny. He says that Alexander the Great sealed all important documents in Europe with his own ring, and in Asia with that of Darius. He states that the Romans derived the custom of wearing rings from the Sabines, and they from the Greeks; hence there occurs no mention of Roman rings earlier

than the reign of Numa Pompilius. The rings then worn were generally of iron, and sometimes engraved. In process of time silver rings were adopted by free citizens, and those of iron were abandoned to slaves. Gold rings could, in the earlier ages of the republic, only be worn by senators; and even in their case the use of the gold ring was to be confined to public occasions. Marius, in his third consulate, is said to have worn one habitually; but if this account be correct, it must have been a ring of some special kind, for more than a century earlier the equestrian order had the privilege of wearing gold rings, since Hannibal, after the battle of Cannæ, sent as a trophy to Carthage three bushels of gold rings, taken from the fingers of the Roman knights slain in the battle. It is clear that the equestrian ring was not allowed to be indiscriminately worn, for Horace informs us that he did so himself by the express permission of Augustus (Horace, *Sat.* II, vii, 54). It may be that the passage in James's epistle refers to the equestrian ring as a token of Roman rank. The ring was generally worn on the fourth finger of the left hand, and Aulus Gellius gives as a reason for this that there is a vein from that finger running directly to the heart. To wear rings on the right hand was regarded as a mark of effeminacy, but they were not unfrequently worn in considerable numbers on the left. This was a practice among men of fashion at Rome (Martial, *Epig.* xi, 60), as it had been at Athens so far back as the age of Aristophanes (Aristoph. *Nubes*). Lampridius informs us that Heliogabalus, whose fingers were always covered with rings, never wore the same twice; and a part of the foppery of the age consisted in having rings of different weights for summer and winter. Wedding-rings, often of large size, were in use among the Jews, and from them Christians have borrowed the practice; and the ring has from a very early period formed a part of the episcopal costume, as indicating that the bishop was wedded to his Church. So long ago as the Council of Toledo (A.D. 633), a deposed bishop was restored by returning to him his episcopal ring. See SIGNET.

RING (in *Attire*). The practice of wearing rings has been widely prevalent in different countries and at different periods. They have been used to decorate the arms, legs, feet, toes, fingers, nose, and ears. The most general and most distinguished use of rings is on the finger. In ancient times the ring was a symbol of authority, and power was delegated by means of it. Finger-rings are alluded to in the books of Genesis and Exodus; Herodotus mentions that the Babylonians wore them; and from Asia they were probably introduced into Greece, doubtless subsequent to Homer's time, as he makes no mention of them. Rings worn in early times were not purely ornamental, but had their use as signet-rings. The devices in the earlier rings were probably cut in the gold; but at a later period the Greeks came to have rings set with precious stones. Among the Romans the signs engraved on rings were very various, including portraits of friends or ancestors and subjects connected with mythology or religion. Rings entered into the groundwork of many Oriental superstitions, as in the legend of Solomon's ring, which, among its other marvels, sealed up the refractory Jinn in jars and cast them into the Red Sea. The Greeks mention various rings endowed with magic power, as that of Gyges, which rendered him invisible when its stone was turned inwards; and the ring of Polycrates, which was flung into the sea to propitiate Nemesis and found by its owner inside a fish. Wedding and other rings have been thought to possess curative powers. Sometimes they owed their virtue to the stones with which they were set; thus diamond was believed to be an antidote against poison, etc. The Gnostics engraved ring gems with mystic symbols, names, monograms, and legends. In early times the names of Jesus, Mary, and Joseph on rings were deemed to be preservatives against the plague.

The early Christians adopted the use of rings, being

at first simple circles of ivory, bronze, iron, or some other cheap material. Many of them were adorned with symbols connected with their faith, such as the cross, the monogram of Christ, the dove, anchor, ship, palm-branch, etc.; others had simple religious phrases, among the most common of which was *Vivas in Deo* or *Spes in Deo*. Rings to be used as seal-rings alone were fitted with a plate of metal, often of the form of the bottom of a sandal or of the human foot, this, according to ancient tradition, being the symbol of possession. Among the rings found in the catacombs are some with a key, and some with both a key and a seal, the latter for both locking and sealing a casket. See *Appletons' Cyclop.* s. v.; *Chambers's Encyclop.* s. v.; *Gardner, Faiths of the World*, s. v.

RING (in Espousals). In early times it was customary for the man, together with other espousal gifts, to give the woman a ring as a further token and testimonial of the contract. This ceremony was used by the Romans before the introduction of Christianity, and in some measure admitted by the Jews, whence it was adopted among the Christian rites of espousal without any opposition. That the ring was used in espousals, and not in the solemnity of marriage itself, seems evident from the account given by pope Nicholas, A.D. 860 (*Nicol. Respons. ad Consulta Bulgarorum, Conc. t. viii, p. 517*). "In the espousals," says he, "the man first presents the woman with the *arra*, or espousal gifts; and among these he puts a ring upon her finger," etc. St. Ambrose (*Ep.* 34) and Tertullian (*Apol.* cap. 6) also speak of the *annulus pronubus*, or ring of espousal. Pliny mentions an iron ring as worn by a person betrothed. In the ancient Greek Church a special ceremony was observed in presenting the ring. With a golden ring the priest made the sign of the cross upon the head of the bridegroom, and then placed it upon the finger of his right hand, thrice repeating these words: "This servant of the Lord espouses this handmaid of the Lord, in the name of the Father, and of the Son, and of the Holy Ghost, both now and forever, world without end, Amen." In like manner and with the same form of words he presents the bride with a silver ring. The groomsmen then changes the rings while the priest, in a long prayer, sets forth the import of the rings; after which the whole is closed with a prescribed form of prayer. The *Gimmel*, or betrothal-ring, was used in later

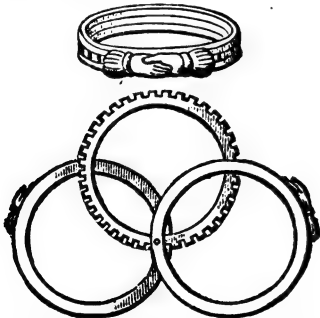

presenting a ring on the espousal of parties in marriage. It was called the ring of his espousals, *annulus sponsalitus pronubus*, and sometimes *annulus palatii*. The ring was formerly worn on the middle finger of the right hand, as indicative of silence and discretion in communicating the mysteries, in giving the benediction, but was shifted to the annular finger in celebrating mass. The ring is mentioned by the Councils of Orleans, 511; Rome, 610; fourth of Toledo, 633; Hincmar of Rheims, Isidore of Seville, and the sacramentaries of Gelasius and Gregory the Great, 590. These rings usually had monograms (*siglae*), or engraved subjects, and were used as signets till the 11th century in official correspondence, and for sealing a neophyte's confession of faith, and, by pope Sergius's order (687-701), for sealing the font from the beginning of Lent to Easter-eve in France and Spain. They were, in consequence, sometimes called church rings. Every bishop had also a jewelled pontifical ring. This ring represented fidelity to Christ; the duty of sealing and revealing; and, lastly, the gifts of the Holy Spirit. The best rings of suffragans at their decease were the perquisite of the primate, and, in the vacancy of the archiepiscopal chair, of the crown. Priests, as friends only of the bridegroom, did not wear rings (Coleman, *Christ. Antiq.*; Walcott, *Sacred Archaeol.* s. v.).

RING (in Matrimony). Originally the gift of the ring was made at the time of espousal, and not at the solemnization of marriage. Calroer (*Ritual. Eccles.*) traces the origin of the marriage ring to the 10th century. He supposes it to have been introduced in imitation of the ring worn by bishops, and to have been regarded as a kind of phylactery, or charm. According to Rome, the delivery of the ring by the husband to the wife indicated that she was admitted into his confidence. Another explanation is that the ring symbolizes eternity and constancy; and it has been alleged that the left hand was chosen to denote the wife's subjection to her husband, and the third finger because it thereby pressed a vein which was supposed to communicate directly with the heart (Riddle, *Christ. Antiq.* vii, 1; *Chambers's Encyclop.* s. v.). See **RING (in Espousals)**.

RING, THE DECADE, a modern substitute for the rosary during the existence of the penal laws, being more easily concealed. It has on it ten knobs, on each of which, as it passed under the fingers, an Ave was said, and on the eleventh, which is distinguished by a cross, a Paternoster.

RING, FISHERMAN'S, is that worn by the pope as the descendant of Peter, with an engraving of Peter casting his net.

Ring, MELCHIOR, a prominent Anabaptist leader in the landgrave of Hesse in the period of the Reformation, was at first a school-teacher and chaplain at Hersfeld. Having become a zealous disciple of Thomas Munzer (q. v.), he appeared in Sweden in 1524 in company with M. Hoffmann and Knipperdolling (q. v.), and by the fanaticism of his sermons excited a riot in Stockholm against images, which he justified as being the work of the Spirit of God. Towards the close of 1524 he returned to Germany in order to participate as a leader in the Peasants' War; and, after the bloody catastrophe at Frankenhausen, he fled to Switzerland, where he found a fruitful soil and a cordial reception. A murder committed by one of his adherents, professedly in obedience to the inspiration of God, obliged Ring, in 1527, to flee to the neighborhood of his early home. He now became a peripatetic preacher, made the teaching of Luther the subject of bitter attack, characterized the evangelical preachers as the expounders of a corrupt and dead faith, and by such means secured a large following. Disputations held with him failed to convince, and a threat of expatriation failed to alarm him. He eventually fled to East Friesland, which had become a rallying-place for Anabaptists generally, and while there employed every method to inspire his fol-

The *Gimmel*, or Linked Espousal-ring.

times. The upper figure shows the three parts brought together; the lower figure, the parts separately. In Iceland the ceremony of betrothal used to be accompanied by the bridegroom passing his four fingers and thumb through a large ring and in this manner receiving the hand of the bride (Bingham, *Christ. Antiq.* xxii, 35; *Gardner, Faiths of the World*, s. v.; *Chambers's Encyclop.* s. v.).

RING (in Investitures). A ring was anciently given to bishops on their consecration with these words: "Accipe annulum discretionis et honoris, fidei signum," etc. The ring was emblematical of his espousal to the Church, in imitation of the ancient ceremony of

lowers with a fanatical contempt for Scripture and the Lord's supper. It was difficult to restrain the fanatical tendencies thus implanted in the populace; but the Lutherans finally secured a preponderating influence, and Ring was compelled to flee once more. He labored in his characteristic method in Hesse and Saxony and met with some success, but was repeatedly imprisoned. He would seem to have died in connection with the Münster revolt. The teaching of Ring may be briefly stated as follows. Original sin involves no condemnation for persons of immature mind, etc. The curse in Gen. iii imposes spiritual death only, consequently death does not come to children on account of sin. Infant baptism is blasphemous, and cannot be justified on scriptural grounds. Christ is not God according to his nature, and does not derive human nature from Mary. He died and suffered, not for purposes of redemption and forgiveness of sins, but simply as an example and type; and they who would profit by his work must follow him with like works and sufferings. Christ's body and blood are not present in the sacrament. Man has the ability by nature to prepare himself to believe and come to the Spirit of God. See Krohn, *Gesch. d. fanat. u. enthus. Wiedertäufer*, etc. (Leips. 1758); *Mittheilungen aus d. prot. Sektengesch. in Hessen*, in *Niedner's Zeitschr. f. d. hist. Theologie*, 1858, p. 541-553, and 1860, p. 272 sq.

Ringgli, GOTTHARD, an excellent Swiss artist, was born at Zurich, Jan. 27, 1575. Of his early life, education, and progress we are not informed. He was chosen by the magistracy of Berne to decorate with paintings of large size the senate-house and minster of that metropolis, and had the freedom of the city conferred on him. For the public library of Zurich he painted the arms of the state and its dependencies, supported by Religion and Liberty. Death lies at the feet of Religion, but to the usual allegorical implements in her hands he added a bridle, to distinguish her from Fanaticism and Superstition. One of the most remarkable of his easel pictures, in the house of Werdmüller, is *Job Listening to his Wife's Invectives*. Perhaps his most valuable remains are designs, generally drawn with a pen and washed with India-ink. Among these are *Our Saviour's Burial*;—*Susannah with the Elders*;—*Faith Sheltered from Persecution*. He died in 1635.

Ringoraldt, BARTHOLOMEW, a German hymnologist, born at Frankfort-on-the-Oder in 1530, was preacher at Langenberg, in Neumark; but his principal fame was achieved as a writer of spiritual hymns, some of which are still in common use (e.g. *Es ist gewisslich an der Zeit*). His writings other than hymns are nearly all lost from sight. He believed that the end of the world was near, and had even calculated its date to fall in the year 1684; and his first book, *Die lautere Wahrheit* (1585), expresses his yearning for the eternal world and warns against the condemnation of hell; while his second book, *Christliche Warnung des treuen Eckert* (Frankfort-on-the-Oder, 1588), serves as a guide to the mysteries of heaven and hell, which places Eckert traverses in a trance. See Koch, *Geschichte des deutschen Kirchenliedes*, 2d ed. i, 156 sq.; Langbecker, *Das deutsch-evangel. Kirchenlied* (1830), p. 201 sq.; Vöckel, *Ehrengedächtniss evangel. Glaubenshelden u. Sängers* (1830), ii, 98; Wendebourg, *B. Ringoraldt's geistliche Lieder*, etc.

Ring-streaked is the rendering of the English Version ("ring-straked") of the Heb. קֶרֶךְ, *akód* (Gen. xxx: xxxi), as applied to the parti-colored rams of Jacob's flock. The Hebrew word literally means *banded*, or *striped*, and seems to refer especially to a variegation of color in the feet (Symmachus λευκότροδες, *Sadidas* similarly).

Rinkart, MARTIN, preacher and archdeacon at Eilenburg, in Saxony, was born there, April 23, 1586. His

official life began at Leipsic, where he obtained the master's degree, and at Eisleben and Endeborn, where he first engaged in the duties of the ministry of the Word. His pastorate in his native town extended over thirty-two years, and covered the entire period of the Thirty Years' War. It is related that a forced contribution of 30,000 thalers having been demanded from the town, Rinkart held a prayer-meeting on Feb. 21, 1639, to invoke God's help in the emergency, with the result that the sum demanded was reduced to 8000 florins, then to 4000, and finally to 2000. Pastor Rinkart was also a poet, and wrote hymns which are sung in the churches of Germany to-day, and are worthy of note because of their jubilant spirit, e.g. *Nun danket Alle Gott*, etc. Of his writings in other departments, though they were once numerous, but few have been preserved, and they contain nothing that possesses importance at this day. He died Dec. 8, 1649. See Plato, *M. Martin Rinkart*, etc. (Leips. 1830); Vöckel, *Ehrengedächtniss. evang. Glaubenshelden u. Sängers* (ibid. 1830), ii, 21 sq., 127 sq.; Koch, *Gesch. d. deutsch. Kirchenliedes*, 2d ed. i, 144 sq.; iv, 567 sq.

Rin'nah (Heb. *Rimah'*, רִמָּה, *a shout*; Sept. *Ῥινών* v. r. *Ῥινά*), a son of Shimon, of the tribe of Judah (1 Chron. iv, 20). B.C. prob. ante 1618.

Riper Years. In one of the offices for baptism, this phrase is used to designate those who are beyond the age of children and "able to answer for themselves." This definition is not only that given by the Church, but is implied in the words themselves, which embrace both adults and those in age between the latter and children. In the ordinal this and kindred terms are used, as in the exhortation of priests, "that by daily reading and weighing the Scriptures ye may wax *riper* and stronger in your ministry."

Ripheus, in Greek mythology, was the largest of the centaurs, whose monstrous head towered far above the tallest trees of the forest. He was killed by Theseus while present at the marriage of Pirithous.

Ri'phath (Heb. *Riphath'*, רִפְתָּ, perhaps *spoken*; Sept. *Ῥιπάθ* v. r. *Ῥιπάι*; Vulg. *Riphath*), the second son of Gomer and the brother of Ashkenaz and Togarmah (Gen. x, 3). B.C. cir. 2450. The Hebrew text in 1 Chron. i, 6 gives the form *Diphath* (q. v.); but this arises out of a clerical error similar to that which gives the forms Rodanim and Hadad for Dodanim and Hadar (vers. 7, 50; Gen. xxxvi, 39). The name Riphath occurs only in the genealogical table, and hence there is little to guide us to the locality which it indicates. The name itself has been variously identified with that of the Rhipæan Mountains (Knobel); the river Rhebas, in Bithynia (Bochart); the Rhibi, a people living eastward of the Caspian Sea (Schulthess); and the Riphæans the ancient name of the Paphlagonians (Joseph. *Ant.* i, 6, 1). This last view is certainly favored by the contiguity of Ashkenaz and Togarmah. The weight of opinion is, however, in favor of the Rhipæan Mountains, which Knobel (*Völkert.* p. 44) identifies etymologically and geographically with the Carpathian range in the north-east of Dacia. The attempt of that writer to identify Riphath with the Celts or Gauls is evidently based on the assumption that so important a race ought to be mentioned in the table, and that there is no other name to apply to them; but we have no evidence that the Gauls were for any lengthened period settled in the neighborhood of the Carpathian range. The Rhipæan Mountains themselves existed more in the imagination of the Greeks than in reality; and if the received etymology of that name (from *ῥιπάι*, "blasts") be correct, the coincidence in sound with Riphath is merely accidental, and no connection can be held to exist between the names. The later geographers, Ptolemy (iii, 5, § 15, 19) and others, placed the Rhipæan range where no range really exists, viz. about the elevated ground that

separates the basins of the Euxine and Baltic seas. See ETHNOLOGY.

Ripidium (Gr. *ῥιπίδιον*, a bellows) was a fan made of parchment, peacocks' feathers, or linen, and was used in the ancient churches to drive away all such insects as might drop into the cups or infest the altar. The author of the *Fasti Siculi* or *Chronicum Alexandrinum* (p. 892), calls them *ῥιπία ῥιπίδια*, and reckons them among the holy utensils of the altar which were laid up among the rest in the scenophylacium, or vestry of the church. Suicer thinks that in most of the writings the word *ripidia* signifies one of their holy vessels, a basket or the like, in which they used to carry the sacred elements to and from the altar. In the liturgies of Chrysostom and Basil it is taken in the common sense of Greek authors, and it is used in the *Constitutions* for a fan to blow with: for in Chrysostom's liturgy the deacon is to ventilate, or blow over, the elements with a fan; or, if there be no fan, then to do it with the covering of the cup. See Bingham, *Christ. Antig.* viii, 6, 21; xv, 3, 6.

Ripley, Ezra, a Unitarian minister, was born at Woodstock, Conn., May 1, 1751. He followed farming until he was sixteen, when he began to study, and was admitted into Harvard College, July, 1772. After his graduation he taught in Plymouth, and studied theology under Rev. Jason Haven, of Dedham. He was ordained pastor of the Church in Concord, Mass., Nov. 7, 1778. He was honored with the degree of D.D. in 1816. Dr. Ripley was an ardent advocate of the temperance cause, and was a member of the old Massachusetts Society for the Suppression of Intemperance. His death took place Sept. 18, 1841. His publications are *Sermons and Charges* (1791-1829):—*History of the Concord Fight* (1827). See Sprague, *Annals of the Amer. Pulpit*, viii, 112.

Ripley, Henry Jones, D.D., a distinguished Baptist divine and Biblical scholar, was born in Boston, Jan. 28, 1798. He entered Harvard University, a medal scholar from the Boston Latin School, at the early age of fourteen, and graduated with the class of 1816. He took the full course of theological study at Andover, where he graduated in 1819. He was ordained as an evangelist Nov. 7, 1819, and spent some time in Georgia, devoting himself especially to the religious welfare of the colored people in the section of the state where he labored. The length of his ministerial service at the South was not far from seven years, 1819-1826. One year during this period he spent in Eastport, Me. Soon after the founding of the Newton Theological Institution, Dr. Ripley was elected, in 1826, professor of Biblical literature and pastoral duties, which office he held until 1832, when the election of another officer allowed him to direct his whole attention to Biblical interpretation. In 1839 he was transferred to the chair of sacred rhetoric and pastoral duties, which position he occupied with ability for seventeen years. The last three years of his connection with the institution he was associate professor of Biblical literature. After a service of thirty-four years, he resigned his professorship. After his resignation he was occupied some five years in literary work, and for a time was engaged in evangelical labors among the freedmen of Georgia. Returning to the institution at Newton, he accepted an appointment as librarian, which position he held during the remainder of his life. He died at Newton Centre, Mass., May 21, 1875. Prof. Ripley made diligent use of his pen during his life. He published quite a number of carefully prepared articles in the *American Baptist Magazine*, the *Christian Review*, and the *Bibliotheca Sacra*. He was also the author of the following works: *Memoir of Rev. Thomas S. Winn*:—*Christian Baptism*, an examination of Prof. Stuart's essay on the mode of baptism:—*Notes on the Four Gospels*:—*Notes on the Acts of the Apostles*:—*Notes on the Epistle to the Romans*:—*Notes on the Epistle to the Hebrews*, with new

translation:—*Sacred Rhetoric*, composition and delivery of sermons:—*Exclusiveness of the Baptists*, a review of Rev. A. Barnes's pamphlet on exclusivism:—*Church Policy*, a treatise on Christian churches and the Christian ministry. He prepared also an edition of *Campbell's Lectures on Systematic Theology*, and edited the *Karen Apostle* by Rev. Francis Mason. See Stearns, Hovey, and Clarke, *Funeral Addresses*. (J. C. S.)

Ripley, Ezekiah, D.D., a Congregational minister, was born at Windham, Conn., Feb. 3 (O. S.), 1743. He graduated at Yale College in 1763, and was ordained, Feb. 11, 1767, pastor at Green's Farms, where he labored until his death, December, 1831. He was made a member of Yale College Corporation in 1790, and remained such for twenty-seven years. See Sprague, *Annals of the Amer. Pulpit*, i, 647.

Ripley, John Bingham, a Presbyterian minister, was born in Ellsworth township, Mahoning Co., O., April 18, 1824. He was converted when eighteen years of age; graduated at Jefferson College, Pa., in 1846, and at the Theological Seminary at Princeton, N. J., in 1850. His labors in the ministry began in Burlington, N. J., where he was invited to settle, but did not do so. He subsequently accepted an agency from the American and Foreign Christian Union, and labored in Ohio and Michigan. He was ordained and installed by the Philadelphia Presbytery as pastor of the Mariners' Church, Philadelphia, in 1854, and here he continued to labor until his death, March, 1862. This was a very interesting charge. The sailors were his friends, and nothing that he could do for them by the instrumentality of books, visits, letters of entreaty, and prayer was ever omitted. He sought the mariner at the tavern, the cellar, the refectory, the boarding-house, the sailors' home, and on board of ship. Besides many articles in the religious press, he was the author of several works, viz.: *Thoughts for the Forecastle*:—*Seven Diamonds*:—*Plain Words for Young Men*, besides several Tracts. See Wilson, *Presb. Hist. Almanac*, 1863, p. 200. (J. L. S.)

Ripley, Lincoln, a Congregational minister, was born at Woodstock, Conn., in 1761. Late in life he entered Dartmouth College, where he graduated in 1796. He soon after entered the ministry and settled at Waterford, Me., then a wilderness. His life was identified with the early history of the Church and town of Waterford. He severed his connection with that Church in 1821, and died July 14, 1858. See *Amer. Cong. Year-book*, 1859, p. 128.

Ripley, Samuel, son of Ezra, was born in Concord, Mass., March 11, 1783, and graduated from Cambridge in 1804. He was ordained, Nov. 22, 1809, pastor of the Church at Waltham. After the death of Rev. B. Whitman, it was proposed to unite the two Unitarian societies; but Mr. Ripley, thinking it too great a burden, resigned shortly before (Oct. 27, 1841), and soon after took the pastoral charge of the Unitarian Church in Lincoln. In 1846 he removed to Concord, where he died, Nov. 24, 1847. See Sprague, *Annals of the Amer. Pulpit*, viii, 116.

Ripley, Thomas B., a Baptist minister, and brother of Dr. H. J. Ripley, was born in Boston Nov. 20, 1795, and was a graduate of Brown University, in the class of 1814. He studied theology with the Rev. Dr. Staughton, of Philadelphia, and was ordained as pastor of the First Baptist Church in Portland, Me., July 24, 1816, where he remained till March, 1828. He removed to Bangor, Me., and was pastor of the First Baptist Church in that city from Sept. 10, 1829, until, in 1834, he resigned. After supplying two churches for a time, he removed to Tennessee, teaching and preaching in several places in that state, and performing ministerial service at Holly Springs, Miss. He returned to Portland, Me., in 1852, and acted as city missionary for several years. He died May 4, 1876. (J. C. S.)

Rippon, JOHN, D.D., an English Baptist minister of distinction, was born in Tiverton, Devonshire, April 29, 1751, and was the son of a Baptist minister. He pursued his studies at Bristol, and for many years was the successor of the Rev. Dr. Gill in the pastorate of the Baptist Church on Grange Road, Southwark. The testimony of Dr. Rippon with regard to the stand taken by the Baptist ministers of London and vicinity in the War of the Revolution is interesting. "I believe," he remarks, in a letter to Pres. Manning, of Brown University, dated May 1, 1784, "all our Baptist ministers in town except two, and most of our brethren in the country, were on the side of the Americans in the late dispute. But sorry, very sorry, were we when we heard that the college was a hospital, and the meeting-houses were forsaken, and occupied for civil or martial purposes. We wept when the thirsty plains drank the blood of your departed heroes, and the shout of a king was among us when your well-fought battles were crowned with victory. And to this hour we believe that the independence of America will for a while secure the liberty of this country; but that if the continent had been reduced, Britain would not long have been free." Dr. Rippon died Dec. 17, 1836. (J. C. S.)

Ripundshaya, in Hindû mythology, was a mythical king, in whose reign great religious changes are said to have been brought about. It would seem that Buddhism took root, and under his protection spread throughout all India.

Risabha, in Hindû mythology, was the oldest of the twenty-three Buddhas who have appeared in India, belonging to the race of king Ikswara. He is frequently represented as an ox, though more generally as a man with the head of an ox, or as a man with horns. The ox, as a symbol of wisdom, is peculiar to him, and always accompanies him, even when he is simply represented on the altar by a variously colored head.

Risco, MANUEL, a learned Spanish ecclesiastic of the Augustinian Order, was born at Haro about 1730, and died about the close of the century. He acquired such reputation for knowledge in ecclesiastical history that he was appointed by the king, Charles III, to continue the history of which Florez published 29 vols. 4to. To these he added six volumes, written with equal ability and liberality of sentiment. The work was entitled *Espana Sagrada*. See Chalmers, *Biog. Dict.* s. v.

Rishis, in Hindû mythology, are ten sons of Brahma, who are infinitely wise and pious, and thus resemble the gods, with whom they share the power to create men and gods. All things owe their existence immediately to these Rishis in common with the gods, and they are accordingly termed the ten ancestors, or lords, of all created beings. Their names are Daksha, Pulastya, Agni, Wasishtha, Atri, Maritshi, Brigu, Narada, Pulagen, and Kratu. The seven Menus—Suagarâbhara, Svaroshisha, Anttami, Tamasa, Raivatta, Chakshusha, and Vaivasvata—are sometimes classed with the Rishis.

Rishton, EDWARD, a Roman Catholic writer, was born in Lancashire, and died in 1586 at Louvain of the plague. He published *Synopsis Rerum Ecclesiasticarum ad Annum Christi 1577*, and a *Profession of Faith*. He was the first publisher of Nicholas Sanders's *De Origine et Progressu Schismatis Anglicani* (1585, 8vo), to which he added a third part; and a fourth part, by way of appendix, appeared in 1628. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rising in the Air, the name of a belief (prevailing in the Middle Ages) that the bodies of holy persons were sometimes lifted up and suspended in the air during the continuance of a religious ecstasy. Calmet states in his work on apparitions that this singular phenomenon might be produced by the fervor of the Holy Spirit, by the ministry of good angels, or

by a miraculous favor of God, who desired thus to honor his servants in the eyes of men. Numerous instances are recorded in the *Acta Sanctorum*, and their relation accounts for the frequency with which representations of saints are exhibited in an aerial position in mediæval paintings, etc. This belief falls in with one of the alleged phenomena of modern spiritualism.

Risler, JEREMIAH, a distinguished bishop and writer of the Moravian Church, was born at Mülhausen, in Upper Alsace, Nov. 9, 1720. He was a graduate of the University of Basel, and entered the ministry of the Reformed Church, laboring at Lübeck and St. Petersburg, from 1744 to 1760. In the latter year he joined the Moravian Church, and took charge of a parish at Neuwied, on the Rhine, where he remained for twenty-five years. In 1782 he was consecrated to the episcopacy, and in 1786 was elected to the executive board of the *Unitas Fratrum*, known as the Unity's Elders' Conference, of which body he continued a member until his death. His ministerial career embraced a period of sixty-six years, fifty of which he devoted to the Moravian Church. He was a zealous servant of Christ, an eloquent preacher, and a faithful overseer of the flock. He died at Berthelsdorf, Saxony, Aug. 23, 1811. The following are his principal works: *A French Translation of Zinzendorf's Discourses*, and a new edition of the *French Hymnal of the Church* (1785):—*La Sainte Doctrine* (1769), translated into German and English:—*Historischer Auszug aus den Büchern des A. T.* (1794):—*Leben von A. G. Spangenberg* (1794):—*Spangenberg's Reden an die Kinder*, two collections (1792 and 1797):—*Zinzendorf's Gedanken über verschiedene evangelische Wahrheiten* (1800):—*Betrachtungen der Weisheit Gottes im dem Kreuzestod Jesu*:—and three volumes of *Erzählungen aus der Brüdergeschichte*. (E. de S.)

Risley, ASHABEL LINN, a minister of the Methodist Episcopal Church, was born in Bullitt County, Ky., Feb. 14, 1804. He united with the Church Sept. 5, 1825, although he did not find peace until the 11th of the same month. He was licensed to preach July 27, 1827, and entered the itinerant ministry Sept. 16, 1827. He labored in the Kentucky, Rock River, and Southern Illinois Conference until 1866, when he took a superannuated relation, and removed to Lebanon, where he remained until the time of his death, Aug. 24, 1874. See *Minutes of Annual Conferences*, 1874, p. 126.

Ris'sah (Heb. *Rissah*, רִסָּה, *a ruin*; Sept. *Ῥεσσα* v. r. *Ῥεσσα* and *Δεσσα*), the twentieth station of the Hebrews in the desert (Numb. xxxiii, 21, 22). It lies, as there given, between Libnah and Kehelathah, and has been considered identical with *Rasa* in the *Peuting. Itiner.*, thirty-two Roman miles from Ailah (Elah), and 203 miles south of Jerusalem, distinct, however, from the *Ῥῆσσα* of Josephus (*Ant.* xiv, 15, 2). See EXODE.

Ristubgrad, in Norse mythology, was a pentagon known as Druid's-foot or pentagram. It was a sacred symbol among the ancient Celts and Germans.

Risus, in Roman mythology, i. e. *laughter*, is said to have been venerated as a deity by several tribes of Italy.

Rite (Lat. *ritus*) is, in general, an external sign or action employed in religious services, and designed either to express or to incite a corresponding internal religious feeling. Such are, for instance, the uplifting or outstretching of the hands in prayer, the imposition of hands, etc. The name *rite* is sometimes used to signify the aggregate of all the ceremonies used in a particular religious office, as a "rite of baptism" or of the eucharist. In a still wider sense, it is used of the whole body of distinctive ceremonial, including the liturgy employed by a particular community of Christians. In this way we speak of the "Roman rite," the "Greek rite," or the "Slavonic rite." See CEREMONY.

Rites of Baptism. See BAPTISM, CEREMONIES OF.

Rites, CONGREGATION OF, the name of a committee of cardinals in the Roman Catholic Church, founded by pope Sixtus V. It was originally composed of six cardinals, with a number of secretaries and consulters. The reigning pope decides the number of members. In 1875 it comprised seventeen cardinals, twenty-five consulters, and eleven officials, including secretary, promoters of the faith, assessors, and masters of ceremonies. The matters of which it has cognizance are the liturgy, the rites of the administration of the sacraments, the rubrics of the missal and breviary, the ceremonial of the Church in all public functions, and the proceedings in the beatification and canonization of saints. The congregation meets once a month at the residence of the prefect, who is always the senior cardinal of the board. See *Appletons' New Amer. Cyclop.* s. v.

Rith'mah (Heb. *Rithmah'*, רִיתְמָה, *heath*; Sept. *Paṣṣamā*), the seventeenth station of the Hebrews in the wilderness (Numb. xxxiii, 18, 19). About half a day's journey south from Wady Kiseima (see AZMON) is found a valley called Wady Rithimath, or Wady Abur-Retemat. *Rothem* literally is a broom-bush; hence *Rithmah*, the region of the *brush* or *heath*, and near this wady the broom-bushes are abundant. So Schwarz (*Palest.* p. 212), who identifies Rithmah with Kerdes-Barnea. It probably lay immediately west of that place. See EXODE.

Ritschl, GEORG KARL BENJAMIN, an eminent minister of the evangelical Church of Prussia, was born Nov. 1, 1783, at Erfurt. He studied theology at Erfurt and Jena, was licensed to preach in 1802, and came to Berlin in 1804, serving first as a private tutor, next as an adjunct professor in a gymnasium, and finally as a preacher in St. Mary's Church. Eighteen years were given to the duties of that station, during which he approved himself both as a pulpit speaker and an instructor of the young. In 1816, Ritschl was made a member of the consistory having supervision over Brandenburg, and distinguished himself in the conduct of the examination of candidates for the ministry to a degree that secured for him the title of doctor of divinity. He also aided in the preparation of the *Berliner Gesangbuch* of 1829, a task for which he was qualified by the possession of musical talent and thorough musical culture. In August, 1827, Ritschl was appointed bishop of the evangelical Church and general superintendent of Pomerania, etc., and in the spring of the following year he entered on the duties of his high station. The plan of *union* in the Prussian evangelical Church was successfully introduced during his administration, and the visitations devolved on the superintendency were so efficiently performed that he sustained direct and personal relations with the entire clergy of the province, and was acquainted with the character of each individual in its membership. Having reached the age of seventy years, and having completed a public career of half a century, Ritschl resigned his position in 1854. He was, however, constituted an honorary member of the Supreme Ecclesiastical Council of Prussia, and thus induced to give his thought and labors to the Church down to the close of his life. He died June 18, 1858. See Herzog, *Real-Encyklop.* s. v.

Rittangelius, or **Rithangel**, JOHN STEPHEN, a German writer of the 17th century, was a native of Forchheim, in the bishopric of Bamberg, and is said by some writers to have been born a Jew; but others assert that he was first a Roman Catholic, then a Jew, and lastly a Lutheran. This, however, is certain—that he published several books containing Judaical learning, was professor of Oriental languages in the Academy of Königsberg, and died about 1652. His works are, *Commentary on Jezirah* (Amsterd. 1642, 4to);—*De Veritate Religionis Christianæ* (Franker, 1699);—*Libra Veritatis* (1698);—*Letters*:—*German Translation of Prayers used by*

Jews in their Synagogues, etc. Rittangelius maintained this paradox, that the New Testament contains nothing but what was taken from the Jewish antiquities. See Chalmers, *Biog. Dict.* s. v.

Ritter, Erasmus, a Bavarian, the Reformer of Schaffhausen, lived in the middle of the 16th century. He was at first opposed to the Reformation, and, being possessed of oratorical talents, was invited to Schaffhausen in 1522 to confront Seb. Hofmeister (q. v.); but being led to study the Scriptures in the progress of his work, he was converted, and at once entered on the work of strengthening the evangelical cause. He displayed great prudence and moderation, but nevertheless his Zwinglian principles involved him in angry disputes with Burgauer (1528 sq.), the successor of Hofmeister, in consequence of which it was found advisable to dismiss both the controversialists. Ritter went to Berne, where new troubles awaited him. The condition of his later life is not known. He married in 1529 the sister of the abbot of All-Saints in Schaffhausen, and was long in steady correspondence with Zwingli. See Herzog, *Real-Encyklop.* s. v.

Ritter, Joseph Ignaz, a Roman Catholic divine, was born at Schweinitz, in Silesia, April 12, 1787. In 1811 he received his first orders; in 1813 he was chaplain at Grottkau; in 1818 at Berlin; and from thence he was called, in 1823, as ordinary professor of theology to Bonn. In 1830 he was created doctor of divinity and appointed professor of theology and member of the chapter at Breslau, and advanced in 1846 as cathedral dean, which position he occupied till his death, Jan. 5, 1857. He wrote, *Manual of Church History* (5th ed. Bonn, 1854, 2 vols.):—*Irenikon, or Letters for Promoting Peace and Concord between Church and State* (Leips. 1840):—*History of the Breslau Diocese* (Breslau, 1845):—*Popular Lectures on the History of the Church in the First Four Centuries* (Paderborn, 1849):—*On Busen and Stahl* (Breslau, 1856, etc.). See Zuchold, *Bibliotheca Theologica*, ii, 1073; Winer, *Handbuch der theol. Literatur*, i, 543, 586, 598, 607, 887; ii, 736; Supplement, p. 156, 296; Niedner, *Kirchengeschichte*, p. 864. (B. P.)

Ritter, Karl, an eminent German geographer, was born Aug. 7, 1779, in Quedlinburg, Prussia. He studied at Halle, and after travelling in Switzerland, France, and Italy, was appointed professor extraordinary of geography at the University of Berlin in 1820. He was also director of studies of the military school. Ritter was the founder of general comparative geography, and exercised a decisive influence on its study, remodelling the whole science, and attracting general attention to its problems and results. He died at Berlin, Sept. 25, 1859. His chief works are, *Die Erdkunde im Verhältnisse zur Natur und Geschichte des Menschen* (Berlin, 1822-54, 17 vols. [19 pts.]):—*Europa, ein geographisch-historisch-statistisches Gemälde* (Frankfort, 1807, 2 vols.):—*Die Stupas, oder die architect. Monumente*, etc. (Berlin, 1838):—*Die Colonisirung von Neu-Zealand* (ibid. 1842):—*Blick auf das Nilquellend* (ibid. 1844):—*Der Jordan und die Beschiffung des Todten Meeres* (ibid. 1850):—*Ein Blick auf Palästina und die christliche Bevölkerung* (ibid. 1852). Parts of his works have been translated into English by Gage: *Comparative Geography* (Edinb. 1865), and *The Comparative Geography of Palestine and the Sinaitic Peninsula* (ibid. 1866, 4 vols.). See Gage, *Life of Karl Ritter*, in the *For. Quar. Rev.* Oct. 1837; Hoefler, *Nouv. Biog. Générale*, s. v.

Ritu, the seasons of the Hindûs, which are six in number—two summers, two springs, and two winters. Their names are *Sisar*, the season of dew; *Himant*, of cold; *Vassant*, of bloom; *Grishna*, of heat; *Varsa*, of rain; and *Sarat*, of thaw.

Ritual (from *ritus*, a ceremony) has been defined as "the external body of words and action by which worship is expressed and exhibited before God and man;" also "the book containing the particular ordinances of

any single Church." The necessity of ritual, whether of a more or less elaborate kind, may be supported (1) *on historical grounds*. Its traces may be found in all ages; and every form of religion, true or false—Christianity, Mohammedanism, Buddhism, and the different forms of idolatry—has had a ritual of its own. (2) *On internal grounds*. From the twofold constitution of man as body and spirit. As long as the body is an essential element of man, so long, it is urged, will ritual be a necessary feature in his worship. Objection is made that the Jewish system of external observances, and, by inference, all worship of a similar kind, was abolished by our Lord when he said, "God is a Spirit, and they that worship him must worship him in spirit and in truth" (John iv, 24); and that all attempts to re-introduce a system of ritual are a violation of the genius and intention of the Founder of Christianity. This was the basis of the teaching of George Fox (A.D. 1647). But it appears, from Christ's own conduct in the institution of baptism and the Lord's supper, and those recorded acts of worship (Luke xviii, 13; xxi, 2, 3; xxii, 4) which secured his sanction or approval, that the real object of his animadversion was a permanent external worship from which the heart and affections were absent. The special objects of Christian ritual are (1) to impart the historic truths of religion. By the various festivals (e. g. Easter, Whit-Sunday) of the Church and their attendant ceremonies, Christians have their attention drawn to the divine origin of their religion. (2) A constant witness to moral and doctrinal truth. Thus baptism shows the corruption of human nature and the necessity of purity, and is a symbol of the inward "washing of regeneration." Mosheim (*Eccles. Hist.* [Amer. ed.] i, 84) states that Christ only "established two rites, which it is not lawful either to change or abrogate, viz. *baptism* and the *Lord's supper*," and infers from this that "ceremonies are not essential to the religion of Christ, and that the whole business of them is left by him to the discretion and free choice of Christians." In the 2d century ceremonies were much increased, for which Mosheim (i, 132) assigns the following reasons: (1) To conciliate the Jews and pagans; (2) to rebut the charge of atheism made against the Christians, because they had not the external paraphernalia of religion; (3) imitation of language in the New Test., such as terms borrowed from the Jewish laws. The bishops were first innocently called *high-priests*, the presbyters *priests*, etc. These titles were abused by those to whom they were given, who claimed that they had the same rank and dignity, and possessed the same rights and privileges, with those who bore them under the Jewish dispensation. Hence the splendid garments, and many other things. (4) Among the Greeks and other people of the East nothing was considered more sacred than the *Mysteries*. This circumstance led the Christians, in order to impart dignity to their religion, to claim similar mysteries. Without discussing the general subject further, we present the rituals of the various prominent Christian churches.

1. *Church of Rome*.—The ceremonial of the offices of the Roman Church administered by bishops is contained in the books entitled *Pontificale* and *Ceremoniale Episcoporum*. The priestly offices are detailed in the Ritual. In its present form it dates from the Council of Trent, which directed a revision of all the different rituals then extant. An authoritative edition was published by Paul V in 1614, which has been frequently reprinted, and of which a revision was issued by Benedict XIV. Besides the Roman Ritual, there are many diocesan rituals, some of which are of much historical interest. The most approved commentary on the Roman Ritual is that of Barrufaldo (Florence, 1847, 2 vols.). See *BREVARY*; *MISSAL*; *RITUALE ROMANUM*.

2. *English Church*.—Originally each bishop had the power to form his own liturgy, and to regulate its attendant ritual, provided that the essential features of Christian worship were retained, and that nothing com-

manded in Scripture or derived from apostolic times was omitted. St. Basil (A.D. 329-379) composed a liturgy for the Church of Cæsarea, which received the sanction of its bishop, Eusebius (*Greg. Naz. Orat.* 20). As a consequence, great variety existed, with a tendency to increase. Two early but unsuccessful attempts were made to introduce a uniformity of worship throughout England. The Council of Cloveshoe (A.D. 747) recommended the adoption of the Roman liturgy to all the English dioceses, but its recommendation was never more than partially carried out. In 1085 St. Osmund compiled the *Sarum Breviary* and *Missal*, which obtained a wide circulation, but were never universally accepted to the exclusion of those previously existing. It was, in a great measure, to remedy the inconveniences resulting from this variety that the *First Book of Common Prayer*, compiled by a committee of Convocation (first appointed in A.D. 1542), was issued in the second year of king Edward VI (A.D. 1549). This book, after receiving various additions and alterations in A.D. 1552, 1560, 1604, and 1662, is still the guide of the English Church in all matters connected with the performance of divine service and ritual. See *COMMON PRAYER, BOOK OF*.

3. *Greek Church*.—In the Greek Church, as in the other Eastern communions, the ritual forms part of the general collection (which contains also the eucharistic service) entitled *EUCHOLOGION* (q. v.).

4. *The Methodist Churches*.—The ritual of these churches embraces directions for public worship, for the administration of baptism and the Lord's supper, for solemnizing matrimony, burial of the dead, reception of members, laying corner-stones, dedication of churches, consecration of bishops, and ordination of deacons and elders. The chief part of this ritual was prepared by Mr. Wesley, and was adopted by the General Conference of 1784. Methodists do not believe that any precise form of ritual is essential, but that, as far as practicable, a uniform system should be adopted for the sake of propriety and order. See Blunt, *Dict. of Theol.*; *Chambers's Encyclop.*; Simpson, *Cyclop. of Methodism*, s. v.; Mosheim, *Church Hist.* vol. i; Barnum, *Romanism*.

Ritual Choir. The part of the church actually used for the choir, and distinct from the architectural or constructional choir.—Walcott, *Sac. Archæol.* s. v.

RITUALÈ ROMĀNUM. Various rituals (*ordines Romanus*) had been issued from time to time in behalf of the worship of the Roman Catholic Church [see *ORDO ROMANUS*]; but the later popes, since the Council of Trent (comp. sess. xxv, *De Indice Librorum*) were concerned to promote ecclesiastical unity by introducing a common ritual. Pius V accordingly published the *Breviarium* and the *Missale Romanum*, and Clement VIII the *Pontificale* and *Ceremoniale* (see the respective articles); and Paul V followed their example by causing certain cardinals to compile a new service-book from several of the older rituals, especially that of cardinal Julius Antonius (*Sanctæ Severinæ*), which was issued under the title *Rituale Romanum*, June 16, 1614, and its use made obligatory. It contains the sacraments to be administered by priests, *sacramentalia*, processions, forms for use in records of the Church, etc. Other service-books gradually gave way before it in the general use of the Church, though special books were still prepared, particularly for use in the churches in the city of Rome. See Catalani, *Sacrarum Cereemoniarum*, etc. (Rome, 1750, 2 vols. fol.).

Ritualism, a term popularly applied to a movement in the Church of England, and in the Protestant Episcopal Church. The revival of ecclesiastical learning, which was so conspicuous a feature of the *Tractarian* (q. v.) movement, necessarily made the clergy better acquainted with the primitive liturgies, and with the ancient service-books of the Church of England. This study of ecclesiology, as the science came to be

called, was soon brought to bear upon the restoration of old churches and the construction of new ones, as well as upon the service of the Church. There was also the feeling that prayer, praise, and the holy eucharist are offered to God, as well as used for the spiritual advantage of man. It was under such circumstances, and under such influences, that "Ritualism" took its rise.

The principles of Ritualism, according to its advocates, are three. They say, in the first place, that it rests on the declaration of the Convocation of Canterbury (1571), "that preachers should, in the first place, be careful never to teach anything from the pulpit, to be religiously held and believed by the people, but what is agreeable to the doctrine of the Old and New Testaments, and collected out of that very doctrine by the catholic fathers and ancient bishops." This was thought to establish the doctrinal identity of the Church of England with the primitive Church. Consequently the apostolic episcopate and sacramental grace are especially insisted on, baptismal regeneration is strenuously asserted, and the holy eucharist has been made the central object of teaching and the highest object of worship. The voluntary use of private confession and absolution as a preparation for the reception of the holy communion has also made considerable progress. The second great principle of the Ritualist is stated in the thirtieth canon: "So far was it from the purpose of the Church of England to forsake and reject the churches of Italy, France, Spain, and Germany, or any such-like churches, in all things which they held and practiced, that, as the apology of the Church of England confesseth, it doth with reverence retain those ceremonies which do neither endamage the Church of God nor offend the minds of sober men." This principle, it is alleged, establishes the fraternal readiness of the Church of England for visible union with other branches of the apostolic Church, and the Ritualists assert a willingness to do any and every thing lawful to approximate towards the Continental Church. The third principle is found in the Ornaments Rubric: "The chancels shall remain as they have done in times past . . . that such ornaments of the church and of the ministers thereof, at all times of their ministrations, shall be retained and be in use as they were in this Church of England, by the authority of Parliament, in the second year of the reign of king Edward VI." This was interpreted to mean that the chancels, vestments, ornaments of the church and ministers, should be the same as before the Reformation. This principle was fully developed at several churches in London, Oxford, Leeds, and elsewhere. Depending upon the above-mentioned principles, there are six chief points insisted upon by the Ritualists: 1, the eastward position of the celebrant in the sacrament of the holy communion, with his back to the people; 2, the eucharistic vestments; 3, lights, burning at the time of celebration; 4, incense; 5, the mixed chalice, a little water being mixed with the wine; 6, unleavened (or wafer) bread. The *Directorium Anglicanum*, being a manual of directions for the right celebration of a holy communion, for the saying of matins and evensong, and for the performance of other rites and ceremonies of the Church, according to ancient uses of the Church of England, by the Rev. John Purchas, was published in 1858. A full development of ritualistic usages on the principle thus indicated was established at St. Alban's Church, Holborn, and at a later date at a Brighton chapel, of which Mr. Purchas became incumbent. The ceremonial of divine service was raised to a much higher standard than had been contemplated by the older school of Ritualists, and provoked opposition from them, for it was chiefly copied from modern Continental customs, and was much mixed up with a sentimentalism about candles and flowers, as well as with an excessive minuteness in regard to postures and gestures, which made it easy to charge the school with trifling and want of manliness.

There have been a number of legal cases arising out

of the teaching and practices of the Ritualists. The Church of Barnabas, Picnic, was opened in 1850 for the purpose of carrying out completely and honestly the principles of Ritualism. This led to litigation, which ultimately brought both advocates and opponents before the Privy Council in 1857. The council considered some portions of the furniture of the church to be unsanctioned by the existing law, but the principle then contended for by the Ritualists was affirmed by their interpretation of the Ornaments Rubric, respecting the various forms of which they decided that "they all obviously mean the same thing, that the same dresses and the same utensils or articles which were used under the First Prayer-book of Edward VI may still be used." This decision left the Ritualists in possession of the field. Suits were also instituted against Mr. Mackonochie, vicar of St. Alban's, and Mr. Purchas, incumbent of St. James's Chapel, Brighton, which were carried up to the Privy Council, and all the six above-mentioned usages, and some others, were condemned. Of more importance than these cases was that of the Rev. W. J. E. Bennett, vicar of Frome, who published a sermon in which he taught "the real and actual presence of our Lord, under the form of bread and wine, upon the altars of our churches." The Court of Arches, through Sir Robert Phillimore, decided in Mr. Bennett's favor, and the appeal to the judicial committee of the Privy Council was dismissed by them (1872). In 1867 a royal commission was appointed "to inquire into and report upon different practices which had arisen, and varying interpretations which were put upon the rubrics, orders," etc.; also to reconstruct the tables of lessons used at morning and evening prayer. Its reconstructed lectionary was authorized for use by Parliament and Convocation (1871). The Ritualists have paid great attention to the study of the liturgies and rituals of all ages, and to that of hymnology. They have encouraged the revival of religious orders, and have communities of women devoted to labor in hospitals and like institutions. The ritualistic movement of England has received more or less sympathy in the United States, but with much less development of detail. In 1874 a general canon was passed, which was regarded as a nearly unanimous expression of opinion unfavorable to ritualistic extremes, but no occasion has arisen for putting it in force. Comp. OXFORD TRACTS.

Ritualist. See RITUALISM.

Ritzema, JOHANNES, one of the leading ministers of the Reformed (Dutch) Church during the last century. He was born in Holland, 1710, and thoroughly educated in that country. He was pastor of the Collegiate Reformed (Dutch) Church in New York from 1744 to 1784. His sermons were "of a high order." He is represented as a man of great prudence, and of most estimable character in the Church and in the community. Although at first he was regarded as "a conservative cætus man" in the great controversy which rent the Church, he soon, with his colleague Rev. Lambertus De Ronde, went over to the *Confentie* and became an active partisan with those who opposed the ordination of ministers in this country. His consistory remained neutral. He wrote several pamphlets in opposition to Rev. John Leydt, who favored independence. During the Revolutionary war, he and De Ronde were compelled to leave the city, and remained in their old age in their places of exile. His last four years (1784-88) were spent at Kinderhook, N. Y. He was a trustee of Kings, now Columbia College, N. Y.; and at one time, when it was proposed to establish a divinity professorship in that institution, he was prominently named for that office by his friends. See De Witt, *Historical Discourse*; Gunn, *Life of J. H. Livingston*; Corwin, *Manual of the Reformed Church*. (W. J. R. T.)

River. In the sense in which we employ the word,

viz. for a perennial stream of considerable size, a river is a much rarer object in the East than in the West. See WATER. The majority of the inhabitants of Palestine at the present day have probably never seen one. With the exception of the Jordan and the Litâny, the streams of the Holy Land are either entirely dried up in the summer months, and converted into hot lanes of glaring stones, or else reduced to very small streamlets deeply sunk in a narrow bed, and concealed from view by a dense growth of shrubs. The cause of this is twofold: on the one hand, the hilly nature of the country—a central mass of highland descending on each side to a lower level—and on the other the extreme heat of the climate during the summer. There is little doubt that in ancient times the country was more wooded than it now is, and that, in consequence, the evaporation was less, and the streams more frequent; yet this cannot have made any very material difference in the permanence of the water in the thousands of valleys which divide the hills of Palestine.

"River" is the rendering in the A. V. of seven distinct Hebrew words. These are not synonymous. Most of them have definite significations, and were used by the sacred writers to set forth certain physical peculiarities. When these are overlooked, the full force and meaning of the Scriptures cannot be understood; and important points of physical geography and topography fail to be apprehended.

1. **אֲבָל** (or **אֲבָל**), *ubâl*, used only in three passages of Daniel (viii, 2, 3, 6). "I was by the river of Ulai." It comes from the root **אָבַל**, which, like the corresponding Arabic, signifies *to flow copiously*. Its derivative, **נְבִיל**, is the Hebrew term for *deluge*.

2. **אָפִיק**, *aphik*, from **אָפַק**, *to hold or restrain*. It thus comes to signify "a channel," from the fact of its "holding" or "restraining" within its banks a river. It is said in 2 Sam. xxii, 16, "The channels of the sea appeared, the foundations of the world were discovered" (comp. Psa. xlviii, 15). The psalmist gives it very appropriately to the glens of the Negeb (south), which are dry during a great part of the year: "Turn again our captivity, O Lord, as the channels in the Negeb." The beauty of this passage is marred by the present translation, "streams in the south" (Psa. cxxvi, 4). The word is rightly translated "channels" in Isa. viii, 7. It ought to be rendered in the same way in Ezek. xxxii, 6: "And the channels (rivers) shall be full of thee." But the most striking example of a wrong rendering is in Joel iii, 18: "And all the rivers of Judah shall flow with waters." See **אֲפִיק**.

3. **יְאֹר** (or **יָאֹר**), *yeôr*, is an Egyptian word, which is applied originally, and almost exclusively, to the river Nile, and, in the plural, to the canals by which the Nile water was distributed throughout Egypt, or to streams having a connection with that country. It properly denotes a *fosse* or *river* (it was expressed by *ioro* in the dialect of Memphis, and by *iero* in that of Thebes, while it appears as *ior* in the Rosetta inscription). It was introduced into the Hebrew language by Moses, and is used more frequently in the Pentateuch than in all the rest of the Bible. As employed by him it has the definiteness of a proper name. Thus, "Pharaoh stood by the river" (Gen. xli, 1; comp. ver. 2, 3, 17, etc.): "Every son that is born ye shall cast into the river" (Exod. i, 22). The Nile was emphatically the river of Egypt. Subsequent writers, when speaking of the river of Egypt, generally borrow the same word (Isa. vii, 18; xix, 6; Jer. xlv, 7; Ezek. xxix, 3; Amos viii, 8, etc.). In a few places it is employed to denote a large and mighty river, not like the rivulets or winter torrents of Palestine. Thus in Isa. xxxiii, 10: "Pass through the land as a river, O daughter of Tarshish" (comp. xxxiii, 21). The usual rendering of this word in the A. V. is "river;" but it is translated "streams" in Isa. xxxiii, 21; "flood" in Jer. xlv, 7, 8; Amos viii, 8, etc.; and

"brooks" in Isa. xix, 6, 7, 8, where reference is manifestly made to the "canals" which convey the water of the Nile to different parts of Egypt. See NILE.

4. **נָהָל**, *nahâl*, is found only in Jer. xvii, 8: "He shall be as a tree . . . that spreadeth out her roots by the river." The word is radically identical with **נָהַל** (No. 1), and its meaning is the same.

5. **נָהָר**, *nahâr*, from the root **נָהַר**, which signifies *to flow*; and it may be regarded as the proper Hebrew equivalent for our word *river*. The cognate Arabic *nahr* has the same meaning, in which language also, as in Hebrew, it includes canals, as the "*Naharawan* of Khuzistan;" and the Scripture must mean the Euphrates and its canals, where it speaks of "the rivers (*naharoth*) of Babylon" (Psa. cxxxvii, 1). It is always applied to a perennial stream. It is possibly used of the Jordan in Psa. lxxvi, 6; lxxiv, 15; of the great Mesopotamian and Egyptian rivers generally in Gen. ii, 10; Exod. vii, 19; 2 Kings xvii, 6; Ezek. iii, 15, etc. It is often followed by the genitives of countries, as "*the river of Egypt*" (Gen. xv, 18), that is, the Nile; "*the river of Gozan*" (2 Kings xvii, 6); "*the rivers of Ethiopia*" (Isa. xlviii, 1); "*the rivers of Damascus*" (2 Kings v, 12). With the article, **נְהַר**, *han-nahâr* (the river) is applied emphatically to the Euphrates; thus in Gen. xxxi, 21, "He rose up, and passed over the river;" and Exod. xxxiii, 31, "I will set thy bounds . . . from the desert unto the river" (Numb. xxiv, 6; 2 Sam. x, 16, etc.). The Euphrates is also called "the great river" (Gen. xv, 18; Deut. i, 7, etc.). In one passage this word, without the article, evidently signifies the Nile (Isa. xix, 5); though in poetry, when thus used, the Euphrates is meant (vii, 20; Psa. lxxii, 8; Zech. ix, 10). In a few passages the word is translated "flood" (Josh. xxiv, 2; Job xiv, 11; Psa. lxxvi, 6); but with a few exceptions (Josh. i, 4; xxiv, 2, 14, 15; Isa. lix, 19; Ezek. xxxi, 15), *nahâr* is uniformly rendered "river" in our version, and accurately, since it is never applied to the fleeting fugitive torrents of Palestine. See TOPOGRAPHICAL TERMS.

6. **נָחַל**, *nâchal*, is derived from the root **נָחַל**, which signifies *to receive or to possess*. Its usual meaning is a valley, probably from the fact of its receiving the surface-water after rains, and affording a bed for a stream. Sometimes it is applied to a valley or glen, apart altogether from the idea of a stream. Thus in Gen. xxvi, 17, Abraham "pitched his tent in the valley of Gerar." As many of the valleys of Palestine were the beds of winter streams, the word was sometimes applied to the stream itself, as in Lev. xi, 9, 10; the "valley," the "brook," and the "river" Zered (Numb. xxi, 12; Deut. ii, 13; Amos vi, 14); the "brook" and the "river" of Jabbok (Gen. xxxii, 23; Deut. ii, 37), of Kishon (Judg. iv, 7; 1 Kings xviii, 40). Comp. also Deut. iii, 16, etc. Jerome, in his *Questions in Genesis*, xxvi, 19, draws the following curious distinction between a valley and a torrent: "Et hic pro valle torrents scriptus est, nunquam enim in valle invenitur puteus aquæ vivæ." Sometimes, however, the rendering is incorrect, and conveys a very wrong impression. In Numb. xiii, 23 "the brook Eshcol" should manifestly be "the valley of Eshcol;" and in Deut. iii, 16 the same word is rendered in two ways—"unto the river Arnon half the valley" (comp. Josh. xii, 2). Again, in Josh. xiii, 6 the sacred writer is represented as speaking of "a city that is in the midst of the river;" it means, of course, valley (comp. 2 Sam. xxiv, 5). Frequent mention is made of the "brook Kidron" (2 Kings xxiii, 6, 12; 2 Chron. xv, 16; xxix, 16; xxx, 14); but valley is the true meaning. In Psa. lxxviii, 20 is the following: "He smote the rock, that the waters gushed out, and the streams overflowed."

Neither of these words expresses the thing intended; but the term "brook" is peculiarly unhappy, since the pastoral idea which it conveys is quite at variance with

the general character of the wadys of Palestine. Many of these are deep abrupt chasms or rents in the solid rock of the hills, and have a savage, gloomy aspect, far removed from that of an ordinary brook. For example, the Arnon forces its way through a ravine several hundred feet deep and about two miles wide across the top. The Wady Zerkā, probably the Jabbok, which Jacob was so anxious to interpose between his family and Esau, is equally unlike the quiet "meadowy brook" with which we are familiar. And those which are not so abrupt and savage are in their width, their irregularity, their forlorn arid look when the torrent has subsided, utterly unlike "brooks." Unfortunately, our language does not contain any single word which has both the meanings of the Hebrew *náchal* and its Arabic equivalent *wady*, which can be used at once for a dry valley and for the stream which occasionally flows through it. Ainsworth, in his *Annotations* (on Numb. xiii, 25), says that "bourne" has both meanings; but "bourne" is now obsolete in English, though still in use in Scotland, where, owing to the mountainous nature of the country, the "burns" partake of the nature of the *wadys* of Palestine in the irregularity of their flow. Burton (*Geog. Journ.* xxiv, 209) adopts the Italian *fiumana*. Others have proposed the Indian term *nul-lah*. The double application of the Hebrew *náchal* is evident in 1 Kings xvii, 3, where Elijah is commanded to hide himself in (not by) the *náchal* Cherith, and to drink of the *náchal*. This word is also translated "flood" in 2 Sam. xxii, 5; Job xxviii, 4, etc. See BROOK.

The frequent use of the word *náchal* in Scripture, and the clear distinction drawn between it and *nahár* by the sacred writers, are indicative of the physical character of Palestine—"a land of hills and valleys;" a land in which nearly all the valleys are dry in summer, and the beds of torrents during the winter rains. The Arabic word *wady* is the modern equivalent of the Hebrew *náchal*. It means a valley, glen, or ravine of any kind, whether the bed of a perennial stream or of a winter torrent, or permanently dry. Like its Hebrew equivalent, it is also sometimes applied to the river or stream which flows in the valley; but not so commonly as *náchal*. In reading the Hebrew Scriptures the context alone enables us to decide the meaning attached by the writer in each passage to the word *náchal*. In a few instances it appears to be used in two senses in the very same sentence (comp. 1 Kings xvii, 3-7, etc.). See a picturesque allusion to such brooks in Job vi, 15. When the word stands alone it seems to denote a mere winter torrent, a permanent stream being indicated by the addition of the word נָחַל, "perennial," as in Psa. lxxiv, 15; Deut. xxxi, 4; Amos v, 24. See VALLEY.

A few brooks are specially designated (in addition to the above), as the Brook of Willows (Isa. xv, 7), a stream on the east of the Dead Sea, probably the present Wady el-Ahsy, which descends from the eastern mountains and enters the eastern end of the Dead Sea; the Besor (*the cold*), a torrent emptying itself into the Mediterranean near Gaza (1 Sam. xxx, 9, 10, 21); and the Kanah, a stream on the borders of Ephraim and Manasseh (Josh. xvi, 18; xvii, 9). "The brook of Egypt," mentioned in Numb. xxxiv, 5; Josh. xv, 4, 47; 1 Kings viii, 65; 2 Kings xxiv, 7; Isa. xxxvii, 12, which is also called simply "the brook" (Ezek. xlvi, 19; xlviii, 28), and described as on the confines of Palestine and Egypt, is unquestionably the Wady el-Arish, near the village of that name, which was anciently called Rhinocorura. The "river (*yeor*) of Egypt" is, however, the Nile; and it is unfortunate that the two are not so well distinguished in the A.V. as in the original. Other examples are the valley of Gerar (Gen. xxvi, 17) and the valley of Sorek (Judg. xvi, 4), so called probably from its vineyards, which Eusebius and Jerome place north of Eleutheropolis and near to Zorah. The valley of Shittim ("acacias") was in Moab, on the borders of

Palestine (Joel iv, 18; comp. Numb. xxv, 1; Josh. ii, 1; iii, 1; Mic. vi, 5). See each name in its place.

7. נָחַל, *peleg*. The root of this word appears to be the same as that of φλέω, φλύω, *fleo*, *fluo*, *pluo*, and the English *flow*; its meaning is "to gush" or "flow over." Peleg is equivalent to the Arabic *paly*, "a stream," and is always given to something *flowing*. Thus in Job xxix, 6, "The rock poured me out *ivers* of oil;" and Lam. iii, 48, "Mine eye runneth down with *ivers* of water." In the Bible it is used ten times, and is translated "rivers," except in Psa. xlvii, 4, where it is rendered "streams," and in Judg. v, 15, 16, "divisions," where the allusion is probably to the artificial streams with which the pastoral and agricultural country of Reuben was irrigated (Ewald, *Dichter*, i, 129; Gesen. *Thesaur.* col. 1103 b); or perhaps to the *gullies* that intersect that high table-land. See MOAB.

8. What is commonly rendered "conduit" (2 Kings xviii, 17; xx, 20; Isa. vii, 3; xxxvi, 2), once a "water-course" (Job xxviii, 25), is in one verse transformed into "little rivers," but with "conduits" on the margin (Ezek. xxxi, 4). The word is נַחֲלֵי, *tsaláh*, and means simply a channel or conduit for the conveying of rain or water of any sort. See CONDUIT.

Rivers were worshipped by many nations of antiquity (Spanheim, on *Callim. Apol.* 112; *Cerer.* 14; Voss, *Idololat.* ii, 79 sq.), and especially in the East. Comp. Herod. i, 138; Strabo, xv, 732; Arnob. *Adr. Gen.* vi, 11. On the Persians, see Heliodor. *Æth.* ix, 9; so the Egyptians. Some trace of the reverence for them so generally felt has been supposed by some to have existed among the idolatrous Hebrews (from Isa. lvii, 6; Bosseck, *De Cultu Fluminum* [Lips. 1740]; Van Speren, in *Biblioth. Hag.* IV, i, 81 sq.), but without ground (see Rosenmüller and Gesen. in *Jes. ad loc.*). The principal rivers mentioned in the Bible are the Euphrates, the Nile, and the Jordan (see each). See SWEDIE, *Lakes and Rivers of the Bible* (Lond. 1864). See PALESTINE.

RIVER OF EGYPT. This term occurs eight times in the Old Test. (Gen. xv, 18; Numb. xxxiv, 5; Josh. xv, 4, 47; 1 Kings viii, 65; 2 Kings xxiv, 7; Isa. xxxvii, 12, in the last passage translated "the stream of Egypt"). In the first of these the word translated *river* is נָחַר, *nahár*, while in all the others it is נָחַל, *náchal*. The preceding remarks on these two terms, and the clear distinction drawn between them by the sacred writers, will show that in the above passages they can scarcely be regarded as identical in meaning, and that in all probability *Nehár Mitzráyim* is to be regarded as distinct from *Náchal Mitzráyim*. To determine this point, it will be necessary to examine critically the several passages in which the words occur, and the light that may be thrown upon them by parallels. Geographically, the question is of importance, as determining the southern border of "the land of promise" and of "the land of possession."

1. *Nehár Mitzráyim* (נָחַר מִצְרַיִם, "The river of Egypt"). The land which the Lord gave in covenant promise to Abraham is thus described in Gen. xv, 18: "Unto thy seed have I given this land, from the *river of Egypt* unto the great river, the river Euphrates." The Sept. renders the phrase, ἀπὸ τοῦ ποταμοῦ Αἰγύπτου; and the Vulg., a *fluvio Aegypti*. The word נָחַר, as has been stated, like ποταμός and *fluvius*, means *river*. But the Nile is the only river of Egypt, and hence it is natural to conclude that the Nile is meant, and here—as the western border of the promised land, of which the eastern border was the Euphrates—the Pelusiac or easternmost branch. So it is understood by most commentators (Kalisch, Delitzsch, etc., *ad loc.*). It is true the extent of territory thus defined was never actually occupied by the seed of Abraham; nor was it possessed except, perhaps, during the reigns of David and Solomon. See PALESTINE.

2. *Náchal Mitzráyim* (נַחַל מִצְרָיִם) occurs seven times in the Bible. In six of these the A. V. translates "river," and in one "stream" (Isa. xxvii, 12). The Sept. has *χευάρριος* in Numb. xxxiv, 5; Josh. xv, 47; 2 Kings xxiv, 7; and 2 Chron. vii, 8; *φάραγξ* in Josh. xv, 4; *τοράμος* in 1 Kings viii, 65; and *Πινκοπούρων* in Isa. xxvii, 12. The Vulg. has *rivus* in 1 Kings viii, 65 and 2 Kings xxiv, 7, but *torrens* in the others. The proper meaning of *náchal* is "valley," though it is sometimes, as has been stated (see above), applied to the winter streams of Palestine. It could not with any propriety be applied to a large permanent river like the Nile. What, therefore, do the sacred writers mean by *Náchal Mitzráyim*?

In describing to Moses the land of Canaan, which the Israelites were about to enter and possess, the Lord stated that the southern boundary should extend from Kadesh-Barnea to "the river of Egypt," or more correctly "the wady (valley) of Egypt" (Numb. xxxiv, 5). After the conquest, the southern border of Judah extended to the same points (Josh. xv, 4, 47). The country over which the Israelites had spread in the time of Solomon was "from the entering-in of Hamath unto the river of Egypt" (1 Kings viii, 65; 2 Chron. vii, 8). In all these passages it will be observed that the country described is much smaller than that given in covenant-promise to Abraham, extending only on the north as far as the entrance of Hamath. This has already been explained in the article PALESTINE.

Two other passages in which the term is employed are more difficult. In 2 Kings xxiv, "the river of Egypt" is mentioned as the proper boundary of that country; and it is said of the king of Babylon, that he had taken "from the river of Egypt to the river Euphrates all that pertained to the king of Egypt." The expression nearly resembles that in Gen. xv, 18, where the river Nile is meant (see above). A similar form is used by Isaiah (xxvii, 12); and there the Sept. has rendered *Náchal Mitzráyim* by *Rhinocorura*, which was the name of a town now called el-Arish. If this be correct, then *Náchal Mitzráyim* must be identified with *Wady el-Arish*, a valley and small winter stream which falls into the Mediterranean near this town. This is the view adopted by most of the old commentators (see in Gesenius, *Thesaur.* p. 872; Reland, *Palest.* p. 969, and authorities there cited). Jerome states that *Rhinocorura* was situated on the borders of Palestine and Egypt, and that the "river (torrens) of Egypt" was near it (*Comment. ad Jes. xix et xxvii; ad Amos vi*). Ancient geographers and historians describe Egypt as extending to this city (Eusebius, *Onomast.* s. v.; Diod. Sic. i, 60; Strabo, xvi, p. 780; Reland, p. 286). This torrent, or valley, derived its notoriety from being the boundary of two great countries; and hence in Ezek. xlvii, 19 and xlviii, 28 it is called emphatically "the valley" (A. V. "the river").

There is nothing, therefore, in any of the passages of Scripture in which this term occurs, nor in the geographical notices in other passages, nor is there anything in the old geographers or historians tending to identify *Náchal Mitzráyim* with the Nile. This appears more clearly when the proper distinction is drawn between the country given in covenant promise to Abraham, and that actually allotted to the Israelites (Bochart, *Opera*, i, 62).

It may be inferred that the first term, *Nehár Mitzráyim*, ought to be translated "the river of Egypt;" and that it was the designation of the Nile in Abraham's time, before the Egyptian word *yeór* became known. The other term, *Náchal Mitzráyim*, might be rendered "torrent, or wady, of Egypt." It was applied to *Wady el-Arish*, which acquired its importance and notoriety from the fact of its marking the boundary between Palestine and Egypt. See EGYPT, BROOK OF.

River Brethren, a sect deriving their origin from

the Mennonites. A revival of religion occurred during the Revolutionary war in Lancaster Co., Pa., and a number of Germans being converted, some of them associated with United Brethren, and others were organized into a body called *the River Brethren*. The name is applied to them partly from the locality in which they were first found—near the Susquehanna and Conestoga—and chiefly from their baptizing only in rivers. They now extend into Ohio, Canada, and elsewhere. They recognise three orders of clergy—bishops, elders, and deacons. Their preachers—generally uneducated men, engaged in secular pursuits during the week, and receiving no salary for services—are chosen by votes, and in case of a tie they have recourse to the lot. Their services are generally in the German language, and held in private houses. This denomination reject infant baptism, and baptize adults by trine immersion. They hold to feet-washing, baptism, the Lord's supper, and communion (love-feast), and wear their beards unshorn. They have never published a confession of faith. They are opposed to war, and cannot therefore serve in the army. See Gardner, *Faiths of the World*, s. v.; Porter, *Hand-book of Religions*, s. v.

Rivet, André, a celebrated French Protestant theologian, was born at Saint-Maxent, Aug. 5, 1573. He studied theology at the Academy of Orthez under Lambert Daneau, and afterwards at La Rochelle under Rotan. He was ordained in 1595, and went to Thouars as chaplain to the duke de la Tremoille. After the death of his patron he remained in Thouars, and his reputation as a preacher and theologian steadily increased. In 1620 he was called to the chair of theology in the University of Leyden. He married, in 1621, the sister of the celebrated Pierre du Moulin, and while in England received a fellowship at Oxford. The Synod of Castres endeavored to persuade Rivet to return to France and devote his talents to the work of building up the Protestant Church in his native country, but nothing could induce him to leave Holland. He received from prince Frederick Henry a most distinguished mark of esteem, being chosen tutor and adviser for the young prince William. In 1632 he left Leyden to become director of the College of Orange, at Breda. Here he remained till his death, which occurred Jan. 7, 1651. Rivet was a firm Calvinist, and always ready to combat any of the foes of orthodoxy. He left a great number of works, a complete list of which may be found in *La France Protestante*. Among the most important are, *Comment. in Hoseam* (Leyden, 1625, 4to);—*Catholicus Orthodoxus*, etc. (ibid. 1630, 2 vols. 8vo);—*Isagoge, seu Introductio Generalis ad Scripturam Sacram* (ibid. 1627, 4to);—*Theologicæ et Scholasticæ Exercitationes in Gesenium* (ibid. 1633, 4to);—*Commentarii in Librum Secundum Moysis* (ibid. 1634, 4to). The theological works of Rivet have been published in three volumes (*Opera Theologica* [Rotterdam, 1651–60, fol.]). See Hoefer, *Nouv. Biog. Générale*, s. v.

Rivet (DE LA GRANGE), Antoine, a learned French Benedictine, was born at Confolens in 1683. He opposed the bull *Unigenitus* uttered by Clement XI, for which he was punished by confinement in the monastery at Mans. His death occurred in 1749. He projected a great work entitled *The Literary History of France*, of which he composed nine volumes (1733–50), and which was continued by Clémencet and others.

Rivet (DE CHAMPVERNON), Guillaume, brother of André, was born at Saint-Maxent, May 2, 1580. He was ordained in 1601, and was pastor of the church at Saillebourg. He was member of various synods, and assisted at the political assembly of Saumur. He died in 1651. Rivet was a man of great prudence; and though his learning was not so extensive as that of his brother, his mind was fully as clear and forcible. Of his writings we mention, *Libertatis Ecclesiasticæ Defensio* (Geneva, 1625, 8vo);—*De la Défense des Droits de Dieu* (Saumur, 1634, 8vo);—*Vindiciæ Evangelicæ de*

Justificatione (Amst. 1648, 4to). These works are very rarely to be found.

Rixa, i. e. *strife*, in Roman mythology, is the same as the Greek *Eris*, the goddess of discord.

Rizpah (Heb. *Rizpah*, רִצְפָּה, *a live coal*, as in Isa. vi, 6; Sept. Ρεσφά v. r. Ρεσφάδ; Josephus, Παισφά [*Ant.* vii, 1, 4]), a concubine of king Saul, and mother of two of his sons, Armoni and Mephibosheth. B.C. cir. 1080. Like many others of the prominent female characters of the Old Test.—Ruth, Rahab, Jezebel, etc.—Rizpah would seem to have been a foreigner, a Hivite, descended from one of the ancient worthies of that nation, Ajah or Aiah, son of Zibeon, whose name and fame are preserved in the Ishmaelitic record of Gen. xxxvi. After the death of Saul and the occupation of the country west of the Jordan by the Philistines, Rizpah accompanied the other inmates of the royal family to their new residence at Mahanaim; and it is here that her name is first introduced to us as the subject of an accusation levelled at Abner by Ishbosheth (2 Sam. iii, 7)—a piece of spite which led first to Abner's death through Joab's treachery, and ultimately to the murder of Ishbosheth himself. The accusation, whether true or false—and from Abner's vehement denial we should naturally conclude that it was false—involved more than meets the ear of a modern and English reader; for among the Israelites it was considered "as a step to the throne to have connection with the widow or the mistress of the deceased king" (see Michaelis, *Laws of Moses*, art. 54). We hear nothing more of Rizpah till the tragic story which has made her one of the most familiar objects to young and old in the whole Bible (2 Sam. xxi, 8–11). Every one can appreciate the love and endurance with which the mother watched over the bodies of her two sons and her five relatives, to save them from an indignity peculiarly painful to the whole of the ancient world (see Psa. lxxix, 2; Homer, *Il.* i, 4, 5, etc.). But it is questionable whether the ordinary conception of the scene is accurate. The seven victims were not, as the A. V. implies, "hung;" they were crucified. The seven crosses were planted in the rock on the top of the sacred hill of Gibeah—the hill which, though not Saul's native place, was, through his long residence there, so identified with him as to retain his name to the latest existence of the Jewish nation (1 Sam. xi, 4, etc.; and see Josephus, *War*, v, 2, 1). The whole or part of this hill seems at the time of this occurrence to have been in some special manner dedicated to Jehovah, possibly the spot on which Ahiah the priest had deposited the ark when he took refuge in Gibeah during the Philistine war (1 Sam. xiv, 18). The victims were sacrificed at the beginning of barley-harvest—the sacred and festival time of the Passover—and in the full blaze of the summer sun they hung till the fall of the periodical rain in October. During the whole of that time Rizpah remained at the foot of the crosses on which the bodies of her sons were exposed—the *mater dolorosa*, if the expression may be allowed, of the ancient dispensation. She had no tent to shelter her from the scorching sun which beats on that open spot all day, or from the drenching dews at night, but she spread on the rocky floor the thick mourning garment of black sackcloth which as a widow she wore, and crouching there she watched that neither vulture nor jackal should molest the bodies.

Road occurs but once in the A. V. of the Bible, viz. in 1 Sam. xxvii, 10, where it is used in the sense of "raid" or "inroad," the Hebrew word (רָצַח) being elsewhere (e. g. ver. 8; xxxiii, 27; xxx, 1, 14, etc.) rendered "invade" and "invasion." A road in the sense which we now attach to the term is expressed in the A. V. by "way" and "path," for which the most general words in the original are דֶּרֶךְ, *odôc*.

In the East, where travelling is performed mostly on some beast of burden, certain tracks were at a very ear-

ly period customarily pursued; and that the rather as from remote ages commerce and travelling went on by means of caravans, under a certain discipline, and affording mutual protection in their passage from city to city and from land to land. Now, wherever such a band of men and animals had once passed they would form a track, which, especially in countries where it is easy for the traveller to miss his way, subsequent caravans or individuals would naturally follow; and the rather inasmuch as the original route was not taken arbitrarily, but because it led to the first cities in each particular district of country. Thus at a very early period were there marked out on the surface of the globe lines of intercommunication running from land to land, and in some sort binding distant nations together. These, in the earliest times, lay in the direction of east and west, that being the line on which the trade and the civilization of the earth first ran. The purposes of war seem, however, to have furnished the first inducement to the formation of made, or artificial, roads. War, we know, afforded to the Romans the motive under which they formed their roads; and doubtless they formed them not only to facilitate conquest but also to insure the holding of the lands they had subdued; and the remains of their roads show us with what skill they laid out a country and formed lines of communication.

From the nature of the soil in the Holy Land, the roads must have been sometimes mountainous and rocky, sometimes level and sandy. The former were the most difficult, and in the rainy season the torrents made them dangerous (Schulz, *Leitung*, v, 350). Yet they had a firmness which was important, since little was known of road-making in the East. (The ancient Indians [*Hindûs*] must be excepted, according to the accounts of trustworthy historians; see Strabo, xv, 689, and the remains of ancient artificial roads which are still extant [see Von Bohlen, *Indien*, ii, 199 sq.]. The Persians may have learned the art from India.) In Deut. xix, 3 (comp. Mishna, *Maccoth*, ii, 5) it seems that the minds of the Israelites were early familiarized with the idea, "Thou shalt prepare thee a way . . . that every slayer may flee thither;" and other passages, when taken in connection with it, seem to prove that to some extent artificial roads were known to the Hebrews in the commencement of their commonwealth. In Isa. xl, 3 are these words: "Prepare ye the way of the Lord, make straight in the desert a highway for our God. Every valley shall be exalted, and every mountain and hill shall be made low; and the crooked shall be made straight, and the rough places plain." Nor is the imagery unusual (comp. Isa. xi, 16; xix, 23; xxxiii, 8; xxxv, 8; xlix, 11; lxii, 10). In 1 Sam. vi, 12 we read: "The king went along the highway, lowering as they went, and turned not aside to the right hand or to the left." In Numbers also (xx, 17): "We will go by the king's highway," etc. (xxi, 22; Deut. ii, 27; Lev. xxvi, 22). Indeed, it is highly probable that the Hebrews had become acquainted with roads during their sojourn in Egypt, where, in the Delta especially, the nature of the country would require roads and highways to be thrown up and maintained. Josephus (*Ant.* viii, 7, 4) expressly says, "Solomon did not neglect the care of the ways, but he laid a causeway of black stone (basalt) along the roads that led to Jerusalem, both to render them easy for travellers and to manifest the grandeur of his riches." (See the Mishna, *Maccoth*.) To the Romans, however, Palestine was greatly indebted for its roads. On this subject Reland (*Palæstina*) has supplied useful information. In the East generally, and in Palestine in particular, the Romans formed roads and set up mile-stones in imitation of what they had done in Italy. Eusebius, in his *Onomasticon*, frequently alludes to their existence in Palestine. To the present day traces of these roads and fragments of the mile-stones remain.

1. The first road in Palestine which we mention ran

from Ptolemais, on the coast of the Mediterranean, to Damascus. This road remains to the present day. Beginning at Ptolemais (Acco), it ran eastward to Nazareth, and, continuing south and east, passed the plain of Esdraelon on the north; after which, turning north and east, it came to Tiberias, where, running along the Sea of Galilee, it reached Capernaum, and, having passed the Jordan somewhat above the last place, it went over a spur of the Anti-Libanus (Jebel Heish), and, keeping straight forward east by north, came to Damascus. This road was used for the purposes both of trade and war. In the history of the Crusades it bears the name of Via Maris. It connected Europe with the interior of Asia. Troops coming from Asia over the Euphrates passed along this way into the heart of Palestine. Under the Romans it was a productive source of income. It was on this road, not far from Capernaum, that Jesus saw Matthew sitting "at the receipt of custom" and gave him his call to the apostleship. (See, in general, Ritter, *Erdkunde*, ii, 379 sq.)

2. Another road passed along the Mediterranean coast southward into Egypt. Beginning at Ptolemais, it ran first to Cæsarea, thence to Diospolis, and so on through Ascalon and Gaza down into Egypt. (Comp. Josephus, *War*, iv, 11, 5; *Ant.* xiv, 8, 1; Pliny, vi, 33; Arrian, *Alex.* iii, 1. See Appian, *Civ.* v, 52. The stations are given as above, rather differently from Josephus, in Antonin. *Itiner.* p. 149.) This was also an important line of communication, passing, as it did through cities of great importance, running along the coast and extending to Egypt. A glance at the map will show how important it was for trade by land and by sea as well as for the passage of troops. A branch of this road connected the sea with the metropolis, leading from the same Cæsarea through Diospolis to Jerusalem. Down this branch Paul was sent on his way to Felix (*Acts* xxiii, 23, 26; comp. Josephus, *War*, iv, 8, 1; Jerome, *Ep.* 106). The band went through Antipatris, and thence on to Cæsarea.

3. A third line of road connected Galilee with Judæa, running through the intervening Samaria (Luke xvii, 11; John iv, 4; Josephus, *Ant.* xx, 6, 1; *Life*, § 52). The journey took three days. Passing along the plain of Esdraelon, the traveller entered Samaria at Ginnæ (Jenin) and was thence conducted to Samaria (Sebaste), thence to Shechem (Nablûs), whence a good day's travel brought him to Jerusalem. This last part of the journey (comp. Isa. x, 28 sq.) has been described by Maundrell (*Journey*, p. 85 sq.).

In the time of the Romans there was also a road from Jerusalem to the lake Gennesareth through Shechem and Scythopolis. The same road sent a branch off at Scythopolis in a westerly direction through Esdraelon to Cæsarea; and another branch across the Jordan to Gadara, on to Damascus, along which line of country there still lies a road, southward of the Sea of Galilee, to the same celebrated city (see Reland, *Palæst.* p. 416; *Itin. Hieros.* p. 585 sq.; also Antonin. *Itiner.* p. 198). This road was even traversed by armies (Josephus, *Ant.* xiv, 3, 4).

4. There were three chief roads running from Jerusalem. One passed in a north-easterly direction over the Mount of Olives, by Bethany, through openings in hills and winding ways on to Jericho (*Matt.* xx, 29; *xxi*, 1; *Luke* x, 30 sq.; *xix*, 1, 28 sq.; comp. Russegger, *Reis.* iii, 102 sq.), near which the Jordan was passed when travellers took their way to the north if they wished to pass through Peræa, which was the road the Galilean Jews, in coming to and returning from the festivals in the capital, were accustomed to take, thus avoiding the unfriendly territory of Samaria; or travellers turned their faces towards the south if they intended to go towards the Dead Sea. This road was followed by the Israelites when they directed their steps towards Canaan. Through Peræa the Syrian and Assyrian armies made their hostile advances on Israel (2 Kings viii, 28; *ix*, 14; *x*, 32 sq.; 1 Chron. v, 26).

A second road led from Jerusalem southward to Hebron, between mountains, through pleasant valleys (Russegger, *Reis.* iii, 78), whence travellers went through the wilderness of Judæa to Aila, as the remains of a Roman road still show; or they might take a westerly direction on to Gaza, a way which is still pursued and is of two days' duration (Crome, *Paläst.* i, 97 sq.). The ordinary way from Jerusalem to Gaza appears, in the Roman period, to have lain through Eleutheropolis and Ascalon. From Gaza through Rhinocorura and Pelusium was the nearest road down into Egypt from Jerusalem (Josephus, *Ant.* xiv, 14, 2). Along this road many thousand prisoners, made by Vespasian in his capture of Jerusalem, were sent to Alexandria in order to be shipped for Rome. Of these two roads from Jerusalem to Gaza one went westward by Ramleh and Ascalon, the other southward by Hebron. This last road Raumer (*Paläst.* p. 191; see also his *Beiträge*, published after Robinson's work on Palestine—namely, in 1843—correcting or confirming the views given in his *Palästina*, 1838) is of opinion was that which was taken by Philip (*Acts* viii, 26 sq.), partly because tradition states that the eunuch was baptized in the vicinity of Hebron, and this road from Jerusalem to Hebron runs through the "desert" Thekoa (Thecua) in the *Onomasticon*. And here he finds the reason of the angel's command to go "towards the south"—for Hebron lay south of Jerusalem—whereas but for this direction Philip might have gone westward by Ramleh. Robinson, admitting that there is a road from Jerusalem to Hebron, maintains (i, 320; ii, 640) that Philip went by a third road, which led down Wady Musurr to Betogabra (Eleutheropolis), and thinks that he has found at Tell el-Hasy the spot where the eunuch received baptism. But, says Raumer (*Beiträge*, p. 41), this road ran in a south-westerly direction, and Philip was commanded to go towards the south, for which purpose he must have gone by Hebron. Raumer then proceeds to confirm his original position. Jerome, in his *Life of Paula*, testifies that a road from Jerusalem to Gaza went through Hebron. Paula travelled from Jerusalem to Bethlehem, which lay south of the city: "When she reached Bethlehem, she quickened the pace of her horse and took the old road which leads to Gaza." This road conducted to Bethsur (a little north of Hebron), "where," says Jerome, "while he read the Scriptures, the eunuch found the Gospel fountain." "This," adds Raumer, "is the same Bethsur of which Jerome, in the *Onomasticon*, says, 'As you go from Elia to Hebron, at the twentieth mile-stone, you meet Bethsur, near which, at the foot of a mountain, is a fountain bubbling out of the soil. The Acts of the Apostles state that the chamberlain of queen Candace was baptized in it by Philip.' From Bethsur Paula proceeded to Hebron. The *Itinerarium Hierosolymitanum* (of the year 333) mentions Bethsur as the place where the baptism was performed." Raumer concludes by remarking: "Robinson rightly rejects tradition when it contradicts the Sacred Scriptures, but he must also reject those pretended scientific theories which contradict Holy Writ. Such hypotheses may easily become the groundwork of scientific legends. To fix the baptismal place of the chamberlain at Tell el-Hasy contradicts the Scripture; but Bethsur, which has from the earliest ages been so accounted, agrees with the passage in the Acts of the Apostles."

There only remains for us to mention what Winer reckons the third of the three great roads which ran from Jerusalem; this third road went to the Mediterranean at Joppa (Jaffa), a way which, from the time of the Crusades, has been taken by pilgrims proceeding to the holy city from Egypt and from Europe. Its principal station, Ramleh, seems to have been founded by the Saracens. See De Wette, *Archäologie*; Scholz, *Archäologie*; Heeren, *Ideen*, i, 740; Ritter, *Erdkunde*; Crome, *Palästina*, i, 8; Burckhardt, *Syria*, ii, 547; Rossmüller, *Alteth.* II, ii, 338; Raumer, *Beiträge*, p. 30 sq.; also the articles GEOGRAPHY; PALESTINE.

Roan, JOHN, a Presbyterian minister, was born in Ireland about 1716, and was brought up a weaver. He came to the United States in his youth, studied at the New College, and was licensed to preach by the "New Side" Presbytery of Newcastle. As early as 1741 he taught in a grammar-school on the Neshaminy, and in 1744 was sent by his presbytery on a missionary tour in Virginia. He inveighed so strongly against the clergy of the Established Church that charges were brought against him, before the grand jury, of proselytism and of blasphemy. Mr. Roan returned to Pennsylvania before the court met; but when the trial came on, Oct. 19, the indictment was dropped. In 1745 Mr. Roan was settled over the united congregations of Paxton, Derry, and Mountjoy, and continued to labor among them until his death, Oct. 3, 1775. See Sprague, *Annals of the Amer. Pulpit*, iii, 129.

Roast. The oldest, and still the usual, form of dressing meat in the East is by roasting it (Jahn, I, ii, 193 sq.); boiling is a process which marks some antecedent progress in civilization, and many nations are ignorant of it at the present day. The culinary preparations of the patriarchs were the most simple that could well be imagined: the animal was killed at the moment that the flesh was required, and the joints, after some part had been selected for sacrifice, were then roasted or broiled over the glowing embers of a wood-fire. Roasting is mentioned but casually in the Bible, and is called in Heb. *tsalah'*, צָלָה (1 Sam. ii, 15; Isa. xlv, 16). A roast is called *tsali'*, צָלִי (Exod. xii, 8 sq.; Isa. loc. cit. Comp. Arvieux, *Voyage*, iii, 233). See Cook.

Rob. I. The following are the Heb. and Gr. words rendered by this and its derivatives in the A. V.:

1. *Rob.*: (1) רוּבֵּן (Sept. διαρπάζω; Vulg. depopulor); (2) אָפָרַטְו (ἀφαιρῶ; violenter aufero); (3) שׁוּבֵר, "return," "repeat;" hence in Pi. to surround, circumvent (Psa. cxix, 61; περιπλάκηναι; circumplecti), usually affirm, reiterate assertions (Ges. *Thesaur.* p. 997); (4) כִּבֵּשׁ, "cover," "hide" (περιερίτω; affigo [Ges. *Thesaur.* p. 1190]); (5) שָׁפָה (διαρπάζω; diripio); (6) שָׁפָס, same as last (προνομέω; deprædor); (7) מַבְרַח (κλέπτω; furor; A. V. "steal"); (8) שָׁלָא, to strip. See STEALING.

2. *Robber*: (1) מַבְרִיחַ, part. of מַבְרִיחַ, "rob" (προνομέων; vastans); (2) שֹׁרֵץ, part. of שָׁרַץ, "break" (λοιμός; latro); Mic. ii, 13, "breaker;" (3) מַבְרִיחַ, Job xviii, 9 (διψώντες; sitis. Targum, with A. V., has "robbers;" but it is most commonly rendered as Sept. Job v, 5, sitientes); (4) שָׁדֵר (λῃστής; latro), from שָׁדַר, "waste;" (5) שָׁדָה (ἐχθρός; deripiens; A. V. "spoiler"); (6) מַבְרִיחַ (κλέπτει; fur; A. V. "thief"); (7) λῃστής. See THIEF.

3. *Robbery*: (1) גָּזֵל (ἀρπαγή, ἀρπάγματα; rapinæ); (2) שִׁבְרָה, from שָׁרַץ, "break" (ἀδικία; dilaceratio); (3) שָׁדַר, from שָׁדַר, "waste" (ὀλεθρος; rapinæ); (4) שָׁלַל (προνομή; præda; A. V. "prey," "spoil;" (5) ἀρπαγμός. See THEFT.

II. Whether in the larger sense of plunder or the more limited sense of theft systematically organized, robbery has ever been one of the principal employments of the nomad tribes of the East. From the time of Ishmael to the present day, the Bedouin has been a "wild man" and a robber by trade; and to carry out his objects successfully, so far from being esteemed disgraceful, is regarded as in the highest degree creditable (Gen. xvi, 12; Burckhardt, *Notes on Bed.* i, 137, 157). An instance of an enterprise of a truly Bedouin character, but distinguished by the exceptional features belonging to its principal actor, is seen in the night foray of David (1 Sam. xxvi, 6-12), with which, also, we may fairly compare Homer, *Il.* K. 204, etc. Predatory inroads on a large scale are seen in the incursions of the Sabæans and Chaldæans on the property of Job (Job i, 15, 17), the re-

Arab Robbers.

venge coupled with plunder of Simeon and Levi (Gen. xxxiv, 28, 29), the reprisals of the Hebrews upon the Midianites (Numb. xxxi, 32-54), and the frequent and often prolonged invasions of "spoilers" upon the Israelites, together with their reprisals, during the period of the Judges and Kings (Judg. ii, 14; vi, 3, 4; 1 Sam. xi, xv; 2 Sam. viii, x; 2 Kings v, 2; 1 Chron. v, 10, 18-22). Individual instances, indicating an unsettled state of the country during the same period, are seen in the "liers-in-wait" of the men of Shechem (Judg. ix, 25), and the mountain retreats of David in the cave of Adullam, the hill of Hachilah, and the wilderness of Maon, and his abode in Ziklag invaded and plundered in like manner by the Amalekites (1 Sam. xxii, 1, 2; xxiii, 19-25; xxvi, 1; xxvii, 6-10; xxx, 1). See WAIT, LIE-IN-.

Similar disorder in the country, complained of more than once by the prophets (Hos. iv, 2; vi, 9; Mic. ii, 8), continued more or less through Maccabean down to Roman times, favored by the corrupt administration of some of the Roman governors in accepting money in redemption of punishment, produced those formidable bands of robbers so easily collected and with so much difficulty subdued who found shelter in the caves of Palestine and Syria, and who infested the country, even in the time of our Lord, almost to the very gates of Jerusalem (Luke x, 80; Acts v, 36, 37; xxi, 38). See BARABBAS; CAVE; JUDAS OF GALILEE. In the later history, also, of the country the robbers, or *sicarii*, together with their leader, John of Gischala, played a conspicuous part (Josephus, *War*, iv, 2, 3, 4; 7, 2). In Asia Minor, likewise, the native tribes gave the Roman government much trouble, so that the roads were often unsafe for travellers (2 Cor. xi, 26). See SPOIL.

ROBBER OF CHURCHES (ἱερόσυλος, Acts xix, 37). Sacrilege took many forms in antiquity (1 Macc. vi). The plundering of heathen temples was indirectly forbidden to the Jews (Deut. vii, 25; Josephus, *Ant.* iv, 8, 10). The Roman law held it as a sacrilege to be punished by forfeiture of goods, to steal the holy books of the Jews or their money out of places of worship (*ibid.* xvi, 6, 2). See SACRILEGE.

Robber Council of Ephesus. See EPHEBUS, ROBBER COUNCIL OF.

Robbia, Andrea della, an Italian sculptor and nephew of Luca, was born at Florence in 1444, and died in 1527. He worked both in marble and terracotta, and his productions may be found in many Italian cities. There are three in the Louvre, *The Virgin Adoring the Infant Jesus*, a head of *St. Ann*, and *Christ Healing a Sick Man*.

Robbia, Luca della, an Italian sculptor, was born at Florence in 1388. His first instructor was a goldsmith named Leonardo, from whom he learned to model in wax; but as soon as he had gained some proficiency, he gave himself wholly to sculpture. So great was his progress that at the age of fifteen he was employed to design the bas-reliefs for a tomb at Rimini. Similar work at Florence occupied him for several years, but he

found that the compensation he received was in no way adequate, as the works required great skill and much time. He therefore turned his attention to working in terra-cotta. He invented a peculiar enamel, composed of tin, antimony, and other minerals, by which, after baking, this material was rendered more durable. He afterwards found that his bas-reliefs could be colored, and this improvement rendered him famous throughout Europe. The demand for his work was universal, and to supply it, Luca employed his brothers to aid him. Their subjects in bas-reliefs, plaques, and other forms were principally religious, as, an *Annunciation*, in the Academy of Fine Arts at Florence, and a very beautiful medallion in the Louvre, *The Virgin Adoring the Infant Jesus*. He also decorated many churches and tombs. Robbia died at Florence in 1493. See Vasari, Baldinucci, and Barbet di Jouy [H.], *Della Robbia*, etc.

Robbin, ALVIN, a minister of the Methodist Episcopal Church, was born in Coeyman's, N. Y., July 5, 1816. He was converted at a camp-meeting in New Baltimore, N. Y., in 1832, and in 1841 was received on trial in the Black River Conference, within the bounds of which he labored for ten years. In 1851 he was transferred to the Troy Conference, received a supernumerary relation in 1870, and made his home in Osseo, Mich., where he died, April 10, 1874. See *Minutes of Annual Conferences*, 1874, p. 66.

Robbins, Ammi Ruhamah, a Congregational minister, was born at Branford, Conn., in September, 1740. He was fitted for college by his father, and was first entered at Nassau Hall, but was transferred to Yale at the beginning of his sophomore year. He graduated in 1760, and spent some time in teaching at Plymouth, Mass., and then engaged in the study of theology under Dr. Bellamy; was licensed by the Litchfield Association, and ordained at Norfolk, Oct. 28, 1761. When the Revolution came on, he enlisted as a chaplain, joining general Schuyler's brigade (March, 1776), and went to Canada, whence he returned in ill-health after an absence of nearly half a year. He continued laboring in his Church with great fidelity, at the same time fitting young men for college, until May, 1813, when a cancer began to develop, which rapidly carried him to the grave. He published *An Ordination Sermon* (1772):—*Election Sermon* (1789):—*A Half-Century Sermon* (1811). See Sprague, *Annals of the Amer. Pulpit*, i, 369.

Robbins, Chandler, D.D., a Congregational minister, was born at Branford, Conn., Aug. 24, 1738. He graduated at Yale College in 1756, studied under Dr. Bellamy, and was ordained Jan. 30, 1760, pastor at Plymouth, Mass., where he continued until his death, June 30, 1799. He was made D.D. by the University of Edinburgh in 1793. His publications were, *A Reply to John Cotton's Essays on Baptism* (1773):—*Some Brief Remarks on a Piece Published by John Cotton, Esq.* (1774):—*An Address at Plymouth to the Inhabitants Assembled to Celebrate the Victories of the French Republic over their Invaders* (1793), and a few occasional *Sermons*. See Sprague, *Annals of the Amer. Pulpit*, i, 573.

Robbins, Onesiphorus, a minister of the Methodist Episcopal Church, was born in Harvard, Mass., Aug. 19, 1792. He was converted in South Carolina at the age of twenty-six, was licensed to preach in 1825, and in 1826 was received into the New England Conference. In 1841 the Providence Conference was set off, and he became one of its members. He continued in active service until 1850, when he was returned superannuated, and so continued until his death, which took place in Woodstock, Conn., April 9, 1872. Mr. Robbins was a man of retiring habits and slow of speech—a clear and strong thinker, and excelling as a pastor. See *Minutes of Annual Conferences*, 1873, p. 39.

Robbins, Philemon, a Congregational minister, was a native of Charlestown, Mass. He was graduated

at Harvard College in 1729, and settled in Branford, Conn., Feb. 7, 1732. About 1740 the Legislature of Connecticut, with a view to arrest the progress of New-Lightism, passed a law forbidding any minister to preach within the limits of any other minister's parish. The people of Wallingford applied to Mr. Robbins to hold meetings for them. He consented, was arraigned by the Consociation, and formally deposed. The mass of his congregation adhered to him, and he continued to preach. There was some interference of the civil authority, but he pleaded his case so well before the Legislature that his penalty was remitted. He died Aug. 13, 1781. His publications are, *A Plain Narrative of the Proceedings of the Rev. Association and Consociation of New Haven*, etc. (1743):—*Ordination Sermons* (1760–61). See Sprague, *Annals of the Amer. Pulpit*, i, 367.

Robbins, Royal, a Congregational minister, was born at Wethersfield, Conn., in 1787, graduated at Yale College, and settled in the ministry at Kensington, a parish of Berlin, Conn., in 1816. He continued to hold this post until his death, in 1861. His works are, *The World Displayed; Outlines of Ancient and Modern History* (last ed. Hartford, 1851, 2 vols. in 1). He was also the author of *History of American Contributions to the English Language*, etc. (ibid. 1837, 12mo), besides several *Sermons* and articles for periodicals. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Robbins, Thomas, D.D., secretary and librarian to, and benefactor of, the Connecticut Historical Society, was a native of Norfolk, Conn. He graduated at Yale College in 1796, was minister at East Windsor, 1809–27, of Stratford, 1830–31, and subsequently at Mattapoisett and Rochester, Mass. He died in 1856. He published, *Historical View of the First Planters of New England* (Hartford, 1815, 12mo), also a number of *Sermons*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Robe (the rendering of several Heb. and Gr. words, but especially of מֵיֵל, *meil'*, σολή), a long garment with fringed or flowered borders, usually white, though sometimes purple, and worn by the great as a mark of distinction (Luke xv, 22; xx, 46). The ancient Assyrians and Babylonians were celebrated for their manufactures of beautiful garments of divers colors (Josh. vii, 21; Ezek. xxvii, 24). Their splendid robes appear to have been embroidered with figures of animals and flowers. According to Plutarch, Cato received as a legacy a Babylonian garment, and sold it because it was too costly for a citizen to wear. Some suppose that a sacred robe was preserved from early times, and handed down among the patriarchs as a badge of the birthright, and that "the goodly raiment" which Rebekah put upon Jacob was the birthright robe. This view is given in the Targum of Jonathan on Gen. xxvii, 15: "And Rebekah took the desirable robes of her elder son Esau, which had belonged to Adam the first parent." The coat of Joseph, the possession of which excited the envy of his brethren, is thus regarded, like the good raiment of Jacob, as a badge of the birthright, which, we are expressly taught, having been forfeited by Reuben, was transferred to Joseph (xxxvii, 8; 1 Chron. v, 1). The robe appears also to have been, among the Hebrews, a species of vestment appropriated to the sacerdotal office, the holy garment. It was made entirely of blue, woven throughout, and on which neither knife nor needle was to be used; on the lower border was a row of artificial pomegranates and golden bells, alternating with each other (Exod. xxviii, 2, 4, 31–33). The robes of Aaron symbolized the dignity and glory of our great high-priest, "the heir of the whole creation" (Rev. iii, 4, 5; vi, 9–11; vii, 9–14). See DRESS.

ROBE, ECCLESIASTICAL. See ROBES.

Robert (Abbé), a French historian, was born near Rheims, about 1055. He was educated in the Abbey of St. Remi at Rheims, and in 1095 became its abbot; but on account of a dispute with the abbot of Mannoutiers,

retired to the Priory of St. Oricle de Senuc, where he remained till he joined the Crusaders in 1096. On his return from Palestine, the Council of Poitiers (Nov. 23, 1100) declared his deposition from Rheims unjust and his life irreproachable; but he was not reinstated, and remained at Senuc. He was accused of maladministration, and Calixtus II deprived him of his office (April 16, 1121). He died at Senuc, Aug. 23, 1122. He left two works, entitled *Historia Hierosolymitana Libris VIII Explicata* (Cologne, 1470-74; Basle, 1533):—and *La Chronique et Histoire faite par le R. P. en Dieu Turpin*, etc. (Paris, 1527). See Rivet, *Hist. Littér. de la France; Gallia Christiana*.

Robert (St.), founder of the Order of Cîteaux, was born at Champagne in 1018. At the age of fifteen he entered the Convent of Moutier-la-Celle, near Troyes, of which he afterwards became prior. Later he was abbot of St. Michel de Tonnerre; and while prior of St. Ayrol de Provins, Alexander II ordered him to take charge of the hermits of Colan. Finding this solitude very unhealthful, Robert conducted the recluses to the desert of Molesne, where in 1075 he founded a convent in honor of the Virgin. The laxity of discipline and decline of piety, however, caused him to leave Molesne, with twenty companions, and establish himself at Cîteaux, near Dijon. In 1098 he erected a monastery, and was its first abbot. He was recalled to Molesne, and succeeded in reviving the spirit of asceticism. He died March 21, 1110. *Sermons, Letters*, and a *Chronicle of Cîteaux* are attributed to Robert. His festival is celebrated April 29.

Robert of Bavaria; of Deutz. See RUPERT.

Robert of Geneva, antipope against Urban VI and Boniface IX, was the son of count Amadeus of Geneva. He was chosen by the French cardinals, who asserted that the election in Rome at which Urban VI was successful had not been free, and he reigned at Avignon under the title of CLEMENT VII from Sept. 21, 1378, to Sept. 26, 1394. He was recognised by France, Naples, Castile, Aragon, Navarre, Scotland, Lorraine, and Cyprus, while the other nations of Europe preferred the claims of Urban. This schism in the Church gave rise to serious complications in the intercourse of nations. The popes anathematized each other, and Urban especially caused a crusade against France and his rival to be preached in England, and had the death-penalty inflicted on a number of the cardinals who had conspired to dethrone him. The election of Boniface IX in 1389 protracted the schism in all its bitterness, until the Sorbonne decided that both popes ought to resign, and that a compromise should be effected by means of arbitrators or a council of the Church. Clement was so affected by this decision that he died of apoplexy (Sept. 26, 1394). The peace desired was not, however, finally reached until 1428.

Robert of Gloucester, an English chronicler, lived in the latter half of the 13th century. He was a monk in the Abbey of Gloucester, and does not appear to have lived long after 1265. He composed a rhymed chronicle of more than ten thousand verses, written in Anglo-Saxon, containing the history of England from the time of the Romans till Edward I. It is a philosophical curiosity, but is full of the most absurd fables. It was published entire by Hearne (Oxford, 1724, 2 vols.), and reprinted in 1810.

Robert of Lincoln. See GROSSETESTE.

Robert of Melun, an English theologian, was probably born in the latter part of the 11th century. But little is known of his life. Du Boulay supposes that he taught for some time in Paris, and then went to Melun to pursue the same vocation. At any rate, one of his pupils—John of Salisbury—reports that he taught

physics in the former city, and afterwards devoted himself to theology. He died Feb. 28, 1167. His principal treatise is entitled *Summa Theologie*, fragments only of which have been published. It contains very valuable matter on the origin of scholastic theology. One other work is attributed to Robert, *Questiones de Epistolis Pauli*. See *Hist. Littér. de la France*; Du Boulay, *Hist. Univers. Par.*

Robert LE POULE, or ROBERTUS PALLUS, chancellor of the Church of Rome, flourished about 1150. He was perhaps archdeacon of Rochester, and certainly a distinguished lecturer on the Scriptures at Oxford. He was the author of *Senteniarum*, or *Libri Sententiarum*, or *Senteniarum de Trinitate* (in MS. in the British Museum):—twenty *Sermons*:—probably a treatise *Super Doctorum Dictis*:—and two or three other works (late edition by Hugo Mathout, Paris, 1655, fol.). See Allibone, *Dict. of Brit. and Amer. Auth.* s. v.

Robert, Christopher R., an eminent Presbyterian layman, was born in 1801, near Moriches, L. I. He was engaged for the greater part of his life in mercantile pursuits, but early took a warm and active interest in the religious and philanthropic enterprises which have marked the present century. He contributed largely in organizing and supporting several of the churches in New York city. He founded the German Presbyterian Church in Rivington Street, and sustained its pastoral work for many years at an annual expense of \$2000. Taking a deep interest in the education of young men for the ministry, he assumed for many years the entire expense of a number of students at Auburn and other theological seminaries. While on a visit to Illinois in 1829, which at that time was one of the extreme Western states, he became deeply impressed with the importance of home missionary work in those regions, and became a large contributor to the funds of the Home Missionary Society, of which he was treasurer for a number of years, conducting all its financial business without fee or reward. Near the close of our late civil war he visited Tennessee, and with his own funds purchased a tract of land on Lookout Mountain, and established a college for the education of young men for the ministry in the South, having special reference to the wants of the colored race. In 1864 Mr. Robert made an extensive tour in the East, and while at Constantinople was so deeply impressed with the educational wants of the Turkish empire that he resolved on founding a college at that place. To this end he took into his counsel that eminent missionary the Rev. Cyrus Hamlin, D.D., then a resident of Constantinople, whom he appointed president of the college, and to whom he intrusted the great work of laying its foundations. For years the Turkish government, true to its narrow-minded and bigoted policy, placed every obstacle in the way of the enterprise, refusing to give its sanction to the purchase of a site for the buildings. Dr. Hamlin, not to be daunted, pressed his way through all the difficulties, finally purchased the ground, erected the buildings, and placed the enterprise on a firm foundation at a cost to Mr. Robert of \$200,000. Contrary to his desire and expressed wishes, the college was called after his name. During the recent war in the empire, the revenue of the college having been diminished, Mr. Robert supplied the deficiency, amounting to \$25,000 a year, from his own resources. Largely as Mr. Robert's efforts were put forth in building up the cause of Christ, they did not consist merely of munificent contributions of money, but from the time of his conversion he was personally engaged in every good work, actively and earnestly seeking to promote the spirituality of the Church and the conversion of his fellow-men. Being deeply affected with the worldliness and want of spirituality witnessed among professors of religion, he prepared with his own hand a letter to Christians on the subject, and had it published in pamphlet form and circulated by the thousand. Early in June, 1878, he left his home to seek the re-

newal of his health in one of the valleys of Switzerland, whose sanitary climate he had before enjoyed. He was returning much improved, but only lived to reach Paris, where he died Oct. 27 of the same year. The will of Mr. Robert provides that at the death of his wife a large part of his property shall inure to the benefit of the college at Constantinople. (W. P. S.)

Robert, Claude, a French ecclesiastical writer, was born at Chesley in 1564 or 1565. He studied at the College of Paris, and became preceptor of the son of Bénigne Fremyot. After the education of his pupil was completed and he was made bishop of Bourges, Robert continued to aid him in the administration of his diocese. He filled the same office under the bishop of Chalons-sur-Saône. This prelate rewarded his preceptor by making him archdeacon and his grand vicar. He died at Chalons-sur-Saône, May 16, 1637. He left, besides three Latin treatises, the *Gallia Christiana* (Paris, 1626), with a geographical chart. This work, the result of thirty years' labor, is an ecclesiastical history of all the dioceses of France from their origin to the 17th century. The documents which he had collected for a second edition were given into the hands of Scévole and Louis de Sainte-Marthe, and the book was published with many additions in 1656. A third edition was undertaken by the Benedictines of Saint-Maur in 1715, and remained unfinished at the thirteenth volume. It was continued in 1856 by M. B. Hauréau. See *Gallia Christiana*; Perry, *Hist. de Chalons-sur-Saône*; Socard, *Notice Hist. sur Claude Robert*; Fouqué, *Du Gallia Christiana et de ses Auteurs*.

Roberti, JOHN, a learned and laborious Jesuit, was born at Hubert, in the Ardennes, in the year 1569. He studied at Liege and Cologne, and became professor of theology at Douay and other colleges, gaining a great reputation. He died at Namur in the year 1651. His published work is entitled *Mystice Ezechielis Quadriga, id est, IV Evangelia Historicarum et Temporum serie Vinculata* (Greek and Latin, Mogunt. 1615).

Robertines, an English order of eremites, founded by Robert of Knaresborough about 1169.

Roberts, Charles Dillard, a Presbyterian minister, was born at Danville, Va., Feb. 15, 1838. He pursued his studies at Louisville, Va., and subsequently, under the Rev. James H. Leps, at Parkersburg, Va., where, at the age of eighteen, he united with the Church. Soon thereafter he entered Princeton College, and, after graduation, entered the Theological Seminary in 1862, whence he graduated after a three years' course. He was licensed by the Presbytery of Elizabethtown, N. J., Jan. 10, 1865, and in April following was ordained at Rahway by the same presbytery as an evangelist for Western Virginia. He labored about a year and a half at Grafton, in that state, in connection with the Board of Domestic Missions. After serving a Church at Ridley, near Philadelphia, Mr. Roberts went to Plattsmouth, Neb., where he joined the Presbytery of Missouri, and labored as a stated supply until 1869. Thence he went to Smartville, Yuba Co., Cal., and became a member of the Presbytery of Stockton, which, after the reunion, was merged in that of Sacramento. After preaching a year or two at Smartville, he became a stated supply at Elko, Nev., where he remained until his death, which occurred at the former place Oct. 12, 1875. He was held in high esteem by all who knew him as an earnest, laborious, self-denying missionary in the frontier fields of the Church. (W. P. S.)

Roberts, David, a British artist, was born at Stockbridge, near Edinburgh, Oct. 24, 1796. He was apprenticed as a house-painter in his native place, but, going to London in 1822, he found employment as a scene-painter for Drury Lane Theatre. In 1832-33 he went to Spain, and in 1838-9 made a tour through

Syria, Egypt, and other Eastern countries. In 1841 he was elected a member of the Royal Academy. Mr. Roberts died in London, Nov. 25, 1864. Among his paintings are, *Ruins of the Great Temple of Karnak*;—*Jerusalem from the Mount of Olives*;—*Interior of the Cathedral at Burgos*;—*Chancel of the Collegiate Church of St. Paul, Antwerp*. Among his books, the following are the principal: *Picturesque Views in Spain and Morocco* (Lond. 1835-38);—*The Holy Land, Egypt, Nubia, Arabia, &c.* (1842-48, 4 vols. fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; *Appletons' Cyclop.* s. v.

Roberts, Francis, a Puritan divine, the son of Henry Roberts, of Aslake, Yorkshire, was born in that county in 1609. He entered a student of Trinity College, Oxford, in 1625, completing his studies and being ordained in 1632. On the breaking-out of the Rebellion he went to London, took the covenant, and was appointed minister of St. Augustine's, Watling Street, in room of Ephraim Udal, ejected for his loyalty. In 1649 he was presented to the rectory of Wrington, Somersetshire, by lord Capel. At the Restoration he conformed, and in 1672 went to Ireland as chaplain to lord Capel, and while there received the degree of D.D. He died at Wrington in 1675. His principal work is *Clavis Bibliorum* (Lond. and Edinb. 1649, 2 vols. 8vo; 4th ed. 1675, fol.);—also, *Synopsis of Theology* (1644, fol.);—*Believer's Evidence for Eternal Life* (1649, 1655, 8vo);—*Communicant Instructed* (1651, 8vo). See Chalmers, *Biog. Dict.*; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Roberts, John L., a minister of the Methodist Episcopal Church, was born at Strafford, Vt., March 18, 1818. He was converted and united with the Church in 1845, joining the Vermont Conference in 1849. In this conference he continued to labor until October, 1862, when he became chaplain of the Fourth Regiment Vermont Volunteers. In 1866 he took a supernumerary relation to the Troy Conference, and took up his residence in Washington, D. C., filling several important government offices. He died at Ocean Grove, N. J., June 24, 1873. See *Minutes of Annual Conferences*, 1874, p. 70.

Roberts, John Wright, missionary bishop of the Methodist Episcopal Church for Africa, was born of colored parents at Petersburg, Va., and was converted and joined the Church while in the United States. He early emigrated to Liberia, where he was admitted among the missionaries. The Liberia Conference elected him to elder's orders in 1841, and in the same year he came to the United States and was ordained. In 1866 he was elected to the office of missionary bishop, and was ordained in St. Paul's Methodist Episcopal Church, New York, June 20, 1866. He left for Liberia June 25. From that time on he labored faithfully for the edification and enlargement of the Church in the republic of Liberia and the adjacent territory. He died Jan. 30, 1875. Bishop Roberts was endowed with excellent mental gifts, which, under the circumstances of his early condition, were exceedingly well trained. He was a gentleman by nature and culture, a Christian in faith and life. See Simpson, *Cyclop. of Methodism*, s. v.

Roberts, Joseph, a missionary to India, who went out to that country in 1818, under the patronage of the Wesleyan Missionary Society. After nearly fourteen years' residence among the Hindûs, he returned to England, and gave to the public *Oriental Illustrations of the Sacred Scriptures, collected from the Customs, Manners, Rites, Superstitions, &c., of the Hindûs*, and noted on the spot by himself (Lond. 1835, 1844, 8vo). The work was published under the patronage of the Royal Asiatic Society of Great Britain and Ireland, of which the author was a corresponding member. His *Illustrations* are arranged in the order of the books, chapters, and verses of the Bible, and contain satisfac-

tory explanations of many doubtful or obscure passages. See most of these in Bush's *Scripture Illustrations*.

Roberts, Palmer, a minister of the Methodist Episcopal Church, was born March 15, 1780, and was converted in September, 1804. He commenced travelling under the presiding elder in 1810, and joined the East Genesee Conference in 1811. He located in 1834, but was readmitted to conference in 1837. In 1839 he was supernumerary, and since about that time was superannuated until his death, at Seneca Falls, N. Y., April 19, 1858. See *Minutes of Annual Conferences*, 1858, p. 207.

Roberts, Peter, a clergyman of the Church of England, was a native of North Wales, and was educated at Trinity College, Dublin. On entering into orders he became rector of Halkin, Flintshire, where he died in 1819. Among his works are, *Observations on Christian Morality* (Lond. 1796, 8vo):—*Christianity Vindicated against Volney* (ibid. 1800, 8vo):—*Harmony of the Epistles* (ibid. 1800, 4to):—*Manual of Prophecy* (ibid. 1818, 8vo):—*Review of the Policy, etc., of the Church of Rome* (ibid. 1809, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Roberts, Robert, a minister of the Methodist Episcopal Church, was born in Lincolnshire, England, in 1832. He experienced religion at the age of fifteen years, and at eighteen became a local preacher, and four months after a travelling preacher, among the Primitive Methodists. He travelled four years until received into full connection, and then came to the United States. He was received into the New York East Conference as a probationer in 1856. His last appointment was Cook Street, Brooklyn, in which he died, January, 1865, after an illness of two weeks. See *Minutes of Annual Conferences*, 1865, p. 82.

Roberts, Robert Richford, bishop of the Methodist Episcopal Church, was born in Frederick County, Md., Aug. 2, 1778. He removed while a child to Ligonier Valley, Pa., and was converted when he was about fifteen years old. He was admitted on trial in the Baltimore Conference in 1802, and was ordained deacon in 1804. He was soon placed in charge of important stations in Baltimore, Alexandria, Georgetown, and Philadelphia. In 1815 he was appointed presiding elder of Schuylkill district, embracing the city of Philadelphia; and owing to the death of bishop Asbury, he was elected to preside over the Philadelphia Conference in the spring of 1816. At the following session of the General Conference (May, 1816) he was elected to the office of bishop, being the first married man in America who filled that position. He made his first residence in Chenango (now Mercer) County, Pa., but in 1819 settled in Lawrence County, Ind. The record of his last year's service will serve to give an idea of the extent of his labors while bishop. In that year he preached in six different states and among four Indian tribes in the West, presided at four annual conferences, and travelled nearly 5500 miles. In the spring of 1843 his disease, the asthma, greatly increased upon him, and he died March 26. His body was buried on his own farm, but in January, 1844, in pursuance of a resolution of the Indiana Conference, it was removed to Green Castle. Bishop Morris writes of him: "He possessed by nature the elements of an orator—an imposing person, a clear and logical mind, a ready utterance, a full-toned, melodious voice. . . . He was always patient and pleasant; above all, unpretending." See Simpson, *Cyclop. of Methodism*, s. v.; Sprague, *Annals of the Amer. Pulpit*, vii, 387.

Roberts, Thomas W., a Presbyterian minister, was born in Montgomeryshire, North Wales, Oct. 10, 1830. His early education was good, and his parents emigrating to the United States, he graduated at the Theological Seminary at Auburn, N. Y., and was licensed and ordained at New York Mills Nov. 14, 1856. He ex-

ercised his gifts as a minister among the Welsh Congregationalists until 1860, when he joined the Cayuga Presbytery, with a view of laboring within the bounds of that presbytery; and it was while travelling in behalf of his mission that he was injured on the New York and Erie Railroad, and died soon after (Sept. 26, 1860). Mr. Roberts was a humble, unassuming man, and a devoted, energetic minister of the Gospel. See Wilson *Presb. Hist. Almanac*, 1862, p. 191. (J. L. S.)

Roberts, William Hayward, D.D., a clergyman of the Church of England, was born in 1745, and educated at Eton and King's College, Cambridge. He was for some time undermaster at Eton, became provost of King's College in 1781, chaplain to the king, and rector of Farnham Royal, Bucks, and died in 1791. His works are, *Poetical Essay* (Lond. 1771, 4to):—*Judah Restored*, a poem in six books (ibid. 1774, 2 vols. 8vo):—besides other *Poems*, *Sermons*, etc. See Allibone, *Dict. of Brit. and Amer. Auth.* s. v.

Robertson, Frederick William, an English clergyman, was born in London, Feb. 3, 1816. At the age of nine he was sent to a grammar-school in Beverley, Yorkshire, where he remained a few years, and then accompanied his parents to the Continent. In 1832 he entered the Edinburgh Academy, and the next year proceeded to the Edinburgh University. He was originally designed for the bar, but the study of law did not please him, and he would gladly have been a soldier. Certain difficulties intervening in the way of obtaining a commission, Mr. Robertson entered Brasenose College, Oxford (1836), to study for the Church. The purity of his life and the depth of his religious feeling prepared him to enter upon this new career without regret. His first appointment was to the curacy of St. Maurice and St. Mary Calendar; but his health failed in the course of a year, and he was compelled to visit the Continent. On his return to England, he was for a time curate to the incumbent of Christ Church, Cheltenham. In the beginning of 1847 he removed to St. Ebbes, Oxford, and was just attracting the notice of the undergraduates, when he was offered the incumbency of Trinity Chapel, Brighton. Here his eloquence and originality always attracted large and intellectual audiences. He was accused of not being very orthodox in his belief and teaching. This is supposed to have hastened his death, which took place Aug. 15, 1853. He was the author of *Lectures and Addresses on Literary and Social Topics* (Lond. 1858, 1861):—*Expository Lectures on Corinthians* (ibid. 1859):—*Sermons*, four series (1855–63; new ed., with *Memoir*, Boston, 1870, 2 vols.). His *Life and Letters* have been edited by S. A. Brooke (1865, 2 vols.). See *Chambers's Encyclop.* s. v.; *Appleton's Cyclop.* s. v.; *Meth. Quar. Rev.* Oct. 1866; *Boston Rev.* July, 1866.

Robertson, James (of Ellon), D.D., a minister of the Established Church, Scotland, was born in Pitsligo, a parish in the north of Aberdeenshire, in 1803. He graduated in due time at Marischal College, Aberdeen, and afterwards served as private tutor, as parish school-master in his own parish, and eventually as head-master of a hospital in Aberdeen for the education of boys. In 1832 he was appointed minister of the parish of Ellon, where he remained until 1843, caring for his parish with assiduity and thoroughness. In the great controversy in the Scottish Kirk he was an earnest and indefatigable "Moderate," opposed to the Veto Act and to Drs. Chalmers, Candlish, Cunningham, and the other Non-intrusionists. When these withdrew in the great secession of the Free Church, it was natural that Mr. Robertson should be designated to occupy some one of the posts they left empty. In 1843—the year of the disruption—Dr. Robertson became professor of divinity and Church history in the University of Edinburgh. He was one of the central minds of the Established Church, and toiled indefatigably in a great endowment scheme—a kind of adaptation or revival of the Church-extension scheme of Dr. Chalmers. He died in Edinburgh, Dec.

2, 1860. He published pamphlets on *The Moderate Side of the Scotch Church Controversy*. See Allibone, *Dict. of Brit. and Amer. Auth.* s. v.; Charteris, *Life of Robertson* (Edinb. 1863, 8vo); *The Reader*, May 9, 1863.

Robertson, John Jay, a Presbyterian minister, was born in Washington, Ga., in 1822. He graduated at the University of East Tennessee in 1845, entered the Union Theological Seminary in 1846, and graduated in 1848. He was ordained in 1850, and filled the pulpit of the Presbyterian Church at Maryville, Tenn., as a stated supply. In the years 1851-52 he was professor in the Maryville College, and from the last date until 1862 he was chaplain in the Confederate army. From 1862 to 1865 he was a stated supply of the church in Rogersville, Tenn. He died in August, 1866, while in that relation. (W. P. S.)

Robertson, Joseph, a learned English divine, was born at Knipe, Westmoreland Co., Aug. 28, 1726. He entered Queen's College, Oxford, in 1746, where he took his degree of arts. Receiving orders, he was for some time curate to Dr. Sykes at Rayleigh, and in 1758 received the living of Herriard, Hampshire. In 1770 he became rector of Sutton, in Essex, and in 1779 he was presented to the living of Horncastle, in Lincolnshire. He died Jan. 19, 1802. Among his principal publications are, a tract on *Culinary Poisons* (Lond. 1781);—*Introduction to Study of Polite Literature* (ibid. 1782);—*Education of Young Ladies* (ibid. 1798, 8vo). Besides other miscellaneous works, he contributed to *The Critical Review* from August, 1764, to September, 1785, over 2620 criticisms on theological, classical, poetical, and miscellaneous publications. See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Auth.* s. v.

Robertson, Wesley, a minister of the Methodist Episcopal Church, was born in New Providence, N. J. He was converted in 1828, and united with the Church. In 1834 he received license as a local preacher, and in 1836 was received on probation in the Philadelphia Conference. He labored with great acceptability, being instrumental in the conversion of large numbers and successful in the building of churches. In the spring of 1857 he took a supernumerary relation, and made Newark his residence, where he remained until August, 1864. He then went to Jacksonville, Fla., to labor under the direction of the Christian Commission, where he died Nov. 2, 1864. See *Minutes of Annual Conf.* 1865, p. 49.

Robertson, William, D.D., often called *Principal Robertson*, a celebrated Scottish historian, was born at Borthwick, county of Mid-Lothian, Scotland, Sept. 19, 1721. His father, the Rev. William Robertson, was minister at Borthwick when his son was born, and afterwards at the Grey Friars' Church, Edinburgh. After a preparatory course at the school of Dalkeith, and when only twelve years of age, young Robertson obtained admission into the University of Edinburgh, where his subsequent progress in learning was rapid, in proportion to the astonishing acquirements of his childhood. In 1741, before he was twenty years old, he was licensed by the Presbytery of Edinburgh to preach; in 1743 he was appointed minister of Gladsmuir, in Haddingtonshire, where he acquired a high reputation as an eloquent pulpit orator; in 1751 he married, and soon after became leader of the Moderate party in the Church of Scotland, in which capacity he is said to have evinced in the General Assembly a readiness and eloquence in debate which his friend Gibbon might have envied in the House of Commons. In 1759 he first became known as a historian by the publication of his *History of Scotland*, which benefited his fortune to the extent of £600, and his fame was by one effort placed on an imperishable basis. No first work was ever more successful. It was extolled by Hume, Burke, and other eminent critics. About the same time he removed to Edinburgh, and became chaplain of Stirling Castle; in 1761 he was nominated one of the king's chaplains-in-ordinary for

Scotland; in 1762 he was elected principal of the University of Edinburgh, and in 1764 was made historiographer for Scotland, with a salary of £200 per annum. Stimulated by such success, as well as by an ardent devotion to literature, he continued his studies, and in 1769 produced his *History of the Reign of Charles V.*, which raised his then increasing reputation still higher, and which is considered his capital work. The introductory part consists of an able sketch of the political and social state of Europe at the time of the accession of Charles V, a most important period, which forms the connection between the Middle Ages and the history of modern European society and politics. In 1777 he published his *History of America*, which was followed in 1788 by *Additions and Corrections to the former Editions*; and in 1791 he published his *Historical Disquisition concerning the Knowledge which the Ancients had of India*, a slight work, to which he had been led by major Rennel's *Memoir of a Map of Hindostan*. After spending a life of equal piety, usefulness, and honor, he died, June 11, 1793. His remains were followed to their resting-place in Grey Friars' Church-yard by a large concourse of the most illustrious magnates of the kingdom, the famous professors of the ancient university, the chiefs of the learned professions, and by many private citizens—all anxious to testify their respect to the memory of one whose intellectual productions cast so bright a lustre on the record of Scottish letters. "A month or two previous to his decease he was removed to Grange House, near Edinburgh, where his friend Dugald Stewart enjoyed those visits which, fortunately for the world, led to the composition of that charming memoir of the principal which has been so often praised and so seldom equalled." Dr. Robertson was a man of dignified and pure personal habits. His conduct as a Christian minister, as a member of society, as a relation, and as a friend was wholly without a stain. Lord Brougham, a relative of his, in his *Lives of the Men of Letters of the Time of George III.*, says, "His affections were warm; they were ever under control, and therefore equal and steady. His conversation was cheerful, and it was varied. Vast information, copious anecdote, perfect appositeness of illustration—narration or description wholly free from pedantry or stiffness, but as felicitous and as striking as might be expected from such a master—great liveliness, and often wit, and often humor, with a full disposition to enjoy the merriment of the hour, but in the most scrupulous absence of everything like coarseness of any description—these formed the staples of his talk." Most of the works of Dr. Robertson relate to that important period when the countries of Europe were beginning to form constitutions and act upon the political systems which were for centuries preserved. His style is elegant, clear, and vigorous, with occasional passages of great beauty. It seems to have completely surprised his contemporaries; and Horace Walpole, in a letter to the author, expresses the feeling with his usual point and vivacity: "But could I suspect that a man I believe much younger, and whose dialect I scarce understood, and who came to me with all the diffidence and modesty of a very middling author, and who, I was told, had passed his life in a small living near Edinburgh—could I then suspect that he had not only written what all the world now allows to be the best modern history, but that he had written it in the purest English, and with as much seeming knowledge of men and courts as if he had passed all his life in important embassies?" Gibbon also has borne ample testimony to his style. In his *Memoirs* (ch. v.), he says: "The perfect composition, the nervous language, the well-turned periods, of Dr. Robertson inflamed me to the ambitious hope that I might one day tread in his footsteps; the calm philosophy, the careless, inimitable beauties, of his friend and rival Hume often forced me to close the volume with a mixed sensation of delight and despair." Robertson is more uniform and measured than Hume. He has few salient

points, and no careless beauties. Of grandeur or dignity there is no deficiency; and when the subject awakens a train of lofty or philosophical ideas, the manner of the historian is in fine accordance with his matter. When he sums up the character of a sovereign, or traces the progress of society and the influence of laws and government, we recognise the mind and language of a master of historical composition. There have been, however, various criticisms as to his accuracy in details of fact—the research and import of his histories. We quote from a single critic: “In plain terms, Dr. Robertson appears to have studied grace and dignity more than usefulness. He has chosen those features of every figure which he could best paint, rather than those which were most worthy of the pencil. The charms of Robertson’s style, and the full flow of his narration, which is always sufficiently minute for ordinary readers, will render his works immortal in the hands of the bulk of mankind. But the scientific reader requires something more than periods which fill his ear, and general statements which gratify by amusing; he even requires more than a general text-book—a happy arrangement of intricate subjects, which may enable him to pursue them in their details. When we repair to the works of Robertson for the purpose of finding facts, we are instantly carried away by the stream of his narrative, and forget the purpose of our errand to the fountain. As soon as we can stop ourselves, we discover that our search has been vain, and that we must apply to those sources from which he drew and culled his supplies” (Dr. Thomas Brown, in the *Edinb. Rev.* April, 1803, p. 240, 241). See Brougham, *Lives of Men of Letters*, etc. (ed. 1855), p. 206, 280–283; Dugald Stewart, *Account of the Life and Writings of Robertson* (1801 and 1802); Cockburn, *Memorials of his Time*; Suard, *Notice sur la Vie et les Écrits de Dr. Robertson*; *Memoirs of Adam Smith, W. (J. L. S.)

Robes, a term denoting, in general, the ecclesiastical garments worn by the clergy when performing the offices of the Church. More strictly it applies to the black gown and the dress worn by a bishop. In early times this badge was so essential that writers often use

the robe to denote both the person and the office of the bishop. It was at first worn by all bishops, but afterwards became the distinctive badge of archbishops, metropolitans, and patriarchs. Tradition narrates that Mark the evangelist, as bishop of Alexandria, first assumed the robe and left it for his followers. Nothing is known of the form and quality of the robe in the first centuries, save that it was a seamless garment made of white linen, and hung loosely from the shoulders. It was made afterwards of woollen. In the 12th century it was made of white woollen, having a circular gathering on the shoulders and two scarfs hanging over it behind and before. On the left side it was double, and single on the right. Previous to the 8th century it had also four purple crosses upon it, one before and behind, and one on either side. It was fastened by three golden pins. The robe itself was styled *πολυστάριον*. See Coleman, *Christ. Antiq.* p. 83.

Robigus, in Roman mythology, was a deity who averted *mil dew* from growing harvests, and was venerated by the rustic population.

Robing-room, a room attached to a church for the keeping of the vestments and sacred vessels, called also *VESTRY* (q. v.).

Robins, Sanderson, an English clergyman, was rector of St. James’s Church, Dover, afterwards vicar of St. Peter’s, in the isle of Thanet, and rural dean. He died in 1862. His principal works are, *The Church Schoolmaster* (Lond. 1850, 12mo):—*Argument for the Royal Supremacy* (ibid. 1851, 8vo):—*Evidence of Scripture against the Claims of the Romish Church* (ibid. 1853, 1854, 8vo):—*The Whole Evidence against the Devices of the Romish Church* (ibid. 1858, 8vo):—*A Defence of the Faith* (ibid. 1861, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Robinson, Benjamin, a learned Presbyterian minister, was born at Derby, England, in 1666. He became pastor at Findern, Derbyshire, in 1688, from which place he removed to Hungerford, Berkshire. He was settled at Little St. Helen’s, London, in 1700, and died in 1724. He wrote, *A Review of the Causes of Liturgies*, etc. (Lond. 1710, 8vo):—*Letter to Thomas Bennet in Defence of the Review* (ibid. 1710, 8vo). See Allibone, *Dict. of Brit. and Amer. Auth.* s. v.; Darling, *Cyclop. Bibliog.* s. v.

Robinson, Charles G., a minister of the Methodist Episcopal Church, was born in Newville, N. Y., in 1822, and when nineteen years of age was converted. Although early impressed that it was his duty to preach, he endeavored by diligent attention to other duties to pacify his conscience. At length he yielded, and was received on trial in the Oneida Conference in 1852. He was ordained deacon in 1854, and elder in 1856; but the condition of his health forbade active service, and, taking a supernumerary relation, he went in October, 1856, to Mansfield, O., where his parents resided, and failing rapidly, died on the 24th of the same month. See *Minutes of Annual Conferences*, 1857, p. 293.

Robinson, David, a Presbyterian minister, was born in Croppuck Township, Washington Co., Pa., about the year 1808. He graduated at Washington College, studied theology in the Western Seminary, Allegheny City, was licensed by Washington Presbytery in 1841, and ordained and installed as pastor of Mill Creek Church, Hookstown, April 19, 1842. This relation existed until 1854, when it was dissolved, and in 1856 he joined New Lisbon Presbytery and was installed pastor of Madison Church, at Calcutta, O., where he remained until 1858, when he returned to Hookstown, Pa., where he died, March 17, 1861. See Wilson, *Presb. Hist. Almanac*, 1862, p. 117. (J. L. S.)

Robinson, Edward, D.D., LL.D., the most German among English-speaking scholars, whose classical and invaluable work on Palestine has made his name

as well known in Germany and England as in his native land, was of Puritan descent, and inherited the piety, energy, love of liberty, and high moral principle of the settlers of New England. He was the son of a Congregational minister, was born at Southington, Conn., April 10, 1794, and from 1812 to 1816 attended Hamilton College at Clinton, N. Y., where he distinguished himself chiefly in mathematics and the ancient languages, and was at the head of his class. In the fall of 1817, after studying law for some time at Hudson, N. Y., he was called to a tutorship at Hamilton College and accepted. A year later he married Eliza Kirkland, daughter of the Rev. Samuel Kirkland, known as missionary to the Oneidas. Though somewhat older than her husband, she was a woman of uncommon intellect and cultivation, and very attractive in appearance. She died, however, within a year after her marriage. Mr. Robinson remained at Clinton until 1821, when he went to Andover, Mass., to publish an edition of eleven books of the *Iliad*, with notes and a Latin introduction, which appeared in 1822. This stay at Andover, however, destined him to the service of theology and the Church. He entered into intimate relations with Prof. Moses Stuart, the patriarch of Biblical scholarship in America, and became assistant professor of the Hebrew language and literature at the Andover Theological Seminary (1823-26). He assisted Prof. Stuart in preparing the second edition of his *Hebrew Grammar* (which was founded on that of Gesenius), and in the translation of Winer's *Grammar of the New Testament Greek* (1825). At the same time he prepared alone a translation of Wahl's *Choris Philologica Novi Testamenti* (Andover, 1825), which, in later editions, grew to be a much more important, independent work. These labors determined his future career, as well as the whole character of modern exegetical theology in America, of which Stuart and Robinson must be considered the founders and representatives. Stuart was brilliant and enthusiastic; Robinson, calm, sober, and critical; the former fresher and more animating, the latter more thorough and scholarly. The school of exegesis originated by them consists in an independent elaborating of the results of modern German investigation on the basis of Anglo-American orthodoxy and practical piety. By this process many excrescences and extravagances of German research were done away with, but at the same time the old Puritan severity was largely modified. Since then it has become a necessity for every American theologian who would keep up with the times to make himself thoroughly acquainted with the German language and literature; and this necessity will long continue to exist, even after most of the classical works of German theology have been made accessible to the Anglo-American literary world by translations.

In the year 1826, Robinson, then thirty-two years of age, undertook a voyage to Europe in order there to complete his theological education at the fountains of German learning and research. He spent his time chiefly at the universities of Göttingen, Halle, and Berlin, and became, in point of persevering industry, a German among Germans. He was particularly intimate with Gesenius, Tholuck, and Rödiger in Halle, and with Neander and Ritter in Berlin. To the celebrated Berlin geographer, who elevated geography to the dignity of a science, constituting it the indispensable companion of ethnography and history, and who united with depth of learning sincere piety and a child-like faith, he was allied during his whole life by the closest bonds of esteem and affection, who were fully reciprocated by Ritter. He considered Ritter, as he assured the writer of this article on presenting, in 1844, a letter of introduction from him, the greatest man of his time. In 1828 he was married in Halle to Therese Albertine Luise, youngest daughter of L. A. von Jacob, professor of philosophy and political science at the University of Halle, a highly gifted lady of thorough culture, who has acquired, under the *nom de plume*

of Talvj, a well-merited reputation as a writer, and who, with German love and fidelity, was a true helpmeet to her American husband, in his literary labors, until he died.

After his return to America in 1830, Robinson was appointed professor extraordinary of Biblical literature and librarian at the Theological Seminary in Andover. Soon after, in 1831, he founded and edited a learned theological quarterly, the *Biblical Repository*, which subsequently (in 1851) was united with the *Bibliotheca Sacra*, founded in 1844, and edited by himself in conjunction with the Andover professors Edwards and Park, and as such still exists. This flourishing periodical contained in its first volumes, besides valuable independent articles, particularly by Robinson and Stuart, many translations and reviews of German works, and was thus a means of transferring the best results of foreign biblical and theological research to American soil. In the year 1832 Robinson published an improved and enlarged edition of Calmet's *Dictionary of the Bible*, which proved very successful. A year later he issued a smaller *Dictionary of the Bible*, for popular use, of which thousands of copies were spread abroad through the American Tract Society. At the same time he published in Halle a translation, by himself, of Buttmann's *Greek Grammar*, which has since then repeatedly reappeared in new and improved editions, and was, and is still, largely used as a text-book in American colleges.

These severe labors, in connection with his daily duties as instructor, undermined his health, and forced him, in 1833, to resign his position. He removed to Boston, and there devoted himself to his studies. In 1834 he published a revised edition of Newcome's *Greek Harmony of the Gospels*, which was far superior to the earlier editions, and a valuable contribution to the literature on Gospel harmony. It was based on Knapp's text of the New Test., and did not possess the advantages of the later researches of Lachmann, Tischendorf, Alford, and Tregelles in the field of textual criticism. At the same time Robinson completed an English translation of Gesenius's *Hebrew-Latin Lexicon*, which first appeared in 1836, met a great want, and contributed much to the advancement of the study of Hebrew in America. The second and later editions were enriched by many additions from the *Thesaurus* of Gesenius. The most important fruit, however, of this season of leisure in Boston was the preparation of an independent *Greek and English Lexicon of the New Test.*, which at once took the place of the author's translation of Wahl's *Choris*. He made frequent use of his predecessors—Bruder, Schleussner, Wahl, Bretschneider, and all exegetic sources of importance; and, in the later editions particularly, of the commentaries of De Wette and Meyer, which he preferred on account of their great philological advantages and concise brevity, without, however, allowing them to disturb his American orthodoxy in any important point. This extremely valuable and sterling work first appeared in 1836, and was at once welcomed as the best English lexicon of the New Test., and reprinted in three different editions in England. A new edition, greatly improved and, in part, entirely altered, appeared in 1850, and made it the first work of its kind to the present time. It is likewise an almost complete concordance, and enables the student to nearly dispense with Bruder. This work is a monument of labor and industry. Its motto is, "Dies diem docet," and "Nulla dies sine linea." The exegetical point of view of the author belongs to the historico-grammatical school founded by Winer, so far as it agrees with a stricter conception of inspiration and a decidedly Protestant-orthodox acceptance of all important doctrines. He kept equally aloof from rationalism and from mysticism, and was a progressive supernaturalist.

In the year 1837, Prof. Robinson received a call as professor of Biblical literature to the Union Theological

Seminary of New York, a Presbyterian institution recently founded, which since then, and chiefly through Prof. Robinson, has risen to the first rank of theological seminaries in America, and stands side by side with Andover and Princeton; and which, by his efforts, was enriched, at an early day, by the Van Ess library and other literary treasures. He accepted the call on condition of his being permitted to devote some years (at his own expense) to the investigation of the Holy Land on the spot itself before entering upon his duties. On July 17, 1837, he sailed for Europe with his family, left the latter in Germany, and travelled by way of Athens and Egypt to Palestine. In conjunction with the Rev. Eli Smith, a highly esteemed missionary of the American Board, who was an accomplished Arabic scholar, he explored, with the acute judgment of a critical scholar and the devout heart of a believer in the Bible, all the important places of the Holy Land. In October, 1838, he returned to Berlin, after having been detained at Vienna by a severe illness, contracted during his travels, which nearly proved fatal. The two following years, spent in the metropolis of German science in the preparation of his *Biblical Researches in Palestine*, were among the happiest of his life. This pioneer work, which since then has been consulted and quoted on all questions of Biblical geography and topography by all the scholars of America, England, and Germany, appeared simultaneously in America and England in the original, and in Germany in a translation revised by Mrs. Robinson, in 1841, and secured the immortality of the author's name, placing him, in Biblical geography, in the same rank with Bochart, Reland, Ritter, Raumer, and Burckhardt; as in Biblical philology he stands side by side with Wahl, Gesenius, and Winer. The *Biblical Researches* are based throughout on personal inspection and investigation by the aid of the telescope, compass, and measuring-tape; on keen observation, strict regard to truth, and sound and wholly independent judgment, which allowed itself to be dazzled by no mediæval traditions or venerable monkish legends, but was guided by the principle, "*Prima historię lex est, ne quid falsi dicere audeat, ne quid veri non audeat.*" Though necessarily dry in many details, his simple and massive style rises at times to true eloquence. The work was immediately received with great favor in Germany, England, and America, and still continues to be quoted as the first authority in its department. We give as examples three criticisms upon it.

Rittersays of it (*Die Erdkunde von Asien*, viii, div. ii, 73):

"The union of the acutest observation of topographic and local conditions, like that of Burckhardt, with much preparatory study, particularly the erudite study of the Bible, and of philological and historical criticism as well as that of the language of the country by the author's travelling companion, the Rev. Eli Smith (whom a residence of many years in Syria as a missionary had made practically at home there), distinguish this work, which is carried through in the most conscientious manner and with great vigor of body and of mind, from all former ones of its kind, whereby the scientific treatment of the subject has only now gained firm ground upon which the future will be able to build up with more success than the past. The competent Olshausen remarks that no previous work has brought to light a richer fund of new and important researches on Palestine. The admirable principles of investigation developed and acted up to therein will remain a guiding-star for all future travellers who would undertake to contribute to the investigation of Biblical antiquity in the Holy Land itself, wherefore the work marks a new era in Biblical geography."

The committee of the Palestine Exploration Fund, in its publication *Our Work in Palestine* (Lond. 1873), p. 7, expresses itself as follows:

"The first real impulse, because the first successful impulse, towards scientific examination of the Holy Land, is due to the American traveller Dr. Robinson. He it was who first conceived the idea of making a work on Biblical geography to be based not on the accounts of others, but on his own observations and discoveries. He fitted himself for his ambitious undertaking by the special studies of fifteen years, mastering the whole literature of the subject, and, above all, clearing the way for his own researches by noticing the deficiencies and weak points of his pre-

decessors. . . . We shall not go into the question here of his theories and his reconstruction of the old city, on which he has had both followers and opponents. Let it, however, be distinctly remembered that Dr. Robinson is the first of scientific travellers. His travels took him over a very large extent of ground, covering a large part of the whole country from Sinai north; and his books are still, after thirty years, the most valuable works which we possess on the geography of Palestine."

Dean Stanley (*Addresses and Sermons delivered in the United States*, October, 1878, p. 26) says:

"Dr. Robinson, I believe it is not too much to say, was the first person who ever saw Palestine with his eyes open as to what he ought to see. Hundreds and thousands of travellers had visited Palestine before—pilgrims, seekers after pleasure, even scientific travellers—but there was no person before his time who had come to visit that sacred country with all the appliances ready beforehand which were necessary to enable him to understand what he saw; and he also was the first person who came there with an eye capable of observing, and a hand capable of recording, all that with these appliances he brought before his vision." The Royal Geographical Society of London awarded to the author, in 1842, their Patron's Gold Medal; in the same year the University of Halle conferred upon him the degree of D.D.; and Yale College, in 1844, that of LL.D.

On his return to America, in 1840, Dr. Robinson devoted himself to his labors in the Union Theological Seminary, at the same time not neglecting his literary work. He wrote numerous articles and essays, revised his former works for new editions, and in 1845 published a new and independent *Greek Harmony of the Gospels*, with notes of his own, which, with other important changes, made it far superior to any former work of the kind and won it general acknowledgment. This was followed in 1846 by an *English Harmony*, with the notes adapted for popular use.

In 1851 Dr. Robinson made a second visit to Germany and Palestine, in which he included Damascus. The valuable results of his new investigations were laid down in an improved and enlarged edition of his *Biblical Researches*, in 1856, which was at the same time published in Germany with a translation of the additional matter by Mrs. Robinson. Nevertheless, this invaluable work was, in the eyes of Dr. Robinson, merely a preparation for a complete physical, historical, and topographical geography of the Holy Land, which he considered the chief labor of his life. Unfortunately, he was not permitted to finish it; only the first part, the *Physical Geography of Palestine*, was fully prepared in manuscript, and his faithful helpmeet translated it into German after his death, and published it in both languages in 1865. Repeated attacks of illness undermined his constitution, and an incurable disease of the eyes obliged him, in the year 1861, to lay down his pen. In May, 1862, he set out on his fifth and last voyage to Europe, in order to consult the celebrated oculist Dr. von Gräfe, in Berlin, who, however, could promise him no permanent cure. Nevertheless, he greatly enjoyed the intercourse with his learned friends in Halle and Berlin, and refreshed his soul once more by a clouded view of the Swiss Alps. On his return in November of the same year, he resumed his usual duties at the Union Theological Seminary, but was forced to cease with the Christmas vacation. After a short illness, he died in the bosom of his family, Jan. 27, 1863, universally esteemed and lamented, most so by his wife, son, and daughter, his colleagues, and a large number of students in the seminary, the learned ornament and crown of which he had been for a quarter of a century.

Dr. Robinson was a man of athletic form and imposing figure, though somewhat bent in later years; of strong, sound good sense; reserved and dry, though, when in the society of his learned brethren, often very entertaining and with a strong sense of humor. He was thorough and indefatigable in his investigations, somewhat sceptical by nature, but bowing in reverence to God's revelation; outwardly cold, but warm inwardly; of great kindness of heart and tender sympathy; a plain, serious, solid, thoroughly honorable character; and a pious, orthodox,

evangelical Christian. Though a dangerous opponent when attacked, he was a lover of peace, avoided theological controversy, and adhered strictly to his task in life, which he accomplished faithfully. He is the most distinguished Biblical theologian whom America has brought forth, and one of the most distinguished of the 19th century. His *Harmony of the Gospels*, his popular *Dictionary of the Bible* (published by the Amer. Tract Society), his *Greek and English Lexicon of the New Test.*, his *Hebrew and English Lexicon* based on Gesenius, and, above all, his *Biblical Researches in Palestine*, belong to the most useful works of modern Protestant theology, and will long continue to exert their influence, under the blessing of God, particularly in America.

Sources.—Next to the works quoted above in chronological order, particular reference is had to two excellent addresses by his two colleagues in the Union Theological Seminary—Profs. Henry B. Smith and Roswell D. Hitchcock—which appeared soon after his death under the title *The Life, Writings, and Character of Edward Robinson, D.D., LL.D., read before the N. Y. Historical Society, published by request of the Society* (N. Y. 1863). Dr. Hitchcock's address gives, at the same time, a thoroughly trustworthy biographical sketch, partly founded on the communications of the family. See also the noble tribute which dean Stanley of Westminster paid to Dr. Robinson in an address before the students of the Union Theological Seminary, New York, Oct. 29, 1878, published in his *Addresses and Sermons delivered during a Visit to the United States and Canada* (Lond. and N. Y. 1879, pp. 23–54). He holds him up as the noblest specimen of an American scholar. The original MS. of Robinson's *Biblical Researches* and a part of his library are in possession of the Union Theological Seminary in New York. (P. S.)

Robinson, George C., a Methodist Episcopal minister, was born at Hartwick, near Cooperstown, N. Y., Aug. 9, 1833, and was educated first at the village academy in Wellsboro, Pa.; next at Lima, N. Y.; and finally graduated with distinction at Yale College in 1856. He then studied at the Union Theological Seminary, New York, till the spring of 1857, when he entered the New York East Conference and took charge of the First Place M. E. Church, Brooklyn, N. Y. He was transferred in 1859 to the Cincinnati Conference, and served the Union Chapel in Cincinnati; but his declining health induced his generous society to send him to Europe in 1860. In Germany he studied thoroughly the latest results of theological inquiry and became master of the best learning of its evangelical teachers, enjoying the personal friendship and admiration of professors Tholuck, Jacobi, etc. He extended his travels through France and Italy, and returned to the United States in June, 1862, with rich acquisitions of knowledge and improved health. But his frail constitution soon yielded again to our precarious climate, and, after a persistent conflict with pulmonary disease, he fell at last, greatly lamented, Sept. 21, 1863. Although so young, he had laid the broadest and deepest foundation for the future. To the Latin, Greek, German, French, and Italian languages he had added a knowledge of the Hebrew, Syriac, and Chaldee. He was familiar even with much of the literature of these languages—especially of the German. Several erudite and critical articles on the present state of opinion and criticism in Germany respecting the Pentateuch were given by him in the periodical journals. To great geniality of disposition he added remarkable strength of intellect. Originality marked the whole structure of his mind, and it amounted to genius. A brief conversation could not fail to convince the hearer that he was not only capable of original and precious thought on almost any subject susceptible of it, but that this power was spontaneous to his affluent mind. His preaching was characterized by it remarkably; and thus presented a singular fascination, especially to thoughtful hearers. His congregation at Union Chapel in Cincinnati established "The Robinson Mis-

sion" in his memory. See *Record of the Yale Class of 1856*, p. 60 sq.; *The (N. Y.) Methodist*, Oct. 3, 1863.

Robinson, George Marshall, a Baptist minister, was born in Buckfield, Me., July 13, 1821. He was a graduate of Waterville College in the class of 1850. He studied theology at Newton, and was ordained pastor of the Church in Sidney, Me., in the summer of 1853. On leaving Sidney in 1854, he preached in several churches, chiefly as a temporary supply, the state of his health not allowing him to take a regular pastorate. For several years before his death he gave up preaching entirely, and was engaged in business. He died at Livermore, Me., April 29, 1873. (J. C. S.)

Robinson, Hastings, D.D., an English clergyman, was born in 1793, graduated at Cambridge as sixteenth wrangler in 1815, and was fellow of St. John's College from 1816 to 1827. He then took the college living of Great Warley, Essex. In 1821 he was appointed assistant tutor of his college, in 1823 Whitehall preacher, and in 1836 select preacher before the university, honorary canon of Rochester, and rural dean. His death took place May 18, 1866. He published *Euripidis Electra, Gr. emendavit et Annotationibus* (Lond. royal 8vo):—*Πράξεις τῶν Ἀποστόλων, Acta Apostolorum* (Cambridge, 1824, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Robinson, Hugh, D.D., an English clergyman, was born in St. Mary's parish, in the county of Anglesea. He was educated at Winchester School, was admitted a probationer fellow of New College, Oxford, in 1603, and perpetual fellow in 1605. He completed his master's degree in 1611, and about three years after became chief master of Winchester School. He was afterwards archdeacon of Winchester, canon of Wells, and archdeacon of Gloucester. Having sided with the party that was reducing the Church to the Presbyterian form, he lost the advantages of his canonry and archdeaconry, but obtained the rectory of Hinton, near Winchester. He died March 30, 1655, and was buried in St. Giles-in-the-Fields, London. He wrote for the use of Winchester School, *Preces; Grammaticalis quædam; Antiquæ Historiæ Synopsis* (Oxford, 1816, 8vo), printed together:—*Scholæ Wintoniensis Phrases Latinæ* (Lond. 1654 and 1664):—*Annales Mundi Universales*, etc. (ibid. 1677, fol.).

Robinson, Isaac, D.D., a Congregational minister, was born at Hudson, N. H., in August, 1779. Having studied under his own minister, he commenced a course of classical and theological study with Rev. Reed Paige, of Hancock. He received a call to become pastor of the Church in Stoddard, Aug. 30, 1802, and, having accepted it, was ordained Jan. 5, 1803. Here he remained until the close of his ministry and life. Mr. Robinson continued to labor with vigor until within a few weeks of his death, which occurred July 9, 1854. He published, about 1809, a pamphlet in opposition to Universalism, a sermon on the *Supreme Divinity of Jesus Christ*, and others. See Sprague, *Annals of the Amer. Pulpit*, ii, 463.

Robinson, John (1), pastor of the "Pilgrim Fathers" of New England, was born in 1575. The Independents, as they were called, had their origin in a protest, not against popish intolerance and persecution, but against Protestant usurpation and bigotry connected with a persecution equal in atrocity to the darkest period of papal domination; not in the dark ages, but in the bright and golden age of Henry VIII and good queen Bess. While renouncing the supremacy of the pope and his title to headship in the Church of Christ, the king assumed ecclesiastical supremacy, and the change was from priestcraft to kingcraft, both eternally incompatible with the teachings of Christ. A little band whose consciences no chains could bind, and whose judgments no sophisms could pervert, rose up and mildly, but firmly, protested against such infringement of the rights of conscience and private judgment, and

rather than submit to the same, suffered imprisonment, torture, and death. An attempt was made in 1602 to seek refuge in Holland, but the vile treachery on the part of the captain of the ship on which they were embarked prevented. The next year, Robinson, the pastor of the little flock, made another effort; but they were again thwarted by untoward providences. Finally, a company arrived at Leyden in 1608. The Church was enlarged by additions mostly from English exiles, and numbered more than three hundred. Robinson was greatly respected by the clergy of Leyden, and also by the professors in the university. He gave proof not only of his piety, but of his scholarship. The Church was not allowed to rest in quiet in this asylum of conscience, but was pursued by the prelatric rage of the bigoted Laud. Holland was not allowed by Providence to be their rest, and they turned their thoughts across the ocean to the New World, where they might enjoy freedom to worship God in a heathen land. An appeal was made to king James as to whether they would be granted liberty of conscience in America. They made a full statement of their religious principles, keeping nothing back. The king promised to connive as to their religious principles and practices, but could not grant them toleration under the great seal.

In the beginning of the year 1620 they kept a day of solemn fasting and prayer; Robinson delivered a discourse from 1 Sam. xxiii, 3-4. It was decided that part of the Church should emigrate and prepare the way, and the remainder follow when their pastor could go with them; but many could not get ready, and had to remain. Mr. Brewster, a ruling elder, was appointed to go as a leader. They were constituted as much an absolute Church as the portion that remained. In July they held another season of prayer, and the pastor preached from Ezra viii, 21. On June 21 they left Leyden to embark at Delfshaven, and went on board ship the day after they arrived. All having assembled on deck, their beloved founder knelt and poured out his soul to God in prayer for the divine protection. They believed thoroughly not only in a general, but a special, providence, extending to the minutest events. The proceeds of their estates were put into a common stock, and, with the assistance of the merchants to whom they mortgaged their labor and trade for seven years, two vessels were provided—the *Speedwell*, of sixty tons, and the *Mayflower*, of one hundred and eighty tons. They expended seven thousand pounds in provisions and stores. The ships, carrying one hundred and twenty passengers, sailed from Southampton on Aug. 5, 1620. The *Speedwell*, proving leaky, had to put into port at Dartmouth for repairs. On Aug. 21 they put to sea again, and by still another providential interference, both ships proving unseaworthy, they were obliged to put back to Plymouth. About twenty left the *Speedwell*, and, taking with them their provisions, went on shore; the remainder, one hundred and one in number, went on board the *Mayflower*, and the shores of England were lost sight of forever. The company had entered into a solemn covenant to be faithful to God and each other. But little remarkable occurred during the voyage. There was one death, and one birth—a son of Stephen Hopkins, who was named Oceanus. On Nov. 9 they caught sight of the sandy cliffs of Cape Cod, and the next day entered the harbor. Before going ashore, they founded a democratic government, and elected John Carver to serve one year as governor of the colony. They named the place Plymouth. The first religious service held on land was on Dec. 31. Robinson had charged them to "follow him only so far as he followed Christ." They were faithful to the charge—a noble band of God-fearing and God-loving men; and they left unchanged to posterity

"What here they found—
Freedom to worship God."

The only book of Robinson's writing was entitled *Justification of Separation from the Church of England*,

published in 1851. He died March 11, 1625. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.; Sprague, *Annals of the Amer. Pulpit*, i, 1. (W. P. S.)

Robinson, John (2), bishop of London, was born at Cleasby, Yorkshire, in 1650, and was educated at Orisl College, Oxford. He was chaplain to the English ambassador to Sweden in 1683, and subsequently ambassador there himself. He returned to England in 1708, in 1710 became bishop of Bristol, and in 1714 was transferred to London. He was minister plenipotentiary at the Treaty of Utrecht, and one of the commissioners for finishing St. Paul's Cathedral. He died in 1723. He published, *An Account of Sweden* (3d ed. 1717, 8vo):—*Sermon on Benefits, etc., of Christ's Kingdom* (Lond. 1714, 8vo), and others. See Allibone, *Dict. of Brit. and Amer. Auth.* s. v.; Darling, *Cyclop. Bibliog.* s. v.

Robinson, John (3), D.D., a Presbyterian minister, was born in Mecklenburg County, N. C., Jan. 8, 1768. His college course was pursued at Willsborough, S. C. He studied under the care of the Orange Presbytery, was licensed to preach April 4, 1793, and was by the presbytery directed to visit Dupin County, where he remained seven years. In 1800 he became minister of the Church in Fayetteville, but removed in 1801 to Poplar Tent. In 1806 he was induced to return to Fayetteville, where he resumed pastoral labors and his classical school. In December, 1818, he returned to Poplar Tent, where he passed the rest of his life, dying Dec. 14, 1843. Dr. Robinson was a man of consistent and elevated piety, large benevolence, firmness of purpose, courage, and punctuality. He published a *Eulogy on Washington*. See Sprague, *Annals of the Amer. Pulpit*, iv, 113.

Robinson, John (4), D.D., an English clergyman, was graduated at Christ College, Cambridge, and was minister of Ravenstoneale, Westmoreland, and master of the free grammar-school there. He published, a *Theological, Biblical, and Ecclesiastical Dictionary* (Lond. 1815, 8vo):—*The Proper Names of the Bible* (ibid. 1804, 12mo):—besides a number of works for schools. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Robinson, John (5), a minister of the Methodist Episcopal Church, was born in County Wicklow, Ireland, Aug. 14, 1801. He was converted in his fourteenth year, and came to the United States in 1818, uniting soon after with the Church in Fishkill, N. Y. In 1823 he moved with his parents to South Sodus, Wayne Co., where he labored, with a great revival as a result. After working under the presiding elder for two years, he was in 1832 received on trial as an ordained deacon in the Genesee Conference. In this and in the East Genesee Conference he labored a short time previous to his death, in Starkey, Yates Co., Jan. 9, 1868. See *Minutes of Annual Conferences*, 1868, p. 155.

Robinson, Jonathan N., a minister of the Methodist Episcopal Church, was born in Suffolk County, Long Island, N. Y., Sept. 27, 1816. He joined the Church April 10, 1838, was licensed to preach March 14, 1840, and after a course of preparatory study was received on trial in the New York Conference, June 16, 1844. He went to his last charge in 1853, was attacked with hemorrhage of the lungs, which became so aggravated that he died, Nov. 6, 1858. See *Minutes of Annual Conferences*, 1859, p. 153.

Robinson, Moses, a Presbyterian minister, was born in Burlington, Vt., April 26, 1815. His parents were poor, and he was dependent upon his own exertions to gain an education. He graduated at Middlebury College in 1839, studied theology in Union Seminary, New York city, was licensed by New York Third Presbytery in 1842, and was ordained by Salem Presbytery in 1843 as pastor of the church at Washington, Ind. He labored subsequently at Wadsworth, O., then at

Enosburg, Vt., and for the last ten years of his life at Steamboat Rock, Ia. He died Aug. 31, 1865. See Wilson, *Presb. Hist. Almanac*, 1866, p. 223. (J. L. S.)

Robinson, Ralph, a Presbyterian minister, was born in Scotland, Windham Co., Conn., March 12, 1780. His father and family removed to Dorset, Vt., where Ralph spent the earlier part of his life at agriculture. He pursued his preparatory studies under the care of Rev. William Jackson, of Dorset, paying his board and tuition by his labor; graduated at Middlebury College in 1808; studied theology with Rev. Holland Weeks, of Pittsford; was licensed to preach by the Rutland Association in 1809, and for about a year acted as home missionary, preaching in Malone, N. Y., and in two or three towns in Vermont. In 1810 he was ordained and installed as pastor of two churches, viz. the Congregational Church in Granville, Vt., and the First Congregational Church in Hartford, N. Y. In 1822 he was settled as pastor of the Congregational Church, Marshal, Oneida Co.; in 1828 of the Church in New Haven; in 1830 of the Church in Pulaski, where he remained sixteen years; in 1846 he returned to the New Haven Church and remained seven years; in 1854 he went to the Church in East Mexico, and in 1858 to the Presbyterian Church in Constantia. Thus we have fifty years of uninterrupted ministerial labor—a life itself, which, from its nature, must have made a mark for eternity on hundreds of souls. He died May 14, 1863. Mr. Robinson was an intelligent and earnest preacher and defender of the New England or Edwardian theology, a pioneer in temperance and anti-slavery reform, and an earnest promoter of all the benevolent causes of the Church. See Wilson, *Presb. Hist. Almanac*, 1864, p. 317; also *The Congregational Quarterly*, Boston, July, 1863; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v. (J. L. S.)

Robinson, Richard, archbishop of Armagh and lord Rokeby, was born in the North Riding of Yorkshire, England, in 1709. He was educated at Westminster School and Christ Church, Oxford, where he took his master's degree in 1733. Dr. Blackburn, archbishop of York, appointed him his chaplain, and collated him first to Elton, Yorkshire, and next to prebend of Grindal, Cathedral of York. In 1751 he went to Ireland, and was promoted to the bishopric of Killala in the same year. In 1759 he was translated to the united sees of Leighlin and Ferns, and in 1761 to Kildare. In 1765 he was advanced to the primacy of Armagh, and made lord-almoner and vice-chancellor of the University of Dublin. He was created baron Rokeby of Armagh in February, 1777, and in 1783 he was appointed prelate to the Order of St. Patrick. He succeeded to the title of baronet upon the death of Sir William, his brother, in 1785. Bishop Robinson died at Clifton, near Bristol, in October, 1794. He was very watchful over the legal rights of the Church in Ireland. The acts of the 11th and 12th of the then reigning sovereign, securing to bishops and ecclesiastical persons repayment for expenditures in purchasing and building glebes and houses, originated with him.

Robinson, Robert, a distinguished minister of the Baptist denomination in England, was born at Swaffham, Norfolk, Jan. 8, 1735. In 1749 he was apprenticed to a hair-dresser in London. Becoming a hopeful Christian under the preaching of Whitefield, his master released him from his indentures, and he returned to his native county and began to preach as a Calvinistic Methodist. He soon joined the Baptists, and in 1759 became pastor of the Baptist Church in Cambridge, where he was very popular with all classes of people. Enjoying peculiar facilities for study at Cambridge, he improved every opportunity to add to his store of knowledge. He was a fine linguist, and easily learned both the ancient and modern languages. Between the years 1770 and 1782 he prepared and published a translation of *Saurin's Sermons*. He also published in 1776 *A Plea*

for the Divinity of Our Lord Jesus Christ, in a Pastoral Letter Addressed to a Congregation of Protestant Dissenters at Cambridge. It is said that this "Plea excited the most singular attention, and the highest dignitaries of the Church of England pronounced that it was the best defence of the divinity of Christ that had ever been published. He was invited to become a clergyman of the Establishment, to which, however, he refused to listen." Robinson was the author of several other works which, in their day, enjoyed a good degree of popularity. Among them was a translation of the celebrated essay of Claude, *On the Composition of a Sermon*, and an elaborate work on which he spent years of labor—*History of Baptism*. Close and long-continued application to study at length produced its effect on his constitution, and he died June 8, 1790. Although he was thought at one time to lean somewhat towards Socinianism, he never lost the affection and confidence of his Church in Cambridge. See Dyer, *Robinson's Life and Writings* (Lond. 1796, 4to); Flower, *Robinson's Miscellaneous Works*, etc.; also the *Annual Review*, 1805, p. 464; *Eclectic Review*, September, 1861; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v. (J. C. S.)

Robinson, Thomas (1), an English clergyman, was born at Wakefield, in the county of York, Aug. 29, 1749. He was educated at the grammar-school of his native place, the governors of which, when it was determined to send him to the university, unanimously agreed to allow him a sizar (double exhibition (pension)). He was admitted a sizar into Trinity College, Cambridge, in October, 1768. In 1772 he was elected fellow of the college, and soon after presented to the curacies of Witcham and Witchford. About two years afterwards he accepted the curacy of St. Martin's in Leicester, was chosen afternoon lecturer of All-Saints', and in 1774 chaplain to the Infirmary. In 1778 he was appointed weekly lecturer of St. Mary's, Leicester, and in the same year was presented to the living of this church. Mr. Robinson died of apoplexy, March 24, 1813, after preaching thirty-nine years in Leicester. Among his works are, *Scripture Characters* (Lond. 1789, 12mo; last ed. 1860, 8vo); —*The Christian System Unfolded* (ibid. 1805, 3 vols. 8vo; last ed. 1848, 8vo); —*Prophecies of the Messiah* (ibid. 1812–25, 8vo); —besides *Addresses*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Robinson, Thomas (2), an English clergyman, was born about the middle of the last century, and became rector of Ruan Minor and vicar of St. Hilary, Cornwall. He died in 1814. He was the author of, *A Few Plain Reasons for the Belief of a Christian* (1800, 8vo); —*Inquiry into the Nature, Necessity, and Evidences of Revealed Religion* (1803, 8vo).

Robinson, William (1), a Presbyterian minister, was born near Carlisle, England, in the beginning of the 18th century. Having plunged into the dissipations of London, he was ashamed to return to his father, and resolved to seek his fortune in America. On his arrival, he began to teach school in Hopewell, N. J., living the life of a correct and sober man. Soon after his conversion, he determined to enter the ministry, and pursued his studies at the Log College. He was received under the care of the New Brunswick Presbytery on April 1, 1740, and was licensed to preach May 27 following. On Aug. 14, 1741, he was ordained in New Brunswick *sine titulo*. Until 1746 he labored as missionary in Virginia, and on March 19 was dismissed from the Presbytery of New Brunswick to that of New Castle, with a view of his becoming pastor of the congregation at St. George's, Del. But in April following, before he had been installed, his death occurred. There remains little documentary testimony concerning him; but there is a uniform tradition that he was an eminently devout and benevolent man, and one of the most vigorous and effective preachers of his day. See Sprague, *Annals of the Amer. Pulpit*, iii, 92.

Robinson, William (2), a Congregational minister, and father of Dr. E. Robinson, was born at Lebanon, Conn., Aug. 15, 1754. He was fitted for college in the school of Mr. Tisdale in Lebanon, entered the sophomore class in Yale College in 1770, and graduated in 1773. In 1775 he returned to New Haven to study theology, united with the Church in Yale College, May 5, 1776, and was licensed to preach May 29. In the summer of 1778, Mr. Robinson was chosen to a tutorship in Yale College, and held that office one year, preaching in the towns adjacent. He was invited in December, 1778, to settle in Southington, which call he accepted, but was not ordained until June 13, 1780. So limited was his income that he was obliged to devote considerable of his time to agricultural pursuits. He was retired from active duties in September, 1820, after a ministry of forty-one years and two months, and died in 1825 on the anniversary of his birth. See Sprague, *Annals of the Amer. Pulpit*, ii, 131.

Robinson, William S., a minister of the Methodist Episcopal Church, was born in Harrison County, Ky., in 1825. He joined the Church in his eighteenth year, was licensed to preach in August, 1851, and was received on trial in the North Indiana Conference in 1852. In 1854 he was admitted into full membership, but was obliged to give up his work in May, and on July 11, 1855, he died. See *Minutes of Annual Conferences*, 1855, p. 619.

Rob'oām (Ροβόαν), the Greek form (Ecclus. xlvii, 23; Matt. i, 7) of the name of king Rehoboam (q. v.).

Roc. See **Rok**.

Rocaberti, Juan Tomas de, a Spanish prelate, was born at Perelada, Catalonia, March 4, 1627. While very young, he took the habit of St. Dominic at the Convent of Gerona, but later removed to that of Valencia. In 1666 he was provincial of Aragon, was elected general of the order in 1670, and in 1676 was nominated archbishop of Valencia by Charles II. This prince twice made him viceroy of that province, and in 1695 gave him the title of "grand inquisitor of the faith." He died at Madrid June 13, 1699. The following are his principal works: *Alimento Espiritual, Cotidiano Ejercicio de Meditaciones* (Barcelona, 1668). — *Teología Mística* (ibid. 1699). — *De Romani Pontificis Auctoritate* (Valencia, 1691-94). The last-named work, though held in great esteem in Spain and Italy, was not so regarded in France, where it was considered contrary to the doctrines of the fathers, and the Parliament of Paris forbade its sale in 1695. Rocaberti also collected and printed at his own expense all the works which upheld the pontifical authority and infallibility. This collection is entitled *Bibliotheca Pontificia Maxima* (Rome, 1695-99). As general of his order, he edited the works of several Dominicans which had never before appeared. See Antonio, *Bibl. Hispana Nova*.

Rocca, Angiolo, a learned Italian prelate, was born in Rocca Contrada, Naples, in 1545. In 1552 he took the habit among the Hermits of St. Augustine, and afterwards continued his studies at Rome, Venice, Perugia, and Padua, receiving the title of doctor of divinity at the University of Padua in September, 1577. In 1579, Fivizani, vicar-general of the Augustinians, invited him to become his secretary. Pope Sixtus V placed him in the Vatican in 1585, and confided to his superintendence those editions of the Bible, the councils, and the fathers issued from the apostolical press during his pontificate. In 1595 Clement VIII made him apostolical scriban and titular bishop of Tagaste, in Numidia. He presented his large and excellent library to the Augustinian monastery at Rome (Oct. 23, 1614), on condition that it should always be open to the public. He died April 8, 1620. Among his works are, *Bibliotheca Apostolica Vaticana*. — *Bibliotheca Theologica et Scripturalis*. — *Notæ in Novum Testamentum*. — *De Patientia*. — *De Cometis*. — *Observationes in VI Libros Elegantiarum*, etc.: and *Observa-*

tiones de Lingua Latina, etc. (1719, printed together, 2 vols. fol.).

Roch, St., a wonder-worker of the Romish Church, respecting whom there is evidence to show that he was born at Montpellier, about A.D. 1295; that he visited the towns of Italy during an epidemic to nurse the sick, and effected cures by the might of his prayers; that he subsequently returned to his native city, and was there imprisoned during several years on the charge of being a spy; and that he died in 1327. It is said that while himself sick of the plague, and lying in a hovel in the neighborhood of Piacenza, he was saved from starvation by a hound, who brought him bread from time to time. The stories of his descent from a royal stock and of his having attained the cardinalate are wholly fabulous. Various miracles are said to have been wrought by him after his death. A plague which broke out at Costnitz during the sessions of a council was stilled by invoking the aid of "the blessed confessor and physician Rochus." It is said that his body was stolen in 1485 and brought to Venice; but Montpellier, Turin, Antwerp, and other towns boast that they possess genuine relics of St. Roch, and churches and chapels bearing his name are found in all the important towns of Roman Catholic Europe. A *Confraternitas S. Rochi, a Morbo Epidemice Liberatoris*, has existed in Rome since the close of the 15th century, and was endowed with rich privileges and exemptions by popes Alexander VI, Leo X, and Pius IV; and associations bearing similar names were formed at Bologna, Venice, Turin, Arles, and Antwerp—one having been founded in the place last named so late as 1685. St. Roch is commemorated Aug. 16. See *Acta Sanctorum*, Aug. iii, 380-414.

Rochechouart (Mortemart), Marie Madeleine Gabrielle de, abbess of Fontevrault, was born in 1645. The daughter of the duke of Mortemart, she was possessed of a great degree of the beauty which rendered her sister, Madame de Montespan, so famous. At the age of twenty she took the veil at Bois, and in 1670 became abbess and superior of the Order of Fontevrault. She was well read, and conversant with the literature of the Italian, Spanish, Greek, and Latin languages, as well as of her own. After her death, which occurred Aug. 15, 1704, there were found among her papers several dissertations on piety, morals, and criticism. One is entitled *Question sur la Politesse*, which may be found in the *Recueil de Divers Ecrits*, by Saint-Hyacinthe (Brussels, 1736). See *Gallia Christiana*.

Rochemore, Pierre Joseph, was bishop of Montpellier in 1802. He refused to exercise his ecclesiastical functions in order to avoid leaving Nismes, where he was vicar-general. He died in 1811.

Rochet, a linen garment worn by bishops under the chimere (q. v.). The word appears first about the 13th century, being called *sarcos* at Cambrai and *sarvoht* or John of Liege. The Council of Buda (1279) mentions it as the white *camisia*, or *rosetta*, worn under the *cappa*, or mantle, when walking or riding. Between 1305 and 1377 the popes introduced it at Avignon, but it was of far earlier date, having been in common use in the 7th century, and identified with the *linea* prescribed by the *Ordo Romanus*. In the following ages the bishops were obliged by the canon law to wear their rochet whenever they appeared in public; and this practice was long kept up in England, but has been abandoned since the Reformation, except in Parliament and in Convocation, over the scarlet habit. Secular prelatic prothonotaries, and canons who had the right to use it, put it on over the *vestis talaris* before robing for mass. The rubric of the First Common-Prayer Book of Edward VI prescribes that the bishop shall wear the rochet at communion. The rochet, according to Lyndwood, was sleeveless, and worn by the server to the priest, and by the latter in baptizing. The chief difference between this garment and the surplice was that its sleeves were nar-

rower than those of the latter. The modern full sleeve is not earlier than the time of bishop Overall. Before and after the Reformation, till Elizabeth's time, the rchet was always of scarlet silk, but bishop Hooper changed it for a chimere of black satin. Bale describes the clergy wearing white rochets of raines (linen of Rennes or Rheims), or fine linen cloth. See Walcott, *Sac. Archaeol.*; Hook, *Ch. Dict.*; Eden, *Theol. Dict.*; Gardner, *Faiths of the World*, s. v. See ORNAMENTS.

Rochus, a carver of San Lucar, Spain, whose principal business was to make images of saints and other popish idols. Convinced of the errors of Romanism, he embraced the Protestant faith, and followed the business of seal-engraver only. An image of the Virgin had been retained as a sign, and a papal inquisitor passing asked him if he would sell it, and the price. Rochus gave the price, and the inquisitor offered him half the money: upon which Rochus replied, "I had rather break it in pieces than take such a trifle." "Break it in pieces if you dare," said the inquisitor. Rochus took a chisel and cut off the nose of the image, for which offence he was burned.

Rock (properly סֶלֶס, or צִיָּר, *πέτρα*). Palestine is a mountainous and stony country, abounding in caves and fastnesses where the inhabitants sought shelter from sudden invasions of enemies, and where bands of robbers frequently formed their dens. Thus when the Benjamites were overcome, they secured themselves in the rock Rimmon, and David hid himself from Saul in the caves of Adullam, Engedi, and Maon. These ravines furnish a great number of defensible positions, which have been the scene of many deadly struggles, from the days of the Canaanites down to the present hour. The prevailing rock is a dark-gray limestone, which, though it has a most saddening aspect of barrenness and desolation, is very susceptible of cultivation, being easily worked into terraces, which give support to the soil, and facilitate the fertilizing process of irrigation. Travellers who now visit the land are disposed, at the first view, to doubt the ancient accounts of its fertility; they can scarcely bring themselves to believe that these barren wastes were the promised land "flowing with milk and honey;" but a more attentive examination of the country affords abundant evidence that its present sterility is owing to the nature of its government, which, affording no security either for life or property, prevents the husbandman from tilling the soil when he is uncertain whether he shall reap its fruits. Indeed, it may be generally said that a country of limestone rock will be found one of the best in rewarding the labor of cultivation, and one of the worst in spontaneous produce. See CAVE; HILL.

Rock is frequently used in Scripture in a figurative sense of the ancestor of a nation, the quarry whence it was derived (Isa. li, 1). It is also used in a metaphorical sense of God, as the "Rock," i. e. the strength and refuge of his people (Deut. xxxii, 4; 2 Sam. xxiii, 3; Psa. xviii, 2). The rock from which the Hebrews were supplied with water in the desert was a figure or type of Christ (1 Cor. x, 4). So the term *rock* is used of the grand doctrine of Christ's eternal supremacy, which is the foundation of the Christian system (Matt. xvi, 18). See STONE.

Rock, DANIEL, a learned Roman Catholic, was born at Liverpool, England, in 1799, and educated at Old Hall, Herts. and in the English College, Rome. After serving the mission in London for two years, he became domestic chaplain to the earl of Shrewsbury, and in 1840 took charge of the Church at Buckland, Berks, which he resigned in 1854. On the reintroduction into England of the Roman hierarchy (1852), he was one among those first made canons of Southwark. He died Nov. 28, 1871. Rock published, *Hierurgia, or the Holy Sacrifice of the Mass* (Lond. 1833, 2 vols. 8vo; 2d ed. 1850, 8vo); — *The Church of our Fathers*, etc. (vol. i, ii, *ibid.* 1843, 8vo; vol. iii, 1853-54); — *Transubstantiation Vindicated*: —

The Mystic Crown of Mary; also minor publications. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rockwood, LUBIM BURTON, a Congregational minister, was born at Wilton, N. H., April 8, 1816. He graduated at Dartmouth College in 1839, and entered the Andover Theological Seminary, where he remained two years, and then entered the Union Theological Seminary, where he also remained two years, graduating in 1843. He was ordained to the Gospel ministry in 1845, and became the financial agent of Union Theological Seminary. He was called to the pastorate of the Congregational Church at Rocky Hill, Conn., in 1850, and continued in charge of the same until 1858, when he accepted the position of district secretary of the American Tract Society of New York, and subsequently of that of Boston, Mass. He died while engaged in this work, May 7, 1872. (W. P. S.)

Rocóco, a name given to the very debased style of architecture and decoration which succeeded the first revival of Italian architecture. It is ornamental design run mad, without principle or taste. This style prevailed in Germany and Belgium during last century, and in France during the time of Henry IV. The following figure is an example from an altar in the Church of St. James, Antwerp.

Rococo Ornament.

Rod stands in the A. V. as the representative of several different Hebrew words, and consequently has various significations in the Scriptures (רֹדֶף, *chôter*, a shoot, Prov. xiv, 3; Isa. xi, 1; מַקֵּל, *makkél*, a twig, Gen. xxx, 37-39, 41; xxxii, 10; Exod. xii, 11; Numb. xxii, 27; 1 Sam. xvii, 40, 43; Jer. i, 11; xlviii, 17; Ezek. xxxix, 9; Hos. iv, 12; Zech. xi, 7, 10, 14; elsewhere מַטֵּה, *mattéh*, a stick, especially for walking or smiting, or שֵׁבֶט, *shébet*, the baton of office; ῥαβδός). It signifies a wand or walking-staff: as Moses' rod (Exod. iv, 2, 4), Aaron's rod (vii, 9), Jonathan's rod (1 Sam. xiv, 27). The rods of Moses and Aaron were the visible means chosen by the Almighty for the instrument of his wonders in Egypt, at the Red Sea, and in the wilderness. The rod of Moses is sometimes called "the rod of God" (Exod. iv, 20; vii, 9, 12, 19, 20; viii, 5, 17; ix, 23; x, 13). Aaron's rods, which miraculously blossomed and brought forth almonds, was laid up as a memorial in the holy place (Numb. xvii, 8, 10; Heb. ix, 4). As the wonders wrought by the instrumentality of Moses' and Aaron's rods attracted the attention of neighboring nations, it is not extraordinary if, in course of time, these personages were interwoven with mythology (see Willemer, *De Baculo Mosis* [Viteb. 1680]). It has been plausibly conjectured that Aaron's rod, which in its serpent state devoured the serpent-rods of the Egyptian magicians, was the prototype of the caduceus, or wonder-working rod of Mercury, which was fig-

ured as entwined with two serpents. Aaron's rod was caused to blossom miraculously and bring forth almonds (Numb. xvii, 8) to show God's election for the priesthood. Parkhurst thinks that the rods of the chiefs among the Israelites were of the almond-tree, to denote vigilance, that being an early tree, flowering before all others. The shepherd's staff is called "a rod;" and the tithe of the herd, or of the flock, was to be taken from "whatsoever passed under the rod," i. e. from whatsoever required the shepherd's care (xxvii, 32; Jer. xxxiii, 13; Ezek. xx, 37; Mic. vii, 14). The term "rod" also means a shoot or branch of a tree, and in this sense is applied figuratively to Christ as a descendant of Jesse (Isa. xi, 1). "Rod" is used to designate the tribes of Israel as springing from one root (Psa. lxxiv, 2; Jer. x, 16). It is used as the symbol of power and authority (Psa. ii, 9: cxx, 2; cxxv, 3; Jer. xlviii, 17; Ezek. xix, 11; Rev. ii, 27); of that which supports and strengthens, a stay or staff (Psa. xxiii, 4; Isa. iii, 1; Ezek. xxix, 6); and of the afflictions with which God disciplines his people (Job ix, 34; Heb. xii, 6, 7). (See Cooper, *Hist. of the Rod in all Countries and Ages* [2d ed. Lond. 1877].) See SCEPTRE; STAFF.

A peculiar use of rods is afforded in the instance of those of poplar and hazel (more properly the wild almond) which Jacob partially peeled, and set in the water where Laban's cattle drank, and by looking at which they brought forth speckled and ring-streaked young. Commentators are not agreed as to the effect thus produced: whether it was natural or miraculous; whether the sight of the rods had naturally such an effect on the animals' perceptions as to influence the markings of their offspring, in the manner that children often receive marks before birth, from some object that has impressed itself on the mother's mind, or whether it was a special operation of God in Jacob's favor, which, in fact, seems clearly intimated in Gen. xxxi, 10, 12, where Jacob declares himself to have been guided on this subject by God in a dream. The Latin fathers considered the case as natural, the Greek as miraculous, which is also the prevailing opinion of modern commentators, who consider it very doubtful whether the same cause (the use of variegated rods) would now certainly produce the same effects. See POPLAR.

Rhodomancy, or divining by rods, became a common superstition or idolatrous custom among the Jews, arising, doubtlessly, from the ideas of supernatural agency attached to the rods of Moses and Aaron. It is alluded to in Hos. iv, 12: "My people ask counsel at their stocks, and their staff declareth unto them." It was performed, first, by inscribing certain characters on small rods, and then drawing them, like lots, out of a vessel; secondly, by measuring the rod in spans, and saying, alternately, words expressing a negative and an affirmative, and then determining, according to the last span, whether negative or affirmative, to do the intended action or not; thirdly, by erecting two sticks, repeating a charm, and then determining by certain rules, according as the sticks fell backward or forward, to the right or to the left. See DIVINATION.

Rodanim. See DODANIM.

Rodburne. See RUDBORNE.

Rodgers, Ebenezer, a Baptist minister, was born March 16, 1788, in the Blaina valley, Monmouthshire, England. He studied with the Rev. Samuel Kilpin of Leominster, Herefordshire, for two years, and was then admitted into the Baptist College at Stepney, London, where he spent four years. Soon after the completion of his studies, he came to America on secular business, intending to return in a few months. He was persuaded by some of his friends to visit the State (then Territory) of Missouri, and for a time relinquished his purpose of returning to his native land. A Baptist church was soon formed at Chariton, about 175 miles west of St. Louis, and Mr. Rodgers was ordained its pastor, though he did not confine his labors to this one locality. He

engaged in teaching in order to defray expenses of living. This itinerant life continued for about sixteen years, during which he assisted in the organization of about fifty churches. In 1832 he visited Wales, and in 1834 became pastor of the churches in Alton and Upper Alton, Ill., but after a year gave his undivided service to the latter. He then resigned, but immediately became pastor of two or three other churches. He continued preaching and acting as trustee of Shurtleff College until his death, May 25, 1854. See Sprague, *Annals of the Amer. Pulpit*, vi, 681.

Rodgers, James, a Presbyterian minister, was born in Roxburghshire, in the South of Scotland, in 1785. His parents were in humble circumstances, and his education was limited to that which could be acquired in the common school. He owed much to his early religious training, and in childhood he had been so thoroughly drilled in the doctrines of the Shorter Catechism that in later years, planted on this foundation, he stood unmoved amid hosts of heresies. He dated his conversion from his fourteenth year. In 1819 he emigrated to this country, and settled in the then new colony of Hammond, St. Lawrence Co., N. Y. He was licensed March 23, 1823, and ordained as an evangelist June 9, 1824. For a number of years he continued to labor in Hammond and some of the adjoining churches. He also gave a partial supply to a church in the township of Oswegatchie, where he finally settled as stated supply in 1827, and was installed as the regular pastor May 13, 1839. In 1848 failing health rendered regular labor impossible, and he resigned this charge, although he continued to labor for short periods in other fields. He died Aug. 20, 1863. Mr. Rodgers was a remarkable man, and he proved himself an efficient and successful workman. His pulpit services were characterized by rich scriptural knowledge, great earnestness, and deep spirituality. See Wilson, *Presb. Hist. Almanac*, 1865, p. 114. (J. L. S.)

Rodgers, John, D.D., a Presbyterian minister, was born in Boston, Aug. 5, 1727. After studying theology, he was licensed by the Presbytery of Newcastle in October, 1747. After this he went to Virginia, but not being permitted to preach there, he went to Maryland, and early in 1748 returned to Pennsylvania, where on March 16, 1749, he was installed pastor of the congregation of St. George, where his ministrations proved very acceptable. In 1754 he spent some months in Virginia as substitute of Rev. Samuel Davies during the latter's absence in England. In 1762 he was himself appointed by the Synod of New York and Philadelphia to visit England to solicit subscriptions to a fund for the benefit of the Presbyterian ministry, but family reasons obliged him to decline. In 1765 he was elected one of the trustees of the College of New Jersey, which office he resigned in 1807. In 1765 he dissolved his relation with the Church of St. George, and became pastor of a congregation in New York. In 1768 he was made doctor of divinity by the University of Edinburgh. During the Revolutionary war he showed himself devoted to the cause of his country, and was several times consulted by Washington. In May, 1776, he removed with his family to Greenfield, Conn., but being appointed chaplain to general Heath's brigade on York Island, he at once entered upon his duties. He was obliged to resign in November of the same year, however, business calling him to Georgia. On his return, in April, 1777, he was appointed chaplain of the New York State Convention in session at Esopus, and afterwards served the Council of Safety in the same capacity, as well as the first Legislature of the State under the new constitution. In 1780 he removed to Danbury, Conn., and in 1782 accepted a call from the church of Lamington, N. J., when, in 1783, the close of the war permitted him to return to New York, where he resumed his former connection, with the aid of an assistant after April, 1785. Shortly after, he was appointed vice-chancellor of

the Board of Regents of the University of New York, and in 1789 he was chosen moderator of the General Assembly at Philadelphia. In 1809 his health became greatly impaired, and he died May 7, 1811. Besides some miscellaneous articles in connection with the Episcopal controversy, and several *Sermons in the American Preacher*, Dr. Rodgers published *A Sermon before a Mission Lodge*, at Stockbridge, Mass. (1779):—*A National Thanksgiving Sermon* (1783):—*A Sermon on the Death of Dr. Witherspoon* (1794):—and *A Sermon at the Opening of the Cedar Street Church* (1808). See Sprague, *Annals of the Amer. Pulpit*, iii, 154.

Rodgers, Ravaud Kearney, D.D., a Presbyterian minister, was born in N. Y. city, Nov. 3, 1796. He was the son of John R. B. Rodgers, M.D., surgeon in the Revolutionary army, practicing physician, and professor in the medical department of Columbia College, New York city. His grandfather, John Rodgers, D.D., was minister of the First Church, in New York, founder of the Brick Church, and the first moderator of the General Assembly in 1789. In the year 1815 Ravaud K. graduated at Princeton College, and in 1818 he graduated at the Princeton Theological Seminary. In 1820 he was ordained and installed pastor of the Sandy Hill and Glenn's Falls Presbyterian churches, N. Y. He remained ten years in that field. He was an ardent, noble, earnest young preacher, and associated with Drs. Bullions, Prouditt, Prime, and others in the Bible cause, education, and all great works of social improvement and philanthropy. With a voice of trumpet power and glowing eloquence, he was a favorite at all great public meetings and anniversaries, and a leader in every good work. Genial, warm-hearted, and generous, he was a general favorite. In the year 1830 he received a call from the Presbyterian Church at Bound Brook, N. J., and, accepting the same, was installed pastor; and at that place, and in the Synod and the State of New Jersey, he left the impress of a pure and useful life. No minister of that State was more generally known or more universally respected. On all social occasions his presence was indispensable as the most agreeable and entertaining of men. As a member and officer of ecclesiastical bodies—whether General Assembly, Synod, or Presbytery—his great excellence of character and peculiar executive ability were illustrated. For a long time he was stated clerk of the New Jersey Synod, and a more faithful, popular, and accomplished servant never filled that office. His assiduity in the discharge of official duty, his punctuality in attendance, his perfect knowledge of the law and practice of the Church, and his clear, incisive, and able exposition of the constitution, which was always at his command, rendered him an authority in the courts of the Church. He was a model pastor, knowing all his people and their families. He called his own sheep by name; he carried them in his heart, and went about among them to do them good, for he was their trusted counsellor and confidential friend. He entered his pulpit with sermons thoroughly prepared, which he delivered with energy, life, and power. Even down to old age he was strong in the work of the ministry, and at seventy-five could outwork many of his younger brethren. As he drew near to fourscore, he resigned his pastoral charge, which he had held unbroken for forty-five years. In 1874 he removed to Athens, Ga., where in the home of his daughter he spent the calm and beautiful evening of a long, laborious, and honored life. He was a philosopher as well as a Christian, the divine presence being as real to him as the light of the sun; and living in that light, he was as ready to die as to live; for, "whether living or dying, he was the Lord's." He died at Athens, Ga., Jan. 12, 1879. (W. P. S.)

Rodigast, SAMUEL, rector of the gymnasium of the Gray Convent in Berlin from 1698 to 1708, and previously adjunct professor in the University of Jena. He was intimately acquainted with Philip J. Spener to the time

of his death, in 1705. His claim to recognition in this place lies in his having composed the hymn *Was Gott thut, das ist wohlgethan* (1675), which has become a classic, and is used wherever the German tongue is known. It was a favorite with Frederick William III of Prussia, and was rendered on the occasion of his funeral, June 11, 1840.

Rödiger, EMIL, doctor and professor of the Oriental languages at the University of Berlin, was born Oct. 13, 1801, at Sangerhausen. In 1821 he left the gymnasium at Halle, and entered the university for the study of theology and philology. In 1828 he commenced his lectures; in 1830 he was made extraordinary, and in 1835 ordinary, professor of Oriental languages. In 1860 he was called to Berlin, where he died, June 15, 1874. He was one of the first editors of the *Zeitschrift der deutschen morgenländischen Gesellschaft*, which review also contains a great many of his articles pertaining to Oriental literature. He wrote, *Commentatio, quo Vulgata Opinio de Interpretibus Arab. Libr. V. T. Histor. Refut.* (Halle, 1828):—*Chrestom. Syr. c. Gloss.* (ibid. 1838):—*De Origine et Indole Arabicæ Librorum V. T. Historicorum Interpretationis Libri Duo* (ibid. 1829). But his main work is his continuation of Gesenius's great *Novus Thesaurus Philolog.-criticus Lingue Hebr. et Chald. V. T.* (Lips. 1853). He also edited several editions of his *Teacher's Hebrew Grammar*. See *Literarischer Handweiser*, 1874, p. 236; Schneider, *Theologisches Jahrbuch*, 1875, p. 375 sq.; Winer, *Theologisches Handbuch*, i, 58; ii, 737; Fürst, *Bibliotheca Judaica*, iii, 162; Steinschneider, *Bibliographisches Handbuch*, p. 52 sq.; and Index to vol. i.—xxx of the *Zeitschrift der deutschen morgenl. Gesellschaft*. (B. P.)

Rodon. See DERODON.

Rodriguez, GIRÃO, called *Father João*, a Portuguese missionary, was born near Lisbon in 1559. He entered the Jesuit order in 1576, and in 1583 went to Japan, where he gave himself to the study of the language. He soon spoke the dialect of Nagasaki with fluency, received the protection of the government, and consequently escaped the persecutions to which the other missionaries were subjected. He returned to Europe late in life, and died in 1333. His principal work was printed at Nagasaki, and was entitled *Arte da Lingua do Japão* (1604). It was translated into French by Laudresse and annotated by Rémusat (1825). Rodriguez also wrote letters on the persecutions to which Christians were subjected in Japan, entitled *Cartas Annuas de Nanzuchich dos Annos 1604 e 1605*, transl. into Latin (Antw. 1611–12) and into Italian (1808–10):—*Annus de 1609 e 1610* (Rome, 1615). Some smaller works of Rodriguez appeared at Rome in 1615 and 1632. See Antonio, *Bibl. Hispana*; Pagès, *Bibliogr. Japonaise*.

Roe is properly the rendering in the A. V. of רֹעִי, *tsebiyah* (Cant. iv, 5; vii, 3), which is the fem. of רֹעִי, *tsebi*, the *Roe-buck* (so called from its *beauty*, Deut. xii, 15, 22; xiv, 5; xv, 22; 1 Kings iv, 23; elsewhere improperly "roe," 2 Sam. ii, 18; 1 Chron. xii, 8; Prov. vi, 5; Cant. ii, 7, 9, 17; iii, 5; viii, 14; Isa. xiii, 14; "beauty," 2 Sam. i, 19). These are the masculine and feminine appellations of an antelope, which was considered the very impersonation of beauty; and so, in the later Hebrew Scriptures, i. e. from Isaiah downward, it is always used in an abstract sense, and is rendered by such terms as "glory," "beauty," "ornament," "delight," etc. The word was not only found in the various Aramaean dialects of Western Asia, but has spread to nations where we should have little expected to find it, as those of the extreme south of Africa. Thus the elegant springbok of the Cape Colony (*Antelope euchore*), an animal nearly allied to the gazelles of Asia, is named *tsebi* by the Bechuanas, and *tsebe* by the Caffres. The Sept. generally renders the word by *δορκας*; and this is given in the New Test. as the Greek equivalent of the Syriac *tabitha*

(Acts ix, 36), which is but the feminine form with the *ts* softened to *t* by the dropping of the sibilant.

The animal in question is the dorcas gazelle of the modern Orientals (*Antilope dorcas*), the most abundant of all the ruminants inhabiting Palestine and its vicinity in a state of freedom. It appears to be replaced in the surrounding regions by what some naturalists consider as distinct, though closely allied, species, and others are disposed to view as only local varieties of the same. Thus in Asia Minor, extending southward into Syria and eastward into Central Asia, there is the ahu (*Antilope subgutturosa*), with rather stouter horns than the

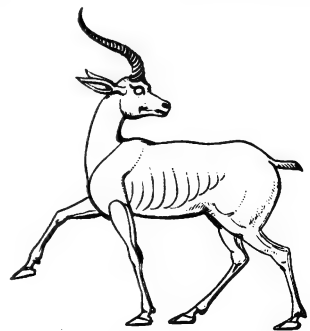

Roebuck (*Antilope dorcas*).

gazelle; in Western India the kalsepi (*A. Bennettii*, Sykes; *A. cora*, H. Smith), closely like the gazelle, but higher on the limbs, with the tail entirely black, and scarcely gregarious; all along the eastern shore of the Red Sea lives the ariel gazelle (*A. Arabica*), scarcely to be distinguished from *A. dorcas* except by being somewhat darker in color, and usually a little slighter in form. On the continent of Africa we have, in the north of Abyssinia, the *A. Sæmmeringii* of Rüppel, an animal considerably larger than the gazelle, with boldly lyrate horns, and associating in pairs; on the western side of the desert, the kevel (*A. kevelu*), nearer the gazelle, but with the horns compressed, more annulated, and lyrate; and, finally, in the southern half of the continent, the springbok (*A. euchore*) and the blebok (*A. pygarga*), large species with lyrate horns, and the sides and flanks marked with conspicuous dark bands, which enclose a white patch on the buttocks. These merge into another group, chiefly inhabiting North Africa, containing the mhor and the addra. See PYGARG. Of all these species the *tsébi* properly includes only the *A. dorcas* and *A. Arabica*; and in all probability these were not distinguished, but supposed. Stanley (*Syr. and Palest.* p. 207) says that the signification of the word Ajalon, the valley "of stags," is still justified by "the gazelles which the peasants hunt on its mountain slopes." Thomson (*Land and Book*, i, 252) says that the mountains of Naphtali "abound in gazelles to this day." See ANTELOPE.

So elegant is the form, so light and slender the limbs, so graceful the movements, so shy and timid the disposition, of the gazelle that the Oriental genius has ever delighted to make it the representative of female loveliness. The eye in particular is large, soft, liquid, languishing, and of the deepest black—qualities which are so admired in the eyes of an Oriental woman that to say "she has the eyes of a gazelle" is the most flattering compliment that can be paid to beauty. The poetry of the Arabs and Persians is full of such allusions, while the lightness and fleetness of the creature afford similes by which to illustrate the activity and grace of the youthful man. David, in his exquisite elegy on the death of Saul and Jonathan, calls his friend "the gazelle

of Israel" (2 Sam. i, 19); and in the Song of Songs the comparison is frequently interchanged between the bridegroom and the bride. What can be more exquisite than the compound simile in ch. iv, 5? Ashael, the brother of Joab, was "as light of foot as one of the gazelles in the field" (2 Sam. ii, 18); and the Gadites who gathered to David in the wilderness were "men of might, . . . whose faces were like the faces of lions, and who were as swift as gazelles upon the mountains" (1 Chron. xii, 8). The gentle Tabitha of Joppa, the loving and beloved (Acts ix, 36), was doubtless so named because of her beauty, real or fancied. The gazelle was permitted to be eaten by the law of Moses, as it is a typical ruminant. It seems to have even been a standard of lawful and proper food—"Thou mayest eat flesh, . . . even as the gazelle . . . is eaten" (Deut. xii, 15, 22). Whereas hitherto they had eaten the flesh of their flocks and herds only on occasions of these being offered in sacrifice, now that they were about to become a settled and an agricultural people, they might kill and eat their domestic animals without any such restriction, as freely as they had been accustomed to eat the gazelles which they took in hunting. It is probable that this animal formed a considerable portion of the animal food of the Hebrews, not only in their desert wanderings, but before and after their captivity in Egypt. The venison which Isaac loved, and which Esau took with his quiver and his bow, and which could not be distinguished from kid when this latter was suitably dressed (Gen. xxvii), was doubtless the flesh of the gazelle. To this day the valley of Gerar and the plains of Beersheba are the haunts of vast flocks of these agile creatures, and still the pastoral Arabs hunt them there and make savory meat. See GAZELLE.

The paintings of ancient Egypt present us with numerous examples of gazelle-hunting. Sometimes a battue is depicted, in which all the game of the country is driven before the hounds. In such scenes the great predominance given to the gazelle shows how large a proportion this animal bore to other quarry. Sometimes the capture of the wild animal alive was the object desired; in this case it was either trapped or snared in some way, or shot with blunt-headed arrows, and the hunter is seen leading home the gentle gazelle by the horns. Occasionally, too, this was accomplished by throwing the lasso, as wild horses are now taken on the South American pampas. Large herds of gazelles were kept by the Egyptian land-holders in their parks and preserves, like deer with us. Frequently, however, the hounds, which were held two or three in leash, were loosed after the fleet-footed antelope, and pulled it down by sheer running, the hunter running on foot, which implies that the course could not have been long. At present, however, though large herds of gazelles are common enough, and the sport of chasing them is as keenly relished as ever, no breed of dogs cultivated in the East has a chance of bringing one down in a fair open run. They are hunted by the Arabs with a falcon and a greyhound. The repeated attacks of the bird upon

Roebuck (from the Assyrian Sculptures, British Museum).

the head of the animal so bewilder it that it falls an easy prey to the greyhound, which is trained to watch the flight of the falcon. Many of these antelopes are also taken in pitfalls, into which they are driven by the shouts of the hunters. (See Addison, *Damascus and Palmyra*, ii, 340; Kitto, *Phys. Hist. of Palest.* p. 392; and Burckhardt, *Notes*, p. 220.) The group of antelopes to which this article is devoted, generically named *Gazella* by some naturalists, is thus characterized: the horns, which are permanent, and present in both sexes, are lyrate, with solid bony cores. The lachrymal sinuses are distinct and movable, the interdigital pits and inguinal pores are large. The knees are generally furnished with tufts of hair. A dark streak runs through the eye. The inside of the ear is marked with lines, occasioned by the alternation of bands of white hair; the color of the sides and flanks, some hue of warm brown, is separated from the white of the belly by a dark line. The nose is sheep-like. See Tristram, *Nat. Hist. of the Bible*, p. 127 sq.; *Bible Educator*, ii, 135. See DEER.

In Prov. v, 19, the word *Roe* represents the Heb. *yaa-lah'*, צִיִּילָה, properly the female ibex or young she-goat; here used as an epithet for a lovely woman (Bochart, *Hieroz.* i, 899; Gesen. *Thesaur.* s. v. צִיִּילָה). See GOAT.

YOUNG ROE in the Song of Solomon (iv, 5) stands for the Heb. *o'pher*, צִיִּילָה (from the root *aphar'*, אָפַר, to be *whitish*), the Arabic *algophro*, which denotes the calf or fawn of a stag (*ail*). It occurs in no other book of Scripture, is unknown in the Syriac and Chaldee, and appears to be only a poetical application of a term more strictly belonging to fawn-like animals; for in the above passage it is applied to couples feeding in a bed of lilies—indications not descriptive of young goats or stags, but quite applicable to the Antilopine groups which are characterized in Griffith's *Cuvier*, in subgenus *X Cephalophus*, and in XI *Neotragus*, both furnishing species of exceeding delicacy and graceful diminutive structures, several of which habitually feed in pairs among shrubs and geraniums on the hilly plains of Africa. And as they have always been, and still are, in request among the wealthy in warm climates for domestication, we may conjecture that a species designated by the name of *Opher* (צִיִּילָה, perhaps alluding to אֹפִיר, Ophir, or even Africa) was to be found in the parks or royal gardens of a sovereign so interested in natural history as Solomon was, and from the sovereign's own observation became alluded to in the truly apposite imagery of his poetical diction (Cant. iv, 12). Among the species in question, in which both male and female are exceedingly similar, and which might have reached him by sea or by caravan, we may reckon *Cephalophus Grinnia*, *C. perpusilla*, *C. philantomba*, all marked by a small black tuft of hair between their very short horns; as also the *Neotragus pygmaea*, or guevei, the smallest of cloven-footed animals; and the madolka, with speckled legs; all these species being natives of Central Africa, and from time immemorial brought by caravans from the interior for sale or presents. See HINN.

Roe, Azel, D.D., a Presbyterian minister, was born at Setauket, Long Island, N. Y., Feb. 20, 1738. He was graduated at the College of New Jersey in 1756, and studied theology under Rev. Caleb Smith, of Newark Mountains (now Orange), N. J. He was licensed to preach by the New York Presbytery in 1759 (or 1760), and was ordained *sine titulo* by the same presbytery about two years after. In the autumn of 1763 he was installed pastor at Woodbridge, N. J. During the Revolution he proved himself an earnest friend of the colonies. Mr. Roe was trustee of the College of New Jersey for twenty-nine years (1778-1807), a member of the first General Assembly in 1789, and moderator of that body in 1802. He was made doctor of divinity by Yale College in 1800. He died of an affection of the throat,

Dec. 2, 1815. See Sprague, *Annals of the Amer. Pulpit*, iii, 232.

Roe, Charles A., a minister of the Methodist Episcopal Church, was converted at an early age, and received his license to preach when about twenty-three years old. In 1853 he was received on probation in the Rock River Conference, in which he labored until the conference of 1857 granted him a supernannuated relation, which he sustained until his death by consumption. Sept. 27, 1859. See *Minutes of Annual Conf.* 1860, p. 330.

Roebuck. See ROE.

Roebuck, J. H., a minister of the Wesleyan Methodist Association, was born in Leeds, England, Feb. 14, 1816. He was awakened at about the age of fifteen years, and when nineteen years of age he was appointed to the Sheffield circuit. While laboring in Manchester he had a public debate with Robert Owen, the founder of socialism, in which he showed great skill. Removing to Glasgow, he still continued his services against Owenism, and was very successful in his ministerial labors. He died Dec. 20, 1840, of disease of the throat. He conducted for a time *The Temperance Journal*. See Simpson, *Cyclop. of Methodism*, s. v.

Roëh. See HAROËH.

Roell, HERMAN ALEXANDER, a celebrated Protestant divine, was born in 1653 at Doëlbeg, Westphalia. He studied first at Unna and then at Utrecht, but upon the breaking-out of the war he was obliged to go to Göttingen. This place becoming unsafe, he returned to Germany, studied at Marburg, and afterwards at Heidelberg. He then went to Basel and Zurich, and in 1676 he again visited the United Provinces, spending two years at the universities of Utrecht and Leyden. He became chaplain to Elizabeth, abbess of Hervorden, and held that position until her death in 1680, when he was appointed preacher to Albertine, princess of Orange. In 1686 he was elected professor of divinity at the University of Franeker, and in June, 1704, was appointed to the divinity chair of Utrecht, which he retained with great reputation until his death, July 12, 1718. Among his publications are, *Commentarius in Principium Epistolæ Pauli ad Ephesos* (Utrecht, 1715, 4to):—*a Continuation*, with *An Eregesis on Colossians* (ibid. 1731, 4to):—*Explicatio Catecheseos Heidelbergensis* (ibid. 1728):—*Eregesis in Psalmum lxxix* (Duisburg, 1728, 8vo):—*Gulichii Analysis et Compendium Librorum Prophetarum*, etc. (Amherst, 1683, 4to):—*Oratio Inauguralis de Religione Rationali*. See Chalmers, *Biog. Dict.* s. v.; Hook, *Eccles. Biog.* s. v.

Roeska, in Norse mythology, was the sister of Thialfe and servant of Thor.

Rogatiāni, one of the numerous sects into which Donatism subdivided itself. They took their name from their leader, Rogatus, and flourished in Mauritania Cæsariensis (A.D. 372-373).

Rogation Days (Lat. *rogare*, to beseech) are the three days immediately before the festival of Ascension. About the middle of the 5th century, Mamertus, bishop of Vienna, upon the prospect of some particular calamities that threatened his diocese, appointed that extraordinary prayers and supplications should be offered up with fasting to God for averting those impending evils upon the above-mentioned days; from which supplications (called by the Greeks *litānies*, by the Latins *rogations*) these days have ever since been called *Rogation days*. The calamity referred to was a terrible fire which raged in the city of Vienne, Dauphiny, and which suddenly went out in answer to the prayers of the bishop. The same result followed his supplications on the occurrence of a second great fire. Such is the assumed miracle (Thompson, *Philos. of Magic*, ii, 291). At the time of the Reformation these days were continued for the purpose of retaining the *perambulation* (q. v.) of the circuits of parishes. In the Church of England it has

been thought fit to continue the observance of these days as private fasts. There is no office, or order of prayer, or even a single collect, appointed for the Rogation days in the Prayer-book; but there is a homily appointed for Rogation week, which is divided into four parts, the first three to be used on the three Rogation days, and the fourth on the day when the parish make their procession. The days were called in Anglo-Saxon *gang daegas*; the old form of the name, "gang days," still lingering in the north of England. There was considerable opposition to the observance of rogations during the fifty days between Easter and Pentecost—a time which was one continued festival in the early Church. The Eastern Church does not keep Rogationtide, and even drops the fasts of Wednesday and Friday during the fifty days. See Bingham, *Christian Antiq.* xxi, 2, 8; Blunt, *Dict. of Theol.* s. v.; Eden, *Theol. Dict.* s. v.; Hook, *Church Dict.* s. v.

Rogation Sunday, the Sunday immediately preceding Rogation days (q. v.).

Rogation Week, the next week but one before Whit-Sunday. See ROGATION DAYS.

Rogda, in Slavic mythology, was a Russian hero who slew the serpent's son Tugarin of Bulgaria, invincible to any person born of a woman. Tugarin intended to challenge the prince Vladimir to mortal combat because he had married Lepa, daughter of the king of the Bulgarians, against her father's will, and Lepa made known the secret of Tugarin's invulnerability to her husband. Rogda, who had been taken from his mother's womb by means of an incision made after her death, went forth and successfully encountered the giant.

Rogel. See EN-ROGEL.

Ro'gelim (Heb. *Rogelim'*, רֹגְלִים, *treaders*, i. e. *fullers*; Sept. *Ῥωγέλιμ*), a place in Gilead, the residence of Barzillai (2 Sam. xvii, 27; xix, 31). It is possibly the present *Ajlūn*, the principal village of Jebel Ajlūn, on a wady of the same name, between Jerash and ed-Deir (Jabesh-Gilead).

Roger of HEXHAM. See RICHARD.

Roger of HOVEDEN, an English historian and professor of theology, was born in Yorkshire, and lived beyond 1204, but the exact periods of his birth and death are not known. He is said to have been employed by Henry II in confidential services, such as visiting monasteries. He was by profession a lawyer, but was in the Church, and also a professor of theology at Oxford. After Henry's death he applied himself diligently to the writing of history, and composed annals from 731, where Bede left off, to 1202, the third year of king John. These annals were first published by Saville among the *Historici Anglici* (1595; reprinted, Frankfurt, 1601, fol.). Vossius says that he wrote also a history of the Northumbrian kings and a life of Thomas à Becket.

Roger of WENDOVER, an ancient English historian, of whom little is known, embraced the monastic life in the Abbey of St. Alban's, and died May 6, 1237. He published *Rogeri de Wendover Chronica, sive Flores Historiarum* (formerly ascribed to Matthew Paris), translated from the Latin by J. A. Giles (Lond. 1849, 2 vols. 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Roger, ABRAHAM, a Protestant minister, who embarked for the East Indies about 1640, and was pastor at the Dutch factory, Palicat, on the Coromandel coast, for ten years. He died about 1670. From the intercourse he had with the Brahmins he has given a valuable account of their religion and customs—*La Vraye Représentation de la Religion des Bramines* (Amherst, 1670, 4to).

Rogereens, so called from John Rogers, their chief leader. They appeared in New England about 1677.

The principal distinguishing tenet of this denomination was, that worship performed the first day of the week was a species of idolatry which they ought to oppose. In consequence of this they used a variety of measures to disturb those who were assembled for public worship on the Lord's day.

Rogers, Daniel, a Puritan divine, was born in 1573, and was educated at Christ's College, Cambridge, of which he was chosen fellow. He became minister of Haversham, Buckinghamshire, and afterwards of Weathersfield, Essex. His death took place in 1652. His publications are: *David's Cost* (Lond. 1619, 8vo):—*Practical Catechism* (ibid. 1633, 4to; 1640):—*Baptism and the Lord's Supper* (3d ed. ibid. 1635, 4to; again, 1636):—*Matrimonial Honor* (ibid. 1642, 4to):—*Naaman the Syrian* (lectures on 2 Kings v, 9-15) (ibid. 1642-50, fol.):—*Predication concerning King Charles I and Archbishop Laud* (ibid. 1692). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rogers, Elymas P., a Presbyterian minister, was born in Madison, Conn., Feb. 10, 1815. Though reared in humble life, he had devoted Christian parents; they being poor, however, and unable to support their large family, when nine years of age he was sent to live with strangers, and, being the only colored boy in the neighborhood, was looked down upon by those who were prejudiced against his race. His meagre advantages for gaining an education were thereby lessened and his difficulties increased. He returned home in his fifteenth year, and labored with his father until he accepted a situation in the family of major Caldwell, of Hartford, Conn., who wanted a person who would work for his board and have an opportunity of going to school. In 1833 he became a communicant of the Talcott Street congregation in Hartford, Conn. Now he determined to study for the ministry, and in 1836 entered the Oneida Institute in Whitesborough, N. Y., where he remained five years, teaching for his support during the winter, and studying for the ministry during the other portions of the year, until he graduated in 1841. He immediately removed to Trenton, N. J., as principal of the public school for colored children, and there he continued the study of theology under the care of the late Rev. Dr. Eli F. Cooley and the Rev. Dr. John Hall. He was licensed by New Brunswick Presbytery Feb. 7, 1844, and in 1845 was ordained and installed as pastor of the Witherspoon Street Church, Princeton, N. J. In 1846 he became pastor of the Plane Street Church, Newark, N. J., where he continued to preach until Nov. 5, 1860, when he went to Africa, with the object of travelling in the interests of the African Civilization Society, and while engaged in this work, died at Cape Palmas, Jan. 20, 1861. Mr. Rogers was a man of fine gifts, and remarkable poetic talent. Dr. Maclean, ex-president of the College of New Jersey, says of him, "This truly good man ought to be held in respect by all who have any regard for simple and unaffected piety. My estimate of his character was a high one." He wrote a large number of temperance hymns and two poems, one, *The Repeal of the Missouri Compromise Considered*; the other, on *The Fugitive-Slave Law*. He published a *Thanksgiving Sermon, and Dangers and Duties of Men of Business* (Phila. 1835, 8vo). See Wilson, *Presb. Hist. Almanac*, 1862, p. 191. (J. L. S.)

Rogers, Ezekiel, a Congregational minister, was born at Weathersfield, Essex, England, in 1590. He took the degree of B.A. at Benet College in 1604, and that of M.A. at Christ's College in 1608, becoming the chaplain of Sir Francis Barrington at Hatfield, Essex. After five or six years, Sir Francis bestowed upon him the benefice of Rowley, Yorkshire, where he exercised his ministry for about twenty years, when he was silenced for nonconformity, though he was allowed the profits of his living for two years longer, and the privilege of nominating his successor. Restless under the

restraints upon his liberty, Mr. Rogers came to America in 1638, where he commenced a new settlement in April, 1639, and was ordained in the following December. He continued to labor in this parish until his death, Jan. 23, 1660. Mr. Rogers gave his library to Harvard College, and his house and lands to the town of Rowley for the support of the Gospel. See Sprague, *Annals of the Amer. Pulpit*, i, 120.

Rogers, George, an English clergyman, was born in 1741, and was for more than fifty years rector of Sproughton, near Ipswich. He published a *Sermon* (1790, 8vo):—*Five Sermons* (1818, 12mo); and edited, with a memoir, the *Sermons of Rev. Edward Evanson* (1806, 2 vols. 8vo). See *Gentleman's Mag.* 1836, i, 555; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rogers, George W. T., a minister of the Methodist Episcopal Church, was born in Holderness, N. H., Feb. 2, 1812, and was converted March, 1830, joining the Church in 1832. He preached his first sermon as local preacher in 1838, and, after preparation, entered the regular work in 1843. In 1864 he became supernumerary, in 1865 effective, in 1867 superannuated, and died at the house of his son in Salem the next year. See *Minutes of Annual Conferences*, 1869, p. 104.

Rogers, Hester Ann, an eminent saint in the early annals of Methodism, was born in Macclesfield, England, in 1756. Her father, a pious man, died when she was but nine years old, and his peaceful end made an indelible impression upon her mind. She was at first greatly prejudiced against the Methodists; but her interest in them was aroused by hearing one of their preachers, and, although her mother threatened to turn her out of doors in consequence, deepened, until, on a visit of Mr. Wesley to her native place in her twentieth year, she fully joined them. Her maiden name was Roe, and in 1784 Wesley promoted her marriage with James Rogers, one of his most effective preachers, with whom she lived happily, occupied in all evangelical labors, until her death, Oct. 10, 1794, soon after the birth of her fifth child. She was a model of Christian purity and zeal, filling the office of female class-leader, and often addressing public congregations with remarkable pathos and power. For twenty years she had been a witness of the experience of perfect love. Her *Journal* had been published, also her *Life*, as a part of Methodist literature. See also Stevens, *Women of Methodism*, p. 98 sq.; Simpson, *Cyclop. of Methodism*, s. v.

Rogers, Isaiah P., a minister of the Methodist Episcopal Church, was converted in the autumn of 1840, and soon after joined the Church. In July, 1846, he was received on trial in the Maine Conference; and when the conference was divided, August, 1848, he became a member of the East Maine Conference. He was superannuated June 20, 1849, and held that relation until his death, at Benton, Me., June 20, 1852. See *Minutes of Annual Conferences*, 1852, p. 80.

Rogers, John (1), an English divine and martyr, was born about 1500. He was educated at Cambridge, where he entered holy orders, and was appointed chaplain to the English factory at Antwerp, where he remained several years. There he met Tyndale and Coverdale, through whom he was led to renounce popery. He married at Antwerp, and became pastor of a congregation at Wittenberg, which office he retained until the accession of Edward VI. In 1548 he returned to England, invited by bishop Ridley, and was presented with the rectory of St. Margaret Moyses and the vicarage of St. Sepulchre's, both in London, May 10, 1550. Bishop Ridley made him a prebendary of St. Paul's, St. Pancras, and rector of Chigwell, Aug. 24, 1551, and, later, divinity-reader. On the Sunday after the entry of queen Mary into London (Thursday, Aug. 3, 1553), he denounced Romanism at St. Paul's Cross, urging the people to continue steadfast in the doctrines taught in king Edward's day. For this he was summoned before the privy council, but defended himself so ably that he

was released. On Aug. 18 he was ordered to remain a prisoner in his own house at St. Paul's, from which he refused to make his escape, though frequently urged. After six months he was removed to Newgate, where his confinement was aggravated by every species of severity. In January, 1555, he was tried before Gardiner, bishop of Winchester, and condemned to be burned at Smithfield, Feb. 4, which sentence he bore with great constancy and patience. He translated from Melancthon, *A Weighing and Considering of the Interim* (Lond. 1548, 16mo); and was compiler of the first authorized English Bible prepared from Tyndale's MSS., Coverdale's translation, published under the assumed name of Thomas Matthew: *The Byble, in which is contained the Olde and Newe Testaments, etc., by Thomas Matthew* (1537, fol.). It was printed by Grafton and Whitchurch, and copies are in the British Museum, Lambeth, Bodleian, St. Paul's, and other libraries. During his imprisonment, he wrote an account of his examinations, and also other papers, which were providentially preserved, and have been transmitted to the present time. They may be found in Fox's *Martyrology*, p. 415. See Chester, *Life of Rogers* (Lond. 1861, 8vo); Strype, *Cranmer*; *British Reformers*, vol. ix; also Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rogers, John (2), an English divine, was born probably in 1565, and is supposed to have been a grandson of the preceding. He was minister of Chacombe, Northamptonshire, from 1587 to 1620, the year of his death. His published work is a *Discourse on Christian Watchfulness*, etc. (Lond. 1620, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rogers, John (3), an English Puritan divine, was educated at Cambridge. He became vicar of Hemmingham in 1592, minister of Haverhill in 1603, and was afterwards minister of Dedham, Essex, where he died in 1630. His works are: *Sixty Memorials of a Godly Life:—Treatise of Love:—Doctrine of Faith* (Lond. 2d ed. 1627; 6th ed. 1634, 12mo):—*Exposition of First Epistle of Peter* (ibid. 1650, fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclopædium Bibliographicum*, s. v.

Rogers, John (4), a Congregational preacher, was born probably at Assington, England, and came with his father to New England in 1636. He was graduated at Harvard College in 1649, having studied medicine and theology. He was invited to preach at Ipswich in 1656, where he remained until he became president of Harvard College, August, 1683. He died July 2, 1684. See Sprague, *Annals of the Amer. Pulpit*, i, 147.

Rogers, John (5), a Congregational minister, and son of the preceding, was born July 7, 1666, was graduated at Harvard College in 1684, was ordained at Ipswich, Oct. 12, 1692, and died Dec. 12, 1745. His works are: *Death the Wages of Sin* (1701):—*Election Sermon* (1706):—*Sermon on the Death of J. Appleton* (1739). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Sprague, *Annals of the Amer. Pulpit*, i, 147.

Rogers, John (6), D.D., an English divine, was born at Ensham, Oxfordshire, in 1679, was educated at New College school, Oxford, and in 1693 was elected scholar of Corpus Christi College. After taking his degree in arts and entering orders, he waited for a fellowship, which he secured in 1706, but in the meantime had become vicar of Buckland, Berkshire. He took the degree of B.D. in 1710, was made lecturer of St. Clement's Danes in 1712, afterwards becoming lecturer of the united parishes of Christ Church and St. Leonard's, Foster Lane. In 1716 he became rector of Wrington, Somersetshire; prebend of Wells in 1718; subdean of the same in 1721; chaplain to George II, then prince of Wales; and vicar of St. Giles's, Cripplegate, London, October, 1728. He died May 1, 1729. He wrote, *The Visible and Invisible Church of Christ* (2d ed. Lond. 1719, 8vo):—*Necessity of Divine Revelation* (1727, 8vo):—*Sermons* (4 vols. 8vo). See Allibone, *Dict. of Brit. and*

Amer. Authors, s. v.; Chalmers, *Biog. Dict.* s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rogers, Joseph, a Presbyterian minister, was born in Wiveliscombe, Somersetshire, England, June 11, 1815. He emigrated to the United States at an early age, and settled in New York city. He was converted when about twenty-two years old, pursued his preparatory studies under Dr. Owen, of New York city, graduated at Princeton College in 1845, and at the Theological Seminary at Princeton in 1848, and was licensed to preach the same year by the Presbytery of New York. After leaving the seminary, he labored at May's Landing and Pleasant Mills, Atlantic Co., N. J., in the employment of the Board of Domestic Missions, until 1850, when he received an appointment to the Church of Round Prairie, Ia., over which he was installed pastor in 1851. In 1853, because of failing health, he returned East, and spent the succeeding four years in preaching and teaching in Attleboro', Pa.; Bridgeton, N. J.; the vicinity of Fredericksburg, Va.; and at Newtown, Pa. In 1857 he received a call to, and was installed pastor of, the churches of Kingwood and Frenchtown, N. J., where he continued to labor till his death, Aug. 20, 1863. Mr. Rogers was a diligent student, a ripe scholar, and of fine attainments in the different branches of a liberal education, especially in the Greek language and English literature. As a preacher he was naturally eloquent. See Wilson, *Presb. Hist. Almanac*, 1864, p. 192. (J. L. S.)

Rogers, Lorenzo, a minister of the Methodist Episcopal Church, was born in Orange County, Vt., March 12, 1804, and was converted in 1828. He entered the ministry in 1834, was superannuated by the Erie Conference in 1854, and died in Cleveland, O., Feb. 17, 1865. He was greatly influential in winning men to Christ. See *Minutes of Annual Conferences*, 1865, p. 131.

Rogers, Nathaniel, a Congregational minister, was born at Haverhill, Suffolk, England, in 1598. He was educated at Emmanuel College, Cambridge, and, after serving for two years as a domestic chaplain, became Dr. Barkham's assistant at Bocking, Essex, where he remained for five years; and obtaining the living of Assington, Suffolk, he continued there until June 1, 1636, when he sailed for New England, and arrived Nov. 16. He was ordained, Feb. 20, 1638, pastor at Ipswich; and died July 3, 1655. He published, *A Letter to the Hon. House of Commons at Westminster on the Subject of Reformation* (1643). See Sprague, *Annals of the Amer. Pulpit*, i, 87.

Rogers, Nehemiah, an English divine (said by some to have been a great-grandson of John Rogers the martyr), was born in 1594. He was minister of Dodinghurst, Essex, and died in 1660. He published, *Expositions of the Parables* (1620-62):—*Exposition of St. Luke* x, 5-11 (1658, 4to), and other works.

Rogers, Thomas (1), an English divine, was a native of Chelsea, and entered Christ Church in 1568. He was A.M. in 1576; chaplain to Bancroft, bishop of London, and in 1581 rector of Horingey, Suffolk, where he was held in great esteem. He died Feb. 22, 1616. Among his many works are, *The Anatomie of the Minde* (Lond. 1576, 8vo):—*Of the End of the World* (ibid. 1577, 4to; 1582, 1583, 8vo):—*The English Creede* (ibid. 1579, fol.):—*A Golden Chain Taken out of the Rich Treasure-house of the Psalms of David* (ibid. 1579, 1587, 12mo):—*Historical Dialogue touching Antichrist and Popery*, etc. (ibid. 1589, 8vo):—besides *Sermons*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rogers, Thomas (2), an English clergyman, was born in Warwickshire, Dec. 27, 1660, and was educated at the free school there. In Lent term, 1675, he entered Trinity College, Oxford, but soon after removed to Hart Hall, where he took the degree of A.M. and entered holy orders. In July, 1689, he became rector of Slapton, near Towcester, Northamptonshire. He died of small-pox, while on a visit to London, June 8, 1694, and was buried at St. Saviour's, Southwark. His writings were mostly

poetical and published anonymously, and were not at all becoming his character as a clergyman. We mention only, *Lux Occidentalis*, or *Providence Displayed in the Coronation of King William*, etc. (Lond. 1689):—*The Loyal and Impartial Satyr* (ibid. 1693, 4to):—*A True Protestant Bridle* (ibid. 1694, 4to):—*Commonwealth Unmasked*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Rogers, Timothy (1), an English clergyman, was born in 1589, became preacher of Essex, and died in 1650. He wrote, *Righteous Man's Evidences* (Lond. 1619, 8vo; 12th ed. 1637):—*Roman Eucharist* (ibid. 1621, 4to; 1631, 24mo):—*Good News from Heaven:—A Faithful Friend True to the Soul:—Christian's Jewel of Faith*. See Chester, *John Rogers* (1861), p. 275; also Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rogers, Timothy (2), a Dissenting minister, was born at Barnard Castle, Durham, England, about 1660. He was educated at one of the Scotch universities, became evening lecturer at a chapel in Crosby Square, London, and afterwards one of the ministers of a Dissenting congregation in Old Jewry, which office he resigned in 1707. He died in 1729. Among his works we notice, *Practical Discourses* (Lond. 1690, 8vo):—*Discourse concerning Trouble of Mind and the Disease of Melancholy* (ibid. 1691). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rogers, William, D.D., a Baptist minister, was born at Newport, R. I., July 22, 1751. He entered the Rhode Island College in 1765, and was licensed to preach in August, 1771. In May following he was ordained pastor of the Baptist Church in Philadelphia. In 1776 he became chaplain of the army of Pennsylvania, and from 1778 to 1781 he served as brigade chaplain in the Continental army. In March, 1789, he was appointed professor of English and oratory in the College and Academy of Philadelphia, and in April, 1792, was elected to the same office in the University of Pennsylvania. He was made D.D. by the latter institution in 1790, having previously received the degree of A.M. from Yale College in 1780, and from the College of New Jersey in 1786. From April, 1803, to February, 1805, he also acted as pastor of the First Baptist Church in Philadelphia. In January, 1812, he resigned his professorship and received a call from the Church in Newark, N. J., but finally declined it. In 1816 and 1817 he became a member of the General Assembly of the State of Pennsylvania. The latter years of his life were spent in retirement. He died April 7, 1824. Dr. Rogers published a number of sermons, letters, essays, etc. See Sprague, *Annals of the Amer. Pulpit*, vi, 145.

Rogers, William Matticks, a Congregational minister, was born on the island of Alderney, Sept. 10, 1806. His name was *Samuel M. Ellen Kittle*, which was changed to Rogers after he became a preacher. When ten years of age he was brought to the United States, and lived with his uncle, Capt. W. M. Rogers, at Dorchester. He graduated at Harvard College in 1827, studied theology at the Andover Seminary, became pastor of the Evangelical Congregational Church, Townsend, Mass., where he remained five years, and was installed, Aug. 6, 1835, pastor of the Franklin Street Church, Boston, and died Aug. 11, 1851. He published *An Address at the Dedication of the New Hall of Bradford Academy* (1841), and a couple of occasional sermons. See Sprague, *Annals of the Amer. Pulpit*, ii, 730.

Roh, Peter, a famous Roman Catholic missionary, was born in 1811 at Aven, in the canton Valais, in Switzerland. When eighteen years of age, he entered the Society of Jesus, and after completing his philosophical and theological studies at Fribourg he was appointed professor of dogmatics at the Seminary of Lucerne. Having received holy orders in 1840, he went to France, where he remained one year, at Notre Dame d'Ay. He

returned to Fribourg, where he lectured on dogmatics; and in 1847 he was appointed to a professorship at Lucerne, which he held only for a short time, being obliged to leave the country. He now went from place to place as a missionary preacher, finding everywhere a large congregation eager to listen to his powerful oratory. In 1856 he occupied the theological chair at Paderborn and Maria-Laach, and in 1860 he represented the bishop of Paderborn at the provincial council at Cologne. In 1866 he again resumed preaching, and in 1869 he accompanied the bishop of Paderborn to the Vatican council at Rome. He died May 17, 1872. He wrote, *Die Grundirrhümer unserer Zeit* (Fribourg, 1865):—*Das alte Lied: der Zweck heiligt die Mittel* (ibid. 1869, etc.). See *Regensburger Conversations-Lexikon*, s. v.; *Literarischer Handreiser*, 1872, p. 212. (B. P.)

Rohan, Armand de, called the *Cardinal de Soubise*, grand-nephew of Gaston, was born at Paris, Dec. 1, 1717. In 1736 he became abbé of St. Epre, and in 1737 abbé of Lure and Murback. March 21, 1739, he was elected rector of the faculty of arts at Paris, and in 1741 he was made doctor of the Sorbonne and member of the French Academy. Cardinal Rohan procured his appointment as his own coadjutor, with the title of bishop of Ptolemais. Benedict XIV created him cardinal April 10, 1747, when he took the title of Cardinal de Soubise, to distinguish himself from his grand-uncle; but he never went to Rome to receive the cardinal's hat. At the death of cardinal Rohan, he succeeded him in the see of Strasburg and in the office of grand almoner. He died at Saverne June 28, 1786. This prelate was distinguished for his charity, zeal, and sweet and simple manner.

Rohan, Armand-Gaston-Maximilien de, *Cardinal*, was born at Paris, June 26, 1674. In 1690 he was canon of Strasburg, and in 1701 was chosen coadjutor of the prince-bishop Egon of Fürstenberg, with the title of bishop of Tiberias *in partibus*. After the death of his superior he was titular of the diocese, in 1712 became cardinal, and grand almoner in 1713. He held several rich abbeys, and, without any literary qualifications whatever, was elected member of the French Academy. He was also master of the Sorbonne. By virtue of his birth, fortune, and high office, he took an important part in the negotiations for peace in the Church of France which occupied the latter part of the reign of Louis XIV; and his connection with father Tellier, confessor to the king, and with the cardinal de Bissy, bishop of Meaux, made him one of the chiefs of the Molinist party. In the assembly of the clergy of 1713 he used all possible means to gain their acceptance of the papal bull *Unigenitus*, and gained his cause during the next year. During the regency he endeavored to bring about a reconciliation among the bishops, and persuaded forty to sign an accommodation, which ended their quarrels. His library was one of the greatest in France, and was under the charge of the learned abbé Oliva. Cardinal Rohan died at Paris July 19, 1749. The only work of any account which he left is *Rituaire Argentinsene* (Strasburg, 1742). See *Gallia Christiana*.

Rohan, Armand Jules de, archbishop of Rheims, was born at Paris, Feb. 10, 1695. At an early age he entered the chapter of Strasburg, received in 1715 the abbey of Gard, and in 1730 that of Gorze. As the conclavist of cardinal Rohan, he assisted in the election of Innocent XIII, and was afterwards made bishop of Rheims (May 22, 1722). He was very active in favor of the bull *Unigenitus*. After consecrating Louis XV, he took a seat in Parliament as the first ecclesiastical peer, and gradually gave over the care of his diocese to vicars under the title of bishops *in partibus*. He died at Saverne Aug. 28, 1762. He published *Breviarium Remense* (Charleville, 1759).

Rohan, Ferdinand-Maximilien-Meriadec,

IX.—E

Prince of Guemené, brother of Louis, was born at Paris, Nov. 7, 1738. He studied at the Sorbonne, was prior of the faculty of theology, and received the degree of doctor. He was grand provost of the chapter of Strasburg and abbé of Mouzon, when in 1759 Louis XV gave him the archbishopric of Bordeaux. In 1781 he was transferred to the diocese of Cambrai, in 1790 was made regent of the principality of Liege, and took the civil oath. He returned to Cambrai in 1791, where he remained until 1801, when he resigned the archbishopric and became grand almoner to the empress Josephine. He died at Paris Oct. 30, 1813.

Rohan, Louis-René-Edouard, *Prince of Guemené*, a French prelate, was born at Paris, Sept. 25, 1734. His education was carried on at the College of Plessis and the Seminary of Saint-Magloire. In 1760 he was elected coadjutor to his uncle, the bishop of Strasburg, with the title of bishop of Canopus *in partibus*, in which position he showed more love for pleasure than zeal in religious exercises. Made member of the French Academy in 1761, he was in 1772 sent as ambassador to Vienna. Here he was at first received with great favor, but by his extravagant mode of life and interference in political affairs he fell under the displeasure of Maria Theresa, and at her request was recalled to France in 1774. After his return he was appointed grand almoner, in 1778 was made cardinal, and later master of the Sorbonne and bishop of Strasburg. In addition to these honors, he held several rich abbeys, but his large fortune was not in any way adequate to his scandalous luxury. In 1785 he was arrested and imprisoned in the Bastille for the part he had taken in the affair of the diamond necklace, which so gravely compromised Marie Antoinette. The friends of Rohan were indignant at the government, the clergy protested against his imprisonment, and at his trial he was finally acquitted, without even an expression of blame for his evident misconduct. But he could not recover from the disgrace of his dismissal from court, and retired to his diocese of Strasburg, where he lived in comparative quiet for a few years. In 1789 he was deputy of the clergy of Hagenau to the States-general, but, being accused of disloyal conduct, resigned his seat. In order to be out of the jurisdiction of the French government, he retired to a part of his diocese beyond the Rhine, and finally, in 1801, in consequence of the concordat, resigned the bishopric of Strasburg entirely. He died at Ettenheim, Feb. 17, 1803. The cardinal de Rohan was a man of fine appearance and agreeable manners. It is not to be denied that he had a fine mind and great amiability, but he possessed no judgment, put no check upon his passions or conduct, and was weak and easily led by favorites. See *Mémoire de l'abbé Georgel*; Levis, *Souvenirs*.

Roh'gah (Heb. *Rohgah'*, רֹהֵגַח, also written רֹהֵגַח, *clamor*; Sept. *Pooyá* v. r. *Oupaoyá*), the second named of the four sons of Shamer, of the tribe of Asher (1 Chron. vii, 34), and fifth in descent from that patriarch. B.C. perhaps cir. 1658.

Rohini, in Hindû mythology, is the name of one of the daughters of Daksha, said to be the favorite wife of Chandra (or the Moon, which in Sanscrit, as in German, is masculine). She is the bright star of the Bull's eye, called in Arabic Aldebaran (or Al Dabarân). Other stars regarded as the sisters of Rohini are also numbered among the wives of Chandra.

Röhr, JOHANN FRIEDRICH, a prominent rationalist, was born July 30, 1777, at Rossbach, on the Saale, of humble parents, and early displayed mental qualities which induced his friends to provide him with opportunities for study. He was thus enabled to enter Leipzig University as a student of theology, and while there attended the lectures of Platner and Keil, and employed his mind in the examination of Kant's philosophy. Reinhard examined him for ministerial license, and recommended

him as assistant preacher to the University Church. Transferred in 1802 to Pforta, he engaged in the study of modern languages, particularly English, and published a tabular view of English pronunciation (1803). Unpleasant relations with his colleagues led to his removal in the following year (1804). He next became pastor at Ostrau, near Zeitz, and remained in that station during sixteen years, at the end of which period he was called to be chief minister at Weimar; and to that position the government added the dignities of court preacher, ecclesiastical councillor, and general superintendent for the principality of Weimar, his duties, in addition to those connected with his relation to his parish, including general visitations, examinations, inspection of the Weimar Gymnasium, and the filling of appointments. He held these positions from 1820 to 1848, when he died.

Röhr's historical significance grows out of the energy with which he asserted the theological position of vulgar rationalism. His views were for the first time presented in a connected scheme in *Briefe über den Rationalismus*, etc. (Zeitz, 1813), whose train of ideas may be summarized as follows: Religious truth may be ascertained from revelation or from reason, the latter term denoting the natural, not cultured, judgment of the mind. If such truth is grounded on reason, the system of rationalism or naturalism will result, which is the only tenable system. This rationalism rejects all religious teachings which have not universal authority and a strict adaptation to moral ends; for the ultimate end of religion is a pure morality. There is in Christianity a theology or doctrine respecting God, and an anthropology or doctrine respecting man in his intelligent and moral nature, and also in his sensuality and consequent depravity; but it does not properly include a Christology, since opinions respecting the first expounder of a universal religion can form no part of that religion. Stripped of all additions to his personality made by the evangelists, Christ is simply a man, though the greatest, and even a unique, man. A subsequent work, entitled *Grund- und Glaubenssätze d. evang.-prot. Kirche* (1832), was intended to unite the Church for its protection against its Roman Catholic, and still more against its pietistic, adversaries, and to that end was sent to a number of theological faculties for their approval. The effort failed, however, even Röhr's fellow-rationalists refusing to endorse his purpose. In the second and third editions (1834, 1844), he gave a summary of the essential teachings of the Gospel in specifically Christian language. There is a true God, who is proclaimed to us by Jesus Christ, the only begotten Son, and who deserves our profound veneration because of his perfections. This veneration can be truly rendered only by the cultivation of a sincerely virtuous character and life, and for this work we may hope for the aid of the Divine Spirit. As God's children, we may confidently look for his help in earthly troubles, and in the consciousness of moral weakness and unworthiness we may look for grace and mercy through Christ; while in death we may be assured of undying continuance and a better, retributive life.

It is needless to add that throughout his official life Röhr was engaged in controversy with the orthodox theologians of his time, e. g. Reinhard, Harms, Hahn, Hengstenberg, Sartorius, etc., whom he accused of literalism, want of progressiveness, and similar offences. He was utterly incapable of appreciating the aims of such spirits as Schleiermacher, Twisten, etc., in the direction of a higher development within the limits of Protestant freedom; and in consequence of this incapacity, he blundered into a dispute with Hase on the occasion of the appearance of the *Hutterus Redivivus* written by the latter, which Hase ended by clearly demonstrating that the "rationalism of sound reason" is utterly unscientific and has no regard for the facts of history. His peculiar views and tempers are reflected also in his sermons. The moral element predominates, of course,

and the supernatural is reduced to natural proportions. His *Christologische Predigten* (Weimar, 1831, 1837) are not Christological in character, exhibiting Jesus simply as "the pattern and example of true culture," etc. His casual sermons, however, sometimes present all the characteristics of truly religious discourse. His published homiletical works are very numerous.

In addition to the works already mentioned, we notice the *Kritische Prediger-Bibliothek*, which under various names he edited from 1810 to 1848:—*Palästina zur Zeit Jesu* (Zeitz, 1816; 8th ed. 1845):—*Luther's Leben u. Wirken* (ibid. 1817; 2d ed. 1828):—*Die gute Suche d. Protestantismus* (Leips. 1842), and others.

Rohumon, the great serpent, an idol of the Caribbeans.

Ro'imus (Ροῖμος), a Jew who returned to Jerusalem from Babylon with Zerubbabel (1 Esdr. v. 8); evidently the REHUM (q. v.) of the Heb. texts (Ezra ii. 2; Neh. vii. 7).

Rok, or Roc, in Persian mythology, was an immense bird, so large that it bore elephants to its young in the nest. An egg of this monster once fell from its nest on the Alborz, and with its fluid overflowed thirty-six towns and villages. Legends resembling this fable are met with everywhere; but it is remarkable that the inhabitants of Greenland are said to make use of very powerful bows, each formed of two claws of some gigantic bird, which are often found in the ice. It would accordingly seem that not everything said with regard to the rok is fable. There have been mammalia and amphibia whose size far exceeded that of any similar animals of our æra; and there may, in like manner, have been birds which could as readily bear away a camel as the condor can a young llama.

Roland, in Frankish legends, was a celebrated hero belonging to the circle of Charlemagne's paladins. He was of enormous size, and so strong that he could pull up the tallest pine by the roots, and use it as a walking-stick and club. His sword split a block of marble without injuring its edge. The numerous Roland columns found in the towns of North Germany are said to have been erected by Charlemagne in honor of this hero; but they are probably of much later origin, and served to designate the place where justice was administered in the emperor's name, so that they were in some sense his representatives.

Roldan, Luisa, daughter of the following, was born in 1654, and became a distinguished artist. She assisted her father in many of his works, was pensioned by Philip IV, and confided with much of the work upon the Escorial. Her principal productions are the statues of *Mater Dolorosa*, *John the Evangelist*, and *St. Thomas*. She died at Madrid in December, 1704.

Roldan, Pedro, a Spanish sculptor, was born in 1624 at Seville. He studied at Rome, where he was a member of the Academy of St. Luke. Roldan executed a great number of works in Madrid and at Seville, the best of which is a *Christ on the Cross*. He died in 1700.

Rolf, in Norse mythology, was one of the most celebrated kings of Denmark, who was induced to adopt the surname *Kraki* by the following occurrence. A poor youth named Voeggur went to the palace and looked steadily at the king, until asked why he gazed so long, when he responded that he had heard that Rolf was the greatest man in Northland, but that he found the throne occupied by a Kraki (diminutive wight). Rolf responded, "Thou hast given me a name, now give me a present" (which always accompanied the bestowal of a name). Voeggur declared that he had nothing to give. "Then," said Rolf, "I, who have possessions, will give a present," and he handed over a ring of gold, on receiving which Voeggur joyfully exclaimed, "Lord, I will avenge thee should any come near to thee in malice!"

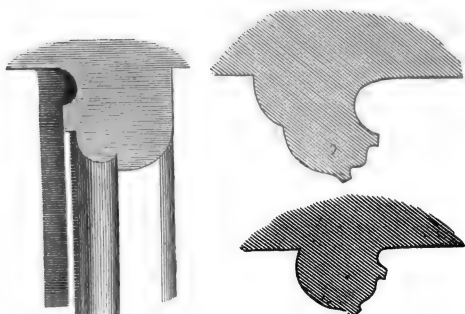

The king's reply to this—"Voeggur is pleased with a little matter"—became proverbial. The armies of Rolf Kraki were celebrated, especially the twelve Berserkers (according to others, eleven, himself being the twelfth), whom he once sent to assist his stepfather Adils, king of Sweden, against Ali, king of Norway. After gaining the victory, Adils refused to give the promised reward to either the Berserkers or king Rolf. The latter, accompanied by the Berserkers, accordingly visited the court of Adils and reminded him of his pledge. Adils invited the guests to a friendly banquet in the largest hall of his palace, in the centre of which he caused an immense fire to be built, and then reminded Rolf and the Berserkers that they had vowed never to flee from either fire or water. The fire eventually seized Rolf's clothing, on which he rose, threw his shield into the flames, and passed through them with his companions, while he exclaimed, "He, surely, does not dread the fire who voluntarily rushes into it!" He then seized the servants who had kindled the fire and threw them into it, and emphatically demanded his pay. He obtained the ring Sviagris and a mighty horn filled with gold, and departed; but Adils rapidly assembled his warriors and followed in pursuit. To distract his pursuers, Rolf, having reached the heath of Fyriswall, scattered pieces of gold over the ground, and so actually delayed the pursuit; and when Adils approached him, he threw down the costly ring also. Adils dismounted from his horse to get the ring, and at this moment Rolf inflicted on the rear of his person a shameful wound, as he cried, "I have bent like a hog the richest man in Sweden." He then picked up the ring himself, and while the king's wound was bound up by his followers, succeeded in gaining the ships with his treasure and his mother, and returned to Denmark. From this incident gold was called Fyriswall seed, or Kraki's seed.

Rolin, JEAN, Cardinal, was born in 1408. At twenty-two he was canon and archdeacon. In 1431 he became bishop of Chalons, which see he exchanged in 1436 for that of Autun. He obtained the purple in 1449, and continued to add to the number of his benefices and lived in luxury. He gained possession by fraudulent means of the abbey of St. Martin at Autun in 1451, built the cathedral in that place and also the one at Chalons, both of which he enriched with works of art. He was confessor to the dauphin, afterwards Louis XI. He died at Auxerre July 1, 1483. See PERRY, *Hist. de Chalons*.

Roll (מִגִּילָה, *megillāh*; Sept. κεφαλὴ; but in Ezra vi, 1, the Chald. סֶפֶר, *sephār*, a book, as elsewhere rendered: in Isa. viii, 1, מִגִּילָוֹן, *gillayōn*, a tablet, once of a mirror, iii, 23). A book in ancient times consisted of a single long strip of paper or parchment, which was usually kept rolled up on a stick, and was unrolled when a person wished to read it. See BOOK. Hence arose the term *megillāh*, from *galāl*, "to roll," strictly answering to the Latin *volumen*, whence comes our *volume*; hence also the expressions, "to spread" and "roll together" (in Heb. פָּרַשׁ [2 Kings xix, 14] and כָּלַל [Isa. xxxiv, 4]; in Gr. ἀναπτύσσειν and πτύσσειν [Luke iv, 17, 20]), instead of "to open" and "to shut" a book. The full expression for a book was "a roll of writing," or "a roll of a book" (Jer. xxxvi, 2; Psa. xl, 7; Ezek. ii, 9), but occasionally "roll" stands by itself (Zech. vi, 1, 2; Ezra vi, 2). The κεφαλὴ of the Sept. originally referred to the ornamental knob (the *umbilicus* of the Latins) at the top of the stick or cylinder round which the roll was wound. The use of the term *megillāh* implies, of course, the existence of a soft and pliant material: what this material was in the Old-Test. period we are not informed; but, as a knife was required for its destruction (Jer. xxxvi, 23), we infer that it was parchment. The roll was usually written on one side only (Mishna, *Erub.* 10, § 3), and hence the particular notice of one that was

"written within and without" (Ezek. ii, 10). The writing was arranged in columns, resembling a door in shape, and hence deriving their Hebrew name (מִגִּילָה, *leaves*), just as "column," from its resemblance to a column, or pillar. It has been asserted that the term *megillāh* does not occur before the 7th century B.C., being first used by Jeremiah (Hitzig, in *Jer.* xxxvi, 2); and the conclusion has been drawn that the use of such materials as parchment was not known until that period (Ewald, *Gesch.* i, 71, note; Gesenius, *Thesaur.* p. 289). This is to assume, perhaps too confidently, a late date for the composition of Psa. xl, and to ignore the collateral evidence arising out of the expression "roll together" used by Isaiah (xxxiv, 4), and also out of the probable reference to the Pentateuch in Psa. xl, 7, "the roll of the book," a copy of which was deposited by the side of the ark (Deut. xxxi, 26).—Smith. The book of Esther is specially designated by the Hebrew term *Megillāh*. See MEGILLOTH.

Roll-moulding. This term has been popularly, but very incorrectly, given to a moulding much used in Decorated and late Early English work, especially in strings and dripstones. Its varieties are numerous, and though some of them bear resemblance to a roll of parchment, others are very different. Some of these varieties, in which the square fillet is more decidedly marked, have been called the "roll and fillet moulding." It is sometimes called the *scroll-moulding*, from its resemblance to a scroll of paper or parchment with the edge overlapping. The name of roll-moulding is often applied to the common round, or *bowtell*.

Roll and Fillet.

String, Dorchester, Oxfordshire.

Rolle, JOHANN HEINRICH, a German composer of church music, was born at Quedlinburg in 1718. He was the successor of his father as director of music at Magdeburg in 1752. He died in 1785. Among his principal works are the oratorios *Death of Abel* and *Abraham on Mount Moriah*.

Roller (Ezek. xxx, 21), *chittūl*, חִטְטִיל, a bandage, so called from being *wrapped* around a broken limb to keep the fractured parts in place till healed. So Rosenmüller explains the figure (*Scholia*, ad loc.). The roller, in surgery, is a long fillet or strip of muslin or other webbing rolled upon itself in a cylindrical form, employed to give mechanical support in many of the diseases and injuries to which the human body is liable. In the case of a broken arm, the surgeon brings the fragments of the bone together in normal position, and next places the limb in splints or stays lined with cotton, wool, or other soft material, to protect the flesh against unequal pressure, and then secures the whole by firmly winding the roller round and round the limb over the stays, so as to maintain the broken ends of the bone in coaptation until the process of ossific reunion is completed. The familiar manner of this incidental reference shows that the practice of the present enlightened surgery was known to the profession in the days of Ezekiel. The name used to designate this bandage not only implies the form giving the greatest facility to

its ready application, but is the very word which scientific works of the present day employ to express the same thing. The object of this revelation, as it would seem, was not to impart information respecting the special contrivances of the healing art, but to present to the mind of the prophet the great prospective fact that the predicted disability of Pharaoh would be permanent, as one of the essentials to restorative treatment would be wanting.

Rollin, CHARLES, a French historian, who formerly enjoyed, if he did not merit, an extensive popularity, was the son of a cutler, and was born in Paris, Jan. 30, 1661. He studied at the Collège du Plessis, where, in 1683, he became assistant to the professor of rhetoric, and four years later obtained the chair for himself. In 1688 he was called to the chair of eloquence at the Collège Royal de France, and for some ten years he discharged the duties of his office with remarkable zeal and success. In 1694 he was chosen rector of the University of Paris, a dignity which he held for two years, and signalized his brief tenure of office by many useful reforms, both in regard to discipline and study, and by his warm defence of the privileges of the university. His efforts to revive the study of Greek, then falling back into neglect, were particularly creditable to him, although his career as rector constitutes perhaps his best claim to the regard of posterity, and has certainly left a more permanent impression than his writings, for its influence is perceptible even to the present day. In 1699 he was appointed coadjutor to the principal of the College of Beauvais; but was removed from this situation in 1712 through the machinations of the Jesuits, for Rollin was a strenuous Jansenist. For the next three years he devoted himself exclusively to learned study, the fruit of which was his edition of Quintilian (Paris, 1715, 2 vols.). In 1720 he was re-elected rector of the university, and in the same year published his *Traité des Études*, which M. Villemain has pronounced "a monument of good sense and taste," and which is justly regarded as his best literary performance, for his *Histoire Ancienne* (ibid. 1730-38, 12 vols.), though long prodigiously popular, and translated into several languages (the English among others), is feeble in its philosophy, jejune in its criticism, and often inaccurate in its narrative. Nevertheless, to multitudes both in this country and in France it has formed the introduction to the study of ancient history. Frederick the Great, then the prince royal of Prussia, among other princely notabilities, wrote to compliment the author, and opened up a correspondence with him. In 1738 Rollin published his *Histoire Romaine* (ibid. 9 vols.), a much inferior work, now almost forgotten. He died Sept. 14, 1741.

Rolling-thing, גָּלְגַל, *galgal*, Job xvii, 13; rendered by the A. V. "wheel" in Psa. lxxxiii, 13. Gesenius (*Thesaur.* s. v.) prefers *chaff*, *stubble*, in both passages. The same word is used for *wheel* (q. v.) in Isa. v, 28; Ezek. x, 2, 6; xxiii, 24, and for *whirlwind* (q. v.) Psa. lxxvii, 19 ("heaven"); Ezek. x, 13 ("wheel"). There is, however, a *wild artichoke* (Arab. *akkub*) in Palestine which the Arabs chew with relish, and which in growing throws out branches of equal size and length in all directions, forming a globe a foot or more in diameter. In the autumn this becomes dry and light, breaks off at the ground, and flies before the wind. Thousands of them leap and roll over the plain, and often disturb travellers and their horses. This plant is thought by Thomson to correspond better with the *galgal* of Isaiah and the Psalmist than anything before suggested (*Land and Book*, ij, 357 sq.). Some (Smith, *Bible Plants* [Lond. 1877]) have held the *galgal* to be the so-called "Jericho rose" (*Anastatica Hierichuntina*), a small, ligneous, cruciform plant, which has the singular property of reviving and expanding when placed in water. In the summer it dries up into a ball, which might readily roll before the wind, except that it is held fast to the earth by its strong tap-root.

Rollock, ROBERT, first principal of the College of Edinburgh, was born in 1555 in the vicinity of Sterling, Scotland. From the school at Sterling he went to the University of St. Andrew's, and became a student of St. Salvador's College. As soon as he had taken his degree he was chosen professor of philosophy, and began to read lectures in his own college. He left St. Andrew's in 1583, having been chosen in 1582 to be the principal and professor of divinity of the new Edinburgh University. In 1593 he with others was appointed by Parliament to confer with the popish lords. In 1595 he was appointed one of the visitors of the colleges, and in 1597 was chosen moderator of the General Assembly. He died at Edinburgh, Feb. 28, 1598. His only English work is, *Certain Sermons on Several Places of St. Paul's Epistles* (Edinb. 1597, 8vo). The rest of his works are in Latin—commentaries on Daniel, St. John's Gospel, Psalms, and on most of the epistles. He also published *Prolegomena in Primum Librum Quæst. The. Bezae*:—*Tractatus de Vocatione Efficaci* (Edinb. 1597):—*Quæstiones et Responsiones Aliquot de Fœdere Dei*, etc. (ibid. 1596, 8vo):—*Tractatus Brevis de Providentia Dei*:—and *Tractatus de Excommunicatione* (Lond. 1604; Geneva, 1602, 8vo). See Adam [Melchior], *Life of Rollock* (supplement to *Encyclop. Brit.*); Spottiswood, *Hist. Book*, vi; Chalmers, *Biographical Dictionary*, s. v.; Allibone, *Dictionary of British and American Authors*, s. v.

Roma, the personification of the city of Rome, and as such called *Dea Roma*. She was represented clad in a long robe, and with a helmet, in a sitting posture, strongly resembling the figures of the Greek Athena. She was in reality the genius of the city of Rome, and was worshipped as such from early times, though no temple was erected to her till the time of Augustus. After this their number increased throughout the empire.

Romaic (or MODERN GREEK) Version. Romaic, or Modern Greek, is the vernacular language of about 2,000,000 descendants of the ancient Greeks dispersed throughout the Turkish empire, as well as of the inhabitants of the modern kingdom of Greece. In this vernacular several versions of the New Test. exist. The earliest was printed at Geneva in 1638, in parallel columns with the inspired text, and was executed by Maximus Calliergi (or Calliopolis, as he is sometimes called), at the solicitation of Haga, the ambassador of the then United Provinces of Constantinople. This translation, which is remarkable for its close and literal adherence to the Greek original text, is preceded by two prefaces, one by the translator, and the other by Cyrillus Lucaris, patriarch of Constantinople. This edition, which had the title 'Ἡ Κανὴ Διαθήκη τοῦ Κυρίου ἡμῶν Ἰησοῦ Χριστοῦ, διγλωττος, ἐν ᾗ ἀντιπροσώπως τότε θεῖον πρωτότυπον καὶ ἡ ἀπαρallάκτως ἐξ ἑκείνου εἰς ἀπλὴν διάλεκτον διὰ τοῦ μακαρίτου Κυρίου Μαξίμου Καλλιουπολίτου γενομένη μετάφρασις ἡμᾶ ἐμπνεύθησαν. Ἐτεῖ ΧΗΗΔΔΔΠΙΙΙ, was reprinted with corrections in 1703 in London by the Society for Propagating the Gospel in Foreign Parts, and another edition was issued by the same society in 1705. A reprint of this version, in 12mo, was published at Halle, in 1710, at the expense of Sophia Louisa, queen of Prussia, under the title, 'Ἡ Κανὴ Διαθήκη τοῦ Κυρίου καὶ Σωτῆρος ἡμῶν Ἰησοῦ Χριστοῦ, τοῦτ' ἔστω τὸ θεῖον ἀρχέτυπον καὶ ἡ αὐτοῦ μετάφρασις εἰς κοινὴν διάλεκτον. Μετὰ πάσης ἐπιμελείας διορθωθέντα, καὶ νωπὸς μετατυποθέντα ἐν Ἀλᾷ τῆς Σαξωνίας, ἐν τῷ Τυπογραφίῳ Ὁρφανοτροφείου. Ἐτεῖ

ἀπὸ τῆς ἐναρκου Οἰκονομίας τοῦ Κυρίου καὶ Σωτῆρος ἡμῶν Ἰησοῦ Χριστοῦ α. ψ. ι. From this edition the British and Foreign Bible Society published an impression, under the superintendence of the Rev. J. F. Usko, in 1808, with the ancient and modern Greek in parallel columns. As this edition was very favorably received, another was published in 1812. A strict and thorough revision of the text being deemed necessary, the archimandrite Hilarion (subsequently archbishop of Ternovo), with two assistants, was accordingly appointed, in 1819, to execute a new version of the entire Scriptures. In 1827 Hilarion's version of the New Test. was completed, and was printed at the national printing-office in the patriarchate, under the eye of the Greek Church. This version, although faithful and accurate as a translation, is considered rather stiff. About the same time, Hilarion completed his translation of the Old Test. from the Sept., which, in 1829, was submitted to the committee of the British and Foreign Bible Society. After mature deliberation, it was concluded to circulate a version prepared from the Hebrew text itself, rather than a mere translation of a translation. The Rev. H. D. Leeves was therefore appointed to reside in Corfu, where, with the assistance of natives, he commenced a translation of the Hebrew Scriptures into Modern Greek. In conjunction with the Rev. J. Lowndes (an agent of the London Missionary Society), he engaged the services of Profs. Bambas and Tupaldo, to which, for a short period, were added those of Prof. Joannides. In the fifty-first report (1855) Mr. Lowndes wrote thus: "The first edition of the Old Test. was printed in England in 1840. Select parts had been published previously, as the work advanced. The New Test. followed, and was printed at Athens in 1844. It was not long before it was considered desirable that the whole should be submitted to a general revision, with the view of having the Old and New Test. printed in one uniform volume; and Mr. Leeves, Prof. Bambas, and Mr. Nicolaides, a native of Philadelphia, undertook to do it. In 1845 Mr. Leeves was removed from the land of the living, and in that year I was appointed agent of the British and Foreign Bible Society. In 1846 I went to Athens to carry on the work of revision that had been just commenced, and between that year and 1850, at different times, Prof. Bambas, Mr. Nicolaides, and myself went over the whole of the Old and New Test. Editions of the Old Test. were printed again in England in 1849 and 1850, succeeded by a new edition of the New Test. in 1851, when the whole Bible was prepared for dissemination in one uniform volume for the first time." From that time on several issues of the Bible in Modern Greek were made, making a total up to March 30, 1878, of 446,435. That there is a great demand for the Word of God may be seen from the fact that, according to the seventy-fourth report (1878), the British and Foreign Bible Society has decided to print a portable edition of 6000 copies of the reference Bible in Modern Greek, for which edition Dr. Sauerwein is arranging the poetical parts in accordance with the Bible Society's paragraph English Bible. Having before us the latest edition of the New Test. with the title 'H Καινὴ Διαθήκη τοῦ Κυρίου καὶ Σωτῆρος ἡμῶν Ἰησοῦ Χριστοῦ, παραφρασθεῖσα ἐκ τοῦ Ἑλληνικοῦ. Κατὰ τὴν ἐν Ἀθήναις ἐκδόσιν τοῦ 1855-1874, we will give a specimen from the Gospel of St. John (i, 1, 2) of the three versions, that the reader may judge for himself as to the value of each:

Calliopolitan.

1. Εἰς τὴν ἀρχὴν ἦτον ὁ λόγος, καὶ ὁ λόγος ἦτον μετὰ Θεοῦ, καὶ Θεὸς ἦτον ὁ λόγος.
2. Ἐτούτος ἦτον εἰς τὴν ἀρχὴν μετὰ Θεοῦ.

Hilarion.

1. Ἀπ' ἀρχῆς ἦτον ὁ λόγος, καὶ ὁ λόγος ἦτον ὁμοῦ μετὰ τὸν Θεόν, καὶ ὁ λόγος ἦτον Θεός.
2. Αὐτός ἦτον ἀπ' ἀρχῆς ὁμοῦ μετὰ τὸν Θεόν.

Bible Society's Version.

1. Ἐν ἀρχῇ ἦτο ὁ λόγος, καὶ ὁ λόγος ἦτο παρὰ τῷ Θεῷ, καὶ Θεὸς ἦτο ὁ λόγος.
2. Οὗτος ἦτο ἐν ἀρχῇ παρὰ τῷ Θεῷ.

See *The Bible of Every Land*, and the *Annual Reports of the British and Foreign Bible Society.* (B. P.)

Romaine, WILLIAM, an English divine and writer, was born at Hartlepool, county of Durham, Sept. 25, 1714, and was the son of a French Protestant who took refuge in England upon the revocation of the Edict of Nantes. Romaine attended school at Houghton-le-Spring for seven years, and then entered Hertford College, Oxford, in 1730 (or 1731), and thence removed to Christ Church. He took his degree of A.M. Oct. 15, 1737, having been ordained deacon the year before. He became curate of Loe Trenchard, Devonshire, in 1737; was ordained priest in 1738, and the same year curate of Bantstead and Horton, Middlesex. In 1741 Daniel Lambert, lord-mayor of London, appointed him chaplain. In 1748 he became lecturer of St. George's, Botolph Lane, and St. Botolph's, Billingsgate; and in the following year (1749) lecturer of St. Dunstan's-in-the-West, which position he held until his death. In 1750 he was appointed assistant morning preacher at St. George's, Hanover Square, and continued until 1756; in 1752 professor of astronomy in Gresham College; curate and morning preacher at St. Olave's, Southwark, in 1756-1759; morning preacher at St. Bartholomew the Great, near West Smithfield, 1759, for nearly two years; chosen rector of St. Andrew Wardrobe, and St. Ann's, Blackfriars, 1764, an election which was disputed, but confirmed by the Court of Chancery in 1766. In the duties of this office he continued faithfully employed until his death, July 26, 1795. Romaine's best-known works are, *Practical Commentaries on Psalm ciii* (Lond. 1747):—*The Lord our Righteousness*, two sermons (ibid. 1757, 8vo):—*Twelve Sermons on Solomon's Song* (ibid. 1758-59, 8vo):—*The Life of Faith* (ibid. 1763):—*Scripture Doctrine of the Sacrament of the Lord's Supper* (ibid. 1765):—*Walk of Faith* (ibid. 1771, 2 vols.):—*Essay on Psalmody* (ibid. 1775). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Roman'ti-e'zer (Heb. id. [for *Romanti' E'zer*], רֹמְטִי עֶזֶר, רֹמְטִי עֶזֶר, *heights of help*; Sept. Ῥωμεντιζερ, v. r. Ῥωμεντιζερ, Ῥωμεντιζερ), the tenth named of the fourteen sons of Heman, the king's seer in the time of David. He was chief of the twenty-fourth section of the singers, and his family, consisting of twelve persons, were among those engaged in the music of the tabernacle service (1 Chron. xxv, 4, 31). B.C. cir. 1014.

Roman (Ῥωμαῖος), a citizen of the Roman empire (q. v.) (1 Macc. viii, 1, 23-29; xii, 16; xiv, 40; xv, 16; 2 Macc. viii, 10, 36; xi, 34; John xi, 48; Acts ii, 10; xvi, 21, 37, 38; xxii, 25-29; xxiii, 27; xxv, 16; xxviii, 17). Such persons, wherever born, were entitled to special privileges. See CITIZENSHIP.

Roman Art. The ancient Romans were characterized by a strong practical feeling. They had immense organizing, governing power; but they had little of that fine æsthetic sensitiveness which is necessary as the foundation of an indigenous, native art with a people. Still, the position of Rome with reference to the general history of art is very important. It is marvellous, indeed, that a people who seemed originally to have had so little native talent for art should have become the most extensive patrons of art in all history. The inability of the Roman people to originate works of high art was recognised by their own writers. Virgil wrote: "To others it is granted to give life to marble and to lend breath to bronze, but the art of Rome is to govern nations, to conquer the proud, and to spare the weak." The Romans may be compared to rich people in our day who desire to possess works of art without knowing how to appreciate or understand them,

or who wish to use them as a means of displaying their ostentatious luxury. The presence of works of high art also created a proud rivalry among the aristocratic and wealthy which is altogether distinct from the patronage to art which comes from native, artistic impulse. During the first two hundred and fifty years of her existence, Rome might be considered as an Etruscan city, so fully did the Etruscan spirit prevail in all her temples and other works of art. During the first two centuries of the republic, almost no works of art were executed within this great capital, though the names of a few Greek artists in Rome are recorded as early as five hundred years before Christ.

With the conquest of Carthage first, followed by the conquest of Greece and Egypt, a new epoch was opened in the artistic life of the Roman people. Rome now became the great storehouse of the art treasures of the entire world. Greece especially was despoiled to enrich the private palaces and majestic public buildings of the great metropolis. With this gathering of the art treasures of the world into the great capital commences what may with propriety be called the beginning of the development of a true Roman art. The chief development of Roman art lay in the department of architecture. Profusely as painting and sculpture were employed in ornamenting public and private buildings of all grades, both in Rome itself and in all the remotest cities of the vast empire, these arts were practiced exclusively by Greek sculptors and painters. The great majority of architects, also, in the Roman dominions were Greeks, though their work was characterized by Roman elements and was executed in the Roman spirit.

The Romans used both stone and brick with extraordinary skill in their buildings. These materials were employed with great ingenuity and variety, both with and without mortar. The Romans adopted from the Etruscans the round arch and its consequence, the round vault. Arching and vaulting are the chief characteristics of Roman architecture. By using these they were able to erect massive and lofty structures of pleasing lightness and with economy of material. Indeed, without the arch Roman architecture would not have had an existence. By the use of the arch and the vault Roman architecture has given rise to the Byzantine style, and, through this, has inspired all subsequent architecture. Through the arch Roman architecture forms the connecting-link and the transition medium from the art of antiquity to the art of mediæval and modern times. The Romans used the vault as the transition to the dome, and thus, through half-domes, to the light and airy architecture of the Byzantines. They also built circular temples, which, originally at least, were more usually consecrated to Vesta, with a simple circular cell, surmounted by a dome, as in the Pantheon. From the traditions of their early Etruscan neighbors they preferred the square cell to the Greek rectangular oblong cell in their rectangular temples. Especially was this the case in Rome itself. The temples they built in other parts of the empire, especially in Greece and the former Greek colonies, were built after the plan of Greek originals; but these were decorated after the modified Greek manner, which the Romans adopted at the metropolis.

The Romans greatly modified all the styles of Greek architecture. To the Doric they added the Tuscan base. This gave the order much wider adaptability to the uses for which the Romans wished to employ the style; that is, in forming colonnades and pilasters to many kinds of buildings, whether circular, elliptical, or rectangular. They were less fortunate in the modification of the Ionic order, which they adopted from a single known Greek original, making volutes face all four sides of the capital. As half-columns or pilasters this modification was more fortunate. The Ionic order was only used by them as an intermediate style, in the second story of buildings, never in temples or other buildings a single story in height. The Corinthian order, which had

hardly obtained its full capacity of development under the Greeks, was most happily used by the Romans. The Ionic volute, in a modified form, was introduced in the midst of the Acanthus. Thus was taken the first step to the complete union of the Ionic and Corinthian styles in the so-called composite order, which is the most characteristic and original decorative feature in Roman architecture, though it was doubtless elaborated by the hands of Greek workmen under the Roman rule. The capitals of columns and the entablatures were often covered with an amount of elaborate decoration which finally became overpowering, and almost destructive of good architectural effect. See ORDER.

In considering the classes of buildings erected by the Romans, the student of Egyptian or Greek art is surprised at the small number of temples constructed by the Romans in comparison with other edifices. The noblest monument of Roman architecture is the Pantheon, which is preserved almost in its entirety. Of other famous temples, as that of Jupiter Capitolinus, there are now no remains. The most magnificent temple built under the Roman dominion was that of Jupiter Olympus at Athens. The temples at Palmyra and Baalbec surprise by their size and the magnitude of the blocks of stone used in their erection, but in architectural elegance and purity they are very defective.

Of buildings of civil architecture the forum may first be considered. The forum was used, as by the Greeks, as a place for marketing, for assembling the people for the transaction of public business, for the election of officers, and for other purposes. The forum was surrounded by colonnades. These were frequently richly decorated. Besides the original Roman forum, various emperors laid out others, which served similar purposes. In the further development of the public life, the transaction of a portion of public affairs was transferred to special buildings, of which the basilicas are the most important. In the basilicas were held the courts of justice and the exchange for merchants; finally shops and libraries were added, and the basilicas almost served the varied purposes of the forums. The basilicas were generally rectangular and oblong in shape, though some were nearly square and were vaulted. The oblong basilicas usually had a round apsis at one end. These two forms furnished the starting-points for the two great early styles of Christian architecture — the oblong, for the so-called basilican churches in Italy; and the vaulted ones, for the Byzantine style in Constantinople. Thus we find in the Roman basilica the most important specific connecting-link between classical and Christian architecture. See BASILICA.

Triumphal arches form a most important feature of Roman architecture. They were very stately in form and costly in execution. This use of the arch they had doubtless derived from the Etruscans. The most important arches to signalize victories are those of Septimius Severus, Titus, and Constantine. The arch of Titus has peculiar interest to Christians, inasmuch as upon a bas-relief on the inside of the arch are cut models of the seven-branched candlestick and other vessels of the Temple service which Titus carried with him to Rome after his conquest of Jerusalem. Arches were erected in many cities to commemorate also the erection of public works of great extent by the emperors or other public officials. See ARCH.

Originally, the Roman theatres, like those of Greece, were semicircular in form. But, while the Greek theatres were cut in the solid rock on the side of some lofty hill with a beautiful landscape for the scene, the Roman theatre was built up, like other edifices, in the midst of the most populous cities, and the walls were decorated with colonnades, with vaulted arcades leading through the different stories to the seats. Theatres of vast size were built in Rome and in many provincial cities. The best preserved is at Orange, in France. But the amphitheatre was the specially characteristic form of theatre-building with the Romans. This was

built of vast size in even the most distant provincial cities. The largest are the Colosseum at Rome and the amphitheatres at Capua, Verona, Pola, Nîmes, and Constantine in Africa. It is estimated that the Colosseum could contain over sixty thousand spectators. In its arena gladiatorial sports of the most cruel character took place, and by their ferocity hastened the depravation of manners and morals which largely caused the downfall of the empire. See THEATRE.

The public baths form another characteristic feature in Roman architecture. These were laid out upon a scale of immense grandeur. The baths of Caracalla covered thirty-six acres. The vast edifices in this structure were highly decorated, and contained almost innumerable works of sculpture and painting. Several thousand bathers could be accommodated at one time. Elegant halls were also provided for reading, conversation, music, boxing, and other lighter games of various sorts. Other baths of vast size were built by various emperors, as Diocletian, Agrippa, Titus, and Vespasian. See BATHE.

The arch was most successfully applied to the erection of bridges and aqueducts. Many of these were erected with surprising boldness, and of a size and length to excite the wonder of the modern beholder. Though frequently without much architectural decoration, the aqueducts generally have graceful outlines, and by their long lines, as they sweep for miles over the plain, mark the power of the people who ruled the world. See BRIDGE.

The lack of perfect artistic taste was manifested by the Romans in the erection of columns of victory, which received long sculptured portrayals of the achievements of victors. As the sculpture is thus placed utterly out of the reach of the eye, its effect is lost upon the beholder. See COLUMN.

The history of the Roman domestic residence is to be traced in the progress of Roman luxury. In the early career of the state, private houses were extremely simple. During the empire, all the luxurious richness of decoration that wealth and art could supply was employed in adorning the houses of the wealthy. Good taste was soon overwhelmed in costly decoration. The houses in the provincial city of Pompeii indicate what may have been the luxurious decoration of the capital. Even greater profligate expenditures were made upon the villas of the rich on beautiful mountain-sides or by the coasts of the sea. See HOUSE. The palaces of the emperors presented the climax of luxurious domestic architecture. These palaces, especially in provincial summer resorts, were built on an immense scale, and were rather a vast group of edifices within a fortified enclosure, all laid out and decorated with the fullest luxury of the period. Two of the most famous of these imperial palaces were that of Diocletian at Spalatro, and that of Adrian at Tivoli. See PALACE.

The tumular architecture of the Romans is very striking, both with reference to the number and the style of the monuments. Of the tombs of the kingly period, there remain only the monuments attributed to the Curii. Of the republic, there remain only the tomb and sarcophagus of Scipio. The tombs of the period of the empire seem to have been decidedly of Etruscan style, both in shape and construction. The earliest of these is that of Cecilia Metella, on the Appian Way; but the grandest and most splendid was that of Adrian, now known as the Castle St. Angelo. The basement was three hundred and forty feet square; the height to the pine cone on the summit was three hundred feet. It was decorated with an immense number of statues. The building called the tomb of Santa Helena, mother of Constantine, shows how the feeling for interior decoration had in that period displaced the earlier feeling for exterior decoration in all classes of structures. Parallel to these tombs erected above the ground are the columbaria, or underground tombs, with niches for containing a number of cinerary urns. In general structure,

these have their antitype in the subterranean tombs, or catacombs, of the Etruscans. Many of these columbaria are exquisitely decorated with arabesques of stucco, which have been the delight of mediæval and modern artists. Tumular monuments of more slender upright form, often with highly appropriate architectural decoration, and evidently with a marked Greek impress, are found in a few provincial cities in the north and west of the empire. But in Cyrene in Africa and in Petra in Arabia are found a large number of elaborate and imposing tombs. Those at Petra are deeply cut in the rock, like many Egyptian tombs, but with elaborate Corinthian decorations. Of this same Roman period are a large number of tombs in Palestine, Mesopotamia, and other countries in the Orient. See TOMB.

The catacombs of the Etruscans were imitated by the Jews and Christians in Rome, as these classes, like the Etruscans, did not burn their dead. But the Romans themselves, so far as is known, did not imitate fully the Etruscan catacombs for their own dead. See CATACOMB.

The Romans invented almost no original sculpture, but they brought from the conquered cities and colonies of Greece countless statues of the first rank. They also had marble copies of many masterpieces made for the decoration of their baths, forums, circuses, palaces, and tombs. See SCULPTURE.

Painting, both in tempera and in mosaic, they employed very extensively in decorating the floors and walls of the interiors of all rooms, even of those of shops and smaller houses. See PAINTING.

The objects of daily use of every kind, even down to the utensils of the kitchen or the shop, were richly decorated. Artistic decoration had become a necessity in all material objects. But, withal, it is remarkable that they should have depended upon foreign workmen to supply them with all their artistic objects, both large and small. See ROME.

In more ways than can be traced, the art of Rome, or rather the art in Rome, furnished the channel for the transmission of the art of classical antiquity, in modified forms, to mediæval Christianity. See ROMANESQUE ART. (G. F. C.)

Roman Catholic Church, the name usually given to that organization of Christians which recognises the Roman pope as its visible head and is in ecclesiastical communion with him. The name may be found in a number of Roman Catholic writers, and is generally used in the constitution of those states in which the Roman Catholic Church is designated as one of the recognised or tolerated State churches. It is, however, not the official name used by the authorities of the Church—who rather dislike it, and substitute for it the name "Catholic" or "Holy Catholic" Church. The name "Roman Church" is applied, in the language of the Church, to the Church or diocese of the bishop of Rome. The views which the members of the Roman Catholic Church, on the one hand, and all other Christians, on the other, take of the doctrine and the history of this Church widely and irreconcilably differ. To the former, the Church is the only form of Christianity that was founded by Christ; all other denominations of Christians are looked upon as deviations from genuine Christianity, and the history of the Church is to the Roman Catholic identical with the progress and development of Christianity. All other Christians agree in viewing the doctrinal system of Rome as abounding in erroneous and antichristian admixtures to the Christianity of the Bible, and its history as the gradual growth of a central and absolute power, which is without a scriptural basis, and prefers and enforces claims for which there is no warrant whatever in the teaching of Christ or the words of the Bible.

I. History.—The Catholic historian begins the history of his Church with the life of the Lord Jesus Christ. While living on this earth, he gathered around him those who were to rule the Church after his ascen-

sion. He provided for a complete organization of the Church by designating Peter as its head. The foundation of the Church was externally completed on the day of Pentecost by the effusion of the Holy Spirit. Several Church fathers have called this day the birthday of the Christian Church; accordingly the Catholic historian claims it as the actual beginning of the Catholic Church. Many of the traditions and legends which formerly embellished the histories of the early Catholic Church have now been quite generally abandoned by Catholic writers; they continue, however, to insist that the Scriptures in many places attest the supremacy of Peter as the first among the apostles and the head of the Church. While admitting and lamenting the insufficiency of authentic information on the early history of the Church, Catholic writers emphatically defend, in opposition to modern criticism, a Roman episcopate of the apostle Peter, the exercise of supramaternal powers by several bishops of Rome in the first three centuries, and the actual acquiescence of the Church in the Roman decisions. The pictures of the early Christian congregations, as they are drawn by Catholic writers, bear but little resemblance to the Roman Catholic Church of the present day; but it is contended that all that was subsequently developed in the Catholic system existed as a germ in the primitive Church, and that modern criticism has been unable to prove any irreconcilable difference between the creed of the early Church and the Roman Catholic Church as it now exists.

The growth of an "Old Catholic Church" with an episcopal constitution in the 2d and following centuries is generally recognised by Church historians. It is also quite generally admitted that the bishops of Rome, the imperial city of the West, successfully claimed a greater and greater influence; but only Roman Catholics defend these claims as the exercise of a divine right, while all other writers look upon them as the gradual development of a usurpation which was attended by the most dangerous results. Christianity, in the meanwhile, spread rapidly through all the parts of the Roman world-empire, and, by the conversion of the emperor Constantine, entered into the novel position of the ruling Church. The transfer of the imperial residence to Constantinople led to a rivalry between the bishops of Rome and Constantinople, which gradually became fatal to the unity of the Church. The bishops of Rome steadily enlarged their predominant influence in the whole of Western Europe, and rapidly increased their power by the conversion of the Germanic tribes, which gradually grew up to be the most powerful nations of the Christian world. The establishment of the temporal power at the close of the 8th century gave to the popes of Rome both greater influence and greater prestige, and enabled them to gradually convert the episcopal into a papal Church. The pontificate of Hildebrand, who succeeded to the papal throne in 1073 under the name of Gregory VII, completed the papal system and the Roman Catholic Church in their most essential features. Even before his election as pope, he had prevailed upon his immediate predecessors, as their most influential adviser, to make the election of popes in future wholly independent of secular influence, and thus to secure a continuity of pontiffs whose sole aim would be the progress and complete victory of the Church, not only over all other ecclesiastical and religious organizations, but also over all temporal governments. Under his influence, a council held at Rome in 1059 had decreed that the pope was to be only elected by the cardinals. After he had ascended the papal throne himself, he enforced in 1074 the priestly celibacy, and took the final step for emancipating the Church from the State by forbidding bishops and abbots, through a synod held at Rome (1075), to accept the investiture from secular governments. For nearly fifty years this prohibition remained the subject of a violent controversy between the pope and the secular princes, and though it was finally settled by a compromise (1122), it secured to the pope a

general recognition of the important right of confirming the election of all the bishops. One of the leading features of the Roman Catholic system—the absolute supremacy of the pope as vicar of Jesus Christ and head of the Church in all ecclesiastical affairs—is largely due to the influences proceeding from Gregory VII and his successors. The fundamental idea of Gregory VII, however, was never fully carried out. He had clearly conceived the plan of converting the Roman Catholic Church into a universal theocracy, with the pope at its head as sole sovereign in temporal affairs as well as spiritual. According to this view, all states of the Christian name were to be bound together in the unity of the papal theocracy as members of one body. The princes receive their consecration and divine sanction through the ecclesiastical power; they are appointed "by the grace of God;" but the Church mediates between them and God. Royalty sustains to the papacy the same relation as the moon to the sun, receiving from it its light and its heat. The divine authority with which secular powers are clothed by the Church can therefore be again withdrawn by the Church when the secular powers misuse it. With the withdrawal of this authority ceases also the liability of the subjects to obedience. The gigantic efforts made by the mediæval popes, from Gregory VII to Boniface VIII, to enforce these views fill some of the most interesting pages of the history of the Middle Ages. By the semi-military organization of the religious orders, the popes had a well-disciplined and trustworthy corps of officers at their disposal, who frequently fought their battles even when bishops ceased to side with them. The Crusades, though in the first place aiming at the deliverance of the holy sepulchre, repeatedly supplied the popes with a willing army for coercing hostile princes. None of the successors of Gregory attained so great a power and came so near realizing the establishment of the papal theocracy as Innocent III. In the struggle against his successors, the noble house of Hohenstaufen perished; but soon the kings of France checked the theocratic aspirations of the popes, and the imprisonment of Boniface VIII by the French made a breach in the theocratic edifice reared by Gregory VII and his successors which has never been repaired. The right to depose princes and release their subjects from the oath of allegiance was not expressly disowned by the popes, but it ceased to involve any practical danger, and was clearly repudiated by the Church. The transfer of the papal residence, which made the popes disgracefully dependent upon the French kings, and, still more, the papal schism, during which two, or at times three, popes hurled against each other the most terrible anathemas, undermined to a large extent the respect which Catholic countries had thus far had for the papal authority, and rapidly diffused the belief that the Church was pervaded by corruption, and that it needed a thorough reformation in its head and members. Such a reformation was sincerely attempted by the great councils of Pisa, Constance, and Basle, which not only endeavored to eradicate many flagrant abuses in the practical life of the Church, but to reduce the constitution of the Church from a papal absolutism to an episcopal constitutionalism by expressly declaring the superiority of a general council over the pope. The success of this scheme would have shaped the subsequent development of the Roman Catholic Church very different from what it has been; but the astuteness of the popes knew how to thwart the manifest reformatory desires of the majority of the bishops, to stifle the cries for a Church reformation, and to reimpose upon a reluctant Church the papal authority, at least in matters of an ecclesiastical nature.

While Western Europe became politically reorganized under Teutonic leadership, and ecclesiastically centralized as the Roman Catholic Church under the leadership of the bishops of Rome, the Eastern churches retained substantially the constitution of the Old Catholic Church of the early centuries. The Council of Nice rec-

ognised the higher authority of the metropolitan bishops of Rome, Antioch, and Alexandria. This higher authority was subsequently expressed in the title "patriarch." Later, the bishops of Constantinople and Jerusalem were added to the number of patriarchs, and the growing importance of the city of Constantinople gradually made the bishop of the city the first among the Eastern patriarchs, a distinction which was expressly sanctioned by the *Concilium Quinisextum* of 692. The Church of those times was greatly agitated by controversies relating to the Person and Work of Christ. East and West united in the wish to preserve the doctrinal unity of the Church on those important subjects; and œcumenical councils, in which both sections were represented, defined the creed of the Church and expelled the dissenters from her communion. Whether at these councils any prerogative, honorary or otherwise, was conceded to the patriarchs of Rome continues to be a subject of theological controversy; but even Roman Catholic writers do not claim that the bishops of Rome can be proved to have asserted any superior jurisdiction in any of the other patriarchal dioceses. Gradually some different views sprang up between the East and West relating to questions of constitution, doctrine, and worship. The most important of these controversies was that relating to the procession of the Holy Ghost. See *FILIOQUE*. In the course of the 9th century the controversy grew into a serious dissension, and in the course of the 11th it led to a formal and permanent schism. Many attempts at reconciliation and reunion have since been made, but they were either unsuccessful, or, if successful for a time, without duration. See *GREEK CHURCH*.

In Western Europe, the Roman Catholic Church retained her unity until the 16th century. The leaders of that reformatory party which controlled the councils of Pisa, Constance, and Basle were anxious not to disturb the unity of the Church, and co-operated in the condemnation of men like Wycliffe and Huss, who wanted first of all a scriptural reformation of the doctrine, and who showed no concern about external unity if it stood in the way of a doctrinal reformation. At the beginning of the 16th century, the stifled clamors for a radical revision of the doctrine of the corrupt Church and the restoration of a pure scriptural doctrine burst irresistibly forth in the German and Swiss reformation. See *REFORMATION*. The whole of England, Scotland, Holland, Denmark, Sweden, Norway, and large portions of Germany and Switzerland, permanently severed their connection with the Roman Catholic Church. The Church rallied, from a sense of self-preservation, for extraordinary conservative, and recuperative efforts. Although the Council of Trent (1545-63) did not succeed in bringing back the seceders, it exerted an important normative influence upon the subsequent history of the Roman Church. While it reasserted, in opposition to the Protestants, those doctrines which had been developed by the mediæval theologians, and promulgated them as parts of the Church doctrine, and thus made a return of those who regarded many Roman Catholic doctrines as an apostasy from pure Biblical Christianity impossible, it issued, on the other hand, decrees for the reformation of the constitution and discipline of the Church, which retained within its pale large numbers who, though favoring a purification of the Church, laid also great stress upon the preservation of its unity and its unbroken historical connection with the apostolic age. For the vast territories lost in Europe, the Church received some compensation in the New World, where the monastic orders, conjointly with the Spanish government, subjected the larger portion of the native population to the Church, and fully secured the permanent ascendancy of Roman Catholicism. The desire to concentrate the energy of the ablest men within the Church for an effectual arrest of a further advance of Protestantism led to the peculiar organization of the Order of the Jesuits, which plays a promi-

nent part in the subsequent history of the Church. By dint of its extraordinary efforts, it not only checked the further progress of Protestantism in a number of countries, but recovered some that already appeared to be lost. Within the Church its influence was no less remarkable, and it succeeded, like no other community of men before, in strengthening and enlarging, in opposition to the adherents of the episcopal system, and especially to the Gallicans, the absolute authority of the popes. The rejection by the popes of doctrinal opinions designated as heretical repeatedly called forth very exciting dogmatical controversies, which in one case led to the organization of a separate ecclesiastical community, the so-called Jansenists, or Old Catholics of Holland, who recognised the authority of the pope as the head of the Church, but denied the infallibility of his dogmatical decisions, and consequently their obligation to yield to them an unconditional submission. In the second half of the 18th century, extraordinary tempests came down upon the Church. In France and other countries of Southern Europe, an antichristian literature undermined, in the educated classes of the population, not only the attachment to the Church, but a belief in Christianity. The Bourbons of Spain, Portugal, and France, under the influence of freethinking statesmen, forced a pliant pope who had been elected by their influence to abolish the Order of the Jesuits, in their opinion the strongest bulwark of the Church against the advance of a new, freethinking era. In Germany, the episcopal electors of the empire united with the emperor Joseph II on a plan to establish a National German Catholic Church, which was to be almost independent of Rome. The French Revolution took from the pope his temporal possessions, confiscated the property of the Church, and for a time decreed the abolition of Christianity. Napoleon desired to secure the co-operation of the Church for the execution of his ambitious schemes and the confirmation of his power and his dynasty. He concluded in 1801 with the pope a concordat, which was to restore to the pope his temporal possessions and his ecclesiastical powers; but as a complete agreement was not arrived at, Napoleon once more (1808) occupied the States of the Church, and declared the "donation of his predecessor Charlemagne" revoked. When he was thereupon excommunicated, he imprisoned the pope, and for several years deprived the Church of her head. In 1814 the allied princes of Europe restored the temporal power of the pope, and Pius VII was enabled to resume the full functions of the papacy as they were exercised before the French Revolution. An agreement, however, between the pope and the princes assembled at the Congress of Vienna was not attained, and the pope entered through his legate a protest against the work of the congress. In 1816 the Order of the Jesuits was restored for the whole Church, and soon displayed again, as in former times, an extraordinary activity for strengthening and enlarging the papal authority in opposition to episcopal and liberal tendencies still manifesting themselves within the Church, as well as to the legislation of the secular governments. The growth of the liberal and revolutionary party in most of the European countries, which aimed at either curtailing or wholly abolishing the power of the princes, was not only very distasteful to the Roman Catholic Church, but led in most countries to vehement conflicts, especially in regard to the public schools. In Italy, the national tendencies for a political union led to the establishment of a united kingdom of Italy, to which the larger portion of the States of the Church was annexed in 1860, and the remainder, including the city of Rome, in 1870. Though not a few Catholics, including even some of the most prominent members of the Order of the Jesuits, were inclined to look upon the destruction of the temporal power of the popes as favorable to the spiritual interests of the Church, the pope (Pius IX) pronounced an excommunication against the king of Italy and all statesmen who had aided in the conquest of the Papal

States. The successor of Pius (Leo XIII), though believed to be more mildly disposed, has not yet receded from the standpoint of his predecessor. The pontificate of Pius IX became of exceeding importance in the inner history of the Catholic Church. The promulgation of the doctrine of the immaculate conception of the Virgin Mary, and of a syllabus which characterized a number of doctrines and views commonly held in civilized countries as heretical or erroneous, indicated a determination on the part of the pope and his advisers to force a belief in, and submission to, the extreme theories concerning the papal authority upon the entire Catholic Church. This victory of the extreme papal party within the Catholic Church became complete when, in 1870, the Vatican Council proclaimed the infallibility of the doctrinal decisions of the pope as a tenet of the Catholic Church. A considerable number of bishops, chiefly from Germany, Austria, and France, made a determined opposition to the adoption of the new doctrine, chiefly on the ground of its being inopportune. After its adoption by the council, however, the opposing bishops gradually submitted to the demand of the pope to have the doctrine promulgated in their dioceses. Several did so with undisguised reluctance; some (as bishop Beckmann of Osnabrück) were said by their intimate friends to have secretly remained opponents of the innovation even on their death-bed; but externally all yielded, and not one of the bishops separated from the Church in consequence of the great change which had been made by the Vatican Council. The lower clergy quite generally followed the example of the bishops. A number of professors of Catholic theology at the German universities continued, however, to refuse their submission, and were therefore excommunicated. As many thousands of laymen sympathized with them, the necessity of providing for their religious wants gradually led to the organization of "Old Catholic" congregations in Germany, Switzerland, and Austria, and even the election of Old Catholic bishops in Germany and Switzerland. In France, a distinguished pulpit orator, father Hyacinthe, has been active in the interest of Old Catholicism, but thus far (1879) without effecting any organization. In Italy, the friends of an Old Catholic reformation have a secret organization, with a bishop elect at its head. The numerical strength which the Old Catholic Church had attained after eight years of hard and incessant labors was far from meeting the expectations of its founders. The total number of the population which expressly and formally severed their connection with what was called, by the Old Catholics, the Vatican Church did not exceed 200,000 persons, an insignificant number if compared with the 200,000,000 who remain nominally connected with Rome. But the reluctance of the bulk of the Catholic population to sever their nominal connection with the Church of their ancestors cannot be taken as a proof that the Catholic Church retains its control over the nations which refused to separate from her in the 16th century. The history of the Catholic nations during the last century furnishes, on the contrary, ample proof that the influence of the national Church in all these countries has to a very large extent been undermined. In *Spain* the Cortes frequently defied the authority of the Church. In 1835 nearly all the convents were abolished, and only a few of them have ever been restored. In 1837 the Cortes abolished tithes and confiscated the entire property of the Church. In 1840, during the provisional regency of Espartero, the papal nuncio was expelled from the country; and in 1841 the union of the Spanish Church with Rome was declared to have ceased. Repeatedly the Cortes decided in favor of religious toleration, especially during the short time when Spain was a republic. King Amadeo I, and still more Alphonso XII (since 1874), deemed it expedient to seek a reconciliation with the pope; but even they have been unable to grant all the demands of the Church.—*Portugal* has been, almost without interruption, at va-

riance with the claims of the popes. All the religious orders of men, and nearly all those for women, have been suppressed. In the Cortes a liberal, anti-Roman party is invariably in the ascendancy; even the majority of the priests and bishops sympathize more with the government than with the pope, and up to the end of 1878 the government had forbidden and prevented the promulgation of the doctrine of papal infallibility.—In *France* the revolution of 1830 not only expelled the Bourbons from the throne, but stripped, to a large extent, the Church of its political power. According to the new constitution, the Roman Catholic Church was no longer the religion of the State, but only of the majority of Frenchmen. The affairs of the nation were for many years conducted by a Protestant prime minister, Guizot. Napoleon III endeavored to strengthen his dynasty by making extensive concessions to the hierarchy; and even after the establishment of the republic in 1871, the majority of the Legislative Assembly and one of the presidents of the republic (MacMahon) favored the Catholic restoration in order to check the confirmation and advance of republican principles; but in 1879 the success of the Republican party at the general election, in spite of its denunciation by all the bishops, placed the government of the country in the hands of statesmen who are fully determined to annihilate the influence of the Catholic priesthood upon the government of France and upon the education of the rising generation.—In the little kingdom of *Belgium*, which, in 1830, established its independence of Holland, the Catholic Church has, on the whole, exercised a greater influence upon legislation than in any other country of Europe; but, notwithstanding the immense power of the Church, the liberal party, which is in open and bitter enmity to the Church, secured at the general election in 1878 a majority in both chambers, and has since prepared a law on public education which will exclude the influence of the Church.—In *Austria* the close alliance between the absolute government and the popes for the suppression of all liberal tendencies was terminated by the introduction of a constitutional form of government in 1848. An attempt which was made in 1855 to re-establish this alliance by a new Austrian concordat, which gave to the Catholic bishops a far-reaching influence upon public affairs, was of short duration. The re-establishment of a parliamentary government has shown that the majority of both houses are adverse to the continuance of Church influence upon public affairs, and that they uphold the principles of religious toleration and of State education.—*Italy* has, like Spain and Portugal, expelled the religious orders and confiscated the property of the Church; it has fully secularized public instruction, and, more than any other government of the world, it is impelled to reject the claims of the Church, because these claims involve the destruction of Italian unity.—Among the states of *Spanish* and *Portuguese America* there is not one which has not had, from time to time, its conflicts with pope and bishops. The progress of religious toleration and of a secular school system, after the Protestant models of Germany and the United States, and in opposition to the bishops, proves that the Church has ceased to have a firm hold on any of these states. See OLD CATHOLICS.

In the Protestant countries of Europe the Roman Catholic Church has been greatly benefited since the beginning of the 19th century by the progress of religious toleration. The laws impeding the free exercise of the Roman Catholic form of worship, or its self-government, were quite generally repealed, or fell, at least, into disuse. Thus congregations were reorganized in *Sweden*, *Norway*, and *Denmark*, where the Church had been almost extinct since the 16th century, and vicars apostolic were appointed as an initial step towards the reconstruction of dioceses.—In *Holland*, where the Church had been for two hundred years without a hierarchical organization, although it had not ceased to

have a considerable Catholic population, the constitution of 1848 proclaimed the principle of religious liberty. Thus even the Jesuits were allowed to return, and in 1853 the Catholic hierarchy was re-established by the erection of one archbishopric and four bishoprics.—In Great Britain the government had to yield, in 1829, to the agitation of the Irish Catholics for equal political rights, and to open both houses of Parliament to its Catholic subjects. This was followed by the restoration of the Catholic hierarchy in 1850, in which year pope Pius IX divided the kingdom into one archbishopric and twelve bishoprics. The ancient hierarchy of the Roman Catholic Church had become extinct in 1585, by the death of bishop Goldwell of St. Asaph. In Scotland, when the ancient hierarchy had become extinct by the death of archbishop Beaton of Glasgow, in 1601, the hierarchy was established by pope Leo XIII, who in 1878 established two archbishoprics and four bishoprics. As Ireland at the time of the Catholic emancipation numbered alone seven millions of Roman Catholics, and a tide of Irish emigration filled the cities of England and Scotland with a large Catholic population, the Catholic Church appeared at home and abroad as a great power; and the number of churches, of priests, and Catholic institutions rapidly increased. The indignation felt among Protestants at this revival of the Church of Rome induced Parliament, in 1851, to adopt a resolution declaring all papal edicts, and all jurisdictions, ranks, or titles created by them, null and void; and fining every person who, without legal authority, accepted any ecclesiastical title derived from the name of any place in the kingdom. But the new Catholic bishops knew how to evade the laws; and the liberal tendency of English legislation gave to the Roman Catholics a position which even Roman Catholic writers have often praised as the most favorable in Europe. The hopes awakened by this restoration for the future of Roman Catholicism in England were greatly strengthened by a movement within the Established Church of England, which aimed at a revival of the Catholic elements of this Church. Under the leadership of Pusey and Newman, this movement—sometimes called the Oxford movement because it had its chief centre in Oxford—gradually developed tendencies to Roman Catholicism and led a considerable number of graduates of English universities over to the Church of Rome. Among the new Catholics were many men of great reputation, influence, and wealth. The most prominent were, Dr. Henry Newman, one of the leaders of the movement, who, as superior of the religious order of the Oratorians (consisting almost wholly of former members of the Anglican Church), as rector of the Catholic University of Dublin, and by a number of literary works, displayed a great activity for the Roman Catholic Church, and, as a reward for his services, was raised, in 1879, to the cardinalate; archbishop Manning of Westminster, created cardinal in 1875; the marquis of Bute, one of the richest noblemen of the United Kingdom; the marquis of Ripon, a prominent English statesman and member of the Privy Council. The number of Anglican clergymen, members of the nobility, and literary persons who, since the beginning of the Oxford movement, have joined the Roman Catholic Church exceeds one thousand. By these accessions the Church has received a higher social standing and a greater influence upon English society than it had before. This is especially apparent in the colonies, where the government recognises the power of the Catholic bishops and missionaries to co-operate for the confirmation of the English rule, and is willing to secure this co-operation by favors and concessions. It is, however, a noteworthy fact that, in spite of all the accessions to the Church from the higher ranks of English society, the total Catholic population shows not only no notable progress, but the estimates by the most careful statisticians give even lower figures for it than were assumed some ten years ago. This would indicate that the losses sustained by the

Church, especially among the lower classes of the population, must, at least, equal in number the gains.

On the other hand, the territorial rearrangement of Germany by the Congress of Vienna placed nearly all the German Catholics, except those of Austria and Bavaria, under Protestant governments. The great wars of 1866 and 1870 severed the connection between Catholic Austria and the German Catholics, and placed Protestant Prussia and a Protestant emperor at the head of the German nationality. The laws of all the German states place the Roman Catholics on a level with Protestants; but divergent opinions on the limits of the ecclesiastical and the secular powers have repeatedly led to fierce conflicts between the Church and the German governments, especially Prussia. The two Prussian archbishops of Cologne and Posen were imprisoned in 1837, and kept prisoners until 1840, for refusing obedience to royal ordinances concerning mixed marriages. A new conflict began in 1872, which occupies a prominent place in the modern history of Roman Catholicism, under the name *Kulturkampf*, and was not yet ended at the beginning of 1879. The Prussian government, alarmed at the increase of power which the Vatican Council had placed in the hands of the pope, deemed it necessary to divest the bishops of the influence which they had thus far exerted upon the national schools; to check the absolute control of the lower clergy by the bishops; and to extend the jurisdiction of the State over both bishops and lower clergy. The bishops regarded some of the laws adopted in Prussia for this purpose as inconsistent with their duties towards the Church, and refused to submit to them. In consequence of the conflicts which were caused by this attitude of the bishops, a number of the Prussian bishops were deposed from their sees; and several other sees which became vacant by the death of their occupants could not be filled on account of the insuperable disagreement between the Prussian government and the pope. At the beginning of 1879, of the twelve archbishoprics and bishoprics of Prussia, only two were actually filled. During the progress of this conflict, the bulk of the Catholic population of Germany showed a marked sympathy with the bishops; and the universal suffrage which has been adopted in Germany for the elections to the Reichstag yielded in no country of the world so compact a host of ultramontane deputies as in Germany. Thus the Catholic districts of Germany came to be looked upon as a bulwark of the Roman Catholic Church in general. Previously the German Church had won within the Catholic Church a great prestige for superiority in the province of literature; and not a few of its literary productions had been translated into the languages of most of the other Catholic nations. The elevation of Dr. Hergenröther, a university professor, to the cardinalate by pope Leo XIII, in April, 1879, was regarded as an encouraging tribute to the science of Catholic Germany by the head of the Church.—The Roman Catholic Church has suffered the greatest numerical losses in Russia. At the second partition of Poland, in 1793, nearly all the dioceses of the United Greeks in the former Polish empire were incorporated with Russia. The empress Catharine II made incessant efforts to reunite the United Greeks (who, during the Polish rule, had been induced to recognise the supremacy of the pope) with the Orthodox Greek Church; and it is said that, during her reign, no less than seven millions of United Greeks separated from Rome. No exertions to this end were made by the emperors Paul I and Alexander I; but Nicholas I and Alexander II followed in the footsteps of Catharine. In 1839, 3 bishops and 1305 priests, representing a population of more than 2,000,000, declared, at a synod held at Plock, in favor of reunion with the Russian State Church. After this only one United Greek diocese remained (Chelm), with a population of 250,000, nearly all of whom, in the years 1877 and 1878, likewise joined the Russian Church. As the Russian government forbids secession from the State Church to any other

religious denomination, a return of the United Greeks to the communion of Rome is for the present impossible. Roman Catholic writers unanimously assert that measures of the utmost severity and cruelty have been resorted to to bring about this separation from Rome; and their statements are fully confirmed by nearly all writers who are not Russians.—In the *United States of America* the Roman Catholic Church enjoys a degree of independence which it has hardly ever possessed in any other country. Owing to the rapid increase of the population in general, and to the large influx of immigrants, it has already attained a high rank among the national divisions of the Roman Catholic Church. See ROMAN CATHOLIC CHURCH IN THE UNITED STATES.

The missionary labors of the Catholic Church in non-Christian countries received a great impulse by the foundation of the Order of the Jesuits. The latter sent out a larger number of missionaries than any other religious order has done before or after its foundation. In some countries of Eastern Asia the Catholic missions appeared, at times, to become a complete success. In *Japan* the Church embraced, at one time, more than 200,000 Christians, and counted among her adherents several princes. In *China* the Jesuits obtained a great influence at the courts of several emperors, and the permission to establish missions throughout the empire. In *Hindustan*, *Corea*, *Anam*, and other countries, numerous congregations were collected, and many natives became priests and members of religious orders. Many of these missions have had to suffer bloody persecutions; but most of them have survived, though in a crippled form and with reduced numbers, to the present day. Pope Gregory XV established for the chief and central direction of the Catholic missions, in all parts of the world, the Congregatio de Propaganda Fide, which consisted of 15 cardinals, 3 prelates, and 1 secretary. Pope Urban VIII connected with this institution, in 1627, a seminary for the training of foreign missionaries (Collegium Urbanum de Propaganda Fide), which still exists, and has always been famous for the large number of nationalities represented among its pupils. Besides the seminary of the Propaganda, the Roman Catholic Church has seminaries specially devoted to the education of foreign missionaries at Paris, Lyons, and in several other places; and at present most of the religious orders educate some of their members in their own institutions for the missionary service. For the financial support of the Catholic missions, a central Society for the Propagation of the Faith was established in 1822 at Lyons, which has of late had an annual income of about 5,000,000 francs. This society has branches in nearly all countries of the world; only Austria and Bavaria have preferred to establish their own societies for the support of foreign missions. A children's missionary society, called the "Society of the Holy Childhood of Jesus," devotes its revenue chiefly to the efforts for the baptism and Catholic education of pagan children. It has branches in all countries. It is admitted by all Catholic writers that the sums annually contributed for the support of the Catholic missionaries fall far below the aggregate annual income of the Protestant missionary societies.

II. *Doctrines*.—As the Roman Catholic Church agrees with the Greek and the Protestant churches in regarding the Holy Scriptures as divinely inspired, and as an authority in matters of faith and morals, she holds many points of Christian belief in common with these large divisions of the Christian Church. Conjointly with them, she believes in the unity of divine essence, the Trinity of the divine persons (Father, Son, and Holy Ghost), and the creation of the world by the will of God out of nothing for his glory and the happiness of his creatures. Among other points of belief which are common to the Roman Catholic, Greek, and Evangelical Protestant churches are the following: the original innocence of man; his fall in Adam, and redemption by Christ; the incarnation of the Eternal Logos and Second

Person in the Holy Trinity; the divine human constitution of the Person Christ. In regard to the procession of the Holy Ghost, the Roman Catholic Church has added to the Nicene Creed the "Filioque" ("and from the Son"), and accordingly believes that the Holy Ghost proceeds from the Father and the Son; while the Greek Church believes, in strict accordance with the original Nicene Creed, that the Holy Ghost proceeds from the Father only. The Roman Catholic Church holds, in common with the Greek, but in opposition to evangelical Protestants, the following doctrines: The authority of ecclesiastical tradition as a joint rule of faith with the Scriptures; the veneration of the Virgin Mary, the saints, their pictures and relics; the infallibility of the Church; justification by faith and works as joint conditions; the seven sacraments or mysteries; baptismal regeneration, and the necessity of water baptism for salvation; priestly absolution by divine authority; transubstantiation and the adoration of the consecrated elements; the sacrifice of the mass for the living and the dead; prayers for the departed. The infallibility of the Church was formerly lodged by the Roman Catholic Church in the general councils conjointly with the pope, but since 1870 also in all the doctrinal decisions of the popes; by the Greek Church it is attributed to the seven oecumenical councils, and the patriarchal oligarchy as a whole. The immaculate conception of the Virgin Mary, which was proclaimed as a dogma by the pope in 1854, is rejected by the Greek Church as blasphemous, although it practices the veneration of the Virgin no less than the Roman Catholic. In regard to the Holy Scriptures, the Roman Catholic Church includes in its canon the Apocrypha of the Old Test., which are excluded from the Protestant canon. The Latin (Vulgate) translation of the Bible is placed on a par with the Hebrew and Greek Scriptures, while Protestantism claims divine authority only for the original Scriptures of the inspired authors. As regards the popular use and circulation of the Bible, the Roman Catholic Church has generally discouraged the reading of unannotated Bibles in the native tongues, and commanded her members to seek on this subject the previous advice of their pastors and spiritual guides.

With regard to the unity of the Church, the Roman Catholic Church teaches that Christ founded one, and only one, infallible visible Church which was to represent him on earth as the teacher of religious truth, and to which, therefore, all men ought to submit. The Roman Catholic Church claims to be this communion, and therefore asserts that outside of her there is no salvation ("extra ecclesiam nulla salus"). She does not admit the Protestant distinction between a visible and invisible Church, but demands that all should belong to the visible Church. She admits, however, that there may be cases when insurmountable difficulties prevent persons from joining her communion, and when God will save them though they have not been formally received into her pale. As there is, in the opinion of the Church, only one Church and one baptism, all persons, children or adult, to whom the ordinance of baptism is administered in due form are thereby received into the Catholic Church. The children of Protestants and other non-Catholics are therefore regarded as belonging to the Catholic Church until they cut themselves loose from it by their own erroneous belief.

In regard to the future life, the Roman Catholic Church admits a temporary middle place and state (lasting until the final judgment) between heaven and hell, for the purification of imperfect Christians, which may be advanced by prayers and masses in their behalf. The centre of Catholic worship is the mass, which the Church holds to be an actual, though unbloody, repetition of Christ's sacrifice on the cross, by the priests, for the sins of the living and the dead. It is offered, as a rule, daily by every priest. To the laity the eucharist is now administered in only one kind, the

bread, the Church believing that Christ is wholly present in the consecrated bread as well as in the wine, and that therefore the reception of one kind is fully sufficient.

An important difference between Roman Catholic and Protestant ethics exists in the doctrine of good works, the Roman Catholic Church believing that works of supererogation, which are not commanded, but recommended (*consilia evangelica*), with corresponding extra merits, constitute a treasury at the disposal of the pope for the dispensation of indulgences. These indulgences are transferable to the souls in purgatory.

As the Church is the plenipotentiary and infallible representative of Christ, her commandments are no less binding upon the faithful than the divine commandments recorded in the Scriptures. Among the commandments given by the Church are the duty of the faithful to go once a year to confession, to receive once a year the eucharist, and to attend mass on every Sunday and holiday. Upon her clergy the Church has imposed the duty of celibacy; as this, however, is not a part of Church doctrine, the priests of those of the Eastern churches which recognise the supremacy of the pope are allowed to marry.

Paintings and images are quite commonly used in Catholic churches as fitting ornaments, and as objects calculated to excite and keep alive feelings of devotion. The crucifix may be mentioned as the principal among them. A number of ceremonies and vestments are used in the celebration of divine worship. They are intended to give a peculiar dignity to the sacred mysteries of religion; to raise the mind of the beholder to heavenly things by their various and appropriate import; to instruct the ignorant and keep alive attention; to give to the ministers of religion a respect for themselves and for the awful rites in which they officiate.

In the celebration of the mass and other services of the Church, the Latin language is used. The Church cherishes it as a bond of union which connects the churches of the present with each other, as well as with the primitive apostolic Church of Rome. For the use of the people, translations into the vernacular languages are made, and are in common use. The Eastern churches which have entered into a corporate union with Rome are allowed to retain at divine service the use of their old liturgical languages. Latin is also the language of the Breviary, which contains the prayers and religious readings prescribed by the Church for the daily devotional exercises of the priests.

III. *Constitution.*—The Roman Catholic Church believes in a special priesthood in which all the offices of the Church are vested. The powers conferred upon the priesthood are twofold—the priestly power, *potestas ordinis*, and the governing power, *potestas jurisdictionis*. The former is vested in its fulness in the bishops, who alone have the right to provide for the continuation of the hierarchy by means of ordination. Subordinate to the bishop are the orders of priest and deacon. These two orders, together with that of bishop, constitute the *ordines majores*, and form the keystone of the entire hierarchy. Several minor orders, *ordines minores*, the number of which has varied, are preparatory steps for the entrance into the hierarchy, and are no longer of any practical significance. The governing power is possessed in its fulness by the pope, who alone has apostolic authority, and may exercise it in any part of the Church. The bishop has governing power only over one diocese, and, according to the present Church law, can practically exercise it only with the sanction of the pope. A number of episcopal dioceses are commonly united in an ecclesiastical province, the head bishop of which bears the title of archbishop, presides at the provincial councils, but otherwise interferes but rarely and only in special cases in the administration of the suffragan dioceses. If a country has more than one ecclesiastical province, one of the archbishops has frequently the title of primate, and

as such ranks the other archbishops and presides at national councils. As all the Eastern patriarchates have severed their connection with Rome, the name patriarch has totally lost the signification it had in the early Church. It is an honorary title which confers no degree of jurisdiction superior to that of archbishop or primate. The Church has at present, besides the pope, twelve patriarchs—namely, four of Antioch (for the Latin, Greek, Syrian, and Maronite rites respectively), and one each of Constantinople, Alexandria, Jerusalem, Babylon (of the Chaldean rite), Cilicia (of the Armenian rite), the East Indies, Lisbon, and Venice. Those fragments of Eastern churches which in course of time had entered into a corporate union, with the privilege of retaining the use of their ancient liturgical languages, the marriage of priests, and other ancient customs, are technically designated as the Eastern or Oriental rite, in opposition to the Latin rite.

For the purpose of deliberating and legislating on ecclesiastical affairs, a system of councils or synods has gradually been developed, consisting of oecumenical, national, provincial, and diocesan synods. Ecumenical councils are such as represent the entire Church, and to which now all the ordained bishops of the Church are invited. The Church now numbers twenty of these councils, the latest of which—the Vatican Council—was held from Dec. 8, 1869, to Oct. 20, 1870. (For a list of the first nineteen, see COUNCILS.) Up to the Vatican Council, large portions of the Church, including many bishops and provincial synods, have asserted the superiority of an oecumenical council over the pope. After the proclamation of the infallibility of the pope, it is no longer possible for any Roman Catholic to claim for an oecumenical council any kind of superiority. A national council is one consisting of all the archbishops and bishops of a country, under the presidency of the primate. The Church law makes no provision for their regular periodicity, and they have generally been convoked for some special reason. Provincial synods are meetings of the bishops of an ecclesiastical province under the presidency of the metropolitan or archbishop. Diocesan synods are meetings of the clergy of a diocese under the presidency of the bishop. The Ecumenical Council of Trent desired to introduce these two classes of synods to a larger extent than had been the case before into the regular organism of the Church, and therefore provided that a provincial synod was to be held every third year in each ecclesiastical province, and a diocesan synod annually in each diocese. This provision, however, has been carried out but very imperfectly, and in the 18th century the diocesan synods fell into disuse in every country of Europe except Italy.

The pope is assisted in the government of the universal Church by the college of cardinals, which is divided into cardinal bishops, cardinal priests, and cardinal deacons. The bishops of every grade are, in a similar manner, aided in the government of their dioceses by a chapter, and frequently by an assistant bishop. The diocese is divided into parishes, a number of which is generally united into a deanery, at the head of which is a dean. The papal almanac (*La Gerarchia Cattolica*) for 1878 publishes the following summary of the Catholic hierarchy: The full number of the members of the college of cardinals is 73; namely, 6 cardinal bishops, 51 cardinal priests, and 16 cardinal deacons. Of patriarchal sees there are 12, 7 of which belong to the Latin and 5 to the Oriental rite. The number of archiepiscopal sees in December, 1877, was 172, of which 151 belonged to the Latin and the remainder to several Oriental rites. Of the Latin archbishops, 13 were immediately subject to the Holy See, and 138 were connected with ecclesiastical provinces. Of the Oriental archbishops, 1 Armenian, 1 Græco-Romanian, and 1 Græco-Ruthenian are at the head of ecclesiastical provinces; 4 Græco-Melchite, 4 Syrian, 5 Syro-Chaldean, 5 Syro-Marionite are subject to the patriarchs of the several rites. Of episcopal dioceses there were 719, of

which 664 belonged to the Latin and 55 to several Oriental rites. If we add the six suburban sees of the cardinal bishops, the total number of episcopal sees would be 725, of which 670 belong to the Latin rite. Immediately subject to the Holy See are 87 Latin and 4 Eastern (3 Græco-Ruthenian, 1 Græco-Bulgarian) bishops; 577 Latin sees and 8 Oriental (1 Armenian, 3 Græco-Roumanian, and 4 Græco-Ruthenian) were suffragans in ecclesiastical provinces; 43 Oriental bishops (16 Armenian, 9 Græco-Melchite, 8 Syrian, 7 Syro-Chaldean, and 3 Syro-Maronite) were subjects to the patriarchs of the several rites. There were also 18 sees not connected with a diocese (*nullius in dioceseos*); their occupants are 12 abbots, 1 archabbot, 1 archimandrite, 1 archpriest, 1 provost, and 2 prelates.

Where it is found impracticable to establish dioceses in accordance with the provisions of the canonical law, vicars apostolic are appointed in place of bishops. They are placed under the immediate supervision of the Congregation of Propaganda, which is charged with a general superintendence of missionary districts. Besides vicars apostolic, the pope appoints for the superintendence of churches in non-Catholic countries apostolic delegates and apostolical præfects, both of whom are likewise placed under the Congregation of Propaganda. The aggregate of delegates, vicars, and præfects was (in 1878) 154, making a total of 1148 hierarchical titles. The total number of dignitaries composing the Catholic hierarchy, inclusive of the assistant bishops, was 1198. The Catholic hierarchy received a very large increase during the pontificate of Pius IX. The number of bishoprics raised to the rank of archbishoprics was 24; number of archbishoprics created, 5; number of bishoprics created, 132; of sees, *nullius in dioceseos*, 3; of apostolic delegations, 3; of vicariates apostolic, 33; of præfects apostolic, 15; total, 215 hierarchical titles.

A large proportion of the new episcopal and archiepiscopal sees belong to English-speaking countries. The

to this the 63 archbishops and bishops holding office in the United States, the total number of episcopal dignitaries in the English-speaking world at the beginning of 1879 was 189, being about one sixth of the entire Catholic hierarchy of the world. The steady advance of British dominion in all parts of the world, and the rapid development of the United States, Australia, British North America, and other English-speaking territories, cannot fail to increase rapidly the numerical strength of the English-speaking bishops in the Roman Catholic hierarchy.

An important element in the Catholic hierarchy is the religious associations, orders of men and women whose members live together in convents. They are very numerous and have various organizations. They are more or less exempt from the jurisdiction of the bishops, and placed under the special jurisdiction of their own superiors, most of whom reside in Rome. While the aim of the oldest of these communities was the attainment, by retirement from the world, of a higher religious perfection, they have in the course of time regarded an active participation in the ministrations of the clergy as an important part of their duties. Their strict organization has especially enabled them to take the lead in the direction of the foreign missions of the Church, and display a remarkable activity in the province of education. Most of the popes have valued their services very highly, and conferred upon them extensive privileges.

IV. *Statistics.*—The Roman Catholic Church still continues to be by far the most numerous branch of Christianity. The following table gives an estimate of the Roman Catholic population of each of the large divisions of the world, and of the relation of Roman Catholics to the total population, the Eastern churches, and the Protestant churches, including in the last division all Christians not belonging to either the Roman Catholic or the Eastern churches:

	Population.	Roman Catholic.	Protestant.	Eastern Churches.
America, North.....	59,000,000	23,000,000	35,000,000	—
America, South.....	27,000,000	25,000,000	400,000	—
Europe.....	312,500,000	149,000,000	74,600,000	75,000,000
Asia (including the Indian Archipelago).....	831,000,000	9,400,000	600,000	9,500,000
Africa.....	206,000,000	2,200,000	1,100,000	3,500,000
Australia and Polynesia.....	4,500,000	600,000	2,000,000	—
Total.....	1,439,000,000	209,200,000	113,700,000	88,000,000

hierarchy of England and Wales, as restored Sept. 29, 1850, by letters apostolic of Pius IX, comprises the province of Westminster, consisting of the archiepiscopal see of Westminster and twelve suffragans. In the United States 34 new episcopal sees were established during the pontificate of Pius, and 10 sees raised to archbishoprics. The first addition made by pope Leo XIII to the Catholic hierarchy was the restoration of the hierarchy of Scotland on March 4, 1878. It comprises the archiepiscopal see of Glasgow, which is without suffragan sees, and the province of St. Andrew's and Edinburgh, which consists of the archiepiscopal see of St. Andrew's and Edinburgh, with four suffragan sees. At the beginning of 1879 the British empire had 14 archbishops, 76 bishops, 33 vicars apostolic, and 7 præfects apostolic. Of the archbishoprics, 1 was in England, 2 in Scotland, 4 in Ireland, 4 in British North America, 1 in the West Indies, 2 in Australia; of the bishoprics, 12 in England, 4 in Scotland, 24 in Ireland, 2 in the European colonies, 1 in Africa, 18 in North America, 1 in the West Indies, 11 in Australia, 3 in New Zealand; of the vicariates apostolic, two thirds are in the Asiatic possessions. Most of these vicariates are at present held by archbishops and bishops who take their title from their see *in partibus infidelium*. Including eight coadjutors or auxiliary bishops, the total number of archbishops and bishops holding office in the British empire at the beginning of 1879 was 123, a larger number than is at present found in any other country except only Italy. Adding

It will be seen from the above table that the total number of Roman Catholics still exceeds the aggregate number of all other Christians. Among the large continents, South America is almost exclusively Catholic, only two territories (British and Dutch Guiana), together with the Falkland Islands, being under Protestant governments. Many of the other countries are gradually receiving a Protestant population by immigration. The largest number of immigrants is found in Brazil; a smaller number in Chili and the Argentine Confederation. In Europe, the Roman Catholics are about one half of the total population; they are increasing at a slower ratio than the Protestants and the Eastern churches, because in some of the largest Catholic countries, as France and Spain, the natural increase of the population is slower than in most countries of Europe. In North America, which very rapidly rises in the scale of continents, Roman Catholicism is in a decided minority, although in Mexico and Central America nearly the entire population is still connected with it. The same is the case with Australia, where the total population increases with still greater rapidity than in North America, and where the Roman Catholics are a decided minority in each of the colonies. A continuance of the rapid increase of the population of North America and Australia, together with a continuance of the numerical proportion between Protestants and Catholics, would materially change the relative position of both in the list of the prominent religions of the world. Outside

of Europe, America, and Australia, the Roman Catholic Church predominates in the Spanish, Portuguese, and French colonies, the most populous of which, the Philippine Islands, have a Catholic population now estimated at about 6,000,000. In Western Asia, one entire Eastern communion, the Maronites, and fragments, more or less considerable, of all the others, have connected themselves with the Church of Rome. In Hindostan, Anam, and China, an aggregate population of about 2,000,000 has for several hundred years adhered to that Church, in spite of repeated and bloody persecutions; and even in Japan under the new era of religious toleration which has been opened by the establishment of intercourse with the Christian nations of Europe and America, descendants of the former Catholics to the number of about 20,000 have openly declared themselves as still attached to the Church. Though this Church continues to make some progress in all her mission fields, no conquests have been made in the 19th century equal to the success of the Jesuit missionaries in Eastern Asia in the 16th and 17th centuries, or to that of the Protestant missionaries in the 19th century in Madagascar. It is a noteworthy fact that the Latin nations of Europe and America are almost a unit in their adhesion to the Roman Catholic Church. The Reformation having been suppressed in the 16th century by force in all the Latin countries, the Waldenses in Italy, and some of the French-speaking cantons of Switzerland, with a few hundred thousand Reformed Frenchmen, were, at the beginning of the 19th century, the only dissenters from Rome in Latin Europe and America. The introduction of religious toleration begins to make notable inroads upon the religious uniformity of some of these countries. Thus, the number of native Protestants was in 1878 estimated in Spain at 12,000, in Mexico at 12,000; Italy had 170 new evangelical congregations and 111 stations; and in France and Belgium a number of prominent men advised the liberal Catholics to sever their connection with Rome, and even if they were not prepared to embrace fully the doctrines of one of the Protestant churches, to inscribe themselves in the civil registers as Protestants. The principality of Roumania, which became an entirely independent state in 1878, also speaks a language chiefly of Latin origin, and is, therefore, sometimes classed with the Latin nations. Of its population, no more than one per cent. belongs to the Roman Catholic Church. With the restoration of the German empire under Protestant rule, the Roman Catholic Church has almost wholly lost any controlling influence upon the Teutonic nations. Great Britain, with a number of inchoate colonial states, Germany, Sweden, Norway, Denmark, and Holland, are an unbroken phalanx of Protestant states. The government of polyglot Austria can hardly be called any longer Teutonic. In Belgium, a Teutonic nationality is united with a Latin into one state, which nominally is wholly Catholic, though it is now, like Austria, Italy, Portugal, and many other nominally Catholic states, under a liberal administration, which is in open conflict with the demands of the Catholic hierarchies. Of the Slavic nationalities, several, like the Poles and Czechs, are predominantly Roman Catholic; but there is now no Catholic Slavic state. The governments of all the Slavic states—Russia, Servia, Montenegro, and Bulgaria—belong to the Orthodox Eastern Church. To the same Church belongs nearly the entire population of the kingdom of Greece, in which the Roman Catholic Church numbers a population of only 12,000 souls, or less than one per cent.—The Roman Catholics constitute a majority in only six entirely independent states of Europe, viz. Portugal, Spain, Italy, France, Belgium, and the Austro-Hungarian monarchy. In the last-named state the Roman Catholics constitute, among the inhabitants of Austria proper, 92 per cent., and in the lands of the Hungarian crown 59 per cent. In France they are 98, and in each of the four other states more than 99 per cent. In North and South America the Roman Catholics are a majority in Mexico,

the five states of Central America, in Brazil, and the nine republics of South America, constituting in each of these sixteen states more than 99 per cent.

V. *Literature*.—As the Roman Catholic Church is indissolubly connected with the history of the Christian religion, the manuals of Church history are the principal sources of information on its history. The most important works of this class have been enumerated in the article CHURCH HISTORY. The Creeds of the Roman Catholic Church may be found in Danz, *Libri Symbolici Ecclesiæ Romano-Catholicæ* (Weimar, 1835); Streitwolf and Klenner, *Libri Symbolici Ecclesiæ Catholicæ, Coniuncti atque Notis Prolegomenis Indicibusque Instructi* (Gött. 1838, 2 vols., which contains the *Conc. Trid.*, the *Professio Fidei Tridentina*, and the *Catechismus Romanus*); Denzinger, *Enchiridion Symbolorum et Definitionum quæ de Rebus Fidei et Morum a Conciliis Œcumenicis et Summis Pontificibus Manarunt* (4th ed. Würzb. 1865, which includes the definition of the immaculate conception of the Virgin Mary [1854], and the *Papal Syllabus* [1864]); Schaff, *Creeds of Christendom* (N. Y. 1877; vol. ii includes all the Latin creeds from the Confession of Peter to the Vatican decrees). Belarmin's *Disputationes*, Bossuet's *Exposition*, Möhler's *Symbolik*, and Perrone's *Prælectiones Theologicæ* are regarded as the ablest Roman Catholic expositions of the Roman Catholic system. Among Protestant expositions of the Roman Catholic doctrines, the most notable are the *Symboliks* of Marheineke, Köllner, and Baier, and Hase's *Handbuch der protestantischen Polemik* (3d ed. Leips. 1871). A full account of the constitution of the Roman Catholic Church is given in the manuals of Church law. Among the best works on this subject are Schulte, *Lehrbuch des kath. Kirchenrechts* (3d ed. 1873); and Richter, *Lehrbuch des kath. u. evangel. Kirchenrechts* (1877, 8th ed. by Dove). The largest work on the statistics of the Roman Catholic Church is Neher, *Kirchliche Geographie und Statistik* (1864-68, 3 vols.), containing Europe and America. A complete list of the Roman hierarchy is annually published at Rome under the title *La Gerarchia Cattolica*. (A. J. S.)

ROMAN CATHOLIC CHURCH IN THE UNITED STATES.—I. *Origin and Progress*.—1. As the discovery of America by Columbus occurred a quarter of a century before the first public appearance of Luther, the Roman Catholic Church was the first to occupy the newly discovered world. The attachment of Columbus to his Church was so strong that efforts have recently been made, though without success, to obtain from the pope his canonization. Many of the following explorers were equally fervid in their faith. Ojeda, who in 1510 settled the Isthmus of Darien, is said by Catholic historians to have been as pious as a monk. Balboa, governor of Darien, who in 1513 discovered the Pacific Ocean; Magellan, who first raised the cross on the most southern cape of America (1521); Cartier, the discoverer of Canada (1534); Champlain, the first governor of Canada; La Salle, the pioneer navigator of the Great Lakes—are all praised for their piety. The Upper Mississippi was discovered by the Jesuit Marquette. For more than a hundred years (1492-1607) no permanent settlement was made by Protestants in the New World. The few attempts which had previously been made by French Huguenots in South Carolina and Florida, and by the English on Roanoke Island (1585 and 1587), had failed. The Spaniards, in the meanwhile, not only laid the foundation of Catholic colonial empires throughout South America, Mexico, and Central America, but they also formed settlements in territory now belonging to the United States, the oldest of which, St. Augustine, was founded in 1565.

Nearly forty years before, in 1528, the first Catholic missionaries set foot within our present territory, forming part of the expedition of Narvaez to Florida. One of their number, John Juarez, had been appointed by the pope bishop of Florida. Bishop Juarez, and one of his companions, John of Palos, perished probably in

the same year, either of hunger or at the hand of the Indians. In 1549 a Dominican friar, Louis Cancer, was slain by an Indian of Florida after he had barely landed. The first Catholic Church was erected in St. Augustine, soon after the foundation of the town by Melendez; and from this centre many Franciscan, Dominican, and Jesuit missionaries began to labor among the Indians of Florida, Alabama, Georgia, and Carolina. The most celebrated religious establishment of these missions was the Franciscan monastery of St. Helena at St. Augustine. The missions began to grow until the cession of Florida by Spain to England in 1763, which proved a fatal check, and gradually led to the entire destruction of the mission, which at the beginning of the Revolutionary War had become entirely extinct.

The first Catholic missionaries in New Mexico were two Franciscan monks, father Padilla and brother John of the Cross, who accompanied in 1542 the exploring expedition of Coronado. They began to preach in two Indian towns, but both soon perished. Three other Franciscans, who in 1581 erected a new mission, shared the same fate. The foundation of Santa Fé, in 1582, the second oldest city of the United States, laid the firm foundation of the Catholic Church at the headwaters of the Rio Grande, where gradually whole tribes embraced the Catholic religion. Texas was visited as early as 1544 by a Franciscan missionary, father de Olmos, but the real foundation of the Texan missions, which gradually became very extensive, was laid in 1688 by fourteen Franciscan priests and seven lay brothers.

The first Catholic mission of California was begun in 1601 by a band of Franciscan monks; but the real founder of the Church in that state was father Juniper Serra, an Italian Franciscan, who in 1769 established the first mission in San Diego, and in 1776, a few days before the declaration of the independence of the United States (June 27), founded the city of San Francisco. In 1570, father Segura and eight other Jesuit fathers landed in Chesapeake Bay, Maryland, with the son of an Indian chief whom Spanish navigators had brought away with them from that region, and who had received a good education in Spain. All of them were treacherously murdered at the instigation of this Indian youth. Sixty-four years later, in 1634, two English Jesuits, fathers Andrew White and John Altham, who accompanied Lord Baltimore, resumed the missionary labors among the Maryland Indians, and in 1639 they reported that many tribes had been visited, numerous converts made, and four permanent stations established.

The first Catholic chapel in New England was reared by French missionaries on Neutral Island, in Schoodic River, Maine, in 1609, eleven years before the foundation of Plymouth. In 1612, a new mission was established on Mount Desert Island, but it was soon after destroyed by the English. In 1646, father Druillettes, a Jesuit, who has been called by Catholic historians the apostle of Maine, established a mission on the Upper Kennebec, which gradually succeeded in converting the entire tribe of the Abnakis. The cession of Canada by the French to the English in 1763 interrupted for some time the Catholic mission among the Abnakis; but after the Revolutionary War it was reorganized, and has since then continued to exist until the present day.

The first Catholic missionary among the Indians in the State of New York was father Jogues, a Canadian Jesuit. He attempted in 1646 to found a mission among the Mohawks, and was massacred in the village of Caughnawaga (now Schenectady). The first Catholic church was established in November, 1655, among the Onondagas, on the site of the present city of Syracuse; but three years later the missionaries barely escaped with their lives from a plot to destroy them. The close of a bloody war between France and the Five Nations in 1666 led to the re-establishment of the old missions, and to the foundation of new ones among the Onondagas, Senecas, Cayugas, Oneidas, and Mohawks. In 1668

the cross, as a Catholic historian says, "towered over every village from the Hudson to Lake Erie," and the Mohawks especially "became firmly attached to the Church;" but the recognition by France of the English claims to the State of New York, in the treaty of Utrecht, 1713, was the death-knell of the Catholic missions among the Indians of New York. Among the Indians of Vermont mass was said for the first time in 1615.

The regions along the Great Lakes, in the present states of Michigan and Wisconsin, were first visited by Canadian Jesuits in 1641. The field proved ungrateful, and the missions terminated when the French government suppressed the houses of Jesuits and confiscated their property. All along the banks of the Mississippi, the shores of which were discovered by Marquette in 1673, the Jesuits preached and established missions. Among the Indians converted by them was Chicago, the chief of the Illinois. With the suppression of the Order of the Jesuits and the increase of English power, the Catholic missions among the Indians generally disappeared from the Gulf of St. Lawrence to the Gulf of Mexico. After the establishment of the independence of the United States, some of the Indian missions were gradually re-established, but their progress was slow. In 1833 the bishops of the United States assembled at the Council of Baltimore confided the Indian missions in the United States to the Jesuits. Catholic historians complain (Murray, *Popular Hist.* etc., p. 343) that "the Catholics of the United States have shown little interest in the Indian missions, and done little to cheer and support the missionaries." The latter had to look to Europe for the necessary means. The most famous among the Jesuit missionaries of the 19th century was father De Smet, a Belgian, who is compared by the historians of his Church to Francis Xavier, and is said "to have opened heaven to over 100,000 Indians."

2. The proper history of the Catholic Church in the English colonies begins with the immigration of Leonard Calvert, second son of Lord Baltimore, and about 200 English and Irish Catholics, into Maryland. Lord Baltimore, who had left the Anglican communion for the Church of Rome, had received (June 20, 1632) from king Charles I the grant of a large tract of land lying north of the Potomac, for founding a Catholic colony in the New World as a refuge from persecution. The charter drawn up by him guaranteed liberty of worship to all Christians, and secured a voice to all freemen in making the laws. He died soon after the charter had received the royal sanction, and his eldest son, Cecil Calvert, second Lord Baltimore, commissioned his brother Leonard Calvert to carry out their father's design, and appointed him governor of the new colony. Leonard Calvert, with his colonists, landed in 1634, and in the same year the city of St. Mary was founded. The colonists were accompanied by two Jesuits, who were soon followed by several more Jesuits and Capuchins. A civil contest between the new colonists, on the one hand, and Captain William Clayborne, who with a party of men from Virginia had settled, in 1631, on Kent Island, Chesapeake Bay, and a company of Puritans who had settled in Maryland in 1642, on the other hand, resulted in favor of Clayborne and the Puritans, who made themselves complete masters of the province. Thereupon the Catholics were in 1644 deprived of equal rights, but these were restored in 1646. In 1649 the General Assembly of Maryland, composed of eleven Catholics and three Protestants, passed the Toleration Act, which enacted that no person believing in Jesus Christ should be molested in the free exercise of his religion. The Toleration Act was repealed in 1654 by an assembly in which the Puritans had a majority, and which denied the protection of the law to the Catholics; but in 1660 the new king, Charles II, restored Lord Baltimore to his rights as proprietor, and thus the Catholics received back their rights. In 1692, after the expulsion of James II, an Anglican governor was sent to

Maryland, and in 1704 a law was passed to prevent "the increase of popery." The stringent provisions of this act remained in force until the Revolution; only the first provision, which forbade bishops and priests to say mass or exercise their ministry, was so far modified that "Catholics were permitted to hear mass in their own families and on their own grounds."

The colony of Pennsylvania was founded by Penn on the basis of religious toleration, and the Catholic immigrants from Ireland and Germany were allowed to live in comparative peace, but their creed was regarded with contempt. In the Dutch colony of New Netherlands, Protestantism was declared to be the religion of the State, but actually the few Catholics appear not to have been troubled. In 1664 the colony passed into the hands of the Catholic duke of York, afterwards James II, and its name was changed to New York. In 1683 the colony received a Catholic governor, colonel Thomas Dongan; and in the same year the first legislative assembly of the colony granted, like Maryland, religious liberty to all "professing faith in God by Jesus Christ." After the expulsion of James, another assembly in 1691 repealed the Toleration Act of 1683, and passed stringent laws against the Catholics. In 1696 only seven Catholic families were found on Manhattan Island. New laws of extreme severity were passed against Catholics in 1700, 1701, and 1702; and at the beginning of the Revolutionary War the Catholic Church was almost unknown in New York, and the few Catholic inhabitants of New York city had to go to Philadelphia to receive the sacraments. The laws of the New England colonies, of Virginia, the Carolinas, and Georgia, retained rigid penal laws against Roman Catholics on their statute-books. At the beginning of the Revolutionary War, out of the 3,000,000 inhabitants in the American colonies, only about 25,000 were Roman Catholics, of whom 15,000 lived in Maryland. There were about twenty-five priests and about twice as many congregations.

3. On the eve of the War of Independence, the Continental Congress of Philadelphia, in 1774, pronounced for the broadest toleration. In 1776 the Catholics of Maryland were fully emancipated, owing largely to the influence of Charles Carroll, one of the signers of the Declaration of Independence. The other twelve original states, one after another, granted the Catholics liberty of conscience, the right to build churches and worship as they pleased; but full and unreserved equality of civil and political rights was withheld from them in some of the states much longer. The Federal Constitution, adopted in 1787, provides in art. vi, sec. 3: "No religious test shall ever be required as a qualification for any office or trust under the United States." Among the framers and signers of this Constitution were two Catholics—Daniel Carroll, of Maryland, and Thomas Fitzsimmons, of Pennsylvania. The right thus obtained was further secured by the enactment of the first article of the amendments to the Constitution, which declares "that Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

Until the close of the Revolutionary War, the Catholics of the United States were under the jurisdiction of the vicar apostolic of the district of London, England, who, during the whole of the war, held no kind of intercourse with the American churches. After the establishment of the independence of the United States, the clergy of Maryland and Pennsylvania were naturally impressed with the importance of having an American superior for American churches, and they asked the pope to allow the clergy to elect a superior, subject to the approbation and confirmation of the pope. In reply to the request, the pope, after consulting Benjamin Franklin through the nuncio in Paris, appointed in 1784 the Rev. Dr. Carroll præfekt apostolic, with many of the powers of a bishop. In view of the extraordinary difficulties which the new præfekt en-

IX.—F

countered from the vastness of his territory, and also from the insubordination of several priests and a part of the laity, it was soon deemed necessary to apply to Rome for a bishop. The request was granted, with the privilege of selecting the candidate and of locating the new see. Accordingly, Dr. Carroll was elected bishop, and Baltimore chosen as his see. On Aug. 15, 1790, Dr. Carroll was consecrated bishop in England. The number of Catholics at this time was estimated by Dr. Carroll himself at about 30,000, in a total population of 3,200,000. Of these, 16,000 lived in Maryland, 7000 in Pennsylvania, 3000 at Detroit and Vincennes, 2500 in Illinois, and in all the other states there were not more than about 1500. The arrival, between 1791 and 1799, of twenty-three French priests who fled from France in consequence of the Revolution, enabled bishop Carroll to extend and partly consolidate his vast diocese. Many of the immigrant priests were men of considerable ability; and six of them—Flaget, Cheverus, Dubois, David, Dubourg, and Maréchal—afterwards became bishops. Another important addition to the ranks of the priests was made in 1795 by the consecration of the young Russian prince Demetrius Augustine Gallitzin, who displayed great and successful activity for the extension of the Catholic Church in Western Pennsylvania. In 1787, the first priest appeared in Kentucky; in 1789, the first church was commenced in Charleston, S. C.; in 1803, the first church was consecrated in Boston. Several missionaries began to penetrate into the almost trackless wilds of Indiana, Ohio, and Michigan. Soon after the dawn of the 19th century, the great tide of immigration from the Old World began to set in, and as a large portion of it came from Catholic Ireland, the Catholic Church in the United States increased very rapidly in number. The city of New York, which had in 1790 a Catholic population of about 100, numbered 14,000 Catholics in 1807. At the same time there were about 70 priests and 80 churches in the United States, with a Catholic population of probably 150,000.

With the external expansion, the progress of internal organization kept pace. In Nov., 1791, bishop Carroll convened the first diocesan synod in Baltimore, which was attended by 22 clergymen. In 1800 father Leonard Neale was appointed his coadjutor, with the title of bishop of Gortyna *in partibus*. In 1808 Baltimore was raised to the rank of a metropolitan see, with four suffragan bishoprics—New York, Philadelphia, Boston, and Bardstown (this see was in 1842 transferred to Louisville). The purchase of Louisiana from France in 1803 added to the American Church a new diocese, New Orleans, which had been erected in 1793. As the see was vacant at the time of the purchase, Dr. Carroll was directed by Pius VII to administer its ecclesiastical affairs. He accordingly appointed a vicar-general, but the contentions which arose on the subject of jurisdiction led to protracted discords. Archbishop Carroll died Dec. 3, 1815, the last years of his episcopate having been marked by the continuance of a very rapid increase of the Catholic population, which at this time was estimated at 200,000. A number of religious orders, especially Jesuits, Sulpitians, Augustinians, Dominicans, and Carmelites, not only swelled the numbers of the clergy, but established a number of Catholic institutions of learning. Archbishop Carroll was succeeded by Dr. Ambrose Maréchal, after whose death, in 1828, Dr. James Whitfield became archbishop. Yielding to the urgent advice of the learned bishop of Charleston, Dr. England, archbishop Whitfield in 1829 assembled the first provincial council of Baltimore. Several new episcopal sees had in the meanwhile been established, and the provincial council was attended by the bishops of Charleston, Bardstown, Cincinnati, Boston, and St. Louis. As all the bishops had at this time numerous conflicts with the lay trustees, who claimed the right of electing the priests and administering the Church property, the council passed two decrees against the abuse of power

by lay trustees. Another decree strongly recommended the establishment of a society for the diffusion of good books. The Catholic population of the United States was estimated by the assembled fathers at 500,000, the rapid increase being chiefly due to the stream of immigration from Ireland. The second provincial council of Baltimore, in 1833, was composed of ten prelates, and directed that the Indian tribes of the Far West and the Catholic negroes of Liberia should be confided to the care of the Jesuits. The mission of Liberia, which was begun in 1842, proved a complete failure, and was abandoned in 1845. At the date of the second council the Church consisted of 12 dioceses, with 308 priests, of whom 72 were Americans, 91 Irish, 73 French, 17 Italians, 89 Belgians and Germans, some English and Spanish, and 1 Pole. Archbishop Whitfield died in 1834, and was succeeded by Samuel Eccleston. During his administration five more provincial councils were held in Baltimore, in the years 1837, 1840, 1843, 1846, and 1849. Most of these councils recommended the erection of new episcopal sees, the number of which, therefore, received a large increase. While there were only sixteen in 1840, they numbered twenty-seven in 1850. The council of 1840 also recommended the formation of Catholic temperance societies; that of 1846 chose "the Most Blessed Virgin, conceived without sin, as the patroness of the United States;" and that of 1849, which was attended by twenty-five bishops, asked the pope for the definition of the immaculate conception as a doctrine of the Catholic Church, a request which a few years later was complied with by pope Pius IX.

Many dioceses during this period were greatly troubled by conflicts between the bishops and the lay trustees of the churches. The latter were often unwilling to abandon the control of the churches which had been built by the contributions of the faithful, and the bishops were inflexible in claiming the sole control over the entire Church property of their dioceses. Repeatedly priests and congregations were excommunicated. Sometimes excommunicated priests defied for years the authority of the bishops; but finally the bishops carried their point, and the trustee system was completely crushed out, chiefly through the efforts of John Hughes, bishop of New York. The steady progress of Roman Catholicism, which the majority of Americans continued to regard as a form of ecclesiastical despotism, irreconcilable with, and therefore dangerous to, the free political institutions of the country, led, from 1834 to 1844, in several cities to popular outbursts of Protestant indignation, and even to unlawful attacks upon Catholic church edifices and monasteries.

The immense influx of Catholic immigrants from Ireland and Germany during the decade from 1840 to 1850, which annually added more than 200,000 Catholics to the population of the country, and the great industrial advantages which the people generally derived from the more rapid development of the resources of the country, gradually softened the popular feeling with regard to a religious system which had so long been an object of intense aversion. The spread of the Roman Catholic Church in consequence of immigration was most rapid in the Middle Atlantic and the Western States, which could offer to immigrants the best prospects of material success. The Southern States, with their negro-labor system, offered the least inducement to immigrants, and consequently received the smallest increase of Catholic population. In 1846 Oregon City was raised to the rank of a metropolitan see; in 1847, St. Louis; in 1850, New Orleans, New York, and Cincinnati. Thus in 1850 the Catholic Church had 6 archbishoprics, with 27 episcopal sees, 1800 priests, 1073 churches, 600 stations, 29 ecclesiastical institutions, 17 colleges, and 91 female academies. The Catholic population, which had received a large increase not only by the continuance of immigration, but by the cession of California and New Mexico to the United States, was estimated at 3,500,000.

In May, 1852, archbishop Kenrick of Baltimore, who had succeeded in 1851 archbishop Eccleston, presided over the first plenary or national council of the United States. It was composed of six archbishops and twenty-six bishops, and, besides proposing to the pope the creation of several new dioceses, it strongly urged the necessity of establishing Catholic schools, and solemnly condemned secret societies, especially the Freemasons. In 1858 the pope conferred the rank of primacy on the see of Baltimore. Archbishop Kenrick died in 1864, and was succeeded by Dr. Spalding, formerly bishop of Louisville. In 1866 the second plenary council was held in Baltimore. It was presided over by archbishop Spalding, and seven archbishops, thirty-eight bishops, three mitred abbots, and over one hundred and twenty theologians took part in the deliberations. The council expressed a wish for the establishment of a Catholic university. The Vatican Council, which began in 1869, was attended by forty-nine prelates of the United States. Only a few of them were opposed to the promulgation of papal infallibility as a doctrine of the Catholic Church, and all readily acquiesced in the decision of the council. The Old Catholic movement in some countries of Europe found no echo in the United States. Archbishop Spalding of Baltimore died in 1872, and was succeeded by James Roosevelt Bayley, bishop of Newark. In 1875 archbishop McCloskey of New York was raised to the dignity of the cardinalate, and the dioceses of Boston, Philadelphia, Milwaukee, and Santa Fé were raised to the rank of metropolitan sees. Thus the number of archbishoprics in the United States rose to eleven. After the death of archbishop Bayley, in October, 1877, bishop James Gibbons of Richmond was appointed archbishop of Baltimore. The number of episcopal dioceses in 1879 was 49; of vicariates apostolic, 7; of prefectures apostolic, 1. The total number of dioceses (including archdioceses, vicariates apostolic, and prefectures apostolic) was 68. Many of the dioceses have a large Roman Catholic population. Sadlier's *Catholic Directory* for 1879 claims, according to reports furnished by the bishops for each of the following dioceses, a Catholic population exceeding 200,000: Baltimore, 300,000; Boston, 310,000; Cincinnati, 200,000; New Orleans, 250,000; New York, 600,000; Albany, 200,000; Brooklyn, 200,000; Philadelphia, 275,000; St. Louis, 250,000; Chicago, 230,000. The number of priests in 1876 was 5074; that of churches, 5046; that of stations, 1482.

II. *The religious orders of men and women* which have been since the beginning of the 19th century the object of hostile legislation in nearly every country of Europe, have never been legally interfered with in the United States. Consequently, their history shows a steady increase of number; and they have grown all the more rapidly, as the expulsion of many orders from European countries and the urgent applications of the American bishops, who have always been, and still are, in need of more missionaries, have frequently induced large numbers of European nuns and monks to settle in the United States. In 1877 there were, according to Murray's *Popular History of the Catholic Church in the United States* (N. Y. 1877), twenty-seven different religious orders of men in the United States. Three of these (the Franciscans, Dominicans, and Jesuits) worked as early as the 16th century among the Indians; the Augustinians and Sulpitians founded their first establishments in 1790 and 1791. The Trappists followed in 1805, the Priests of the Mission in 1816, the Redemptorists in 1832. Eight religious orders established themselves between 1840 and 1850, and eleven between 1850 and 1877. One of the orders, the Paulists, arose in the United States, opening its first house in New York in 1858. Among the orders which have the largest number of members and houses are the Jesuits, with 30 houses and 750 members; the Christian Brothers, with 49 houses and 700 members; the Augustinians, with 13 houses and 60 members; the Priests of the Mission,

with 13 houses and 142 members; the Benedictines, with 12 houses and 300 members; the Brothers of Mary. In all, there are about 260 establishments of religious orders of men, with more than 3000 members. The religious orders of women are much more numerous than those for men. In all, there are forty-four religious orders of women, four of which (the Sisters of Charity, the Sisters of St. Joseph, the Sisters of Mercy, and the School Sisters of Notre Dame) have each more than one thousand members.

III. *Educational Establishments.*—As the Catholic Church is opposed to the principle of undenominational schools which prevails in all the states of the Union, strenuous endeavors have been made to gather the children of Catholic parents into parochial schools. The first council of Baltimore, held in 1829, expressed the wish that schools should be established where youth might imbibe principles of faith and morality along with human knowledge. The second plenary council of Baltimore warmly appealed to pastors and people to establish Catholic schools where the Catholic faith might be taught as a science. The bishops, accordingly, have endeavored to provide not only for the establishment of colleges, seminaries, and academies, which, as with other religious denominations, have a sectarian character, but to connect as much as possible with every parish church a Catholic parochial school. The number of schools of this character is at the present time very large, and in some of the older and more populous dioceses nearly every church has its parochial school. The number of Catholic schools in 1877 exceeded 1700, and the number of children educated in them was over 500,000. The teachers are to a large extent supplied by the religious orders. Though the expenses for supporting these schools are comparatively small, the aggregate amount which has annually to be raised by voluntary contributions is felt as a heavy burden, and incessant efforts are made, therefore, to obtain a part of the common-school fund of the states for the support of schools of a strictly Catholic character. Only in a few exceptional cases have these efforts been successful; as a general rule, the claims of the Church have been uncompromisingly rejected.

The number of Catholic female academies has grown with great rapidity. Towards the close of the last century, the Clarist Nuns, during a brief stay in America, opened a school at Georgetown, D. C., which subsequently passed into the hands of the Visitation Nuns, and grew into a flourishing academy which dates its foundation from 1799. The purchase of Louisiana from France gave to the Catholic Church of the United States an Ursuline academy at New Orleans, with 170 pupils. The foundation of St. Joseph's Academy at Emmettsburg, Md., in 1809, by mother Seton, marks an epoch in the history of Catholic education for young American women. In 1812 the Loretto Nuns of Kentucky entered the field; in 1818 the Ursuline Convent was opened at Boston, and the Ladies of the Sacred Heart began their labors at the South. The Sisters of St. Joseph founded their first establishment in 1836; the Sisters of Notre Dame, in 1840; the Sisters of the Holy Cross and the Sisters of Providence, in 1841; the School Sisters of Notre Dame (founded by Peter Fourier), in 1847. Other orders followed, and in 1877 the number of Catholic female academies exceeded 400, the best and most widely known of which were under the direction of the Ladies of the Sacred Heart, the Sisters of Charity, the Visitation Nuns, the Ursulines, the Sisters of St. Joseph, the Sisters of Mercy, the Sisters of the Holy Cross, the Sisters of Notre Dame, and the Sisters of Providence. It is maintained that in not a few of the convent boarding-schools one third, and in some cases even one half, of the pupils are Protestant and other non-Catholic young ladies.

In the 17th century an attempt to found a Catholic college in New York was made by three Jesuits during governor Dongan's term of office, but it did not find suf-

ficient support. Several years after the Revolution, bishop Carroll founded Georgetown College. Some time later, St. Mary's College, Baltimore, was established. It was chartered in 1805. Mount St. Mary's, Emmettsburg, stands next in point of age. In 1878 there were in the United States seventy-eight Catholic colleges and seminaries with power to confer degrees. Among the largest colleges are St. John's College, Fordham, N. Y.; the University of Georgetown, D. C., with a literary, a medical, and a law department of forty professors, a library of 30,000 volumes, an astronomical observatory, a conservatory of plants, and cabinets; Mount St. Mary's College, Emmettsburg, Md.; St. Louis University, St. Louis, Mo.; St. Joseph's College, Alabama; St. Xavier's College, Cincinnati, O.; the College of the Holy Cross, Worcester, Mass.; the College of St. Francis Xavier, New York; and Santa Clara College, California.

The first theological seminary in the United States was opened in 1791 in Baltimore. Mount St. Mary's Seminary, Emmettsburg, was founded in 1809; St. Joseph's Seminary, near Bardstown, Ky., in 1811. In 1878 there were 23 theological seminaries, with about 1300 ecclesiastical students.

Catholic normal schools have been established at St. Francis, Wis., and at Baltimore, Md. The following table gives the number of higher Catholic schools, and the number of pupils of parochial schools, in each of the ecclesiastical provinces:

Ecclesiastical Provinces.	Higher Schools.	Pupils in Catholic Parish Schools.
1. Baltimore.....	59	18,000
2. Boston.....	43	30,000
3. Cincinnati.....	111	30,000
4. Milwaukee.....	27	38,000
5. New Orleans.....	82	12,000
6. New York.....	122	80,000
7. Oregon City.....	14	?
8. Philadelphia.....	68	43,000
9. St. Louis.....	88	68,000
10. San Francisco.....	24	?
11. Santa Fé.....	10	?
Total.....	648	about 500,000

IV. *Statistics.*—Owing to the large influx of Catholics from Ireland and Germany, and the acquisition of large Catholic territories from France and Mexico, the Roman Catholic population of the United States has increased at a much more rapid rate than the total population of the United States. The following table, giving the estimated Roman Catholic and the total population of the United States at different periods of our history, is instructive:

Year.	Total Population.	Roman Catholic Population.	Fractional Part of Total Population Formed by Roman Catholics.
1776	3,000,000	25,000	$\frac{1}{120}$
1790	3,200,000	30,000	$\frac{1}{107}$
1800	5,300,000	100,000	$\frac{2}{53}$
1810	7,200,000	150,000	$\frac{1}{48}$
1820	9,600,000	300,000	$\frac{3}{32}$
1830	13,000,000	600,000	$\frac{1}{21}$
1840	17,000,000	1,500,000	$\frac{1}{11}$
1850	23,300,000	3,500,000	$\frac{1}{7}$
1860	31,500,000	4,500,000	$\frac{1}{7}$
1876	40,000,000	6,500,000	$\frac{1}{6}$

It is the unanimous opinion of the foremost Catholic writers on the history of the Catholic Church in the United States that their Church has suffered from its first organization to the present time very large losses; and that though many accessions have been received from other religious denominations, the losses by far exceed the gains. Bishop England of Charleston remarked in 1836: "We ought, if there were no loss, to have five millions of Catholics; and as we have less than one million and a quarter, there must be a loss of three millions and a quarter at least. We may unhes-

itatingly assert that the Catholic Church has within the last fifty years (1786-1836) lost millions of members in the United States." Bishop Spalding of Peoria (in his *Life of Archbishop Spalding*) likewise states: "To confine ourselves to the period in which the hierarchy has been in existence (1790-1870), we have lost in numbers far more than we have gained, if I may express an opinion beyond all doubt." The same opinion is often and forcibly expressed by Dr. O. Brownson and other prominent Catholic writers. Some of the writers referred to (as bishop Spalding) console themselves with the hope "that the number of those who are here lost to the faith is, in proportion to the Catholic population of the country, continually decreasing, while the number of converts each year grows larger." From some dioceses accessions are reported to the Church of persons born of non-Catholic parents which are larger than those reported from any other country save England. Archbishop Spalding of Baltimore claimed that of 22,209 persons confirmed by him in five years, 2752 were "converts." Bishop Gibbons of Richmond (now archbishop of Baltimore) claimed that 14 per cent. of those who were confirmed by him since he came to the diocese of Richmond were "converts," and in North Carolina 35 per cent. A comparatively large number of men who have attained great prominence in the history of the Roman Catholic Church have entered that Church as adults, and as seceders from other religious communions. Among these men are archbishops Bayley of Baltimore, and Wood of Philadelphia; bishops Rosecranz of Columbus, and Wadhams of Ogdensburg; father Hecker, the superior of the Paulists; Dr. Ives, a bishop of the Protestant Episcopal Church; Dr. O. Brownson; and mother Seton, the foundress of the Sisters of Charity.

The following tables give the lists of the archbishops, bishops, and vicariates apostolic, with the number of priests, churches, and members in each, the year of their foundation and their territorial extent. Thus it not only presents a summary of the Church at the beginning of 1879, but it exhibits its gradual growth and its comparative strength in different parts of the Union:

1. ECCLESIASTICAL PROVINCE OF BALTIMORE.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Baltimore..... (Archbishopric, 1808.)	1789	258	127	800,000
2. Charleston.....	1820	16	15	10,000
3. Richmond.....	1821	27	22	18,000
4. Savannah.....	1850	27	25	25,000
5. St. Augustine.....	1870	10	20	10,000
6. Wheeling.....	1850	30	63	18,000
7. Wilmington (Del.).....	1866	16	25	14,000
8. North Carolina (V.A.).....	1868	7	13	1,700
Total.....		391	310	896,700

2. ECCLESIASTICAL PROVINCE OF BOSTON.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Boston..... (Archbishopric, 1875.)	1808	213	137	310,000
2. Burlington.....	1853	32	65	35,000
3. Hartford.....	1844	100	93	150,000
4. Portland.....	1855	65	77	80,000
5. Providence.....	1872	88	62	136,000
6. Springfield.....	1871	98	56	150,000
Total.....		596	520	861,000

3. ECCLESIASTICAL PROVINCE OF CINCINNATI.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Cincinnati..... (Archbishopric, 1833.)	1822	168	197	200,000
2. Cleveland.....	1847	159	197	125,000
3. Columbus.....	1868	59	77	60,000
4. Covington.....	1853	56	52	40,000
5. Detroit.....	1832	127	194	175,000
6. Fort Wayne.....	1857	97	112	80,000
7. Louisville.....	1808	121	102	150,000
8. Vincennes.....	1834	122	154	85,000
Total.....		909	1085	915,000

4. ECCLESIASTICAL PROVINCE OF MILWAUKEE.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Milwaukee..... (Archbishopric, 1844.)	1844	228	260	195,000
2. Green Bay.....	1868	73	109	65,000
3. La Crosse.....	1868	48	94	46,000
4. Marquette.....	1857	19	28	24,000
5. St. Paul..... and Saint Marie.	1865
6. St. Paul.....	1868	108	168	115,000
7. Northern Minnesota (V. A.).....	1875	44	42	18,500
Total.....		520	701	463,500

5. ECCLESIASTICAL PROVINCE OF NEW ORLEANS.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. New Orleans..... (Archbishopric, 1870.)	1793	262	94	250,000
2. Galveston.....	1847	41	35	25,000
3. Little Rock.....	1843	16	28	4,000
4. Mobile.....	1824	35	26	6,000
5. Natchez.....	1887	25	41	12,500
6. Natchitoches.....	1863	15	17	30,000
7. San Antonio.....	1874	37	47	45,000
8. Brownsville (V. A.).....	1874	22	10	30,000
Total.....		353	293	402,500

6. ECCLESIASTICAL PROVINCE OF NEW YORK.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. New York..... (Archbishopric, 1850.)	1808	250	150	600,000
2. Albany.....	1847	163	164	200,000
3. Brooklyn.....	1853	135	79	200,000
4. Buffalo.....	1847	150	135	100,000
5. Newark.....	1863	178	134	100,000
6. Ogdensburg.....	1872	53	81	55,000
7. Rochester.....	1868	60	79	65,000
Total.....		989	822	1,323,000

7. ECCLESIASTICAL PROVINCE OF OREGON.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Oregon..... (Archbishopric, 1846.)	1846	23	22	20,000
2. Nesqually.....	1850	15	23	11,500
3. Idaho (V. A.).....	1868	13	14	5,650
Total.....		51	59	37,150

8. ECCLESIASTICAL PROVINCE OF PHILADELPHIA.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Philadelphia..... (Archbishopric, 1875.)	1809	232	128	275,000
2. Erie.....	1853	61	81	45,000
3. Harrisburg.....	1868	100	93	150,000
4. Pittsburgh.....	1843	184	130	125,000
5. Scranton.....	1876
6. Scranton.....	1868	57	70	50,000
Total.....		634	502	645,000

9. ECCLESIASTICAL PROVINCE OF ST. LOUIS.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. St. Louis..... (Archbishopric, 1847.)	1826	250	207	250,000
2. Alton.....	1857	140	165	100,000
3. Chicago.....	1844	204	194	230,000
4. Dubuque.....	1837	189	155	120,000
5. Leavenworth.....	1877	69	104	70,000
6. Nashville.....	1887	27	29	10,000
7. Peoria.....	1877	60	93	60,000
8. St. Joseph.....	1868	26	30	18,000
9. Nebraska (V. A.).....	1859	54	59	39,000
Total.....		1019	1036	897,000

10. ECCLESIASTICAL PROVINCE OF SAN FRANCISCO.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. San Francisco..... (Archbishopric, 1853.)	1853	128	103	180,000
2. Grass Valley.....	1863	31	35	14,000
3. Monterey and Los Angeles.....	1850	38	35	24,000
Total.....		197	173	218,000

11. ECCLESIASTICAL PROVINCE OF SANTA FÉ.

	Estab- lished.	Priests.	Churches.	Roman Catholics.
1. Santa Fé.....	1850	52	29	109,000
(Archbishopric, 1875.)				
2. Arizona (V. A.).....	1869	14	18	30,000
3. Colorado (V. A.).....	1868	21	41	20,000
4. Indian Territory (P. A.).....	1876	4	..	3,780
Total.....		91	88	162,780

V. *Periodicals*.—The *Shamrock*, an Irish-American paper established in New York in 1815, and edited by Thomas O'Connor, father of the distinguished jurist Charles O'Connor, is named as the first American journal to which the term Catholic may be applied, as it incidentally defended Catholic as well as Irish interests. The real founder of Catholic journalism in America was bishop England of Charleston, who in 1822 established the *United States Catholic Miscellany* at Charleston, S. C. It was discontinued in 1861. Among the Catholic journals still (1879) existing, the *Catholic Telegraph* of Cincinnati, established in 1831, and the *Pilot* of Boston, established in 1837, are the oldest. Since then the number has been largely increased. Among the weekly organs of the Church, besides those already named, the *Freeman's Journal* of New York, edited by James A. McMaster, and the *Tablet*, likewise of New York (which has counted among its frequent contributors Dr. O. Brownson, Mrs. J. Sadlier, and Dr. J. V. Huntington), are best known. The *Catholic World* of New York, established in 1865 by I. T. Hecker, the founder of the Order of the Paulists, stands at the head of the magazines in age and rank. When Dr. O. Brownson, a journalist of considerable note, became in 1844 a Roman Catholic, he of course turned the service of the periodical edited by him to the defence of the Catholic Church, and thus gave to the Romanists of the United States their first Quarterly Review. *Brownson's Review* was suspended in 1864, revived in 1873, but finally discontinued a short time before the author's death. It was succeeded by the *American Catholic Quarterly Review*, established in Philadelphia in 1876, and edited by Dr. James A. Corcoran. Among the daily papers of the United States the Roman Catholic Church is feebly represented. Murray, in his *Popular History of the Catholic Church in the United States* (5th ed. 1877, p. 553), says, "There is not a daily paper in the United States fit for a Catholic child to read." This remark, however, can only be applied to the daily papers published in the English language; for the German Catholics had at the same time five daily papers, expressly established for the defence of Catholic interests and fully under Catholic control. The *Weltanschauung über die kath. Presse* ("Review of the Catholic Press of the World," Würzburg, 1878) enumerates 109 Roman Catholic papers of the United States, of which 36 were published in German, 2 in German as well as in English, 3 in French, 2 in Polish, 1 in Bohemian, and the others in English.

VI. *Literature*.—The principal works on the history of the Roman Catholic Church in the United States are the following: De Courcy, *Catholic Church in the United States* (transl. by Shea); McGee, *Catholic Hist. of North America*; Shea, *Hist. of the Catholic Missions in the United States*; Murray, *Popular Hist. of the Catholic Church in the United States* (5th ed. 1877); Clarke, *Lives of the Deceased Bishops of the Catholic Church in the United States* (2 vols.); Bayley, *Sketch of the Catholic Church on New York Island*; Fitton, *Hist. of the Church in New England*; Finotti, *Bibliographia Catholica Americana*; O'Connell, *Catholicity in the Carolinas and Georgia* (N. Y. 1879); Murray, *Catholic Education in the United States* (1879); Neher, *Kirchliche Geographie und Statistik von Amerika* (Ratisbon, 1868). The latest statistics from official reports of the bishops are annually published in Sadlier's *Catholic Directory*, *Almanac*, and *Ordo* (New York). (A. J. S.)

Roman Catholic Emancipation (or Relief)

Acts. After the Reformation, both in England and in Scotland, Roman Catholics were subjected to many legal penal regulations and restrictions. As late as 1780, the law of England—which, however, was not always rigidly enforced—made it felony in a foreign Roman Catholic priest and high-treason in a native to teach the doctrines or perform the rites of his Church. Roman Catholics could not acquire land by purchase. If educated abroad in the Roman Catholic faith, they were declared incapable of succeeding to real property, which went to the next Protestant heir. A son or other nearest relation being a Protestant was empowered to take possession of the estate of his Roman Catholic father or other kinsman during his life. A Roman Catholic could not be guardian even of Roman Catholic children; he was excluded from the legal profession; and it was a capital offence for a Roman Catholic priest to celebrate a marriage between a Protestant and a Roman Catholic. In 1780 it was proposed to repeal some of the severest disqualifications in the case of those who would submit to the following test. This test included an oath of allegiance to the sovereign, an abjuration of the Pretender, and a declaration of disbelief in the several doctrines that it is lawful to put heretics to death, that no faith is to be kept with heretics, that princes may be deposed or put to death, and that the pope is entitled to any temporal jurisdiction within the realm. This bill eventually passed into law in England. In 1791 a bill was passed affording further relief to such Roman Catholics as would sign a protest against the temporal power of the pope and his authority to release from civil obligations. In the following year, by the statute 33 Geo. III, c. 44, the severest of the penal restrictions were removed from the Scottish Roman Catholics upon taking a prescribed oath and declaration. The agitation in Ireland caused by these restrictions led to the Irish rebellion of 1798, while the union of 1800 was brought about by means of pledges regarding the removal of the disabilities in question. The agitation upon the subject increased; and at last the duke of Wellington was brought to the conviction that the security of the empire would be imperilled by further resistance of the Roman Catholic claims, and in 1829 a measure was introduced by the duke's ministry for Catholic emancipation. An act having been first passed for the suppression of the Roman Catholic Association—which had already voted its own dissolution—the celebrated Roman Catholic Relief Bill was introduced by Mr. Peel in the House of Commons on March 5, and, passing both houses, received the royal assent April 13. By this act (10 Geo. IV, c. 7) an oath is substituted for the oaths of allegiance, supremacy, and abjuration, on taking which Roman Catholics may sit or vote in either house of Parliament, and be admitted to most offices from which they were formerly excluded. Restrictions which existed on Roman Catholic bequests were removed by 2 and 3 Will. IV, c. 115, as regards Great Britain, and by 7 and 8 Vict. c. 60, with relation to Ireland. Later acts abolished a few minor disabilities.

Roman Empire, the government of the Romans as conducted by the emperors, of whom Augustus was the first. The history of the Roman Empire, properly so called, extends over a period of rather more than five hundred years, viz. from the battle of Actium, B.C. 31, when Augustus became ruler of the Roman world, to the abdication of Augustulus, A.D. 476. The empire, however, in the sense of the dominion of Rome over a large number of conquered nations, was in full force and had reached wide limits some time before the monarchy of Augustus was established. The notices of Roman history which occur in the Bible are confined to the last century and a half of the commonwealth and the first century of the imperial monarchy. But in order to appreciate these, some particulars of the condition of the Roman state is necessary. We have not, however, the

intention of entering into an account of the rise, progress, state, and decline of the Roman power, but merely to set forth a few of the more essential facts, speaking a little less briefly of the relations formed and sustained between the Romans and the Jews. These, although comparatively late, became eventually important to the last degree. For a description of the capital city, see *Rome*.

I. History.—The foundations of Rome lie in an obscurity from which the criticism of Niebuhr has done little more than remove the legendary charm. Three tribes, however, according to the oldest account, formed the earliest population—namely, the Ramnenses (probably Romanenses, still further abbreviated into Ramnes), the Titienses (shortened into Tities, from Titus Tatius, their head), and the Luceres (probably an Etruscan horde, who migrated to Rome from Solonium, under Lucumo). In order to increase his population, and with a view to that conquest which he afterwards achieved, and which was only a small prelude to the immense dominion subsequently acquired, Romulus opened in Rome an asylum, inviting thereto those who, for whatever cause, fled from the neighboring cities. To Rome accordingly there flocked the discontented, the guilty, the banished, and the aspiring, freemen and slaves. Thus were laid the foundations of the future mistress of the world, according to the ordinary reckoning, B.C. 753, the number of inhabitants at the first not exceeding, it is supposed, four thousand souls. What it arose to in the period of its greatest extent we have not the means of ascertaining. (See below.)

Though the date of the foundation of Rome coincides nearly with the beginning of the reign of Pekah in Israel, it was not till the beginning of the 2d century B.C. that the Romans had leisure to interfere in the affairs of the East. When, however, the power of Carthage had been effectually broken at Zama, B.C. 202, Roman arms and intrigues soon made themselves felt throughout Macedonia, Greece, and Asia Minor. The first historic mention of Rome in the Bible is 1 Macc. i, 10, where it is stated that there arose "a wicked root, Antiochus, surnamed Epiphanes, son of Antiochus the king, who had been an hostage at Rome." About the year B.C. 161, when Judas Maccabæus heard of the defeat of Philip, Perseus, and Antiochus, and of the great fame of the Romans, he sent an embassy to them to solicit an alliance, and to obtain protection against the Syrian government (1 Macc. viii, 1 sq.; comp. 2 Macc. xi, 34; Josephus, *Ant.* xii, 10, 6; Justin, xxxvi, 3). The ambassadors were graciously received, and Demetrius was ordered to desist from harassing the Jews; but before the answer arrived Judas was slain, having valiantly engaged the whole army of Bacchides sent by Demetrius into Judæa (1 Macc. xi, 1-18; Josephus, *Ant.* xii, 11, 1). In B.C. 143, Jonathan renewed the alliance with the Romans (1 Macc. xii, 1-4, 16; Josephus, *Ant.* xiii, 5, 8), the embassy being admitted before the senate (*τὸ βουλευτήριον*), and on his death, the same year, his brother Simon, who succeeded him, sent also to Rome to again seek a renewal of friendship. The Romans readily acceded to his request, and the valiant deeds of Simon and his predecessors were engraved on tables of brass. Shortly afterwards, Simon sent Numenius to Rome with a great shield of gold, of a thousand pounds' weight, to confirm the league with them. The senate at once consented to its re-establishment, and recognised him as high-priest and prince of Judæa. The tables of brass on which the league was written were set up in the Temple (1 Macc. xiv, 17 sq.; Josephus, *Ant.* xiii, 7, 3). Lucius, the consul of the Romans, wrote to several kings and nations requesting them to assist the Jews (1 Macc. xv, 16-23). See *LUCIUS*. Hyrcanus, the successor of Maccabæus, again sent (in B.C. 129) an embassy to Rome, which was favorably received, confirming the alliance already concluded (Josephus, *Ant.* xiii, 9, 2). In the year B.C. 66, Pompey arrived in the East to take command of the Roman armies, and sent his general, Scarus, to Syria. While at Damascus, the

latter received an offer of 400 talents from Aristobulus and Hyrcanus, who were both fighting for the kingdom, each one wishing to be aided. Scarus accepted the offer of Aristobulus, and ordered Aretas, who was assisting Hyrcanus, to withdraw his forces, or he would be declared an enemy to the Romans (*ibid.* xiv, 2, 3). The following year Pompey came into Syria, and deprived Antiochus XIII (Asiaticus) of his kingdom, reducing it to a Roman province. Ambassadors were sent to Pompey from the rival princes, and in B.C. 64, when Pompey returned to Damascus from Asia Minor, their respective causes were heard by him. Notwithstanding the prejudices of the people in favor of Aristobulus, Pompey, perceiving the weakness of character and imbecility of Hyrcanus, seemed to incline towards the latter, knowing that it was better to have a weak man under the Roman control. He, however, left the matter undecided, and Aristobulus, seeing that his case was lost, withdrew to make preparations for defence (*ibid.* xiv, 2, 3). Pompey then occupied himself in reducing the forces of Aretas, and afterwards marched against Aristobulus, who fled to Jerusalem. Aristobulus, on his approach, met him, and offered him a large sum of money, and Pompey sent Gabinius to receive it; but on his arrival at Jerusalem he found the gates closed. Aristobulus was then thrown into prison, and Pompey marched to Jerusalem. Hyrcanus opened the gates to him, while the party of Aristobulus, including the priests, shut themselves up in the Temple and withstood a siege of three months. Pompey, observing that the Jews did not work on the seventh day, gained material advantage, and at last took the place by assault, killing, according to Josephus, as many as 12,000 persons, even desecrating the Temple by entering the holy of holies (comp. Tacitus, *Hist.* v, 9), though he did not touch any of the treasures. Hyrcanus was then appointed high-priest and governor of the country, but was forbidden to wear a diadem (comp. Josephus, *Ant.* xx, 10). Tribute was also exacted of him, and Pompey took Aristobulus and his two sons, Alexander and Antigonus, prisoners to Rome, whence they subsequently escaped (*ibid.* xiv, 3, 2; 4, 2; 3, 4; *War.* i, 7, 6; Strabo, xvi, p. 763).

The restoration of Hyrcanus was, however, merely nominal, as the Idumæan Antipater, an active friend of the Romans, was placed over him as governor of Judæa. "Now began the struggle which was destined to continue with little intermission for nearly two hundred years. It was nourished by feelings of the deadliest animosity on both sides; it was signalized by the most frightful examples of barbarity, in which each of the contending parties strove to outdo the other; but it was directed by a controlling Providence to a beneficial consummation, in the destruction of the Jewish nationality, and the dispersion throughout the world of the Christian communities." (See Merivale, *Romans under the Empire* [Lond. 1865, 8 vols. 8vo], vol. iii, ch. xxix, where the events of the period are admirably summed up). In the year B.C. 57, Alexander, the eldest son of Aristobulus, escaped from Pompey, and took up arms in Judæa. Hyrcanus upon this applied for assistance to Gabinius, the Roman proconsul of Syria, who thereupon sent Mark Antony with a large force into Judæa. Antony, being joined by Antipater with the forces of Hyrcanus, defeated Alexander, and compelled him to fly to Alexandria. Gabinius soon after arrived, and, through the mediation of the mother of Alexander, made peace with him and allowed him to depart. After these matters were settled, Gabinius went to Jerusalem, and there committed the care of the Temple to Hyrcanus, thus changing the government from a monarchy to an aristocracy. At the same time, he instituted five councils (*συνέδρια*) instead of the two sanhedrims which had existed in every city, and he distributed these five among five cities. These were Jerusalem, Gadara, Amathus, Jericho, and Sepphoris, in Galilee (Josephus, *Ant.* xiv, 5, 4). In B.C. 54 Gabinius

was superseded in the government of Syria by Crassus, who plundered the Temple of about 10,000 talents, notwithstanding that a beam of gold of immense value had been given him, on condition that he would touch nothing else in the Temple (*ibid.* xiv, 7, 1). All this time Antipater was gaining influence with the Romans; and after the death of Pompey, in B.C. 48, he was very useful to Julius Cæsar in his war against Egypt. In return for this, he made Antipater procurator of Judæa, gave him the privilege of a citizen of Rome, and freedom from taxes everywhere. Hyrcanus also was confirmed in the priesthood and ethnarchy, the claims of Antigonus, the only surviving son of Aristobulus, being set aside, and thus the aristocratic constitution of Gabinius was abolished (*ibid.* xiv). The ascendancy and prosperity of Antipater were now insured. At this period he had four sons. Two of them, Phasaël and Herod, were holding important posts, the former being governor of Jerusalem, and the latter governor of Galilee. Finally, Antipater's son, Herod the Great, was made king by Antony's interest, B.C. 40, and confirmed in the kingdom by Augustus, B.C. 30 (*ibid.* xiv, 14; xv, 6). The Jews, however, were all this time tributaries of Rome, and their princes in reality were mere Roman procurators. Julius Cæsar is said to have exacted from them a fourth part of their agricultural produce in addition to the tithe paid to Hyrcanus (*ibid.* xiv, 10, 6). Roman soldiers were quartered at Jerusalem in Herod's time to support him in his authority (*ibid.* xv, 3, 7). Tribute was paid to Rome, and an oath of allegiance to the emperor as well as to Herod appears to have been taken by the people (*ibid.* xvii, 2, 2). On the banishment of Archelaus, A.D. 6, Judæa became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Cæsarea. Galilee and the adjoining districts were still left under the government of Herod's sons and other petty princes, whose dominions and titles were changed from time to time by successive emperors. See HEROD.

The Jewish people, being at last worn out with the disputes and cruelties of the Herods, sent a mission to Rome, begging that Judæa might be made a Roman province. In the year A.D. 6, Archelaus was banished, and Judæa put under the government of Rome. The first procurator appointed was Coponius, who accompanied Cyrenius (the Greek form of the Roman name *Quirinus*) into Syria. The latter had been sent to take an account of their substance, and to make a census or ἀπογράφη [see CHRONOLOGY; CYRENIUS] of the inhabitants of Judæa (Luke ii, 1; Josephus, *Ant.* xvii, 13, 5; xviii, 1, 1; *War.* ii, 8, 1). In A.D. 9 Coponius was succeeded by Marcus Ambivius, who remained at the head of the government till A.D. 12, and was then replaced by Annius Rufus. On the accession of Tiberius, Valerius Gratus was made procurator, a post he filled for eleven years, and was succeeded (A.D. 26) by Pontius Pilate (Josephus, *Ant.* xviii, 2, 2), who entered Jerusalem with the military ensigns, on which were the effigies of the emperor. The Jewish law forbids the making of images, and a great tumult arose, and shortly Tiberius ordered him to withdraw them (*ibid.* xviii, 3, 1; *War.* ii, 9, 3). Pilate tyrannically governed the Jews till A.D. 36; and at last, owing to continual complaints, was ordered by Vitellius, the president of Syria, to proceed to Rome to give an account of his administration. Tiberius died before he arrived, and he put an end to his life at the commencement of the reign of Caius (Caligula) (Josephus, *Ant.* xviii, 3, 1-3; 4, 1; *War.* ii, 9, 2; Euseb. *H. E.* ii, 7). It was during his administration that our Lord was condemned and crucified (Matt. xxvii; Mark xv; Luke iii, 1; xxiii; John xviii, xix). On Pilate's departure, Marullus was appointed over Judæa by Vitellius (Josephus, *Ant.* xviii, 4, 2). The new emperor, Caius, however, superseded him, and appointed Marcellus procurator of Judæa (*ibid.* xviii, 6, 10). In A.D. 40 Vitellius was recalled, and Petronius sent as presi-

dent of Syria, with orders from Caius to set up his statue in the Temple. This insult caused the whole nation to rise. The intercession of Agrippa, and ultimately the death of the tyrant, prevented this order from ever being executed (*ibid.* xviii; *War.* ii, 10; Philo, *Leg. ad Caium*, 26). In the Acts it is recorded that the churches had rest through all Judæa, Galilee, and Samaria (ix, 31), doubtless owing to the impious attempt of Caligula (Josephus, *Ant.* xviii, 8, 2-9). Under Claudius, who succeeded to the throne in A.D. 41, the Jews had some peace. Agrippa I was nominally king from that period to A.D. 44, when he died, leaving one son. Claudius wished to allow the young Agrippa to rule his father's kingdom, but, evidently by persuasion, sent a Roman procurator to govern the province (Tacit. *Hist.* v, 9). Cuspius Fadus was the first appointed (Josephus, *Ant.* xix, 9, 2; xx, 5, 1), A.D. 45. It was under his administration that a movement of the whole Jewish people broke forth, in consequence of the sacred vestments being placed under his charge. Longinus, the governor of Syria, interfered, an embassy was sent to Rome, and the matter ended in the Jews being permitted to retain these vestments under their care. Judæa was cleared of robbers by the care and providence of Fadus (*ibid.* xx, 1, 1, 2). He was succeeded by Tiberius Alexander, a renegade Jew, and nephew of Philo (*ibid.* xx, 5, 2; *War.* ii, 11, 6). In A.D. 49 Tiberius was recalled, and Ventidius Cumanus appointed in his stead. During his government a fearful tumult ensued, which would have spread far and wide had not Quadratus, the governor of Syria, interfered. The matter ended in the banishment of Cumanus and the appointment of Felix, the brother of Pallas, the favorite of Claudius, as procurator (*Ant.* xx, 6; 7, 1; *War.* ii, 12; comp. Tacit. *Ann.* xii, 54). Felix was procurator A.D. 53-55. Of his government Tacitus speaks: "Per omnem sævitiam ac libidinem jus regum servili ingenio exercuit" (*Hist.* v, 9), and his corruptness is shown by his expecting to receive money from St. Paul (Acts xxiv, 26). He had induced Drusilla, the daughter of Agrippa I, to live with him. She was with him when Paul preached "of righteousness, temperance, and judgment to come" (ver. 25). Felix, however, did some good services while he was in power; for, the country being infested with robbers and impostors, he cleared several parts of it. He also drove out the Egyptian impostor (comp. Acts xxi, 38). These are, doubtless, the very worthy deeds alluded to by Tertullus (xxiv, 2). Bearing ill-will against Jonathan, the high-priest, Felix had him barbarously murdered. By treachery, also, he put to death Eleazar, the captain of a company of robbers (Josephus, *Ant.* xx, 8, 5). At last his misgovernment caused his recall, and Porcius Festus succeeded. His government seems to have been milder (*ibid.* xxi, 8, 9; *War.* ii, 14, 1). He heard Paul with king Agrippa at Cæsarea (Acts xxv, xxvi). Festus died after two years. He was succeeded by Albinus, a bad and cruel man, who, on hearing that Gessius Florus was coming to succeed him, brought out all the prisoners who seemed most worthy of death, and put them to death, and at the same time released many of them, but only on receiving a bribe (Josephus, *Ant.* xx, 9, 5; *War.* ii, 14, 1). He was recalled in A.D. 65, and Gessius Florus appointed in his stead. He was the last and the worst of the Roman procurators (*Ant.* xx, 9, 1; 11, 1; *War.* ii, 14, 1). Josephus does not hesitate to accuse him of the most flagrant and horrid crimes (*Ant.* xx, 11, 1; *War.* loc. cit.); and even Tacitus says that the Jewish patience could endure the yoke no longer—"duravit patientia Judæis usque ad Gessium Florum" (*Hist.* v, 10). In A.D. 66, Cestius Gallus, the præfect of Syria, found it necessary to march a powerful army into Palestine. He was, however, defeated with great loss, and immediately sent word to Nero, laying the whole blame on Florus—Florus, likewise, laying the blame on him. He soon afterwards died, as some have supposed, from chagrin or dis-appointment (Josephus, *War.* ii, 19; Sueton. *l'esp.* 4;

Tacit. *Hist.* v, 10). See GOVERNOR. The following year Nero sent Vespasian into Judæa (Josephus, *War*, iii, 1, 2). (Accounts of the war and siege of Jerusalem will be found in the article JERUSALEM.) In 68, Nero died; Galba, Otho, and Vitellius followed in quick succession; and Vespasian himself was elected emperor by the legions in Judæa. In A.D. 70, Titus was sent by his father to conduct the war; and after a four months' siege Jerusalem was taken. Josephus states that 1,100,000 were killed during the siege (*ibid.* vi, 9, 3), that several were allowed to depart, and an immense number sold to the army and carried captive. These numbers are of course exaggerated. See Luke xxi, 24.

Under Trajan the Jews again broke out into open revolt, and the disturbances continued under Hadrian. At last, A.D. 131, one Bar-cocheba, *the son of a star*, was placed at the head of the Jews. Several times the Roman arms were defeated; but Julius Severus, by reducing their fortresses one by one, finally defeated him in A.D. 135. Dion Cassius says that 580,000 Jewish people were slain in these battles (lxix, 14). This statement is as extravagant as that of Josephus (*ut sup.*).

In A.D. 136 the emperor Hadrian founded a new city, under the name of Ælia Capitolina, to which he gave the privileges of a colony. None but Christians and pagans were allowed to enter (Dion Cass. lxix, 12; comp. Gibbon).

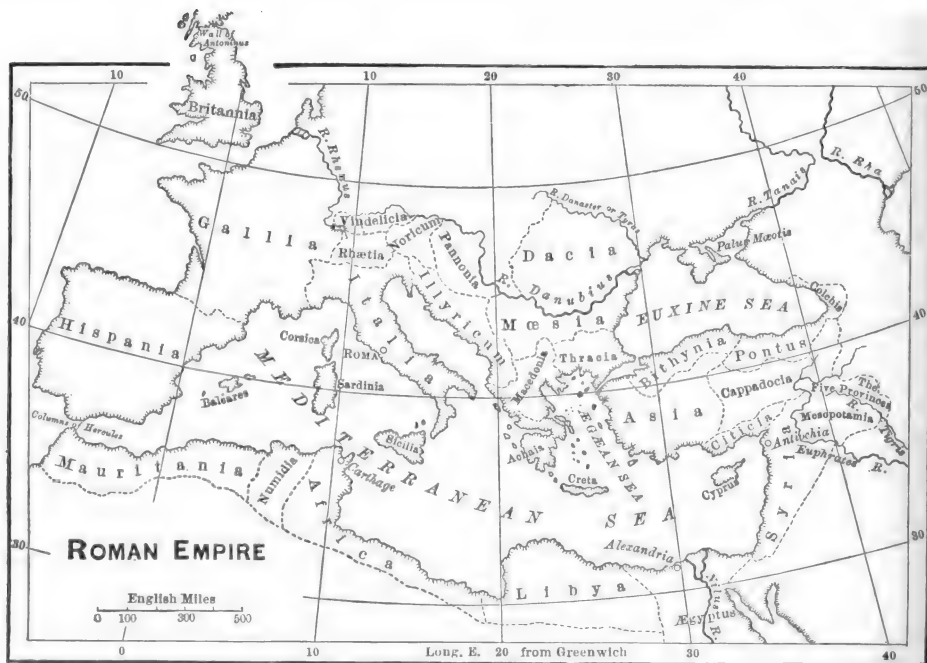

The New Test. history falls within the reigns of Augustus, Tiberius, Caligula, Claudius, and Nero. Only Augustus (Luke ii, 1), Tiberius (iii, 1), and Claudius (Acts xi, 28; xviii, 2) are mentioned; but Nero is alluded to in the Acts from ch. xxv to the end, and in Phil. iv, 22. The Roman emperor in the New Test. is usually called Cæsar (Acts xxv, 10, 11, 12, 21), though sometimes Augustus (Σεβαστός, ver. 21, 25), and once Lord (ὁ κύριος, ver. 26). We thus find many characteristics of the Roman rule constantly before us in the New Test.: we hear of Cæsar the sole king (John xix, 15) of Cyrenius, "governor of Syria" (Luke ii, 2); of Pontius Pilate, Felix, and Festus, the "governors," i. e. procurators, of Judæa; of the "tetrarchs" Herod, Philip, and Lysanias (iii, 1); of "king Agrippa" (Acts xxv, 13); of Roman soldiers, legions, centurions, publicans; of the tribute-money (Matt. xxii, 19); the taxing of "the whole world"

(Luke ii, 1); Italian and Augustan cohorts (Acts x, 1; xxvii, 1); the appeal to Cæsar (xxv, 11). Several notices of the provincial administration of the Romans and the condition of provincial cities occur in the narrative of Paul's journeys (xiii, 7; xviii, 12; xvi, 12, 35, 38; xix, 38). See JUDÆA.

II. *Extent of the Empire.*—Cicero's description of the Greek states and colonies as a "fringe on the skirts of barbarism" (Cicero, *De Rep.* ii, 4) has been well applied to the Roman dominions before the conquests of Pompey and Cæsar (Merivale, *Rom. Empire*, iv, 409). The Roman empire was still confined to a narrow strip encircling the Mediterranean Sea. Pompey added Asia Minor and Syria; Cæsar added Gaul. The generals of Augustus overran the north-west portion of Spain and the country between the Alps and the Danube. The boundaries of the empire were now, the Atlantic on the west; the Euphrates on the east; the deserts of Africa, the cataracts of the Nile, and the Arabian deserts on the south; the British Channel, the Rhine, the Danube, and the Black Sea on the north. The only subsequent conquests of importance were those of Britain by Claudius, and of Dacia by Trajan. The only independent powers of importance were the Parthians on the east and the Germans on the north.

The population of the empire in the time of Augustus has been calculated at 85,000,000 (Merivale, *Rom. Empire*, iv, 442-450). Gibbon, speaking of the time of Claudius, puts the population at 120,000,000 (*Decline and Fall*, ch. ii). Count Franz de Champagny adopts the same number for the reign of Nero (*Les Césars*, ii, 428). All these estimates are confessedly somewhat uncertain and conjectural.

This large population was controlled, in the time of Tiberius, by an army of twenty-five legions, exclusive of the prætorian guards and other cohorts in the capital. The soldiers who composed the legions may be reckoned in round numbers at 170,000 men. If we add to these an equal number of auxiliaries (Tacit. *Ann.* iv, 5), we have a total force of 340,000 men. The prætorian guards may be reckoned at 10,000 (Dion Cass. iv, 24). The other cohorts would swell the garrison at Rome to 15,000 or 16,000 men. For the number and stations of the legions in the time of Tiberius, comp. Tacit. *Ann.* iv, 5.

Map of the Roman Empire, showing the Provinces.

The navy may have contained about 21,000 men (*Les Césars*, ii, 429; comp. Merivale, iii, 534). The legion, as appears from what has been said, must have been "more like a brigade than a regiment," consisting, as it did, of more than 6000 infantry with cavalry attached (Conybeare and Howson, ii, 285).

III. *Home Rule*.—The Roman government was at first kingly. Romulus, the first monarch, was probably succeeded by six others, during a period of two hundred and forty-four years, till in the year B.C. 509 kingly government was abolished when in the hands of Tarquinius Superbus, in consequence of his arrogant and oppressive despotism. A consular form of government succeeded, which was at the first of an essentially aristocratic character, but was compelled to give way by degrees to popular influence, till men of plebeian origin made their way to the highest offices and first honors in the State, when the government became an oligarchy: then fell into anarchy, from which it was rescued by the strong hand of Octavius Cæsar, who became sole master of the world by defeating Antony at Actium on Sept. 2, A.U. 723 (B.C. 31), though it was not till the year 725 that the senate named Octavius Imperator, nor till the year 727 that he received the sacred title of Augustus I. When Augustus became sole ruler of the Roman world, he was in theory simply the first citizen of the republic, intrusted with temporary powers to settle the disorders of the State. Tacitus says that he was neither king nor dictator, but "prince" (*Ann.* i, 9), a title implying no civil authority, but simply the position of chief member of the senate (*princeps senatus*). The old magistracies were retained, but the various powers and prerogatives of each were conferred upon Augustus, so that while others commonly bore the chief official titles, Augustus had the supreme control of every department of the State—above all, he was the emperor (*imperator*). This word, used originally to designate any one intrusted with the *imperium*, or full military authority over a Roman army, acquired a new significance when adopted as a permanent title by Julius Cæsar. By his use of it as a constant prefix to his name in the city and in the camp he openly asserted a paramount military authority over the State. Augustus, by resuming it, plainly indicated, in spite of much artful concealment, the real basis on which his power rested—viz. the support of the army (Merivale, *Rom. Empire*, vol. iii). In the New Test. the emperor is commonly designated by the family name "Cæsar," or the dignified and almost sacred title "Augustus" (for its meaning, comp. Ovid, *Fasti*, i, 609). Tiberius is called by implication ἡγεμὼν in Luke iii, 1, a title applied in the New Test. to Cyrenius, Pilate, and others. Notwithstanding the despotic character of the government, the Romans seem to have shrunk from speaking of their ruler under his military title (see Merivale, *Rom. Empire*, iii, 452, and note) or any other avowedly despotic appellation. The use of the word ὁ κύριος, *dominus*, "my lord," in Acts xxv, 26, marks the progress of Roman servility between the time of Augustus and Nero. Augustus and Tiberius refused this title. Caligula first bore it (see Alford's note in *loc. cit.*; Ovid, *Fasti*, ii, 142). The term βασιλεύς, "king," in John xix, 15; 1 Pet. ii, 17, cannot be closely pressed.

The empire was nominally elective (Tacit. *Ann.* xiii, 4), but practically it passed by adoption (see Galba's speech in Tacit. *Hist.* i, 15); and till Nero's time a sort of hereditary right seemed to be recognised. The dangers inherent in a military government were, on the whole, successfully averted till the death of Pertinax, A.D. 193 (Gibbon, iii, 80); but outbreaks of military violence were not wanting in this earlier period (comp. Wenck's note on Gibbon, *loc. cit.*). The army was systematically bribed by donatives at the commencement of each reign, and the mob of the capital continually fed and amused at the expense of the provinces. We are reminded of the insolence and avarice of the soldiers in Luke iii, 14. The reigns of Caligula, Nero, and Do-

Roman Emperor and Empress.

mitian show that an emperor might shed the noblest blood with impunity, so long as he abstained from offending the soldiery and the populace.

IV. *Foreign Dependencies*.—The subjugated countries that lay beyond the limits of Italy were designated by the general name of provinces. The first provisions necessary on the conquest of a country by the Roman arms were made with a view to secure the possession by the victorious general, in virtue of the power and authority (*imperium*) intrusted to him by the government at home. Accordingly the earliest object of attention was the ordering of the military power, and the procuring of suitable resources for subsisting the troops. These arrangements, however, were made not without a regard to the pacific relations into which the conquerors and the conquered had mutually entered. Acting on the principle that all unnecessary evil was gratuitous folly, the general availed himself of the aid afforded by existing institutions, and only ventured to give displeasure by establishing new ones in cases where the laws and customs of a country were insufficient for his purposes. The civil government was, however, recognised, modified, or remodelled by the conqueror, provisionally, and only until the Roman senate had made its behests known. Ordinarily, however, the general who had conquered the province constituted its government, in virtue of a law or decree of the senate in which the constitution (*forma provincie*) was set forth and established, or the provisional appointments already made were sanctioned and confirmed. In order to complete these structural arrangements, the general received special aid from ten senators appointed for the purpose, whose counsel he was obliged to make use of. In thus reforming the legal and social life of a province, the conquerors had the good sense to act, in general, with prudence and mildness, having regard in their appointments to local peculiarities and existing institutions, so far as the intended adjunction to the Roman power permitted, in order to avoid giving the provincials provocation for opposing their new masters. Under ordinary circumstances the government of the provinces was conducted by authorities sent for the purpose from Rome. Sometimes, however, as we have seen, petty sovereigns were left in possession of a nominal independence on the borders, or within the natural limits, of the province. Such a system was useful for rewarding an ally, for employing a busy ruler, for gradually accustoming a stubborn people to the yoke of dependence. There were differences, too, in the political condition of cities within the provinces. Some were free cities, i.e. were governed by their own magistrates, and were exempted from occupation by a Roman garrison. Such were Tarsus, Antioch in Syria, Athens, Ephesus, Thessalonica. See

the notices of the "politarchs" and "demos" at Thessalonica (Acts xvii, 5-8); also the "town-clerk" and the assembly at Ephesus (xix, 35, 39 [Conybeare and Howson, *Life of St. Paul*, i, 357; ii, 79]). Occasionally, but rarely, free cities were exempted from taxation. Other cities were "colonies," i. e. communities of Roman citizens transplanted, like garrisons of the imperial city, into a foreign land. Such was Philippi (Acts xvi, 12). Such, too, were Corinth, Troas, the Pisidian Antioch. The inhabitants were, for the most part, Romans (ver. 21), and their magistrates delighted in the Roman title of Prætor (*στρατηγός*), and in the attendance of lictors (*βαδουχοί*). Acts xvi, 35 [Conybeare and Howson, i, 315]. See COLONY.

Augustus divided the provinces into two classes—(1) Imperial; (2) Senatorial—retaining in his own hands, for obvious reasons, those provinces where the presence of a large military force was necessary, and committing the peaceful and unarmed provinces to the senate. The imperial provinces, at first, were Gaul, Lusitania, Syria, Phœnicia, Cilicia, Cyprus, and Egypt. The senatorial provinces were Africa, Numidia, Asia, Achaia and Epirus, Dalmatia, Macedonia, Sicily, Crete and Cyrene, Bithynia and Pontus, Sardinia, Bætica (Dion Cass. liii, 12). Cyprus and Gallia Narbonensis were subsequently given up by Augustus, who in turn received Dalmatia from the senate. Many other changes were made afterwards. The governors of those provinces which were assigned to the senate were called proconsuls (*ἀνθύπατος*, deputies; A. V. Acts xiii, 7; xviii, 12; xix, 38), whatever their previous office may have been (Dion. Cass. liii, 13). The imperial provinces, on the other hand, were governed by a Legatus (*πραιβυτήρ*), or proprætor (*ἀντι-στρατηγός*), even if the officer appointed had been consul. The minor districts of the imperial provinces were governed by a procurator (*ἐπίτροπος*, Dion Cass. liii, 15, "steward," Matt. xx, 8). Augustus brought all the procurators under his control (Dion Cass. liii, 32). Under the republic they had managed the affairs of private citizens, but under the empire they discharged the duties performed by the quæstors in the senatorial provinces. They controlled the revenue and collected the taxes, and their power extended from these matters to justice and administration (Tacit. *Hist.* i, 11). The procurators of Judæa seem to have been under the control of the proconsul of Syria, as Quadratus condemned the indiscretion of the procurator Cumanus (Josephus, *Ant.* xx, 6, 8; Tacit. *Ann.* xii, 54). They are called "governors" (*ἡγεμόνες*) in the New Test. The verb *ἡγεμονεύω* is employed in Luke ii, 2 to show the nature of the government of Quirinus over Syria. Asia and Achaia were assigned to the senate, and in each case the title of the governor in the Acts is proconsul (*ἀνθύπατος*, xviii, 12; xix, 38). Dion Cass. (liii, 12) informs us that Cyprus was retained by the emperor; but Sergius Paulus is called in the Acts (xiii, 7) "proconsul." This is quite correct, as Dion adds that Augustus restored Cyprus to the senate in exchange for another district of the empire. Coins and inscriptions of Cyprus also bear the title "proconsul" (comp. Conybeare and Howson, *Life of St. Paul*, i, 173 sq.; Akerman, *Num. Ill. of New Test.* p. 41). See PROCONSUL.

The government of the senatorial provinces lay between the consuls, for whom, after they had completed their consular office, two provinces were appointed; the other provinces were allotted to the prætors. Suetonius adds (*Octav.* 47) that Augustus sometimes made changes in this arrangement. Quæstors, chosen by lot out of those who were named for the year, went with the proconsuls into the provinces of the senate. Into the provinces of the emperor, *legati*, or lieutenants, were sent, with proprætorial power, to act as representatives of their master: they wore the sword as an index of military authority, and had power of life and death over the soldiers—two distinctions which were not granted to the proconsuls, or governors of the senatorial provinces. The imperial lieutenants remained many

years in the provinces; until, indeed, it pleased the emperor to recall them. Quæstors were not sent into the imperial provinces, but their place was supplied by "procuratores," called at a later period "rationales," who were generally taken from the equestrian order. They raised the revenue for the imperial treasury, and discharged the office of paymaster of the army. There was also in the senatorial provinces a procurator, who raised the income intended, not for the treasury, but for the emperor's privy purse: the smaller provinces, like Judæa, which belonged to Syria, were altogether governed by such. See PROCURATOR.

The proconsuls, proprætors, and proprætorial lieutenants, when about to proceed into their several provinces, received instructions for their guidance from the emperor; and in cases in which these were found insufficient, they were to apply for special directions to the imperial head of the State. A specimen of such application may be found in Pliny's letter to Trajan, with the emperor's rescript, regarding the conduct which was to be observed towards the already numerous and rapidly growing sect of Christians. The administration of justice, so far as it did not belong to the province itself, was in the governor or lieutenants assembled in a conventus; an appeal lay from this court to the proconsul, and from him to Cæsar. Criminal justice was wholly in the hands of the local governor, and extended not only over the provincials, but the Roman citizens as well: in important cases the governors applied for a decision to the emperor. The procurator sometimes had the power of life and death, as in the case of Pontius Pilate (Tacitus, *Ann.* xv, 44). See PROVINCE.

Roman Orator and Youth.

The procurator of Judæa resided principally at Cæsarea, and the military forces were generally stationed there (Josephus, *Ant.* xviii, 3, 1). During the Passover the troops were stationed at Jerusalem, in order to prevent any insurrection from the multitude of visitors at that festival (Acts xxi, 31; xxii, 24; xxiii, 23; Josephus, *Ant.* xx, 5, 8). The troops consisted of infantry and cavalry (Acts xxiii, 23), and were commanded by tribunes (*χιλιάρχοι*, ver. 17) and centurions (*κεντυριῶνες*, Mark xv, 39, 44, 45; *καροντάρχου*, Matt. viii, 5; xxvii, 54; Acts x, 1, 22). The former were at the head of the cohorts (*στρίται*), and the latter at the head of the centuria, of which two made a manipule. See ARMY. It was the duty of the soldiers to execute the sentence of death and to keep guard over the prisoners (Matt. xxvii, 27 sq.; John xix, 23 sq.; comp. Acts xxii, 25), and the garments of those who were executed became their perquisite (John xix, 23). They also guarded the prisoners (Acts xxiii, 23; xxvii, 31). In Acts x, 1 mention is made of the Italian band at Cæsarea. This was probably a cohort serving in Syria composed of natives of Italy, and called *Ἰταλική* to distinguish it from those

which consisted of troops raised in Syria (Josephus, *Ant.* xiv, 15, 10; *War*, i, 17, 1), as we know from Gruter (*Inscr.* cccxxxiv, 1) that Italian cohorts were serving in Syria. The *Σπειρή Σεβαστή* (Acts xxvii, 1) could not well be a *cohors Augusta*, for no legions were in Syria or Judea bearing that title, nor could it be the band levied from Samaria (*ἡλὴ ἰππέων καλουμένη Σεβαστηῶν*, Josephus, *Ant.* xix, 9, 2; xx, 6, 1; *War*, ii, 12, 5). Wieseler suggests that it was the *Augustani* mentioned by Tacitus (*Ann.* xiv, 15) and Suetonius (*Nero*, 20, 25). The first levying of this band by Augustus is recorded by Dion Cassius (xlv, 12).

The provinces were heavily taxed for the benefit of Rome and her citizens. In old times the Roman revenues were raised mainly from three sources: 1, the domain lands; 2, a direct tax (tributum) levied upon every citizen; 3, from customs, tolls, harbor duties, etc. The agrarian law of Julius Cæsar is said to have extinguished the first source of revenue (Cicero, *Ad Att.* ii, xvi; Dureau de la Malle, ii, 430). Roman citizens had ceased to pay direct taxes since the conquest of Macedonia, B.C. 167 (Cicero, *De Off.* ii, 22; Plutarch, *Æmil. Paul.* 38), except in extraordinary emergencies. The main part of the Roman revenue was now drawn from the provinces by a direct tax (*κῆνοςος, φόρος*, Matt. xxii, 17; Luke xx, 22), amounting probably to from five to seven per cent. on the estimated produce of the soil (Dureau de la Malle, ii, 418). The indirect taxes, too (*τέλη, vectigalia*, Matt. xvii, 25; Dureau de la Malle, ii, 449), appear to have been very heavy (ibid. ii, 448, 452). Augustus, on coming to the empire, found the regular sources of revenue impaired, while his expenses must have been very great. To say nothing of the pay of the army, he is said to have supported no less than 200,000 citizens in idleness by the miserable system of public gratuities. Hence the necessity of a careful valuation of the property of the whole empire, which appears to have been made more than once in his reign. See CENSUS. Augustus appears to have raised both the direct and indirect taxes (ibid. ii, 433, 448).

The provinces are said to have been better governed under the empire than under the commonwealth, and those of the emperor better than those of the senate (Tacitus, *Ann.* i, 76; iv, 6; Dion, liii, 14). Two important changes were introduced under the empire. The governors received a fixed pay, and the term of their command was prolonged (Josephus, *Ant.* xviii, 6, 5). But the old mode of levying taxes seems to have been continued. The companies who farmed the taxes, consisting generally of knights, paid a certain sum into the Roman treasury, and proceeded to wring what they could from the provincials, often with the connivance and support of the provincial governor. The work was done chiefly by underlings of the lowest class (*portitores*). These are the publicans (q. v.) of the New Test.

On the whole, it seems doubtful whether the wrongs of the provinces can have been materially alleviated under the imperial government. It is not likely that such rulers as Caligula and Nero would be scrupulous about the means used for replenishing their treasury. The stories related even of the reign of Augustus show how slight were the checks on the tyranny of provincial governors. See the story of Licinius in Gaul (Smith, *Dict. of Gr. and Rom. Biog.* s. v.), and that of the Dalmatian chief (Dion, iv). The sufferings of Paul, protected as he was, to a certain extent, by his Roman citizenship, show plainly how little a provincial had to hope from the justice of a Roman governor.

V. *Roman Citizenship*.—Seeing how great the privileges of a Roman citizen were, the eagerness with which it was sought, and the earnestness with which it was pleaded in case of any unjust treatment, is not to be wondered at. The freedom of Rome was often obtained by purchase for great sums (Acts xxii, 28), though at the time of Claudius it is said that it became so cheap that it might be bought for a little broken glass (Dion Cass. ix, 17). A citizen under the republic could in

criminal cases, if he were so minded, appeal from the magistrates to the people, for without the acquiescence of the whole Roman people no man could be put to death (Cicero, *Tusc. Quest.* 4, 1; *In Verr.* 54, 57). At the commencement of the imperial period it was, however, necessary that the appeal should be made to the emperor, who had assumed the privilege of final adjudication. It was thus that Paul, when being tried before Festus, "appealed unto Cæsar" (Acts xxv, 11; xxvi, 32), fulfilling our Lord's words that he should "bear witness also at Rome" (xxiii, 11; xxvii, 23; xxviii, 14, 16, 17; 2 Tim. i, 17; iv, 17). The scourging of a Roman citizen was contrary to the law, and Paul, by the assertion of his Roman citizenship, prevented Claudius Lysias from ordering him to be scourged (Acts xxii, 26–29; xxiii, 27). At an earlier period Paul and Silas had been scourged (xvi, 37), and two Roman laws thereby violated (*Lex Valeria*, B.C. 508; *Lex Porcia*, B.C. 300). They were also illegally treated, being "uncondemned" (Cicero, *Verr.* i, 9; Tacitus, *Hist.* i, 6). See Sigonius, *De Antiquo Jure Civ. Rom.* (Paris, 1572); also in Grævii *Thesaurus*, vol. i; Spanheim, *Orbis Rom.* (Lond. 1703); Cellarii *Dissertatt.* p. 715 sq.; Fabricius, *Bibliograph. Antiq.* p. 724 sq. See CITIZENSHIP.

VI. *Religious Toleration*.—The treatment that the Jews received at the hands of the Romans was at times very moderate. Under Julius Cæsar they were not forbidden to live according to their customs even in Rome itself (Josephus, *Ant.* xiv, 10, 8), and Augustus ordered that they should have full freedom of worship, hold their assemblies, and make gifts to their Temple; they were even admitted with the citizens to a share in the largesses of corn (Philo, *Ad Cai.* p. 1015; comp. Horace, *Sat.* i, 9, 69); and when it fell upon the Sabbath day, Augustus allowed it to be put off to the next day. They were also exempted from military service on account of their religious prejudices (Josephus, *Ant.* xiv, 10, 11–19; xvi, 6; comp. xix, 5, 3). Suetonius (*Cæs.* 84) records that the Jews were in great grief at the death of Augustus. Tiberius and Claudius banished them from Rome, the latter on account of tumults caused by a certain Chrestus (Tacitus, *Ann.* ii, 85; Suetonius, *Tib.* 36; comp. Josephus, *Ant.* xviii, 3, 5; Suetonius, *Claud.* 25; Acts xviii, 2); but the expulsion by Claudius is contradicted by Dion Cassius (ix, 6), and a few years after the Jews were again at Rome in great numbers (Acts xxviii, 17 sq.). The interference of the Roman government was confined to keeping peace at the great festivals at Jerusalem; for which purpose a guard was stationed in the fortress of Antonia, overlooking the city (xxii, 24). The administration of religious ceremonies was committed to the high-priest and Sanhedrim; civil and criminal jurisprudence was retained by them, and they were allowed to pass the sentence of condemnation, but its execution depended upon the procurator (Josephus, *Ant.* xx, 9, 1; Mark xiv, 53–55, 62–65). They were also permitted to inflict lesser punishments, especially for infractions of the Mosaic law; but the power of life and death was taken from them (John xviii, 31). (See Alford's note on this passage, and Biscoe *On the Acts*, p. 134–167.) The stoning of Stephen probably took place during a tumult, and not with the sanction of the procurator (Acts vii, 28). Even beyond the borders of Palestine the Jews exercised among themselves the civil jurisdiction according to their laws. Josephus (*Ant.* xiv, 10, 17) gives a Roman decree to the city of Sardis sanctioning this privilege.

The Romans could not remain masters of the country so long without leaving many traces of their occupation: the Latin language became known, the imperial weights and measures as well as modes of reckoning time were adopted, many Latinisms passed into common use (occasionally met with in the New Test.), and judicial proceedings were conducted in that language. Yet Latin literature never exercised the same influence on the Jewish mind which the Greek philosophy did, of

which we have the most remarkable example in the Jewish school of Alexandria. Indeed, the Romans carefully abstained from forcing their own language upon the inhabitants of the countries they conquered, though the strictness with which every official act, even to the farthest limits of the empire, was carried out in the Roman language was never relaxed, but the edicts were generally translated into Greek (Josephus, *Ant.* xiv, 10, 2). The better-educated Romans undoubtedly spoke Greek. The inscription on the cross was written in Hebrew, Roman, and Greek (Luke xxiii, 38; John xix, 20); the Hebrew for the common people, the Latin, the official language, and the Greek, that usually spoken (Alford, *ad loc.*). All the official inscriptions put up by the Romans were called *tituli* (comp. Suetonius, *In Calig.* 34; *In Dom.* 10); and John (*loc. cit.*) uses the same expression (*ἑγραφε τίτλων*).

The freedom of religious worship enjoyed by the nations subject to Rome was remarkably great, though foreign religions were not allowed to be introduced among the Romans (Livy xxxix, 16); and it is recorded by Dion Cassius (lvi, 36) that Mæcenæ advised Augustus not to permit such innovations, as they would only tend to destroy the monarchy. This rule was strictly maintained by all his successors. Judaism was an exception, though, as we have seen, the Jews were sometimes expelled from Rome.

VII. *The condition of the Roman empire at the time when Christianity appeared* has often been dwelt upon, as affording obvious illustrations of Paul's expression that the "fulness of time had come" (Gal. iv, 4). The general peace within the limits of the empire, the formation of military roads, the suppression of piracy, the march of the legions, the voyages of the corn-fleets, the general increase of traffic, the spread of the Latin language in the West as Greek had already spread in the East, the external unity of the empire, offered facilities hitherto unknown for the spread of a world-wide religion. The tendency, too, of a despotism like that of the Roman empire to reduce all its subjects to a dead level was a powerful instrument in breaking down the pride of privileged races and national religions, and familiarizing men with the truth that "God hath made of one blood all nations on the face of the earth" (Acts xvii, 24, 26). But still more striking than this outward preparation for the diffusion of the Gospel was the appearance of a deep and wide-spread corruption which seemed to defy any human remedy. It would be easy to accumulate proofs of the moral and political degradation of the Romans under the empire. It is needless to do more than allude to the corruption, the cruelty, the sensuality, the monstrous and unnatural wickedness of the period as revealed in the heathen historians and satirists. "Viewed as a national or political history," says the great historian of Rome, "the history of the Roman empire is sad and discouraging in the last degree. We see that things had come to a point at which no earthly power could afford any help; we now have the development of dead powers instead of that of a vital energy" (Niebuhr, *Lect.* v, 194). Notwithstanding the outward appearance of peace, unity, and reviving prosperity, the general condition of the people must have been one of great misery. To say nothing of the fact that probably one half of the population consisted of slaves, the great inequality of wealth at a time when a whole province could be owned by six landowners, the absence of any middle class, the utter want of any institutions for alleviating distress, such as are found in all Christian countries, the inhuman tone of feeling and practice generally prevailing, forbid us to think favorably of the happiness of the world in the famous Augustan age. We must remember that "there were no public hospitals, no institutions for the relief of the infirm and poor, no societies for the improvement of the condition of mankind from motives of charity. Nothing was done to promote the instruction of the lower classes, nothing to mitigate the miseries of domestic slavery.

Charity and general philanthropy were so little regarded as duties that it requires a very extensive acquaintance with the literature of the times to find any allusion to them" (Arnold, *Later Roman Commonwealth*, ii, 398). If we add to this that there was probably not a single religion, except the Jewish, which was felt by the more enlightened part of its professors to be real, we may form some notion of the world which Christianity had to reform and purify.

Notwithstanding the attempts of Augustus to stop all tendencies to corruption by punishing immorality, it was chiefly immorality that undermined the empire. With a high civilization, a flourishing commerce, and general outward refinement was associated a terrible depravity of morals. Yet the prosperous state of the empire was confessed by the provinces as well as the Romans. "They acknowledged that the true principles of social life, laws, agriculture, and science, which had been first invented by the wisdom of Athens, were now firmly established by the power of Rome, under whose auspicious influence the fiercest barbarians were united by an equal government and common language" (Gibbon, ch. ii). The cruelties and exactions of the provincial magistrates were suppressed by Augustus and Tiberius (Tacitus, *Ann.* iv, 6). Roads were constructed and commerce increased, but all of no avail. Society would not be reformed, and Paul draws a striking picture of the corruption of the age (Rom. i, 14-23). But the spirit of Christianity was floating in the atmosphere, and "the wisdom of providence was preparing a knowledge which struck root as deeply as the literature of the Augustan age had been scattered superficially" (Arnold, *loc. cit.*).

The Roman empire terminated with the anarchy which followed the murder of Justinian II, the last sovereign of the family of Heraclius; and Leo III, or the Isaurian, must be ranked as the first Byzantine monarch (Finlay, *Greece under the Romans*, p. 433).

The chief prophetic notices of the Roman empire are found in the book of Daniel, especially in xi, 30-40, and in ii, 40; vii, 7, 17-19, according to the common interpretation of the "fourth kingdom" (comp. 2 Esdr. xi, 1). See DANIEL. According to some interpreters the Romans are intended in Deut. xxviii, 49-57. For the mystical notices of Rome in the Revelation, comp. ROME.

On the general subject of this article, consult Eschenberg, *Classical Manual*, § "Roman Antiquities" (Lond. 1844); Ruperti, *Handbuch der römisch. Alterthümer* (Hanover, 1841, 2 vols. 8vo); Maillott and Martin, *Recherches sur les Costumes, les Mœurs, etc., des Anciens Peuples*. See also Unger, *Sitten und Gebräuche der Römer* (Vienna, 1805); Arnold, *Hist. of Rome*. Much information may be found by the English reader on the state of manners in the first centuries after Christ in the following fictions: Lockhart, *Valerius*; Bulwer, *Pompeii*; Ware, *Palmyra*; and in Milman, *Hist. of Latin Christianity*. But especially consult Merivale, *Hist. of the Roman Empire* (Lond. 1864, 8vo).

ROMAN EMPIRE, THE HOLY, is the designation familiarly given to the mediæval and modern Roman Empire of the West, and especially to that empire after the imperial sceptre had passed into the hands of German sovereigns. For a whole millennium—from the coronation of Charlemagne to the abdication of Francis of Austria—the Roman empire occupied in Western Europe the first place, in dignity and prestige, of all secular governments. Though its actual power had continually fluctuated, and its influence on the affairs of the world had rapidly waned after the retirement of Charles V, it remained an imposing memorial of ancient grandeur and dominion, and was honored as a "clarum et venerabile nomen." "Heir of the universal sway of Rome, the holder of it claimed to be the suzerain of all earthly kings. First and oldest of European dignities, its very name had a sound of dignity."

Passing over the widely extended and thoroughly organized empire of Charlemagne, and the rapid decay

of eminence and power, under his successors of the Carolingian line, and confining attention to the Germanic dynasties, the Holy Roman Empire maintained a lofty and potent ascendancy over all kings and temporal rulers in the West for three centuries, extending from the first Otho, the Great, to the death of that "stupor mundi," the dazzling, energetic, and lordly Frederick II. During this long and agitated period, the empire and the papacy marched abreast in constant discord and furious contention; the one acknowledged to be supreme in the secular order, the other revered as supreme in the spiritual order. The rivalries, the jealousies, the animosities, the virulent antagonisms, of these transcendent sovereignties—each endeavoring to secure its own position and predominance by the depression of the other—filled the centuries with strife, with acrimony, and with perplexities worse than the bloody warfare which they engendered. For one brief interval in the subsequent ages, after long and dreary eclipse, the Holy Roman Empire, under an emperor of the house of Hapsburg, threatened to regain a more arrogant control, a vaster domain, a more solitary domination, than it had possessed under the first Cæsars or had claimed under the first Constantine. But Charles V, the most powerful of emperors since Charlemagne, was the last of emperors crowned in Italy. He was frustrated of the dreams that had been nursed for him by both his grandfathers, and that had been eagerly cherished by himself throughout a long and busy reign. His energies were engrossed and wasted, his enormous resources consumed, and his authority paralyzed by discords in his numerous scattered kingdoms and principalities, and by the divisions and civil wars produced by the Protestant Reformation, and favoring its extension. Worn out and baffled, he renounced his thrones in despair. He retired—shattered in health, in spirit, and in confidence, to fritter away the last months of a grand existence—amid the lovely scenery around the monastery of Juste. Thenceforward the empire continued to wane and shrivel up, till finally extinguished by the conquests and confederations of the emperor Napoleon.

An institution of such long duration, of such splendid pretensions, of such intimate association with the ecclesiastical system of Christendom, of such profound influence upon both the temporal and the spiritual fortunes of humanity—an institution which transmitted the consummate result of all ancient civilization almost to our own day—merits careful appreciation, and requires it the more urgently because its name has already ceased to be familiar, and because its fortunes and vicissitudes are often slighted as the vanished "phantoms of forgotten rule."

I. *Origin of the Name.*—The name of The Holy Roman Empire cannot be distinctly traced in either its origin or its application. It is obscurely involved in the institution of the empire throughout all the phases of its existence. It may readily be discerned in pagan Rome. It is implied in the constitution of the reanimated Empire of the West. In more modern times it frequently appears in treaties and imperial documents, in diplomatic papers, and in the official transactions of the imperial chancery. But it was never of obligatory or habitual employment. It does not occur in the Act of Abdication of Francis I in 1806, nor in the earlier Pragmatic, which paved the way for the abdication and prescribed his official titles as emperor elect. It has not been found in any of the numerous chronicles, specially examined for the present inquiry, which record the coronations from Charlemagne to Rodolph of Hapsburg. It has not been detected by us in the capitularies and edicts, nor in the *Libri Feudorum*. There is nothing on the subject in Pfeffel's *Abrégé Chronologique*, notwithstanding the well-merited commendations bestowed by Gibbon upon that painstaking and useful treatise. There is no explanation in Muratori nor in Gibbon. It would be vain, of course, to expect the solution of any real difficulty from *The Middle Ages* of the superficial

and blundering Hallam. It is strange, however, that no elucidation of its origin and use is given by Bryce in his work specifically entitled *The Holy Roman Empire*. All these European writers had ready access to authentic sources of information which are usually beyond the reach of inquirers in America.

The interpretation of the name is not far to seek, though a long, elaborate, and dubious research would be required to determine the times, conditions, and circumstances of its ordinary employment, if there ever was any fixed rule on the subject. The city of Rome and the *imperium Romanum* were always regarded as *sacrosanct*, even under the republic. The argumentation of Augustine, in his memorable treatise *De Civitate Dei*, revolves mainly upon the pagan allegation of the intimate dependence of Rome on the guidance of her gods. Under the empire, the city was fervently adored as *diva Roma*, *urbs divina*, and the sacred fire was kept ever burning in her honor. Such a perpetual fire was maintained in the imperial palace. Julius Cæsar was Pontifex Maximus, holding the holiest of offices at the time of his assassination, and had been chief of the religion many years previously. On his murder, he was deified, and became *Divus Julius*. On the death of Lepidus, Augustus united the office of Pontifex Maximus to his other titles. He, too, was deified. Subsequent emperors retained the pontificate, and many were worshipped as *Divi* while still alive. The pontificate was held even by Christian princes; and the epithet "sacred" was applied in both the Latin and the Greek vocabulary of the court to their persons, their families, their functions, their ministers, and all their surroundings. This practice was not weakened by the establishment of Christianity as the religion of the state. Comes *sacri cubi*, *sacri fisci*, *sacrarum largitionum*, *sacri palatii*, etc., were regular offices under the constitution of Constantine. We find even "the sacred instand" and "the sacred ink." It should be remembered, too, that the "tribunicia potestas," which was one of the principal constituents of imperial authority, had always been "sacrosanct" (Liv. IV, iii, 6, *et Not. Var. ad xxvii, xxxviii, 3, ed. Drakenborch*). The organization and ceremonial of the old Roman empire were habitually adopted or travestied by the barbarian kingdoms (see Cassiodor. *Epp. Var.*) before they were repeated by the Western emperors. In the attestation of the *Acta de Pace Constantie*, 1183, of Frederick Barbarossa, the notary signs himself, "Ego Odelinus, *sacri palatii* notarius," in exact correspondence with the language of Justinian in the confirmation of the code: "Vir gloriosissimus, quæstor sacri palatii nostri. . ." Hence it is not surprising to find in the West, as in the East, the phrase "sanctus Imperator," though it does not become one of the formal titles.

When Charlemagne received the imperial crown at Rome on Christmas-day, 800, he received it with all the attributes of the imperial sovereignty of Rome. The sanctity of the office, derived from the several confluent tendencies which have been specified, was not the least marked of these attributes. This sanctity was further heightened by the circumstances and the purposes of his appointment, and by the relations of himself and his family to the orthodox Christianity of the West. One of his highest duties and honors was to be the "advocatus ecclesie," the protector of the pope against domestic and foreign enemies—the temporal sovereign of the Christian faith and of Christendom. He was solemnly anointed. It is stated by a late chronicler that he was hailed, in the acclamations of the people, as "a Deo coronato." So Justinian had declared: "Deo auctore nostrum gubernante imperium" (*De Concept. Dig.* § 1). When Otho I was crowned in 962, the pope conveyed the dignity "benedictione et consecratione." It is a mistake to suppose that when Charles merged the patriciate in the empire, he took merely a title of higher dignity. It is an equal mistake to suppose that he only revived or renewed the long-dormant Empire of the West. He was

crowned sole emperor of the Roman world at the time of a supposed vacancy of the imperial throne, which had always been deemed elective, and of exclusively masculine tenure: "Quia mulier excecato imperatore Constantino filio suo imperabat" (Sigebert Gemblacensis, *ad ann.*; comp. Palgrave, *English Commonwealth*, p. 489-493, who long preceded Fustel de Coulanges [*Rev. des Deux Mondes*, Jan. 1, 1870]).

The expediency, the propriety, or the necessity of this transference of the empire from the East to the West, though in three years restricted to the revival of the Western Empire, sufficed for the resurrection of the latter empire and for the distinct constitution of the Christendom (*Christi dominium*) of Western Europe. The epithet of "holy" does not seem to have been attached formally to either empire at this time, though probably in use. The title of the emperor, in the West as in the East, continued to be "Imperator Romanus, semper Augustus." But the idea of sanctity under the setting, as under the rising, sun seems to have been ever present to the minds of men. Hence the designation "Imperator sanctus" is found in the Edict of Verona, Oct. 29, 967, of Otho I, *Imp.*; and his son Otho II, *Rez* (Pertz, *Mon. Hist. Germ.* iv, 33). It was not until after the thorough feudalization of the empire under the Germanic successors of the Carolingians, and the bitter conflicts and inveterate rivalries of emperors and popes, that the sanctity of the empire needed to be prominently asserted as the counterpart and counterpoise of the sanctity of the papal throne. But pagan and Christian, Eastern and Western, habits and associations had combined to invest emperor and empire with an air of recognised holiness. These influences and tendencies were preserved and augmented by the circumstances attendant on Charlemagne's coronation, and were increased by the ideal character which the empire subsequently assumed.

II. *Theory of the Holy Roman Empire.*—There would be manifest impropriety in entering here into the consideration of the constitution or the history of the second Western empire. But the theory of the empire, its great contention with the papacy, and the grave consequences thence resulting to the ecclesiastical and religious fortunes of Europe are apposite, and even indispensable, to the present *Cyclopædia*. The notices, however, must inevitably be both brief and jejune.

The significance of great historical events and institutions does not reveal itself till they have passed away or declined. It must be gathered by retrospection from the consequences—not expected from contemporaneous appreciation. Charlemagne was constituted emperor by the implied election of the Roman people, and by the consecration of the pope, as the ruler of the Christian world; as the official defender of the Church; as the upholder of orthodox Christianity against heresy and schism; as the champion of the faith and of the faithful against the infidel and the barbarian; as the patron, promoter, and guardian of missionary enterprise for the conversion of the heathen. In this character he was not merely the first among temporal princes, but supreme over them all. He was clothed with a religious character in order to act as the carnal instrument of the spiritual and ecclesiastical authority. He was chief of Christendom to preserve the Christian society from intestine disorders and external perils. He was head of the temporal order, but with distinct spiritual attributions. The pope was head of the spiritual order, but with some temporal jurisdiction, by the grant of Pepin and the confirmation of Charlemagne. Each, in his sphere, was the vicerent of Heaven for the government and guidance of the world. This is very cogently presented by Bryce: "Thus does the emperor answer in every point to his antitype, the pope, his power being yet of a lower rank, created on the analogy of the papal, as the papal itself had been modelled after the empire. The parallel holds good even in its details; for just as we have seen the churchman assuming the

crown and robes of the secular prince, so now did he array the emperor in his own ecclesiastical vestments—the stole and the dalmatic; gave him a clerical as well as a sacred character; removed his office from all narrow associations of birth and country; inaugurated him by rites, every one of which was meant to symbolize and enjoin duties in their essence religious" (*The Holy Roman Empire*, vii, 106-116).

It must, indeed, have been very evident, or must have been recognised by an instinct more profound than evidence, that the preservation of civilization; the protection of society against Saracen, Saxon, etc.; the perpetuation of Christian faith; the maintenance of religious order and civil discipline, of morality and culture among the nations, of unity in the brotherhood of faith, of tranquillity throughout the Christian realm—required, amid the still rampant paganism and the internal and external dangers of the time, that there should be consolidation of Christian government; that there should also be union between the temporal and spiritual authorities and that agreement and harmony should prevail between the two orders of rule. This was exemplified by the coronation of the emperor in Rome by the pope, by the assent of the emperor to the election of the pope. It is equally evident that these two powers—each in some sort supreme, yet each, also, in some sort subordinate to the other—would decline into jealousies and discords and furious antagonisms when the great danger which enforced their union had been mitigated or removed, and when causes of difference, which were sure to arise, should eventually arise.

The splendid dreams of humanity are visions of the night which are dissipated by the realities of the day. It was a magnificent, but never realized, conception that as there should be "one Lord, one faith, one baptism," so there should be a single Christendom, with one administrator of spiritual interests and one governor of temporal society, that all nations might be one realm of Christianity and all Christians might be secured by the combined might of all, under the guidance and disposition of one secular control. It was a brilliant dream. It has left but the cloud behind. It may afford a hope or a promise of accomplishment in very dissimilar form in future centuries. For brief periods there was a remote approximation to its achievement. For long periods it was frustrated and often, perhaps, forgotten ("breves et infaustos populi Romani amores").

III. *Relations of the "Holy Roman Empire" to the "Holy Roman Church."*—The Holy Roman Empire lasted for more than a thousand years. Its eminence and its relations to the papacy changed variously and greatly during this long lapse of time. Pfeffel, who is occupied with the history of Germany rather than with that of the empire, divides the former into nine periods, beginning with Sigovesus A.D. 600, and ending with the extinction of the male line of Hapsburg in 1740. Six of these periods must be left unnoticed for various reasons, which there is not room to state. The fourth, or Carolingian, period has, indeed, been considered more fully than our space would justify. The great struggle between the emperor and the pope took place during the fifth, sixth, and seventh periods, under the Saxon, Franconian, and Suabian houses (962-1254); and from this struggle issued the religious and political complications of modern Europe and of the modern world. To these periods, then, attention will have to be confined, and to them it can be but inadequately directed.

When Otho I was crowned at Rome in 962, he was in a position which permitted, and almost necessitated, the revival of the imperial pretensions, which had long been dormant, while that supreme dignity was squabbled over by Burgundian or other princes. There was occasion for the coercion of a strong hand, external to Rome and free from papal affiliations. For three quarters of a century the papacy had been the spoil of factions, and had been held by the nominees, tools, or scions of turbulent nobles and depraved women. It was

the age of Alberic and Marozia, and of that late fiction *papissa Joanna*. The interposition of some foreign control was imperatively required. The treachery of John VIII necessitated the assumption by Otho of the right to regulate papal elections, and the imposition of an oath upon the cardinals and the Roman people to admit the imperial supremacy. This was manifestly a usurpation by the secular authority, but the state of affairs demanded it. Naturally, as good order increased in the Church and the sense of spiritual duties and responsibilities revived, this subordination was impatiently borne; and a steady effort, ultimately successful under Gregory VII, was made to render the Church independent of the empire, and superior to it in dignity as in sanctity. Here, then, was a wager of battle, not likely to be forgotten or neglected by either party, which led to the humiliation of Henry IV at Canossa, and to the exile of Gregory VII.

While Henry was yet a child, and after Hildebrand had acquired predominance in the Roman curia, though not yet pope, Alexander II had been induced to issue a decree against the lay investiture of clerical beneficiaries. The decree was renewed by Hildebrand as pope, and became the chief ground of controversy with the empire after Gregory's death. The quarrel was not closed in Germany till the Diet of Worms in 1122, and in England till after the assassination of Thomas à Becket. It broke out afresh between Germany and the pope, but was merged in other contentions. The principles involved in the question merited the zeal and energy displayed on either side, but did not justify the spiritual or secular pretensions advanced or the procedures employed. Ambition, jealousy, and passion soon dominated over the war of parties.

The question, simply stated, was whether the Church or the empire—the ecclesiastical or the secular authority—should have the right of conferring ecclesiastical benefices. It would require an extended exposition of the political, social, and religious constitution of those times to furnish any satisfactory exhibition of the significance and bearings of this dispute. Such knowledge must be sought in the pontifical and imperial histories; the leading topics alone can be indicated here. The feudal system was in full vigor. Even the Church was feudalized. Society was moulded into a regular hierarchy of gradations from the lowest vassal to emperor and pope. The political and the ecclesiastical organizations were arranged on parallel lines. The political and the social system would be broken and rendered impotent by permitting the interference of an extrinsic power, in the bestowal of dignities, honors, and commands. If these were conferred by the pope or by his deputies, the occupants would be withdrawn from their allegiance to their temporal head and from their obligations to the State. But the experience of the age proved that if these appointments were received from the empire or secular government, they would be granted and sought for worldly motives and selfish considerations; would be lavished upon feudal nobles and their relatives; would be used for private feuds and temporal purposes; and would be severed from the due services of religion. Archbishops and bishops, abbacies and canopies, with their rich domains, would be grasped by warlike, rapacious, corrupt, and truculent barons who would scorn their religious vocation and the cure of souls. This is proved by the aspect of the Church in every country, and even in Rome, under the later Carolingians and the earlier Germanic emperors. Neither of the co-ordinate powers could yield the point in issue without grave peril to itself and graver peril to society. The basis of settlement, which afforded a temporary or apparent solution of the problem, was very plausible, but could not be satisfactory in practice to either contestant. The settlement was that ecclesiastical dignities and offices should be conferred by the Church by delivery of the ring and crosier, and that the temporalities attached thereto should be bestowed by the sovereign *per septimum*. That this arrangement could not secure peace

is demonstrated by the quarrel between Henry II and Thomas à Becket.

The vast importance of the dispute will appear more manifest if it be presented in its most abstract form: Should the clergy be dependent upon the State? In the condition of society at that time—still semi-pagan and more than semi-barbarous—morality, religion, civilization, and Christianity would have been ruined by being sacrificed to the worldly appetencies of princes and subjects; the reign of violence and blood would have been unchecked; the heathen invaders of the empire had been with patient effort brought into subjection to a higher law than force; the work of centuries would have been undone by the subjugation of the spiritual authority which alone enforced moral restraints. Should Church dignitaries be released from all subordination to the State and depend solely upon the head of the Church? Then would ensue chronic discord between the supreme regulators of society; utter impotence of the secular authority for the protection of the nations or for the maintenance of order; the most unrestrained license in the high places of the Church; neglect of Christian sentiment, precepts, duties; luxury, sensuality, and rottenness; with arrogant tyranny over thought and feeling on the part of the ruling caste; and with the abject servility of superstition and ignorance on the part of the laity, who would be lewd in every sense of the word. The question, in its ultimate tendency, was whether Christendom should be subjected to the tyranny of the sword or to the tyranny of the crosier. This was the dilemma. Its character is illustrated by the whole history of Europe from the 9th century to the 15th. See *INVESTITURES*.

The war between the two supreme powers was inevitable; it was even necessary. The question could not be settled without war; it could not be settled by war; but the bitter and long-continued contention prevented either power from becoming absolute, and finally paralyzed both. The conflict about investitures broke out afresh, as has been said, but soon changed its form. Under the Suabian emperors it was complicated with the resistance of the Lombard League to the empire; still later, with the effort of the popes to exclude the imperial supremacy from Italy, or, at least, to restrict it to the valley of the Po. Hence sprang the savage strife of Guelphs and Ghibellines, which extended its pernicious influence beyond the period of the Renaissance. But the second act of the great drama ended with the Council of Lyons in 1245, and with the death of Frederick II in 1250, leaving the papacy ostensibly possessed of resistless dominion, the empire crushed, shattered, mangled; introducing, at the same time, chronic wars into Italy, and anarchy and divisions into Germany, from which that great country has not yet recovered. Into the instructive details of these mighty and ominous transactions there is no time to enter. A few words on the effects of the struggle must terminate these summary and inadequate remarks.

IV. *Consequences of the Strife between the Church and the Empire.*—The disastrous issues of this unseemly contention were immediate, continuous, and progressive. None but the most prominent can be specified now, and they must be noted without being discussed. The deadly duel was ruinous to both combatants. It weakened fatally both the papacy and the empire; but it prevented the permanent predominance of either. It frustrated any harmonious agreement for the joint direction of the growing Christian community. It precluded the establishment of wholesome reciprocal restraint over the spiritual and the temporal authority. The imperial supremacy over the nations ceased to be anything more than a hollow pretence. The imperial control even over the Germanic principalities and municipalities was almost annihilated. There was neither unity nor union. The capacity of the empire to shield Christendom from attack was sacrificed. The proof of this was given by the great Mongol invasion, by the Ottoman conquest of

Constantinople, by the fearful ravage and encroachment of the Turkish sultans. Germany was thrown into chronic convulsions and feudal anarchy till the accession of Rodolph of Hapsburg. These discords, which consumed the strength and divided the energies of the country, descended to the field of Sadowa. They have not been buried by the coronation at Versailles. Italy was lacerated and corroded by unceasing wars, under Hohenstauffen, Angevin, Arragonese, and Bourbon princes. City was arrayed against city, family against family, kinsman against kinsman. Lawlessness, rapine, murder, treachery, and the licentious usurpations and tyrannies of chiefs of Condottieri were domesticated throughout the beautiful peninsula.

The Church, though triumphant, was more disastrously injured: it was smitten in the house of its friends. There was a separate life in the bruised and dis severed members of the imperial system. They might recombine in altered relations, or be refashioned as distinct entities. Such change was incompatible with ecclesiastical unity or pontifical supremacy.

The papacy seemed to have asserted and assured its absolute dominion at the Council of Lyons. It was deduced. It lost, with the excommunication and death of its imperial opponent, prestige, influence, and respect. It fell into imbecility and corruption. The flight of Innocent IV from Rome was the prelude to the Babylonish captivity, and to the French pontificate at Avignon. This, again, generated the Great Schism, with the consequent alienation of the nations, especially of England and Germany, which had little share in the ecclesiastical spoils. As early as 1137, the emperor Lothaire II had overawed pope Innocent II by declaring that in case of the pope's continued opposition, "Imperium ab illo die et deinceps scissum a pontificio omnibus modis sciret." Twenty-four years afterwards—at the Council of Toulouse, held to decide between Alexander III and the anti-pope Victor—a party, favorable to neither, boldly proposed to "avail themselves of the present opportunity to shake off the yoke of the Roman Church." The great councils of the 15th century—Pisa, Constance, Basle, Ferrara, Florence—still further undermined the pontifical supremacy; and the last resulted in the final severance of the Greek and Latin churches, which rendered ecclesiastical unity impossible; and in the overthrow of Constantinople and the Byzantine empire.

During the two centuries of imperial impotence, avarice, vice, crime, tyranny, extortion, sensuality, had permeated the ecclesiastical hierarchy in all lands, rendering certain and necessary the religious reformation so often demanded, so earnestly required by the Council of Constance, so hopelessly sought within the pontifical fold.

The great revolutions of society are never due to a single cause, nor to a brief catalogue of causes. Many tendencies combine, in most complex and shifting modes, to determine the result; yet, certainly, the conflict between the *Holy Roman Empire* and the *Holy Roman Church* contributed most potently to the disintegration of both, to the dissipation of the wondrous mediæval dream, and to the religious and political constitution of our modern civilization.

V. *Literature*.—It would be absurd to present any apparatus bibliographicus for a subject such as The Holy Roman Empire, the literature of which embraces all the chronicles, all the secular and ecclesiastical historians, all the scholastic and diplomatic documents relative to the constitution and relation of Church and State for many centuries. It may suffice to mention some of the lighter and more accessible treatises which discuss important parts of the subject: Pfeffel, *Abrégé Chronologique de l'Histoire et du Droit Public d'Allemagne* (Paris, 1776, 2 vols. 4to); Pütter, *Dissertationes de Institutione Rom. Imperii*; Butler, *Notes on the Chief Revolutions of the States composing the Empire of Charlemagne* (Lond. 1807, 8vo); Lehuéron, *Inst. Mérov. et Carolingiennes* (Paris, 1843, 2 vols.); Milman, *Hist.*

Latin Christianity; Greenwood, *Cathedra Petri*; Bryce *The Holy Roman Empire* (4th ed. Lond. 1873); Waitz *Deutsche Kaiser von Karl dem Grossen*, etc.; Döllinger *Das Kaiserthum Karls des Grossen*, etc.; Hölder *Kaiserthum und Papstthum*; Möser, *Römische Kayser* (G. F. H.).

Roman Manner, the custom of building churches of stone, spoken of in 675, when Benedict Biscop abbot of Wearmouth, went to France to engage masons. It was about the same time called the *Gallican mode*.

Romanelli, GIOVANNI FRANCESCO, a painter of the Roman school, was born at Viterbo in 1617. His first master was Domenichino, but his style was chiefly gained from Pietro di Cortona, under whom he afterwards studied. Later he adopted a manner more his own and less imposing, but more soft and pleasant. It is in this style that his best works are executed as *The Descent from the Cross* in St. Ambrose's at Rome. Romanelli was employed by cardinal Barberini in the decoration of his palace, and also by Mazzarini. He died in 1668. His works are very numerous in Rome, and are all on religious or mythological subjects.

Romanes, FRANCIS, a convert from Romanism, was a native of Spain, but afterwards became a resident of Bremen, where he transacted business for Antwerp merchants. When convinced of the errors of papacy, he resigned his agency, informed his employers of the change in his religious belief, and devoted himself to the service of religion. While in Spain laboring for the conversion of his parents, he was informed against by his former employers, arrested, and after imprisonment was burned. In this torture, as long as he was able to speak, he continued to repeat the 7th Psalm. See Fox, *Book of Martyrs*.

Romanese (Romonsch, or UPPER and LOWER ENGADINE) Version of the SCRIPTURES. This version is used in the Grisons, anciently a part of Rætia, and constituting the south-eastern angle of Switzerland. The mountainous parts of this canton are inhabited by the little Romanese nation. The Engadine, or valley of the Inn, on the borders of the Tyrol, is inhabited by a section of this people, to whom a Romanese dialect called Churwelsche is the vernacular. The other Romanese dialect is called Ladiniche, and is spoken in the valley of the Rhine, on the confines of Italy. Both these dialects being derived from the Latin tongue, they preserve to this day the most striking characteristics of the Romance languages. The New Testament was printed in the former of these dialects in 1560 in the translation of Jacob Biffurin, and the whole Bible in 1679, prepared by Jac. Ant. Vulpio and others. In the latter, the Bible was published in 1718 under the title *La S. Bibla quei ei: Tut la Soinchia Scartira, ner tuts ils Cudischs d' ilg Veder a Nief Testament, cum ils Cudischs Apocryphs Messa giu Ent ilg Languag Rumonsch da la Ligia Grischa Tras Anschins surrients d' ilg Plaid da Deus d' ils venerands Colloquis sua-a sut il Guault, cum Privilegio* (illustrissimorum D. D. Rhetorum. Asquitschada en Coira tras Andrea Pfeffer, stampadur, En ilg On da Christi MDCCXVIII, fol. Coire, 1718). These editions, including an earlier one, by J. Gritti, of 1640, were all printed in the Grisons; but they were soon exhausted, and at the beginning of the present century a copy was scarcely attainable. A company of Christians at Basle, therefore, projected an edition for the use of these mountaineers, and under the auspices of the Basle Bible Society, and with the aid of the British and Foreign Bible Society, the New Testament in Churwelsche left the press in 1810. But when the poor Ladins heard what a treasure their neighbors on the Tyrolese frontier had got, they expressed a very strong desire to have the same in their dialect. The Bible societies of London and Basle promptly consented to grant them this boon, and in 1812 an edition of two thousand copies of the New

Testament in Ladiniche had left the press under the title *Il Nouf Testament da nos Segner Jesu Christo* (tradit in Rumansch d' Engadina Bassa. Stampà in Basel da F. Schneider, 1812). Several subsequent editions of the New and Old Testament have been issued by the Basle Society, aided by the English Society, in both dialects. Thus, *Biblia o vero la Soinchia Scritûra del velg Testament* (Sûn cuosti dellas beneficentas Societats Biblicas da London et Basel è tras Directiun della Societa Biblica in Coira promovüda all stampa. Coira, 1815. Stampà da Bernard Otto); *Ilg nieo Testament. Editiun nova, revedida a corregida, tont esco pusseivel, suenter ilg original Grec* (da Otto Carisch, a squitschada à cust da las Societads Biblicas da Quera a da Basel. Qera, Stamparia da Pargätzi a Felix. 1856); *Il nouf Testament, tradüt nel dialect Roumanusch d'Engiadina* (ota tres J. Menui. Coira, 1861). See Reuss, in Herzog's *Real-Encyklop.* s. v. "Romanische Bibelübersetzungen;" id. *Geschichte der Heiligen Schriften Neuen Testaments* (Brunswick, 1874), § 489; *Theologisches Universall-lexikon*, s. v. "Romanische Bibelübersetzungen;" *The Bible of Every Land*, p. 287 sq.; *Bibliotheca Biblica* (Braunsch. 1752), p. 174; Zuchold, *Bibliotheca Theologica*, i, 139; ii, 1310, 1315. (B. P.)

Romanesque Art. Some writers apply the term "Romanesque" to the period of Christian art in Italy and Western Europe which extended from the 3d to the 10th century; but it is more usually applied to the period extending from the 9th to the 12th or 13th century. Until the 9th century Christian art, especially architecture, had flowed in two main streams, which in locality and in characteristics were quite distinct from each other. The one is usually called the Basilican style [see *BASILICA*], which had its origin in Rome; the other is called the Byzantine style, which had its origin in Constantinople. See *ARCHITECTURE*.

In the very active period of church erection which existed in Central and Western Europe from the 9th to the 12th century, the basilican and Byzantine styles were in a sense forced into a new style, which took on certain characteristics of these former styles, but which had many very marked original features.

The general ground-plan of the later basilicas, that

of the Latin cross, was retained. For the convenience of the officiating clergy, a semicircular apsis, or choir, was placed at the farther end of the main nave and at the end of each arm of the transept. From this general typical ground-plan there were many variations, which were chiefly caused by the disconnected times and plans by which the different parts of the edifices were erected.

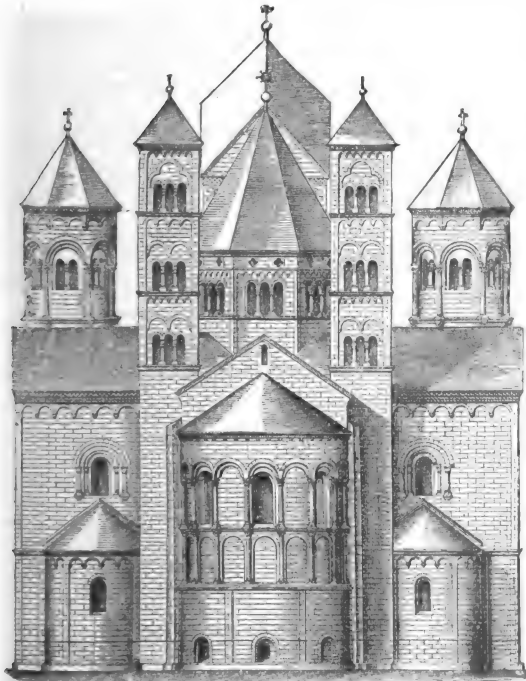

The round arch is a distinctive feature of the Romanesque style, which is termed, indeed, by many writers the Round-Arch style, in distinction from its successor the Pointed-Arch, or Gothic, style. See *GOthic ARCHITECTURE*. The round arch was inherited from both the basilican and the Byzantine style. During the latter part of the Romanesque period, the pointed arch began to be used in parts of the openings, and, indeed, in a few cases was almost entirely adopted; but the other features of these edifices mark them as distinctively Romanesque. The method of covering enclosed spaces by vaulting differed greatly from that in the preceding styles, and forms one of the most prominent features in this style.

During the early Romanesque period, especially in Italy, the campanile, or bell-tower, was built separate from the church, as in the leaning tower of Pisa; but later it was attached to the church edifice. Indeed, the single tower was expanded into a system of towers surmounted by spires, producing a balancing of parts around the entire structure. The towers were in many cases flanked by small turrets, which produced beautiful and picturesque effects. In many cases a lofty tower with turrets rose over the intersection of the transept and the nave. In the Cathedral of Bamberg four lofty towers rose, two on each side of the nave.

One of the most attractive features of the Romanesque architecture is the introduction of delicately formed arcades in various places on the exterior, where they produce pleasing effects, as under the cornices of the choirs, or apses, or on the main façade. These arcades sometimes rose, like steps, up along the lines of the roof. Sometimes they were placed in successive tiers up the entire height of the façade, or even up the entire height of the campanile, as in the cathedrals of Lucca and Pisa.

The portals of churches were often flanked by greatly variegated and deeply set clusters of columns. These were surmounted by capitals, and the same or similar clustered lines were carried in an arch over the doorway. In a few cases the inner lines over the doorway were thrown in round arches, while the arches gradually changed to pointed ones. These clustered arches were, in the Gothic style, replaced by rows of angels. The courts of cloisters were frequently surrounded by arcades of exquisite beauty, the columns usually being double, no two being alike, and more frequently one column being twisted. Clustered columns were also introduced in the interiors of churches. Indeed, the entire Romanesque architecture is marked by a rather too exuberant fancy, variety being considered necessary or desirable, even when more harmony could be secured by less varied types of decoration.

The capitals of pillars were manifestly modelled upon the type of the late Roman-Corinthian or the Composite capital; but independence of motive was soon manifested, and great variety was introduced in the capitals, which were generally managed in excellent harmony with the lines of the new style. Many new plant forms were conventionalized, and the foundation was laid for the subsequent luxurious Gothic foliage. Animal forms, both realistic and imaginary, were frequently introduced in the midst of plant forms or alone, in the capitals of pillars and elsewhere. These not unfrequently represented ogres and other hideous beasts,

Eastern Exterior of the Abbey Church at Laach.

IX.—G

which were to frighten hypocrites and the wicked from entering the house of God, the precursors of the gargoyles of the Gothic. Not unfrequently the chief columns of portals rested on the backs of lions or massive dogs, typifying the strength and defences of the Church.

In truth and consistency of architectural character, the Romanesque style, in its best examples, takes very high rank among the historic styles. It is the only one of the great styles in history which did not pass into decadence through the perversion of architectural features or principles. It was cut off in the height of its career by its successor the Gothic—the pointed displacing the round arch, with all its entire new type of decoration. The finest examples of the Romanesque style are: in Italy, the cathedrals of Pisa, Lucca, Parma, Vercelli; in France, those of Avignon, Toulouse, Bayeux, Clermont, Périgueux, St.-Étienne, and other churches in Caen; in Germany, those of Worms, Bonn, Speyer, Treves, Hildesheim, and Bamberg; in England, those of Peterborough, Waltham, and Winchester. Many of the finest effects in this style are found in detached fragments, which were made in churches that were not finished until this style had been superseded by the Gothic.

During the Romanesque period there was some activity in sculpture. The chief works in this branch of art were in ivory. Many of them are extremely interesting from the fact that they show an earnest spirit, though with much naiveness and almost crudeness of execution. In painting, the chief works were in miniature, in the decoration of missals, and other MS. books of devotion. In France, more especially, many important compositions were executed in fresco, after the style current in the Orient, and probably done by Byzantine artists. See Lübke, *Hist. of Art*; Kugler, *Gesch. der Baukunst*; id. *Gesch. der Malerei*; Schnaase, *Gesch. der Künste*; Fergusson, *Hist. of Architecture*; Rosenkartsen, *Hand-book of Architectural Styles*. (G. F. C.)

Romanic Versions of the Holy Scriptures.
Under this head we mention—

1. *The French Versions.*—As these versions have already been treated in this *Cyclopedia* s. v. FRENCH VERSIONS, we add the following as supplement. Arthur Dinaux has the merit of having pointed towards the first translator of the Bible, viz. Herman de Valenciennes, born about 1100. He was a priest and canon, and his version, free as it is for the greater part, was of the greatest importance for that time. He undertook it under the protection of the empress Mathilde, wife of the German emperor Henry V, and daughter of Henry I of England. His *Génésis* is preserved in the Harleian Library, MS. 222, and his *Libre de la Bible*, or *Histoire de l'Ancien et du Nouveau Testament en Vers*, in the Imperial Library, MS. 7986. The assertion made by A. Paulin Paris, in his *Manuscrits Français de la Bibliothèque du Roi*, that before the year 1170 no translation of any note had been made, and that Étienne de Hansa, or d'Ansa, of Lyons, was the first who undertook a work of this kind, has been proved erroneous by Arthur Dinaux; yet Paulin refers to Le Long and to a letter written by pope Innocent III to the bishop of Metz, published by Baluze, and translated into French by Le Roux de Lincy in his *Introduction to the Ancienne Traduction des Quatre Livres de Roi* (Paris, 1841). Although Herman de Valenciennes must be regarded as the first translator, the merits of Étienne de Hansa, who undertook a translation at the request of Peter Valdo, are not diminished thereby in the least. Étienne's translation, preserved in MS. 7268^{2,2}, and belonging to the first half of the 13th century, is a work of great value concerning the language and the letters. A. Paulin Paris saw many copies of that MS., which in part must be regarded as a revision. A version of this kind belongs to the beginning of the 14th century, and to judge from its style, it must have been made in England. This version we find in MS. 6701, and the

following specimen will best illustrate the difference between the translation of 1170 (7268^{2,2}) and the version from the beginning of the 14th century (6701):

MS. 7268^{2,2}.

Mes li serpenz estoit li plus
voiseus de toutes les choses
qui ont ame et que Dame
Dex* avoit fet. Et il dist à la
feme: Por quoi vous a Dex
comandé que vos ne men-
giez pas de tous les fuz de
paradis (Gen. iii, 1).

MS. 6701.

Mes le serpent estoit plus
coint de toutes choses te
terre que Dieu fist, lequel dit
à la femme: Por quei vous
comanda Dieu que vous ne
mengaessés de cheicun fust
de paradis.

With regard to the translation of 1170, we only mention that Innocent III, not knowing its source, subjected it about the year 1200 to the censor, and many writers of the 13th century believed it to be a pernicious book. Its language bears the original Romanic stamp, and reminds one of the modern French. But it is striking that the translator, Étienne de Hansa, should be from Lyons. We may suppose that the northern French stamp of the translation of 1170, as we find it in the MS. 7268^{2,2}, for the greater part belongs to the copyist. A. Paulin Paris conjectures that the language of the MS. is the same as that which was used at Rheims or Sens in the 13th century. The translation of 1170 is known as that of the "Bible des Pauvres." Le Roux de Lincy pronounces the translation of the MS. 7268^{2,2} an excellent one, although he believes it to have been made in the 13th century at the request of Louis the Saint. Étienne de Hansa's work is the more remarkable as it can be called with certainty the first which gives a correct and literal translation of the whole Bible. The MS. 6818² contains a second literal translation, the author of which, according to the investigations of scholars, especially of Aimé Champollion, is said to have been Raoul de Presles. Le Roux de Lincy acquaints us also with translations of single parts of the Bible, the redaction of which he puts in the 12th century, while the MSS. belong to the 13th century. As such he mentions:

1. *Les Quatre Livres du Roi*; a MS. of which is in the Bibliothèque Mazarin.
 2. *Les Psaumes*; MS. 1152 bis *Supplément Français*, 278 Latin, 7881 *Fonds Français*.
 3. *L'Apocalypse*; MS. 7013.
- An ancient French translation of single psalms is given by Karl Bartsch in his *Chrestomathie de l'Ancien Français* (1872), according to Fr. Michel's *Libri Psalmorum Versio Antiqua Gallica*.

The catalogue of A. Paulin Paris, *Manuscrits Français de la Bibl. du Roi*, contains also the following list of translations and comments:

1. *Histoire de l'Ancien et du Nouveau Testament, en Vers Monorimes*; MS. 7268².
2. *Traduction en Vers de la Bible*; MS. 7268^{3,3}.
3. *Histoire de l'Ancien Testament*; MS. 7265^{4,4}.
4. *Traduction en Vers du Psaume Latin* "Domine, ne in furore."
5. *Traduction des Psaumes*; MS. 7295^{5,5}.
6. *Commentaires sur les Psaumes, trad. d'un Ancien Texte Latin*; MS. 7295³.
7. *Raisons de la Composition de Chacun des Psaumes*; par Jehan de Blois; MS. 7295^{5,5}.
8. *Commentaire Perpétuel sur les Psaumes*; MS. 7295^{6,6}.
9. *Exposition du Psaume Latin* "Miserere mei Deus."

According to Grässe, two Augustinian monks, Julien Macho and Pierre Farget, translated a Latin Bible into the Romanic. A poetical version of the Bible, belonging to the 14th century, was left by Mace of Charité-sur-Loire, and in MS. 6818³ an original copy of the *Bible des Pauvres* is preserved.

We give on the following page some specimens of different translations. The MSS. 7268^{2,2} and 6818³ are copies of one text, which differ only in non-essentials, while the MS. 6818² forms the basis of a separate version. In this supplementary article we have largely depended on Strittmüller's *Ersten Bibelübersetzungen der Franzosen* (Brunswick, 1872), who also gives the following specimens; for the rest belonging to the French versions we refer to the art. *in loco*.

* Dame Dex means "Lord God." Dame is from the Latin *dominus*, and Dex (deus) is the ancient form for *Dieu*.

JUXTAPOSITION OF TEXTS (ACCORDING TO A. PAULIN PARIS).

MS. 7268 2.2. <i>Bible des Pauvres.</i> (1170.) Copy of the 13th Century.	MS. 6701. <i>Anglo-Norman Copy.</i> (1350.)	MS. 6818 2. <i>Raoul de Presles.</i> (1375.)	MS. 6818 3. <i>Bible des Pauvres.</i> Copy of the 14th Century.
<i>Genèse, ch. iii.</i>			
Mes li serpenz estoit li plus voisens de toutes les choses qui ont ame et que Dame Dex avoit fet. Et il dist à la feme: Por quoi vous a Dex com- mande que vos ne mengiez pas de tous les fuz de para- dis.	Mes le serpent estoit plus quoint de toutes almeles choses de terre que Dieu fist. Le quel dist à la femme: Por quei vous comanda Dieu que vous ne meugeasses de cheicun fust de paradis.	Or est vray que le serpent estoit le plus decevant de toutes les bestes, lequel s'a- dressa à la femme qui estoit de plus fralle sexe et ly disit: Pour quoy vous a Dieu com- mande que vous ne mengiez de tous les fruits de Paradis.	Is wanting.
<i>Rois, liv. i, ch. iii.</i>			
Samuel li enfes amenistroit à Dame-Den devant Hely et la parole Dame-Den estoit preciense En cel tens n'estoit pas vision aperte.	Et Samuel l'enfant minis- tra a Nostre Seigneur devaunt Hély et la parole Nostre Seigneur estoit precieuse.— A ces jours n'estoit vision aperte.	Samuel doncques admenis- troit à Nostre Seigneur de- vant Hely et la parole de N. S. estoit precieuse, ne n'es- toit point en ce temps de vi- sion manifeste.	Is wanting.
<i>Psaume XIII ("Dixit insipiens in corde suo").</i>			
Cil qui estoit néant sages dist en son cuer Dex n'est pas.—Il sont corrompu et sont fet abhominable. Il n'est qui face bien de si à un seul.	Ly nient sage dist en son quer: Il n'y ad Dieu. Cil sont corruptz et faitz sont abho- minables.—En lour est odies, il n'y ad nul qui fait bien. Il n'y ad nul desques à un.	Le fol dit en son cuer Dieu n'est pas. Ils sont corrom- pus et sont fais abhomin- ables en leurs estudes, il n'est qui face bien jusques à ung seul.	Cil qui estoit noient sage dist en son cuer Dieux n'est pas. Ilz sont corrompuz et leur fait abhominable, il n'est qui face bien de si à un seul.
<i>Evangile Saint-Mathieu, ch. ix.</i>			
Lors mouta Jhesus en la nacele. Ce est en la petite nef. Et passa la mer. Et vint en sa cité. Ce est en Naza- reth.—Lors il aporтерent il a cuer il paralitique gisant en son lit.	Is wanting. Et cil avant passaunt vynt en lour cité. Et cil ly offri- rent un paralyticz gisant en un lyt.	Is wanting.	Is wanting.

Le Début du Premier Psaume.

MS. 7268 2.2. <i>Bible des Pauvres.</i> (1170.) Copy of the 13th Century.	MS. 6818 3. <i>Bible des Pauvres.</i> Copy of the 14th Century.	MS. 6818 2. <i>Raoul de Presles.</i> (1375.)
Geal ma fiance en Nostre Seigneur. Comment dites vos à m'ame trespasse en la montaigne comme moinel.—Por ce vez ci les pecheurs qui ont tendu lor arc et ont appareillié lor saietes en lor croire que il saietent cels qui ont cuer droiturier en lieu obscur.	J'ai ma fiance en Nostre S. Comant dites vous à m'ame trespasse en la montaigne moyneel.—Pour ce vées ci les pecheurs qui ont tendu leurs ars et ont appareilliés leurs saietes pour courre qu'il saietent ceulx qui ont cuer droiturier en lieu obscur.	J'ay ma fiance en Nostre Seigneur. Comment dictez vous a mou ame tresp- passe la montaigne comme un moinel. Car vey les pecheurs qui ont tendu leur arc et ont appareillié leurs saietes et leur tarquois tres forts ad ce qu'il saietent en lieu obscur ceulx qui ont cuer droiturier.

In conclusion, we will only mention, from the seven-ty-third annual report of the British and Foreign Bible Society (1877), that "several new versions of the Scriptures in French have been urged on the committee, but they did not see their way to the adoption of any of them; they hope, however, that the present activity in Bible translating and revision may lead to the production of a version more accurate, and more acceptable to the French than any which they now possess."

2. *Italian Versions.*—See that art. in this *Cyclopædia*. We will only add an edition of the Hebrew Pentateuch with an Italian translation by S. D. Luzzatto, *Il Pentateuco colle Haftarat volgarizzato* (Trieste, 1858–60, 5 vols.);—*Job* (with an Italian translation) (Livorno, 1844); and *Il Profeta Isaia volgarizzato e commentato ad uso degl' Israeliti* (Padova, 1855–67).

3. *Portuguese Versions* (q. v.).

4. *Spanish Versions.*—It is very difficult to decide at what time the first Spanish version was made. If we may believe tradition, the oldest version would belong to the 13th century, made at the request of Alphonso of Castile and John of Leon. But as there is no confirmation of this statement, we must depend on the different data which we find in the printed editions themselves; and it is a remarkable fact that the versions were made either by Jews or Protestants.

(a) First in chronological order we mention *El Nuevo Testamento de nuestro Redemptor y Salvador Jesu Christo, traduzido de Griego en lengua Castellana* por Francisco de Enzinas, dedicado a la Cesarea Magestad (En Anberes [i. e. Antwerp], Anno 1543, 8vo). Of this edition, which is also published by the British and Foreign Bible Society, we have no notice except what we find in Simon's *Nouvelles Observations sur le Texte et les Versions du Nou-*

veau Testament, ii, 151, where we are told that, in the dedication, different reasons are given for and against the usefulness of translations of the Bible. "I do not," says the translator, "condemn those who are of another opinion, but I believe such versions, when made by judicious and conscientious men, to be useful." He then speaks of the cause for this translation. Gamaliel, he says, pronounced that if Christianity be of God, men cannot overthrow it; but if it be of men, it will soon come to naught; and addressing the emperor Charles V, he says, "The controversy about the translations of the Bible has already lasted for about twenty years. All measures to prevent them are in vain; on the contrary, their number has increased among the Christians, and Gamaliel's judgment seems to be fulfilled."

The version of Enzinas is made from the Greek. Such words as "gospel," "scribe," "testament," etc., are retained. For the greater part he follows Erasmus's translation, e. g. John i, 1: *En el principio era la palabra, y la palabra estava con Dios, y Dios era la palabra*. Where a word is ambiguous he puts the Greek in the margin; thus he puts the word λόγος three times to *palabra*. He has no annotations excepting such as explain measures, coins, etc., thus: Matt. xviii, 24, *Diez mille talentos* (Note: "Cada talendo vale 600 ducados," i. e. each talent is worth 600 ducats); *ibid. ver. 28, cient dineros* (Note: "Cada dinero vale casi 30 maravedis," i. e. each denarius is worth 30 maravedis). Very seldom he has an addition, and yet his translation is intelligible even to the unlearned. Sometimes, in spite of all care, he translates rather according to the sense than to the word of the text; e. g. Rom. i, 28, *παρίδωκεν αυτοις ο θεός*, *Vulg. tradidit illos Deus*; the translation of *παρίδωκεν* is "permitio caer," i. e. he suffered them to fall.

(b) Next in chronological order is *Biblia en Lengua Española, traduzida palabra por palabra de la verdad Hebrayca, por muy excelentes Letrados. Vista y examinada por el officio de la Inquisicion*. Con Privilegio del Illustrissimo Señor Duque de Ferrara (En Ferrara, 5313 [i. e. 1553]). At the end we read, "A gloria y loor de nuestro Señor se acabo la presente Biblia en lengua Espannola traduzida de la verdadera origen Hebrayca por muy excelentes letrados: con yndustria y diligencia de Abraham Usque, Portugues: Estampata en Ferrara á costa y despesa de Yom Tob Atias, hijo de Levi Atias Espannol: en 14. de Adar de 5313." In some copies we read at the end, "Con yndustria y diligencia de Duarto Pinel, Portugues: estampata en Ferrara a costa y despesa de Geronymo de Vargas, Espannol, en primero de Marzo de 1553." These copies were made for the use of Christians. That the Spanish translation of the Pentateuch is the same as that printed six years before in the so-called "Constantinople Polyglot-Pentateuch" has been proved beyond a shadow of doubt by Le Long, who also supposes that the Spanish translation, of which the Pentateuch only was printed at Constantinople, while the whole was published at Ferrara, had been in use before the expulsion of the Jews from Spain in 1492, and that the Jewish exiles brought it to Constantinople. The title is followed by (1) an index of Haphtarhas; (2) an index of the order of books among Jews and Christians; (3) an index and short synopsis of the chapters of the Old Test.; (4) an index of the judges, prophets, and high-priests of the Jewish people, together with a short chronology from Adam to the 452d year after the destruction of the Temple according to the Seder Olam (a Jewish chronology); (5) a lectionary for each day, in order to read the Old Test. in one year. The translation in the Ferrara edition is in two columns, and the editors or publishers were so conscientious as to indicate passages concerning which they were doubtful as to the correct translation by a star (*). Where the Hebrew reads *Jehovah*, an .A. with two dots is placed. The verses are not given in the text, but at the end of each book their number is given. The order of the book is, the Pentateuch, Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel. Hosea to Malachi, Psalms (divided into five books), Proverbs, Job, Daniel, Ezra, Nehemiah, Chronicles, Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther. The translation, which follows the Hebrew very closely, is in that ancient Spanish which was used at that time in the synagogue.

A reprint of this translation was published at Amsterdam in the year 1611, also in folio, then in 1630, with the only change that the stars of the first edition are omitted in many places. According to the *Catalogue des Livres Imprimés de la Bibliothèque du Roi de France*, i, 14, No. 201, this edition was edited by Manasseh ben-Israel, as can also be seen from some copies, where we read, *A loor y gloria del Dio fue reformada por Menusseh ben-Israel* (a. 15. de Sebeth 1630).

Another somewhat revised and altered edition is the *Biblia en lengua Espannola. Traduzida palabra por palabra de la verdad Hebrayca, por muy excelentes Letrados. Vista y examinada por el officio de la Inquisicion*. Con Privilegio del Illustrissimo Señor Duque de Ferrara, y aora de nuevo corregida en casa de Joseph Athias, y por su orden impressa (En Amsterdam, Anno 5421 [1661], large 8vo, 1325 pp.). This edition is indeed an improvement upon the former; many corrections are made, obsolete expressions are removed and more intelligible ones introduced; besides, it is more convenient for use than the former editions in folio. The verses are numbered in the margin.

(c) *El Testamento Nuevo de Nuestro Señor Salvador Jesu Christo nueva e fielmente traduzido del Original Griego en Romance Castellano*. En Venecia, en casa de Juan (Philadelpho. M.D.LVI. 8vo). The anonymous translator follows the original Greek; here and there words are added for the better understanding.

(d) *A Spanish Translation of the Prophets Isaiah and*

Jeremish (Thessalonica, 1569), by Joseph ben-Isaac ben-Joseph Jabetz. From the lengthy title (which we do not give in full) we see that the editor intended to translate the whole of the Old Test., and that he commenced with the *later prophets*. But only *Isaiah* and *Jeremiah* were translated, as can be seen from Wolf (*Bibl. Heb.* iv, 137), who had a copy of this translation, which mostly follows that of Ferrara.

(e) *La Biblia, que es, los Sacros Libros del Viejo y Nuevo Testamento, Tradaslada en Espannol. דבר אלהים יקים לא Palabra del Dios nostro permanece para siempre*, Isa. xl. M.D.LXIX. On the last page we read "Anno del Sennor M.D.LXIX. en Septiembre," large 4to. No name of the translator and no place of publication is given. It was probably published at Basle by Thomas Guarinus, which is not only evident from the signs of that printer found in the title-page, but also from a written postscript in the copy of this translation preserved in the library of the Basle University. From this notice we also see that Cassiodoro de Reyna, of Seville, was the translator of this Bible, and this is also corroborated by another copy of this translation found in the library at Frankfurt-on-the-Main (Clement, *Biblioth. Curieuse*, iii, 453). The translation is preceded by 30 pages containing the principles which guided the translator—that, although he held the Vulgate in high esteem, yet he could not always follow it, but perused as many translations as he could find, especially that of Pagninus, which he followed for the most part. The Apocryphal books of the Old Test. are also translated: sometimes additions are inserted in the text and put in brackets for a better understanding, and short glosses are found in the margin. The New Test. of this translation was also republished by Hutter in his Polyglot (1599). Another edition with some slight changes was published by Ricardo del Campo (1596, 8vo), and an entirely revised edition of Reyna's translation is *La Biblia: que es, los Sacros Libros del Viejo y Nuevo Testamento; segunda edicion, revista y conferida con los Textos Hebreos y Griegos, y con diversas traducciones*, per Cypriano de Valera. En Amsterdam, en casa de Lorenzo Jacobi (1602, fol.). The title is followed by two prefaces, one of Valera, the other of Reyna. In the first preface the editor tells us that of Reyna's edition 2600 copies were printed, and all were sold. This was the reason for a new revision and edition. Valera's edition is also published by the British and Foreign Bible Society. The New Test. of Valera's translation was also published separately in the year 1625, with the title, *El Nuevo Testamento, que es los Escriptos Evangelicos y Apostolicos, revisado y conferido con el Texto Griego* por Cypriano de Valera: en Amsterdam (1625, 8vo).

(f) *Humas de Parasioth y Afsharoth, traduzido palabra por palabra de la verdad Hebraica en Espannol* (1627). This is Manasseh ben-Israel's translation of the Pentateuch, of which a second enlarged and revised edition was published in 1655.

(g) *קדש אלולים Las Alabanzas de Santidad. Traducion de los Psalmos de David*. . . Por el Hamam Yahacob Yehuda, Leon Hebreo. . . En Amsterdam (1671). This is Judah Leon's translation of the Psalms, with notes and introductions.

(h) Franco Serrano's translation of the Pentateuch, or *Los cinco Libros de la sucrá Ley, interpretados en Lengua Espannola*. . . En Amsterdam, en casa de Mosseh ben-Dias (1695, 4to). The translator was Joseph Franco Serrano, teacher of Hebrew at the school of the Spanish Jews in Amsterdam. The translation is made with great diligence and care.

(i) Acosta's translation of the historical books, or *Conjecturas sagradas sobre los Prophetas primores, cogidos de los mas celebres expositores*. . . En Leyden, en casa de Thomas van Geel (Anno 1711, 4to). This translation contains Joshua, Judges, Samuel, and Kings. To each verse a paraphrase is added in place of a commentary.

(k) *Biblia en dos Coluñas Hebr. y Espan.* Amsterdam, en casa y á costa de Joseph Jacob, y Abraham de Salmon Proops (Anno 1762, fol.). This is, according to Le Long, an "editio optima, splendida et æstimata." It was not until the end of the 18th century that a Roman Catholic divine undertook to give his Spanish countrymen a new translation, together with the Latin and a commentary. The author of this Bible-work (which was published at Madrid, 1794, in 19 parts) was Phil. Scio de S. Miguel. The translation of Scio has also been adopted by the British and Foreign Bible Society, which prints it since 1828. The latest translation of the New Test. is that by the bishop of Astorga, Fel. de Torres Amat (Madrid, 1837).

5. Besides these translations, we may also mention, under the head of Romanic versions, the New Test., the Pentateuch and Psalms in Catalan, published by the British and Foreign Bible Society for the provinces of Catalonia and Valencia. See Rosenmüller, *Handbuch der biblischen Literatur*, iv, 268 sq.; Le Long, *Bibl. Sac.* i, 180 sq.; Simon [Richard], *Hist. Crit. du V. T.* liv. ii, ch. xix, p. 311; Wolf, *Bibl. Heb.* iv, 137; Baumgarten, *Nachrichten von merkwürdigen Büchern*, ix, 204 sq.; the art. "Romanische Bibelübersetzungen" in *Herzog's Real-Encyclop.*; Reuss, *Gesch. der heil. Schriften des N. Test.* (5th ed. Brunswick, 1874), p. 217, 229; *Biblioth. Bib.* (ibid. 1752), p. 161 sq.; *Index Bibliorum* (Hale), p. 41. (B. P.)

Romanism is the system of Church government which makes the pope the one head and centre of Christendom, with those doctrines and practices which are erroneously maintained as subsidiary to that headship. Thus the dogmas of papal infallibility, of temporal sovereignty, of the immaculate conception of the Blessed Virgin, of the seven sacraments, the celibacy of the clergy, and the system of indulgences are peculiar to the Church of Rome, and are known as supports of the papal power. They are therefore considered as parts of Romanism.

Again, *Romanism* may be used to describe the character of Latin Christianity, as distinguished from Teutonic Christianity. The former has a stricter sacerdotalism, more direction to the conscience, and in its subjects more implicit obedience, greater trustfulness, less of private judgment and of freedom, an inferior sense of personal responsibility, and (perhaps it must be added) a less keen sense of truth. There are also a more rigid ecclesiasticism, maintained by a celibate clergy subject to a foreign spiritual head; a fuller ritual; and a statelier ceremonial. This assumption of power, upon the one hand, and submission to it, on the other, necessitate the keepings of the people in a state of ignorance, and we therefore find Romanism to be the foe of intelligence, of free thought, free speech, and free action. It is a system craftily devised for the usurpation by the few of the rights of the many. See *Bib. Sacra*, i, 139; ii, 451, 757; viii, 64; xix, 432; Blunt, *Theol. Dict.*; Elliott, *Delineation of Romanism*; Hagenbach, *Hist. of Doctrines*; Marriott, *Testimony of the Catacombs*; Meth. Quar. Rev. Oct. 1854; April, 1855, 1856; Jan. 1877; Palmer, *Errors of Romanism*; Whately, *Essays on Romanism*. See POPERY.

Romann, ALBRECHT NATHANAEL, a convert from Judaism and missionary among the Jews, was born Nov. 3, 1819, at Kobylin, in the grand-duchy of Posen. He was educated in the school at Rawicz, afterwards at Lissa, and then at Breslau, where he also had the advantage of attending the lectures at the university. In the latter place he fell in with the so-called Reform party, and became a most zealous pupil of the late celebrated rabbi Dr. Geiger, who was then flourishing at Breslau. At the age of twenty-four he was appointed teacher in a Jewish industrial school in that city. Having exchanged his strict rabbinical orthodoxy for the hollowness of Reform Judaism, he was in a state—unsatisfied, perplexed, and longing for something better and more substantial—from which he was relieved

through the acquaintance with Teichler and Caro, missionaries of the Berlin Society, and especially with Mr. Cerf, of the Scotch Society. Although at first vehemently opposing them, he finally submitted to his conviction, and on Nov. 28, 1847, he was baptized in the Reformed Church by the Rev. Consistorialrath Wachler, Mr. Cerf, Prof. Dr. Oehler, and the general superintendent Dr. Hahn being his sponsors. He now resolved to qualify himself as a Christian schoolmaster, and to effect this the Rev. C. Richter kindly received him into his own house at Rankam; and after having passed his examination at the seminary in Breslau, he obtained a situation as schoolmaster in Ziegenhals, near Neisse, in Silesia. In the year 1851 he was appointed assistant to the Rev. J. C. Hartmann, senior missionary of the London Society at Breslau. His time of probation being over, he was admitted to the society's college at London for further instruction in divinity and the English language, and returned in 1854 as a missionary to Breslau. In 1868 he was removed to Berlin to take charge of the mission there by the side of Prof. Dr. Cassel. For three years he was allowed to carry on the work of his Master in that city, and died Aug. 15, 1871. See *Jewish Intelligence*, 1871, p. 247 sq.; *Dibre Emeth, oder Stimmen der Wahrheit*, 1871, p. 161 sq. (B. P.)

Romano, Giovanni Battista, a convert from Judaism, was a native of Alexandria, and flourished in the 16th century. His grandfather was the famous Elias Levita (q. v.), who instructed him while in Germany. He then went to Italy, and in Venice he tried to bring his brother back into the fold of the synagogue, in which he did not succeed; on the contrary, he became himself a convert to Christianity, and was baptized in 1551. For a long time he was professor of Hebrew and Arabic in Rome. In 1561, pope Pius IV sent him to the patriarch of the Copts, together with Roderich, a member of his order. He translated Giov. Bruno's catechism, which was written against the Oriental heretics, into three Shemitic languages, and translated into Arabic the decrees of the Council of Trent, for the sake of having them circulated in the East. He died at Rome, March 3, 1580. See Delitzsch, *Kunst, Wissenschaft u. Judenthum*, p. 291 sq.; Phil. Alegambe, *De Scriptor. Soc. Jesu*, p. 225 sq.; R. Simon, *Bibl. Selecta*, i, 148; Grätz, *Gesch. d. Juden*, ix, 356. (B. P.)

Romano, Jehudah Leone, BEN-MOSES, of Rome, was born about the year 1292. He was the teacher of king Robert of Naples, whom he instructed in the languages of the Bible. He was very well acquainted with scholastic literature, and translated the philosophical writings of Albertus Magnus, Thomas Aquinas, and others for his coreligionists. He also wrote *Elucidations* on passages of the Bible from a philosophical standpoint, excerpts of which have been published in Immanuel of Rome's *Commentary on Proverbs* (Naples, 1486). The date of Romano's death is not known. Most of his writings are still in MS. in Rome, Florence, Paris, Munich, Oxford, and London. See Furst, *Bibl. Jud.* iii, 165 sq.; Delitzsch, *Kunst, Wissenschaft u. Judenthum*, p. 257; De Rossi, *Dizionario Storico degli Autori Ebrei*, p. 277 (Germ. transl.); Grätz, *Gesch. d. Juden* (Leips. 1873), vii, 298 sq.; more especially Zunz, *Jehuda b.-Moses Romano*, reprinted in Geiger's *Wissenschaftl. Zeitschr. für jüd. Theologie* (Frankfort-on-the-Maine, 1836), ii, 321–330; and Steinschneider, *Giuda Romano*, *Notizia estratta del giorn. Romano Il Buonarrotti*, Gennaio, 1870 (Roma, 1870), mentioned in Kayserling's *Bibliothek jüdischer Kanzelredner*, ii, Beilage, p. 14 sq. (B. P.)

Romans, EPISTLE TO THE. This is naturally placed first among the epistles in the New Test., both on account of its comparative length and its importance. It claims our interest more than the other didactic epistles of Paul, because it is more systematic, and because it explains especially that truth which subsequently became the principle of the Reformation, viz. righteousness through faith. It has, however, been

greatly misunderstood in modern times, as it seems to have been very early (2 Pet. iii, 15, 16).

I. *Authorship.*—Internal evidence is so strongly in favor of the genuineness of the Epistle to the Romans that it has never been seriously questioned. Even the sweeping criticism of Baur did not go beyond condemning the last two chapters as spurious. But while the epistle bears in itself the strongest proofs of its Pauline authorship, the external testimony in its favor is not inconsiderable. The reference to Rom. ii, 4 in 2 Pet. iii, 15 is indeed more than doubtful. In the Epistle of James, again (ii, 14), there is an allusion to perversions of Paul's language and doctrine which has several points of contact with the Epistle to the Romans; but this may perhaps be explained by the oral rather than the written teaching of the apostle, as the dates seem to require. It is not the practice of the apostolic fathers to cite the New-Test. writers by name, but marked passages from the Romans are found imbedded in the epistles of Clement and Polycarp (Rom. i, 29-32 in Clem. *Cor.* xxxv, and Rom. xiv, 10, 12, in Polyc. *Phil.* vi). It seems also to have been directly cited by the elder quoted in Irenæus (iv, 27, 2, "ideo Paulum dixisse;" comp. Rom. xi, 21, 17), and is alluded to by the writer of the Epistle to Diognetus (c. ix; comp. Rom. iii, 21 fol.; v, 20), and by Justin Martyr (*Dial.* c. 23; comp. Rom. iv, 10, 11, and in other passages). The title of Melito's treatise *On the Hearing of Faith* seems to be an allusion to this epistle (see, however, Gal. iii, 2, 3). It has a place, moreover, in the Muratorian Canon and in the Syriac and Old-Latin versions. Nor have we the testimony of orthodox writers alone. The epistle was commonly quoted as an authority by the heretics of the subapostolic age: by the Ophites (Hippol. *Adv. Hæc.* p. 99; comp. Rom. i, 20-26), by Basilides (*ibid.* p. 238; comp. Rom. viii, 19, 22, and v, 13, 14), by Valentinus (*ibid.* p. 195; comp. Rom. viii, 11), by the Valentinians Heracleon and Ptolemæus (Westcott, *On the Canon*, p. 335, 340), and perhaps also by Tatian (*Orat.* c. iv; comp. Rom. i, 20), besides being included in Marcion's Canon. In the latter part of the 2d century the evidence in its favor is still fuller. It is obviously alluded to in the letter to the churches of Vienne and Lyons (Euseb. *H. E.* v, 1; comp. Rom. viii, 18), and by Athénagoras (p. 13; comp. Rom. xii, 1; p. 37; comp. Rom. i, 24) and Theophilus of Antioch (*Ad Autol.* p. 79; comp. Rom. ii, 6 fol.; p. 126; comp. Rom. xiii, 7, 8); and is quoted frequently and by name by Irenæus, Tertullian, and Clement of Alexandria (see Kirchhofer, *Quellen*, p. 198, and especially Westcott, *On the Canon*, *passim*).

II. *Integrity.*—This has not been so unanimously admitted as the genuineness. With the exception of Marcion's authorities, indeed, who probably tampered with the manuscripts of the epistles as he did with those of the gospels, and who considered the last two chapters of this epistle spurious, all the manuscripts and versions contain the epistle as we have it: it is in modern times that doubts have been thrown upon the authenticity of the concluding portion. By Heumann the epistle was considered to have originally ended with ch. xi; ch. xii-xv being a distinct production, though likewise addressed to the Romans, and ch. xvi a sort of postscript to the two. Semler (1762) confined his doubts to ch. xv and xvi, the former of which he regarded as a private encyclical for the use of the brethren whom the bearers of the larger epistle should meet on their way to Rome, the latter as a catalogue of persons to be saluted on the same journey. Schulz (1829) supposed that ch. xvi was addressed to the Ephesians from Rome, and Schott that it is made up of fragments from a short epistle written by Paul when at Corinth to an Asiatic Church. Baur has more recently (1836) followed on the same side; but, as usual, on merely internal grounds, and in favor of his peculiar theory of the relation of the parties of Paul and Peter in the apostolic age. These various hypotheses have long passed into oblivion; and by all recent critics of note

the last two chapters have been restored to their place as an integral part of the epistle.

With greater semblance of reason has the genuineness of the doxology at the end of the epistle been questioned. Schmidt and Reiche consider it not to be genuine. In this doxology the anacoluthical and unconnected style causes some surprise, and the whole has been deemed to be out of its place (vers. 26 and 27). The arguments against its genuineness on the ground of style, advanced by Reiche, are met and refuted by Fritzsche (*Rom.* vol. i, p. xxxv). Such defects of style may easily be explained from the circumstance that the apostle hastened to the conclusion, but would be quite inexplicable in additions of a copyist who had time for calm consideration. The same words occur in different passages of the epistle, and it must be granted that such a fluctuation sometimes indicates an interpolation. In the Codex I, in most of the Codices Minusculi, as well as in Chrysostom, the words occur at the conclusion of ch. xiv. In the codices B, C, D, E, and in the Syrian translation, this doxology occurs at the conclusion of ch. xvi. In Codex A it occurs in both places; while in Codex D** the words are wanting entirely, and they seem not to fit into either of the two places. If the doxology be put at the conclusion of ch. xiv, Paul seems to promise to those Christians weak in faith, of whom he had spoken, a confirmation of their belief. But it seems unfit in this connection to call the Gospel an eternal mystery, and the doxology seems here to interrupt the connection between ch. xiv and xv; and at the conclusion of ch. xvi it seems to be superfluous, since the blessing had been pronounced already in ver. 24. We, however, say that this latter circumstance need not have prevented the apostle from allowing his animated feelings to burst forth in a doxology, especially at the conclusion of an epistle which treated amply on the mystery of redemption. We find an analogous instance in Eph. xxiii, 27, where a doxology occurs after the mystery of salvation had been mentioned. We are therefore of opinion that the doxology is rightly placed at the conclusion of ch. xvi, and that it was in some codices erroneously transposed to the conclusion of ch. xiv, because the copyist considered the blessing in xvi, 24 to be the real conclusion of the epistle. In confirmation of this remark, we observe that the same codices in which the doxology occurs in ch. xvi either omit the blessing altogether or place it after the doxology. (See § iv, 7 below.)

III. *Time and Place of Writing.*—The date of this epistle is fixed with more absolute certainty and within narrower limits than that of any other of Paul's epistles. The following considerations determine the time of writing. *First.* Certain names in the salutations point to Corinth as the place from which the letter was sent. (1.) Phœbe, a deaconess of Cenchreæ, one of the port towns of Corinth, is commended to the Romans (xvi, 1, 2). (2.) Gaius, in whose house Paul was lodged at the time (ver. 23), is probably the person mentioned as one of the chief members of the Corinthian Church in 1 Cor. i, 14, though the name was very common. (3.) Erastus, here designated "the treasurer of the city" (*οικονόμος*, ver. 23, A. V. "chamberlain"), is elsewhere mentioned in connection with Corinth (2 Tim. iv, 20; see also Acts xix, 22). *Secondly.* Having thus determined the place of writing to be Corinth, we have no hesitation in fixing upon the visit recorded in Acts xx, 3, during the winter and spring following the apostle's long residence at Ephesus, as the occasion on which the epistle was written. For Paul, when he wrote the letter, was on the point of carrying the contributions of Macedonia and Achaia to Jerusalem (xv, 25-27), and a comparison with Acts xx, 22; xxiv, 17; and also 1 Cor. xvi, 4; 2 Cor. viii, 1, 2; ix, 1 sq., shows that he was so engaged at this period of his life. (See Paley, *Horæ Paulinæ*, ch. ii, § 1.) Moreover, in this epistle he declares his intention of visiting the Romans after he has been at Jerusalem (xv, 23-25), and that such was his

design at this particular time appears from a casual notice in Acts xix, 21.

The epistle, then, was written from Corinth during Paul's third missionary journey, on the occasion of the second of the two visits recorded in the Acts. On this occasion he remained three months in Greece (Acts xx, 3). When he left, the sea was already navigable, for he was on the point of sailing for Jerusalem when he was obliged to change his plans. On the other hand, it cannot have been late in the spring, because, after passing through Macedonia and visiting several places on the coast of Asia Minor, he still hoped to reach Jerusalem by Pentecost (xx, 16). It was therefore in the winter or early spring of the year that the Epistle to the Romans was written. According to the most probable system of chronology, this would be the winter of A.D. 54-55.

The Epistle to the Romans is thus placed in chronological connection with the epistles to the Galatians and Corinthians, which appear to have been written within the twelve months preceding. The First Epistle to the Corinthians was written before Paul left Ephesus, the Second from Macedonia when he was on his way to Corinth, and the Epistle to the Galatians most probably either in Macedonia or after his arrival at Corinth, i. e. after the epistles to the Corinthians, though the date of the Galatian epistle is not absolutely certain. See GALATIANS, EPISTLE TO THE. We shall have to notice the relations existing between these contemporaneous epistles hereafter. At present it will be sufficient to say that they present a remarkable resemblance to each other in style and matter—a much greater resemblance than can be traced to any other of Paul's epistles. They are at once the most intense and most varied in feeling and expression—if we may so say, the most Pauline of all Paul's epistles. When Baur expects these four epistles alone from his sweeping condemnation of the genuineness of all the letters bearing Paul's name (*Paulus, der Apostel*), this is a mere caricature of sober criticism; but underlying this erroneous exaggeration is the fact that the epistles of this period—Paul's third missionary journey—have a character and an intensity peculiarly their own, corresponding to the circumstances of the apostle's outward and inward life at the time when they were written. For the special characteristics of this group of epistles, see a paper on the Epistle to the Galatians in the *Journal of Class. and Sac. Phil.* iii, 289.

IV. *Occasion and Object of Writing.*—These evidently grew out of the position and character of the persons addressed, and therefore involve a consideration of the Church at Rome and of the apostle's purposes with relation to it.

1. The opinions concerning the *general design* of this letter differ according to the various suppositions of those who think that the object of the letter was supplied by the occasion, or the supposition that the apostle selected his subject only after an opportunity for writing was offered. In earlier times the latter opinion prevailed, as, for instance, in the writings of Thomas Aquinas, Luther, Melancthon, Calvin. In more recent times the other opinion has generally been advocated, as, for instance, by Hug, Eichhorn, and Platt. Many writers suppose that the debates mentioned in ch. xiv and xv called forth this epistle. Hug, therefore, is of opinion that the object of the whole epistle was to set forth the following proposition: *Jews and Gentiles have equal claim to the kingdom of God.* According to Eichhorn, the Roman Jews, being exasperated against the disciples of Paul, endeavored to demonstrate that Judaism was sufficient for the salvation of mankind; consequently Eichhorn supposes that the polemics of Paul were not directed against Judaizing converts to Christianity, as in the Epistle to the Galatians, but rather against Judaism itself. This opinion is also maintained by De Wette (*Einleitung ins Neue Testament*, 4th ed. § 138). According to Credner (*Einleitung*,

§ 141), the intention of the apostle was to render the Roman congregation favorably disposed before his arrival in the chief metropolis, and he therefore endeavored to show that the evil reports spread concerning himself by zealously Judaizing Christians were erroneous. This opinion is nearly related to that of Baur, who supposes that the real object of this letter is mentioned only in ch. ix-xi. According to Baur, the Judaizing zealots were displeased that by the instrumentality of Paul such numbers of Gentiles entered the kingdom of God that the Jews ceased to appear as the Messianic people. Baur supposes that these Judaizers are more especially refuted in ch. ix-xi, after it has been shown in the first eight chapters that it was in general incorrect to consider one people better than another, and that all had equal claims to be justified by faith. Against the opinion that the apostle, in writing the Epistle to the Romans, had this particular polemical aim, it has been justly objected by Rückert (in the 2d ed. of his *Commentar*), Olshausen, and De Wette that the apostle himself states that his epistle had a general scope. Paul says in the introduction that he had long entertained the wish of visiting the metropolis, in order to confirm the faith of the Church, and to be himself comforted by that faith (i, 12). He adds (ver. 16) that he was prevented from preaching in the chief city by external obstacles only. He says that he had written to the Roman Christians in fulfilment of his vocation as apostle to the Gentiles. The journey of Phœbe to Rome seems to have been the external occasion of the epistle. Paul made use of this opportunity by sending the sum and substance of the Christian doctrine in writing, having been prevented from preaching in Rome. Paul had many friends in Rome who communicated with him; consequently he was the more induced to address the Romans, although he manifested some hesitation in doing so (xv, 15). These circumstances exercised some influence as well on the form as on the contents of the letter; so that, for instance, its contents differ considerably from the Epistle to the Ephesians, although this also has a general scope.

2. The *immediate circumstances* under which the epistle was written were these. Paul had long purposed visiting Rome, and still retained this purpose, wishing also to extend his journey to Spain (i, 9-13; xv, 22-29). For the time, however, he was prevented from carrying out his design, as he was bound for Jerusalem with the alms of the Gentile Christians, and meanwhile he addressed this letter to the Romans, to supply the lack of his personal teaching. Phœbe, a deaconess of the neighboring Church of Cenchræ, was on the point of starting for Rome (xvi, 1-2), and probably conveyed the letter. The body of the epistle was written at the apostle's dictation by Tertius (ver. 22); but perhaps we may infer from the abruptness of the final doxology that it was added by the apostle himself, more especially as we gather from other epistles that it was his practice to conclude with a few striking words in his own handwriting, to vouch for the authorship of the letter, and frequently also to impress some important truth more strongly on his readers.

3. The *Origin of the Roman Church* is involved in obscurity (see Mangold, *Die Anfänge der römischen Gemeinde* [Marb. 1866]). If it had been founded by Peter, according to a later tradition, the absence of any allusion to him both in this epistle and in the letters written by Paul from Rome would admit of no explanation. It is equally clear that no other apostle was the founder. In this very epistle, and in close connection with the mention of his proposed visit to Rome, the apostle declares that it was his rule not to build on another man's foundation (xv, 20), and we cannot suppose that he violated it in this instance. Again, he speaks of the Romans as especially falling to his share as the apostle of the Gentiles (i, 13), with an evident reference to the partition of the field of labor between himself and Peter, mentioned in Gal. ii, 7-9. More-

over, when he declares his wish to impart some spiritual gift (*χάρισμα*) to them, "that they might be established" (i, 11), this implies that they had not yet been visited by an apostle, and that Paul contemplated supplying the defect, as was done by Peter and John in the analogous case of the churches founded by Philip in Samaria (Acts viii, 14-17). See PETER (*the Apostle*).

The statement in the Clementines (*Hom. i*, § 6) that the first tidings of the Gospel reached Rome during the lifetime of our Lord is evidently a fiction for the purposes of the romance. On the other hand, it is clear that the foundation of this Church dates very far back. Paul in this epistle salutes certain believers resident in Rome—Andronicus and Junia (or Junianus?)—adding that they were distinguished among the apostles, and that they were converted to Christ before himself (xvi, 7), for such seems to be the meaning of the passage, rendered somewhat ambiguous by the position of the relative pronouns. It may be that some of those Romans, "both Jews and proselytes," present on the day of Pentecost (*οἱ ἐπιδημοῦντες Ῥωμαῖοι, Ἰουδαῖοι τε καὶ προσήλυτοι*, Acts ii, 10), carried back the earliest tidings of the new doctrine, or the Gospel may have first reached the imperial city through those who were scattered abroad to escape the persecution which followed on the death of Stephen (Acts viii, 4; xi, 19). At all events, a close and constant communication was kept up between the Jewish residents in Rome and their fellow-countrymen in Palestine by the exigencies of commerce, in which they became more and more engrossed as their national hopes declined, and by the custom of repairing regularly to their sacred festivals at Jerusalem. Again, the imperial edicts alternately banishing and recalling the Jews (comp. e. g. in the case of Claudius, Josephus, *Ant.* xix, 5, 3, with Suetonius, *Claud.* 25) must have kept up a constant ebb and flow of migration between Rome and the East, and the case of Aquila and Priscilla (Acts xviii, 2; see Paley, *Hor. Paul.* c. ii, § 2) probably represents a numerous class through whose means the opinions and doctrines promulgated in Palestine might reach the metropolis. At first we may suppose that the Gospel was preached there in a confused and imperfect form, scarcely more than a phase of Judaism, as in the case of Apollos at Corinth (Acts xviii, 25), or the disciples at Ephesus (Acts xix, 1-8). As time advanced and better-instructed teachers arrived, the clouds would gradually clear away, till at length the appearance of the great apostle himself at Rome dispersed the mists of Judaism which still hung about the Roman Church. Long after Christianity had taken up a position of direct antagonism to Judaism in Rome, heathen statesmen and writers still persisted in confounding the one with the other (see Merivale, *Hist. of Rome*, vi, 278, etc.).

4. A question next arises as to the composition of the Roman Church at the time when Paul wrote. Did the apostle address a Jewish or a Gentile community, or, if the two elements were combined, was one or other predominant so as to give a character to the whole Church? Either extreme has been vigorously maintained, Baur, for instance, asserting that Paul was writing to Jewish Christians, Olshausen arguing that the Roman Church consisted almost solely of Gentiles. We are naturally led to seek the truth in some intermediate position. Jowett finds a solution of the difficulty in the supposition that the members of the Roman Church, though Gentiles, had passed through a phase of Jewish proselytism. This will explain some of the phenomena of the epistle, but not all. It is more probable that Paul addressed a mixed Church of Jews and Gentiles, the latter perhaps being the more numerous.

There are certainly passages which imply the presence of a large number of Jewish converts to Christianity. The use of the second person in addressing the Jews (ch. ii and iii) is clearly not assumed merely for argumentative purposes, but applies to a portion at least of those into whose hands the letter would fall. The

constant appeals to the authority of "the law" may in many cases be accounted for by the Jewish education of the Gentile believers (so Jowett, ii, 22), but sometimes they seem too direct and positive to admit of this explanation (Rom. iii, 19; vii, 1). In ch. vii Paul appears to be addressing Jews, as those who, like himself, had once been under the dominion of the law, but had been delivered from it in Christ (see especially verses 4 and 6). And when in xi, 13 he says, "I am speaking to you—the Gentiles," this very limiting expression "the Gentiles" implies that the letter was addressed to not a few to whom the term would not apply.

Again, if we analyze the list of names in ch. xvi, and assume that this list approximately represents the proportion of Jew and Gentile in the Roman Church (an assumption at least not improbable), we arrive at the same result. It is true that Mary, or rather Mariam (xvi, 6), is the only strictly Jewish name. But this fact is not worth the stress apparently laid on it by Mr. Jowett (ii, 27); for Aquila and Priscilla (ver. 3) were Jews (Acts xviii, 2, 26), and the Church which met in their house was probably of the same nation. Andronicus and Junia (or Junias? ver. 7) are called Paul's kinsmen. The same term is applied to Herodion (ver. 11). These persons, then, must have been Jews, whether "kinsmen" is taken in the wider or the more restricted sense. The name Apelles (ver. 10), though a heathen name also, was most commonly borne by Jews, as appears from Horace (*Sat.* I, v, 100). If the Aristobulus of ver. 10 was one of the princes of the Herodian house, as seems probable, we have also in "the household of Aristobulus" several Jewish converts. Altogether it appears that a very large fraction of the Christian believers mentioned in these salutations were Jews, even supposing that the others, bearing Greek and Latin names, of whom we know nothing, were heathens.

Nor does the existence of a large Jewish element in the Roman Church present any difficulty. The captives carried to Rome by Pompey formed the nucleus of the Jewish population in the metropolis. See ROME. Since that time they had largely increased. During the reign of Augustus we hear of above 8000 resident Jews attaching themselves to a Jewish embassy which appealed to this emperor (Josephus, *Ant.* xvii, 11, 1). The same emperor gave them a quarter beyond the Tiber, and allowed them the free exercise of their religion (Philo, *Leg. ad Caium*, p. 568 M.). About the time when Paul wrote, Seneca, speaking of the influence of Judaism, echoes the famous expression of Horace (*Ep.* ii, 1, 156) respecting the Greeks—"Victi victoribus leges dederunt" (Seneca, in Augustine, *De Civ. Dei*, vi, 11). The bitter satire of Juvenal and indignant complaints of Tacitus of the spread of the infection through Roman society are well-known (Tacitus, *Ann.* xv, 44; Juvenal, *Sat.* xiv, 96). These converts to Judaism were mostly women. Such proselytes formed at that period the point of coalescence for the conversion of the Gentiles.

Among the converts from Judaism to Christianity there existed in the days of Paul two parties. The congregated apostles had decreed, according to Acts xv, that the converts from paganism were not bound to keep the ritual laws of Moses. There were, however, many converts from Judaism who were disinclined to renounce the authority of the Mosaic law, and appealed erroneously to the authority of James (Gal. ii, 9; comp. Acts xxi, 25); they claimed also the authority of Peter in their favor. Such converts from Judaism, mentioned in the other epistles, who continued to observe the ritual laws of Moses were not prevalent in Rome: Baur, however, supposes that this Ebionitic tendency prevailed at that time in all Christian congregations, Rome not excepted. He thinks that the converts from Judaism were then so numerous that all were compelled to submit to the Judaizing opinions of the majority (comp. Baur, *Abhandlung über Zweck und Veranlassung des Römerbriefs*, in the *Tübinger Zeitschrift*, 1836). However, Neander has also shown that the Judaizing ten-

dency did not prevail in the Roman Church (comp. Neander, *Pflanzung der christlichen Kirche* [3d ed.], p. 388). This opinion is confirmed by the circumstance that, according to ch. xvi, Paul had many friends at Rome. Baur removes this objection only by declaring ch. xvi to be spurious. He appeals to ch. xiv in order to prove that there were Ebionitic Christians at Rome: it appears, however, that the persons mentioned in ch. xiv were by no means strictly Judaizing zealots, wishing to overrule the Church, but, on the contrary, some scrupulous converts from Judaism, upon whom the others looked down contemptuously. There were, indeed, some disagreements between the Christians in Rome. This is evident from xv, 6-9, and xi, 17, 18: these debates, however, were not of so obstinate a kind as among the Galatians; otherwise the apostle could scarcely have praised the congregation at Rome as he does in ch. i, 8, 12, and xv, 14. From ch. xvi, 17-20 we infer that the Judaizers had endeavored to find admittance, but with little success.

On the other hand, situated in the metropolis of the great empire of heathendom, the Roman Church must necessarily have been in great measure a Gentile Church; and the language of the epistle bears out this supposition. It is professedly as the apostle of the Gentiles that Paul writes to the Romans (i, 5). He hopes to have some fruit among them, as he had among the other Gentiles (ver. 13). Later on in the epistle he speaks of the Jews in the third person, as if addressing Gentiles: "I could wish that myself were accursed for my brethren, my kinsmen after the flesh, who are Israelites," etc. (ix, 3, 4). Again: "my heart's desire and prayer to God for *them* is that they might be saved" (x, 1; the right reading is *ὑπὲρ αὐτῶν*, not *ὑπὲρ τοῦ Ἰσραὴλ*, as in the Received Text). Comp. also xi, 23, 25, and especially xi, 30: "For as ye in times past did not believe God, . . . so did these also (i. e. the Jews) now not believe," etc. In all these passages Paul clearly addresses himself to Gentile readers.

These Gentile converts, however, were not, for the most part, native Romans. Strange as the paradox appears, nothing is more certain than that the Church of Rome was at this time a Greek, and not a Latin, Church. It is clearly established that the early Latin versions of the New Test. were made not for the use of Rome, but for the provinces, especially Africa (Westcott, *Canon*, p. 269). All the literature of the early Roman Church was written in the Greek tongue. The names of the bishops of Rome during the first two centuries are, with but few exceptions, Greek (see Milman, *Latin Christianity*, i, 27). In accordance with these facts, we find that a very large proportion of the names in the salutations of this epistle are Greek names; while of the exceptions, Priscilla, Aquila, and Junia (or Junias), were certainly Jews; and the same is true of Rufus, if, as is not improbable, he is the same mentioned in Mark xv, 21. Julia was probably a dependent of the imperial household, and derived her name accordingly. The only Roman names remaining are Amplias (i. e. Ampliatus) and Urbanus, of whom nothing is known, but their names are of late growth, and certainly do not point to an old Roman stock. It was therefore from the Greek population of Rome, pure or mixed, that the Gentile portion of the Church was almost entirely drawn. The Greeks formed a very considerable fraction of the whole people of Rome. They were the most busy and adventurous, and also the most intelligent of the middle and lower classes of society. The influence which they were acquiring by their numbers and versatility is a constant theme of reproach in the Roman philosopher and satirist (Juvenal, iii, 60-80; vi, 184; Tacitus, *De Orat.* 29). They complain that the national character is undermined, that the whole city has become Greek. Speaking the language of international intercourse, and brought by their restless habits into contact with foreign religions, the Greeks had larger opportunities than others of acquainting themselves with the truths of the

Gospel; while, at the same time, holding more loosely to traditional beliefs, and with minds naturally more inquiring, they would be more ready to welcome these truths when they came in their way. At all events, for whatever reason, the Gentile converts at Rome were Greeks, not Romans; and it was an unfortunate conjecture on the part of the transcriber of the Syriac Peshito that this letter was written "in the Latin tongue" (ܠܠܠܝܢܝܐ). Every line in the epistle bespeaks an original.

When we inquire into the probable rank and station of the Roman believers, an analysis of the names in the list of salutations again gives an approximate answer. These names belong for the most part to the middle and lower grades of society. Many of them are found in the columbaria of the freedmen and slaves of the early Roman emperors (see *Journal of Class. and Sac. Phil.* iv, 57). It would be too much to assume that they were the same persons; but, at all events, the identity of names points to the same social rank. Among the less wealthy merchants and tradesmen, among the petty officers of the army, among the slaves and freedmen of the imperial palace, whether Jews or Greeks, the Gospel would first find a firm footing. To this last class allusion is made in Phil. iv, 22, "they that are of Cæsar's household." From these it would gradually work upwards and downwards; but we may be sure that in respect of rank the Church of Rome was no exception to the general rule, that "not many wise, not many mighty, not many noble," were called (1 Cor. i, 26).

It seems probable, from what has been said above, that the Roman Church at this time was composed of Jews and Gentiles in nearly equal portions. This fact finds expression in the account, whether true or false, which represents Peter and Paul as presiding at the same time over the Church at Rome (Dionys. Cor. ap. Euseb. *H. E.* ii, 25; Irenæus, iii, 3). Possibly, also, the discrepancies in the lists of the early bishops of Rome may find a solution (Pearson, *Minor Theol. Works*, ii, 449; Bunsen, *Hippolytus*, i, 44) in the joint episcopate of Linus and Cletus—the one ruling over the Jewish, the other over the Gentile, congregation of the metropolis. If this conjecture be accepted, it is an important testimony to the view here maintained, though we cannot suppose that in Paul's time the two elements of the Roman Church had distinct organizations.

5. The heterogeneous composition of this Church explains the general character of the *Epistle to the Romans*. In an assemblage so various, we should expect to find not the exclusive predominance of a single form of error, but the coincidence of different and opposing forms. The Gospel had here to contend not specially with Judaism, nor specially with heathenism, but with both together. It was therefore the business of the Christian teacher to reconcile the opposing difficulties and to hold out a meeting-point in the Gospel. This is exactly what Paul does in the Epistle to the Romans, and what, from the circumstances of the case, he was well enabled to do. He was addressing a large and varied community which had not been founded by himself, and with which he had had no direct intercourse. Again, it does not appear that the letter was specially written to answer any doubts, or settle any controversies, then rising in the Roman Church. There were therefore no disturbing influences, such as arise out of personal relations, or peculiar circumstances, to derange a general and systematic exposition of the nature and working of the Gospel. At the same time, the vast importance of the metropolitan Church, which could not have been overlooked even by an uninspired teacher, naturally pointed it out to the apostle as the fittest body to whom to address such an exposition. Thus the Epistle to the Romans is more of a treatise than of a letter. If we remove the personal allusions in the opening verses, and the salutations at the close, it seems not more particularly addressed to the Church of Rome than to any

other Church of Christendom. In this respect it differs widely from the Epistles to the Corinthians and Galatians, with which, as being written about the same time, it may most fairly be compared, and which are full of personal and direct allusions. In one instance alone we seem to trace a special reference to the Church of the metropolis. The injunction of obedience to temporal rulers (xiii, 1) would most fitly be addressed to a congregation brought face to face with the imperial government, and the more so as Rome had recently been the scene of frequent disturbances, on the part of either Jews or Christians, arising out of a feverish and restless anticipation of the Messiah's coming (Sueton. *Claud.* 25). Other apparent exceptions admit of a different explanation.

6. This explanation is, in fact, to be sought in its relation to the *contemporaneous epistles*. The letter to the Romans closes the group of epistles written during the second missionary journey. This group contains, besides, as already mentioned, the letters to the Corinthians and Galatians, written probably within the few months preceding. At Corinth, the capital of Achaia and the stronghold of heathendom, the Gospel would encounter its severest struggle with Gentile vices and prejudices. In Galatia, which, either from natural sympathy or from close contact, seems to have been more exposed to Jewish influence than any other Church within Paul's sphere of labor, it had a sharp contest with Judaism. In the epistles to these two churches we study the attitude of the Gospel towards the Gentile and Jewish world respectively. These letters are direct and special. They are evoked by present emergencies, are directed against actual evils, are full of personal applications. The Epistle to the Romans is the summary of what he had written before, the result of his dealing with the two antagonistic forms of error, the gathering together of the fragmentary teaching in the Corinthian and Galatian letters. What is there immediate, irregular, and of partial application is here arranged and completed and thrown into a general form. Thus, on the one hand, his treatment of the Mosaic law points to the difficulties he encountered in dealing with the Galatian Church; while, on the other, his cautions against antinomian excesses (vi, 15, etc.), and his precepts against giving offence in the matter of meats and the observance of days (ch. xiv), remind us of the errors which he had to correct in his Corinthian converts (comp. 1 Cor. vi, 12 sq.; viii, 1 sq.). Those injunctions, then, which seem at first sight special, appear not to be directed against any actual known failings in the Roman Church, but to be suggested by the possibility of those irregularities occurring in Rome which he had already encountered elsewhere.

7. Viewing this epistle, then, rather in the light of a treatise than of a letter, we are enabled to explain certain *phenomena in the text* above alluded to (§ ii). In the received text a doxology stands at the close of the epistle (xvi, 25-27). The preponderance of evidence is in favor of this position, but there is respectable authority for placing it at the end of ch. xiv. In some texts, again, it is found in both places, while others omit it entirely. The phenomena of the MSS. seem best explained by supposing that the letter was circulated at an early date (whether during the apostle's lifetime or not it is idle to inquire) in two forms, both with and without the two last chapters. In the shorter form it was divested, as far as possible, of its epistolary character by abstracting the personal matter addressed especially to the Romans, the doxology being retained at the close. A still further attempt to strip this epistle of any special references is found in MS. G, which omits *ἐν Ρώμῃ* (i, 7) and *τοῖς ἐν Ρώμῃ* (ver. 15); for it is to be observed, at the same time, that this MS. omits the doxology entirely, and leaves a space after ch. xiv. This view is somewhat confirmed by the parallel case of the opening of the Ephesian epistle, in which there is very high authority for omitting the words *ἐν Ἐφέσῳ*, and which bears strong marks of having been intended for a circular letter.

V. *Scope, Contents, and Characteristics*.—The elaborate argument and logical order observed in this epistle give it a very systematic character. Nevertheless, the bearing of many of its parts has often been greatly obscured or imperfectly understood, especially under the influence of polemical bias. On this account, as well as because of the great interest always attached to the fundamental doctrines so formally treated in it, we give an unusually full outline of its contents, even at the risk of some repetition.

1. In describing the *general purport* of this epistle we may start from Paul's own words, which, standing at the beginning of the doctrinal portion, may be taken as giving a summary of the contents: "The Gospel is the power of God unto salvation to every one that believeth, to the Jew first and also to the Greek; for therein is the righteousness of God revealed from faith to faith" (i, 16, 17). Accordingly the epistle has been described as comprising "the religious philosophy of the world's history." The world in its religious aspect is divided into Jew and Gentile. The different positions of the two, as regards their past and present relation to God and their future prospects, are explained. The atonement of Christ is the centre of religious history. The doctrine of justification by faith is the key which unlocks the hidden mysteries of the divine dispensation.

It belongs to the characteristic type of Paul's teaching to exhibit the Gospel in its historical relation to the human race. In the Epistle to the Romans, also, we find that peculiar character of Paul's teaching which induced Schelling to call Paul's doctrine a philosophy of the history of man. The real purpose of the human race is in a sublime manner stated by Paul in his speech in Acts xvii, 26, 27; and he shows at the same time how God had, by various historical means, promoted the attainment of his purpose. Paul exhibits the Old-Test. dispensation under the form of an institution for the education of the whole human race, which should enable men to terminate their spiritual minority and become truly of age (Gal. iii, 24; iv, 1-4). In the Epistle to the Romans, also, the apostle commences by describing the two great divisions of the human race, viz. those who underwent the preparatory spiritual education of the Jews, and those who did not undergo such a preparatory education. We find a similar division indicated by Christ himself (John x, 16), where he speaks of one flock separated by hurdles. The chief aim of all nations, according to Paul, should be the *righteousness before the face of God*, or absolute realization of the moral law. According to Paul the heathen also have their νόμος, law, as well religious as moral internal revelation (Rom. i, 19, 32; ii, 15). The heathen have, however, not fulfilled that law which they knew, and are in this respect like the Jews, who also disregarded their own law (ch. ii). Both Jews and Gentiles are transgressors, or, by the law, separated from the grace and sonship of God (ver. 12; iii, 20); consequently, if blessedness could only be obtained by fulfilling the demands of God, no man could be blessed. God, however, has gratuitously given righteousness and blessedness to all who believe in Christ (ver. 21-31). The Old Test. also recognises the value of religious faith (ch. iv). Thus we freely attain to peace and sonship of God presently, and have before us still greater things, viz. the future development of the kingdom of God (v, 1-11). The human race has gained in Christ much more than it lost in Adam (v, 12, 21). This doctrine by no means encourages sin (ch. vi); on the contrary, men who are conscious of divine grace fulfil the law much more energetically than they were able to do before having attained to this knowledge, because the law alone is even apt to sharpen the appetite for sin and leads finally to despair (ch. vii); but now we fulfil the law by means of that new spirit which is given unto us, and the full development of our salvation is still before us (viii, 1-27). The sufferings of the present time cannot prevent this development, and must rather work for good to those

whom God from eternity has viewed as faithful believers; and nothing can separate such believers from the eternal love of God (viii, 28-39). It causes pain to behold the Israelites themselves shut out from salvation; but they themselves are the cause of this seclusion, because they wished to attain salvation by their own resources and exertions, by their descent from Abraham, and by their fulfilment of the law. Thus, however, the Jews have not obtained that salvation which God has freely offered under the sole condition of faith in Christ (ch. ix); the Jews have not entered upon the way of faith, therefore the Gentiles were preferred, which was predicted by the prophets. However, the Jewish race, as such, has not been rejected; some of them obtain salvation by a selection made not according to their works, but according to the grace of God. If some of the Jews are left to their own obduracy, even their temporary fall serves the plans of God, viz. the vocation of the Gentiles. After the mass of the Gentiles shall have entered in, the people of Israel, also, in their collective capacity, shall be received into the Church (ch. xi).

2. The following is a more detailed analysis of the epistle:

SALUTATION (i, 1-7). The apostle at the outset strikes the key-note of the epistle in the expressions "called as an apostle," "called as saints." Divine grace is everything, human merit nothing.

I. PERSONAL explanations. Purposed visit to Rome (i, 8-15).

II. DOCTRINAL discussion (i, 16; xi, 36).

The general proposition. The Gospel is the salvation of Jew and Gentile alike. This salvation comes by faith (i, 16, 17).

The rest of this section is taken up in establishing this thesis, and drawing deductions from it, or correcting misapprehensions.

(a.) All alike were under *condemnation* before the Gospel:

The heathen (i, 18-32).

The Jew (ii, 1-29).

Objections to this statement answered (iii, 1-8).

The position itself established from Scripture (iii, 9-20).

(b.) A *righteousness* (justification) is revealed under the Gospel, which being of faith, not of law, is also universal (iii, 21-26).

Boasting is thereby excluded (iii, 27-31).

Of this justification by faith Abraham is an example (iv, 1-25).

Thus, then, we are justified in Christ, in whom alone we glory (v, 1-11).

This acceptance in Christ is as universal as was the condemnation in Adam (v, 12-19).

(c.) **The moral consequences** of our deliverance.

The law was given to multiply sin (v, 20, 21). When we died to the law, we died to sin (vi, 1-14). The abolition of the law, however, is not a signal for moral license (ver. 15-23). On the contrary, as the law has passed away, so must sin, for sin and the law are correlative: at the same time, this is no disparagement of the law, but rather a proof of human weakness (vii, 1-25). So henceforth in Christ we are free from sin, we have the Spirit, and look forward in hope, triumphing over our present afflictions (viii, 1-39).

(d.) **The rejection of the Jews** is a matter of deep sorrow (ix, 1-5).

Yet we must remember—

(i.) That the promise was not to the whole people, but only to a select seed (ix, 6-13). And the absolute purpose of God in so ordaining is not to be canvassed by man (ver. 14-19).

(ii.) That the Jews did not seek justification aright, and so missed it. This justification was promised by faith, and is offered to all alike, the preaching to the Gentiles being implied therein. The character and results of the Gospel dispensation are foreshadowed in Scripture (x, 1-21).

(iii.) That the rejection of the Jews is not final. This rejection has been the means of gathering in the Gentiles, and through the Gentiles they themselves will ultimately be brought to Christ (xi, 1-36).

III. PRACTICAL exhortations (xii, 1; xv, 13).

(a.) To holiness of life and to charity in general, the duty of obedience to rulers being inculcated by the way (xii, 1; xiii, 14).

(b.) More particularly against giving offence to weaker brethren (xiv, 1; xv, 13).

IV. PERSONAL matters.

(a.) The apostle's motive in writing the letter, and his intention of visiting the Romans (xv, 14-33).

(b.) Greetings (xvi, 1-23).

CONCLUSION. The letter ends with a benediction and doxology (xvi, 24-27).

3. While this epistle contains the fullest and most systematic exposition of the apostle's teaching, it is at the same time a very striking expression of his character. Nowhere do his earnest and affectionate nature, and his tact and delicacy in handling unwelcome topics, appear more strongly than when he is dealing with the rejection of his fellow-countrymen the Jews. See PAUL.

VI. The *Commentaries* on this epistle are very numerous, as might be expected from its importance. For convenience, we divide them chronologically into two classes.

1. Of the many *patristic* expositions, but few are now extant. The work of Origen is preserved entire only in a loose Latin translation of Rufinus (*Orig.* [ed. De la Rue] iv, 458); but some fragments of the original are found in the *Philocalia*, and more in Cramer's *Catena*. The commentary on Paul's epistles printed among the works of Ambrose (ed. Ben. ii, App. p. 21), and hence bearing the name *Ambrosiaster*, is probably to be attributed to Hilary the deacon. Chrysostom is the most important among the fathers who attempted to interpret this epistle. He enters deeply and with psychological acumen into the thoughts of the apostle, and expounds them with sublime animation (ed. Montf. ix, 425, edited separately by Field, and transl. in the *Library of the Fathers* [Oxf. 1841], vol. vii). Besides these are the expositions of Paul's epistles by Pelagius (printed among Jerome's works [ed. Vallarsi], vol. xi, pt. iii, p. 135), by Primasius (*Magn. Bibl. Vet. Patr.* vol. vi, pt. ii, p. 30), and by Theodoret (ed. Schulze, iii, 1). Augustine commenced a work, but broke off at i, 4. It bears the name *Inchoata Expositio Epistolæ ad Rom.* (ed. Ben. iii, 925). Later he wrote *Expositio quarundam Propositionum Epistolæ ad Rom.*, also extant (ed. Ben. iii, 903). To these should be added the later *Catena* of Ecumenius (10th century), and the notes of Theophylact (11th century), the former containing valuable extracts from Photius. Portions of a commentary of Cyril of Alexandria were published by Mai (*Nor. Patr.* Bibl. iii, 1). The *Catena* edited by Cramer (1844) comprises two collections of Variorum notes, the one extending from i, 1 to ix, 1, the other from vii, 7 to the end. Besides passages from extant commentaries, they contain important extracts from Apollinarius, Theodorus of Mopsuestia, Severianus, Gemadius, Photius, and others. There are also the Greek *Scholia*, edited by Matthæi, in his large Greek Test. (Riga, 1782), from Moscow MSS. The commentary of Euthymius Zigabenus (Tholuck, *Eintl.* § 6) exists in MS., but has never been printed. Abelard wrote annotations on this epistle (in *Opp.* p. 489), likewise Hugo Victor (in *Opp.* i), and Aquinas (in *Opp.* vi). See COMMENTARY.

2. *Modern* exegetical helps (from the Reformation to the present time) on the entire epistle separately are the following, of which we designate the most important by an asterisk prefixed: Titelmann, *Collectiones* (Antw. 1520, 8vo); Melancthon, *Adnotationes* (Vitemb. 1522, and often, 4to); Bugenhagen, *Interpretatio* (Hag. 1523, 1527, 8vo); Ecolampadius, *Adnotationes* (Basil. 1526, 8vo); Sadoleto [Rom. Cath.], *Commentarii* (Lugd. 1535, fol.); Haresche [Rom. Cath.], *Commentarii* (Par. 1536, 8vo); *Calvin, *Commentarius* (in *Opp.*; in English by Sihon, Lond. 1834, 8vo; by Rodsell and Beveridge, Edinb. 1844, 8vo; by Owen, ibid. 1849, 8vo; in German, Frankf. 1836-38, 2 vols. 8vo); Sarcer, *Scholia* (Francf. 1541, 8vo); Grandis [Rom. Cath.], *Commentarius* (Par. 1546, 8vo); Soto [Rom. Cath.], *Commentarius* (Antw. 1550; Salm. 1551, fol.); Hales, *Disputationes* (Vitemb. 1553, 8vo); Musculus, *Commentarius* (Basil. 1555, 1572, fol.); Valdes [Socinian], *Commentaria* (Ven. 1556, 8vo); Naclanti [Rom. Cath.], *Enarrationes* (ibid. 1557, 4to); Martyr, *Commentarius* (Basil. 1558, fol., and later; in English, Lond. 1568, fol.); Viguier [Rom. Cath.], *Commentaria* (Par. 1558, fol., and later); Eruus [Rom. Cath.], *Eregesis* (ibid. 1559, 8vo, and later); Bucer, *Metaphrasis* (Basil. 1562, fol.); Mal-

thisius [Rom. Cath.], *Commentarius* (Colon. 1562, fol.); Cruciger, *Commentarius* (Vitemb. 1567, 8vo); Brent, *Commentarius* (Tüb. 1571, 8vo); Hesch, *Commentarius* (Jen. 1572, 8vo; also [with other epistles] Lips. 1605, fol.); Hemming, *Commentarius* (ibid. 1572, 8vo); Ole-vian, *Notæ* (Genev. 1579, 8vo); Wigand, *Adnotationes* (Francf. 1580, 8vo); Comer, *Commentarius* (Heidelb. 1583, 8vo); De la Cerda [Rom. Cath.], *Commentarius* (Vbyss. 1583, fol.); Mussi [Rom. Cath.], *Commentarius* (Ven. 1588, 4to); Pollock, *Analysis* (Edinb. 1594; Genev. 1596, 1608, 8vo); Pantusa [Rom. Cath.], *Commen-tarius* (Ven. 1596, 8vo); Hunn, *Expositio* (Marp. 1587; Francf. 1596; Vitemb. 1607, 8vo); Pasqual (R.) [Rom. Cath.], *Commentaria* (Barc. 1597, fol.); Chytraeus, *Ex-plicatio* (s. l. 1599, 8vo); Feuardent [Rom. Cath.], *Commentarius* (Par. 1599, 8vo); Toletus [Rom. Cath.], *Adnotationes* (Rom. 1602, 4to, and later); Pererius, *Dis-putations* (Ingolst. 1603, 4to); Rung, *Disputationes* [in-clud. 1 Cor.] (Vitemb. 1603, 4to); Fay, *Commentarius* (Genev. 1608, 8vo); Pareus, *Commentarius* (Francf. 1608, 4to, and later); Mann, *Notationes* (ibid. 1614, 8vo); Wilson, *Commentary* (Lond. 1614, 4to; 1627, 1653, fol.); *Willet, *Commentaria* (Lond. 1620, fol.); Coutzen [Rom. Cath.], *Commentarius* (Colon. 1629, fol.); Parr, *Exposition* [on parts] (Lond. 1632, fol.); Crell [Socinian], *Commentarius* (Racov. 1636, 8vo); Heger, *Exegesis* (Francf. 1645, 8vo; 1651, 4to); Cundis, *Exer-citationes* (Jen. 1646, 4to); De Dieu, *Animadversiones* [includ. other epistles] (L. B. 1646, 4to); Rudbeck, *Dis-putations* (Aros. 1648, 4to); Brown (Sr.), *Explana-tion* (Edinb. 1651, 1759, 4to); Ferma, *Analysis* (ibid. 1651, 12mo; in English, ibid. 1849, 8vo); Elton, *Trea-tises* [on portions] (Lond. 1653, fol.); Weller, *Adnota-tiones* (Brunsw. 1654, 4to); Wandalin (Sr.), *Para-phrasis* (Slesw. 1656, 4to); Feurborn, *Commentarius* (Giess. 1661, 4to); Hipsted, *Collationes* (Brem. 1665, 4to); Gerhard, *Adnotationes* (Jen. 1666, 1676, 4to); De Brais, *Notæ* (Salm. 1670; Lips. 1726, 4to); Groenwegen, *Vytlegginge* (Gor. 1671, 4to); Mommas, *Meditationes* [includ. Gal.] (Hag. 1678, 8vo); Wittich, *Investigatio* (L. B. 1685, 4to); Altling, *Commentarius* (in *Opp.* vol. iii, iv; Amst. 1686, fol.); Van Leeuwen, *Verhandelung* (ibid. 1688, 1699, 4to); Schmid, *Paraphrasis* [in portions] (Hamb. 1691-94, 4to); Van Peene, *Nasporing* (Leyd. 1695, 4to; in German, Fr.-a.-M. 1697, 4to); Varen, *Exegesis* (Hamb. 1696, 8vo); Possalt, *Erklärung* (Zittau, 1696, 4to); Fibus [Rom. Cath.], *Interpretatio* (Col. Ag. 1696, fol.); Zierold, *Exegesis* (Starg. 1701, 1719, 4to); Locke, *Notes* (Lond. 1707, 4to); Dannhauer, *Disputa-tiones* (Gryph. 1708, 4to); Fischbeck, *Explanatio* (Goth. 1720, 8vo); Streso, *Meditationes* (Amst. 1721, 4to); Van Til, *Verklaring* [includ. Phil.] (Haarlem, 1721, 4to); Wirth, *Erklärung* (Nurem. 1724, 8vo); Hase-voert, *Verklaring* (Leyd. 1725, 4to); Vitringa, *Ver-klaringe* (Franck. 1729, 4to); Rambach, *Erklärung* (Brem. 1738, 4to); also *Introductio* (Hal. 1727, 8vo); Turretin, *Prælectiones* [on i-xi] (Lausan. 1741, 4to); Wandalin (Jr.), *Prælectiones* (Haf. 1744, 4to); Taylor [Unitarian], *Notes* (Lond. 1745, 1747, 1754, 1769, 4to; in German, Zur. 1774, 4to); Anton, *Anmerkungen* (Frankf. 1746, 8vo); Baumgarten, *Auslegung* (Hal. 1749, 4to); Carpoz, *Stricture* (Helmst. 1750, 1758, 8vo); Edwards, *Annotations* [includ. Gal.] (Lond. 1752, 4to); Semler, *Note* (Hal. 1767, 8vo); Mosheim, *Einleitung* (ed. Boysen, Quedlinb. 1771, 4to); Moldenhauer, *Erläuterung* (Hamb. 1775, 8vo); Richter, *Erklärung* (Frankf. 1775, 8vo); Cramer, *Auslegung* (Leips. 1784, 8vo); Schoder, *Anmerk.* (Frankf. 1785, 4to); Fuchs, *Erläuterung* (Steud. 1789, 8vo); Herzog, *Erläuterung* (Halle, 1791, 8vo); Reuss, *Anmerk.* (Giess. 1792, 8vo); Wunibald, *Annotations* (Heidelb. 1792, 8vo); Francke, *Anmerk.* (Gotha, 1793, 8vo); Morus, *Prælectiones* (Lips. 1794, 8vo); Jones [Unitarian], *Analysis* (Lond. 1801, 8vo); Möbius, *Be-merk.* (Jen. 1804, 8vo); Böhme, *Commentarius* (Lips. 1806, 8vo); Stock, *Lectures* (Dubl. 1806, 8vo); Wein-gart, *Commentarius* (Goth. 1816, 8vo); Fry, *Lectures* {Lond. 1816, 8vo}; *Tholuck, *Auslegung* (Berl. 1824,

1828, 1831, 1836, 1856, 8vo; in English, Edinb. 1842, 2 vols. 8vo; Phila. 1844, 8vo); Hörneman, *Commentar* (Copenh. 1824, 8vo); Cox, *Notes* (Lond. 1824, 8vo); Flat, *Vorlesungen* (Tüb. 1825, 8vo); Bowles, *Sermons* (Bath, 1826, 12mo); Terrot, *Notes* (Lond. 1828, 8vo); Stenerson, *Commentarius* (Lips. 1829, 8vo); Klee [Rom. Cath.], *Commentar* (Mainz, 1830, 8vo); Maitland, *Dis-courses* (Lond. 1830, 8vo); Moysey, *Lectures* (ibid. 1830, 8vo); *Rückert, *Commentar* (Leips. 1831, 1839, 2 vols. 8vo); Benecke, *Erläuterung* (Heidelb. 1831, 8vo; in Eng-lish, Lond. 1854, 8vo); Paulus, *Erläuterung* (Heidelb. 1831, 8vo); Ritchie, *Lectures* (Edinb. 1831, 2 vols. 8vo); Geissler, *Erläuterung* (Nurem. 1831-33, 2 vols. 8vo); *Stuart, *Commentary* (Andover, 1832, 1835; Lond. 1857, 8vo); Parry, *Lectures* (ibid. 1832, 12mo); Reiche, *Er-klärung* (Gött. 1833-34, 2 vols. 8vo); Glöckler, *Erklä-rung* (Frankf. 1834, 8vo); Köllner, *Commentar* (Darmst. 1834, 8vo); *Hodge, *Commentary* (Phila. 1835, 1864, 8vo; also abridged, ibid. 1836); *De Wette, *Erklärung* (Leips. 1835, 1838, 1840, 1847, 8vo); Wirth, *Erläuterung* (Regensb. 1836, 8vo); Lossius, *Erklärung* (Hamb. 1836, 8vo); Stengel [Rom. Cath.], *Commentar* (Freib. 1836, 8vo); *Fritzsche, *Commentarius* (Hal. 1836-43, 3 vols. 8vo); Chalmers, *Lectures* (Glasg. 1837, 4 vols. 8vo, and later; N. Y. 1840, 8vo); Anderson, *Exposition* (Lond. 1837, 12mo); Bosanquet, *Paraphrase* (ibid. 1840, 8vo); Haldane, *Exposition* (ibid. 1842, 1852, 3 vols. 12mo; N. Y. 1857, 8vo; in German, Hamb. 1839-43, 3 vols. 8vo); Sumner, *Exposition* [includ. 1 Cor.] (Lond. 1843, 8vo); Allies, *Sermons* (Oxf. 1844, 8vo); Reithmayr [Rom. Cath.], *Commentar* (Regensb. 1845, 8vo); Wal-ford, *Notes* (Lond. 1846, 8vo); *Philippi, *Commentar* (Frankf. 1848, 1852, 3 vols. 8vo; Erlang. 1855, 1867, 2 vols. 8vo); Vinke, *Verklärung* (Utr. 1848, 1860, 8vo); Whitwell, *Notes* (Lond. 1848, 8vo); Krehl, *Auslegung* (Leips. 1849, 8vo); Marriott, *Reflections* (Lond. 1843, 12mo); Ewbank, *Commentary* (ibid. 1850-51, 2 vols. 8vo); Steinhof, *Erklärung* (Nördl. 1851, 8vo); Prid-ham, *Notes* (Bath, 1851, 12mo); *Turner, *Commentary* (N. Y. 1853, 8vo); Knight, *Commentary* (Lond. 1854, 8vo); Beelen [Rom. Cath.], *Commentarius* (ibid. 1854, 8vo); *Hengl, *Interpretatio* (Lips. 1854-59, 2 vols. 8vo); Jowett, *Notes* [includ. Gal. and Thess.] (Lond. 1855, 1859, 2 vols. 8vo); Livermore [Unitarian], *Commentary* (Bost. 1855, 12mo); Purdue, *Commentary* (Dubl. 1855, 8vo); Umbreit, *Auslegung* (Goth. 1856, 8vo); Ewald, *Erläuterung* (Gött. 1857, 8vo); Brown (J., Jr.), *Exposi-tion* (Edinb. and N. Y. 1857, 8vo); Bromhead, *Notes* (Lond. 1857, 8vo); Stephen, *Lectures* (Aberdeen, 1857, 12mo); Five Clergymen, *Revision* (Lond. 1857, 8vo); Cumming, *Readings* (ibid. 1857, 12mo); Mehring, *Er-klärung* (Stet. 1858-59, 2 vols. 8vo); Vaughan, *Notes*, (Lond. 1859, 1861, 8vo); Crawford, *Translation* (ibid. 1860, 4to); Brown (D.), *Commentary* (ibid. 1860, 8vo); Wardlaw, *Lectures* (ibid. 1861, 3 vols. 8vo); Colenso, *Notes* (ibid. 1861, 8vo); Ford, *Illustration* (ibid. 1862, 8vo); Hinton, *Exposition* (ibid. 1865, 8vo); Marsh, *Ex-position* (ibid. 1865, 12mo); Wangemann, *Erklärung* (Berl. 1866, 8vo); Ortlöph, *Auslegung* (Erlang. 1866, 8vo); Pritchard, *Commentary* (Lond. 1866, 8vo); Forbes, *Commentary* [on parallelisms] (ibid. 1868, 8vo); Hor-ton, *Lectures* (ibid. 1868 sq., 2 vols. 8vo); *Delitzsch, *Erläuterung* (Leips. 1870, 8vo); Chamberlain, *Notes* (Lond. 1850, 12mo); Plumer, *Commentary* (N. Y. and Edinb. 1871, 8vo); Best, *Commentary* (Lond. 1871, 8vo); O'Connor, *Commentary* (ibid. 1871, 8vo); Robinson, *Notes* (ibid. 1871, 2 vols. 8vo); Phallis, *Notes* (ibid. 1871, 8vo); Gärtner, *Erklärung* (Stuttg. 1872, 8vo); Colet, *Notes* (Lond. 1873, 8vo); Strong, *Analysis* (N. Y. 1873, 8vo); Neil, *Notes* (Lond. 1877, 8vo). See EPISTLES.

Romanticists. THE. A class of thinkers whose chief object was to introduce a new religion of human-ity and art. They were the advocates of the ideal, in opposition to the real, seeking to resolve religion into poetry, and morality into aesthetics. Rousseau was the first author to set forth the romantic view of life with any degree of consistency and decisiveness. He found

two disciples in Germany, Lavater (1741-1801) and Pestalozzi (1746-1826), and at about the same time (1724-1804) Kant lent his influence to this school. The principle of the Romanticists was *life*, and they represented ideas *lyrically*, as they ring in the raptures or agonies of the human heart. They represented the passions *picturesquely*, as they may burn in an individual character belonging to a certain age, race, stage of life, etc. The decay of this school was a simple consequence of its artistic principle. Life is not the highest principle of art; the highest principle is truth. When this was seen, the question arose, What is truth? The Romanticists attempted a double answer, but failed in both. In Germany they said, Truth is only a symbol, and the highest symbols mankind possess are a Roman Catholic Church and the absolute monarchy. They despised the Reformation on æsthetic grounds as unromantic. Hence followed political reaction, conversion to Romanism, extravagances, insanity, and suicide. In England they said, There is no truth outside of the individual: take away all those abstract generalities which enslave the individuality, and the unbound Prometheus will show himself the truth. The result was disgust at life, despair at all. This branch of the Romantic school soon withered. In Germany the favorite philosopher of the Romanticists was Schelling, and their favorite divine Schleiermacher. The book which most fitly represents their school in England is the *Sartor Resartus* of Carlyle.

Romānus, the name of a number of saints of the Roman Catholic Church.

1. **ROMANUS THAUMATURGUS**, said to have lived at Antioch in the fifth century, to have led a very abstemious life in a cave—partaking of only bread, salt, and water, and never kindling a fire—and to have wrought many wonders. His day is Feb. 9.

2. An archbishop of Rheims (530), a reputed relative of pope Vigilius, said to have been at first a monk and to have built a monastery in the neighborhood of Troyes, which was confirmed by Clodowig I. His death took place in 533 or 534. His anniversary is Feb. 28.

3. An abbot of the convent of Jaux, in Burgundy, who is said to have been born near the end of the 4th century and to have been consecrated priest by Hilary, the bishop of Arles. It is related that he retired into solitude at the age of thirty-five; that he introduced the hermit life into France, built cells and convents, and healed the sick through prayer and the kiss. He died in 460, and his day is also Feb. 28.

4. **ALBERT and DOMITIAN**, said to have been martyred at Rome. Their alleged remains were exhumed in Rome in 1659 and placed in the Jesuit church at Antwerp. They are commemorated March 14.

5. A monk in the diocese of Auxerre and Sens in the 6th century, who was divinely instructed to go from devastated Italy to France, and there built monasteries, converted many people to a monastic life, and wrought miracles. His relics are preserved at Sens. His day is May 22.

6. An archbishop of Rouen (622) said to belong to the royal family of France, of whom the legend relates that when a monster which devoured man and beast ravaged the city of Rouen, he provided a criminal who was awaiting death with the symbol of the cross and commanded him to remove the monster. The result was that the monster followed like a tame animal, and was burned. Romanus is said to have died in 639, and is commemorated on the reported date of his death, Oct. 23, and also on May 30.

7. A martyr, alleged to have been baptized by St. Laurent and to have been beheaded under Decius, A.D. 255. Commemorated Aug. 9.

8. A deacon of Cæsarea, martyred under Diocletian, to whom Nov. 18 is assigned.

9. A reputed priest of Bordeaux whose death is fixed in 318, of whom the legend states that many wonders

were wrought through his prayers, particularly that of rescuing shipwrecked persons. His day is Nov. 24.

See *Ausführl. Heiligen-Lex.*, with Calendar (Cologne and Frankf. 1719), p. 1928 sq.; *Les Vies d. Saints*, etc. (Par. 1734), i, 243; ii, 101.

Romanus, Pope in A.D. 897, reigned only four months and twenty-three days. A single letter is all that history has preserved of his remains, and the only remarkable event of his pontificate was his disapproval of the indignities inflicted by his predecessor, Stephen VI, on the lifeless body of Formosus I (891-896). See the article. Romanus abrogated the unjust decrees of his predecessor, by which all the acts of Formosus had been declared void, and confirmed the consecrations and other pontifical acts which had been so nullified. See Bower, *Lives of the Popes*, v, 71-73; Baronius, *Annales*, A.D. 891-896.

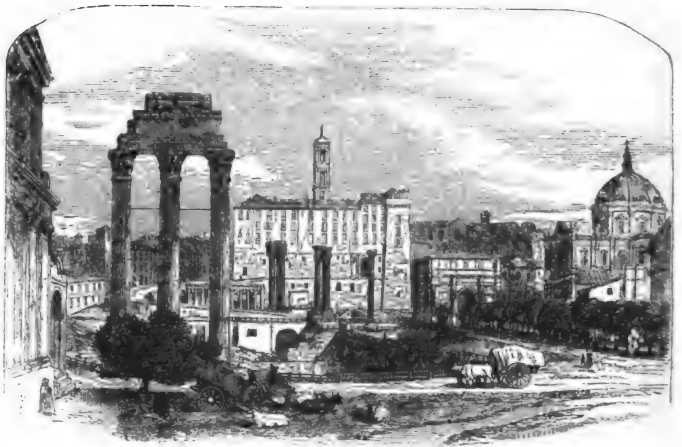

Rombouts, DIRCK, a Flemish historical painter, was born at Antwerp July 1, 1597. A pupil of Jansen's, he inherited the hatred of his master for Rubens, and opened a rival school. In 1617 he went to Italy, where his reputation was soon established, and he was called to the court or the grand-duke Cosmo II. He returned to Antwerp, where he spent the rest of his life. He was master of the Guild of St. Luke and held municipal offices. He died in 1637. *The Taking-down from the Cross*, *St. Francis Receiving the Stigmata*, and *Themis with the Attributes of Justice* show him to have possessed the qualities of a great master.

Rome (Ρώμη [in Greek, *strength*; but probably from *Romulus*, the founder], expressly mentioned in the Bible only in the books of the Maccabees, and in Acts xviii, 2, etc.; Rom. i, 7, 15; 2 Tim. i, 17; see also "Babylon," Rev. xiv, 8, etc.), the ancient capital of the Western world, and the present residence of the pope and capital of Italy. In the following brief account, we treat only of its ancient, and especially its Biblical, relations. See ROMAN EMPIRE.

1. *General Description*.—Rome lies on the river Tiber, about fifteen miles from its mouth, in the plain of what is now called the Campagna [*Felix illa Campania*, Pliny, *Hist. Nat.* iii, 6], in lat. 41° 54' N., long. 12° 28' E. The country around the city, however, is not altogether a plain, but a sort of undulating table-land, crossed by hills, while it sinks towards the south-west to the marshes of Maremma, which coast the Mediterranean. In ancient geography, the country in the midst of which Rome lay was termed Latium, which, in the earliest times, comprised within a space of about four geographical square miles the country lying between the Tiber and the Numicius, extending from the Alban Hills to the sea, having for its chief city Laurentum. The "seven hills" (Rev. xvii, 9) which formed the nucleus of the ancient city stand on the left (eastern) bank. On the opposite side of the river rises the far higher ridge of the Janiculum. Here from very early times was a fortress, with a suburb beneath it extending to the river. Modern Rome lies to the north of the ancient city, covering with its principal portion the plain to the north of the seven hills, once known as the Campus Martius, and on the opposite bank extending over the low ground beneath the Vatican to the north of the ancient Janiculum.

The city of Rome was founded (B.C. 753) by Romulus and Remus, grandsons of Numitor, and sons of Rhea Sylvia, to whom, as the originators of the city, mythology ascribed a divine parentage. At first the city had three gates, according to a sacred usage. Founded on the Palatine Hill, it was extended, by degrees, so as to take in six other hills, at the foot of which ran deep valleys that in early times were in part overflowed with water, while the hill-sides were covered with trees. In the course of the many years during which Rome was acquiring to herself the empire of the world, the city underwent great, numerous, and important changes. Un-

der its first kings it must have presented a very different aspect from what it did after it had been beautified by Tarquin. The destruction of the city by the Gauls (A.U.C. 365) caused a thorough alteration in it; nor could the troubled times which ensued have been favorable to its being well restored. It was not till riches and artistic skill came into the city on the conquest of Philip of Macedon and Antiochus of Syria (A.U.C. 365) that there arose in Rome large, handsome stone houses. The capture of Corinth conducted much to the adorning of the city, many fine specimens of art being transferred thence to the abode of the conquerors. As the power of Rome extended over the world, and her chief citizens went into the colonies to enrich themselves, so did the masterpieces of Grecian art flow towards the capital, together with some of the taste and skill to which they owed their birth. Augustus, however, it was who did most for embellishing the capital of the world, though there may be some sacrifice of truth in the pointed saying that he found Rome built of brick and left it marble. Subsequent emperors followed his example, till the place became the greatest repository of architectural, pictorial, and sculptural skill that the world has ever seen—a result to which even Nero's incendiarianism indirectly conduced, as affording an occasion for the city's being rebuilt under the higher scientific influences of the times. The site occupied by modern Rome is not precisely the same as that which was at any period covered by the ancient city: the change of locality being towards the north-west, the city has partially retired from the celebrated hills. About two thirds of the area within the walls (traced by Aurelian) are now desolate, consisting of ruins, gardens, and fields, with some churches, convents, and other scattered habitations. Originally the city was four miles in circumference. In the time of Pliny the walls were nearly twenty miles in circuit; now they are from fourteen to fifteen miles around. Its original gates, three in number, had increased in the time of the elder Pliny to thirty-seven. Modern Rome has sixteen gates, some of which are, however, built up. Thirty-one great roads centred in Rome, which, issuing from the Forum, traversed Italy, ran through the provinces, and were terminated only by the boundary of the empire. As a starting-point, a gilt pillar (Milliarium Aureum) was set up by Augustus in the middle of the Forum. This curious monument, from which distances were reckoned, was discovered in 1823. Eight principal bridges led over the Tiber; of these three are still relics. The four districts into which Rome was divided in early times, Augustus increased to fourteen. Large open spaces were set apart in the city, called Campi, for assemblies of the people and martial exercises, as well as for games. Of nineteen which are mentioned, the Campus Martius was the principal. It was near the Tiber, whence it was called Tiberinus. The epithet "Martius" was derived from the plain being consecrated to Mars, the god of war. In the later ages it was surrounded by several magnificent structures, and porticos were erected, under which, in bad weather, the citizens could go through their usual exercises. It was also adorned with statues and arches. The name of Forum was given to places where the people assembled for the transaction of business. The Fora were of two kinds—*fora venalia*, "markets;" *fora civilia*, "law-courts," etc. Until the time of Julius Cæsar there was but one of the latter kind, termed by way of distinction Forum

Remains of the Forum at Rome.

Romanum, or simply Forum. It lay between the Capitoline and Palatine Hills; it was eight hundred feet wide, and adorned on all sides with porticos, shops, and other edifices, on the erection of which large sums had been expended, and the appearance of which was very imposing, especially as it was much enhanced by numerous statues. In the centre of the Forum was the plain called the Curtian Lake, where Curtius is said to have cast himself into a chasm or gulf, which closed on him, and so he saved his country. On one side were the elevated seats, or *suggestus*, a sort of pulpit from which magistrates and orators addressed the people—usually called *rostra*, because adorned with the beaks of ships which had been taken in a sea-fight from the inhabitants of Antium. Near by was the part of the Forum called the Comitium, where were held the assemblies of the people called Comitia Curiata. The celebrated temple bearing the name of Capitol (of which there remain only a few vestiges) stood on the Capitoline Hill, the highest of the seven; it was square in form, each side extending about two hundred feet, and the ascent to it was by a flight of one hundred steps. It was one of the oldest, largest, and grandest edifices in the city. Founded by Tarquinius Priscus, it was several times enlarged and embellished. Its gates were of brass, and it was adorned with costly gildings; whence it is termed "golden" and "glittering," *auræa, fulgens*. It enclosed three structures, the Temple of Jupiter Capitolinus in the centre, the Temple of Minerva on the right, and the Temple of Juno on the left. The Capitol also comprehended some minor temples or chapels, and the Casa Romuli, or cottage of Romulus, covered with straw. Near the ascent to the Capitol was the asylum. We also mention the Basilicæ, since some of them were afterwards turned to the purposes of Christian worship. They were originally buildings of great splendor, being appropriated to meetings of the senate, and to judicial purposes. Here counsellors received their clients, and bankers transacted their business. The earliest churches, bearing the name of Basilicæ, were erected under Constantine. He gave his own palace on the Coelian Hill as a site for a Christian temple. Next in antiquity was the Church of St. Peter, on the Vatican Hill, built A.D. 324, on the site and with the ruins of temples consecrated to Apollo and Mars. It stood about twelve centuries, at the end of which it was superseded by the modern church bearing the same name. The Circi were buildings oblong in shape, used for public games, races, and beast-fights. The Theatra were edifices designed for dramatic exhibitions; the Amphitheatra (double theatres, buildings in an oval form) served for gladiatorial shows and the fighting of wild animals. That which was erected by the emperor Titus, and of which there still exists a splendid ruin, was called the

Rome from the Pincian Hill; the Plaza del Popolo in the foreground, St. Angelo and St. Peter's in the distance.

Coliseum, from a colossal statue of Nero that stood near it. With an excess of luxury, perfumed liquids were conveyed in secret tubes around these immense structures, and diffused over the spectators, sometimes from the statues which adorned the interior. In the arena which formed the centre of the amphitheatres, the early Christians often endured martyrdom by being exposed to ravenous beasts.

See Smith, *Dict of Class. Geog.* s. v.; Parker, *Archæology of Rome* (Lond. 1877, 6 vols. 8vo); Wood, *Guide to Rome* (Lond. 1875); Cokesly, *Map of Anc. Rome* (Lond. 1852).

II. *Judaism in Rome.*—The connection of the Romans with Palestine caused Jews to settle at Rome in considerable numbers. The Jewish king Aristobulus and his son formed part of Pompey's triumph, and many Jewish captives and emigrants were brought to Rome at that time. A special district was assigned to them (Josephus, *Ant.* xiv, 10, 8), not on the site of the modern "Ghetto," between the Capitol and the island of the Tiber, but across the Tiber (Philo, *Leg. ad Caium*, p. 568, ed. Mangey). From Philo also it appears that the Jews in Rome were allowed the free use of their national worship, and generally the observance of their ancestral customs. With a zeal for which the nation had been some time distinguished, they applied themselves with success to proselytizing (Dion Cass. xxxvii, 17). Many of these Jews were made freedmen (Philo, *loc. cit.*). Julius Cæsar showed them some kindness (Josephus, *Ant.* xiv, 10, 8; Sueton. *Cæsar*, 84). They were favored also by Augustus, and by Tiberius during the latter part of his reign (Philo, *loc. cit.*). On one occasion, in the reign of Tiberius, when the Jews were banished from the city by the emperor for the misconduct of some members of their body, not fewer than four thousand enlisted in the Roman army which was then stationed in Sardinia (Sueton. *Tib.* 36; Josephus, *Ant.* xviii, 3, 4). Claudius "commanded all Jews to depart from Rome" (Acts xviii, 2), on account of tumults connected, possibly, with the preaching of Christianity at Rome (Sueton. *Claud.* 25, "Judeos impulsore Chresto assidue tumultuantes Roma expulsi"). This banishment cannot have been of long duration, for we find Jews residing at Rome apparently in considerable numbers at the time of Paul's visit (Acts xxviii, 17). The Roman biographer does not give the date of the expulsion by Claudius, but Orosius (vii, 6) mentions the ninth year of that emperor's reign (A.D. 50). The precise occasion of this expulsion history does not afford us the

means of determining. The cause here assigned for their expulsion is that they raised disturbances, an allegation which at first view does not seem to point to a religious, still less to a Christian, influence. Yet we must remember that the words bear the coloring of the mind of a heathen historian, who might easily be led to regard activity for the diffusion of Christian truth, and the debates to which that activity necessarily led, as a noxious disturbance of the peace of society. The Epicurean view of life could scarcely avoid describing religious agitations by terms ordinarily appropriated to martial pursuits. It must equally be borne in mind that the diffusion of the Gospel in Rome—then the very centre and citadel of idolatry—was no holiday task, but would call forth on the part of the disciples all the fiery energy of the Jewish character, and on the part of the pagans all the vehemence of passion which ensues from pride, arrogance, and hatred. Had the ordinary name of our Lord been employed by Suetonius, we should, for ourselves, have found little difficulty in understanding the words as intended to be applied to Jewish Christians. But the biographer uses the word *Chrestus*. The *us* is a mere Latin termination; but what are we to make of the root of the word—*Chrest* for *Christ*? Yet the change is in only one vowel, and *Chrest* might easily be used for *Christ* by a pagan writer. A slight difference in the pronunciation of the word as vocalized by a Roman and a Jew would easily cause the error. We know that the Romans often did make the mispronunciation, calling *Christ* "*Chrest*" (Tertull. *Apol.* c. 3; Lactant. *Inst.* iv, 17; Just. Mart. *Apol.* c. 2). The point is important, and we therefore give a few details, the rather that Lardner has, under Claudius (i, 259), left the question undetermined. Now, in Tacitus (*Annal.* xv, 44) Jesus is unquestionably called *Chrest* in a passage where his followers are termed Christians. Lucian, too, in his *Philopatrias*, so designates our Lord, playing on the word *Chrestus* (Χρηστός), which, in Greek, signifies "good." These are his words: "since a *Chrest* [a good man] is found among the Gentiles also." Tertullian (*ut sup.*) treats the difference as a case of ignorant mispronunciation, *Christianus* being wrongly pronounced *Chrestianus*. The mistake may have been the more readily introduced from the fact that, while *Christ* was a foreign word, *Chrest* was customary. Lips that had been used to *Chrest* would, therefore, rather continue the sound than change the vocalization. The term *Chrest* occurs on inscriptions (Heumann, *Sylloge.* diss. i. 536), and epi-

grams in which the name appears may be found in Martial (vii, 55; ix, 28). In the same author (xi, 91) a diminutive from the word, namely, *Chrestillus*, may be found. The word assumed, also, a feminine form, *Chresta*, as found in an ancient inscription. Comp. also Martial (vii, 55). There can therefore be little risk in asserting that Suetonius intended to indicate Jesus Christ by Chrestus; and we have already seen that the terms which he employs to describe the cause of the expulsion, though peculiar, are not irreconcilable with a reference on the part of the writer to Christians. The terms which Suetonius employs are accounted for, though they may not be altogether justified, by those passages in the Acts of the Apostles in which the collision between the Jews who had become Christians and those who adhered to the national faith is found to have occasioned serious disturbances (Kuinöl, *Acts xviii, 2*; Rorsal, *De Christo per Errorem in Chrest. Comm.* [Groning, 1717]). Both Suetonius and Luke, in mentioning the expulsion of the Jews, seem to have used the official term employed in the decree. The Jews were known to the Roman magistrate; and Christians, as being at first Jewish converts, would be confounded under the general name of Jews. But that the Christians as well as the Jews strictly so called were banished by Claudius appears certain from the book of Acts; and, independently of this evidence, seems very probable from the other authorities of which mention has been made. See CHRESTUS; ROME, JEWS IN.

III. *Christianity at Rome*.—Nothing is known of the first founder of the Christian Church at Rome. Roman Catholics assign the honor to Peter, and on this ground an argument in favor of the claims of the papacy. There is, however, no sufficient reason for believing that Peter was ever even so much as within the walls of Rome (Ellendorf, *Ist Petrus in Rom und Bischof der römischen Kirche gewesen?* [Darmstadt, 1843]). See PETER. Christianity may, perhaps, have been introduced into the city, not long after the outpouring of the Holy Spirit on the day of Pentecost, by the "strangers of Rome" who were then at Jerusalem (Acts ii, 10). It is clear that there were many Christians at Rome before Paul visited the city (Rom. i, 8, 13, 15; xv, 20). The names of twenty-four Christians at Rome are given in the salutations at the end of the Epistle to the Romans. For the difficult question whether the Roman Church consisted mainly of Jews or Gentiles, see Conybeare and Howson, *Life of St. Paul*, ii, 157; Alford, *Proleg.*; and especially Prof. Jowett, *Epistles of St. Paul to the Romans, Galatians, and Thessalonians*, ii, 7-26. The view there adopted, that they were a Gentile Church, but with many Jewish converts, seems most in harmony with such passages as i, 5, 13; xi, 13, and with the general tone of the epistle. See ROMANS, EPISTLE TO.

It may be useful to give some account of Rome in the time of Nero, the "Cæsar" to whom Paul appealed, and in whose reign he suffered martyrdom (Eusebius, *H. E.* ii, 25).

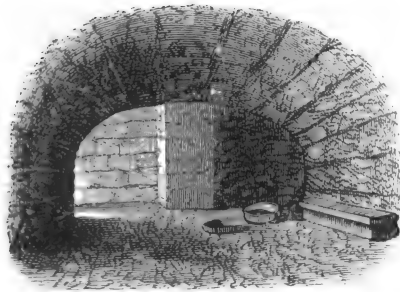

1. The city at that time must be imagined as a large and irregular mass of buildings unprotected by an outer wall. It had long outgrown the old Servian wall (Dionys. Hal. *Ant. Rom.* iv, 13; ap. Merivale, *Rom. Hist.* iv, 497); but the limits of the suburbs cannot be exactly defined. Neither the nature of the buildings nor the configuration of the ground was such as to give a striking appearance to the city viewed from without. "Ancient Rome had neither cupola nor campanile" (Conybeare and Howson, *Life of St. Paul*, ii, 371; Merivale, *Rom. Emp.* iv, 512), and the hills, never lofty or imposing, would present, when covered with the buildings and streets of a huge city, a confused appearance like the hills of modern London, to which they have sometimes been compared. The visit of Paul lies between two famous epochs in the history of the city, viz. its restoration by Augustus and its restoration by Nero (Conybeare and Howson, i, 13). Some parts of the city, especially the Forum and Campus Martius, must now

have presented a magnificent appearance; but many of the principal buildings which attract the attention of modern travellers in ancient Rome were not yet built. The streets were generally narrow and winding, flanked by densely crowded lodging-houses (*insulæ*) of enormous height. Augustus found it necessary to limit their height to seventy feet (Strabo, v, 235). Paul's first visit to Rome took place before the Neronian conflagration, but even after the restoration of the city, which followed upon that event, many of the old evils continued (Tacitus, *Hist.* iii, 71; Juvenal, *Sat.* iii, 193, 269). One half of the population consisted, in all probability, of slaves. The larger part of the remainder consisted of pauper citizens supported in idleness by the miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whose luxury and profligacy we hear so much in the heathen writers of the time. (See for calculations and proofs the works cited.)

Such was the population which Paul would find at Rome at the time of his visit. We learn from the Acts of the Apostles that he was detained at Rome for "two whole years," "dwelling in his own hired house with a soldier that kept him" (Acts xxviii, 16, 30, to whom apparently, according to Roman custom (Seneca, *Ep.* v; Acts xii, 6, quoted by Brotier, *Ad Tac. Ann.* iii, 22), he was bound with a chain (Acts xxviii, 20; Eph. vi, 20; Phil. i, 13). Here he preached to all that came to him, no man forbidding him (Acts xxviii, 30, 31). It is generally believed that on his "appeal to Cæsar" he was acquitted, and, after some time spent in freedom, was a second time imprisoned at Rome (for proofs, see Conybeare and Howson, *Life of St. Paul*, ch. xxvii, and Alford, *Gr. Test.* vol. iii, ch. vii). Five of his epistles, viz. those to the Colossians, Ephesians, Philippian, that to Philemon, and the Second Epistle to Timothy, were, in all probability, written from Rome, the latter shortly before his death (2 Tim. iv, 6), the others during his first imprisonment. See also HEBREWS, EPISTLE TO THE. It is universally believed that he suffered martyrdom at Rome.

2. The localities in and about Rome especially connected with the life of Paul are—(1) The Appian Way, by which he approached Rome (Acts xxviii, 15). See APPIAN FORUM. (2) "The palace," or "Cæsar's court" (τὸ πραιτώριον, Phil. i, 13). This may mean either the great camp of the Prætorian guards which Tiberius established outside the walls on the north-east of the city (Tacitus, *Ann.* iv, 2; Suetonius, *Tib.* 37), or, as seems more probable, a barrack attached to the imperial residence on the Palatine (Wieseler, as quoted by Conybeare and Howson, *Life of St. Paul*, ii, 423). There is no sufficient proof that the word "prætorium" was ever used to designate the emperor's palace, though it is used for the official residence of a Roman governor (John xviii, 28; Acts xxiii, 35). The mention of "Cæsar's household" (Phil. iv, 22) confirms the notion that Paul's residence was in the immediate neighborhood of the emperor's house on the Palatine.

3. The connection of other localities at Rome with Paul's name rests only on traditions of more or less probability. We may mention especially—(1) The Mamertine prison, or Tullianum, built by Ancus Marcius near the Forum (Liv. i, 33), described by Sallust (*Cat.* 55). It still exists beneath the Church of San Giuseppe dei Falegnami. Here it is said that Peter and Paul were fellow-prisoners for nine months. This is not the place to discuss the question whether Peter was ever at Rome. It may be sufficient to state that though there is no evidence of such a visit in the New Test., unless Babylon in 1 Pet. v, 13 be a mystical name for Rome, yet early testimony (Dionysius, ap. Euseb. ii, 25) and the universal belief of the early Church seem sufficient to establish the fact of his having suffered martyrdom there. The story, however, of the imprisonment in the

The Mamertine Prison at Rome.

Mamertine prison seems inconsistent with 2 Tim., especially iv, 11. (2) The chapel on the Ostian Road, which marks the spot where the two apostles are said to have separated on their way to martyrdom. (3) The supposed scene of Paul's martyrdom, viz. the Church of San Paolo alle tre Fontane, on the Ostian Road. (See the notice of the Ostian Road in Caius, ap. Euseb. *H. E.* ii, 25.) To these may be added, (4) The supposed scene of Peter's martyrdom, viz. the Church of San Pietro in Montorio, on the Janiculum. (5) The chapel "Domine quo Vadis," on the Appian Road, the scene of the beautiful legend of our Lord's appearance to Peter as he was escaping from martyrdom (Ambrose, *Ep.* 33). (6) The places where the bodies of the two apostles, after having been deposited first in the Catacombs (*κοιμητήρια*) (Euseb. *H. E.* ii, 25), are supposed to have been finally buried—that of Paul by the Ostian Road, that of Peter beneath the dome of the famous basilica which bears his name (see Caius, ap. Euseb. *H. E.* ii, 25). All these and many other traditions will be found in the *Annals* of Baronius, under the last year of Nero. "Valueless as may be the historical testimony of each of these traditions singly, yet collectively they are of some importance as expressing the consciousness of the 3d and 4th centuries that there had been an early contest, or at least contrast, between the two apostles, which in the end was completely reconciled; and it is this feeling which gives a real interest to the outward forms in which it is brought before us—more or less, indeed, in all the south of Europe, but especially in Rome itself" (Stanley, *Sermons and Essays*, p. 101).

4. We must add, as sites unquestionably connected with the Roman Christians of the apostolic age—(1) The gardens of Nero in the Vatican, not far from the spot where St. Peter's now stands. Here Christians, wrapped in the skins of beasts, were torn to pieces by dogs, or, clothed in inflammable robes, were burned to serve as torches during the midnight games. Others were crucified (Tacitus, *Ann.* xv, 44). (2) The Catacombs. These subterranean galleries, commonly from eight to ten feet in height, and from four to six in width, and extending for miles, especially in the neighborhood of the old Appian and Nomentan ways, were unquestionably used as places of refuge, of worship, and of burial by the early Christians. It is impossible here to enter upon the difficult question of their origin, and their possible connection with the deep sand-pits and subterranean works at Rome mentioned by classical writers. See the story of the murder of Asinius (Cicero, *Pro Cluent.* 13), and the account of the concealment offered to Nero before his death (Suetonius, *Nero*, 48). A more complete account of the Catacombs than any previously given may be found in G. B. de Rossi's *Roma Sotteriana Christiana* (1864 sq.). Some very interesting notices of this work, and descriptions of the Roman Catacombs, are given in Burgon's *Letters from Rome*, p. 120-258. "De Rossi finds his earliest dated inscription A.D. 71. From that date to A.D. 300 there are not known to exist so many as thirty Christian inscriptions bearing dates. Of undated inscriptions, however, about 4000 are referable to the period antecedent to the emperor Constantine" (Burgon, p. 148). See CATACOMBS.

IX.—H

The lately exhumed foundations of the Church of St. Clement are confidently claimed as relics of the same age (Mullooly, *Clement's Basilica in Rome* [Rome, 1873, 8vo]). See CLEMENT.

Linus (who is mentioned in 2 Tim. iv, 21) and Clement (Phil. iv, 3) are supposed to have succeeded Peter as bishops of Rome. See LINUS.

IV. *Mystical Titles*.—Rome, as being their tyrannical mistress, was an object of special hatred to the Jews, who therefore denominated her by the name of *Babylon*—the state in whose dominions they had endured a long and heavy servitude (Schöttgen, *Hor. Heb.* i, 1125; Eisenmenger, *Entdeckt. Judenth.* i, 1800). Accordingly Rome, under the name of Babylon, is set forth in the Apocalypse (xiv, 8; xvi, 19; xvii, 5; xviii, 2) as the centre and representative of heathenism; while Jerusalem appears as the symbol of Judaism. In xvii, 9 allusion is clearly made to the Septicollis, the seven-hilled city—"seven mountains on which the woman sitteth." The description of this woman, in whom the profligacy of Rome is vividly personified, may be seen in Rev. xvii. In ch. xiii Rome is pictured as a huge, unnatural beast, whose name or number "is the number of a man, and his number is χξς." 666, not improbably *Latīnos, Λαττινος*, Latin, Roman. This beast has been most variously interpreted. The several theories serve scarcely more than to display the ingenuity or the bigotry of their originators, and to destroy each other. Münster (*De Occulto Urbis Romæ Nomine* [Hafn. 1811]) thinks there is a reference to the secret name of Rome, the disclosure of which, it was thought, would be destructive to the state (Pliny, *Hist. Nat.* iii, 9; Macrobius, *Sat.* iii, 5; Plutarch, *Quæst. Rom.* c. 61; Servius, *Ad Æn.* ii, 293). Pliny's words occur in the midst of a long and picturesque account of Italy. Coming in the course of it to speak of Rome, he says, "the uttering of whose other name is accounted impious, and when it had been spoken by Valerius Soranus, who immediately suffered the penalty, it was blotted out with a faith no less excellent than beneficial." He then proceeds to speak of the rites observed on the first of January, in connection with this belief, in honor of Diva Angerona, whose image appeared with her mouth bound and sealed up. This mystic name tradition reports to have been *Valencia*.

One of the most recent views of the name of the beast, from the pen of a Christian writer, we find in *Hyponoia, or Thoughts on a Spiritual Understanding of the Apocalypse* (Lond. 1844). "The number in question (666) is expressed in Greek by three letters of the alphabet: χ, six hundred; ξ, sixty; ς, six. Let us suppose these letters to be the initials of certain names, as it was common with the ancients in their inscriptions to indicate names of distinguished characters by initial letters, and sometimes by an additional letter, as C. Caius, Cn. Cneus. The Greek letter χ (ch) is the initial of Χριστός (Christ); the letter ξ is the initial of ξύλον (wood or tree); sometimes figuratively put in the New Test. for the cross. The last letter, ς, is equivalent to σ and τ, but whether an s or an st, it is the initial of the word Satanas, Satan, or the adversary. Taking the first two names in the genitive, and the last in the nominative, we have the following appellation, name, or title: Χριστοῦ ξύλου σατανᾶς, 'the adversary of the cross of Christ,' a character corresponding with that of certain enemies of the truth described by Paul (Phil. iii, 19)." See NUMBER OF THE BEAST.

ROME, BISHOP OF. See POPE.

ROME, COUNCILS OF. The most important are: 1. In 313, against the lapsi, and on discipline; 2. In 341, by pope Julius I and the Eastern bishops, in favor of Athanasius; 3. In 352, by Liberius, for the same object; 4. In 358, against the emperor Constans and the heretics; 5. In 364, at which were present deputies from the Council of Lampascus; 6. In 366, at which the Macedonians adopted the Nicene Creed; 7. In 367, to examine

into the charge of adultery preferred against the pope Damasus; 8. In 369, by Damasus, at which Ursinus and Valera were condemned; 9. In 372, at which Auxentius, bishop of Milan, was excommunicated; 10. In 374, by Damasus, condemning Apollinaris; 11. In 375, condemning Lucius, bishop of Alexandria; 12. In 376, against the Apollinarists and others; 13. In 380, fourth of Damasus, against the Sabellians, Arians, etc.; 14. In 400, against the Donatists; 15. In 430, against Nestorius; 16. In 444, against the Manichees; 17. In 774, giving Charlemagne power to elect the Roman pontiff, and to invest all bishops; 18. In 963, deposing pope John XII and appointing Leo VIII; 19. In 964, deposing Leo VIII; 20. In 964, restoring Leo VIII and deposing Benedict V, etc. See LATERAN; VATICAN.

ROME, JEWS IN. The origin of the Jews in Rome is very obscure. If credit is to be given to a reading in Valerius Maximus, as it is found in two epitomists—Julius Paris and Januarius Nepotianus—the Jews were already in Rome in 139 B.C. The old reading was, "Idem (C. Cornelius Hispalla, prætor peregrinus) qui Sabazii Jovis cultu simulato mores Romanos inficere conati sunt, domos suas repetere coegit." The epitomists read:

Paris.
"Idem Judæos qui Sabazii Jovis cultu Romanos inficere mores conati sunt, repetere domos suas coegit."

Nepotianus.
"Judæos quoque qui Romanis tradere sacra sua conati sunt, idem Hispallus urbe exterminavit arasque privatas a publicis locis abiecit."

If this reading be genuine, we find the Jews not merely settled in Rome, but a dangerous and proselyting people, three quarters of a century before the taking of Jerusalem by Pompey. But aside from the fact that both Paris and Nepotianus are post-Christian writers, the question comes up, "What have the Jews to do with Jupiter Sabazius—a Phrygian god?" Without arguing the question at any length, we may unhesitatingly say that the whole is a flagrant anachronism, introduced into the text of Valerius after the time when the Jews, either of themselves or as connected with the Christians, had become much more familiar to the general ear. Friedländer, in his *Darstellungen aus der Sittengeschichte Roms*, iii, 510, adopts the reading of Valerius Maximus as a source; but it is certain that the first settlement of the Jews at Rome was under Pompey, when vast numbers of slaves were brought to the capital. These slaves were publicly sold in the markets, but, if we may believe Philo, were soon emancipated by their tolerant masters, who were unwilling to do violence to their religious feelings. Is it not more probable that there were some, if not many, opulent commercial Jews already in Rome, "who, with their usual national spirit, purchased, to the utmost of their means, their unhappy countrymen, and enabled them to settle in freedom in the great metropolis?" Certain it is that at the time when Cicero delivered his memorable oration to vindicate Flaccus their influence was already felt; for being afraid of the large number of Jews Cicero saw in the audience, he delivered his speech in a low voice (Cicero, *Pro Flacco*, 28). Under Julius Cæsar they enjoyed great liberties; for, as Suetonius tells us, they were among the mourners—the most sincere mourners—at the obsequies of Cæsar; they waited for many nights around his entombment ("precipue Judæi qui noctibus continuis bustum frequentarunt" [*Jul. c. 84*]). At the time of Augustus, the number of Jews residing at Rome already amounted to several thousand. Tacitus gives their number at 4000, and Josephus states that 8000 were present when Archelaus appeared before Augustus (*Ant. xvii, 11, 1*; *War, ii, 6, 1*). They formed the chief population of the trans-Tiberine region: τὴν πέραν τοῦ Τιβέρεως ποταμοῦ μεγάλην τῆς Ῥώμης ἀποτομήν, ἣν οὐκ ἡγγόει κατεχομένην καὶ οἰκουμένην πρὸς Ἰουδαίων Ῥωμαῖοι δὲ ἥσαν οὐκ ἀπένευθεωδέντες. Αἰχμάλωτοι γὰρ ἀχθέντες εἰς Ἰταλίαν, ὑπὸ τῶν κτησαμένων ἐλευθερώθησαν, οὐδὲν τῶν πατρίων παραχα-

ράζαι βιασθέντες. Such is the report Philo gives in *Legat. ad Caium*, § 23 (Mang. ii, 568). Augustus was at first an enemy to all foreign religions, and even praised Caius, the son of Agrippa, for not having sacrificed in Jerusalem (Sueton. *Augustus*, 93). But as he advanced in years he grew more superstitious, and finally ordered that sacrifices for his welfare should be offered in the Jewish temple. The kindly feelings of Augustus towards the Jews were no doubt increased by his private friendship for Herod, and we must not be surprised at the special favors shown to the Jews by Augustus; for the less wealthy Jews not only shared in the general largess of corn which was distributed among the poorer inhabitants of the city, but, by a special favor of the monarch, their portion was reserved for the following day if the distribution fell on a Sabbath.

The first direct persecution of the Jews occurred under the reign of Tiberius, who sent 4000 Jewish youth against the robbers of Sardinia, purposely exposing them to the inclemencies of the climate ("si ob gravitatem cœli interirent, vile damnum," as Tacitus writes), and who banished all the others from Rome (Tacit. *Annal. ii, 85*; Sueton. *Tiberius*, 36). The ground of this decree is stated to have been the emperor's desire to suppress all foreign superstitions, more especially the Jewish, which numbered many proselytes. Josephus explains that a certain Jewish impostor who acted as a rabbi in Rome had, in concert with three other Jews, succeeded in proselytizing Fulvia, a noble Roman lady. On pretence of collecting for the Temple, they received from her large sums, which they appropriated to their own purposes. The fraud was detected, and Sejanus, who at that time was high in the emperor's confidence, used the opportunity for inciting his master to a general persecution of the Jews. After the death of Sejanus, the Jews were allowed to return to Rome to be oppressed by Caligula. Claudius (A.D. 41-46) again banished them from Rome, probably on account of the disputations and tumults excited by them in consequence of the spread of Christianity ("Judæos impulsore Chresto assidue tumultuantes Roma expulit" [Sueton. *Claudius*, 25]). Yet here, as elsewhere, oppression and persecution seemed not to be the slightest check on their increase, and it is true what Dion Cassius remarks, that the Jews were a γένος, κολουσθῆν μὲν πολλὰκις, αὐξηθῆν δὲ ἐπὶ πλείστον (xxxvii, 17). They had a sort of council, or house of judgment, which decided all matters of dispute. To this, no doubt, either in the synagogue or law-court attached to it, Paul expected to give an account of his conduct. "The numbers of the Jews in Rome were, doubtless, much increased; but their respectability as well as their popularity was much diminished by the immense influx of the most destitute as well as of the most unruly of the race, who were swept into captivity by thousands after the fall of Jerusalem." The change appears to be very marked. Rome tolerated, indeed, all religions; but the exclusiveness and the isolation of the Jews at Rome raised against them popular prejudice. The language of the incidental notices which occur about the Jews in the Latin authors, after this period, seems more and more contemptuous, and implies that many of them were in the lowest state of penury—the outcasts of society. Juvenal bitterly complains that the beautiful and poetic grove of Egeria was let out to mendicant hordes of Jews, who pitched their camps, like gypsies, in the open air, with a wallet and a bundle of hay for their pillow as their only furniture:

"Nunc sacri fontis nemus et delubra locantur
Judæis, quorum cophinus fœnumque suppellex"
(*Sat. iii, 12*).

And Martial alludes to their filth, and, what is curious enough, describes them as peddlers, venders of matches, which they trafficked for broken glass (i, 42; xii, 46). Be it as it may, certain it is that the Jews had once a flourishing and influential congregation at Rome, as may be seen from Jewish inscriptions and tombstones which of late have been brought to light.

Such was the checkered history of the dispersed of Israel during the period which ends with the destruction of Jerusalem. Their wanderings and settlements in other parts of Europe, and the events which befell them in the Roman empire and elsewhere, are fully treated in the articles *Jew* and *ROME*.

Rome, BENJAMIN (BEN-JEHUDA) OF, a learned Jew, flourished in the 14th century, and is the author of commentaries on *Kings*, *Chronicles*, and *Proverbs*. They are still in MS., but "represent the sound and single exegesis of the Spanish school, abounding with quotations from Jonah Ibn-Jaunah, Ibn-Gikatilla, Ibn-Balam, Ibn-Ezra, Joseph Kimchi, and David Kimchi, and are of considerable interest for the history of exegesis." See De Rossi, *Dizionario Storico degli Autori Ebrei*, p. 63 (Germ. transl.); Ginsburg, *Levita's Massoreth ha-Massoreth*, p. 81, note 91; Wolf, *Bibliotheca Hebr.* iii, 152, No. 393; Steinschneider, *Catalogus Libr. Hebr. in Bibl. Bodleiana*, p. 790, 1840, 2769; the same in the *Jewish Literature* (Lond. 1857), p. 146, 376; and *Bibliographisches Handbuch*, p. 21, No. 206 (Leips. 1859); Fürst, *Bibl. Jud.* i, 117. (B. P.)

Rome Land, a large open space in front of the minster of Waltham, Bury St. Edmund's, and St. Alban's, called the *forbury* at Reading, and probably the original of the *tombland* of Norwich, so called since 1302.

Rome Scot, or **Rome Fee**, an annual tribute of a thousand marks paid by king John to the see of Rome. The money was remitted for the support of an English school or college in Rome, and was held by some of the popes to be a proof of the dependence of England on the Roman see. It was abolished Jan. 15, 1534. See PETER-PENCE.

Romeyn, the name of a family who have long been prominent in the ministry of the Reformed (Dutch) Church in America. Their ancestors fled from their native country, the United Provinces (now Belgium), during the persecutions of Louis XIV for conscience' sake and for their attachment to the Protestant cause. They took their lives in their hands, leaving all their effects behind them. There were three brothers, one of whom went to England, and was the ancestor of the celebrated Rev. William Romaine, author of *The Life, the Walk, and the Triumph of Faith*. He was the contemporary and collaborer of Whitefield, Berridge, the countess of Huntingdon, and the Wesleys, with others of the great revivalists of the last century. The other two brothers, somewhere between 1650 and 1660, went to the Dutch West India Islands and Brazil. One of them died soon after. Claas Janse Romeyn, the survivor, left Brazil when that country, which had been subject to the States-general, passed from their possession in 1661. He came to New York and died about twelve years later. Of his descendants the following are entitled to notice among the deceased ministers of the Reformed Church.

I. JAMES, son of James Van Campen Romeyn, born at Greenbush, N. Y., in 1797, was a graduate of Columbia College in 1816, and of the Theological Seminary of the Reformed Church at New Brunswick in 1819. He was settled successively at Nassau, N. Y., 1820-27; Six Mile Run, N. J., 1827-33; Hackensack, N. J., as colleague with his venerable father, 1833-36; Catskill, N. Y., 1836-40; Leeds, N. Y., 1842-44; Bergen Neck, N. J., 1844-50; Geneva, N. Y., 1850-51. He had scarcely begun his labors at this place when he was stricken down

with paralysis, of which he lingered, often in great suffering, until death brought him a happy release in 1859. He had previously been declared *emeritus* at his own request by the classis to which he belonged—a provision by which a minister is honorably discharged from active duties. None of the churches which he served offered him so prominent a position as his pulpit power seemed to others to demand. But this was the result entirely of his own peculiar views, his feeble health, and of his very sensitive nature, which led him to decline more commanding places and enabled him to occupy a congenial retirement. With these feelings he also declined the professorship of logic and rhetoric in Rutgers College, and seldom published any of his pulpit discourses. He was a frequent contributor to the religious press, writing upon almost all topics of current interest with equal ease and ability. His only published sermons were, one on *The Crisis and its Claims upon the Church of God*, preached, June, 1842, before the General Synod of the Reformed Church, of which he was the retiring president; another, entitled *A Plea for the Evangelical Press*, preached at the public deliberative meeting of the American Tract Society, October, 1843; and the very last effort of his pen, before he was paralyzed, entitled *Enmity to the Cross of Christ*. These are all characteristic sermons. The last was published in Dr. H. C. Fish's *Pulpit Eloquence of the Nineteenth Century*, and also in pamphlet form by the author as "A parting memorial to the people of his former charges." He was the author of a famous *Report on the State of the Church*, made to the General Synod in 1848; and also published a remarkable address before the Greene County Agricultural Society, during his residence there. In his will he forbade any posthumous publication of his discourses. His correspondence would make one of the raciest volumes of epistolary writing in our language. Probably the best idea of his pulpit oratory and sermons may be formed from the statements which we quote. Dr. James W. Alexander, writing to a friend in September, 1844, from Staten Island, says: "Here I heard James Romeyn; and a more extraordinary man I never heard. Fulness of matter, every step sudden and unexpected, genius, strength, fire, terror, amazing and preposterous rapidity, contempt of rule and taste. It was an awful discourse: 1 Thess. v, 3. It was one which I shall not soon forget." Another contemporary says of him: "I think I see him now—his tall form, which, in face at least, I fancy to have been Laurence Sterne's, strung up to the highest nervous tension, and his tongue pouring forth a lava-tide of burning eloquence, the most powerful to which I have ever listened. *Powerful*," he adds, "is just the word. I have heard men more remarkable for literary polish, more original in fancy, more erudite in learning, more winning in pathos; but for the grander sublimities of eloquence I never heard his equal. His denunciations were awful; he abounded in this style. I have heard of his preaching his first sermon on the text, 'Yet forty days and Nineveh shall be destroyed,' of which the effect was startling. He abounded and excelled in illustration. He laid all literature and knowledge under contribution for this purpose." Yet with all these characteristics of a Boanerges, he was tender and soul-moving. He could as easily bring tears to the eyes as terrors to the conscience. His zeal was flaming. His love to Christ and to souls and to the kingdom of Christ burned in every sermon and inflamed every prayer. His prayers were as remarkable as his sermons for fulness, variety, point, and overwhelming effects. The hymnology of the Church afforded him more illustration, and was quoted with more power than by any other minister whom we ever heard. His grasp of a great subject, his analytic skill, his surprising fertility of figurative language, and his historical, scientific, literary, and especially scriptural, illustrations, his condensed, intense modes of expression, the beauty of his language, and the uplifting power of his eloquence made him, as a preacher, perfectly unique

and inimitable. He thought in figures, and his figures were powers. His voice was strong and commanding; his utterance was more rapid than that of any other public speaker, not excepting the celebrated statesman Rufus Choate; his action was as energetic as his thought, and perfectly exhausting to his weak and overtaxed body. He never went into his pulpit, not even to lecture in a country school-house, without the most careful preparation. His manuscript sermons and lectures are quite as marvellous for their neat and minute chirography as for their literary and theological contents. It is wonderful how he could read them in or out of the pulpit. But his physical and mental peculiarities seem to have been more acutely sensitive than those of ordinary mortals. He could see further, hear quicker, speak and think more rapidly than almost all others. But these very qualities brought with them a more excitable and naturally irritable temperament, more impatience with things and people that were not right in his sight, and other infirmities that needed the constant control of divine grace to enable him to live for Christ. Yet he was, in private life, a most entertaining and interesting companion, mirthful, exuberant, simple as a child, and a fast friend. In the ecclesiastical affairs of his denomination he was a conspicuous and zealous worker, and although, as in his *Report on the State of the Church*, he seemed to be far in advance of the times, yet, one by one, nearly all of his proposed changes have been adopted and incorporated with the policy and life of the Church. He dealt in principles and facts rather than in theories and fancies. His afflictions enriched his experience, while they caused "many a conflict, many a doubt." His last days were beclouded by the saddening shadows of disease that fell upon the wreck of his body and mind. But the spirit of his piety and ministerial life still shot up its heavenly radiance through the gloom until he entered into rest. On his tombstone are graven these words expressive of his highest aims: "Thou hast dealt well with thy servant, O Lord! I have passed my days as a minister of Jesus Christ. That is enough! That is enough! I am satisfied. God has led me by a right way. Bless the Lord, O my soul!"

2. JAMES VAN CAMPEN, son of Rev. Thomas and Susannah (Van Campen) Romeyn, was born at Minisink, Sussex Co., N. J., Nov. 15, 1765. A child of the covenant, he was converted at an early age, and was always noted for conscientious piety and for the simplicity and frankness of his well-balanced character. He was educated at the Schenectady Academy, which was the germ of Union College, under the eye of his uncle, Dr. Theodorice Romeyn, with whom he afterwards studied theology. He was licensed to preach the Gospel by the Synod of New York, Oct. 5, 1787, and immediately settled as pastor of the united churches of Greenbush and Schodac, Rensselaer Co., N. Y., opposite Albany. In 1794 he relinquished the Schodac Church and took charge of a new enterprise which he had organized at Wynant's Kill in connection with the Church at Greenbush. In 1799 he removed to New Jersey, having accepted a call to the united Second Churches of Hackensack and Schralenburg, which had been formed out of the old original churches there, and where he remained until disease compelled him to cease all active service, in 1832. His ministry in New Jersey began at a period of bitter dissensions between the Cœtus and Conferentie parties, which, perhaps, raged with more theological and personal violence in these two churches than in any other part of the Dutch denomination. True to the antecedents and instincts of his family, Mr. Romeyn was a leader of the liberal and progressive side. The reactionary party were, as a rule, arrayed also against the national struggle for independence. Politics embittered the ecclesiastical disputes. Families were divided; personal strifes ran so high that, in many cases, the opposing parties would neither worship together, nor speak to each other, nor even turn

out for each other on the roads. In 1822 another great conflict which had arisen some years previously culminated in the secession of Rev. Solomon Froeligh, D.D., a professor of theology and pastor of the old churches of Hackensack and Schralenburg, and four other clergymen, with seven congregations, who formed what they called the "True Reformed Dutch Church in America." All the rancor and obstinacy of the old strifes seemed to be transferred to this unhappy movement, in which Mr. Romeyn was necessarily involved as the chief representative of the faith and polity of the Church against which this revolt was directed. But he stood undaunted—prudent in counsel, energetic in action, and conciliatory in disposition. He was admirably fitted for his burdens by his natural endowments, his high moral qualities, and his pervading piety. No one could charge him with rash enterprise, doubtful expedients, personal antipathies, excited words, retaliating acts, or irritating and aggressive measures. In the affairs of the Church he was the ready helper, the judicious counsellor, the pacificator. Without the form of judicial authority, he wielded an influence far more effectual, desirable, and honorable. In person Mr. Romeyn was tall, large and well proportioned, erect and of commanding presence, dignified and impressive. He was retiring, modest, stable, strong, and earnest. His piety was serene, profound, chastened by divine discipline, and developed with great simplicity and tenderness. His mind was neither rapid nor brilliant nor original, but clear, comprehensive, well trained, and practical. In doctrine he was a strong Calvinist, holding the truth in love, "and insisting more upon the spirit which is life than upon the letter which killeth." His own congregations remained perfectly united and peaceful amid the surrounding strife, and his ministry was blessed with a steady ingathering of souls and growth in grace. He preached from carefully prepared analyses, with fluent speech, terse expression, and a remarkable facility in the use of appropriate Scripture language. This was especially the case in his communion services, when the Church members stood around successive tables, and, as he gave with his own hand the broken bread to each one, he accompanied it with some brief quotation from the Bible particularly adapted to the circumstances of the recipient. Here his pastoral tact and intimate knowledge of his flock were often manifested with a power which melted every heart and carried his people up to the top of the mount of communion. He was very active and prominent in the general councils of the Church, for many years was stated clerk, and in 1806 president of the General Synod. From 1807 till his death he was a trustee of Rutgers College, and also rendered great aid in securing funds for the theological professorships. His only published matter consists of a manifesto in regard to a controversy, an address to theological students at New Brunswick (*Magazine of the Reformed Dutch Church*, iv, 202), and some synodical reports. He died in perfect peace at Hackensack after a lingering illness of paralysis which had laid him aside from all pastoral work for eight years, June 27, 1840.

3. JEREMIAH, son of John and Juliana (McCarty) Romeyn, and nephew of the Rev. Thomas Romeyn, Sr., was born in New York Dec. 24, 1768. He was educated at Hackensack Academy under the celebrated Peter Wilson, LL.D., and in theology under the Rev. Drs. Theodorice Romeyn and John H. Meyer. Before he was twenty years old he was ordained to the ministry, Nov. 10, 1788, and settled as pastor of a Dutch Church at Linlithgow, N. Y., Livingston's Manor. In 1806 he removed to Harlem, remaining there as pastor until 1814, when he went to Delaware County, serving churches at Schoharie Kill and Beaver Dam, the latter of which was resuscitated by his labors. In 1817 he removed to Woodstock, N. Y., on account of his daughter's health, but after a few months was himself taken with the disease of which he died, July 17, 1818. In 1797 he was appointed professor of Hebrew by the Gen-

eral Synod of the Reformed Church, and held this office until his death. "His personal appearance," says one of his pupils of 1812, "was uncommonly imposing—nearly six feet in height, of a full habit, grave, dignified, and graceful. His head was finely formed, his visage large, with a dark-blue powerful eye, well set under an expanded brow; his countenance florid; his hair full and white, and usually powdered before entering the pulpit or associating with gentlemen of the old school." As a preacher, he was distinguished by his "deep bass voice, of remarkable smoothness and considerable compass;" by an easy, deliberate manner; and by great accuracy of language, precision of thought, and variety of treatment. He was described as combining the Dutch style of pulpit method with the English mode of reasoning and the French vivacity, and picturesque setting of illustration and expression with the most perfect self-command. His theological culture was large and profound, and his reputation as a linguist was very high. "He pronounced the Hebrew with the German accent, with great skill according to the Masoretic points. His attachment to this language brought him, and kept him for many years, in close intimacy with the Jewish rabbins and other teachers of Hebrew in New York, who often spoke of his high scholarship in this department." His temperament was nervous and somewhat irritable, but his piety was pervasive and controlling. He was generous, witty, impulsive, kind, and vivacious—religion and his pulpit absorbed his whole soul. His death was marked by the most perfect trust in "Christ, the hope of glory," and by patient waiting for his coming.

4. JOHN BRODHEAD, D.D., the only son of Theodorice Romeyn, was born at Marletown, Ulster Co., N. Y., Nov. 8, 1777. After a preliminary education in the Schenectady Academy, he entered the senior class of Columbia College at the age of seventeen, and graduated with high rank in 1795. The next year he united with his father's Church in Schenectady, and immediately began his theological studies with Dr. John H. Livingston, but completed them under his father. At twenty-one he was licensed to preach by the Classis of Albany, June 20, 1798. In 1799 he became pastor of the Reformed Church of Rhinebeck, Dutchess Co., N. Y., and labored there with increasing popularity and success until, in 1803, he took charge of the Presbyterian Church in Schenectady, which had united in a call upon him after a long period of division. This change enabled him to be with his aged father in his last days. After one year of labor, he went to the First Presbyterian Church in Albany, and sustained himself with great ability in that important Church at the capital of the state. Four years later (in 1808) he accepted the call of the newly formed Cedar Street Presbyterian Church in New York city, of which he continued the pastor until his death, which occurred Feb. 22, 1825, in the twenty-sixth year of his ministry. Dr. Romeyn inherited the nervous sensibility, and the acute, rapid, and decisive characteristics of his family. He was a man of medium size and fine personal appearance; quick in his movements, cultivated in manner, and earnest in his work. He was a great reader, and his fine library was filled with well-used works in almost all departments of literature. His theological attainments were general rather than profound. As a preacher, he was among the foremost of his day. Even when the New York pulpit contained such men as Dr. John M. Mason and Dr. Alexander McLeod, he built up his new Church under the very shadows of their sanctuaries with complete success. With a congregation composed of the *élite* of the city, his popularity was maintained by discourses which always evinced careful preparation, and by a pastoral tact which was almost unrivalled. Few men have had such power to attach their people to their ministry as he. The greatest characteristic of his preaching was his magnetic power of attraction and impression. His sermons were not remarkable for analysis or discussion, but in their application, and especially in dealing with

consciences, and in appeals to the emotional nature, he was a prince of preachers. His published volumes of sermons, like those of Whitefield, do not sustain his great reputation as a pulpit orator. Their power over his audiences was doubtless owing to his impressive delivery, which was generally pleasing, natural, and full of vivacity. "At times every line of his face, even his whole frame, became instinct with passion, and then the eye kindled or became tearful, the very soul speaking through the body, that trembled with emotion or erected itself into an attitude of authority. The torrent of feeling often subdued and carried away his hearers with responding emotion. Dr. Romeyn, and young Spencer, of Liverpool, have always been associated in my mind as having strong points of resemblance" (Dr. Vermilye, in Sprague's *Annals of the Amer. Pulpit*, iv, 223). His ministry was exceedingly blessed, and especially among the young. "His catechetical classes were crowded. Of a very large Bible class of young ladies every one became a professor of religion. More young men became ministers from his congregation than from any other." In addition to two volumes of *Sermons* (published in 1816 and reprinted in Scotland), Dr. Romeyn printed a number of occasional discourses, delivered upon national and other important occasions—among these was an *Oration on the Death of Washington* (1800). He was active in the benevolent movements of his day—a trustee of Princeton College from 1809; a principal agent in establishing the Theological Seminary in that place, and one of its first directors; moderator of the General Assembly in 1810, when he was but thirty-three years of age; and one of the founders of the American Bible Society in 1816. He was also its first secretary, for domestic correspondence. His health was not equal to the constant strain to which his zealous spirit, peculiar trials, and infirmities of mind and body subjected him. A tour in Europe in 1818 and 1814 brought transient relief; but for more than a year prior to his death his strength gave way, and he finished his course with joy, making "earnest intercession for his family and his flock," and supported by the most cheering heavenly prospects and triumphant faith in Christ.

5. THEODORE (or DIRCK), D.D., a younger half-brother of Thomas, Sr., was born at Hackensack, N. J., Jan. 12 (O. S.), 1744. His elementary education was received from his elder brother Thomas and the Rev. J. M. Goetschius, pastor of the united churches of Hackensack and Schralenburg. He entered the junior class in Princeton College while the Rev. Dr. Finley was president, and graduated in 1765 in the same class with the younger Jonathan Edwards, who was his bosom friend; and Dr. Sprague states that it was partly through his influence that Dr. Edwards was, many years after, chosen president of Union College. Converted at the age of sixteen, he immediately gave himself up to the ministry of the Gospel, studied theology with the Rev. J. M. Goetschius, and was licensed in 1766, after a two days' examination, by the American Classis, or Cetus, of the Dutch Church. His first settlement was at Marletown, Rochester, and Wawarsing, Ulster Co., N. Y., from 1766 to 1775. He then removed to Hackensack, his native place, and Schralenburg, where he ministered until 1784, when he went to Schenectady, his last settlement (1784 to 1804). During this period he declined numerous urgent calls from more prominent churches. He was twice elected president of Queen's College (now Rutgers), N. J., but declined both invitations. His zeal for education led him to establish the Schenectady Academy, out of which grew Union College. He was the father of this institution, and its presidency was first offered to him, but declined for reasons satisfactory to himself. The General Synod of his Church appointed him lector in theology, an office which he held from 1792 to 1797, when he was elected professor of theology, and so remained until his decease. Dr. Romeyn was gifted with a powerful in-

tellect, mature and comprehensive judgment, great executive ability, a remarkably retentive memory, a strong will, and those marked qualities which made him "a leader and commander in Israel." He was foremost, with Dr. Livingston and others, in the movements which secured the independence of the Dutch Church from the control of the Church in Holland. His bold patriotism during the Revolutionary war made him a conspicuous mark for Tory and British persecutions and revenges. The British troops sacked his dwelling, and destroyed or carried off all his furniture, clothing, books, and papers. He was obliged to remove his family for safety, but made frequent visits to his congregations, which were always attended by danger; and at one time his life nearly paid the forfeit from armed loyalists. Among the prisoners who were carried off from Hackensack when it was attacked by the British was his own brother, who was held captive three months. He also saved a number of men by hiding them in his own house behind a chimney. During all this period he was in intimate relations with some of the most distinguished officers of the army. "He was the counsellor of senators, the adviser and compeer of the warriors of the Revolution, and an efficient co-worker with the patriot." His pulpit oratory was powerful and popular. He was learned and yet practical; "a son of thunder," and "a son of consolation" also. His discourses were rich in solid matter, enlivened with historical anecdote and illustration. He went deeply into his subject, and his appeals to conscience and the feelings were at times overwhelming. His manner was natural, easy, and commanding. "His most expressive organ was his eye, and when he was excited no one could withstand its power." As a theological professor he gave full satisfaction to his students and to the Church which honored him. He was stately, reserved, affable, but not familiar. Governor De Witt Clinton describes him as having "something in his manner peculiarly dignified and benevolent, calculated to create veneration as well as affection, and it created an impression upon my mind that can never be erased." Another of his friends, and a student in theology (Dr. Jacob Brodhead), says that "in his external form, his manly, noble stature, his majestic though sometimes stern countenance, he resembled the illustrious Washington." Another says, "He was unquestionably the first man in our Church, among the first in the whole American Church. His piety was deep, practical, and experimental. He realized more than others his own errors and weaknesses, and trusted like a little child in the Saviour whom he preached and loved." He died April 16, 1804, having been in the ministry thirty-eight years. His wife was Elizabeth Brodhead, of Ulster Co., N. Y., by whom he had two children, a daughter and a son. The daughter became the wife of Caleb Beck, of Albany, and mother of three very eminent physicians—Drs. Theodoric Romeyn, Lewis C., and John B. Beck. The son was the Rev. John B. Romeyn, D.D., whose memorial is given above.

6. THOMAS, Sr., son of Nicholas Romeyn, was born at Pompton, N. J., March 20 (O. S.), 1729. His father being a farmer, he was brought up in the same calling until April, 1747, when he began to study for the Gospel ministry. He was a student in Princeton College under the presidency of the Rev. Aaron Burr, D.D., and pursued his studies with the Rev. Theodorus Frelinghuysen, pastor of the Dutch Church in Albany, N. Y. Having completed this course, and received a call from the Dutch Church in Jamaica, L. I., he sailed for Europe April 11, 1753, and was examined, licensed, ordained, and installed by the Classis of Amsterdam as pastor of the Church in Jamaica, to which he returned Aug. 27, 1754. His first wife was Margaret, daughter of the Rev. Theodorus Jacobus Frelinghuysen, by whom he had one son, the Rev. Theodorus Frelinghuysen Romeyn. She died at Jamaica in 1757. In 1760, on account of difficulties in his congregation, he accepted a call to the

Church at Minisink, on the Delaware River. After a pastorate of ten years he removed to Caughnawaga, N. Y., in 1770, where he continued as pastor of the Church until his decease at Mayfield, Montgomery Co., Oct. 22, 1794. He married his second wife, Susannah Van Campen, of Sussex County, N. J., Oct. 3, 1770. Six sons were born of this marriage. Of all his seven sons, four were educated for the ministry—Theodorus Frelinghuysen, James Van Campen, Benjamin, and Thomas. Benjamin died soon after graduating at Williams College in 1796. The others were all ordained to the ministry of their mother Church. Theodorus F. died in 1785, after a single year of service as the beloved pastor of the churches of Bridgewater and Bedminster, N. J. Their venerable father was the first Low-Dutch minister who settled west of Schenectady, in the valley of the Mohawk. His field of labor, being on the frontier, embraced large portions of what are now Fulton and Montgomery counties, surrounding the old church at Caughnawaga (now Fonda). His duties were consequently very arduous and often dangerous, from exposure to Indians and other pioneer trials. His missionary spirit was accompanied by intense devotion to the liberal views of the Cetus, who advocated the education and ordination of the clergy in this country, and independence of the Church in Holland. During the whole period of the Revolutionary war he was an enthusiastic patriot. His residence on the frontier was the theatre of frequent alarms, murders, and desolations, which often interrupted, and at one time stayed, his ministerial labors. He was obliged to flee with all his family into the interior for safety until the danger was passed. He is represented to have been of a mild and patient spirit, "enduring hardness as a good soldier of Jesus Christ," and unostentatious in his demeanor. As a preacher, he was lucid and winning, strongly attached to the doctrines of grace as set forth in the standards of his Church, and able in their defence. In the pulpit he was solemn, earnest, and tender. His last illness, for more than a year, was borne with meek submission to the will of God, until his long ministry of forty years was closed by death. His remains were buried in front of the pulpit in the old church where for twenty-four years he had preached the Gospel of Christ.

7. THOMAS, Jr., son of Rev. Thomas Romeyn, Sr., was born at Caughnawaga (now Fonda), N. Y., Feb. 22, 1777. Educated in the classics by his brother, Rev. James V. C. Romeyn, and at the Schenectady Academy, he graduated at Williams College, Mass., in September, 1796; studied theology with Dr. Theodoric Romeyn in Schenectady; was licensed to preach by the Classis of Albany in 1798, and ordained in the Dutch Church of Remsenbush (now Florida), N. Y., in 1800, having the double charge of that congregation and the Second Church of Schenectady. In 1806 he accepted the pastoral care of the churches of Niskayuna and Amity, N. Y., and served them until 1827, when he was disabled by a fall, which lamed him for life and compelled him to abandon active duty as a settled minister. He had a large, powerful frame, and was dignified, humorous, courteous, and decided, as well as amiable and transparently honest. His intellect was vigorous, his judgment almost uniformly correct, and his shrewd, pointed, quiet humor gave great zest to his deliberate and thoughtful speech. In the pulpit he was noted for theological exactness of statement, for knowledge and apt quotations of Scripture, for deep piety, and for practical usefulness. His attainments were respectable, but his wide influence over a large section of the Church was chiefly due to his thorough knowledge of "the law of the house" and his wisdom as a counsellor and peace-maker. He died Aug. 9, 1859, revered by all who knew him, and in "the full assurance of faith." He was a pillar of the Reformed Church in the valley of the Mohawk.

Annals of the Classis of Bergen; Fish, Pulpit Eloquence of the 19th Century. (W. J. R. T.)

Rommel, DIETRICH CHRISTOPHER VON, the Hessian historian, was born April 17, 1781. For some time he was professor at Marburg, and from 1820 he resided at Cassel as president of the governmental archives. He died in 1859. His historical works are of great importance to Church history. He published, *Philipp der Grossmüthige, Landgraf von Hessen. Ein Beitrag zur genaueren Kunde der Reformation und des 16. Jahrhunderts* (Giessen, 1830, 3 vols.):—*Landgraf Philipp der Hochherzige u. die Reformation* (Darmst. 1845):—*Kurze Gesch. d. hess. Kirchenverbesserung unter d. Landgr. Philipp d. Grossmüthigen*, etc. (Cassel, 1817). See Wiener, *Handbuch der theol. Literatur*, i, 793; ii, 39; Zuchold, *Biblioth. Theol.* ii, 1082. (B. P.)

Romowa, in Prussian mythology, is the sacred place of the ancient Prussians. A civil war had divided the native Prussians and the immigrant Scandinavians. Waidekut and Grive, the first king and the first chief priest, had restored peace, and Grive afterwards assembled the people on a beautiful plain on which stood a massive oak with widely spreading branches. Before this tree he had placed three images, which he called Potrimpos, Perkunos, and Pikullos, and declared them to be the supreme gods. Punishments were threatened and rewards promised in their names. Three niches were cut in the oak-tree which had been selected to become the home of the idols, and they were placed there with great solemnity. A pyre was then erected before the tree, from the top of which Grive exhorted the people, and on which sacrifices, including several unmanageable persons, were afterwards burned. A fearful thunder-storm, which the priest declared to be the voice of God, made the people tremble, and caused them to regard Grive with a dread that put them in mortal terror for centuries afterwards when they were obliged to approach him. The place in which this occurred was called Romowa. The priests continued to dwell and offer sacrifices there until the increased population and extension of its territories caused the establishing of other sacred oaks. Christianity ultimately came in and extirpated them all, so that the location of the original Romowa is no longer known.

Romulus, a prime character in Roman mythology; but which of the legends concerning this alleged founder and earliest king of their city was regarded as genuine by the Romans is wholly uncertain, since our information is based on very modern sources. The following tradition had, however, become quite generally established in the flourishing period of Roman literature: Two brothers belonging to the royal family descended from Æneas and reigning in Alba, who were named Numitor and Amulius, divided their inheritance so that Numitor received the throne and Amulius the treasure. Amulius, however, soon dethroned his brother, and made a vestal of his daughter Ilia, or Rhea Silvia, in order to

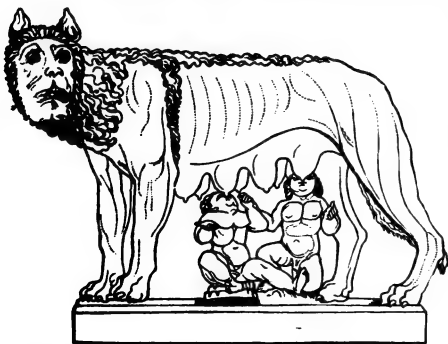

guard against offspring on her part. She was, however, approached by the god Mars, and gave birth to the twins Romulus and Remus, whom Amulius caused to be exposed by means of a servant on the overflowed banks of the Tiber. They were nourished by a she-wolf and a bird, until found by the shepherd Faustulus, who bore them to his house and reared them with the assistance of his wife, Acca Larentia. On arriving at manhood, they dethroned and killed Amulius and re-instated their grandfather Numitor. After this they founded a new city (Rome); but in the progress of the work a quarrel broke out between them, and Remus was slain by his brother's hand. Romulus now reigned alone in the new state, and after his death was venerated as a god under the name of *Quirinus*, because of the declaration of Julius Proculus that Romulus had appeared to him in superhuman form. A bronze group of the wolf suckling the twins is still preserved in the Capitoline Palace, and constitutes one of the most eminent relics of ancient Roman art.

Romus, in Greek mythology, was the son of Ulysses and Circe.

Ronde, (Dutch) LAMBERTUS DE, a minister of the Reformed (Dutch) Church in America, was colleague with Johannes Ritzema in the Collegiate (Dutch) Church of New York, and successor to the venerable Gualterus du Bois from 1751 to 1784. With his associate Ritzema he was thoroughly educated in one of the universities of Holland, and brought to his pulpit ample preparations. When driven from New York during the Revolutionary war, he supplied the Church of Schaghticoke, near Albany, where he resided during the rest of his life, being too old to resume his labors. He preached only in the Dutch language, and was the leading spirit in opposition to the introduction of English preaching, and in the lawsuit which resulted in favor of the consistory and against "the Dutch party," who had to pay in costs £300. Notwithstanding all this, his character was always venerated, and he died in a good old age at Schaghticoke, his place of voluntary exile, in 1795. The consistory of the Church in New York gave him an annuity of £200 for life after he left their active service, and the same was given to his aged colleague Ritzema, who died at Kinderhook, N. Y. Mr. de Ronde was a man of respectable attainments and abilities as a preacher, but was not so eminent for these things as he was for his part in the ecclesiastical controversies in that transition period of the Dutch Church. See De Witt, *Hist. Discourse*, p. 70; Gunn, *Life of Livingston*, p. 88, 164; Corwin, *Manual of the Ref. Ch.* p. 70. (W. J. R. T.)

Roney, Moses, a minister of the Reformed Presbyterian Church, was born in Washington County, Pa., Sept. 20, 1804. In his fourteenth year he entered the grammar-school of Jefferson College, and graduated from the college in 1823. He spent some time in teaching in Baltimore, and then pursued his studies under Dr. Wilson, receiving his license June 8, 1829. He was ordained and installed pastor in Newburgh, N. Y., June 8, 1830. In the great controversy concerning the relations of the Church to the authorities of the United States he opposed the proposed changes. In 1836 the Synod chose him to be editor of a contemplated magazine, which first appeared in March following as *The Reformed Presbyterian*, and which he conducted, with the exception of a single year, until it reached the middle of the eighteenth volume. In 1848, on account of ill-health, he resigned the editorship, and the next year took charge of the literary institution in Allegheny, Pa., which he retained until nearly the time of his death (July 3, 1854). See Sprague, *Annals of the Amer. Pulpit*, ix, 79.

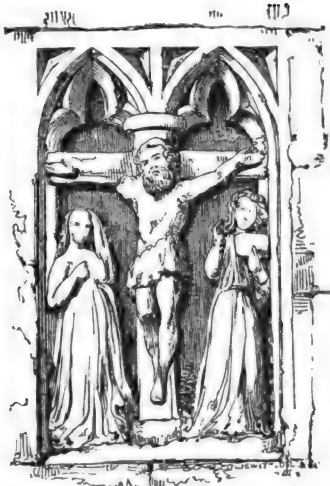

Rongala, in South-Sea Island mythology, is the name of the supreme being or highest god among the inhabitants of the Caroline Islands, in the Pacific Ocean.

The Capitoline Wolf Suckling Romulus and Remus.

Ronsdorf Sect. This name has been given to the clique of fanatics founded by Elias Eller (q. v.) at Elberfeld, and subsequently transferred to Ronsdorf, in the duchy of Berg, Germany.

Rood (Saxon), a cross or crucifix. The term is more particularly applied to the large cross erected in Roman Catholic churches over the entrance of the chancel or choir. This is often of very large size, and when complete is, like other crucifixes, accompanied by the figures of St. John and the Blessed Virgin, placed one on each side of the foot of the cross; but these are often omitted. Lights are frequently placed in front of these roods, especially on certain festivals of the Church.

Rood at Sherborne, Dorsetshire.

Occasionally roods or crucifixes are found sculptured outside of churches, on churchyard crosses, on wayside crosses, and at the entrance of chantries and oratories. There is a much-defaced example at Sherborne Minster, in Dorsetshire.

Many churches were dedicated to the holy rood, as the abbey near Edinburgh, and at Daglingworth, Caermarthen, Bettws-y-Grôg, Capel Christ, Southampton, Wood Eaton, Swindon, and others. The Church of SS. Vincent and Anastasius, after it received the addition of a transept, was called Holy Cross, from its new shape. The rood was set before the feet of the dying, stretched on straw or ashes, emblems of mortality, and also, Beleth says, erected at the head of graves.

ROOD-ALTAR, an altar standing under the rood-screen. In large churches there were generally two, one on each side of the entrance into the choir.

ROOD-ARCH, the arch which separates the choir from the nave of a cathedral or church, under which the rood-screen and rood were anciently placed.

ROOD-BEAM, or **ROOD-LOFT**. The rood spoken of above was supported either by a beam called the *rood-beam*, or by a gallery called the *rood-loft*, over the screen separating the choir or chancel of a church from the nave. Rood-lofts do not appear to have been common in England before, if so soon as, the 14th century. They were approached from the inside of the church, generally by a small stone staircase in the wall, which is often to be found in churches which have lost all other traces of them. The front was frequently richly panelled, and the under-side formed into a large covered cornice, or ornamented with small ribs and other decorations, connecting it with the screen below. Although most of the rood-lofts in England have been destroyed, a considerable

number of examples (more or less perfect) remain, as at Long Sutton, Kingsbury Episcopi, Barnwell, Dunster, Timberscombe, Minehead, and Winsham, Somersetshire; Newark, Nottinghamshire; Charlton-on-Otmoor, and Handborough, Oxfordshire; Merevale, Knowle, and Worm-Leighton, Warwickshire; Flamsted, Hertfordshire; Uffendon, Bradninch, Collumpton, Dartmouth, Kenton, Plymptree, and Hartland, Devon, etc. The rood-loft was occasionally placed above the chancel-arch, as at Northleach, Gloucestershire. It sometimes extended across the first arch of the nave, as in Castle Hedingham Church, Essex. There are some very fine and rich rood-lofts in Wales, in churches which are in other respects plain and poor.

ROOD-BOWL, a bowl of latten or other material, with a pricket in the centre, to hold a taper for lighting the rood-screen.

ROOD-CHAINS, those chains by which, in the case of large figures placed on or beside the rood, such figures were supported. These chains were inserted in the roof in front of the chancel arch. Remains of such chains are to be seen at Collumpton, Devonshire.

ROOD-CLOTH (or **RODE-CLOTH**), the veil by which the large crucifix or rood, which anciently stood over the chancel-screen, was covered during Lent. Its color in England was either violet or black, and it was frequently marked with a white cross. We find examples of this cloth figured in mediæval illuminations.

ROOD-DOORS, the doors of the rood-screen, separating the nave from the chancel.

ROOD-GALLERY. See **ROOD-LOFT**.

ROOD-GAP, the space under a chancel-arch.

ROOD-LIGHT, a light, whether from a mortar with taper or from oil-lamps or cressets, placed on or about the rood-beam. Such were kept continually burning in ancient parish churches.

ROOD-LOFT. See **ROOD-BEAM**.

ROOD-MASS, a term sometimes applied (1) to the daily parish mass said in large churches at the altar under the rood-screen; and (2) sometimes to the mass said on Holy-cross Day, or on the feast of the Exaltation of the Holy Cross.

ROOD-SAINTS, images of the Virgin Mary and of John the beloved disciple, which were placed on each side of the rood.

ROOD-SCREEN, a screen separating the choir or chancel of a church from the nave. Above it was a gallery supporting the rood, and called the rood-loft. The rood-screen had no upper loft, or solar. In early times it had three doors, one facing the altar, the second fronting the gospel side, and a third the epistle side. Before it veils were dropped at the consecration.

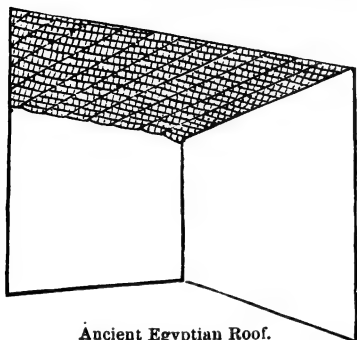

ROOD-STAIR, the staircase winding up to the rood (q. v.).

ROOD-STEEPLE, or **ROOD-TOWER**. This name is sometimes applied to the tower built over the intersection of a cruciform church.

ROOD-STEPS, the steps into a choir or chancel, commonly found under or immediately before the rood-screen.

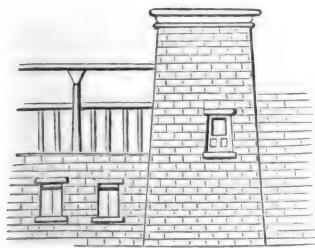

Rood, ANSON, a Presbyterian divine, was ordained at New Haven, Conn., in 1829. He took up his residence in Philadelphia, Pa., where he died in 1857. He published, *A Church Manual for the Members of the Presbyterian Church* (Phila. 1843, 8vo); several pamphlets and papers on theological subjects, temperance reform, etc.; and edited a daily paper in Philadelphia. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Roof (רֹאשׁ, *gág*; στέγη, Matt. viii, 8; δώμα, Acts x, 9). The roofs of dwelling-houses in the entire East, because of the generally dry weather, are made flat and are surrounded with a guard or railing (רָמְסֵס; στέφαν. See Deut. xxii, 8, where the parapet is insisted on, and comp. Thomson, *Land and Book*, i, 48 sq.; 2 Kings, i, 2; comp. Mishna, *Moed Katan*, i, 10; Michaelis, *Mos. R. i.* iv, 356). Anciently only buildings intended for display had raised roofs; such as temples (Cicero,

Ancient Egyptian Roof.

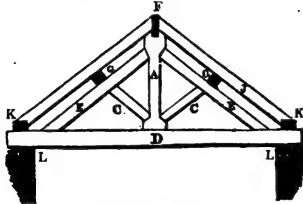

Orat. iii, 26; Philo, ii, 43; Sueton. *Claud.* xvii). So the Temple in Jerusalem, we are told by Jewish writers, was arched or vaulted, so that no one should repair thither for the same purposes as to the roofs of the houses (comp. also Jerome, *Ad Suniam et Fretel.* p. 661). In the East the roof consists usually of a water-proof tiling (Mariti, *Trav.* p. 246 sq.; Tavernier, *Voyage*, i, 168) or of stones (Vitruv. ii, 1, 5; Schweigger, *Reis.* p. 263), and is raised a little at one side or in the middle to shed water (Pliny, xxxvi, 62; Burckhardt, *Arab.* p. 152). Pipes are also used to convey the water into cisterns (see Maimon. *ad Middoth*, vi, 6). A kind of weak, perishable grass commonly grew up between the tiles (Psa. cxxix, 6; 2 Kings xix, 26; Isa. xxxvii, 27; see Shaw, *Trav.* p. 210). The roof of Dagon's temple (Judg. xvi, 27) is said to have been crowded with 3000 persons to behold Samson's feats; but this can hardly mean the top of the temple, because the persons thereon could not see what was passing within. It appears rather to have been a loft or gallery running around the top of the building inside, and supported by pillars with two main posts, in the middle of the temple. A very usual kind of roof is constructed in the following manner: The beams are placed about three feet apart; across these sticks are arranged close together, and thickly matted thorn-bush; over this is spread a coat of thick mortar, and lastly the marl or earth, which covers the whole. A large stone roller is kept on the top of the house for the purpose of hardening and flattening the layer of earth, to prevent the rain from penetrating. Roofs, however, are often of a very inferior description to this. They are at times composed of the palm-leaf, and in other cases are made of cornstalks or brushwood, spread over with gravel (Robinson, *Biblical Res.* i, 243; ii, 279), or of reeds and heather with a layer of beaten earth (Hartley, *Researches in Greece*, p. 240). The roofs of the great halls in Egypt are covered with flagstones of enormous size. Parapets are uniformly placed around the roof, for the purpose of guarding against acci-

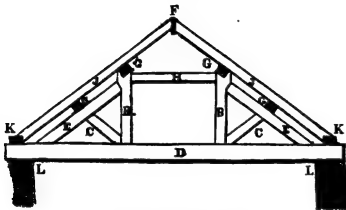

Ancient Egyptian House, having a terrace and roof supported by columns.

dent by falling (Wilkinson, *Anc. Egypt.* ii, 122). The roof was much used by the Hebrews, as it still is in Eastern nations. It was often resorted to to get fresh air, by convalescents and others (2 Sam. xi, 2; Dan. iv, 26; comp. Buckingham, *Mesop.* p. 70; Thomson, *Land and Book*, i, 49 sq. See Thilo, *Cod. Apocryph.* i, 120, 297, where it is a playground for children). In summer the people slept there (1 Sam. ix, 26; comp. Tavernier, i, 168; Buckingham, *Mesop.* p. 336; Rosenmüller, *Morgenl.* iii, 85; Morier, *Second Journey*, p. 280; Robinson, iii, 242). It was sought as a place for quiet conversation (1 Sam. ix, 25), for undisturbed lamentation (Isa. xv, 3; Jer. xlviii, 38), for building "booths" (q. v., Neh. viii, 16), and for various religious actions (2 Kings xxiii, 12; Jer. xix, 13; Zeph. i, 5; Acts x, 9), perhaps with the feeling of being raised nearer to heaven and to God. Acts of a public nature were transacted there (2 Sam. xvi, 22), and announcements made (Matt. x, 27; Luke xii, 3; comp. Josephus, *War*, ii, 21, 5; Talm. Babyl. *Shab.* fol. 35, 2; comp. Lucian, *Ver. Hist.* ii, 46). Nor is this inconsistent with its use for secret interviews, before named, as these took place when neighbors were supposed to be occupied; yet the "upper chamber" (q. v.) was certainly more commonly sought for. Again, the roof was a lookout over the street (Judg. xvi, 27; Isa. xxii, 1; comp. Shaw, *Trav.* p. 190), a place for exposing clothes and household stuff to the air (Josh. ii, 6; comp. Mishna, *Toroth*, ix, 6; *Mikvaoth*, ii, 7; *Machshir*, vi, 2; *Mauser*, i, 6, 3; *Megilla*, iii, 3; *Menach*, viii, 4); a commanding position for defence against attacks from below (Judg. ix, 51; 2 Macc. v, 12; comp. Josephus, *Ant.* xiv, 15, 12; *War*, iv, 1, 4; Schweigger, *Reis.* p. 263). But a constant residence on the roof, in loneliness and exposure, is a forcible image of a sorrowful life (Prov. xxi, 9; comp. xxv, 24). It was usual to have two flights of steps to ascend to the roof; one within the house and one in the street. It was easy, too, to climb over the railing of the roof and thus pass from that of one house to its neighbor; or from house to house along a whole street (Matt. xxiv, 17; Mark xiii, 15; Luke xvii, 31; comp. Flamin, *Reisebesch.* p. 10; Russel, *Aleppo*, i, 45; Josephus, *Ant.* xiii, 5, 3; Mishna, *Baba Metsia*, fol. 88, 1; Barhebr. *Chron.* p. 170). Thus, too, it was easy to pass down from the roof into a house (see Lightfoot, *Hor. Heb.* p. 601). The passage Mark ii, 4 is most naturally explained by supposing Jesus to have been in the chamber immediately under the roof. The people took up the floor of the roof (comp. Josephus, *Ant.* xiv, 15, 12) and let down the sick man (Strauss, *Leb. Jes.* ii, 61, supposes the usual mode of access from the roof to the upper chamber to be used, which contradicts Mark). This is the meaning of Luke in the parallel passage, v, 19. If we understand the *midst* (τὸ μέσον) to mean the court of the house, then the *tiling* (κίρατοι), as our version has it, or rather *bricks*, must mean the guard wall around the roof (Faber, *Archæol.* i, 419), or the cornice (Hüst, *Nachr. v. Maroe*, p. 264). But it is doubtful whether the latter was common in Palestine; and the expression *into the midst* (comp. Luke iv, 35; Mark iii, 3; xiv, 60; John xx, 19) does not admit the above interpretation (Shaw, *Trav.* p. 186 sq., gives an explanation which does not suit the passage). A literal taking-up of the roof, however, would be but a trifling matter, and would involve no injury to the building, if it were like the modern Arab houses in that vicinity. They are very low, and the roof is formed chiefly of twigs and earth, on beams some three feet apart. It is very common to remove part of this to let down goods, etc. (see Thomson, *Land and Book*, ii, 6 sq.); the Talm. Babl. *Moed Katan*, xxv, 1, says, when R. Huna died, his bier could not pass the door, and it was thought best to let it down through the roof. See Mill, *Diss. de Edificio Hebr. Tectis*, in Oelrich's *Coll. Opusc. Hist. Phil. Theol.* I, ii, 573 sq.; Bat-tus, *Diss. de Tectis Hebr. Retectis* (Viteb. 1696); Faber, *Archæol.* i, 417 sq.; Hackett, *Illustr. of Script.* p. 70, 71, 72, and on Prov. xxvii, 15, p. 85. See HOUSETOP.

ROOF, in architecture, is the external covering on the top of a building; sometimes of stone, but usually of wood overlaid with slates, tiles, lead, etc. The form and construction of the timber-work of roofs differ materially according to the nature of the building on which it is to be placed, and any attempt to notice all the varieties would far exceed the limits of this work. The main portions of the framing, which in most cases are placed at regular intervals, are each called a *truss*, *principal*, or *pair of principals*. These, in ornamental open roofs, are the leading features, and in some ancient roofs are contrived with an especial view to appearance. The accompanying diagrams of two of the simplest kinds

King-post Roof.

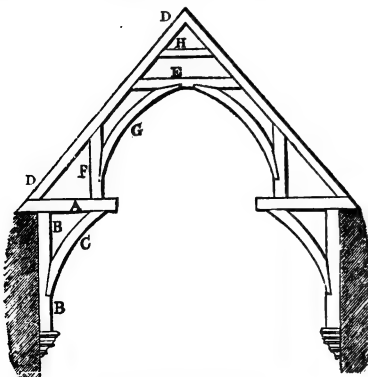

Queen-post Roof.

- | | |
|---|------------------------|
| A, king-post. | F F, ridge-pieces. |
| B B, queen-posts. | G G G G G, purlins. |

| D D, tie-beams. | J J J, common rafters. |
| E E E, principal rafters, blades, or backs. | K K K, pole-plates. |
| | L L L, wall-plates. |

of modern roofs will serve to explain the names of the most important timbers: a *king-post* roof has one vertical post in each truss, a *queen-post* roof has two.

Mediæval roofs vary so much in their structure, on account of the ornamental disposition of the pieces, that it is not easy to establish a universal nomenclature for them. Many names of beams and timbers occur in old contracts of which the original application is often uncertain.

The *Hammer-beam* roofs contain most of the peculiarities of structure that distinguish the mediæval roofs from the modern roofs, and the following nomenclature may be adopted in describing them: Sometimes one hammer-beam is repeated over another, forming, as it

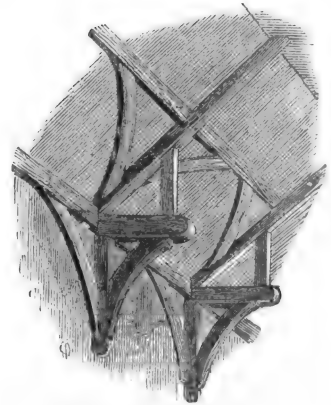

Hammer-beam Roof.

| B B, pendant-post. | F, side-post. |
| C, hammer-brace. | G, collar-brace. |
| D D, rafter. | H, upper collar. |

were, two stories. It is then called a *double hammer-beam* roof, and the nomenclature runs: *lower hammer-beam*, *upper hammer-beam*, *lower hammer-brace*, *upper hammer-brace*, *lower side-post*, *upper side-post*, etc.

It must be remembered that all upright pieces may be called *posts*, with an epithet, if necessary, e. g. *Pendant-post*. Inclined pieces, if not *rafters*, are *braces*, and commonly derive their epithet from the piece under which they are placed, or which they principally stiffen, as *collar-brace*. *Ashlar pieces* are fixed to every one of the rafters in most mediæval roofs, but they are sometimes concealed by cornice-mouldings and frieze-boards. The example from Dorchester shows the hammer-beam construction with collar-brace, side-post, etc.

Hammer-beam Roof, North Aisle, Dorchester, Oxfordshire.

Of the construction of the wooden roofs of the *Ancients* very little is known, but it was probably of the most inartificial kind, and judging from the form of their pediments, the pitch of them was low. Some small buildings still retain their original roofs of marble, as the Tower of the Winds, and the Choragic Monument of Lysicrates at Athens. The Mausoleum of Theodoric at Ravenna has a domed roof, formed of a single block of stone, nearly thirty-six feet in diameter.

Saxon roofs were elevated, but to what degree we have no certain account; neither is there satisfactory evidence of their internal appearance. The illuminations in manuscripts seem to represent them as often covered with slates, tiles, or shingles.

Norman roofs were also raised, in some cases to a very steep pitch; but in others the elevation was more moderate, the ridge being formed at about a right angle. It does not appear that at this period the construction was made ornamental, although, doubtless, in many cases the framing was open to view. The covering was certainly sometimes of lead, but was probably oftener of a less costly material.

Early English roofs were generally, if not always, made with a steep slope, though not universally of the same pitch. Sometimes the section of the roof represented an equilateral triangle, and sometimes the proportions were flatter. A few roofs of this date still exist, as on the nave of Hales Owen Church, Shropshire: this originally had tie-beams across it, and under every rafter additional pieces of timber are fixed, which are cut circular, so that the general appearance is that of a series of parallel ribs forming a barrel-vault. This seems to have been a common mode of improving the appearance of roofs in this style before any important ornaments were applied to them. The additional pieces under the rafters were usually either quite plain or only chamfered on the edges. A moulded rib sometimes ran along the top, and a cornice next the wall-plate, both of which were generally small. The tie-beams also were frequently moulded.

When first the approach of the *Decorated* style be-

gan to exercise an influence, the roofs, though still of the same construction, became somewhat more ornamental. There are also roofs existing of this date, and some probably earlier, in country churches, the insides of which are formed into a series of flat spaces, or cants. They are usually quite plain, with the exception of the tie-beam and cornice, which are frequently moulded, and the king-post, which is commonly octagonal, with a moulded capital or base. Of a later period, roofs of this kind are extremely common in some districts, but they are generally to be distinguished from the earlier specimens by being arranged in seven cants instead of six. Of the older description good examples remain at Chartham Church, Kent, and on the south aisle of Merrow Church, Surrey. Most of these roofs are now ceiled, but probably many of them were originally open.

As the Decorated style advanced, the leading timbers of the principals were often formed into an arch by the addition of circular braces under the tie-beams, the beams themselves being also frequently curved. The spandrels formed by these braces were very usually filled with pierced tracery, and the timbers generally were more moulded and enriched than in the earlier styles. Where the lines of mouldings were interrupted, they very commonly terminated in carved leaves or other ornaments.

South Aisle, Kidlington, Oxfordshire.

Sometimes the tie-beams were omitted in roofs of high pitch, but the principals were generally arched. The roofs of domestic halls, in the Decorated style, appear to have been more enriched than those of churches: that of Malvern Priory had a variety of cross-braces above the tie-beams cut into ornamental featherings; that of the archbishop of Canterbury's palace at Mayfield, Sussex, was supported on stone arches spanning the whole breadth of the room (about forty feet). This kind of construction is also partially used in the hall at the Mote, Ightham, Kent. This kind of construction, a wooden roof supported on stone arches instead of the large timbers necessary for the principals, seems to have been more common than is generally supposed, and at all periods.

In the *Perpendicular* style hammer-beam roofs were introduced (one of the finest specimens of which is that on Westminster Hall), and, together with them, most numerous varieties of construction for the sake of ornament. These are far too manifold to be enumerated; many specimens exist in churches and halls, some of which are extremely magnificent, and are enriched with tracery, featherings, pendants, and carvings of various kinds, in the greatest profusion. Many roofs in this style were nearly or quite flat; these, when plain, had the timbers often exposed to view, and moulded; in other cases they were ceiled with oak and formed into panels, and were usually enriched with bosses and other ornaments of similar description to those of the higher roofs; good examples remain at Cirencester Church, Gloucestershire. On halls hammer-beam roofs were principally used, but on churches other kinds of construction were more prevalent. There are some mediæval buildings, principally vestries, apses, and portions of churches, which are entirely roofed with stone. They are generally of high elevation, and often have ribs answering to the rafters in a wooden roof. They occur at all periods, and in some cases may have been erected for protection

against fire; in other cases, when the material was suitable, perhaps from economy.

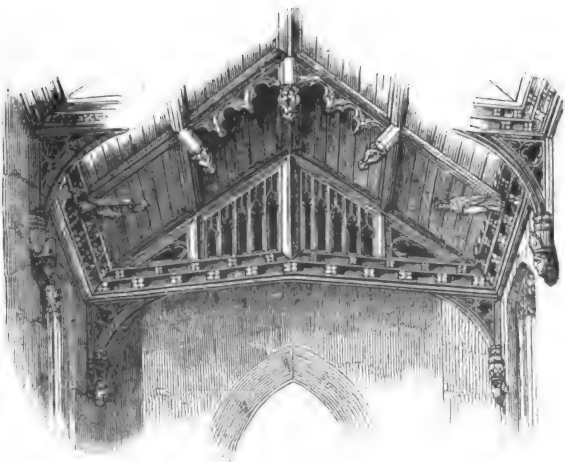

The name of roof is often applied to what are, in fact, ceilings having an external covering, or outer roof, distinct from that which is seen. Vaulted roofs are also frequently spoken of, but a vault usually has an outer roof over it, and is more properly a vaulted ceiling. See Parker, *Gloss. of Architect.* s. v.; *Chambers's Encyclop.* s. v.; Walcott, *Sac. Archaeol.* s. v.

Room is employed in the A. V. as the equivalent of no less than four Heb. and eight Greek terms. The only one of these, however, which need be noticed here is *πρωτοκλισία* (Matt. xxiii, 6; Mark xii, 39; Luke xiv, 7, 8; xx, 46), which signifies, not a "room" in the sense we commonly attach to it of a chamber, but the highest place on the highest couch round the dinner or supper table—the "uppermost seat," as it is more accurately rendered in Luke xi, 43. See MEAL. The word "seat" is, however, generally appropriated by our translators to *καθίδρα*, which seems to mean some kind of official chair. In Luke xiv, 9, 10, they have rendered *τόπος* by both "place" and "room." See also UPPER ROOM.

The convenience of dividing habitations into separate apartments early suggested itself. We read of various kinds of rooms in Scripture—bedchamber, inner chamber, upper chamber, bride-chamber, guest-chamber, guard-chamber, of the king's house. In early times the females and children of the family slept in one room, on separate beds, and the males in another. See CHAMBER.

Roos, Johann Friedrich, only son of the following, was born in 1759, and died in 1828, at Marbach, where he had held the position of dean. He wrote a *History of the Reformation* and a *Church History*, neither of which was based on original sources, and both of which have been superseded by more modern works. See Herzog, *Real-Encyklop.* s. v.

Roos, Magnus Friedrich, the last of the series of clergymen in Württemberg who during the 18th century promoted the independent development of Pietism (q. v.), and exercised an important influence over the clergy and churches of Württemberg against the rationalistic and other movements of North Germany. He was born at Sulz-on-the-Neckar, Sept. 6, 1727, passed through the schools of Württemberg in regular course, and in 1749 became vicar at Owen. After filling various ministerial stations in Tübingen, Stuttgart, etc., he was made pastor at Lustnau, near Tübingen, in 1767, where he was brought into contact with the notabilities and students of the university, and sought to benefit the latter by the delivery of private lectures on Biblical

St. Mary's, Devizes, Wilts, cir. 1450.

theology. In 1784 he was appointed to the prelature of Anhausen, which gave him a seat in the district government, and in 1787 he was promoted to a place in the national diet, which diverted his attention largely towards political affairs. He preached his last sermon to his people on Christmas-day, 1802, and died March 19, 1803.

Roos was emphatically a man of one book—the Bible. He was not the representative of any scientific idea in theology, nor a rhetorician who attached importance to the elegancies of style. His theology was contained in the sentences of the Bible, so that nothing is left for the theologian to perform beyond condensing what is there expanded, collecting what is scattered, and converting the whole directly into faith and life. As a dogmatist he simply brought together the doctrines of Scripture, holding that they require no elaboration in order to appear as a faultless whole. As an expositor and polemic he displayed an utter incapacity to appreciate difficulties, and accepted all the statements of the Bible with unquestioning faith; and in that one of his works which partakes most largely of a scientific character, the *Fundamenta Psychologiæ Sacræ* (Tubingen, 1769; Stuttgart, 1857), he simply gathered from the Scriptures every passage in which a psychological term occurs, and given the specific and general meaning of the terms and phrases so obtained. He held that the truth was fully and appropriately given in the Bible, and therefore did not attempt a thorough system of psychology. He also gave attention to the times in which he lived and to the impending future, taking the Apocalypse for his guide and following the interpretations of Bengel (q. v.), though without accepting the dates of that scholar for the end of the world (e. g. 1836), and without placing implicit reliance on the results of his investigations.

The writings of Roos were very numerous, and have no importance for our times. The principal ones are the *Fundam. Psychol. Sacr.*, already cited:—a devotional manual entitled *Hausbuch* (1790, 2d ed.), which was largely used, and a practical work entitled *Christliche Gedanken v. d. Verschiedenheit und Einigkeit d. Kinder Gottes* (1st ed. 1764; new [3d] ed. 1850).

Roosevelt, JAMES HENRY, Hon., a distinguished philanthropist, was born in New York city, Nov. 10, 1800. He was a descendant of the well-known and wide-spread family of that name. His father, James C. Roosevelt, was an attorney of the New York bar, educated at Columbia College. James Henry was left a large property by his father, and in early life manifested his benevolence by taking an interest in charitable institutions, particularly the Leake and Watts Orphan Asylum, of which he was for twenty-three years the treasurer. He never married, and lived a quiet and frugal life. As his natural heirs were wealthy and did not need his property, he determined on devoting it to benevolent objects. In March, 1854, he made his will, and after certain bequests, gave the residue of his estate to five incorporations in the city of New York, known as the Society of the New York Hospital, the College of Physicians and Surgeons, the New York Eye Infirmary, the Demilt Dispensary, and the New York Institution for the Blind. It also provided for the establishment in the city of New York of a hospital for the reception and relief of sick and diseased persons, and for its permanent endowment. The charity was to extend to all sick, without limit or restriction of any kind, and without distinction as to race, sex, color, or religion. The hospital, which occupies an entire block between Ninth and Tenth avenues, was in due time erected, and was formally opened Nov. 2, 1871. The generous founder died Nov. 30, 1863. He was "a man upright in his aims, simple in his habits, sublime in his benefaction." (W. P. S.)

Root (רֹשֶׁת, *shôresh*, *ρίζα*), that part of a plant which extends downwards and fastens itself in the earth. The rocky ground of Palestine is in some places

covered with a very thin soil, so that the plants growing in these spots cannot strike deep roots, and are therefore easily uprooted by the winds or withered by the scorching sun—a circumstance to which a beautiful allusion is made in the parable of the sower (Matt. xiii, 21). The root of a family is the progenitor from whom the race derives its name; thus, "Out of the serpent's root shall come forth a cockatrice" (Isa. xiv, 29), meaning Hezekiah, who was descended from David, and was, like him, a scourge to the oppressors of Israel. The word is used in this sense in a very remarkable prophecy, "And in that day there shall be a root of Jesse, which shall stand for an ensign of the people; to it shall the Gentiles seek, and his rest shall be glorious" (xi, 10). The Messiah, elsewhere called "the branch," is here described as "the root," for though David's son in his human character, yet in his divine capacity he is David's "root," as being his Lord and God. A similar passage occurs in Revelation, "The lion of the tribe of Judah, the root of David, hath prevailed" (v, 5). So "covenantness is the root of all evil" (1 Tim. vi, 10); that is, the origin, the cause, the occasion; "Lest any root of bitterness trouble you" (Heb. xii, 15). In Job xix, 28, "root of the matter" signifies a *ground* or *cause* of controversy. The root may also denote the race, the posterity: Prov. xii, 3, "The root of the righteous shall not be moved," i. e. shall not fail; Jer. xii, 2, "Whence do the wicked prosper in all things? thou hast planted them, and they have taken root." In Daniel and in the Maccabees, Antiochus Epiphanes, the persecutor of the Jews, is represented as a young sprout or sucker, or root of iniquity, proceeding from the kings, the successors of Alexander the Great. Jesus Christ, in his humiliation, is described as a root ill nourished, growing in a dry and barren soil (Isa. liii, 2). In the contrary sense, Paul says (Rom. xi, 16-18) that the Jews are, as it were, the root that bears the tree into which the Gentiles are grafted; and that the patriarchs are the pure and holy root of which the Jews are, as it were, the branches. Jesus Christ is the root on which Christians depend, and from which they derive life and subsistence (Col. ii, 7).

ROOT, a name sometimes found in the inventories of English church furniture, by which were designated richly embroidered *copes* that had the "stem of Jesse" and the genealogy of our Lord figured upon them.

Root, HENRY, a Presbyterian minister, was born in Canaan, Columbia Co., N. Y., July 17, 1813. He graduated at Williams College, Mass., studied theology at Auburn Seminary, N. Y., and was licensed by Cayuga Presbytery. After graduating he removed to Michigan, where he was ordained in 1835, and was stated supply for Dexter and Howell churches. Subsequently he preached for Granville, Portland, and Bunker Hill churches. He was connected with the American Home Missionary Society, and was one of their most successful missionaries. He died at Feltz, April 5, 1860. Mr. Root was a powerful preacher, and in building up churches in the faith he had no superior. See Wilson, *Presb. Hist. Almanac*, 1861, p. 163. (J. L. S.)

Ropes, TIMOTHY PICKERING, a Baptist minister, was born in Oxford, N. H., Sept. 13, 1802, and was graduated at Waterville College in the class of 1827. He was ordained as an evangelist Aug. 13, 1828, and became pastor of the Baptist Church at Hampton Falls in July, 1829. He was afterwards pastor of the churches in Weston and Lexington, Mass., and for several years was engaged in teaching in different places. He went West in 1854, and for ten years was pastor of the Baptist Church in Le Roy, Minn., where he died, July 3, 1873. (J. C. S.)

Roque, Sr., a popular saint of the Roman Catholic Church in France, who is considered the special patron of those sick of the plague. Few particulars of his history have been preserved. He was born of a noble family in Montpellier, at the end of the 13th or

early in the 14th century; and having undertaken a pilgrimage to Rome, was surprised on his way through Italy by an outbreak of the plague at Piacenza. He labored with generous zeal for the victims, fell sick, was abandoned by men, but a dog licked his sores. He recovered his health, returned to France, and after a life of great sanctity died at Montpellier, probably in 1327.

Roquelaure, JEAN ARMAND DE BESSUEJOULS, Count of, a French prelate, was born at Roquelaure in 1721. Of a noble family, he entered the Church when quite young, was doctor of theology at the age of twenty-six, and vicar-general of Arras when, in 1754, he received the bishopric of Senlis. In 1764 he was first almoner of the king, in 1767 councillor of state, in 1768 abbé of St. Germer, and in 1771 member of the French Academy. He was one of the few bishops who remained in France after the civil oath was required, but did not yield to the constitution of 1790. During the Reign of Terror he retired to Arras. He resigned his see of Senlis, but was in 1802 made archbishop of Malines. In 1808 he received a canonry in St. Denis, and spent the remainder of his life in Paris. He died of old age, April 23, 1818. His writings are, *Oraison Funèbre de la Reine d'Espagne* (Paris, 1761):—*Oraison Funèbre de Louis XV* (ibid. 1774):—*Mandements*, and *Lettres* to the clergy.

Roques, PIERRE, a Protestant French theologian, was born at La Canne, July 22, 1685. His parents were obliged to leave France on account of their faith, and Roques was educated in Switzerland, at Geneva and Lausanne. He was ordained in 1709, and in 1710 became pastor of the Protestant French Church at Basle, where he died, April 13, 1748. His principal writings are, *Le Pasteur Évangélique* (Basle, 1723), transl. into German (Halle, 1741-44):—*Éléments des Vérités Historiques*, etc. (Basle, 1726):—*Lettres à un Protestant de France* etc. (Lausanne, 1730-35):—*Les Devoirs des Sujets* (Basle, 1727):—*Sermons sur Divers Sujets de Morale* (ibid. 1730), transl. into German (Halle, 1731):—*Le Vrai Piétisme* (Basle, 1731):—*Traité des Tribunaux de Judicature* (ibid. 1738). Besides these are scattered pieces in several works, an edition of the *Dictionnaire* of Moréri (ibid. 1731-45), and one of *Martin's Bible* (ibid. 1736). He continued with Beausobre the *Sermons* of Saurin, and revised the French translation of Hübner's *Geographie* (ibid. 1747). See Frey, *Vie de P. Roques*; Haag, *La France Protestante*.

Roquette, GABRIEL DE, a French prelate, was born at Toulouse in 1632. After finishing his studies he went to Paris, where he soon obtained ecclesiastical preferment, became abbé of Grandseigne, prior of Charlieu and of St. Denis de Vaux, vicar-general of Armand, and abbé of Cluny. In 1666 he was made bishop of Autun, and in 1669 founded the Hospital of St. Gabriel in that place. He resigned his see in 1702 in favor of his nephew, Bertrand de Senaux. He died at Autun, Feb. 23, 1707. Roquette was an ambitious man, a slave of the Jesuits, and devoted to the interests of cardinal Mazarin. He left a work entitled *Ordonnances pour le Rétablissement de la Discipline Ecclésiastique* (Autun, 1669-74), and an *Oraison Funèbre d'Anne-Marie Martinozzi, Princesse de Conti* (Paris, 1674).

Rosa, St. See ROSA OF LIMA.

Rosa OF LIMA, the most noted of Peruvian saints, was a beautiful virgin, born in 1586 at Lima, who early displayed great fortitude in the enduring of physical pain, and manifested a strong inclination towards an ascetic life. Her parents permitted her to become a Dominican nun; but having entered a church to pray while on her way to the convent, she found herself unable to proceed farther, and consequently became a hermit, living in a cell which she built in the

garden belonging to her parents. She inflicted cruel bodily mortifications on herself, and died in 1617. She was buried in the Dominican church, and was canonized in 1671. She ranks as the patroness of the state, and is annually commemorated, with great solemnity and pomp, on Aug. 26. See *Acta SS.* for Aug. 26.

Rosa OF VITERBO, a hermit attached to the order of Franciscans, though without having been formally received. She occupied a cell in the house of her parents, and was accustomed to preach repentance, standing with crucifix in hand in the public streets. She was temporarily banished from Viterbo, but eventually recalled and received with enthusiasm. She died in A.D. 1252, aged about eighteen. See *Acta SS.* for Sept. 4.

Rosa, SALVATOR, an Italian painter, was born at Aranella, near Naples, June 20, 1615. He was brought up under Francisco Francanzano, but was obliged to get his living by selling his pictures upon the street. After his father's death, he went with Ribera to Rome, at which city he remained four years, when cardinal Brancacci carried him to Viterbo, where he painted several pieces. He afterwards went with Prince John Charles of Medici to Florence, and stayed nine years in this city. He finally fixed his residence at Rome, where he died, March 15, 1673. Among his most celebrated works are, the *Catiline Conspiracy*:—*Saul and the Witch of Endor*:—*Attilus Regulus*, and altar-pieces. He was also a good composer of music. See lady Morgan, *Life and Times of Salvator* (Lond. 1824, 2 vols.); Cantu, *Salvator Rosa* (Milan, 1844); Reynolds [Sir Joshua], *Works*.

Rosalia, St., the greatest of Sicilian saints, is said to have died between 1160 and 1180. Her father was the count Sinibald of Quisquina and Rosis, and was descended from the ancient kings of Sicily. She lived for a time on Mount Quisquina in the character of a hermit, but afterwards on Mount Pellegrino, near Palermo. It is alleged that her body was found in 1624, together with an inscription on Mount Quisquina narrating her descent and sojourn in an adjoining cave. A pestilence ceased to prevail at the time her body was found, and this fact was attributed to her intercessions, which may account for the veneration she receives. Her day is Sept. 4, and is observed with much pomp in Palermo, one of the features being a procession in which a colossal statue of the saint is carried about. See *Acta SS.* for Sept. 4.

Rosario, JEROME, an Italian ecclesiastic and writer, was born at Pordenone in 1485. He was nuncio from pope Clement VII to Hungary, and died in 1556. He wrote a curious treatise—*Quod Animalia Bruta sæpe Ratione utantur melius Homine* ("That brutes often reason better than man" [1648]).

Rosary (*Rosarium*). This is a Roman Catholic instrument, composed of a number of larger and smaller beads strung on a cord, which serves among Romanists to aid in the repeating of a definite number of Pater-nosters and Ave-Marias. In its wider meaning the word denotes the worship in which the rosary is employed. The custom of repeating the Lord's Prayer a number of times originated among the early hermits and monks, and it is stated by Palladius (*Λαυσιακά*, cap. 35) and Sozomen (*Hist.* vi, 29) that the abbot Paul of the desert of Pherme repeated the Pater-noster 300 times, and at each repetition dropped a small stone into his lap. The Hail-Mary was added in the 11th century, but did not attain its completed form until the 16th. A combination of the Lord's Prayer with the Credo and the angelical greeting in this worship occurs as early as 1196 in the *Statuta Communia* of bishop Odo of Paris.

The rosary is accordingly of modern origin, and all opinions which assign to it a high antiquity are false. Some modern inquirers hold that it was brought from

the East by returning Crusaders, since it is found among Mohammedans and Brahmans also; but it would seem to have had an independent origin in the West as well. It was first used by the Dominican monks, though it is by no means certain that it was introduced by St. Dominic himself.

As many as twenty forms of rosary devotions have been enumerated by Schulting in his *Bibl. Eccles.* I, iii, 205. The more familiarly known are as follows:

1. The complete (or Dominican) rosary, consisting of fifteen decades of small Mary-beads, alternating with fifteen Pater-noster beads, so that ten Hail-Marys are said after each Lord's Prayer. This rosary is accordingly called the *Psalterium Mariae*.

2. The ordinary rosary (*rosarium*) has five decades of Mary-beads and five Pater-noster beads, in all fifty-five beads. Three repetitions equal rosary No. 1.

3. The intermediate rosary has sixty-three Mary-beads and seven Pater-noster beads, denoting the sixty-three years of life which the legend assigns to the Virgin. The Franciscans repeat seventy-two Hail-Marys, because they believe that the Virgin lived seventy-two years.

4. The smaller rosary has three decades of Mary-beads and three Pater-noster beads, signifying the years of Christ's life on earth.

5. The angelical rosary is similar to No. 4, but requires a single recital of the Hail-Mary with each decade, and for each of the nine remaining beads the *Sanctus* ("Sanctus, Sanctus, Sanctus Dominus Deus Sabaoth! Pleni sunt coeli et terra gloria tua, Hosanna in excelsis! Benedictus qui venit in nomine Domini, Hosanna in excelsis!") with the lesser doxology ("Gloria Patri et Filio et Spiritui Sancto!").

6. The crown (*capellaria, corona*) has thirty-three Pater-noster beads, indicative of the years of Christ's earthly life, and five Mary-beads to denote the number of his wounds. A rosary composed of twelve Ave-Marias and three Pater-nosters has also been termed the *crown* in recent times (Binterim, *Denkw.* VII, i, 105).

The *Officium Laicorum* is composed only of Pater-nosters, and cannot therefore be reckoned among the rosaries.

The devotion begins with the sign of the cross, after which the worshipper grasps the cross depending from the cord, repeats the Apostles' Creed, and prays the Lord's Prayer with three Hail-Marys. A corresponding form serves as the conclusion. With the Dominican rosary is connected the contemplation of the so-called mysteries, according to which the rosary is characterized as *joyful, sorrowful, or glorious*. The *joyful* rosary embraces the five mysteries of—

1. The annunciation of our Lady when the Son of God was conceived.
2. The visitation of Elisabeth.
3. The nativity of our Lord Jesus Christ.
4. The presentation of our Lord in the Temple.
5. The finding of our Lord in the Temple among the doctors.

The *sorrowful* rosary embraces—

1. The prayer of our Lord in the garden.
2. The whipping him at the pillar.
3. The crowning him with a crown of thorns.
4. His carrying of the cross to Mount Calvary.
5. His crucifixion and death on the cross.

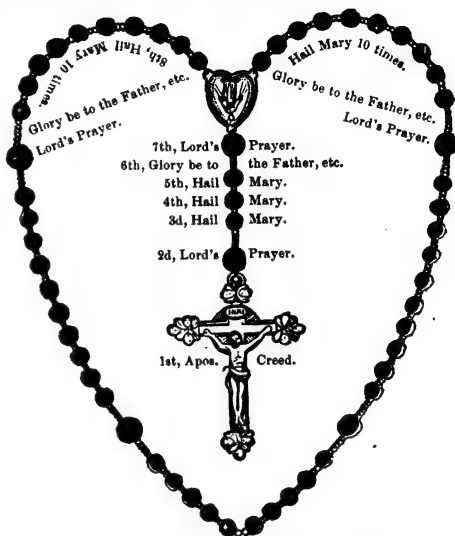

The *glorious* rosary contains—

1. The resurrection of our Lord.
2. His ascension into heaven.
3. The coming of the Holy Ghost.
4. The assumption of the Blessed Virgin.
5. Her coronation above all angels and saints.

Each of these fifteen mysteries is appended to the words "Jesus Christ" in the Ave-Maria, and is thus repeated ten times.

The rosary of the Blessed Virgin Mary is altogether the most popular form of devotion among Roman Catholics. It has been strongly recommended by many popes, who have granted great indulgences to those that practice it. The five Joyful Mysteries are

said on Mondays and Thursdays through the year, and daily from the first Sunday in Advent to the Feast of the Purification. The five Sorrowful Mysteries are said on Thursdays and Fridays through the year, and daily from Ash-Wednesday to Easter-Sunday. The five Glorious Mysteries are said on ordinary Sundays and Wednesdays and Saturdays through the year, and daily from Easter-Sunday to Trinity-Sunday. The manner of saying the rosary on the beads may be understood by the accompanying cut, with the following directions (see Barnum, *Romanism*, p. 486):

Catholic writers: as derived from *Rosa mystica*, an ecclesiastical predicate of the Virgin; from St. Rosalia, who is represented with a wreath formed of gold and roses; from the fact that the beads are made of rose-wood, etc. Steitz (in Herzog, *Real-Encyclop.* s. v.) suggests that it may be derived from a *rose-garden* (*rosarium*), after the manner in which devotional manuals were in the Middle Ages termed *Hortulus Animæ*.

ROSARY, BROTHERS OF THE. The troubles which came upon Europe in the 14th and 15th centuries led to the forming of pious associations which sought to secure the averting of such evils by means of prayer to God; and the brotherhoods of the rosary were among the earliest of these unions. Pope Leo's bull *Pastoris Æterni*, of Oct. 6, 1520, shows that they had then become old. The popes Sixtus IV, Innocent VIII, and Clement VII conferred on them valuable exemptions, which were confirmed by Sixtus V. The Brothers of the Rosary displayed great zeal during the contests of Western Europe with the Turks, and aided the warriors with their prayers; and after the victory of Lepanto they instituted processions in honor of the Virgin Mary. The festival instituted by Pius V in commemoration of that victory was consequently called "the Feast of the Rosary."

A modern organization called "the Living Rosary" consists of unions of fifteen persons each, who severally pray the decades of the rosary which have been assigned to them respectively.

ROSARY, CEREMONY OF THE, a ceremony practiced among the Mohammedans on special occasions, called in the Arabic *Sohbat*, and usually performed on the night succeeding a burial. The soul is then supposed to remain in the body, after which it departs to Hades, there to await its final doom. The ceremony is thus described: "At night fifts, sometimes as many as fifty, assemble, and one brings a rosary of 1000 beads, each as large as a pigeon's egg. They begin with the 67th chapter of the Koran, then say three times, 'God is one,' then recite the last chapter but one and the first, and then say three times, 'O God, favor the most excellent and most happy of thy creatures, our lord Mohammed, and his family and companions, and preserve them.' To this they add, 'All who commemorate thee are the mindful, and those who omit commemorating thee are the negligent.' They next repeat 3000 times, 'There is no God but God,' one holding the rosary and counting each repetition. After each thousand they sometimes rest, and take coffee; then 100 times, '(I extol) the perfection of God with his praise;' then the same number of times, 'I beg forgiveness of God the great;' after which fifty times, 'The perfection of the Lord, the Eternal;' then, 'The perfection of the Lord, the Lord of might,' etc. (Koran, ch. xxxvii, last three verses). Two or three then recite three or four more verses. This done, one asks his companions, 'Have ye transferred (the merit of) what ye have recited to the soul of the deceased?' They reply, 'We have;' and add, 'Peace be on the apostles.' This concludes the ceremony, which, in the houses of the rich, is repeated the second and third nights." See Macbride, *Mohammedan Religion Explained*; Gardner, *Faiths of the World*, s. v.

ROSARY, FRATERNITY OF THE. See ROSARY, BROTHERS OF THE.

Rosbrugh, JOHN, a Presbyterian minister, was born in Ireland in 1717, emigrated to the United States in 1735, and graduated at the College of New Jersey in 1761. He studied theology under the Rev. John Blair, then of Fagg's Manor, and was taken on trial by the New Brunswick Presbytery May 22, 1762. He was licensed to preach Aug. 18, 1763, and was ordained at Greenwich, N. J., Dec. 11, 1764, having charge of Mansfield, Greenwich, and Oxford. He was dismissed from the three congregations April 18, 1769, and on the same day was called to the Forks of Delaware (now Allentown and Mount Bethel). He was installed pastor of these con-

gregations Oct. 28, 1772, and continued such until his death, in January, 1777, at the hands of the Hessians, near Trenton. See Sprague, *Annals of the Amer. Pulpit*, iii, 254.

Roscelin (also ROCELIN, RUCELIN, or RUZELIN), JEAN, a scholastic theologian of the 11th century, who ranks in the common estimation as the originator of the Nominalist theory in philosophy and as a Tritheist in theology. The circumstances of his life are shrouded in obscurity, however, and the particular views he advocated are not well determined. His place in history was achieved chiefly through controversies with Anselm and Abelard (see the respective articles) in which he became engaged. He first attracted attention by expressing opinions concerning the Trinity which were deemed heretical, at a time when he was canon at Compiègne. As he claimed that Anselm shared his views, the latter interposed a denial, and was about undertaking a refutation of Roscelin's teaching, when the Synod of Soissons (1092) compelled a retraction of the heresy. The course of Roscelin's life becomes doubtful again at this point, and such facts as are known to have occurred are variously combined by students. The following seems to be the view now generally preferred. Roscelin soon recalled his retraction, according to Anselm, because his action at Soissons had been governed by fear of the populace. Anselm consequently wrote the refutation previously begun (*De Fide Trinitat. et Incarnat.*), and Roscelin went to England, where he attempted to injure Anselm by treating him with contumely, but was himself compelled to return to the Continent, partly because of his relations with Anselm, then archbishop of Canterbury, and partly because he had offended the English clergy by denouncing abuses which existed among them. He then addressed an unsuccessful application for refuge to Ivo of Chartres (q. v.), and from that time was lost to notice for some years. The name of Roscelin is next mentioned in connection with a controversy with Abelard. The latter had been Roscelin's pupil; but the publication of his *Introductio ad Theologiam* (1119), in which he emphasized the divine unity in three persons, and in such a way as to reflect on the position Roscelin had occupied at Soissons, caused an open rupture between them. Abelard's language savored of Sabellianism, and Roscelin prepared to bring the new heresy to the notice of the bishop of Paris. Each of the parties contributed a letter to this controversy, which documents are still extant; and with the issuing of the *Epistola ad Abelard*, Roscelin passes definitely from our view.

1. *Roscelin as a Tritheist.*—His opinions grew out of an emphasizing of the idea of personality in connection with the divine nature, and, as they appear in the writings of his opponents, may be comprehended in the statement that the three Divine Persons cannot be conceived as *uni res* (*οὐσία*), unless the necessary consequence that the Father and the Spirit became incarnate with the Son be also accepted. To escape this consequence, he holds that the distinction between the Persons is one of substance; but he strives to preserve the divine unity by postulating a unity of will and power. It seems evident that he believed this provision sufficient to preserve his doctrine from being charged with polytheism and atheism, and that he was therefore not guilty of intentional heresy; but it was not difficult for the keen dialectics of Anselm to demonstrate his error. Roscelin cannot be justly charged with tritheism; and, if his argumentation was at fault, he certainly earned for himself the credit of scholarly penetration in having recognised the full greatness of the difficulty to be overcome in reconciling the doctrine of the Trinity with that of the Incarnation.

2. *Roscelin as a Nominalist.*—We are wholly dependent for a knowledge of his position in this respect upon the statements of his enemies, and it appears certain that they caricatured his views; but it is evident that they did not regard him as the originator of nominal-

ism. He held the extreme of the nominalist position, denominating universal conceptions an empty sound (*flatus vocis*), but apparently only for the purpose of antagonizing the extreme realism of Anselm. His idea doubtless was that universal concepts exist simply in our thought, and do not at the same time postulate a real existence extraneous to the mind. He laid down the axiom that "no thing has parts"—a paradox which can only mean that no whole can really exist and furnish its parts from out of itself. The parts really constitute the whole, and alone possess a real existence; and the whole, as a unity, cannot be distinguished from them otherwise than in thought. In its application to the doctrine of the Trinity, the axiom implied that the real existences in the Deity are in the three Persons, and that the unity of the Godhead exists only in the thought which comprehends them together into one. The only point of interest to him as a philosopher, however, was to discover whether the reality lies in the general concept or in the concrete individual; and his axiom has, e. g., no relationship with the atomism of Democritus.

3. *The Connection between Roscelin's Philosophy and his Theological Views.*—This is evident from the foregoing statements. He did not, however, publicly connect his theological innovation with his nominalism, but based it on the Christological difficulty already mentioned. According to Anselm (*De Fide Trinit.* 3), Roscelin declared that "Pagani defendunt legem suam, Judæi defendunt fidem suam, ergo et nos Christianam fidem defendere debemus," thus showing that it was not his purpose to damage the faith; but the words sound like a plea for scientific discussion of the faith in general, or perhaps for liberty of the thinking mind to apprehend, and consequently to further the development of, the doctrines of the Church. Nominalism, in general, would seem to have been nearly always connected with a rationalistic tendency.

See Anselm, *Ep.* ii, 35 and 41, and *De Fide Trinitatis et Incarnatione*; a letter to Anselm by John, abbot of Telesse, later cardinal-bishop of Tuseoli (in Baluz. *Miscell.* iv, 478); Abelard, *Epist.* 21 (*Opp.* [Paris, 1616] p. 334), and *Dialectica* (in Cousin, *Œuvres Inédites d'Abél.*); *Epist. Roscel. ad Abælardum* (ed. Schmeller, Munich, 1851); a letter to Roscelin by Theobald of Estampes (in D'Achéry, *Spicilegium*, vol. iii), and one by Ivo of Chartres (*Epist.* 7); John of Salisbury, *Metalog.* ii, 17; Otto of Freisingen, *De Gest. Frider.* vol. i, c. 47, et al.

Roscholchika, a term signifying "Seditionists," and applied to the Russian sect *Isbraniki*, or the "Company of the East." This sect was formed in the middle of the 17th century, during the patriarchate of Nikon, A.D. 1654. The cause of separation was not any difference of doctrine or ritual, but a desire to protest against the laxity and inclination to change displayed by the clergy, and to adopt a greater piety and purity of life. Pinkerton (*Dissertation on Russian Sects*) identifies them with the *Staroveritzi*, or "Believers of the Old Faith." See Platon, *Present State of the Greek Church*. See RUSSIAN SECTS.

Roscoe, WILLIAM, a historian and poet, was born near Liverpool, March 8, 1753, and in 1769 was articled to an attorney for six years. During this time he paid great attention to English classics, and subsequently added an acquaintance with choice writers in the Greek, Latin, Spanish, Italian, and French languages. He was admitted to the bar in 1774, and retired from practice in 1796. His means, through unfortunate business speculations, became very limited, but he still continued his literary labors for many years. He was a member of Parliament for Liverpool in 1806, and died June 30, 1831. Among his works are, *Scriptural Refutation of a Pamphlet on the Licitness of the Slave-trade* (1788, 8vo);—*The Life and Pontificate of Leo X* (Liverpool,

1805, 4 vols. 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rose (רֹזָה, *chabatseleth*; Sept. κρίνον, *ândos*; Aq. κάλυξ; Vulg. *flos, lilium*) occurs twice only in the canonical Scriptures; namely, first in Cant. ii, 1, where the bride replies, "I am the rose of Sharon and the lily of the valley," and secondly in Isa. xxxv, 1, "The wilderness and the solitary place shall be glad for them, and the desert shall rejoice and blossom as the rose." There is much difference of opinion as to what particular flower is here denoted, and the question perhaps does not admit of definite determination. Tremellius and Diodati, with some of the rabbins, believe the rose is intended, but there seems to be no foundation for such a translation. The Sept. renders it simply by *flower* in the passage of the Canticles. In this it has been followed by the Latin Vulgate, Luther, etc. It is curious, however, as remarked by Celsius (*Hierobot.* i, 489), that many of those who translate *chabatseleth* by *rose* or *flower* in the passage of the Canticles render it by *lily* in that of Isaiah. The rose was, no doubt, highly esteemed by the Greeks, as it was, and still is, by almost all Asiatic nations; and as it forms a very frequent subject of allusion in Persian poetry, it has been inferred that we might expect some reference to so favorite a flower in the poetical books of the Scripture, and that no other is better calculated to illustrate the above two passages. But this does not prove that the word *chabatseleth* or any similar one was ever applied to the rose. Other flowers, therefore, have been indicated, to which the name *chabatseleth* may be supposed, from its derivation, to apply more fitly. Scheuzer refers to Hiller (*Hierophyt.* p. 2), who seeks *chabatseleth* among the bulbous-rooted plants, remarking that the Hebrew word may be derived from *chabab* and *batsal*, a bulb, or bulbous root, of any plant, as we have seen it applied to the onion (q. v.). So Rosenmüller remarks that the substantial part of the Hebrew name shows that it denotes a flower growing from a bulb, and adds in a note "that *chabatseleth* is formed from *betsel*, or bulb, the guttural *cheth* being sometimes put before triliterals in order to form quadriliterals from them" (see Gesen. *Gram.* p. 863). Some, therefore, have selected the asphodel as the bulbous plant intended, respecting which the author of *Scripture Illustrated* remarks, "It is a very beautiful and odoriferous flower, and highly praised by two of the greatest masters of Grecian song. Hesiod says it grows commonly in woods, and Homer (*Odyss.* i, 24) calls the Elysian Fields 'meads filled with asphodel.'" Celsius (*loc. cit.*) has already remarked that Bochart has translated *chabatseleth* by *narcissus* (*Polyanthus narcissus*), and not without reason, as some Oriental translators have so explained it. In the Targum (Cant. ii, 1), instead of *chabatseleth* we have *narkom* (נַרְקוֹם), which, however, should have been written *narkos* (נַרְקִיס), as appears from the words of David Cohen de Lara, "*Narkos* is the same as *chabatseleth* of Sharon." So in Isa. xxxv, 1, *chabatseleth* is written *chamzaloito* in the Syrian translation, which is the same as *narcissus* (Cels. *Hierobot.* i, 489). This, Rosenmüller informs us (*Bibl. Bot.* p. 142), according to the testimony of Syriac-Arabic dictionaries, denotes the *Colchicum autumnale*, that is, the meadow saffron. That plant certainly has a bulb-like root-stock; in form the flowers resemble those of the crocus, and are of a light violet color, without scent. *Narkom* and *narkos* are, no doubt, the same as the Persian *nurgus*, which throughout the East indicates the *Narcissus tazetta*, or the *Polyanthus narcissus*. The ancients describe and allude to the narcissus on various occasions, and Celsius has quoted various passages from the poets indicative of the esteem in which it was held. Since they were not so particular as the moderns in distinguishing species, it is probable that more than one may be referred to by them, and therefore that *N. tazetta* may be included under the same name as *N. poeticus*, which was best known

*Narcissus tazetta.*

to them. It is not unimportant to remark that the narcissus was also called *Bulbus vomitorius*, or the *Emetic bulb*, in Greek and Latin; and the Arabic *bush-al-kye* no doubt refers to the same or a kindred species. It is curious, also, that an Eastern name, or the corruption of one, should be applied by gardeners even in England to a species of narcissus: thus, *N. treurianus* and *crenulatus* (the former supposed by some to be a variety of *N. orientalis*) were once called "*Bazalman major*" and "*Bazalman minor*." That the narcissus is found in Syria and Palestine is well known, as it has been mentioned by several travellers, and also that it is highly esteemed by all Asiatics from Syria even as far as India (comp. Soph. *Æd. Col.* p. 698 sq.; Mosch. *Idyl.* ii, 65 sq.; Athen. xv, 679 sq.). Chateaubriand (*Itinéraire*, ii, 130) mentions the narcissus as growing in the plain of Sharon; and Strand (*Flor. Palest.* No. 177) names it as a plant of Palestine, on the authority of Rauwolf and Hasselquist (see also Kitto, *Phys. Hist. of Palest.* p. 216). Hiller (*Hierophyt.* ii, 30) thinks the *chabatsseleth* denotes some species of asphodel (*Asphodelus*); but the finger-like roots of this genus of plants do not well accord with the "bulb" root implied in the original word. Thomson (*Lund and Book*, i, 161; ii, 269) suggests the possibility of the Hebrew name being identical with the Arabic *khubbaziy*, "the mallow," which plant he saw growing abundantly on Sharon; but this view can hardly be maintained. The Hebrew term is probably a quadriliteral noun with the harsh aspirate prefixed, and the prominent notion implied in it is *betsel*, "a bulb," and has therefore no connection with the above-named Arabic word. The narcissus alone is still called *buseil* by the natives of Palestine (*Quar. Statement of the Palest. Exphr. Soc.* Jan. 1878, p. 46). See SHARON.

Though the rose is apparently not mentioned in the Hebrew Bible, it is referred to in Ecclus. xxiv, 14, where it is said of Wisdom that she is exalted "*as a rose-plant* (*ὡς πύρα ρόδου*) in Jericho" (comp. Mishna, *Maaser*, ii, 5). So also in Ecclus. xxxix, 13, "And bud forth as a rose growing by the brook of the field;" and the high-priest's ornaments are compared in 1, 8 to "the flowers of roses in the spring of the year." But the passage in the book of Wisdom (ii, 8; comp. Pliny, xxi, 6; Athen. xv, 683), "Let us crown ourselves with roses ere they be withered," is especially well suited to the rose. Yet roses have not been found by travellers in the neighborhood of Jericho. They cannot be considered exactly as spring flowers, nor do they grow specially by the sides of brooks. The rose was as highly esteemed among ancient as it is among modern nations, if we may judge by the frequent references to it in the poets of antiquity. As we know that it continues to be the favorite flower of the Persians, and is much cultivated in Egypt (Has-

selquist, *Trav.* p. 248; Russegger, *Reis.* I, i, 193), we might expect more frequent mention of some of its numerous species and varieties in the Jewish writings. This, however, is not the case, which probably arises from its being less common in a wild state in a comparatively dry and warm climate like that of Syria. Still it is indigenous in some parts. Monro, as quoted by Kitto in the *Physical History of Palestine*, "found in the valley of Baalbec a creeping rose of a bright-yellow color in full bloom about the end of May. About the same time, on advancing towards Rama and Joppa from Jerusalem, the hills are found to be to a considerable extent covered with white and pink roses. The gardens of Rama itself abound in roses of a powerful fragrance." Mariti, as stated by Rosenmüller, found the greatest quantity of roses in the hamlet of St. John, in the desert of the same name. "In this place the rose-plants form small forests in the gardens. The greatest part of the roses reared there are brought to Jerusalem, where rose-water is prepared from them, of which the scent is so very exquisite that in every part of Lycia, and also in Cyprus, it is in request above all other rose-waters." Burckhardt was struck with the number of rose-trees which he found among the ruins of Bozra beyond the Jordan. That the rose was cultivated in Damascus is well known. Indeed, one species is named *Rosa Damascena* from being supposed to be indigenous there. "In the gardens of the city roses are still much cultivated. Monro says that in size they are inferior to our damask rose and less perfect in form, but that their odor and color are far more rich. The only variety that exists in Damascus is a white rose, which appears to belong to the same species, differing only in color" (Kitto, *loc. cit.* p. cclxxxiv). The attar of roses from Damascus is famous. Dr. Hooker observed the following wild roses in Syria: *Rosa eglanteria* L., *R. sempervirens* L., *R. Henkeliana*, *R. Phœnicia* Boiss., *R. sericea*, *R. angustifolia*, and *R. Libanotica*. Some of these are doubtful species. *R. centifolia* and *Damascena* are cultivated everywhere. It is possible, however, that the common rose may not be the plant meant in the above passages of Ecclesiasticus, and that the name *rhodon* may have been used in a general sense, so as to include some rose-like plants. We have an instance of this, indeed, in the oleander, of which *rhododendron*, or *rose-tree*, was one of the ancient names, and *rhododaphne* another. The former name is now applied to a very different genus of plants; but *laurier-rose*, the French translation of *rhododaphne*, is still the common name in France of the plant which used to be called *rose bay* in England, but which is now commonly called *oleander*. Its long and narrow leaves are like some kinds of

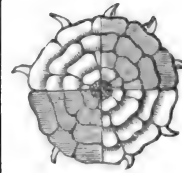

*Oleander.*

willows, and in their hue and leathery consistence have some resemblance to the bay-tree, while in its rich inflorescence it may most aptly be compared to the rose. The oleander is well known to be common in the south of Europe by the sides of rivers and torrents, also in Asia Minor, Syria, and Egypt. It is seen in similar situations in the north of India, and nothing can be conceived more beautiful than the rivulets at the foot of the mountains, with their banks lined with thickets of oleanders, crowned with large bunches of roseate-colored flowers. Most travellers in Palestine have been struck with the beauty of this plant. Of the neighborhood of Tripoli, Rauwolf says, "There also by the river's side are found *Anthyllis marina*, etc., and oleander with purple flowers, by the inhabitants called *desfe*." At the foot of Lebanon, again, he says, "In the valley further down towards the water, grew also the oleander." It is mentioned as a conspicuous object in similar situations by Robinson and Smith. Kitto says, "Among the plants in flower in April, the oleander flourishes with extraordinary vigor, and in some instances grows to a considerable size by all the waters of Palestine. When the shrub expands its splendid blossoms, the effect is truly beautiful. Lord Lindsay speaks with rapture of the glorious appearance which the groves of blooming oleanders make in this season along the streams and in the lone valleys of Palestine" (*loc. cit.* p. cccxxvii). "In the month of May," adds Kitto (*loc. cit.* p. ccxlv), "oleanders, continuing still in bloom, are as much noticed in this as in the preceding month by travellers. Madox noticed in this month that fine oleanders in full bloom were growing all along the borders of the Lake of Tiberias, mostly in the water. The same observation was made by Monro. The lake is here richly margined with a wide belt of oleanders, growing in such luxuriance as they are never known to do even in the most genial parts of Europe." Such a plant could hardly escape reference, and therefore we are inclined to think that it is alluded to in the book of Ecclesiasticus by the name *rhodon*. If this should not be considered sufficiently near to rhododaphne and rhododendron, we may state that in Arabic writers on *Materia Medica* *rodyon* is given as the Syrian name of the oleander (see Tristram, *Nat. Hist. of Bible*, p. 477). See ENGEDI.

The plant commonly called "rose of Jericho" is in no way referred to in the above-quoted passages. Dr. Lindley, in the *Gardener's Chronicle*, ii, 362, has thus described it: "The *Anastatica Hierochuntina*, or rose of Jericho of the old herbalists, is not a rose at all, nor has it the smallest resemblance to a rose; nor is it, as it is often described to be, alive as sold in the shops. It is gathered by the poor Christians of Palestine and sold to pilgrims as a charm. It is a little gray-leaved annual, very common in Palestine, and of which hundreds may be gathered in full flower in June by the sides of the road over the Isthmus of Suez (see Arvieux, *Neaehr.* ii, 156; Seetzen, in *Zach.* xvii, 146; Forskål, *Flora*, p. 117). It produces a number of short, stiff, zigzag branches, which spread pretty equally from the top of the root, and, when green and growing, lie almost flat upon the ground, having the flowers and fruit upon their upper side. It is, in fact, a cruciferous plant, nearly related to the common purple sea-rocket, which grows on the coast of England, and has a somewhat similar habit. When the seed-vessels of this plant are ripe, the branches die, and, drying up, curve inwards, so as to form a kind of ball, which then separates from the roots, and is blown about on the sands of the desert. In the cavity thus formed by the branches, the seed-vessels are carefully guarded from being so disturbed as to lose their contents. In that condition the winds carry the anastatica from place to place, till at last rain falls, or it reaches a pool of water. The dry, hard branches immediately absorb the fluid, become softened, relax, and expand again into the position they occupied when alive; at the same time, the seed-vessels open and the seeds fall out, germinate if favored, and become new plants. This is due,

then, to the *hygroscopic* property of vegetable texture." So D'Arvieux, who calls the anastatica a "natural hygrometer" (see the fables told of it in Zedler, *Universal-Lex.* xxxii, 867 sq.; Helmuth, *Naturgesch.* viii, 288 sq.). See ROSE OF JERICHO.

ROSE, ARCHITECTURAL. A kind of rose was some-

Badge of the Tudors.

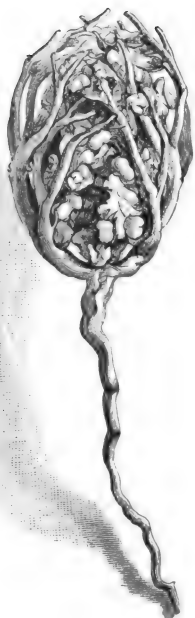

times used as an ornament on the face of the abacus on Corinthian capitals. It also occurs in ornamental mouldings during the Norman style; but the full rose, as in the accompanying illustration, was a badge of the Tudors, and during their reigns it is often found carved on buildings in conjunction with the portcullis.—Parker, *Gloss. of Architect.* s. v.

ROSE, THE GOLDEN (*Rosa aurea*), a rose made of gold and consecrated by the pope, which is presented to such princes as have rendered special service to the Church, or as may be expected to promote its interests, though it is sometimes given also to cities and churches. The essential parts of the rose are gold, incense, and balsam, signifying the threefold substance of Christ—Deity, body, and soul; and its color denotes purity, its scent attractiveness, its taste the satisfying of desire. It is not known when the ceremony of consecrating the rose was introduced, though the time is commonly placed in the 11th century and in the pontificate of Leo IX, and it has become increasingly impressive with the progress of time. The day is always the fourth Sunday in Lent, which is consequently known also as "Rose-Sunday" (*Dominica de Rosa*). The pope, clothed wholly in white, intones before the altar the *Adjutorium nostrum* and offers a prayer of consecration, after which he dips the rose in balsam and sprinkles it with balsam-dust, incense, and holy-water. It is then placed on the altar, mass is said, and the benediction concludes the solemnity. When the rose is not conferred by the hand of the pope, it is always transmitted by special messenger, and accompanied with a letter from the pope. Its use as a symbol of joyous events has been continued in the Romish Church down to the present time. See Herzog, *Real-Encyklop.* s. v.; Wetzer u. Welte, *Kirchen-Lex.* s. v.

ROSE OF JERICHO, a plant of the natural order *Cruciferae*, which grows in the sandy deserts of Arabia, on rubbish, the roofs of houses, and other such situations, in Syria and other parts of the East. It is a small, bushy, herbaceous plant, seldom more than six inches high, with small white flowers. After it has flowered, the leaves fall off, and the branches become incurved towards the centre, so that the plant assumes an almost globular form, and in this state it is often blown about by the wind in the desert. When it happens to be blown into water the branches expand again, the pods open and let out the seeds (see illustrations on the following page). Numerous superstitions are connected with this plant, which is called *Rosa Marie*, or the *Rose of the Virgin*. See ROSK.

Rose, Alexander, a Scottish prelate, was born in the north of Scotland, was educated at King's College, Aberdeen, and afterwards studied theology at Glasgow. His first preferment was Perth, which he left to become professor of divinity in the University of Glasgow. In 1684 he was nominated to the principality of St. Mary's College, University of St. Andrew's, and in 1687 he was made bishop of Edinburgh. He refused to join the standard of William, and during the Revolution was deprived of his cathedral, despoiled of his revenues, and stripped of his civil dignities. He died in March, 1720, and was buried in the church of Restalrig, near Edinburgh.

Rose, Guillaume, a French prelate, was born at Chaumont, about 1542. He was professor of grammar and rhetoric in the College of Navarre, but subsequent-

Rose of Jericho (*Anastatica Hierochuntina*). 1, dry; 2, expanded by moisture.

ly went to Paris, where his eloquent and incisive preaching gained for him a wide reputation. Becoming chaplain-in-ordinary to Henry III, he soon joined the Holy League, and in 1583 opposed himself to the king; but the break was only temporary. Rose was made headmaster of the College of Navarre, and in 1584 received the bishopric of Senlis. For some time he repressed the expression of any extreme views, but when he departed for Paris as member of the Council of the Union, he said publicly that the celestial palm was reserved for the members of the League when they had killed father and mother. Thereafter he was one of the fiercest preachers of his party, and in the contest between Mayenne and the Spanish he was an ardent partisan of the latter. He was member of the States-general in 1593, and rendered important service to the country in opposing the friends of the infants of Spain, which was all the more remarkable considering his previous attitude towards the Spaniards. After the triumph of Henry IV, Rose took refuge in the convent of Val de Beaumont-sur-Oise, but by letters-patent was allowed to retain his bishopric. Continuing his hostility to the king, he was in 1598 arrested and forced to pay a fine of one hundred livres d'or. Rose died at Senlis, March 10, 1602. The celebrated pamphlet entitled *De Justa Reipublicæ Christianæ in Reges Impios Autoritate* (Paris, 1590; Antwerp, 1592) has been attributed to Rose, but its authorship is uncertain. See Labitte, *Prédicateurs de la Ligue*; De Thou, *Historia*; L'Estoile, *Journal*.—Hoefer, *Nouv. Biog. Générale*, s. v.

Rose, Henry John, an English author, was born in 1801, graduated at St. John's College, Cambridge, in 1821, and became fellow of his college in 1824. He was made Hulsean lecturer in 1833, rector of Houghton Conquest, Bedfordshire, in 1837, and archdeacon of Bedford in 1866. His death took place in Bedford, Jan. 31, 1873. Rose edited the *Encyclopædia Metropolitana* from 1839, also vol. i of *Rose's Biographical Dictionary*. He translated Neander's *History of the Christian Religion and Church during the First Three Centuries* (1831, 2 vols.; 2d ed. 1842); contributed an essay to *Replies to Essays and Reviews* (1861); and was one of the authors of *The Speaker's Commentary*. He published, *The Law of Moses*, etc. (Hulsean Lectures, 1834), and *History of the Christian Church, 1700-1858*.

Rose, Hugh James, an English clergyman, was born in Little Horsted, Surrey, in 1795, and was educated at Trinity College, Cambridge. He gained the first Bell's scholarship in 1814, took his degree in 1817, became tutor to the son of the duke of Athol, was ordained deacon and became curate of Uckfield, Surrey, in 1818. In 1821 he became vicar of Horsham, Surrey; in 1825 select preacher at Cambridge; in 1826 chaplain to bishop Howley, and prebendary of Chichester, 1827-33. In 1830 he became rector of Hadleigh, Suffolk; exchanged it for Fairstead and Werley, Essex, in 1833, and immediately exchanged the latter for St. Thomas's, Southwark, which he retained until his death. He was made professor of divinity of the University of Dublin in 1833, domestic chaplain to the archbishop of Canterbury in 1834, and principal of King's College, London, in 1836. Rose died at Florence, Italy, Dec. 22, 1838. He was the author of *Christianity Always Progressive* (1829, 8vo);—*Notices of the Mosaic Law* (1831, 8vo);—*The Gospel an Abiding System* (1832, 8vo);—an edition of Parkhurst's *Greek Lexicon*;—besides *Lectures, Sermons*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.*, s. v.

Rose, John Baptist, a French priest, was born at Quingey, Feb. 7, 1716. He was made curate of a chapel in his own village, which position nothing could induce him to leave, and he there continued during his life. In 1778 he was made a member of the Academy of Besançon. He submitted to the decrees of 1789, and in 1795 the National Convention voted him a pension of 1500 livres. Rose died Aug. 12, 1805. His works are, *Traité Élémentaire de Morale* (2 vols. 12mo);—*La Morale Évangélique* (1772, 2 vols. 12mo);—*Traité sur la Providence*;—*L'Esprit des Pères* (1791, 3 vols. 12mo). He was also a good mathematician, and sent papers to the Academy of Sciences, Paris.

Rose, Stephen, a deacon and ruling elder of the Presbyterian Church, Bridgehampton, Long Island, N. Y., was born there, June 5, 1780. After a period of darkness and doubt, he was converted in 1803 and united with the Church. Renouncing all efforts to obtain wealth, he devoted himself exclusively to the Church, and he emphatically "loved the gates of Zion more than all the dwellings of Jacob," and no one was more

distinguished for piety and usefulness than elder Rose. He was a pioneer in the cause of the circulation of the Bible, temperance, and Sabbath-schools in Suffolk County. To the Church and these institutions he devoted the energies of a powerful and cultured mind. He was a man of large and liberal views, and was ready to labor for the cause of Christ in all denominations, no Church lines interfering with beneficent actions. He did much in winning souls to Christ by personal effort, always seeming to be in a revival spirit. In his religious experience he knew little of those alternations of hope and despondency which enter into the feelings of many professing Christians. In him there was a harmonious blending of virtues and graces unsullied by any defects. He was wise, yet modest and unassuming; cautious, yet decided and unwavering. His sense of justice was strong and inflexible, but not stern and merciless—following the dictates of his Divine Master in a readiness to forgive even the greatest injuries on the first movement of repentance on the part of the offender. Everywhere, among all classes, he was revered as a man of God, perfect in his day and generation. He was a perfect storehouse of information, not only on all matters pertaining to Church history, but of Bible doctrines. He died "as a shock of corn cometh in its season," at his home on Rose Hill, July 18, 1866. (W. P. S.)

Rose-window, or the *Marygold*, was derived from the round window called the *eye* in the basilica, pierced through the gable over the entrance, and imitated in the Norman period at Canterbury in the transept, and at Southwell in the clerestory, but is unknown in Rhinish architecture. About the 13th century the rose became of large dimensions. There are fine examples at Paris (1220-57), Nantes (1220), Laon, Rheims (1239), Amiens (1325), St. Denis, Sees, Clermont, and Rouen. The mullions of this window converge towards the centre, something like the spokes of a wheel; hence they are sometimes called Catherine, or wheel, windows. They also bore the names of the elements—the northern being called the rose of the winds; the west, of the sea; the south, of heaven; and the east, of the earth. When there were two of these transeptal windows in a cathedral, that on the north was called the bishop's, and the southern one the dean's eye, as representing their respective jurisdiction—one watching against the invasion of evil spirits on the north, and the latter as presiding as *ensor morum* over the capitulars and close. At St. Paul's, exceptionally, the Lady Chapel had a superb eastern rose, and one still adorns the nine chapels of Durham. See WINDOW.

Roselli (or **Rosselli**), **Cosimo**, an Italian painter, was born of a noble family at Florence in 1439, and studied under Neri di Bicci and Fra Angeli. He decorated what is called "the Chapel of the Miracle" at Sant' Ambrogio, and in 1476 aided in decorating the Sistine Chapel at Rome, where he had charge of the four great subjects—the *Passage of the Red Sea*, the *Worship of the Golden Calf*, the *Lord's Supper*, and *Christ Preaching on the Sea of Tiberias*. Returning to Florence loaded with honors, he died about 1506. The Museum of Berlin contains a *Virgin with the Magdalen* painted by him; that of Paris, a *Virgin Gloriosa*, a *Christ Entombed*, and two *Madonnas*; and at the Exposition of Manchester were shown a *Christ on the Cross* and the *Virgin Surrounded by Saints*. Roselli's principal pupil was Fra Bartolomeo.

Roselli (or **Rosselli**), **Matteo**, an Italian painter, descended from the preceding, was born at Florence in 1578. He studied under Gregorio Paganini, and after the death of his master finished several of his uncompleted pictures. He decorated the Clementine Chapel. Some of his paintings are, the *Manger*, the *Trinity*, the *Crucifixion of St. Andrew*, and *St. Elizabeth of Hungary*. His frescos are su-

perior to his other paintings, five of the best of which are in the cloister of the Annunciation. He died in 1650.

Rosellini, IPPOLITO, an Italian antiquary, was born at Pisa, Aug. 13, 1800. In 1821 he received the degree of doctor of theology, and afterwards studied at Bologna under Mezzofanti, and taught in the University of Pisa. At the time of the discoveries of Champollion, in 1825, Rosellini became interested in the study of hieroglyphics, and, in company with Champollion, studied Egyptian antiquities in the museums of Italy, and went with him to Paris. In 1828 he was commissioned by the grand-duke of Tuscany to explore the ruins of Egypt and Nubia with his son and three naturalists. Champollion was sent at the same time, and on a similar errand, by the duke de Blacas. The two parties united, and for fifteen months travelled through the two countries. Returning to Pisa, Rosellini spent the rest of his life in directing the publication of the results of the expedition, the whole of the work having fallen upon him at the death of Champollion. On account of his feeble health, he gave up his professor's chair, and was made librarian of the university. He died June 4, 1843. His works are, *La Fionda di David* (Bologna, 1823), a treatise upon the age of the Masoretic points:—*Lettera Filologica-critica al Am. Peyron* (Pisa, 1831):—*Tributo di Riconoscenza e d'Amore reso alla Memoria di Champollion il Minore* (ibid. 1832):—*I Monumenti dell'Egitto e della Nubia, Interpretati ed Illustrati* (Florence, 1832, 1840); this is his great work, the foundation of all modern research concerning ancient Egypt; it is divided into *Monumenti Storici, Civili, e Religiosi*:—and *Elementa Lingue Egyptiæ vulgo Copticæ* (Rome, 1837). The latter, published by P. Ungarelli, is a résumé of the lectures given by Rosellini, but the substance of it is printed in the *Grammaire Copte* of Champollion. Some other works, *De Interpretatione Obeliscorum Urbis Romæ*, published by Ungarelli as those of Rosellini, belong really to Champollion. See Miller and Unbenas, *Revue de Bibliographie Analytique* (1842); Bardelli, *Biogr. dell'Ipp. Rosellini*.

Rosemary, USE OF AT FUNERALS. The early Christians rejected the use of the cypress at funerals, as used by the heathen, and substituted rosemary. The heathen, having no thoughts of a future life, but believing that the bodies of the dead would lie forever in the grave, made use of cypress, which is a tree that, being once cut, never revives, but dies away. The Christians, having better hopes, and expecting the reunion of soul and body, use rosemary, which, being always green, and flourishing the more for being cut, is more proper to express this confidence and trust.

Rosen, FRIEDRICH AUGUSTUS, a celebrated Oriental scholar, was born in Hanover, Sept. 2, 1805, and entered Leipsic University in 1822, where he devoted himself to the study of the Biblico-Oriental languages. He went to Berlin in 1824, and studied Sanscrit under Bopp. He was subsequently called to the London University as professor of Oriental literature, which professorship he resigned in 1831, and devoted himself to study and writing. As secretary of the Asiatic Society, he conducted its entire foreign correspondence. Rosen died in London, Sept. 12, 1837. His first work was *Radices Sanscritæ* (Berlin, 1827). He edited the *Arabic Handbooks of Algebra*, by Mohammed ben-Musa (Lond. 1831), wrote Oriental articles for the *Penny Cyclopædia*, and revised the *Sanscrit-Bengali Dictionary* of Houghton (ibid. 1835). In 1836 he began to publish *Hymns of the Rig-Veda*, but left it unfinished. It was published by the Asiatic Society under the title *Rigveda-Sanhita, Liber Primus, Sanscritæ et Latine* (ibid. 1838).

Rosenbach, JOHANN GEORG, a journeyman spur-maker of Heilbronn, in Württemberg, who became one of the most prominent fanatics of the last century.

Converted to God, as he thought, by the reading of Pietistic works, he forsook his handicraft in 1703, and traversed the cities of Central Germany, preaching and holding devotional meetings. He secured the endorsement of several professors in the faculty at Altorf, and gained over some of the students at Tübingen; but he was everywhere opposed by the clergy and driven away by the civil authorities. He eventually went to Holland, and there disappeared from view.

The teachings of Rosenbach were given to the world in three books—*Glaubensbekenntnis* (1703), *Wunder- u. gnadenvolle Bekehrung* (1704), and *Wunder- u. gnadenvolle Führung Gottes eines auf d. Wege d. Bekehrung Christo nachfolgend. Schafes*. It appears that he rejected infant baptism as not commanded in Scripture, and ineffective to produce conversion. He held the Lord's supper to be simply a memorial; despised the ministry in the churches; regarded the Bible as a mere dead letter, and not the Word of God; believed Christ to be the Saviour, but asserted that the kindling of inward goodness would result in the saving, through Christ, of those who do not know of him; and confounded faith with its fruits, and justification with sanctification. He insisted positively on the existence of an intermediate state of souls after death, and on the prospect of a millennial reign of saints with Christ during a thousand years prior to the general resurrection.

The appeal of Rosenbach to the professors of Altorf in support of his views led to a protracted controversy, in which Joh. Phil. Storr, pastor at Heilbronn, and Prof. J. Michael Lange were the principal champions. See Walch, *Einf. in d. Rel.-Streitigkeiten d. ev.-luth. Kirche*, i, 799 sq., 838 sq.; ii, 755 sq.; v, 109 sq.; *Unschuldige Nachrichten*, 1704, p. 852; 1707, p. 172; 1708, p. 758; 1715, p. 1054; 1716, p. 426 sq.; 1721, p. 1096; also Von Einem, *Kirchengesch. des 18ten Jahrhunderts*, ii, 747 sq.; and Schröckh, *Kirchengesch. seit d. Reformation*, viii, 404.

Rosenfeld, Hans, a German impostor who set himself up as the Messiah, about the year 1763, in Prussia, declaring that Jesus Christ and his apostles were impostors, and that Frederick the Great was the Evil One, whom Rosenfeld was to depose. He taught that he was to govern the world, assisted by a council of twenty-four elders, like those of the Apocalypse. He deluded multitudes, and lived upon them in outrageous profligacy for twenty years. Eventually, in 1782, one of his followers appealed to the king, whom he believed to be the Evil One, to revenge him on Rosenfeld for the seduction of his three daughters. The king ordered proceedings against Rosenfeld, and he was sentenced to be flogged, and imprisoned for the remainder of his life at Spandau. After this his followers, called *Rosenfelders*, quietly disappeared.

Rosenfeld, Samson Wolf, rabbi of Bamberg, was born Jan. 26, 1780, at Uhlefeld, in Bavaria. At the age of thirteen he entered the Jewish academy at Fürth, where, besides the Talmud, he studied the philosophical writings of Maimonides, Albo, and others. At the age of nineteen he returned to his native place, and continued his studies, especially devoting himself to the writings of Moses Mendelssohn. In 1817 he was appointed rabbi of his native place. In 1819 he represented his coreligionists in Munich, and presented a memorial concerning the amelioration of the condition of the Jews; an act which he repeated in 1846, in spite of the hatred of the orthodox Jews, who thought of putting him under ban. In 1826 he was called to Bamberg, and, having passed the necessary examination required by the government, he entered upon his new field in March of the same year. He was a conservative reformer, and as such he published some works which tended to enlighten his coreligionists. He died May 12, 1862. Of his publications, we mention especially his *Stunden der Andacht für die Israeliten beiderlei Geschlechts* (2d ed. Dinkensbühl, 1858, 3 vols.). See Fitst,

Biblioth. Jud. iii, 169; Kayserling, *Bibl. jüd. Kanzelredner*, i, 414 sq.; Klein, in Frankel's *Monatsschrift*, 1863, p. 201 sq.; Krämer, in the Jewish year-book *Achawa*, 1866, p. 15-33. (B. P.)

Rosenfelders. See ROSENFELD, HANS.

Rosenfeldt, Frederick John, a missionary of the Episcopal Church, was born of Jewish parents Feb. 10, 1804, at Mitau, in Courland, Russia. According to the custom of that country, Rosenfeldt was instructed in the religion of Rabbinism, and when ten years old he was taken to Berditschev for further instruction in the Talmud. One of the most learned teachers, however, at that place endeavored to awake in his students a desire to apply themselves to the study of other languages, and not without success. Rosenfeldt, with two fellow-scholars, was permitted by a Roman Catholic priest to take part in the instruction of his school, which he did in secret, acquiring a knowledge of reading and writing Russian, Polish, German, and a little arithmetic. At the age of eighteen he was married, according to the fashion of the country, and for two years lived in the house of his father-in-law, spending his time in the study of the Talmud. Having returned to Berditschev, he came into possession of a copy of the New Testament in Hebrew, circulated by the missionary Mr. Moritz (q. v.). His two former fellow-scholars and himself resolved to embrace Christianity, and intended to go to Berlin. Rosenfeldt was prevented from carrying out his plan by circumstances beyond his control. In the meantime he received letters of introduction to the missionaries in Poland, and arrived at Warsaw in September, 1827. Having received the necessary instruction, he was baptized in the Reformed Church Feb. 10, 1828. His exemplary life and Rabbinical learning recommended him to the London Society, and in September, 1828, he was appointed assistant to the mission station at Radom. From this time on till his death, which occurred July 11, 1853, he was connected with the London Society, his last station being Lublin. See the *Jewish Intelligencer*, 1853, p. 313 sq.; *Annual Reports of the London Society*, 1829, p. 52 sq. (B. P.)

Rosenkrans, Cyrus E., a Presbyterian minister, was born at Wallpack, N. J., March 12, 1809. He graduated at Amherst College, Mass.; studied divinity in the Union Theological Seminary, New York city; and was licensed and ordained by New York Third Presbytery April 8, 1842. He entered upon his labors as a minister in the West, at East May, Wis., and subsequently at Columbus, Wis. He died March 8, 1861. Mr. Rosenkrans was a man of fine conversational powers, excellent judgment, and had the tact necessary to carry out useful plans of action. See Wilson, *Presb. Hist. Almanac*, 1862, p. 195. (J. L. S.)

Rosenkrans, Joseph, a Presbyterian minister, was born at Wallpack, N. J., Nov. 13, 1812. He received his education at Amherst College, Mass., and Union College, Schenectady, N. Y.; studied theology in the Union Theological Seminary, New York city; and was ordained by New York Third Presbytery in 1842 as pastor of the Church in Bethlehem, N. Y. He subsequently preached for the churches of Newport, Martinsburg, Romulus, and Onondaga Valley, N. Y., where he was laboring when he died, June 19, 1863. Mr. Rosenkrans was a man of well-balanced mind; orthodox, faithful to every trust, a fair scholar, and a good preacher. See Wilson, *Presb. Hist. Almanac*, p. 321. (J. L. S.)

Rosenkreuz. See ROSICRUCIANS.

Rosenmüller, Ernst Friedrich Karl, a noted German Orientalist, who contributed largely to the advancement of our acquaintance with the Shemitic languages, literature, and customs. He was the oldest son of the rationalist theologian Johann Georg Rosenmüller (q. v.), and was born Dec. 10, 1768. The various positions held by his father introduced him to learned stud-

ies at an unusually early age, and afforded him unequalled facilities for their prosecution. He became identified with the University of Leipsic, first as a student, in 1792 as tutor, extraordinary professor of Arabic in 1796, and professor in ordinary of Oriental languages from 1813 to the time of his death, Sept. 17, 1835. His principal work was authorship; his chief importance that of a learned, keen, and industrious writer on Oriental subjects. He promoted the study of the Arabic language (*Institutiones ad Fundam. Linguae Arab.* [Lips. 1818]; *Analecta Arabica* [ibid. 1824-27, 3 vols.]), brought within the reach of theologians the rapidly increasing knowledge of his day with reference to the conditions of the East (*Altes u. Neues Morgenl.* etc. [ibid. 1816-20, 6 vols.]), and endeavored to raise the exposition of the language and statements of the Old Test. to the level of the science of his day. Comp. his *Scholæ in Vetus Test.* (16 pts. ibid. 1788-1817; the same in epitome, 5 pts. 1828-35); *Handb. für Lit. d. Bibl. Kritik u. Exegese* (4 pts. Götting. 1797-1800), and the *Handb. d. Bibl. Alterthumskunde* (4 pts. Leips. 1823-34). His works, with biography annexed, are fully given in *Neuer Nekrolog d. Deutschen*, 13th year, pt. ii, p. 766-769.

Rosenmüller, Johann Georg, the father of the preceding, a prominent theologian, preacher, and writer of Germany in the close of the last and the beginning of the present century, was born of humble parentage Dec. 18, 1736. Unusual talents secured for him assistance by which he was enabled to procure an education at Nuremberg and the University of Altorf. He subsequently spent several years as tutor in different families and schools, and became popular as a preacher, so that a number of prominent churches were successively placed under his charge. In 1775 he became professor of theology at Erlangen, in which position he secured a name, and in 1783 at the pedagogium at Giessen. In 1785 he entered on a theological professorship at Leipsic, and in that office, joined with the pastorate of St. Thomas's Church and the superintendency, he spent the last thirty years of his life. It is not strange that he should have become tinged with rationalism from association with the element then in control of the Leipsic University; but he has retained the name of a pious rationalist. His influence was highly beneficial to the progress of the theology and ecclesiastical life of Protestantism. Many of his sermons were printed, and earned for him the reputation of an exemplary popular preacher; and devotional manuals from his pen have not yet lost their hold upon the Christian public. His literary activity was surprising, nearly 100 different writings having been given by him to the world, among them works on exegesis, hermeneutics, and practical theology; e. g. *Scholæ in N. T.* (6th ed. Lips. 1815-31, 6 vols.);—*Hist. Interp. Libr. Sacrorum in Eccles. Christ.* (ibid. 1795-1814, etc., 5 vols.). His practical activity was equally respectable. He founded and improved schools, labored to secure a modernized hymnology, sought to eliminate objectionable features from the administration of the Lord's supper, etc. After having been rewarded with all the titles and honorary positions usually conferred on a senior of the theological faculty, he died, March 14, 1815. See Dolz, *Dr. J. G. Rosenmüller's Leben und Wirken* (ibid. 1816).

Rosenthal, David Augustus, Dr., a German writer of ecclesiastical history, was born of Jewish parentage at Neisse, in Silesia, in the year 1812. Having finished his preparatory studies at the gymnasium, he entered the University of Breslau for the study of medicine. After having been promoted as doctor of medicine, he settled at Breslau, and in 1851, together with his family, became a member of the Roman Catholic Church. As a member of that Church he was especially active in ameliorating the Catholic press and societies of Silesia. He also distinguished himself as an author

by editing the poetical works of Angelus Silesius, better known as Scheffler (1862, 2 vols.), but more especially by the publication of his *Convertitenbilder aus dem 19. Jahrhundert* (5 vols.). Rosenthal died March 29, 1875. His *Convertitenbilder*, or biographical sketches of converts to the Roman Catholic Church in the 19th century, are a very important contribution to Church history, in which the lives of Jews and Protestants are described who joined the Romish Church in our century. The first volume (Schaffhausen, 1871-72) treats of the converts in Germany; the second, of those of England; the first division of the third (1869), of those of France and America; the second division of the third (1870) is devoted to Russia, besides giving a supplement to the former volumes. See the *Literarischer Handweiser*, 1875, p. 120. (B. P.)

Rosette, an ornament in front of the hat worn by prelates, dignitaries in a cathedral, and archdeacons. Savage (*Progress of a Divine*, 1735) says, "He gained a cassock, beaver, and a rose."—Walcott, *Sac. Archæol.* s. v.

Rosewell, Thomas (1), an English clergyman, was born near Bath in 1630, and educated at Pembroke College, Oxford. He became rector of Sutton Mandeville in 1657, was ejected for nonconformity in 1662, and was settled as minister at Rotherhithe in 1674. He was tried for high-treason in 1684 by judge Jeffreys for some expressions in a sermon, was condemned, but pardoned. He died in 1692. Rosewell published, *The Causes and Cure of the Pestilence* (Lond. 1665, sm. 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Rosewell, Thomas (2), an English Dissenting minister, was born at Rotherhithe in 1680, and educated partly in Scotland. He was for a time assistant to Mr. John Howe, at Silver Street, London, and then colleague with Mr. John Spademan at the same place till towards the close of his life, when he removed to Mare Street, Hackney, where he died in 1722. Rosewell had a share in the continuation of Henry's *Exposition*, the part assigned him being the Epistle to the Ephesians. He published a volume of *Sermons* (1706):—sixteen single *Sermons* (1706-20):—and *The Arraignment and Trial of Mr. Thomas Rosewell* (1718, 8vo).

Rosh (Heb. *Rôsh*, ראש, head, as often; Sept. *Ῥώς*), the name of a man and perhaps of a people. See also GALL.

1. The seventh named of ten sons of Benjamin, each of whom was head of a family in Israel (Gen. xlii, 21). B.C. cir. 1880. He is perhaps identical with the *RAPHA* of 1 Chron. viii, 2. See JACOB. "Kalisch has some long and rather perplexed observations on the discrepancies in the lists in Gen. xlii and Numb. xxvi, and specially as regards the sons of Benjamin. But the truth is that the two lists agree very well so far as Benjamin is concerned; for the only discrepancy that remains, when the absence of Becher and Gera from the list in Numb. is explained [see those words], is that, for the two names ראש and אחירא (Ehi and Rosh) in Gen., we have the one name אחירא (Ahiram) in Numb. If this last were written ראש, as it might be, the two texts would be almost identical, especially if written in the Samaritan character, in which the *shin* closely resembles the *mem*. That Ahiram is right we are quite sure, from the family of the Ahiramites, and from the non-mention elsewhere of Rosh, which, in fact, is not a proper name. The conclusion, therefore, seems certain that אחירא in Gen. is a mere clerical error, and that there is perfect agreement between the two lists. This view is strengthened by the further fact that in the word which follows Rosh, viz. Muppin, the initial *m* is an error for *sh*. It should be Shuppin, as in Numb. xxvi, 39; 1 Chron. vii, 12. The final *m* of Ahiram and the initial *sh* of Shuppin have thus been transposed."

2. The Heb. word *rôsh*, rendered "prince" (Ezek. xxxviii, 2, 3; xxxix, 1), ought to be read as a proper name, as in the Sept.—"the chief" or "prince of Rosh, Meshech, and Tubal." Rosh thus appears as the name of a northern nation, along with Meshech and Tubal (comp. *Rhoas*, in Pliny, vi, 4, which may be a city, a river, or a people, between Suavi and the district Ecrectice, on Caucasus; and *Rhûdsh*, an Iberian province in the same place, named by Russegger [*Beschreib. d. Caucas.* ii, 34]). Gesenius says, "Without much doubt *Rosh* designates the Russians, who are described by the Byzantine writers of the 10th century, under the name of the *Roos*, as inhabiting the northern parts of Taurus; and also by Ibn-Fosslian, an Arabic writer of the same period, under the name *Rus*, as dwelling upon the river Volga" (*Theas. Heb.* s. v.). The Oriental writers say that *Rus* was the eighth son of Japhet, and his descendants are, by Abulfaraj, always joined with the Bulgarians, Slavonians, and Alani. For other suppositions, see Stritter, *Memor. Populor. olim ad Danub., etc., Habitat.* ii, 957 sq.; Michaelis, *Suppl.* vi, 2224 sq.; Bochart, *Phal.* xiii, 13; Schultheß, *Parad.* p. 193; Herbelot, *Biblioth. Or.* iii, 137 sq. If the view of Gesenius be correct, in this name and tribe we have the first trace of the *Russ*, or *Russian*, nation. "Von Hammer identifies this name with *Rass* in the Koran (xxv, 40; i, 12), 'the peoples Aad, Thamud, and the Asshabir (or inhabitants) of Rass or Ross.' He considers that Mohammed had actually the passage of Ezekiel in view, and that 'Asshabir' corresponds to *Nasi*, the 'prince' of the A. V., and ἀρχοντα of the Sept. (*Sur les Origines Russes* [St. Petersburg, 1825], p. 24–29). The first certain mention of the Russians under this name is in a Latin Chronicle under the year A.D. 839, quoted by Bayer (*Origines Russicæ, Comment. Acad. Petropol.* [1726], p. 409). From the junction of *Tiras* with Meshech and Tubal in Gen. x, 2, Von Hammer conjectures the identity of *Tiras* and *Rosh* (p. 26). The name probably occurs again under the altered form of *Rasses* (q. v.) in Judith ii, 23—this time in the ancient Latin, and possibly also in the Syriac version, in connection with Thiras or Thars; but the passage is too corrupt to admit of any certain deduction from it. This early Biblical notice of so great an empire is doubly interesting from its being a solitary instance. No other name of any modern nation occurs in the Scriptures, and the obliteration of it by the A. V. is one of the many remarkable variations of our version from the meaning of the sacred text of the Old Test."

Rosh hash-Shanah. See TALMUD.

Rosicrucians, a pretended fraternity in Germany which existed simply in a book entitled *Fama Fraternitas dei loblichen Ordens des Rosenkreuzes*, and published in 1614. That book recited that Christian Rosenkreuz, a German of noble family, born in 1388, and educated in a convent, had in early youth visited the holy sepulchre, and had spent three years in Damascus with the Arabians, engaged in the study of physics and mathematics, after which he went to Fez by way of Egypt, and there pursued the study of magic. He learned among other things that every man is a microcosm. An attempt to dispense his new-found wisdom in Spain met with no encouragement, for which reason he determined to bestow his treasures on his fatherland. He built a sort of convent, which he named *Sanctus Spiritus*, and associated with himself three friends from the monastery to which he originally belonged. This was the institution of the Rosicrucian order, which was afterwards enlarged by the addition of four other persons. The members travelled everywhere to promote the reformation of the world, but met at their central house once a year. They claimed the possession of the highest knowledge and freedom from sickness and pain, though not from death. Each member chose his successor, but concealed his own death and place of burial. Even the tomb of Rosenkreuz himself was unknown un-

til after 120 years from the founding of the order, when a vault was discovered in his house which was brilliantly illumined from above by an artificial light, and which contained a round altar placed over the yet undecomposed body of the founder. The inscription "Post CXX annos patebo" over the door of the vault showed that the time had come for making known the order to the world. The learned were accordingly invited to carefully examine the arts described in the *Fama* (which was printed in five languages), and to publish their opinions through the press, as the hope was expressed that many would connect themselves with the order. Other writers appeared in confirmation or illustration of the *Fama*, e. g. a *Confession* (1615), and the *Chymische Hochzeit Christian Rosenkreuz* (1616). An immense excitement in Germany and adjoining lands was produced by these works, and called forth a flood of appreciative or condemnatory reviews. The interest felt at the time in secret arts, particularly that of making gold, led many to seek association with the fraternity, while others suspected a most dangerous heresy in theology and medicine; but it was remarkable that no actual member of the original Rosicrucian order was ever discovered. Every theological text-book contended at length against this heresy, and medical writers discovered its intention to destroy the reputation of Galen and supersede him by Paracelsus. Robert Fludd, in England, defended the order with zeal, and the court physician of the emperor Rudolph II, Michael Maier, asserted the truth of the statements contained in the *Fama*. The title of Rosicrucians was finally adopted by a society of alchemists, which originated at the Hague in 1622, and afterwards by other fraternities. Investigations made by such societies into the origin of the *Fama Fraternitas* led to the conclusion that the book was intended as a satire on the condition of the times. The authorship of the book was finally ascribed to Joh. Val. Andreae, the Württemberg theologian, and this opinion is still generally received.

A list of the older Rosicrucian literature may be found in *Missiv an d. hocherl. Bruderschaft d. Ordens d. goldenen u. Rosenkreuzes*, etc. (Leips. 1783); Chr. v. Murr, *Wahrer Ursprung d. Rosenkreuzer*, etc. (Sulzbach, 1803). See also Gottfr. Arnold, *Unparthei. Kirchen- u. Ketzer-Historie* (Frankft. 1729; Schaffhausen, 1742), pt. ii, ch. xviii and suppl., p. 947; Herder, *Hist. Zweifel über Fr. Nicolai's Buch*, etc., in the *Deutscher Merkur* of 1782 (*Sämmtl. Werke z. Phil. u. Gesch.* vol. xv); *Zur Lit. u. Kunst*, vol. xx; Buhle, *Ursprung u. vornehmste Schicksale der Orden d. Freimaurer u. Rosenkreuzer* (Gött. 1804); Nicolai, *Ueber Ursprung und Gesch. d. Freimaurer* (Berl. and Stettin, 1806); Hossbach, *Joh. Val. Andreae u. sein Zeitalter* (Berl. 1819); Guhrauer, *Verfasser u. ursprüngl. Zweck d. Fama Fraternitas*, etc., in *Niedner's Zeitsch. f. hist. Theologie*, 1852, p. 298–315.

Rosin, properly "naphtha" (νάφθα; Vulg. *naphtha*, so the Peshito-Syriac). In the Song of the Three Children (ver. 23), the servants of the king of Babylon are said to have "ceased not to make the oven hot with *rosin*, pitch, tow, and small wood." Pliny (ii, 101) mentions naphtha as a product of Babylon, similar in appearance to liquid bitumen, and having a remarkable affinity to fire. To this natural product (known also as Persian naphtha, petroleum, rock oil, Rangoon tar, Burmese naphtha, etc.) reference is made in the passage in question. Sir R. K. Porter thus describes the naphtha springs at Kirkûk, in Lower Kûrdistan, mentioned by Strabo (xvii, 738): "They are ten in number. For a considerable distance from them we felt the air sulphurous, but in drawing near it became worse, and we were all instantly struck with excruciating headaches. The springs consist of several pits or wells, seven or eight feet in diameter, and ten or twelve deep. The whole number are within the compass of five hundred yards. A flight of steps has been cut into each pit for the pur-

pose of approaching the fluid, which rises and falls according to the dryness or moisture of the weather. The natives lave it out with ladles into bags made of skins, which are carried on the backs of asses to Kirkûk, or to any other mart for its sale. . . . The Kirkûk naphtha is principally consumed by the markets in the south-west of Kîrdistan, while the pits not far from Kufri supply Bagdad and its environs. The Bagdad naphtha is black" (*Trav.* ii, 440). It is described by Dioscorides (i, 101) as the dregs of the Babylonian asphalt, and white in color. According to Plutarch (*Alex.* p. 35), Alexander first saw it in the city of Ecbatana, where the inhabitants exhibited its marvellous effects by strewing it along the street which led to his headquarters and setting it on fire. He then tried an experiment on a page who attended him, putting him into a bath of naphtha and setting light to it (Strabo, xvii 743), which nearly resulted in the boy's death. Plutarch suggests that it was naphtha in which Medea steeped the crown and robe which she gave to the daughter of Creon; and Suidas says that the Greeks called it "Medea's oil," but the Medes "naphtha." The Persian name is *naft*. Posidonius (in Strabo) relates that in Babylonia there were springs of black and white naphtha. The former, says Strabo (xvii, 743), were of liquid bitumen, which they burned in lamps instead of oil. The latter were of liquid sulphur. See BRUMEN; NAPHTHA.

Rosini, CARLO MARIA, an Italian archaeologist, was born at Naples, April 1, 1748. He studied among the Jesuits, embraced the ecclesiastical life, and in 1784 became the successor of Nicolo Ignarra as professor of Holy Scripture in a college at Naples. He was canon of the Cathedral of Naples till 1792, when he was elected bishop of Pozzuoli. He was in favor with the king, and received the position of councillor of state and grand almoner, and later, under Ferdinand I, was minister of public instruction. Rosini was a member of the Academy of Herculaneum after its reorganization, and was one of the most active in deciphering ancient MSS., of which he published a great number. They are included in the *Herculaneia Volumina* (Naples, 1793). Rosini died at Naples, Feb. 18, 1836. His works are all on archaeological subjects, the principal one being *Dissertatio Isagogica ad Herculaneensium Voluminum Explanationem* (ibid. 1797), a history of the destruction of Herculaneum and Pompeii. See Tipaldo, *Biogr. degli Ital. Illustri*; Rosa [Prospero della], *Vita di C. M. Rosini*.

Rösler, CHRISTIAN FRIEDRICH, a German doctor of theology and professor of history, was born June 19, 1736, at Canstadt, in Württemberg. For some time he labored as deacon at Vaihingen, and in 1777 he was called to Tübingen, where he died, March 20, 1821. He wrote, *Lehrbegriff der christl. Kirche in den 3 ersten Jahrhunderten* (Frankft.-on-the-Main, 1775);—*De Philosophia Vet. Ecclesie de Spiritu et de Mundo* (Tübingen, 1783);—*Bibliothek der Kirchenväter in Uebersetzungen u. Auszügen*, etc. (Leips. 1776-86). See Winer, *Handbuch der theol. Literatur*, i, 594, 598, 876; ii, 738. (B. P.)

Ross, Alexander, a Scottish divine and writer, was born at Aberdeen in 1590. He became chaplain to Charles I, and was his zealous partisan during the civil war, 1642-49. He was also master of the Southampton Free School, to which, at his death, in 1654, he left a handsome bequest. Among Ross's works was a *Continuation of the History of Sir Walter Raleigh*, A.M. 3604 to A.D. 1640 (Lond. 1652);—*Rerum Judaicarum* (ibid. 1617-32, 4 vols.);—*Exposition of the First Fourteen Chapters of Genesis*, by "Abrahame Rosse" (ibid. 1626);—*A View of the Jewish Religion* (ibid. 1656, small 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Ross, Edward Frederick, a Presbyterian divine, was born in New York city, Feb. 12, 1826. He graduated from Union College in 1848, and entered the Andover Theological Seminary, where he pursued his

theological studies for two years, when he entered the Union Theological Seminary, and graduated in 1851. He was ordained Sept. 26 of the same year, and was installed pastor of the Congregational Church of Morrisania, N. Y., in which position he remained until 1854, when he resigned and removed to Poughkeepsie. Here he remained without charge, and died at Pleasant Valley, N. Y., Feb. 22, 1855. (W. P. S.)

Ross, Hugh, a Presbyterian minister, was born in Rothiemurchus, Inverness-shire, Scotland, in 1797. He pursued his academic studies at the parish school of Abernethy, until, in 1813, the family emigrating to Nova Scotia and settling in Pictou, he became a student in the Pictou Academy. When he had finished his academic course, he studied theology with Rev. Dr. McCullough, was licensed by Pictou Presbytery in 1823, and, being able to preach in Gaelic, was soon after ordained as an evangelist, and spent some time in the island of Cape Breton. In 1827 he became pastor of the churches of Tatamagouchee and New Annan, and subsequently of Georgetown and Murray Harbor. He was moderator of the synod at the time of the disruption, and gave in his adherence to the Free Church. Mr. Ross died suddenly, Dec. 1, 1858. He was a man of fine gifts and an excellent preacher. See Wilson, *Presb. Hist. Almanac*, 1860, p. 234. (J. L. S.)

Ross (also Rous, Rouse, or Rows), **John** (1), usually called "the Antiquary of Warwick," was born in the town of that name in England, and educated there until prepared for the university. He then studied at Balliol College, Oxford, where he took the degree of A.M., and afterwards was installed canon of Osney. English antiquities became his favorite pursuit, and he travelled over the greater part of the kingdom to acquire information. He then took up his residence at Guy's Cliff, in Warwickshire, where he had a possession granted him either by the earl of Warwick or by Edward IV, and died Jan. 14, 1491. Of the manuscripts left by him the following were published: *Joannis Rossi Antiquarii Warwicensis Historia Rerum Angliæ Descripti* (Oxon. 1716, 8vo; 2d ed. 1745, 8vo);—*Joannis Rossi Historiola de Comitibus Warwicensibus* (1729, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Ross, John (2), an English clergyman, was a native of Herefordshire, and was educated at St. John's College, Cambridge, where he took his degree of D.D. In 1756 he became vicar of Frome, Somersetshire, bishop of Exeter in 1778, and died in 1792. He published six single *Sermons* (1756-85, 4to);—*A Defence of Epistles said to have been Written by Cicero to Brutus*;—*Marci Tullii Ciceronis Epistolarum ad Familiares Libri XVI* (1749, 2 vols. 8vo).

Ross, John (3), a Presbyterian minister, was born in Dublin, Ireland, July 23, 1783, of Roman Catholic parents, but was left in a state of orphanage when quite young. At the age of nineteen he left his friends secretly and went to sea. On his way to Liverpool he was seized by a press-gang and put on board a man-of-war. Afterwards, at Barbadoes and elsewhere, he was pressed a second and a third time. His numerous desertions and wonderful escapes would constitute the staple of a romance. He at last reached the United States, and went to work at his early trade of shoemaker at New London, Conn. He was still a bigoted Roman Catholic; but as there was no church of that denomination in the town, he was in some degree weaned from his attachment and, through contact with Protestants, brought to reflect upon his condition, and eventually led to realize that he was a sinner, and that something beyond the power of priestly absolution was necessary to give his troubled conscience rest. By prayer to the Friend and Saviour of sinners, he found pardon and peace. Soon after his conversion his mind was turned to the ministry, and Providence wonderfully opened the way for him, as it does for all who are truly called to that work. By the

aid of an association of ladies he was enabled to enter Middlebury College, Vt., where he graduated in 1811. He entered Princeton Theological Seminary in 1813. After remaining in the seminary over two years, Mr. Ross preached as a missionary for about three months in the suburbs of Philadelphia. He was educated for the foreign field, and was in readiness to go to it, but the Board had not the funds to send him. He was therefore sent to Somerset and Bedford, Pa. Having received a call from the Church at Somerset, he was ordained as pastor by the Presbytery of Redstone in 1817. From Somerset he went to Ripley, O., in 1819, where he remained about four years, and afterwards went to Indiana, preaching at different points and for various periods of time on his way. In both Ohio and Indiana he did much missionary work, travelling on horseback over wild and wide ranges of country. He preached several sermons in the old fort at Fort Wayne, Ind., when there were very few houses in that now large and flourishing city, and he is said to have been the first Presbyterian minister that ever preached in that town. In September, 1824, he settled at Richmond, Ia., and was pastor of Beulah Presbyterian Church for twenty-five years, from 1824 to 1849. From the minutes of the General Assembly it appears that in 1849 he was a member of the Presbytery of Muncie, and continued such until his death. In 1849 he was a stated supply at Burlington, Ia., and in 1850 at Windsor, O., being yet quite vigorous for his years. After leaving Richmond, he resided in New Paris, O., Milton, Connersville, Knightstown, Burlington, Muncie, and Tipton, Ia. In labors, he was more abundant as a pioneer in what was then the "far West." As long as he could stand in the pulpit he was fond of preaching, and sometimes preached with the fire of his younger days long after he had become an octogenarian. He lived to be the oldest minister in the Presbyterian Church, and died at the house of his daughter in Tipton, March 11, 1876. (W. P. S.)

Ross, William, a minister of the Methodist Episcopal Church, was born in Tyringham, Mass., Feb. 10, 1792. He was converted in his seventeenth year, and was received as a probationer in the New York Conference in 1812. In May, 1824, he attended the General Conference in Baltimore, where he signalized himself as the author of a very able and luminous report on missions. He died Feb. 10, 1825. He was a diligent student and an eloquent preacher. See *Minutes of Annual Conferences*, 1825, p. 476; Sprague, *Annals of the Amer. Pulpit*, vii, 524.

Ross, William Charles, Sir, an English miniature-painter, was born in London, June, 1794. In 1837 he was appointed miniature-painter to the queen. In 1843 he gained a prize of one hundred pounds for a picture of *The Angel Raphael Discoursing with Adam*. His death occurred in 1860.

Ross, William Z., a minister of the Methodist Episcopal Church, was born in Licking County, O., April 24, 1823. At the age of sixteen he professed faith in Christ and united with the Methodist Episcopal Church. He was licensed as a local preacher, and was admitted on trial in the Ohio Conference in 1853. In 1865 he was appointed missionary to Tennessee and stationed at Shelbyville, where he died, Oct. 11, 1866. His preaching was marked by extraordinary force and pungency of application. See *Minutes of Annual Conferences*, 1867, p. 259.

Rosshirt, Conrad Eugen Franz, a Roman Catholic divine, was born in 1793 at Oberscheinfeld, in Franconia. He studied at Landshut and Erlangen, and in 1817 he was already professor of canon-law in the latter place. He was one of the oldest professors of canon-law in Germany, and died June 4, 1873, at Heidelberg. He wrote, *Lehrbuch des Kirchenrechts* (3d ed. Schaffhausen, 1858):—*Von den falschen Decretalen u. von einigen neuen in Bamberg entdeckten Handschriften der falschen Decretalen* (Heidellb. 1846):—*Zu den kirchen-*

rechtlichen Quellen des ersten Jahrtausends und zu den pseudoisidorischen Decretalen (ibid. 1849):—*Canonisches Recht* (Schaffhausen, 1857):—*Manuale Latinitatis Juris Canonici, Rerum Moralium et Theologicarum, Brevissumis Annotationibus Instructum, quo Lexici Juris Canonici Lineamenta Proponere Studuit* (ibid. 1862):—*Beiträge zum Kirchenrecht* (Heidellb. 1863). See Zuchold, *Bibl. Theol.* p. 1088; *Literar. Handweiser*, 1873, p. 300. (B. P.)

Rossi, Azariah (Ben-Moses) de, a Jewish scholar of the celebrated family called in Hebrew *Min ha-Adomim*, was born in Mantua about 1514. Naturally endowed with extraordinary powers of mind, keenness of perception, refinement of taste, and with an insatiable desire for the acquisition of knowledge, De Rossi devoted himself with unwearied assiduity and zeal to the study of Hebrew literature, archæology, history, the writings of ancient Greece and Rome, and even the fathers, which knowledge was of great use to him afterwards, when he devoted himself more especially to the criticism of the Hebrew language and the sacred text. Having prosecuted his studies in Mantua, Ferrara, Ancona, Sabionetta, Bologna, etc., he went back to Ferrara with the accumulated learning of more than half a century, the results of which he now communicated to the world in his celebrated work entitled *מאור עינים*, *The Light of the Eyes* (Mantua, 1574-75). The work consists of three parts, subdivided into chapters as follows:

Part I, which is entitled *קול אֱלֹהִים*, *The Voice of God* (republished at Vienna in 1829), which was occasioned by the terrible earthquake at Ferrara, Nov. 18, 1570, and which De Rossi himself witnessed, contains, in easy style, a graphic description of the event. He believes it a duty to relate to posterity how the power of the Creator had manifested itself. He dilates on the subject, to prove that he does not altogether agree with Greek philosophers, who attribute sudden disasters to natural causes, but argues forcibly and (quoting also Scriptural and Rabbinical authorities) concludes that the invisible hand of God uses nature—its own creation—to mete out men's deserts. He then branches out to comment scientifically on narratives in sacred and secular works relative to earthquakes, and remarks that what happened to his wife would have confounded an Æsculapius and a Hippocrates. She had moved into her daughter's room shortly before the roof of the house fell, by a sudden shock, into her own chambers. The fright occasioned turned the color of her skin into a deep yellow, and from that moment she craved for nothing but salt. Bread and salt became to her a most delicious food. Yet that morbid desire he holds to have been her cure. Without taking any medicine, it gradually decreased, and her natural color returned. Thereupon De Rossi reasons about our ignorance of the wonders of nature, and suggests the possibility that the quantity of pure salt his wife ate destroyed the effect of the saline and sulphuric particles which may have entered her system at the upheaving of the earth.

Part II, which is entitled *תַּרְגִּים זָקֵנִים*, *The Story of the Aged* (republished at Vienna in 1829), contains an account of the Sept. version of the Bible, chiefly from the letter of Aristæus, a confidential friend of king Ptolemy Philadelphus, communicated to his brother Phylocrates. De Rossi accepted it as true in all its details. Modern criticism has seen where it is at fault, and declared it spurious. That a Greek translation of the Pentateuch—not of the whole Bible—was made under the auspices of king Ptolemy cannot be doubted. Besides Josephus, Philo, and the fathers of the Christian Church, the Talmud has recorded the incident, somewhat hyperbolically, in the treatise *Megillah*. But that the so-called Sept. version of the entire Scriptures should have had the origin related above is impossible. See SEPTUAGINT.

Part III, which is divided into two divisions, respectively called *אֲמָרָה בִּינָה*, *Word of Understanding*, and *יָמֵי עוֹלָם*, *Chronology*, consists of four sections, subdivided again into sixty chapters. The first division, with its two sections (*מֵאֲמָרִים*), treats, in ch. i-xiii, of the use of the fathers; the heathen writings; Philo; the Jewish sects, especially the Essenes; the Sept. and the Aramaic versions; the history of the Jews in Alexandria and Cyrene; the Bar Kochba revolts; the Ten Tribes; the Talmudic story about Alexander the Great's entry into Jerusalem; and of the Talmudic theory of nature. The second section, embracing ch. xiv-xxviii, contains treatises on the explanation of Scripture by ancient sages; on the Midrash and Hagadic exegesis; on sundry striking differences between

Christian and Jewish writers; the old Persian list of kings; on the different eras of the Jewish chronology; Josephus; Seder Olam; on the series of high-priests during the second Temple, etc., published with the second part (Vienna, 1829-30). The third section treats, in ch. xxix-xliv, of the Biblical chronology and the Jewish Calendar; of old Persian kings; extracts from and criticisms on Philo, Josephus, etc. The fourth section, embracing ch. xlv-lx, descends upon Jewish antiquities; Aquila and Onkelos; the antiquity of the letters and the vowel-points; Hebrew poetry, etc.

This work, considered as a whole, though not distinguished by scientific correctness or historical accuracy, has nevertheless always been a favorite among Hebrew scholars, and parts of it have been translated into Latin, as ch. xxiii, xxv, xxxiii, xxxv, by Voorst, in his translation of the צִמְחָה דְּרַר (Leyden, 1644); ch. viii, xiv, xix, by Meyer, in his version of the כִּרְרָה נִלְכָּם (Amst. 1699); ch. ix, xlii, lix, by Buxtorf, in his *Tractatus de Antiquitate Punctorum* (Basel, 1648); ch. i, lx, by the same, in his translation of *Kuzari* (ibid. 1660), and ch. lvi, lviii, in his *Dissertatio de Litteris Heb.* (ibid. 1662); ch. iii, v, vii, viii, ix, xix, xx, xlviii, by Morin, in his *Exercitationes Biblicae* (Paris, 1638), p. 185, 188, 190, 191, 230, 287, 314, 342, 563; ch. ii, viii, xv, xvi, xxii, xlv, li, lvi, lvii, lix, by De Voisin, in his edition of Martin's *Pugio Fidei adversus Mauros et Judaeos*, etc. (ibid. 1651), p. 75, 77, 118, 122, 127, 128, 129, 142, 144, 373; ch. ix, by Van Dale, in his *Dissertatio super Aristeam*, etc. (Amst. 1705), p. 174; ch. ix, xxii, by Bartolucci, in his *Bibliotheca Magna Rabbinica* (Rome, 1675-93), i, 680; ii, 800; ch. xvi and xxi, by Bochart, in his *Hierozyicon* (Leyden, 1712), pt. I, ch. vi; II, 569; and ch. lvi, by Hottinger, in his *Cippi Hebraei* (Heidelberg, 1662), p. 123. The sixteenth chapter has been translated into English by Raphall, in the *Hebrew Review and Magazine*, ii, 170 (treating "of the gnat which entered the skull of Titus," as related in the Talmud); while the sixteenth chapter has been translated by bishop Lowth, in the preliminary dissertation to his transl. of *Isaiah* (Lond. 1835), p. xxviii, etc. De Rossi has criticised his material in so liberal a manner that many of the Jews proscribed the work, while others wrote in refutation of some of his liberal criticisms. Prominent among these were R. Moses Provencale, of Mantua, and R. Isaac Finzi, of Pesaro. De Rossi subjoined to some copies of the *Meor Enayim* itself a reply to the former, and wrote a separate work entitled מִצְרָה לְכֶסֶף, *The Refining-pot for Silver*, after Prov. xvii, 3. This work, which is an essential supplement to the *Meor Enayim*, has recently been published by Filipowski (Edinb. 1854), and by L. Zunz, with the *Meor Enayim* (Wilna, 1863-66, 3 vols.). De Rossi also wrote *Poems and Epigraphs*, שִׁירֵים וְהִנָּחִים (Venice, 1586). Three years before his death, De Rossi had a dream. A man stood by him, and voices cried, "Dost thou not see the personage looking on thee? He is a prophet." "If so," said Azariah, addressing the stranger, "if thou art indeed inspired, let me know how long I have to live." "Three years yet," was the answer. By the wayside of Mantua the bones of the illustrious writer rested, and on his grave a significant inscription was placed, when the dream proved true, in Kislev, 5338 (i. e. 1577). The stone shared the fate of him who lay buried beneath. Both were rudely cast away to some unknown spot by the Italian monks, who sought for more space to build up monasteries.

Rossi (in Lat. *De Rubéis*), **Bernardo Maria de**, an Italian scholar, was born at Cividale di Friuli, Jan. 18, 1687. At the age of seventeen he took the vows of the Order of St. Dominic; and after finishing his studies taught for three years in a convent at Venice. In 1718 he went to Vienna, where he made the acquaintance of the learned Apostolo Zeno. On his return, he accepted the chair of theology in the same institution in which he had formerly taught. In 1730 he resigned his chair and devoted himself wholly to study and the most rigorous asceticism. In 1722 he accompanied an embassy to the court of France. He was librarian of his convent, and enriched it by the addition of many rare and valuable works. De Rossi died Feb. 8, 1775. His writings are very numerous, consisting principally of historical and religious annals. Among them are, *De Fabula Monachi Benedictini D. Thomae Aquinatis* (Venice, 1724); — *De Peccato Originali* (ibid. 1757); — *De Charitate* (ibid. 1758); — *Dissertationes Variae Eruditionis* (ibid. 1762). See Fabroni, *Vite Italorum*.

Rossi, Giovanni Bernardo de, an eminent Italian Orientalist, was born at Castel-Nuovo, in Piedmont, Oct. 25, 1742. In 1766 he was ordained priest at Turin, and in the same year received the degree of doctor of theology. For several years he devoted himself to the study of the Oriental languages, and he was also acquainted with the greater part of those of Europe. In 1769 he was employed in the Museum of Turin, and soon after was called to the chair of Oriental languages at Parma, which position he held until 1821. During the remainder of his life he was employed in writing and editing philological and bibliographical works. Many of these were printed in the most elegant style, and are to-day considered models of typography. His collection of rare Hebrew manuscripts was sold to Maria Louisa in 1816. De Rossi died at Parma in March, 1831. Among his works are, *Canticum seu Poema Hebraicum* (Turin, 1764); — *Della Lingua Propria di Cristo e degli Ebrei della Palestina da' Tempi de' Maccabei* (Parma, 1772); — *Della Vana Aspettazione degli Ebrei del loro Messia* (ibid. 1773); — *Variae Lectiones Veteris Testamenti* (ibid. 1784-88), a most valuable contribution to Biblical criticism (q. v.); — *Introduzione alla Sacra Scrittura* (ibid. 1817).

Rossi, Pasquale, called *Pasqualino*, a painter of the Roman school, was born at Vicenza in 1641, and died about 1718. His works are to be found in the principal galleries. Among them are, *Christ in the Garden*; — *The Baptism of Christ*; — *St. Gregory Celebrating Mass*; — and the *Adoration of the Shepherds*.

Rossignol, Jean Joseph, a French Jesuit, was born at Pisse, among the Upper Alps, July 3, 1726. He joined the Order of St. Ignatius in 1742, and taught philosophy at Embrun, near Marseilles. In 1761 he went to Wilna, Poland, and there taught mathematics and astronomy, and constructed the observatory of the city. In 1764 he took the chair of mathematics in the College of the Nobles at Milan, and here he published his *Œuvres*. On the suppression of his order, he settled at Embrun; but on account of the violent opposition which he showed to the civil constitution of the clergy, he was obliged to establish himself at Turin. Here he was maintained by the liberality of count de Melzi, a former pupil. Rossignol died in 1817. His works were numerous, and are said to have exceeded one hundred, but they are very rare. The principal ones are, *Thèses Générales de Théologie, de Philosophie, de Mathématiques* (1757); — *Thèses de Physique, d'Astronomie, et d'Histoire Naturelle* (1759); — *Vues Philosophiques sur*

Eucharistie (Embrun, 1776). See *Feuille Hebdomadaire de Turin*.

Rossignoli, BERNARDINO, an Italian theologian, was born at Ormea in 1563. At the age of sixteen he joined the Society of Jesus, subsequently taught theology at Milan, was rector of several colleges, and was provincial at Rome. At the time of his death, June 5, 1613, he was rector of a college at Turin. Rossignoli's writings are, *De Disciplina Christianæ Perfectionis Lib. I* (Ingolstadt, 1600) :—*De Actionibus Virtutis Lib. II* (Venice, 1603). These two works passed through many editions, and the first was translated into French (Paris, 1606). Several other works have been attributed to Rossignoli, but it is probable that he was merely the translator. At the time of the interest excited in the *De Imitatione Christi*, Rossignoli was the first to attract attention to the MS. of this work, bearing the name of abbé Jean Gerson. See Rossotto, *Syllabus script. Pedemontii*.

Rössler, CARL GOTTFRIED, a Lutheran divine, was born in Leipzig. He was first deacon at Merseburg, and afterwards superintendent at the same place, where he died, Aug. 16, 1837. He published *Predigten und Gelegenheitsreden* (Merseburg, 1829) :—*De Scripturæ Sacræ versione a Luthero Temporibus inde ad nostra usque in Ecclesia Evangelico-Lutherana constanter caute passim emendanda* (Lips. 1836). See Zuchold, *Bibl. Theol.* p. 1088; Winer, *Handbuch der theol. Literatur*, ii, 103, 738. (B. P.)

Rosso (in French, *Roux*), GIOVANNI BATISTA DEL, an architect and painter of the Florentine school, was born at Florence in 1496. It is not known whether he ever studied under any of the masters of his time, but his style was probably formed from copying the works of Angelo and Parmigiano. His life was one of agitation, and, during his earlier years, a continued disappointment. Finding that his work was not appreciated in his native city, he left for Rome. Here his success was somewhat greater; but, after the sack of the city in 1527, he fell into the hands of soldiers, who robbed him of all he possessed. He went to Perugia, and after the city was quieted, returned to Rome. In 1530 he went to France, where he was well received by Francis I; and his troubles seemed at an end. He was superintendent of the works at Fontainebleau, and many of the frescos are by his own hand. During the triumphal passage of Charles V through France, the arches which were erected in his honor were designed by Rosso. As a reward for his work, Francis added to the pension of the artist and gave him a canonicate in the Sainte-Chapelle. He lived in luxury and high favor at court; but an unfortunate affair, involving his honesty, so wrought upon his mind that he poisoned himself in 1541. The pictures of Rosso are not often seen in galleries, but there are a few which may be mentioned. *Moses Defending the Daughters of Jethro* :—*The Four Seasons* :—*Christ in the Tomb* :—*Madonna, with St. Sebastian and other Saints* :—and the *Marriage of the Virgin*.

Rostagno, FRANCISCO GURICO, a minister of the Waldensian Church, was born in the year 1838 in the village of Prali, in the mountains of The Valleys. Delicate health prevented his going to school till he was about fifteen years of age; but, being a diligent student, he soon acquired the necessary requirements to make him a useful minister of the Gospel. Being thoroughly acquainted with the Italian language and literature, he wrote many articles for the *Revista Cristiana*, his last being on the "Religion of Alessandro Manzoni." In the year 1866 he was ordained for the Waldensian ministry, and a year afterwards he was put in charge of the small congregations of Verona and Mantua, where he labored until 1872. He was then called to Leghorn; and at this important and difficult post he not only supplied the spiritual wants of his own coreligionists, but also arranged to give a course of addresses especially to Jews

upon the subject of the need of the Messiah—"What say the Scriptures about His Coming?" "Jesus of Nazareth Borne Testimony to in the Old Testament, in the Prophecies, and the Types." But soon he was removed from his earthly post, and died in January, 1874. See *Jewish Intelligencer*, 1874, p. 85 sq. (B. P.)

Rosweyde, HERIBERT, a Dutch Jesuit and historian, was born at Utrecht, Jan. 22, 1569. At the age of twenty he entered the Society of Jesus, taught philosophy at Douai and Antwerp, and finally gave his whole time to the study of ecclesiastical antiquities, exploring the libraries of all Belgium to gain information on the subject. Rosweyde died at Antwerp, Oct. 5, 1629. His works are numerous, and were all published at Antwerp. Among them are, *Fasti Sanctorum* (1607) :—*Vitæ Patrum* (1615) :—*Historia Ecclesiastica* (1623) :—*Vitæ Sanctorum Virginum* (1626). See Foppens, *Bibl. Belgica*; Dupin, *Bibl. des Auteurs Ecclesiastiques*.

Roswitha, a nun of Gandersheim, in Brunswick, Germany, who lived at the close of the 10th century, and is noteworthy because of certain poetical compositions from her pen which have come down to our time. They are written in rhymed hexameters, and include panegyrics on the Virgin, St. Gangolf, St. Dionysius, St. Agnes, the *Ascensio Domini*, etc. She also wrote Christian comedies in prose, after the manner of Terence, in which she celebrated the victory of heavenly over fleshly love, and of Christian martyrdom over heathen passion, and two historical poems in hexameter—one of which rehearses the history of her convent, and the other that of the emperor Otho I (*Carmen de Gestis Ottonis I Imperatoris*). The latter possesses some historical interest, though based on the statements of the friends of Otho and showing marks of her ignorance of the world. It contains much fine description, and is written in superior language. Its form approaches that of the Latin epos, particularly of Virgil. The *Carmen de Primordia Ccenobii Gandersheimensis* includes the family history of the house of Saxony, and thus becomes somewhat important to general German history.

Roswitha's works were first published by Conrad Celtes (Nuremberg, 1501, fol.). Pertz, *Mon. Germ. Hist. Script.* iv, 306-335, contains the two historical poems and a life of Roswitha. A complete edition was given by Dr. Barrach, of the *Germanisches Museum* (1857). See Gfrörer, *Kirchengeschichte*, III, iii, 1357; Contzen, *Geschichtschreiber der sächsischen Kaiserzeit* (Regensburg and Augsburg, 1837), p. 109 sq.; Giesebrecht, *Geschichte der deutsch. Kaiserzeit*, i, 742.

Roszel, Stephen Asbury, son of the following, was born in Georgetown, D. C., Feb. 18, 1811. At the age of seventeen he had made himself acquainted with the whole course of English and classical literature required for graduation from the best colleges. His conversion took place in his sixteenth year, and about the same time he became associated with his brother in a classical school in Baltimore. He studied law and was admitted to the Baltimore bar, but soon decided to give up the profession. He acted for several years as principal of the grammar-school of Dickinson College, and in 1838 was admitted to the Baltimore Conference on trial. He dissolved his connection with the institution in 1839, sustained a supernumerary relation for a year, and then resumed active work. He was elected in 1848 a delegate to the General Conference held at Pittsburgh, Pa., and was for eight years secretary of his own conference. He died in Alexandria, Va., Feb. 20, 1852. See *Minutes of Annual Conferences*, 1852, p. 10.

Roszel, Stephen G., a minister of the Methodist Episcopal Church, was born in Loudon County, Va., April 8, 1770. He was converted at the age of sixteen, and soon after united with the Church. He entered the travelling connection in 1789, although, for some reason, his name is not found on the minutes until the

following year, when he appears among those who remain on trial. He served the Church as preacher in charge, presiding elder, as agent for Dickinson College, and in the General Conference, until his death, which took place at Leesburg, Va., May 14, 1841. See Sprague, *Annals of the Amer. Pulpit*, vii, 179; *Minutes of Annual Conferences*, 1842.

Roszfeld (in Latin, *Rosinus*), JOHANN, a German antiquary, was born at Eisenach in 1551. He studied at Jena, and in 1579 became sub-director of the gymnasium at Ratisbon, but after a few years he gave up this position to enter the evangelical ministry, and preached at Naumburg, in Saxony, until his death by the plague, Oct. 5, 1626. His principal works are: *Antiquitatum Romanarum Corpus Absolutissimum* (Basle, 1583; Lyons, 1585):—*Exempla Pietatis Illustris* (Jena, 1602).

Rota, in Norse mythology, was one of the Walkures, or Odin's messengers, to select the victims who were to fall in death.

ROTA, in Lapp mythology, was an evil god of hell, the ruler of the place of punishment for the souls of transgressors.

Rota Romāna (or SACRA ROTA), the supreme papal tribunal at Rome, was instituted by pope John XXII in A.D. 1326, and improved by Sixtus IV and Benedict XIV. The name is variously derived from the circular arrangement of the judges' seats, or the form in which the calendars are arranged, etc.; comp. Dom. Bernino, *Il Tribunale della S. Rota Rom.* (Rome, 1717) for etymology of the title and history of the court. The Rota was long the supreme court of the entire Roman Catholic Church; but legal causes in the Church in foreign parts are now generally tried by *judices in partibus* who have been delegated by the pope. The Rota is divided into two colleges, or senates, one of which forms a lower court of appeal, while the other has supreme jurisdiction. Each senate is composed of at least five judges, namely, a referendary (termed a *ponens*), who presides, and four associates (*correspondentes*). The action of the higher senate may, however, be subjected to the process of *restitutio in integrum*, on which the matter is referred to the *plenum* of the Rota. This *plenum* consists of twelve members (*Uditori Romani*, or *Auditores Rote*), each of whom is assisted by a lawyer (*adjutante di studio*). The senior judge is denominated *dean*, and takes the chair. Sessions are held on Monday and Friday of every week, except in the vacation during August and September, in the Vatican. The decisions of this court have been gathered into different collections, the first in 1470, etc. A more recent edition containing selected trials is *Decis. S. Rote R. Recentiores Selecte* (Venet. 1697, xxv parts in xix vols. fol.). They are also published in full in annual issues. See CURIA ROMANA.

Rote, a mediæval musical instrument, not unlike the ancient *psalterium*.

Rotger (RUOTGER, RUTGER), archbishop of Treves from 918 to 928. He was chosen, without intervention of the king, by the clergy and people of the Church of Treves, and by the wisdom and energy of his administration justified their choice. He induced Giselbert, the duke of Lorraine, to restore the abbey of St. Servetius at Maestricht, which he had seized, to the archbishopric of Treves, and was the leading agent in overcoming the faction of nobles who sought to transfer Lorraine to the usurper Rudolph of Burgundy after that province had been forever ceded (923) to Henry, king of Germany. He also sustained a literary intercourse with Floard of Rheims, the learned author of the *Hist. Rhenens.*, and induced him to write a large poetical work on the triumphs of Christ and various Palestinian and Italian saints, the manuscript of which was still preserved in the library of the cathedral at Treves in the 17th century. His principal ambition, however, was to

regulate the affairs of the Church in the province of Treves, and to administer the canons in the spirit of the councils. He accordingly instituted a collection of canons from the fathers and the popes, and submitted it to a provincial synod of the suffragans of Metz, Verdun, and Tull at Treves in 927. See Wetzer u. Welte, *Kirchen-Lex.* s. v.; and comp. *Hist. de la France*, vii, 201-203; Brower, *Annal. Trev.* lib. ix, n. 64-79.

Rötger, GOTTFRIED SEBASTIAN, a German doctor of theology, was born at Klein-Germersleben, not far from Magdeburg, April 5, 1749, and died May 16, 1831, as director of the cloister school and provost of Magdeburg. He wrote: *Versuch einer magdeburgischen Reformationsgeschichte* (Magdeburg, 1792):—*Kirchliche Gebetsübungen* (Bonn, 1824). See Winer, *Handbuch der theol. Literatur*, i, 806; ii, 283, 389, 738. (B. P.)

Roth, KARL JOHANN FRIEDRICH VON, *juris utriusque doctor*, and during twenty years president of the Protestant high consistory at Munich, fills an important place in connection with the history of the Church in Bavaria from 1828 to 1848. He was born at Vaihingen, in Württemberg, Jan. 23, 1780, and trained in the study of the ancient languages from early childhood. In his youth he shared in the enthusiasm of the times for theories set afloat by Voltaire and still more by Rousseau, and consequently chose the law for his profession instead of theology, as both his father and himself had originally intended. Entering the University of Tübingen in 1797, he found a judicious guide in Malblanc, and, through the study of the sources of Roman law, acquired the historical faculty which distinguished him through life. At the age of twenty-one he published a treatise, *De Re Romanorum Municipali*, which won for him the doctorate of laws and secured the approval of prominent legal minds. He became jurisconsult to the then free city of Nuremberg, in which position he was led to study the subject of finance, which he had not previously examined; and when the city was transferred to Bavaria he entered the service of that kingdom in the finance department. He was elected to membership in the Royal Academy of Sciences in 1813; and the publication in 1817 of the *Weisheit Dr. Martin Luther's*—extracted apothegms from the reformer's writings—and of *Hamann's Werke* in 1825 gave evidence that his conversion to orthodox views in religion had progressed side by side with his growing attainments in scientific culture. In 1828 king Louis I. appointed Roth to the presidency of the high consistory. When Roth received this appointment, the reaction against rationalism had begun, and a number of clergymen were conducting a brave battle for its overthrow. The attitude of Roth, who made it his business to foster the good wherever it might exist, gave them the encouragement they needed for a successful prosecution of their task. In other respects his work was marked out for him. His department was thoroughly organized into a high consistory, three consistories, and a number of deaneries, with district and general synods having advisory jurisdiction and the right to propose measures. It was requisite that this machinery should be quietly but energetically worked, and Roth succeeded in his task to a degree that made the Bavarian Church a model of systematized powers and effective discipline. In the matter of training theologians for the future, Roth was likewise earnestly employed. He discovered men like Höfling, Thomasius, and Harless, and had them appointed to the faculty of Erlangen, the local university. He also originated the *ephorate* to supervise the progress of theological students and report directly to the ministry of the interior, and founded the Preachers' Seminary at Munich to receive a number of candidates who had passed the first examination, and afford them two additional years of practical training under the direction of the high consistory. The accession of Von Abel in 1837 to the ministry of the interior began a new æra, in which the Protestants of the kingdom were

systematically oppressed and the Roman Catholics favored. An order by which all soldiers, including those of the *Landwehr*, which consists of citizens, were obliged to kneel whenever the Romish *Sanctissimum* should be carried about excited great dissatisfaction; and Roth was censured in this business because it was believed that he had been timid or indifferent in contending for the rights of Protestants. Later events have shown that he was acting from prudential motives which would not permit him to risk all while striving to secure a particular end; but the feeling against him rose to such a height as to compel his retirement from the high consistory in March, 1848. The ephorate was likewise rejected by the students in that year of revolts. The result of the persecution was, however, beneficial to the cause of Protestantism in the end, because it united its adherents, increased their spirituality, and settled their determination to insist on a recognition of their rights; and at the proper moment a letter to the king from Roth secured a revocation of the military order which was so greatly resented. Roth was, soon after his retirement, called to a seat in the council of state; but, after completing the fiftieth year of his official life, he sought and obtained a dismissal to private life. He died Jan. 21, 1852. A collection of Roth's writings was published by himself at Frankfort, consisting chiefly of panegyrics and addresses. He also edited the *Gelehrten Anzeigen*, issued by the Academy of Sciences, from 1835 to 1850, enriching them with articles of his own and with reviews of English, French, and other foreign works.

Rothaan, JOHN PHILIP, a Dutch Jesuit, was born Nov. 23, 1785, at Amsterdam, entered, Feb. 3, 1804, at Dinaburg, in Russia, the Society of Jesus, and became professor of rhetoric, Greek, and Hebrew at Potosk, in Russia. When the Jesuits had to leave the Russian empire, he retired into Switzerland, and in 1829 was elected vicar-general of the order. Being obliged to leave Rome on account of the Italian revolution, he visited a great part of the European provinces of the Jesuits, returned again to Rome, and called together a general congregation of the order; but before it convened he died, May 8, 1853. He published, *Exercitia S. P. Ignatii Loyolæ* (Rome, 1835; Paris, 1865; German translation, Regensburg, 1855);—*De Ratione Meditandi* (Rome, 1847; German translation, Regensburg, 1853; Vienna, 1857). (B. P.)

Rothe, RICHARD, an eminent German divine, was born at Posen, Jan. 28, 1799, and became successively member, professor, director, and ephorus of the Theological Seminary of Wittenberg. He was for five years chaplain of the Prussian embassy at Rome, conducted a theological seminary at Heidelberg for twelve years, and was a professor of theology at Bonn and Heidelberg, where he died, Aug. 20, 1867. His religious views are tinged with the philosophy of Schleiermacher and Hegel. He published, *Die Anfänge der christlichen Kirche und ihre Verfassung* (1837);—*Zur Dogmatik* (1863);—and *Theologische Ethik* (1845-48, 3 vols.; revised by Holtzman, 1867-71, 5 vols., with the author's posthumous notes). Since his death there have appeared his university lectures, *Dogmatik* (1870); essays, *Stille Stunden* (1872), and his lectures on Church history (1875, edited by Weingarten). For the best account of his life, see Nippold, *Richard Rothe* (Wittenberg, 1873). See also the *Studien und Kritiken*, 1869, No. 3; *Meth. Quir.* Rev. July, 1872; *Bib. Sacra*, July and Oct. 1874. See ETHICS.

Rothem. See JUNIPER.

Rotheram (or **Rotherham**), JOHN, an English divine, was born in Cumberland, and was educated at Queen's College, Oxford. He became fellow of University College, Oxford, rector of Houghton-le-Spring, and in 1769 vicar of Seaham. Rotheram died in 1788. Among his published works are, *Sketch of the One Great Argument for the Truth of Christianity* (Oxford, 1752-

54, 8vo);—*Force of the Argument for the Truth of Christianity from Prophecy* (2d ed. 1753, 8vo);—*Origin of Faith* (1761, 8vo);—*Apology for the Athanasian Creed* (Lond. 1762, 2 vols. 8vo);—*On Faith* (1766-68, 8vo);—besides *Sermons and Essays*.

Rothwell, RICHARD, an English divine, was born in Lancashire, near Bolton-in-the-Moors, about 1563. He received his education at Cambridge, and, after spending a number of years in the university, was ordained presbyter by Dr. Whitgift, archbishop of Canterbury. He was made chaplain to a regiment under the earl of Essex in Ireland; and afterwards, refusing several benefices, was for a time lecturer at a chapel in Lancashire, and domestic chaplain to the earl of Devonshire. Still later, he spent most of his time in the bishopric of Durham, having gone there at the proposal of lady Bowes. His death took place in 1627.

Rotuman Version. About 300 miles north of Fiji is an island called *Rotumah*, with a population of less than 3000, and-until lately wholly enveloped in heathen darkness. In 1865 the Rev. W. Fletcher, of the Wesleyan Missionary Society, commenced missionary work among the people, and his three years' labor in that place resulted in bringing a large proportion of the population under the influence of the Gospel. In the year 1869 Mr. Fletcher commenced a translation of the New Test. in the Rotuman dialect, which was printed at Sydney, and has been in circulation since 1871. Mr. Fletcher, in consequence of the extremely trying character of the climate, was compelled to leave the island, but his translation was prepared with all possible promptitude. European missionaries are not allowed to reside permanently in Rotumah, and the future progress of the mission must depend mainly on the efforts of native teachers and the presence among the people of the Word of God in their own vernacular. (B. P.)

Rouel (or **ROWEL**) **Light** is a device for moving the star in the Epiphany play of *The Three Kings* with a pulley-wheel (*roue*), as the spiked wheel in a spur is called *rouel*.

Rougemont, FRANÇOIS DE, a French Jesuit missionary, was born at Maestricht in 1624. In 1641 he joined the Jesuits, and, as was customary, was for a time employed in teaching, but at his urgent request was finally sent as a missionary to China with several of his brethren. They arrived in that country in 1659, and for some years Rougemont had charge of several churches and missionary stations in the province of Nankin. During the persecution of 1664 he was, with many others, carried in chains to Peking, and thence to Canton, where he was for a long time held prisoner. But an edict of the emperor Kanghi gave him liberty in 1671, and he returned to his work of preaching and teaching. Rougemont died at Taitsang-tchow in 1676. His writings are, *Historia Tartaro-sinica Nova* (Louvain, 1673); this was written in the prison at Canton;—*Abregé de la Doctrine Chrétienne*;—*Questions sur les Mœurs du Siècle*. The last two were written in Chinese, and have never been translated. See Sotwel, *Bibl. Scriptor. Soc. Jesu*.

Rouillé, PIERRE JULIEN, a French Jesuit, was born at Tours in 1681, and died in 1740. He was one of the authors or compilers of *Mémoires de Trévoux*.

Roumania. See RUSSIA; TURKEY.

Roumanian (or **WALLACHIAN**) **Version**. The people for whom this version was made are descendants of the Dacians, and of the Roman colonists who settled in the country after its subjugation by Trajan. In consequence of their Roman origin, the Wallachians style themselves *Rumanje*, and are commonly known to other nations as the Rouman race. The language spoken by that people contains a large number of pure Latin words,

but about half of the Wallachian words are borrowed from the Greek, the Turkish, and the Slavonian. The first translation of the Scriptures into that language was made by the metropolitan Theodotus, and was printed in 1668 at Bucharest; while prior to this, in 1648, the New Test. had been published in Belgrade. Another edition was published in 1714, and a third, at Blaje, in Transylvania, in 1795. In the year 1816 the Russian Bible Society undertook an edition of 5000 copies of the Wallachian New Test., which was soon followed by other editions. In 1838 the British Bible Society published a revised edition of the New Test., and since that the entire Bible has been translated and published in that language at the expense of the British and Foreign Bible Society. See Dalton, *Das Gebet des Herrn in den Sprachen Russlands*, p. 45; *Bible of Every Land*, p. 279 sq. (B. P.)

Round Churches were imitations of the Holy Sepulchre at Jerusalem, the nave being round and forming the vestibule of an oblong chancel, as in the Templars' churches at Laon, Metz, and Segovia, 1208. Other examples are found in Ludlow Castle, Cambridge, Northampton, of the end of the 12th century; Little Maplestead (built by the Hospitallers), St. Gereon's, Cologne, of the 13th century; Treves, Bonn, Aix-la-Chapelle (a copy of St. Vitalis, Ravenna, and more remotely of St. Sophia, Constantinople), Salamanca, St. Benignus at Dijon, London, built in 1185; Neuvsy St. Sepulchre, cir. 1170; Lanleff, Rieu Minervo, of the close of the 11th century; Brescia, Pisa, Rome, Bergamo, Bologna, Thorsager, and several other churches in Scandinavia. In many cases the shape may have been merely a mechanical contrivance to carry a dome. Circular churches occur of all dates, and distributed over most parts of Europe, either insulated as baptisteries, in a mystical allusion to the Holy Sepulchre, attached as chapels to churches, or existing as independent buildings. They are sometimes of a simple round or polygonal form, either without recesses, except an apse or porch, such as the church of Ophir, Orkney, and the baptistery of Canterbury, or with radiating recesses, rectangular or apsidal, as the baptisteries of Novara and Frejus. Sometimes a circular or polygonal centre is supported by pillars, and surrounded by an aisle of corresponding form: this aisle is repeated at St. Stephen's, Rome, and Charroux. The Crusaders, or pilgrims, imitated the plan of the Sepulchre of Jerusalem, surrounded by a circular church, and the Martyrdom, or place of the crucifixion, by a chancel eastward of a round nave. At Bury St. Edmund's, at the close of the 11th century, the abbot removed the body of St. Edmund from the "round chapel" to the new church; and this circular termination is still seen in Becker's Crown at Canterbury, at Sens, Burgos, Batalha, Murcia, and Dronheim. After the middle of the 13th century round churches were no longer built. Almost all the German churches of the time of Charlemagne were circular, like Aix, Nimeguen, Petersburg, and Magleburg.

Round Towers occur of the time of Justinian, attached to the Church of St. Apollinaris-ad-Classem, in Verona; two in the same city, cir. 1047; others of minaret-like shape, and divided by string courses, at St. Mary's and St. Vitalis, Ravenna; also at Pisa, Bury, near Beauvais, and at St. Desert, near Châlons-sur-Saône. The French round towers appear to have come from the north of Italy. In the 9th century they were erected at Centula, Charroux, Bury, and Notre Dame (Poitiers), Gernrode, and Worms. Those of Ireland are mainly of the 11th or 12th century, though some are of an unknown date, and were at once treasuries, belfries, refuges, and places of burial. Round towers are found in East Anglia, at Rickingale Inferior, at Welford and Shefford, Bucks; Welford, Gloucestershire (13th century); in the Isle of Man, at Bremliss, Breconshire, Brechin, built by Irish ecclesiastics (cir. 1020); Abernethy, and Tchernigod, near Kiev (cir. 1024).

The East Anglian form, and those of Piddinghoe and Lewes, have been attributed to the peculiar character of the material employed, and a desire to evade the use of coigns. At Brixworth a round is attached in front of a square tower.

Rounds, NELSON, a minister of the Methodist Episcopal Church, was born in Winfield, Herkimer Co., N. Y., May 4, 1807. He was converted at the age of nine years, and graduated at Union College, New York, in 1829. On June 24, 1831, he was licensed to preach; and July 1, 1831, he was admitted on trial in the Oneida Conference. In 1836 and 1837 he was professor of ancient languages in Cazenovia Seminary; then served as presiding elder of Cayuga District two years, and of the Chenango District four years. In 1844 he was elected editor of the *Northern Christian Advocate*, where he served four years. When the Wyoming Conference was formed, he became a member of it, and labored within its bounds until 1867, when he became superannuated. The next year he took an effective relation and was soon transferred to the Oregon Conference, and elected president of the Willamette University at Salem, which position he held for two years. In 1871 he was elected by the Legislature of Washington Territory as superintendent of public instruction, which office he filled until within two months of his death, in Clark County, Wash. T., Jan. 2, 1874. See *Minutes of Annual Conferences*, 1874, p. 88.

Rousa, EDWARD D., a minister of the Methodist Episcopal Church, was born at Ithaca, Tompkins Co., N. Y., Jan. 19, 1832. He joined the Church in 1848, and studied at Lima, N. Y. In 1852 he was received on trial in the East Genesee Conference, from which he was transferred, in 1863, to the Upper Iowa Conference. In 1866 he received a supernumerary relation, and located in 1868. In October, 1872, he entered the Central New York Conference, and died in Westfield, Tioga Co., Pa., May 6, 1873. See *Minutes of Annual Conferences*, 1873, p. 130.

Rouse, PETER P., a clergyman of the Reformed Church in America, and the son of a respectable farmer, was born at Catskill, N. Y., March 29, 1799. He graduated at Union College in 1818, and at New Brunswick Theological Seminary in 1821; was settled in Florida, N. Y., from 1822 to 1828; and in the First Reformed Church, Brooklyn, from 1828 to 1833. He was a good scholar, an animated, instructive, and eloquent preacher, and a thorough pastor. His brief ministry was closed by death, from hemorrhage of the lungs, in June, 1833; the immediate result of intense feeling produced by a pastoral visit to an afflicted parishioner. His memory is cherished with great affection in the ancient Church and denomination of which he was an ornament. He departed this life in Christian triumph. See Sprague, *Annals of the Amer. Pulpit*, ix, 203. (W. J. R. T.)

Rousseau, JEAN JACQUES, the brilliant genius who divided with Voltaire the rule over the almost boundless republic of French culture in the 18th century. His life was restless and full of contradictions, but it is possible to distinguish in it three periods.

1. *The Period of Early Adventure* (from his childhood to 1749).—Rousseau was born at Geneva, June 28, 1712. His mother died in giving him birth, and his father early turned him over to the care of an uncle. He became first a copyist to an attorney, and then apprentice to an engraver on copper. He was from early childhood an insatiable reader of romances, and an enthusiastic admirer of nature; nor is it unimportant to notice that at the age of nine years he had already devoured Plutarch. The charms of nature and of a circulating library were too strong for his fidelity to duty. He neglected his business, was punished by his master, and ran away. At this time he first made the acquaintance of Madame de Warens at Annecy (his "mamma," as he was wont to term her), and was by her persuaded to become a Romanist. Compelled to

earn his bread, he entered the service of a noble lady, and in that condition committed offences which he had the baseness to charge on an innocent girl. He soon returned to Madame de Warens, whose favor secured him admission to a seminary for priests, where he renewed the musical studies of his earlier years, but did nothing else. Thence he went to Lyons with a music-teacher, and afterwards to Lausanne and Neuchâtel, in which places he endeavored to establish himself in the same profession. Various other situations were occupied by him in swift succession, but in the end he is found once more with Madame de Warens, who now lived at Chambéry, and permitted Rousseau to lead an idyllic life on her farm at Charmettes, while at the same time sustaining improper relations with him. His growth towards culture had in the meantime been steady. He was acquainted with much of the current literature, even of England, and had given thought to religious questions. He now added the study of Latin and mathematics, and also of philosophy in the works of Locke, Leibnitz, Malebranche, Descartes, etc. His earliest comedies and operas were written in this period, which, however, soon came to an end by reason of the failure of his health. His relation with Madame de Warens was definitely broken off by his removal to Montpellier in 1737. After a brief sojourn in Lyons, he went to Paris, where he arrived in 1741, hoping to make his fortune through a new system of musical notation; but though his treatise was read before the Academy of Sciences, it was not approved. His next venture was an opera entitled *Les Muses Galantes*, which likewise proved less successful than he expected. In 1743 he was made private secretary to Count de Montaign, whom he accompanied to Venice, returning to Paris after an absence of eighteen months. With his entrance on a lawless relation with Theresa Le Vasseur, a thoroughly uncultivated character of low antecedents and utter ignorance, whom he did not profess to love, but whom he made his wife after years of illicit connection, and whose parents he received into his care, the first division of his life may close.

2. *The Period of his Triumphs* (1749–62). — The Academy of Dijon in 1749 offered a prize for the best essay on the question, "Whether the re-establishment of the sciences and arts has helped to purify manners?" for which Rousseau competed with success. He assumed that nature must ennoble mind, instead of mind being needed to redeem and improve nature, and argued the pessimist view with such force and brilliancy of style that he was at once assigned a place as a writer of prose by the side of Voltaire. The book was thoroughly adapted to the times, when hearts throbbed with intense yearning for deliverance from the unnatural conditions that prevailed in culture and in practical life, and when longings had been stimulated by the appearance of books like *Robinson Crusoe*, Thomson's *Seasons*, etc., in which the bliss of a state of nature was celebrated. The gospel of nature was in vogue, and Rousseau became its leading prophet. Yet it was at this time that he chose to add one more to the many paradoxes of his life, by availing himself of the celebrity he had attained to secure employment in copying music as a means of livelihood. In 1752 he published the opera, *Le Devin du Village*, by which his musical reputation became established; and in 1753 he discussed a second prize question presented by the Academy of Dijon, and relating to the inequalities existing in the conditions of mankind. His book, the *Discours sur l'Origine et les Fondemens de l'Inégalité parmi les Hommes*, takes the ground that human society, considered in the abstract, is exclusively natural, and cannot therefore sustain a relation independent of nature, i. e. so as to divide nature and appropriate it to individuals. Rousseau does not place all men on the same level, as if they were merely so many animals. He admits the existence of physical, mental, and spiritual differences. But he declares that the first man to fence off a piece

of land and claim that it belonged to him, and find people to concede his claim, was the founder of society. He evidently regards property as an egotistical robbery of the community of men, and has no conception of property as both required and conditioned by morality. This book also was in harmony with the spirit of the time, though its effect was not fully displayed until a later day; and Rousseau himself was so fully in sympathy with its teachings that he felt driven to forsake the gilded and varnished glory of Paris for a season of communion with nature in his native town, though the growing coolness between himself and his friends—to which his letters on French music contributed largely—was not without influence in bringing him to that determination. He recovered his forfeited citizenship at Geneva by returning to the Reformed faith, and delighted to call himself "Citoyen de Genève." He found, however, that he could not remain away from Paris, especially after his adversary Voltaire had established himself at Ferney; and his return was signalized in 1760 by the publication of the romance *La Nouvelle Héloïse*, in which the ideas of his two previous works are combined, and in which great brilliancies of style conceal grave faults of composition. It was also significant because of moral, social, and religious reflections in its pages, which foreshadowed Rousseau's later positions.

The two constructive works from Rousseau's pen, *Le Contrat Social* and *Émile*, appeared in close succession in 1762. The latter book was directed against abuses in the training of the young, and effected a complete revolution in European pedagogics; but while it antagonized many real errors, it at the same time assailed the fundamental conditions upon which all youthful training must rest. Nature again is the key-note to which the argument is attuned. Each child, so runs the demand, should develop its own nature from the beginning, without being placed under adult human guidance—that nature being its individualistic qualities. The object is to train the *man*, who exists for himself, and is contrasted with the training of the citizen, who exists for society, though the contrary object is enforced in the *Contrat Social*. This egotistic nature is represented as an ideal nature which needs only development, but not redemption and regeneration. *Émile* finds his religious perfection in deism, not in Christianity. In the *Profession de Foi du Vicaire Savoyard*, Rousseau nevertheless assails the materialism and atheism of his former friends, and insists on the three fundamental theistic truths—God, liberty, and immortality. He contends against revelation, but yet utters sentiments of reverence for the Gospel on account of its exalted character, and declares that "if Socrates died like a philosopher, Christ died like a God."

The effects produced by the *Contrat Social* in the political world were less rapid, but more profound, than that occasioned by the *Émile* in pedagogics. The ideas which ripened into the French Revolution were sown in the days of the Massacre of St. Bartholomew and during the reign of Louis XIV; but they found in Rousseau's book a spark which kindled them into a flame, ultimating in that furious blaze. The *Contrat Social* determined the scope of ideas at the beginning of the Revolution, conducted affairs to more far-reaching consequences, and furnished the watchwords—above all, the cry—of "Liberty and equality." The book has no conception of the historical and rightful relation of the individual citizen to national and political authority, and of the supreme law of right above even such authority. The citizen is taught in it, not to take his place as a person under the divinely instituted order of things in this world, but to cultivate the idea that the state rests simply on an original agreement between individuals, according to which the community stands pledged to protect the person and property of the individual, while the individual has bound himself to live

in entire subordination to the community. The citizen is accordingly altogether dependent on the community. He ought therefore to accept the religion appointed by the state or suffer banishment, or, in case of resistance, death. As Rousseau recognises no representation of the people, nor yet any form of government that may not at any moment be overturned by the community of citizens, he really passes beyond every limit of a radicalism which yet admits the legal relation of authority and subject, and of political and religious conditions, and draws the first lineaments of socialism. Yet he was too much a dreamer to suspect the consequences that must spring from such ideas. In 1766 he declared to a pseudonymous Cassius who offered to reduce to practice these principles in the liberation of the people, that he abominated every such undertaking; and when disorders broke out on the occasion of the burning of his *Émile* at Geneva, he pacified the people himself.

Of Rousseau's minor works, the *Lettre à M. d'Alembert sur les Spectacles* is a determined protest against the establishing of a theatre at Geneva; the celebrated *Lettre à Christopher de Beaumont* was a response to a prohibition of the *Émile* by the archbishop of Paris, and the *Lettres de la Montagne* form a similar rejoinder to the magistracy of Geneva. These letters have been compared with those of Junius, or of Lessing against Götz.

The troubles of Rousseau began to germinate at the time of his highest prosperity. His ardent and sensitive nature was out of place in the circle of cold and cynical mockers by whom he was surrounded, and the frankness with which he uncovered his inmost experiences to their gaze made him an object of their merciless witticisms and sarcasms; and when he proceeded to assail their cherished idols and to contend for God, virtue, and immortality, he brought on himself the full weight of their hatred in the form of incessant malicious sneers. Other matters contributed to fully disgust him with the situation. He burned with illicit love for Madame d'Houdelot, whose relations to her husband were not happy, but who adored the poet Lambert instead of Rousseau. He broke decidedly with Diderot. He participated in false gossip derogatory to Madame d'Épinay, who had been his patroness and had permitted him to occupy her summer-house in the forest of Montmorency since 1756. He lived from 1758 to 1762 in another house near Montmorency, and in the latter year encountered the storm which broke out against his *Émile*. This event forms the proper opening of a new period.

3. *The Period of Unsettled Wandering and Morbid Fears.*—It is remarkable that a government which tolerated an entire school of atheistical mockers of religion in Paris should have condemned as godless the earnest deist who was alone in daring to contend for God in those circles; and equally strange that the decree of the Parisian Parliament should have condemned the *Émile*, instead of the far more dangerous *Contrat Social*. Perhaps the government which had just expelled the Jesuits may have found it convenient to persecute Rousseau, the Swiss, who had gone back to Calvinism, and who had dared to represent a Romish priest as affording a charming illustration of deism. To avoid arrest, he fled to Yverdon, in Switzerland; but the Genevan senate had likewise condemned him before a copy of his book had reached that city. He renounced his citizenship and turned aside to the canton Neuchâtel, where he lived from 1762 to 1765 under the protection of Frederick the Great of Prussia. He wrote the *Lettres de la Montagne*, pursued studies in legislation in behalf of the Corsicans, and botanized—botany and music constituting his favorite employments. The gossiping tongue of his mistress, Theresa, succeeded, however, in rendering him suspected of irreligion by the pastor and peasants of Motiers-Travers, where he resided. He imagined himself no longer safe, and fled the canton. In

1765 he accepted an invitation from Hume to visit England, but even here his mania of suspicion controlled him. He included Hume in the number of his foes, and removed to the house of a new friend, Davenport, whence the objection of individual Englishmen to his relation with Theresa drove him back to France in 1767. He went under the assumed name of *Renon* to Castle Trye, a possession of prince Conti, and, after further travels, back to Paris in 1770. Seven or eight years more of life remained to him, which he passed in the Rue Platrière (now known by his name), tormented by melancholy fancies, oppressed by poverty, alienated from Theresa, and gradually failing in health. He sustained himself by copying notes, and finished his *Confessions*, which he had begun at Motiers. He died suddenly at Ermenonville, near Paris, July 2, 1778—whether of disease or of poison administered by himself is not known. He was received into the Pantheon Oct. 11, 1794.

The European and even world-wide reputation which Rousseau had achieved is illustrated by the fact that he was induced in the last period of his life to compose the *Lettres sur Législation des Corées* and the *Considérations sur le Gouvernement de Pologne* (1772); and his mental force is apparent in the ability to write his *Confessions* at a time when his soul was darkened with the clouds of morbid and imaginary fears. His native frankness is very evident in that book, but faults and errors are so interwoven with virtues and attractive features that the result of the whole is a glorification of himself. The book may be regarded both as a companion-picture and a contrast to the *Confessions* of Augustine. Such contradictions are characteristic of the man in every relation. He was immeasurably vain, selfish, changeful, and ungrateful—easily provoked, always suspicious, and morbidly misanthropic. As a reformer, his merit consists in having opposed to the godless humanism of his day the crying needs of the human heart; but he identified the empirical sinful heart with the ideal heart, individual participation in nature with personal conformity to nature, the beautiful soul with the moral spirit, the utilitarian with the practical, declamation with confession, and he therefore remained involved in contradictions to the end. In contrast with Calvin, he brought out the ideas of individual rights and of the personal dignity of man—elements of Christian truth often violated by Calvin; but he nevertheless gave his ideal state power over the religious worship and profession of its subjects. Compared with Voltaire, the sardonic mocker of all existing things, Rousseau commands respect by the frankness and manliness of his protests, even when they are directed against holy things. He was incapable of comprehending the syntheses nature and culture, liberty and authority, individuality and society, reason and revelation, the human and the divine. In its pedagogical aspects, his work compares with that of Pestalozzi as does the dawn with the noon-day sun. In *politics* he points forward to both Mirabeau and Saint-Simon; and in philosophy, as a preacher of deism, he may be compared with Kant. For both good and evil, Rousseau was a mighty exponent of the spirit of his time, and deserves, in justice, to be studied from both points of view.

Rousseau's works were very numerous, the botanical and musical writings, among others, being especially worthy of recognition. Editions of his writings are likewise numerous (Geneva, 1782-90, 17 vols. 4to, or 35 vols. 8vo; Paris, 1793-1800, 18 vols. 4to, etc. German editions by Cramer, Gleich, and others). Additional matter was furnished by Musset-Pathay, in (*Œuvres Inédites de J. J. Rousseau* (Paris, 1825), and by Mars Michel Rey, in *Lettres Inédites de J. J. Rousseau* (Amst. and Paris, 1858). Musset-Pathay also wrote a *Histoire de la Vie et des Œuvres de J. J. Rousseau* (ibid. 1821). See also Girardin, *Sur la Mort de J. J. Rousseau* (ibid. 1824); Villemain, *Cours de littérature Française* (Vingt deuxième Leçon); the

Works on the history of literature by Vinet, Demogeot, etc.; Schmidt-Weissenfels, *Geschichte der französischen Revolutionsliteratur* (Prague, 1859), p. 16 sq.

Roussel, GÉRARD (Lat. *Gerardus Rufus*), bishop of Oléron, in France, and reformer, was born at Vaquerie, near Amiens, and became a student at Paris, where Lefevre d'Étaples convinced him that man is saved only through faith in God's mercy, but that such faith may consist with the practice of the external forms of Romanism, they being regarded as indifferent matters. When Lefevre was accused of heresy and obliged to flee to bishop Briçonnet of Meaux in 1521, Roussel followed, and remained at Meaux until compelled to seek a refuge against imprisonment for heresy himself, when he established himself in the house of Capito at Strasburg. In 1526 Francis I recalled the fugitives, and Roussel became court preacher to Margaret of Orleans, in that position faithfully preaching evangelical doctrines, but retaining the usages of Rome. On the marriage of Margaret with the king of Navarre (1527), Roussel became her confessor. In 1530 he obtained the rich abbey of Clairac. In 1533 his patroness invited him to preach in the Louvre, which he did amid great popular agitation. Many Romanists were expelled the city, and Roussel, on the other hand, was imprisoned, but afterwards released and forbidden to preach. He returned with his protectress to Béarn, and soon afterwards obtained the bishopric of Oléron, for accepting which Calvin censured him strongly, because his new position would compel him to tolerate abuses which he had formerly condemned. Roussel, however, did what he could for the welfare of his diocese, while holding an intermediate position between Rome and the Reformation. He explained the Bible in his sermons, celebrated mass in the vernacular, administered the communion under both kinds, made provision for the Christian training of the young, and devoted his rich revenues to the support of the poor. He also wrote *Expositions*, in dialogue form, of the Apostles' Creed, the Decalogue, and the Lord's Prayer, as guides to his clergy in the conduct of catechetical instruction. In this work Roussel occupied thoroughly evangelical ground, if a few concessions in regard to ceremonies be set aside. The only appeal is to the Bible; Christ is represented as the only head of the Church; faith in him as the only condition of salvation. The Church triumphant is the only perfect Church, and of visible churches that alone is a true Church in which the Gospel is preached in its purity, and in which the sacraments, of which there are but two, are properly administered. A subsequent tract on the Lord's supper taught the impartation of Christ's glorified body in the sense of Calvin, with whose theology the views of Roussel had much in common, particularly in the feature of an absolute predestination. The Sorbonne extracted a number of propositions from these works and condemned them as heretical, as it had already done the sermon in the Louvre; but before the sentence was pronounced Roussel had ended his career. In the spring of 1550 he had preached a sermon before a synod held at Mauléon, in which he advocated a reduction in the number of saints' days, which excited the rage of the Romish fanatics present to such a degree that they broke down the pulpit in which he stood, and injured him so severely in the process that he died soon afterwards. In addition to the works referred to, Roussel published, in early life, a Latin translation of Aristotle's *Ethics*, and a *Commentary* accompanying an edition of the arithmetic of Bontius, which was designed to elucidate the mystical signification of numbers. See C. Schmidt, *Gérard Roussel, Prédicateur de la Reine Marguerite de Navarre* (Strasburg, 1845).

Roustan, ANTOINE JACQUES, a Swiss Protestant minister and writer, was born at Geneva in 1734. For twenty-six years (1764-90) he was minister of a Swiss

church in London. He wrote *Lettres sur l'État Présent de Christianisme*, etc. (Lond. 1768, 12mo; in English, 1775, 8vo).

Routh, MARTIN JOSEPH, an English clergyman and educator, was born at South Elmham, Suffolk, Sept. 15, 1755. He matriculated as a battler at Queen's College, Oxford, May 31, 1770; in July, 1771, was elected a demy of St. Mary Magdalen College, and fellow in July, 1776. He was appointed college librarian in 1781, senior proctor in 1783, junior dean of arts in 1784 and 1785, was made bachelor of divinity July 15, 1786, and college bursar in 1791. He became president of Magdalen College, April 11, 1791, which position he retained until his death (Dec. 22, 1854). In 1810 he became rector of Tylehurst, near Reading, where he retired for rest at certain seasons of the year. His works were distinguished by profound scholarship and great critical acumen. His works are: *Platonis Euthydemus et Gorgias*, etc. (Oxford, 1784, 8vo);—*Reliquiæ Sacræ* (1814-18, 4 vols.; later ed. 1846-48, 5 vols.);—*Bishop Burnet's History of His Own Time* (1823, 6 vols. 8vo), annotated.

Roux-Lavergne, PIERRE CÉLESTIN, a French writer, who died Feb. 16, 1874, was for some time editor of the *Univers*. When quite advanced in age, he became a priest, and for many years labored as professor of theology at the seminary in Nîmes. He died at Rennes as member of the cathedral. He wrote, *De la Philosophie de l'Histoire* (1850);—*Philosophia juxta Divi Thomæ Dogmata* (1850-59). See the *Literarischer Handweiser*, 1874, p. 176. (B. P.)

Row Heresy. In 1831, Mr. Campbell, minister of Row, Scotland, was deposed by the General Assembly for holding, among other errors, the doctrine of universal pardon, and a peculiar view of the nature of faith, quite similar to that of the Sandemanians (q. v.). On some other points his views touched those of Edward Irving, but his doctrines did not spread to any extent. In 1856 he published the *Nature of the Atonement*, in which he declares that it was not a satisfaction, but only "an adequate repentance, in no sense substitutionary," and that Christ's suffering arose "from seeing sin and sinners with God's eyes, and feeling in reference to them with God's heart."

Row, John (1), a Scottish divine, was born near Sterling about 1526. He was agent of the clergy of Scotland at the Vatican in 1550; and afterwards became a Protestant minister. He died in 1580. He was one of the six ministers who composed the Scottish Confession and *First Book of Discipline*.

Row, John (2), a Presbyterian divine, and son of John Row the reformer, was born at Perth in 1568. He studied at the University of Edinburgh, and was minister of Carnock, Fifeshire, from 1592 till 1644. His death took place in 1646. He wrote *The Historie of the Kirk of Scotland* (1558-1637), which, after lying in MS. for more than 200 years, has recently been twice privately printed, together with a continuation by his sons to 1639 (Edinb. Maitland Club, 1842, 2 vols. 4to; 2d ed. ibid. Wodrow Society, 1842, 4to).

Row, John (3), a Presbyterian divine and Hebrew scholar, was born at Carnock about 1598, and was the son of the preceding. He became one of the ministers of Aberdeen in 1631, and in 1644 he was chosen moderator of the Provincial Assembly at Aberdeen. He was a Covenanter in the civil war, and in 1652 became principal of King's College, Aberdeen, but resigned in 1661. He was subsequently a schoolmaster in Aberdeen, but spent his last years in retirement in the parish of Kinnellar, near Aberdeen. He was noted—and the same may be said of his father and grandfather—for an intimate acquaintance with the Hebrew language. His death took place about 1672. He published, *Hebraica*

Linguae Institutiones (Glasg. 1634, 12mo):—*Xibias Hebraicæ seu Vocabularium*, etc. (1644, 12mo):—*Εὐχαριστία Βασιλική*, etc. (Abredon. 1660, 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rowan, Arthur Blennerhassett, D.D., an Irish divine, was for more than thirty years curate of Blennerville, subsequently archdeacon of Ardfer, rector of Kilgobbin and Balinooher, and surrogate of the Consistorial Court of Ardfer and Aghadoc. He died at Belmont, Kerry, Ireland, Aug. 12, 1861. Among his publications are, *Romanism in the Church*, etc. (1847, 8vo):—*Newman's Popular Fallacies Considered* (Dublin, 1852, 8vo):—*Casuistry and Conscience* (1854, 8vo):—besides *Sermons* and *Sketches*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rowan, Stephen, D.D., a (Dutch) Reformed minister, was born at Salem, N. Y., 1787. After having graduated at Union College in 1804, he studied theology with Drs. J. H. Meyer and Jeremiah Romeyn, and then entered the ministry in 1806. He was a popular preacher of the Reformed Church settled in the then suburban village of Greenwich, now in Bleecker Street, New York. His labors were much blessed, until difficulties arose which led to his leaving the denomination and the establishment of the Eighth Presbyterian Church in Chrystie Street in 1819. Here he ministered until 1825, when he became secretary of the American Society for Meliorating the Condition of the Jews. He visited Europe in this behalf, and was an efficient officer. His fine pulpit abilities and winning manners made him many warm friends, and great success attended his pastoral labors. But his trials were oppressive, and overclouded his work sadly. He died in 1835, chastened in spirit, in firm faith, and leaving rich testimonies for the grace that supported him. See Corwin, *Manual of the Reformed Church*, p. 192. (W. J. R. T.)

Rowbotham, John, an English clergyman of Upminster, Essex, during the latter part of the 17th century, ejected for nonconformity in 1662. He wrote, *Preciousness of Christ to Believers* (Lond. 1647, 12mo):—*Exposition of the Canticles* (ibid. 1651, 4to):—*Mystery of the Two Witnesses Unveiled* (ibid. 1654, 12mo):—*Disquisitio in Hypothesin Baxterianam de Fædere Gratiæ ab Initio*, etc. (ibid. 1694-98, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rowe, Elizabeth, an Englishwoman noted for her personal accomplishments and elegant writings, was the daughter of Walter Singer, a Dissenting minister, and was born at Ilchester, Somersetshire, in 1674. She was very charitable, freely distributing to those in need. Her death occurred in 1737. Among her published works are, *Friendship in Death* (1728):—*Devout Exercises of the Heart, in Meditation*, etc. (1738, 8vo; Phila. 1850, 24mo):—*Miscellaneous Works* (1739, 2 vols. 8vo).

Rowe, John, a Nonconformist minister, was born at Tiverton, England, in 1627. He was educated at New Inn Hall, Oxford, and obtained a fellowship in Corpus Christi College. He became preacher at Witney and Tiverton, and, in 1654, at Westminster Abbey. In 1662 he was ejected for nonconformity, and afterwards had a congregation in Bartholomew Close, London. He wrote, *Heavenly-mindedness and Earthly-mindedness* (1672, 2 pts. 12mo):—*Saints' Temptations* (1674, 1675, 8vo):—*Emanuel* (1680, 8vo):—*Sermons*, etc.

Rowe, Samuel, an English clergyman, was born in 1793. He became a bookseller, but graduated at Jesus College, Oxford, in 1826. In 1833 he was made vicar of Crediton and perpetual curate of Postbury, St. Luke, which offices he held until his death. He published, *Appeal to the Rubric* (Lond. 1841, small 8vo):—*Church Psalm-book* (several editions):—also *Panorama of Plymouth, and Perambulations in the Forest of Dartmoor* (Plymouth, 1848, 8vo).

Rowe, Wesley, a minister of the Methodist Episcopal Church, was born near Frankfort, Ross Co., O.,

April 4, 1809. He made a formal profession of religion and united with the Church in his nineteenth year. In 1832 he was licensed to preach, and in 1834 was admitted on trial into the Ohio Annual Conference, in which, and in the Cincinnati Conference, he labored until within a few days of his death, Feb. 8, 1862. See *Minutes of Annual Conferences*, 1862, p. 185.

Rowites, the name applied to the followers of Mr. Campbell, of Row, Scotland. See ROW HERESY.

Rowland, Daniel, an eminent Welsh divine, chaplain to the duke of Leinster during the latter part of the last century. He published *Eight Sermons*, etc. (Lond. 1774, 12mo):—*Three Sermons* (1778, 12mo).

Rowland, Henry Augustus, D.D., a Presbyterian divine, was born at Windsor, Conn., Sept. 19, 1804. His father was pastor of the Congregational Church at Windsor, and his mother was a relative of Rev. Jonathan Edwards, D.D. He graduated at Yale College in 1823, finished his theological course at Andover Seminary in 1827, was licensed by the Hampden Association, and ordained by the New York Presbytery Nov. 24, 1830. He began his ministry in the Presbyterian Church at Fayetteville, N. C. In 1834 he became pastor of Pearl Street Church, New York; in 1843, of the Church at Honesdale, Pa.; and in 1856 accepted a call and was installed pastor of the Park Presbyterian Church, Newark, N. J., where he labored until his death, Sept. 4, 1859. Dr. Rowland was a successful pastor and an earnest, eloquent preacher. He labored efficiently with his pen, and in the pulpit, to promote the interests of the Redeemer's kingdom for more than one third of a century. He was fond of literature, and wrote much for the periodical press; also several volumes, viz.: *On the Common Maxims of Infidelity* (1850, 12mo):—*The Path of Life* (1851, 18mo):—*Light in the Dark Valley* (1852, 24mo):—*The Way of Peace* (1853, 16mo):—*Tracts on Christian Baptism*:—*The Elect Saved by Faith*:—and *A Conversation on Decrees and Free Agency*. Also many single sermons and articles in the *New York Evangelist*, *New York Observer*, etc. See *Memorial of the Life and Services of the late Henry A. Rowland, D.D.*; Wilson, *Presb. Hist. Almanac*, 1861, p. 163. (J. L. S.)

Rowland, Thomas, a minister of the United Methodist Free Churches, England, was born in Manchester in 1792. He entered the Wesleyan ministry in 1813, and continued to labor until 1850, when he became involved in the questions connected with the Reform movement. Refusing to apologize to the Conference for some of his writings, he was at first made supernumerary, and afterwards expelled. He joined the Wesleyan Reformers, and preached among them for several years. He attended the First Annual Assembly of the United Methodist Free Churches, held at Rochdale, 1857, and died in 1858. See Simpson, *Cyclop. of Methodism*, s. v.

Rowrawa, one of the eight *Narakas* (q. v.), or principal places of torment, in the system of Buddhism.

Roy, Julian David Le, a French architect and antiquary, was born in Paris in 1728, and died in 1803. He wrote, *Ruines des Plus Beaux Monumens de la Grèce* (1758, corrected 1770):—*Histoire de la Disposition et des Formes Différentes des Temples des Chrétiens*:—*Observations sur les Édifices des Anciens Peuples*.

Royaards, Herman John, professor of theology in the University of Utrecht for more than thirty years, beginning with 1823, was born in that city Oct. 3, 1794. In 1818 he obtained the degree of doctor in theology, and in the following year became pastor of the Reformed Church at Meerkerk, at which place he wrote a successful prize essay on the Book of Daniel (1821). His special department in the university was that of historical theology, to which he added that of Christian ethics. He aided in founding (1839) the journal *Archief voor Kerkelyke Geschiedenis*, and contributed vari-

ous very important papers to its pages. The history of the Church in the Netherlands engaged his mind predominantly, and he rendered services of real value in its treatment, though almost a pioneer in that field. In 1842 he published a prize treatise entitled *Inroering en Vestiging van het Christendom in Nederland*, etc., and subsequently a complementary work under the title *Geschiedenis van het Christendom en de Christelyke Kerk in Nederland gedurende de Middeleeuwen* (pt. i, 1849; pt. ii, 1853). He desired to write a history of the Reformation and of the Roman Catholic Church in the Netherlands, but did not live to execute his purpose. He, however, rendered meritorious service in a different direction, viz. in ecclesiastical jurisprudence, having published (1834 and 1837) a work on this subject entitled *Hedendaagsch Kerkregt by de Hervormden in Nederland*, and having taken active part in the repeated discussions relating to a concordat with the papal chair. He also prepared a *Chrestomathia Patristica* (pt. i, 1831; pt. ii, 1837), intended to aid in the study of the Church fathers, and a *Compendium Hist. Eccl. Christ.* for use in academical instruction. He died Jan. 2, 1854. See Boumann, *Narratio de H. J. Royce*, in his *Charta Theologicæ* (Traj. ad Rh. 1857), p. 1-90.

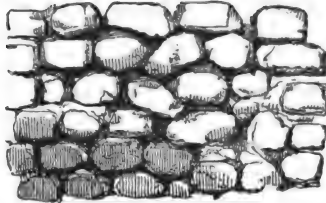

Royce, LORENZO D., a Baptist minister, was born at Sharon, Vt., Oct. 5, 1820. He graduated from Waterville College, Maine, in the class of 1844, and from the Newton Theological Institution in the class of 1847. He was ordained as pastor of the Second Baptist Church in Thomaston, Me. His ministry was a brief one, his death occurring Sept. 3, 1850. He was among the most highly cultivated young ministers of his denomination, and had his life been spared would not have failed to make his mark deep on the generation in which he lived. (J. C. S.)

Roye, GUI DE, a French prelate, was born at Muret about 1345. He was canon of Noyon, and in 1376 was made bishop of Verdun. He never went to his diocese, but remained with Gregory XI, accompanying him to Rome, and afterwards attached himself to Clement VII, by whom he was consecrated. Resigning his see in 1379, he became in succession administrator of the bishopric of Dol, bishop of Castres (1383), archbishop of Tours, archbishop of Sens (1385), and, finally, resigning all these, was on the 22d of June, 1390, consecrated archbishop of Rheims. Gui took the part of Benedict XIII, and was a member of the Council of Paris in 1404, but refused to join the National Council of 1406, which was convened for the extinction of the clerical privileges during the schism. In 1408 he presided over the Provincial Council at Rheims, and the next year set out for Italy, but was killed, during the journey, in a quarrel among his retainers, June 8, 1409. He is the author of a work entitled *Doctrinal de la Sapience* (Geneva, 1478), which passed through several editions. See *Gallia Christiana*, vol. ix; Brunet, *Manuel du Libraire*.

Royko, CASPAR, doctor of theology, a Roman Catholic divine of Germany, was born Jan. 1, 1744, at Marburg, in Steyermark, and died April 20, 1819, as professor of pastoral theology and cathedral preacher at Prague. He is the author of *Einleitung in die christliche Religions- und Kirchengeschichte* (Prague, 1771):—*Synopsis Histor. Religionis Christianæ Methodo System. a dumbrata* (ibid. 1785):—*Christliche Religions- u. Kirchengeschichte* (ibid. 1788-95, 4 vols.):—*Geschichte der grossen allgemeinen Kirchenversammlung zu Costnitz* (ibid. 1780-96, 4 pts.). See Winer, *Handbuch der theol. Literatur*, i, 529, 541, 666; ii, 741; Niedner, *Lehrbuch der christl. Kirchengeschichte*, p. 864. (B. P.)

Ruar, MARTIN, a learned German writer and Protestant minister, was born in Holstein in 1588, and died near Dantzic in 1657. "His *Epistles* throw much light on the theological opinions of the age" (Hallam, *Lit. of Europe*).

Rubble, RUBBLE-WORK, ROUGH-WALLING, coarse walling constructed of rough stones, not large, but of great irregularity both in size and shape, and not so flat bedded as in rag-work. In some districts it is often formed of flints: in large buildings, in neighborhoods

Rubble-work.

where better materials can be obtained for the outer face of the walls, it is in general only used for the inside, or backing; but in other districts the whole substance of the walls is not unfrequently of this construction. It is often found to have been plastered on both sides, but sometimes it was only pointed externally.

Rubens, PETER PAUL, Sir, the illustrious Flemish painter, was born at Siegen, Germany (according to some, at Cologne), June 29, 1577. After the death of his father in 1587, he went with his mother to Antwerp, where his parents had formerly resided. He became page to Marguerite de Ligne, countess de Lalain, but soon left her to study art, chiefly under A. van Noort and O. van Veen (or Venius). In 1600 he visited Italy, going first to Venice and Mantua and thence to Rome, where he devoted himself to the study of the pictures of Titian and Paul Veronese. In 1605 the duke Vincenzo Gonzaga sent him on a special mission to Philip III of Spain. Again visiting Italy, he resided at Rome, Milan, and Genoa, painting many pictures, until 1608, when, hearing of his mother's illness, he returned to Antwerp. He was appointed court painter to the archduke Albert, and married Isabella Brant (or Brandt) in 1609. When, in 1627, Charles I declared war against France,

House of Rubens.

Rubens was intrusted to negotiate with Gerbier, Charles's agent at the Hague. In the autumn of the same year he was sent to Madrid, and in 1629 was ambassador to England. He was employed on a mission to Holland in 1633, died May 30, 1640, and was buried in the Church of St. Jacques, Antwerp. The pictures ascribed wholly or in part to Rubens, according to Smith's *Catalogue Raisonné*, number 1800. They comprise history, portraits, landscapes; animal, fruit, and flower pieces. The finest are in the cathedral in Antwerp—*The Descent from the Cross*, and *The Elevation of the Cross*, the former being generally considered his masterpiece. The Belvedere in Vienna contains a noble altar-piece with wings representing *The Virgin Presenting a Splen-*

did Robe to St. Ildefonso:—*St. Ambrose Refusing to Admit the Emperor Theodosius into the Church*; and two altar-pieces representing the miracles performed by St. Ignatius Loyola and St. Francis Xavier. See Waagen, in Raumer's *Historisches Taschenbuch* (Leips. 1833; Lond. 1840); Michel, *Rubens et l'École d'Anvers* (Paris, 1854); Waagen, *Treasures of Art in Great Britain* (Lond. 1854–57, 4 vols.).

Rübezahl, in Silesian legend, was a good-natured spirit of the Riesengebirge who assisted the good, the needy, and the wandering traveller, but who also teased and punished the wicked. He was able to assume any form whatever, and appeared sometimes as a rabbit running between the feet of pedestrians, sometimes as a turtle, sometimes in the form of a hawk, snatching the hat from a sleeper's head, and sometimes so confused the senses that the tiles on a roof seemed to be of gold, or that a person seemed to see his own double, etc. He never carried his sport so far, however, as to work real injury to his victim. The name Rubezahl was a nickname, and greatly irritated him; but he loved to be called "The Lord of the Mountains."

Rubigo. See **ROBIGUS**.

Rubino, JOSEPH CARL FRIEDRICH, a German doctor and professor of philology and ancient history, was born Aug. 15, 1799, at Fritzlar, of Jewish parentage. Having completed his studies at Heidelberg and Göttingen, he lived from 1820 to 1831 in private at Cassel, where he became intimately acquainted with the most prominent men of his time. In 1831 he was appointed professor at Marburg, and April 24, 1842, he openly professed the Christian faith. Up to his death, April 10, 1864, he lectured at Marburg, having been invested several times with the highest offices of the university. His last words were, "For other foundation can no man lay than that is laid, which is Jesus Christ" (1 Cor. iii, 11). The great veneration in which Rubino was held is best shown in Dr. Grau's dedication of his work, *Semiten und Indogermanen*, to his fatherly friend Rubino. See Kalkar, *Israel und die Kirche*, p. 127; Delitzsch, *Saat auf Hoffnung*, II, ii, 52 sq.; *Literarischer Handweiser*, 1864, p. 342; Fürst, *Bibl. Jud.* iii, 179. (B. P.)

Rubrics (Lat. *rubrica*, from *ruber*, red), in classic use, meant the titles or headings of chapters in certain law-books, and is derived from the red color of the ink in which these titles were written, in order to distinguish them from the text. In mediæval and modern use the name is restricted to the directions which are found in the service-books of the Church, as to the ordering of the several prayers, and the performance of the sometimes complicated ceremonial by which they were accompanied. The same name, together with the usage itself, is retained in the Church of England Prayer-book; and in all these, even where the direction has ceased to be printed in red ink, the name rubric is still retained. Where red ink is not employed, the rubric is distinguished from the text by italics, or some other variety of print. In the Catholic Church a considerable controversy exists as to whether the rubrics of the missal, the ritual, and the breviary are to be considered preceptive or only directive—a question into which it would be out of place to enter. A similar controversy has existed at various times in the English Church. The science of rubrics is with Catholics a special branch of study, the chief authorities on which are Gavanti, Merati, Cavalieri, and other more compendious writers.

Rubruquis, GUILLAUME DE. See **RUYSBROEK**.

Ruby (only plur. פִּנִּיִּים, *peninim*; once [Prov. iii, 15, Kethib] פִּנִּיִּים, *peniyim*; Sept. λίθοι, or λίθοι πολυτελεῖς; Vulg. *cunctæ opes, cuncta pretiosissima, gemmae, de ultimis finibus, ebor antiquum*), a gem concerning which there is much difference of opinion and great uncertainty. It occurs in the following passages: "The

price of wisdom is above *peninim*" (Job xxviii, 18; so also Prov. iii, 15; viii, 11; xxxi, 10); "A multitude of *peninim*" (xx, 15). In Lam. iv, 7, it is said, "the Nazirites were purer than snow, they were whiter than milk, they were more ruddy in body than *peninim*." Boete (*Animad. Sac.* iv, 3), on account of the ruddiness mentioned in the last passage, supposed "coral" to be intended, for which, however, there appears to be another Hebrew word. See **CORAL**. Michaelis (*Suppl.* p. 2023) is of the same opinion, and compares the Heb. פִּנִּיִּים with the Arab. *panah*, "a branch." Gesenius (*Thesaur.* s. v.) defends this argument. Bochart (*Hieroz.* iii, 601) contends that the Hebrew term denotes *pearls*, and explains the "ruddiness" alluded to above by supposing that the original word (פִּנִּיִּים) signifies merely "bright in color," or "color of a reddish tinge." This opinion is supported by Rosenmüller (*Schol. in Thren.*) and others, but opposed by Maurer (*Comment.*) and Gesenius. Certainly it would be no compliment to the great people of the land to say that their bodies were as red as coral or rubies, unless we adopt Maurer's explanation, who refers the "ruddiness" to the blood which flowed in their veins. See **RUDDY**. On the whole, considering that the Hebrew word is always used in the plural, we are inclined to adopt Bochart's explanation, and understand pearls to be intended. See **PEARL**.

The ruby is, however, generally supposed to be represented by the word קַדְקֹד, *kad-kod*, which occurs in Ezek. xxvii, 6, and Isa. liv, 12, where the A. V. renders it "agate" (q. v.). An Arabic word of similar sound (*kadskadaat*) signifies "vivid redness;" and as the Hebrew word may be derived from a root of like signification, it is inferred that it denotes the Oriental ruby, which is distinguished for its vivid red color, and was regarded as the most valuable of precious stones next after the diamond. This mode of identification, however, seems rather precarious. The Greek translator of Ezek. xxvii, 16 does not appear to have known what it meant, for he preserves the original word; and although the translator of Isa. liv, 12 has *jasper* (Gr. *iaspis*, ἰασπις), he is not regarded as any authority in such matters when he stands alone. The ruby was doubtless known to the Hebrews, but it is by no means certain that *kad-kod* was its name. Some have supposed that the word *ekdach*, קִדְחַךְ, which from its etymology should signify a sparkling, flaming gem, is to be regarded as a species of ruby. It occurs only in Isa. liv, 12; hence the Sept. and A. V. make it a "carbuncle" (q. v.).

The ruby of mineralogists is a red sapphire (q. v.) or *spinel*. It is a gem highly prized, and only inferior in value to the diamond. The finest are the Oriental, which are chiefly brought from Ceylon and Burmah. They are found in alluvial deposits. The ruby, like other gems, had a host of occult virtues attributed to it by the Cabalists. It was supposed to give valor to the soldier in battle; to decide and concentrate affection; to foretell evil by growing pale, and to indicate that the danger was past by recovering its vivid color. See **GEM**.

Ruchat, ABRAHAM, a Swiss ecclesiastical writer, was born about 1680. He was for a time pastor at Aubonne, but after 1721 taught belles-lettres and philosophy in the Academy of Lausanne. He died Sept. 29, 1750. His principal works are, *Grammatica Hebraica* (Leyden, 1707):—*Abbrégé de l'Histoire Ecclesiastique du Pays de Vaud* (Berne, 1707):—*Histoire de la Réformation de la Suisse* (Geneva, 1740, 6 vols.). See Rousset, *Éloge de Ruchat*.—Hoefler, *Nouv. Biog. Générale*, s. v.

Ruchrath, JOHANN, called *Von Wesel*, a German reformer, was born at Oberwesel, on the Rhine, about 1410. He was professor of divinity at Erfurt, and afterwards preached at Worms for seventeen years. He was accused of heresy and tried before the Inquisition in 1479, but, to escape death or torture, recanted. Ruchrath died in 1481. He wrote a *Treatise against Indul-*

gences, and Concerning the Authority, Duty, and Power of Pastors. See Hodgson, *Reformers and Martyrs* (Phila. 1867).

Rückersfelder, AUGUST FRIEDRICH, a German Orientalist, who died Oct. 15, 1799, at Bremen, where he retired in 1753 from his position as doctor and professor of theology and Oriental languages at the gymnasium in Deventer, is the author of *Dissertatio Inaug. Exegetica ad Psalmos lxxiii*, 21-23 (Deventer, 1755):—*Descriptio Codicis Hebraei Manuscripti Daventriensis* in his *Sylloge Commentationum et Observationum* (ibid. 1762):—*Commentar. Harmon. in IV Evang. sec. Singulor. Ordinem Proprium Dispositum* (being a translation of M'Knight's *Harmony of the Four Gospels* [ibid. 1772-79, 3 vols.]). See Winer, *Handbuch der theol. Literatur*, i, 244, 280; ii, 142; Zuchold, *Bibl. Theol.* p. 1093; Fürst, *Bibl. Jud.* iii, 180. (B. P.)

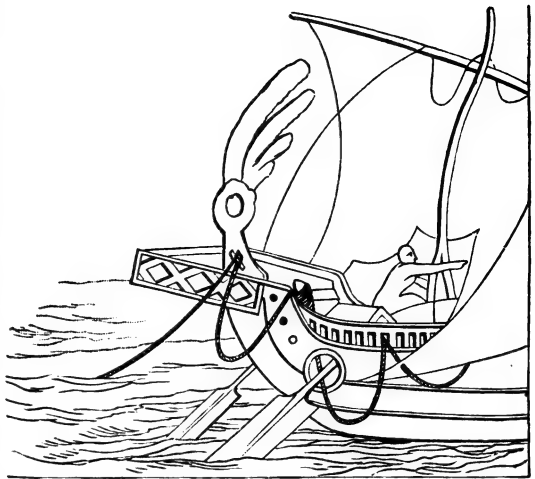

Rudbeck, JOHN, a learned Swedish prelate and reformer, was born at Orebro about 1580. He was chaplain to Gustavus Adolphus, and bishop of Westerås. His death occurred in 1646. He was father of Olas (or Olaf) Rudbeck, Sr., the eminent anatomist and botanist.

Rudborne (or Rodburne), THOMAS, an English bishop and architect, was a native of Hertfordshire. He studied at Merton College, Oxford, and was afterwards chaplain to Henry V previous to the battle of Agincourt. He received the prebend of Horton, Salisbury, the living of East Deping, Lincolnshire, and the archdeaconry of Sudbury. He served the office of proctor in the university, and was elected chancellor. In 1426 he was warden of Merton College, resigning the next year. In 1433 he was promoted to the see of St. David's, and died about 1442. The tower and chapel of Merton will long remain monuments of his skill and taste. He wrote, according to Bale, a *Chronicle*, and some *Epistles ad Thomam Waldenem et Alios*.

Rudd, John Churchill, D.D., an Episcopal clergyman, was born at Norwich, Conn., May 24, 1779. By adverse circumstances he was prevented from taking a collegiate course, and, although brought up a Congregationalist, united with the Episcopal Church. He was admitted to deacon's orders by bishop Moore, April 28, 1805, and in 1806 to priest's orders by the same prelate. In December, 1805, he took charge of St. John's Parish, Elizabethtown, N. J., and in May following was instituted its rector. Owing to ill-health, he resigned, May 26, 1826, and removed to Auburn, N. Y., and took charge of St. Peter's Church in that city for seven years. In 1827 he was induced by bishop Hobart to commence *The Gospel Messenger*, which he continued to edit until the close of his life, Nov. 15, 1848. The following are some of Dr. Rudd's publications: *Monitorial Schools* (1825), an address:—*The Resurrection* (1833), a sermon:—*Christ, the Chief Corner-stone* (1833), a sermon:—besides a number of other *Addresses and Sermons*. Dr. Rudd edited the *Churchman's Magazine*, several years previous to 1812. See Sprague, *Annals of the Amer. Pulpit*, v, 501.

Rudd, Sayer, a minister of Walmer, Kent, England, in the middle of the last century, published a number of *Poems, Sermons, and Theological Treatises*, of which the best known is his *Essay on the Resurrection, Millennium, and Judgment* (Lond. 1734, 8vo). His *Prodromus, or Observations on the English Letters*, was published in 1755 (8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rudder (πηδάλιον, Acts xxvii, 20, strictly a *foot-let*; "helm," James iii, 4), an oar (hence the English *paddle*) used by the ancients for steering vessels, being passed through an eye or rowlock at the stern; when at anchor they were unshipped, and secured from slip-

Stern of an Ancient Ship, showing the "Rudders." (From a painting in Herculaneum representing the desertion of Ariadne.)

ping through the rudder-port by lashings (ζευκτήρια, "bands"). There were usually two of these rudders (hence the plural), one on each quarter of the vessel. See SHIP.

Ruddy (אַדְמוֹנִי, *admoni*, reddish; Sept. πυρράκης; Vulg. *rufus*). Many interpreters think that the word means *red-haired*, and it is so rendered in the ancient versions, although ours understands a *ruddy complexion*. It would then appear that Esau (Gen. xxv, 25) and David (1 Sam. xvi, 12; xxvii, 42) had red hair, a peculiarity so uncommon in the East that it forms a particular distinction, as in the Scriptural instances; but it is by no means unknown, especially in mountainous countries. It has been observed in Persia, accompanied with the usual fresh complexion. Such hair and complexion together seem to have been regarded as a beauty among the Jews. The personal characters of Esau and David appear to agree well with the temperament which red hair usually indicates.—Kitto. That interpretation, however, is by no means established, and the contempt of Goliath for David as a youth of a fair, bright skin is more probable. See DAVID. This view is confirmed by the application of kindred words, as *adam* (אָדָם), in Lam. iv, 7, to the Nazarites in general; and *adom* (אָדָם) to the bridegroom (Cant. v, 10), who is immediately described as black-haired (ver. 11).

Rudelbach, ANDREAS, a Danish theologian, was born at Copenhagen in 1792. He became superintendent at Glauchau, Saxony, in 1829, and died in 1862. He published a number of dogmatic works, in which he advocates the orthodox Lutheran creed.

Rudenture, the moulding, in form like a rope or staff, filling the flutings of columns, usually one third of the height. It is sometimes plain, sometimes ornamental.

Rudès (*uncultivated*), one of the names given to the catechumens in the early Church, because they were unacquainted with the doctrines of Christianity, into which the baptized or faithful were initiated.

Rüdinger (also **Rüdiger** and **Rudinger**), ESROM, a German theologian and author, was born at Bamberg, Bavaria, May 19, 1523. He was a pupil of Joachim Camerarius in his early years, and subsequently (1548) became his son-in-law. In 1549 he became rector of the gymnasium at Zwickau, and greatly promoted the efficiency of that school; but, as his relations with the superintendent became unpleasant by reason of his advocacy of the "necessity of good works," he gladly accepted a call to Wittenberg in 1557. In 1562 he be-

came rector, and in 1570 dean, of the theological faculty of that university. By this time his peculiar views had become known. He did not acknowledge the corporeal presence of Christ in the sacrament, nor a real partaking of the *res sacramenti* by unbelievers. He was commanded to renounce such opinions, and was even arrested (1574); but he refused and fled, eventually establishing a school among the Moravians, in connection with whose curriculum he wrought out his valuable exposition of the book of Psalms. He died at Nuremberg in 1591, though Altorf is sometimes given as the place of his decease.

Rüdinger left many works in manuscript, besides others which were published. His theological writings are the following: *Synesis Cyrenæi Agyptii, seu de Providentia Disputatio*, etc. (Basle, 1557):—*Exegesis . . . de Cæna Dom.* (Leipsic and Heidelberg, 1575; the latter edition naming Cureus as the author):—*Libri Psalmorum Paraphrasis Latina*:—*Ἐνδύξιν, Tunica Funebris ex Tela Paradisi ad Dextram Crucis Christi* (Luke xxiii, 43):—*De Origine Ubiquitatis Pii et Erudit.* . . . *Tractatio* (Geneva, 1597), a posthumous work usually credited to him:—*De Jesu Martyre Anna Burgio*, etc., in *Miegii Monumenta*, etc., ii, 61 sq.:—*De Fratribus Orthodoxis in Bohemia et Moravia*, etc., in Camerarius's *Narratio de Fratr. Orthod. Ecclesis in Boh.* (Heidelberg, 1605). See Will, *Nürnbergisches Gelehrten-Lexikon*, s. v., and the supplementary volume to the same work by Nopitsch, s. v.

Rudolph, *St.*, a monk of FULDA in the 9th century, was a pupil of Rhabanus Maurus (q. v.), director of the convent-school, and spiritual counsellor and favorite preacher to Louis II. He wrote a number of works, among which a continuation of the *Annals of Fulda* (839–863) holds the first place. By direction of his abbot, Maurus, he composed a life of Lioba, abbess of Bischofsheim, which is given in Surius and Mabillon (*Acta Ord. S. Ben.* Sæc. iii, 2). A short history of the Saxons, which has been incorporated into Meginhard's narrative of the translation of St. Alexander (comp. the art. "Felicitas u. ihre 7 Söhne" in Pertz, ii, 673–681), is also from his pen; and to this list must be added a tract known by the erroneous title *Vita B. Rabani Archiep. Moguntiacensis*, given by the Bollandists, vol. i, Feb. p. 500; Mabillon, *Acta Ord. S. Ben.* vol. iv, pt. ii, p. 1, etc. Canisius (*Lect. Antiq.* ii, 168, ed. Basnage) contains a letter of Ermenrich, subsequently abbot at Ellwangen, with which he transmits to Rudolph, his former instructor, a life of the priest St. Sola for improvement. See Pertz, i, 338, 339, in the preface to the *Annals of Fulda*.

Rudolph (Rudolf or Rodolf) II, emperor of GERMANY, eldest son of Maximilian II, was born in 1552. He was educated at the Spanish court by the Jesuits. Upon the death of his father (October, 1576), he ascended the throne. He prohibited the exercise of the Protestant religion, and gave all the principal offices to the Catholics. This bigotry and intolerance led the Protestants to ally themselves with their coreligionists in the Low Countries and in France in 1608, of which confederation the elector-palatine Frederick IV was the head. Between 1608 and 1611 his brother Matthias extorted from Rudolph successively the sovereignty of Austria, Moravia, Hungary, Bohemia, etc. He died without issue in January, 1612, and was succeeded by Matthias. Rudolph was devoted to the study of astrology and the occult sciences, and extended his patronage to Kepler and Tycho Brahe. The *Rudolphine Tables* derive their name from Rudolph, who originally undertook to defray the expenses incidental to the undertaking, but failed for want of means. See Kurtz, *Geschichte Oesterreichs unter Kaiser Rudolph* (Linz, 1821).

Rudra (the bloody one), a Hindû deity of the Vaidic period, described in the Veda as the father of the winds. At a later period he is identified with Siva (q. v.)

Rudy, John, a (Dutch) Reformed minister, was born in Switzerland in 1791, and studied under the Rev. Dr. Helffenstein in Philadelphia. He entered the ministry of the German Reformed Church in 1821, and after serving Christ in North Carolina for three years, at Guilford (1821–24), he transferred his relations to the Reformed Dutch Church. From 1825 to 1835 he was pastor at Germantown, N. Y. In the latter year he resolved to leave the English-speaking Church and people and came to New York city as a missionary to the Germans, and in 1838 took pastoral charge of the German Evangelical Mission Church in Houston Street, where he rendered apostolic service until his death, in 1842. He built up this Church from a little gathering in a hired hall to a membership of 300, and secured the erection of their commodious edifice. He was a man of deep piety, filled with the Spirit, and burdened with the labors of a New-Testament evangelist. His distinguishing traits were a sound mind, good judgment, untiring zeal, and faithfulness unto death. He was an efficient coworker with the American Tract Society in the preparation and circulation of evangelical truth among the Germans. He gave himself up to the missionary service among his countrymen with tact and success. His last illness was contracted while engaged in arduous pastoral work. (W. J. R. T.)

Rue (ῥῆγάνον; Vulg. *ruta*) occurs in the A. V. only in Luke xi, 42: "But woe unto you, Pharisees! for ye tithe mint, and rue, and all manner of herbs, and pass over judgment," etc. In the parallel passage (Matt. xxiii, 23) *dill* (ἀνῆσον, translated "anise") is mentioned instead of rue. Both dill and rue were cultivated in the gardens of Eastern countries in ancient times, as they are at the present day. Dioscorides (iii, 45) describes two kinds, *Ruta montana* and *Ruta hortensis*; the latter of which he says is the best for the table. They are distinct species, and the first is common in the south of Europe and the north of Africa. The other is usually called *Ruta graveolens*, and by some *R. hortensis*, which is found in the south of Europe, and is the kind commonly cultivated in gardens. It is a native of the Mediterranean coasts, and has been found by Hasselquist on Mount Tabor. Several species grow wild in Palestine, but *R. graveolens* is cultivated (Tristram, *Nat. Hist. of the Bible*, p. 478). Josephus speaks of a rue of extraordinary size as growing at Machærus (*War*, vii, 6, 3). Rue was highly esteemed as a medicine, even as

Ruta graveolens.

early as the time of Hippocrates. Pliny says, "Rue is an herbe as medicinale as the best. That of the garden hath a broader leafe, and brauncheth more than the wild, which is more hotte, vehement, and rigorous in all operations; also that is it sowed usually in Februarie, when the western wind, Favonius, bloweth. Certes we find that in old time rue was in some great account, and especial reckoning above other herbs: for I read in auncient histories, That Cornelius Cethegus, at what time as he was chosen Consull with Quintius Flaminius, presently upon the said election, gave a largesse to the people of new wine, aromatized with rue. The fig-tree and rue are in a great league and amitie, inasmuch as this herb, sow and set it where you will, in no place prospereth better than under that tree; for planted it may be of a slip in spring" (Holland's *Pliny*, xix, 8). That it was employed as an ingredient in diet, and as a condiment, is abundantly evident from Apicius, as noticed by Celsius, and is not more extraordinary than the fondness of some Eastern nations for assafetida as a seasoning to food (see Columela, *R. Rust.* xii, 7, 5). That one kind was cultivated by the Israelites is evident from its being mentioned as one of the articles of which the Pharisees paid their tithes, though they neglected the weightier matters of the law. Rosenmüller states that in the Talmud (*Shebuoth*, ix, 1) the rue is indeed mentioned among kitchen herbs (*asparagus portulacæ et coriandro*); but, at the same time, it is there expressly stated that it is tithe-free, it being one of those herbs which are not cultivated in gardens, according to the general rule established in the Talmud. Celsius long previously observed with reference to this fact that in making rue free from tithes they show how far they have left their ancestors' customs; by which, as God's Word assures us, it was tithed (*Hierobot.* ii, 253). See Beckman, *Ad Antiq. Caryst.* p. 69 sq.

Rue is a small shrub with a bushy stem, bark gray towards the base, with doubly pinnated leaves of a deep dark green, and yellowish flowers. The whole plant has a peculiar and very powerful odor, and its juice is so acrid that if not diluted it would blister the skin. Notwithstanding this coarseness, it was popular with the ancients, and it is still prized in the East. The Egyptians have a proverb, "The presents of our friends come on leaves of rue," meaning that they derive a pleasant perfume from the good-will of the sender, and just as verbenæ and mignonette are grown in our windows, the Turks and Arabs keep pots of rue in their drawing-rooms (Burckhardt, *Arabic Proverbs*, p. 695). Among the Greeks and Romans it was valued not only as tonic and medicinal, but a special efficacy was ascribed to it as a safeguard from serpents (Pliny, *Hist. Nat.* xx, 13)—a popular belief embodied in the modern Arabic phrase, "More hateful than is the scent of rue to serpents." In the Middle Ages of Europe it acquired a certain sacredness from small bunches of it being used by the priests to sprinkle holy water on the people (Burnett, *Useful Plants*, vol. i), and it is called "herb of grace" by Shakespeare (*Richard II.* iii, 4).

Rue, CHARLES DE LA, a Benedictine monk, was born at Corbie, Picardy, in 1684 (5). He became very learned in the Greek and Hebrew languages, and died in 1739. He published three volumes of the *Works of Origen* (1733-39), and his nephew Vincent de la Rue, born in 1707, published the fourth volume in 1759.

Ruechat, ABRAHAM, a theologian and historical writer of Switzerland, was born Sept. 15, 1678, at Grand-cour, in the canton of Vaud. He early manifested a taste for archæological and historical inquiry, and also great facility in the acquiring of languages, so that he was able to apply for a professorship of Greek and Latin at Berne when twenty-one years of age; and soon afterwards mastered English and German, attending, for the purpose of perfecting himself in the latter tongue, various universities, e. g. Berlin and Leyden. On his return he was made pastor of Aubonne and Rolle, then

professor of belles-lettres and president of the Upper Gymnasium at Lausanne (July, 1721), and finally professor of theology in the same institution, which latter station he occupied until his death, Sept. 29, 1750.

Ruechat distinguished himself chiefly as a historian of the Church in his native land. In 1707 he published an *Abrégé de l'Histoire Eccl. du Pays-de-Vaud*. His principal work, *Histoire de la Réformation de la Suisse* (Geneva, 6 vols.), appeared in 1727 and 1728. It was placed on the *Index* at Rome, and was assailed by Jesuit priests, to whom Ruechat replied in a letter addressed to the editor of the *Biblioth. Germanique*, xx, 218. His work had been published no farther than 1537, the remainder not being given to the public until more than a century after the first issue. The first complete edition is by Valliemin (Lausanne and Paris, 7 vols.), with *Notice sur Abraham Ruechat* appended. Of Ruechat's works a number have not yet been printed. The list of his printed works includes a *Hebrew Grammar* (Leyden, 1707):—*Examen de l'Origénisme* (against M. Huber [q. v.]):—a translation of the epistles of the apostolical fathers Clement, Ignatius, and Polycarp (1721):—a treatise on Bible weights and measures (1743):—and various dissertations.

Ruet, FRANCISCO DE PAULA, a Spanish Protestant minister, was born at Barcelona in 1826. When nineteen years of age he became deeply impressed with the evangelical truth under the preaching of De Sanctis at Turin, and he at once decided for the Protestant faith. Having been ordained at Gibraltar, he at once betook himself to the preaching of the Gospel in his own native place with that ardor and zeal which characterizes the nature of the Spaniard. The fanaticism of the Romish Church, however, brought about his expulsion from his country for the remainder of his life. He went to Gibraltar, and from that place he labored for the evangelization of his country with great effect, and was the means of bringing Matamoros to the Gospel truth. The revolution which broke out in 1868 once more brought him back to his country, and from that time he labored at Madrid in the most intimate connection with the brothers Fliedner, preaching at the Jesus' chapel in Calatrava Street until he died, Nov. 18, 1878. Ruet was the senior among the Protestant clergy of Spain, and also the first who had suffered imprisonment and exile for the sake of the evangelical faith. (B. P.)

Ruff, an ecclesiastical garment: (1) a piece of plaited linen worn round the neck; (2) a falling collar; (3) an academical robe of silk worn over the gown of certain graduates; (4) a name sometimes given in the 17th century to the hood or tippet worn by clerics in Church.

Ruffinus. See RUFINUS.

Ruffner, HENRY, D.D., LL.D., a Presbyterian divine, was born in the valley of Virginia, in what is now Page County, Jan. 19, 1789. His father was of German origin, his mother of Swiss. In his early youth his father removed to Kanawha County, Va.; and, schools being very scarce in that section, he was sent to Lewisburg, Va., to the school of Rev. John McElhenny, who was also pastor of the Church in that place. While here he was hopefully converted, and joined the Church. He graduated at Washington College, Lexington, Va., in 1817, studied theology with his friend George A. Baxter, D.D., and was licensed by Lexington Presbytery in 1819. The same year he was elected professor in Washington College, and was ordained by Lexington Presbytery and took charge of the Church of Timber Ridge, Va. During the thirty years of his connection with Washington College, he successively filled every professor's chair, and was its president for ten or twelve years. In 1848 he was compelled to resign his position by reason of ill-health; but after a few years of rest he took charge of the Church in Malden, on the Kanawha River, where he continued to labor till a year before his death, which

occurred Dec. 17, 1861. Dr. Ruffner was an untiring and enthusiastic student all his life. In learning he had few equals, and for many years he was probably the most learned man in the Southern country, if not in the United States. He was always an instructive preacher; at times his eloquence was overpowering, his manner always demanding attention. He was the author of *Judith Bensuddi* (a romance):—*The Fathers of the Desert* (2 vols.):—*The Predestinarian*:—also a number of Pamphlets and Addresses. See Wilson, *Presb. Hist. Almanac*, 1863, p. 202; *N. Amer. Rev.* xlv, 241; *South. Lit. Mess.* iv, 792; *Review of Duyckink's Cyclop. of Amer. Lit.* p. 28; *Amer. Annual Cyclop.* 1861, p. 545. (J. L. S.)

Ruffo, Dionigi Fabrizio, an Italian cardinal and general, was born at Naples (or Calabria) about 1744. He raised in Calabria the Army of the Holy Faith, a large body of royalists which, under his command, expelled the French and the republicans from the country in 1799 and restored king Ferdinand IV to the throne. A number of republican chiefs taken by him at Naples, as prisoners of war, were put to death by order of the king. He died in 1827.

Ruffo, Luigi, cardinal and archbishop of Naples, was born at San Onofrio, Calabria, Aug. 25, 1750. He was made cardinal-priest, and in 1801 archbishop of Naples. On the accession of Joseph Bonaparte to the throne, Ruffo was exiled, and remained in Rome till 1815, when he was allowed to return to his diocese. Under Ferdinand IV he was director of the university, but was replaced by Rosini, bishop of Pozzuoli. Ruffo died at Rome Nov. 17, 1832.

Rufina, St., a Christian martyr, under Valerian, at Rome. Her suitor, to avoid danger, renounced Christianity, and endeavored to dissuade Rufina from her profession. She remained steadfast, and her suitor, finding her unyielding, informed against her and occasioned her arrest. Although tortured several times, she remained inflexible, and was beheaded A.D. 257.

Rufinus Tyrannius, monk, presbyter, the friend, and later the adversary, of Jerome, was born at Concordia, Italy, about A.D. 330. Forty years later he was converted to Christianity at Aquileia and became a monk, in which character he visited the East and became acquainted with the monastic institution as found in the Nitrian desert and elsewhere. He witnessed and wrote an account of the persecution under the emperor Valens, though it is not certain that he endured any of the troubles of martyrdom. In 378 he went to Jerusalem in company with Melania, a strict ascetic and friend of Jerome, and was made presbyter by the bishop John of Jerusalem in 390. The breaking-out of the Origenistic controversy (q. v.) soon afterwards destroyed his friendship with Jerome, the latter taking sides against that father. In 397 Rufinus, again accompanied by Melania, who shared his views, journeyed to Rome, where he enjoyed the protection of bishop Siricius; but he was summoned before Anastasius, the succeeding bishop, to answer for his Origenistic errors. He sent a written defence from Aquileia, but was formally condemned in 399. Subsequently the incursions of the Goths under Alaric compelled him to flee. He died in 410 in Sicily, while on the way to Palestine. The theological importance of Rufinus arises from his having brought the writings of the Greeks within the reach of the Western Church. He translated the *Church History* of Eusebius in response to the wish of bishop Chromatius of Aquileia, though taking rather arbitrary liberties with the text (comp. Vales. on Euseb.; Huetius, *De Claris Interpretibus*, p. 202; Kimmel, *De Rufino Eus. Interprete* [1838]), and continued the history to the reign of Theodosius the Great, the continuation being afterwards translated into Greek. He also wrote a *Vita Patrum S. Histor. Eremitica* for bishop Patronius of Cologian, who furnished the material and was long con-

sidered to be the author, though many attributed the work to Jerome instead. Rufinus's translation of Origen was intended to demonstrate the orthodoxy of that father, but was not impartially done, and gave rise to acrimonious disputes with Jerome, against whom he now wrote his two books known as *Insective*. His exposition of the Apostles' Creed deserves mention also. It was composed at the request of bishop Laurentius, was much esteemed in ancient times, and is still important to the history of doctrines. Several other works once credited to him are now rejected as spurious. The chief edition of his writings is by Vallarsi (Verona, 1745). The *Church History* was first printed at Basle in 1544, but was afterwards improved by the Carmelite Peter Th. Oacciar, and published in 1740. See Fontanini, *Hist. Lit. Aquileiens*; De Rubéis [F. J. Maria], *Monum. Eccl. Aquil.* (Arg. 1740); *De Rufino* (Ven. 1754); Marzannitti, *E. H. de Tyr. Ruf. Fide et Religione* (Patav. 1835); Schröckh, x, 121 sq.; Neander, *Ch. Hist.* vol. i.

Rufus (Lat. for red, Græcized 'Ροῦφος) is mentioned in Mark xv, 21, along with Alexander, as a son of Simon the Cyrenæan, whom the Jews compelled to bear the cross of Jesus on the way to Golgotha (Luke xxiii, 26). A.D. 29. As the evangelist informs his readers who Simon was by naming the sons, it is evident that the latter were better known than the father in the circle of Christians where Mark lived. Again, in Rom. xvi, 13, the apostle Paul salutes a Rufus whom he designates as "elect in the Lord" (ἐκλεκτὸν ἐν Κυρίῳ), and whose mother he gracefully recognises as having earned a mother's claim upon himself by acts of kindness shown to him. A.D. 55. It is generally supposed that this Rufus was identical with the one to whom Mark refers; and in that case, as Mark wrote his gospel in all probability at Rome, it was natural that he should describe to his readers the father (who, since the mother was at Rome, while he, apparently, was not there, may have died or have come later to that city), from his relationship to two well-known members of the same community. It is some proof at least of the early existence of this view that in the *Acta Andrea et Petri* both Rufus and Alexander appear as companions of Peter in Rome. Assuming, then, that the same person is meant in the two passages, we have before us an interesting group of believers—a father (for we can hardly doubt that Simon became a Christian, if he was not already such, at the time of the crucifixion), a mother, and two brothers, all in the same family. Yet we are to bear in mind that Rufus was not an uncommon name (Wettstein, *Nov. Test.* i, 634); and possibly, therefore, Mark and Paul may have had in view different individuals.—Smith. The name is Roman, but the man was probably of Hebrew origin. He is said to have been one of the seventy disciples, and eventually to have had charge of the Church at Thebes.

Rugen, in Hindû mythology, was a prince belonging to the race of children of the moon, father of the Birmasenes, and grandfather of the Pradibes.

Rugger, PROSPER (originally *Salomo Meir ben-Moses*), a Jewish scholar, was born at Novara in 1606. At the age of thirteen he was already known as a good Hebraist, and was afterwards appointed rabbi at Jerusalem. On June 25, 1664, he joined the Christian Church and received the name *Prosper Ruggerius*. The date of his death is not known. While yet a member of the synagogue he wrote, שבב שמה, on the advent of the Messiah, which was to take place in 1676:—a commentary on *Pirke Shira*:—a biography of Joseph Karo, Joseph della Renu, and Nahaman Kathofa. The works which he wrote after his conversion are still in manuscript. See Fürst, *Bibl. Jud.* iii, 180; Delitzsch, *Kunst, Wissenschaft u. Judenthum*, p. 297; Jöcher, *Gelehrten-Lexicon*, iii, 379, s. v. "Meir ben-Mose Novara." (B. P.)

Ruggles, Henry Edwin, a Presbyterian minis-

ter, was born at Newbury, Vt., Nov. 27, 1822. He entered Dartmouth College, where he graduated in 1845. He spent a year in teaching the classics at Lyndon, Vt., and also at Hoosic Falls, where he remained two years, at the end of which time he entered the Union Theological Seminary, N. Y., where in due course of time he graduated, and was appointed city missionary in New York. At the end of his service in this field he went South, and was appointed stated supply over a Church in St. Louis, Mo., which position he occupied for one year, and was ordained with a view of becoming pastor of the Presbyterian Church at St. Charles, Mo. Thence he came to New York, and was pastor of a Congregational Church at Eaton village, where he remained but one year on account of sickness, which obliged him to return to his native place, where he died, Dec. 24, 1856. (W. P. S.)

Ruggles, William, LL.D., a Baptist educator, was born in Rochester, Mass., Sept. 5, 1797, and was a graduate of Brown University in the class of 1820. Shortly after graduating, he went to Washington, D. C., and was appointed a tutor in Columbian College in 1822, his name being retained in the list of its faculty for forty-five years. He was appointed professor of mathematics and natural philosophy in 1827, and discharged the duties of that office with marked ability and success till 1859, when, at his own request, he was appointed professor of political economy. He discontinued active service after 1873. During four interims he was the acting president of the college. He died Sept. 10, 1877.

Prof. Ruggles was a most generous giver to the benevolent organizations of the denomination (the Baptist) with which he sympathized. "His relations with some of the Baptist missionaries in Burmah had led him to take particular interest in their labors. This was especially true of the Karen Theological School established by the late Dr. Binney, who had been his associate in Washington. In his last will and testament, after certain personal bequests, he bestowed his estate upon the Baptist Missionary Union and the Baptist Home Missionary Society, with a residuary provision for the college in whose service he had spent his entire active life." (J. C. S.)

Rugiwit, in Wendish mythology, was a war-god of the ancient Rugians, and presumably the same as *Karewit*, since the latter is represented in a similar character (at Karenz, on the island of Rugen). Frequent colossal statues of stone or wood were erected to him in the different towns, in which he appeared as a being having seven faces on a single head, and as bearing a naked sword in his hand, while seven other swords were suspended from his person. The swallow appears to have been sacred to him, since that bird was allowed to build its nests in the eyes, mouths, and other lines of the different faces, and also in the folds of the scarlet cloth in which the god was usually enveloped for the purpose of preventing access to his person. At Rhetra an image of this god was found which was almost naked and had six heads, four male and two female, besides the head of a lion on the breast. It has been supposed that a twofold deity, representing both Rugiwit and Karewit, is set forth in this image; but the two are but a single god of war.

Ruhamah [some *Ru'hamah*] (Heb. *Ruchamah*, רַחֲמִים, *finding mercy*; part. of רָחַם, *to be merciful*; Sept. translates ἰλεμένην, and so Vulg. *miseriordiam consecuta*), a figurative title of Israel. When God directed Hosea to prophesy against the wickedness of Israel and Judah, he commanded him to take to wife a harlot, the symbol of idolatry, the spiritual harlotry of the Jews; and of her were born a daughter, named, after God's direction, Lo-ruhamah, "Not obtaining mercy," and a son named Lo-ammi, "Not my people" (Hosea i, 6, 9). Israel is represented by Lo-ruhamah,

Rugiwit.

Judah by Lo-ammi. Perhaps Israel is typified by the female because that kingdom was the weaker of the two, and the more completely overthrown; and Judah by the male because from Judah the Messiah was to descend according to the flesh. Subsequently Hosea says (ii, 1), "Say ye unto your brethren, Ammi [my people]; and to your sisters, Ruhamah" [having obtained mercy], thus promising God's reconciliation to the people on their repenting and seeking him; saying that he will have mercy, and they shall be his people, thus indicating the restoration of the Jewish nation after much affliction. As the promises of grace to the obstinate Jews are transferred meanwhile to the believing Christians, Peter applied them to the Gentile proselytes, to whom he addresses his first epistle, telling them that in time past they "were not a people, but are now the people of God, which had not obtained mercy, but now have obtained mercy" (1 Pet. ii, 10). Paul also distinctly applies the prophecy not to the Jews only, but to the Gentiles: "That he might make known the riches of his glory on the vessels of mercy . . . even on us, whom he hath called, not of the Jews only, but also of the Gentiles. As he saith also in Osee, I will call them my people which were not my people, and her beloved which was not beloved" (Rom. ix, 23-25). The wording in Hosea (i, 2) indicates the admission of the Gentiles into the participation of the promises made to the Jews. In the first instance, in the threats against Israel and Judah, it is a son, Lo-ammi, and a daughter, Lo-ruhamah. When the promises are given, the plural number is used; then it is *brethren* and *sisters*: not Jew only, but Jew and Gentile. See LO-RUHAMAH.

Ruhmani, in Hindû mythology, was the first consort of the god Vishnu in the incarnation of Krishna.

Ruin. The words used in the Hebrew texts rendered in the A. V. are very expressive. The ruin of a city by dilapidation, separating all its stones: Isa. xxv, 2, "Thou hast made of a fenced city a ruin" (or *separation*, מַפְסָלָה; so of a country, Isa. xxiii, 13; מַפְסָלָה, Isa.

xvii, 1; מַחֲרֵב, Ezek. xiii, 13; xxvii, 27). Ruin of strongholds by breaking them up: Psa. lxxxix, 40, "Thou hast brought his strongholds to ruin" (i. e. to a breaking, מַחֲרֵב). This word elsewhere means terror, and expresses the alarm attendant on the taking of a fortified place. Demolished structures: Ezek. xxxvi, 35, 36 (the root is מַחֲרֵב, to tear down, as in Amos ix, 11; like κατακάρω, Acts xv, 16; but in Luke vi, 49, it is ῥήγμα, a tearing).

Figuratively, ruin, a fall, or stumbling, from some cause of, or temptation to, sin: 2 Chron. xxviii, 23, "They [the gods of Damascus] were the ruin (מַחֲרֵב) of him [Ahaz] and of all Israel;" so מַחֲרֵב, Ezek. xviii, 30; xxi, 15. Ruin, destruction: Prov. xxiv, 22, "Their calamity shall rise suddenly; who knoweth the ruin (מַחֲרֵב, destruction) of them both?" Ruin, a cause for repentance: xxvi, 28, "A flattering mouth worketh ruin" (מַחֲרֵב, contrition or repentance).

Ruinart, THIERRE, a monk of the congregation of St. Maur, and a learned writer of martyrological and historical works, was born at Rheims in 1657, and entered the Order of St. Maur in the abbey St. Faron, at Meaux, in 1674. He was sent to the abbey St. Pierre at Corbie, to study philosophy and theology, and while there was chosen to assist Mabillon (q. v.) because of his interest in Christian archaeology. He travelled for literary purposes to Alsace and Lorraine, and afterwards to Champagne, and, in consequence of exposure, destroyed his health. He died Sept. 27, 1709. His works are, *Acta Primorum Martyrum*, etc. (Par. 1689, 2 vols.); improved and accompanied with a brief *Life* of the author, in a posthumous edition (Amst. 1713). The work contains, among other things, a refutation of Dodwell's opinion that the number of martyrs in the first three centuries was inconsiderable:—*Hist. Vandal. Persecutionis* (Par. 1694), in two parts, only the first of which was entirely composed by him:—*Gregor. Episc. Turonensis Opera Omnia* (ibid. 1699), preceded by the *Annales Francorum*, and containing the additions of Fredegard and others. This work was admitted by Dom Bouquet into his collection of the historical works of France:—*Acta SS. O. Benedict.* (1701, 2 vols.), by Mabillon and himself, embracing the 6th century of the order:—*An Apologie de la Mission de St. Maur* (ibid. 1702), designed to prove that Benedict of Nursia and St. Maur of Ganfeuil, founder of the Order of St. Maur, were one and the same person:—In defence of Mabillon he wrote *Eccl. Paris. Vindicata adv. R. P. Barth. Gerson.*, etc. (ibid. 1706-12):—He also wrote in honor of his master a *Vie de D. Jean Mabillon* (ibid. 1709), and issued a second edition of that author's *De Re Diplomatica*. Ruinart's *Iter Literarium in Alsaciam et Lotharingam*; *Disquisitio Hist. de Pallio Archiepiscopali*; and *Beati Urbani Papæ II Vita* appeared after the author's death. See Tassin, *Hist. Lit. de la Congrég. de St. Maur*.

Ruiswick, HERMAN, a Hollander who was found guilty of circulating grossly heretical doctrines of the Manichæan type at about the close of the 15th and the beginning of the 16th century. He was apprehended in 1499, but again liberated after he had recanted. He, however, renewed the effort to introduce his views, was accused and tried before the inquisitor Jacob of Hoogstraten, and died at the Hague by fire A.D. 1512. He was charged with denying the existence of created angels, the immortality of the human soul, and a hell, and with asserting that matter is coeternal with God. He taught that Christ was not the Son of God; that Moses did not receive the law from God; that the Bible in both Testaments is simply a fable and a series of falsehoods, etc. See Feller, *Dict. Hist.*; Ross [Alex.], *Der Welt Gottesdienste*, p. 439; *Allgem. Encyklopädie*, by Ersch u. Gruber, s. v.

Ruiz, JUAN, archpresbyter of Hita, in Spain, probably flourished during the reign of Alphonso XI. He is known to have been imprisoned by the bishop of Toledo about 1339 for his zeal in attacking the laxity of discipline and worldly manners of the clergy. The most of his life was spent in Guadalajara and Hita. He wrote a humorous poem describing his adventures, which is a mixture of all kinds of measures, containing hymns, pastoral poems, and epilogues, in the confusion of which the original plan of the work is entirely lost. The style of this work has been compared in some respects to that of Chaucer. See Ticknor, *History of Spanish Literature*; Puymaigre, *Les Vieux Auteurs Castellans*.

Rukmini (golden), the name of an avatar of Lakshmi, who under this form was the favorite wife of Krishna, an avatar of Vishnu. See AVATAR.

Ruland, ANTON, a German doctor of theology and Roman Catholic divine, was born at Würzburg in 1809, where he also received holy orders in 1832. Having labored for some time at Kitzingen, he was called in 1836 as librarian of the Würzburg University, but in 1837 he was appointed pastor of Arnstein. For thirteen years he labored in this place, when, in 1850, he was recalled to Würzburg as first librarian. From 1848 till his death, which took place January 8, 1874, he was a member of the Bavarian House of Representatives. He wrote: *Practischer Unterricht zum erstmaligen Empfang der heiligen Communion* (2d ed. Würzburg, 1866). See the *Literarischer Handweiser*, 1872, p. 161; 1874, p. 48. (B. P.)

Rule the Choir, the duty of the precentor as director of the musical services on greater doubles, and of the hebdomadary on simple feasts. The choir was ruled for the invitatory on Sundays, doubles, feasts of nine lections, and other principal feasts. Canons present at the service were said to keep choir.

Rule of Faith. See FAITH, RULE OF.

Rule, GILBERT, a Nonconformist divine, was sub-principal of King's College, Aberdeen, in 1651. He afterwards became curate of Alnwick, Northumberland, from which he was ejected in 1662. After the Revolution he was appointed principal of the University of Edinburgh. He died about 1703. He published, the *Rational Defence of Nonconformity* (1689, 4to):—*Vindication of the Church of Scotland* (1691, 4to):—*The Cyprianick Bishop*, etc. (1696, 4to):—*Good Old Way* (1697, 4to):—*Presbyterian Government*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Ruler of the Feast. See ARCHITRICLINUS.

RULER of the SYNAGOGUE. See ARCHISYNAGOGUS.

Ruling Elders. Among Presbyterian churches there are generally two classes of elders—teaching and ruling elders. See ELDER; PRESBYTERIAN CHURCH.

Ru'mah (Heb. *Rumah*, רוּמָה, high; Sept. *Ρουμά*; Vulg. *Ruma*; Josephus, *Ῥομά*, *Ant.* x, 5, 2), a city named only in 2 Kings xxiii, 36 as the home of Pedaiach, father of Jehoiaquim's mother, Zebudah. It is probably the same with *Arumah* (Judges ix, 41), which is identified by Schwarz (*Palest.* p. 158) with the modern Ramin, two miles west of Samaria. See ARUMAH. Josephus mentions a *Rumah* in Galilee (*War*, ii, 7, 21). Others with less probability regard this as identical with *Dumah*, one of the towns in the mountains of Judah, near Hebron (*Josh.* xv, 52), not far distant from Libnah, the native town of another of Josiah's wives.

Rümelin, GEORG BURKHARD, a German divine, was born in 1680 at Tübingen, where, also, he studied, and was made magister in 1699. In 1706 he labored as pastor at Ober-Owisheim, in 1707 as deacon at Unter-Owisheim, and from 1735 until his death (Jan. 29, 1746).

he was pastor at Waltdorff, near Tübingen. He wrote, *Lexicon Biblicum in quo Omnes quæ V. T. leguntur Voces, Verba scilicet ac Nomina, etc., Recensentur* (Frankf. 1716): —*Lexicon Critico-sacrum in Duas Partes Distinctum*, etc. (Tübingen, 1730). See Fürst, *Bibl. Jud.* iii, 180; Jöcher, *Gelehrten-Lexicon*, s. v. (B. P.)

Rumilia (**Rumia**, or **Rumina**), in Roman mythology, was the goddess of nursing mothers, whose office it was to cause infants to readily receive their nourishment. She was also supposed to have been nurse to Romulus and Remus.

Ruminus, in Roman mythology, was an appellative of *Jupiter*, signifying "the nourisher."

Rumoldus, *St.*, was a martyr and patron of Mechlin. His life was first written by the abbot Theodoric about A.D. 1100, and was based on popular traditions, while the death of Rumoldus is said to have occurred in the year 775. He is represented as a native of Scotia, who led a pious life and resolved to convert the heathen. A later addition to the story makes him a son of king David and a Sicilian princess. He journeyed to Rome and returned to Brabant, where he gained many converts in the neighborhood of Antwerp, Lyra, and Mechlin. Count Ado received him kindly. It is not certain that he ever became a bishop. Two murderers surprised him while reciting the Psalms, and killed him to obtain money, throwing the body into a stream. Celestial lights marked the place where it lay, and led to its receiving honorable burial, while miracles before and after death attested the sanctity of the man. In about 1050 a convent of canons of St. Rumoldus was established at Mechlin, and the cathedral in that town was dedicated to him. He is commemorated June 1. See *Acta SS. Junii*, i, 169-266; Gestel, *Hist. Archép. Mechlin.* (1725); *Hist. Littér. de la France*, ix, 338.

Rump (or rather *tail* [רִמְּץ, *alyáh*]) OF THE SACRIFICES. Moses ordained that the rump and fat of the sheep offered for peace-offerings should be given to the fire of the altar (Exod. xxix, 22; Lev. iii, 9; vii, 8; viii, 25; ix, 19). The rump was esteemed the most delicate part of the animal, being the fattest (see Bochart, *Hieroz.* i, 491 sq.). Travellers, ancient and modern, speak of the rumps or tails of certain breeds of sheep in Syria and Arabia as weighing twenty or thirty pounds (Russell, *Aleppo*, ii, 147). Herodotus says (iii, 113) that some may be seen three cubits, or four feet and a half, long; they drag upon the ground; and for fear they should be hurt, or the skin torn, the shepherds put under the tails of these sheep little carriages, which the animals draw after them. The pagans had also such regard for the rumps or tails that they always made them a part of their sacrifices (Diod. Sic. ii, 24). In the *Description de l'Égypte* (Paris, 1820, large fol.) is inserted a plate of an Egyptian ram, remarkable for the enormous size of the tail, the weight of which exceeded forty-four pounds. See SHEEP.

Runcarii, the name of an Antinomian sect of the Waldenses, which is mentioned by Reiner as agreeing for the most part with the Paterins, but as holding that no part of the body below the waist can commit mortal sin, because such sin proceeds "out of the heart." They probably took their name from the town of Runcalia or Runkel. See Reiner, *Contr. Waldens.* in *Bibl. Maz. Lugd.* xxv, 266 sq.

Runcina, in Roman mythology, was a goddess who presided over the reaping of grain.

Rundell, WILLIAM W., a minister of the Methodist Episcopal Church, was born in Norwich, Chenango Co., N. Y., and joined the Genesee Conference in 1818. He began his labors in Canada, where his name is still mentioned with great respect. He travelled in the itinerant ranks for thirty years, and was superannuated twenty-seven. He was a member of the Northern New York Conference at the time of his death, which occurred in

Mexico, Oswego Co., N. Y., March 28, 1876. See *Minutes of Annual Conferences*, 1876, p. 65.

Rundi, in Hindû mythology, was the daughter of prince Dritarashtra and Kanderi, and the form in which the goddess Maritshi chose to appear among men. Her mother became famous as having won the love of Krishna; but Rundi was not the daughter of that god, having been born before Vishnu was incarnated in that form.

Rundle, THOMAS, LL.D., an English prelate, was born in the parish of Milton Abbot, Devonshire, about 1686. In 1702 he entered Exeter College, Oxford, and was introduced to Mr. Edward Talbot, son of Dr. William Talbot, bishop of Oxford—an event of great importance, as it secured to him the friendship and patronage of the Talbot family. He was ordained by bishop Talbot in 1718, in 1720 was made archdeacon of Wilts, and in the same year was constituted treasurer of the church of Sarum. On Jan. 23, 1721, he was collated to the first stall in Durham Cathedral, but on Nov. 12 in the following year was removed to the twelfth prebend. He had also the mastership of Sherburne Hospital (July 5, 1723), and became associate chaplain at the palace in Durham. He was consecrated bishop of Derry, in Ireland, February, 1734 (or 1735), and died at his palace in Dublin, April 14, 1743. Of his works we have nothing except four *Sermons* (1734-36), and *The Letters of the Late Thomas Rundle to Mrs. Barba Sandys* (Oxf. 1790, 2 vols. 12mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Runner, a word that does not occur in the A. V., although "running" frequently does (usually as a rendering of רוץ, *rûts*, ῥέω). The Old Test. furnishes many illustrations of speed of foot. See FOOTMEN. We have a very curious specimen of the manners of the times, and a singular instance of Oriental or Jewish craft in Ahimaaz, who, it appears, was a professed runner—and a very swift one, too—which one would hardly have expected in the son of the high-priest. It belongs, however, to a simple state of society that bodily powers of any kind should be highly valued, and exercised by the possessor of them in the most natural way (comp. Homer's favorite epithet of "Achilles swift of foot"). Ahimaaz was probably naturally swift, and so became famous for his running (2 Sam. xviii, 27). So we are told of Asahel, Joab's brother, that "he was as light of foot as a wild roe" (ii, 18). And that quick running was not deemed inconsistent with the utmost dignity and gravity of character appears from what we read of Elijah the Tishbite, that "he girded up his loins and ran before Ahab [who was in his chariot] to the entrance of Jezreel" (1 Kings xviii, 46). The kings of Israel had running footmen to precede them when they went in their chariots (2 Sam. xv, 1; 1 Kings i, 5), and their guards were called רוצים, *runners*. It appears by 2 Chron. xxx, 6, 10, that in Hezekiah's reign there was an establishment of running messengers, who were also called רוצים. The same name is given to the Persian posts in Esth. iii, 13, 15; viii, 14, though it appears from the latter passage that in the time of Xerxes the service was performed with mules and camels. The Greek name, borrowed from the Persian, was ἀγγαροι.

Ancient Racers.

As regards Ahimaaz's craftiness, we read that when Absalom was killed by Joab and his armor-bearers, Ahimaaz was very urgent with Joab to be employed as the

messenger to run and carry the tidings to David. See Post.

In the New Test. we have frequent reference to running, in the allusions to the Grecian races (1 Cor. ix, 24; Heb. xii, 1; comp. Ps. xix, 5; Eccles. ix, 11). See GAME.

Rupert (or RUPRECHT, i. e. ROBERT), *St.*, the apostle of BAVARIA. The exact period in which this personage lived is not known, and is the subject of continued dispute, the limits being from about A.D. 580 to 700 sq. The authorities are the *Salzburg Chronicles* from the 12th to the 14th century, on the one hand; and the *Vita Primigenia*, composed about 873 (see Kleinmayr, *Nachr. vom Zustande d. Gegend u. Stadt Juvavia* [Salzb. 1784, suppl. p. 7 sq.]), the so-called *Congestum* of bishop Arno of Salzburg, the *Breves Notitie* of the time of bishop Virgil (died 784), etc., on the other. The preponderance of opinion is towards the later date, according to which Rupert entered on his work of conversion in 696, after a beginning had already been made by other agents. Concerning his life, it is related that he sprang from the royal family of the Franks, became bishop of Worms, and was invited by duke Theodo to preach the cross in his Bavarian dominions. Having consented, he was received at Ratisbon with great solemnity, and baptized the duke, many nobles, and large numbers of the common people. He was also permitted to select a place for his settlement anywhere in the country, and for this purpose traversed the land, everywhere preaching the Gospel; and after a temporary experiment elsewhere, he finally chose the spot covered by the splendid ruins of a Roman city on the Juvavum (Salzach), and there built an episcopal residence, church, and convents. This was the beginning of the town and diocese of Salzburg (about A.D. 700), which in the time of Arno, the tenth successor of Rupert, was raised into a metropolitan see. Rupert placed twelve pupils from Worms in the monastery, and assigned the nunnery to the virgin Erindrud. After further tours for preaching, the founding of other churches, and the appointing of a successor, he returned to his proper see (*propria sedes*), and there died on Easter-Sunday. So the *Vita Primigenia*, though Arnold of Vochburg lets him die at Salzburg. See Rudhard, in the *München. Gelehrte-Anzeigen*, 1887, Nos. 196-222; 1845, Nos. 80-83; *Aelteste Gesch. Bayerns* (Hamb. 1841); Rettberg, *Kirch. Gesch.* ii, 193 sq.; Kurtz, *Handb. der allgem. Kirchengesch.* II, i, 120 sq.

Rupert, abbot of DEUTZ (RUPERTUS TUITIENSIS), a contemporary of St. Bernard, and in his theological relation a mystic, was one of the most prolific among the exegetical writers of his time. Neither his country nor the exact time of his birth is known; but it is certain that he spent his early years in the Benedictine convent of St. Laurent at Liege in preparation for a monastic life. He was consecrated to the priesthood in 1101 or 1102, and began his literary career somewhat later. The earliest work from his pen, if we disregard some Latin verses but little known, is entitled *De Divinis Officiis*, in which he endeavors to explain the entire symbolism of the public worship to the common understanding. His first exegetical work was an abridgment of the *Moralia in Jobum* of Gregory the Great. These publications involved him in controversies, chief among which was that waged against the schools of William of Champeaux and Anselm of Laon. One of their adherents had advanced the idea in Rupert's convent at Liege that God willed the evil and that Adam sinned in accordance with God's will. Rupert characterized the doctrine as impious, and advocated instead the Augustinian (infralapsarian) view that God simply permits the evil. Being protected by his abbot Berengar, and after the death of that patron in 1113 by Cuno, abbot of Siegburg, and later bishop of Ratisbon, he resisted the virulent attacks of the body of

adherents belonging to those schools. He embodied his views in the treatise *De Voluntate Dei*, and when his opponents asserted that the idea of a permission of evil is destructive to the doctrine of God's omnipotence, he added the book *De Omnipotentia Dei* (about 1117), and followed up his effort by meeting William of Champeaux in a public disputation at Chalons, which ended by leaving each disputant confident of the success of his cause, and exposed Rupert to the subsequent malicious attacks of William's pupils while he lived.

The energy of Rupert's devotion to the Scriptures is apparent from the fact that it was in this period of exciting conflict that he issued the first of his independent exegetical works, a *Tractatus in Evangelium Johannis* (in 14 books). The exposition follows the text, giving the literal meaning, reconciling difficulties—which are regarded as only apparent—and frequently adding an allegorical interpretation. The authority of the fathers prevails everywhere, and all manner of dogmatical questions are woven into the exposition. A second, the largest and most original of his exegetical works—the *Commentarius de Operibus Sanctæ Trinitatis* (in 42 books)—appeared in 1117. Its purpose was to explain the entire plan of salvation from the beginning to its consummation. Its title is derived from the systematic plan by which the dispensation of each Person in the Trinity is distinguished. The work is dominated by the systematizing tendency of Middle-Age theology, and as it lacks the advantage growing out of a knowledge of the original languages of Scriptures, is obliged to present the traditional results of earlier investigations; but it luxuriates in the use of the unregulated hermeneutics of the time and in the development of mystical and anagogical meanings from the Scriptures, and thereby illustrates the qualities which distinguish Rupert as a theologian, namely, the religious fervor and enthusiasm of the mystic.

In 1119 Rupert returned to Cuno of Siegburg, and would seem to have formed an intimate relation with the archbishop Frederick of Cologne, to whom he dedicated a *Commentary on the Apocalypse* (in 12 books), which is peculiar as regarding the visions and statements of that book as relating to past experiences of the Church from the Creation to the times of the New Test., rather than as prophecies having reference to the future. His next work was a *Commentary on the Song of Solomon* (in 7 books), which expounds the book as being a prophetic celebration of the incarnation of Christ, though the execution of the plan results instead in inspired laudations of the Virgin Mother. The book is nevertheless a witness to show that the 12th century did not accept the dogma of the "immaculate conception." A *Commentary on the Twelve Minor Prophets* followed—which was interrupted by the composition of a work entitled *De Victoria Verbi Dei* (in 13 books), showing how God executes his counsels, despite the opposition of Satan, by an examination of the Bible narratives, the mystical treatment being altogether ignored—but was eventually completed.

In 1120 Rupert was chosen abbot of Deutz, and was compelled to lay aside his pen to arrange difficulties relating to the property of his convent and involving a number of actions at law (comp. Ruperti, *De Incendio Tuitiensi Liber Aureus*, cap. viii, ix). He eventually placed the management of the secular business of the convent in the hands of a committee of monks, and reserved for himself the administration of discipline and the spiritual care of his subordinates. His *Commentary on Matthew* (in 13 books), allegorical throughout, appeared not earlier than 1126. A work entitled *De Glorioso Rege David* (in 15 books) appeared at about the same time. It is based on the books of Kings, and, like all of Rupert's writings, refers everything to Christ in some form of typical relation. He also gave attention to practical subjects, and wrote *De Regula Sancti Benedicti* (in 4 books), and an *Anulus* (in 3 books), written in dialogue form and de-

signed to promote the conversion of the Jews by proving that the Messiah had appeared. This composition does not appear, however, in editions of Rupert's works, and was not discovered until after 1669, by Gerberon, who included it in his edition of Anselm's works. The book *De Glorificatione Trinitatis et Processione Spiritus Sancti* likewise aims to help the Jews to embrace Christianity. The *Liber Aureus de Incendio Tuitiensis* commemorates a fire which on the night of Sept. 1, 1128, destroyed the surroundings of Deutz, but left the convent and church unharmed. Two books *De Meditatione Mortis* give evidence that the author believed his end approaching; and with a *Commentary on Ecclesiastes*, in which he develops, more than in any other work, the literal sense alone, he brought his exegetical labors to a close. A few additional writings, lives of saints, etc., do not require special mention. Rupert died peaceably in his abbey of Deutz, March 4, 1135.

The earliest edition of Rupert's works was issued under the direction of Cochläus at Cologne (1526-28; enlarged ed. ibid. 1577, 3 vols. fol.; again enlarged, 1602, 2 vols.; once more enlarged, Mayence, 1631; the latter edition reprinted, but carelessly, Paris, 1638). Separate editions of particular works are numerous. The latest complete edition is that of Venice (1751, 4 vols. fol.). See Gerberon, *Apologia pro Ruperto Tuitensi* (Par. 1669); Mabillon, *Annales Ordinis S. Benedicti*, tom. v, vi passim; *Histoire Littéraire de la France* (ibid. 1841), xi, 422-587.

Ruperti, GEORG ALEXANDER, D.D., a Lutheran divine, was born at Bremervörde Dec. 19, 1758. Having been teacher for a number of years at Stade, he was appointed, in 1814, general superintendent of the duchies of Bremen and Verden, and died March 14, 1839. He wrote, *Symbolae ad Interpretationem Sacri Codicis* (Gött. 1782);—*Theologumena* (Hamb. 1824, 2 vols.);—*Theologische Miscellen* (ibid. 1816-19, 4 vols.);—*Des h. Abendmahls ursprüngliche Feier* (Hanover, 1821). See Fürst, *Bibl. Jud.* iii, 181; Winer, *Handbuch der theol. Literatur*, i, 13, 16, 195, 454, 868; ii, 743. (B. P.)

Rupitæ (or **Rupitāni**), a name given to the small Donatist congregation at Rome, from their being driven to shelter among the rocks for the purpose of celebrating their religious services.

Rupstein, J. G. E. FRIEDRICH, a German doctor of theology and abbot of Loccum, was born Aug. 30, 1794, at Wunsdorf. From 1813 to 1816 he studied at Göttingen, in 1820 he was made chaplain of the Neustädter Church in Hanover, in 1822 he was appointed minister of the Schlosskirche, and in 1825 assessor of consistory. In 1830 he was made court preacher and member of consistory, in 1832 abbot of Loccum, and in 1866 first member of consistory, and died Oct. 7, 1876, in Hanover. He published, *Auswahl von Predigten* (Hanover, 1832, 2 vols.);—*Dr. H. Ph. Sextro* (ibid. 1839), a biography. See Zuchold, *Bibl. Theol.* p. 1100; Winer, *Handbuch der theol. Literatur*, ii, 144, 743; Schneider, *Theologisches Jahrbuch*, 1878, p. 227. (B. P.)

Rural Dean, a designation of a class of very ancient officers of the Church, who, being parish priests, executed the bishop's processes, inspected the lives and manners of the clergy and people within their district, and reported the same to the bishop. In order that they might have knowledge of the state of their respective deaneries, they had power to convene rural chapters. Much of their authority at the present day rests on custom and precedent. Their duties and powers vary in different dioceses. See DEAN.

Rural Deanery, a certain number of parishes placed under the supervision of a rural dean.

Ruridecanal Chapter, a chapter consisting of the parish priests of a rural deanery, assembled for consultation under the presidency of a rural dean. These chapters are of considerable antiquity, and were commonly assembled in mediæval times once a year, at or about Whitsuntide. After the Reformation they were

seldom convened, and so for many generations they have practically ceased to exist. Since the Catholic revival in 1830, they have been restored in England according to ancient precedent, and in the great majority of English dioceses they are now in full working order. English Roman Catholics have likewise restored this ancient machinery, and now have their own ruridecanal chapters in several Anglo-Roman dioceses.

Rush is the rendering in the A. V. of two Heb. words, both of which are occasionally translated "bulrush" (q. v.).

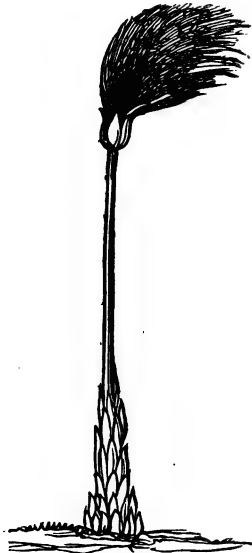

1. *Agmôn* (אֲגֻמֹן; Sept. *κρίκος*, *ἀνδραξ*, *μικρός*, *τέλος*; Vulg. *circulus*, *fervens*, *refrenans*) occurs in Job xl, 26 (A. V. xli, 2), "Canst thou put *agmôn*" (A. V. "hook") into the nose of the crocodile? again, in xl, 12 (A. V. xli, 20), "Out of his nostrils goeth smoke as out of a seething-pot or *agmôn*" (A. V. "caldron"). In Isa. ix, 14, it is said Jehovah "will cut off from Israel head and tail, branch and *agmôn*" (A. V. "rush"). The *agmôn* is mentioned also as an Egyptian plant, in a sentence similar to the last, in Isa. xix, 15 (A. V. "rush"); while from lviii, 5 (A. V. "bulrush") we learn that the *agmôn* had a pendulous panicle. The term is allied closely to the Heb. *agām* (אָגָם), which, like the corresponding Arabic *ajam*, denotes a marshy pool or reed-bed (see Jer. li, 32, for this latter signification). *Agam* is also considered to be derived from the same root as אָגַם, *gômē*, the papyrus (see No. 2 below). Some have even concluded that both names indicate the same thing, and have translated them by *juncus*, or *rush*. The expression "Canst thou put *agmôn*" into the crocodile's nose? has been variously explained. The most probable interpretation is that which supposes allusion is made to the mode of passing a reed or a rush through the gills of fish in order to carry them home; but see the commentaries and notes of Rosenmüller, Schultens, Lee, Cary, Mason Good, etc. The *agmôn* of Job xli, 20 seems to be derived from an Arabic root signifying to "be burning;" hence the *fervens* of the Vulg. Rushes were used anciently for cords (xli, 2) and for other purposes; nevertheless, they are proverbially without value. Figuratively the term is used of the least important class of people (Isa. ix, 14; xix, 15; lviii, 5; Jer. li, 32).

There is some doubt as to the specific identity of the *agmôn*, some believing that the word denotes "a rush" as well as a "reed" (see Rosenmüller [*Bibl. Bot.* p. 184] and Winer [*Realwörterb.* ii, 484]). Celsius (*Hierob.* i, 465 sq.) has argued in favor of the *Arundo phragmites* (now *Phragmites communis*). That the *agmôn* denotes some specific plant is probable from the passages where it occurs, as well as from the fact that *kanēh* (קָנֶה) is the generic term for reeds in general. Lobo, in his *Voyage d'Abyssinie*, says the Red Sea was seen to be literally red only in places where the *gomeon* was abundant. What this herb is does not elsewhere appear. Forskål applies the name of *ghobeibe* to a species of *arundo*, which he considered closely allied to *A. phragmites*. M. Bové, in his *Voyage Botanique en Égypte*, observed, especially on the borders of the Nile, quantities of *Saccharum Egyptiacum* and of *Arundo Egyptiaca*, which is, perhaps, only a variety of *A. donax*, the cultivated Spanish or Cyprus reed, or, as it is usually called in the south of Europe, Canna and Cana. In the neighborhood of Cairo he found *Poa cynosuroides* (the *kūsha*, or *cusa*, or sacred grass of the Hindūs), which, he says, serves "aux habitans pour faire des cordes, chauffer leurs fours, et cuire des briques et poteries." Le *Saccharum cylindricum* est employé aux mêmes usages." The Egyptian species of *arundo* is probably the *A. isiacu* of Delile, which is closely allied to *A. phragmites*, and its uses may be supposed to be very similar to those of the latter. This species is often raised to the rank of a genus under the name of *phragmites*, so named from being

employed for making partitions, etc. It is about six feet high, with annual stems, and is abundant about the banks of pools and rivers and in marshes. The panicle of flowers is very large, much subdivided, a little drooping and waving in the wind. The plant is used for thatching, making screens, garden fences, etc.; when split it is made into string, mats, and matches. It is the *gemeines Rohr* of the Germans, and the *Cama* or *Cana palustre* of the Italians and Spaniards. Any of the species of reed here enumerated will suit the different passages in which the word *agmón* occurs; but several species of *saccharum*, growing to a great size in moist situations and reed-like in appearance, will also fulfil all the conditions required—as affording shelter for the behemoth or hippopotamus, being convertible into ropes, forming a contrast with their hollow stems to the solidity and strength of the branches of trees, and when dry easily set on fire; and when in flower their light and feathery inflorescence may be bent down by the slightest wind that blows. See REED.

2. *Gómè* (נָזָה; Sept. *πάπιρος*, *βίβλιος*, *ἔλος*; Vulg. *scirpeus*, *scirpus*, *papyrus*, *juncus*) is found four times in the Bible. Moses was hidden in a vessel made of the papyrus (Exod. ii, 3; A. V. "bulrushes"). Transit boats were made out of the same material by the Ethiopians (Isa. xviii, 2; A. V. "bulrushes"). The *gómè* (A. V. "rush") is mentioned together with *kanéh*, the usual generic term for "a reed," in Isa. xxxv, 7, and in Job viii, 11, where it is asked, "Can the *gómè* (A. V. "rush") grow without mire?" The name *gómè*, according to Celsius (*Hierob.* ii, 138), is derived from נָזַה, "absorbere, bibere, quia in aqua nascitur, et aquam semper imbibit" (comp. Lucan, *Phars.* iv, 136). Though other plants are adduced by translators and commentators as the *gómè* of Scripture, yet it is evident that only the papyrus can be meant, and that it is well suited to all the passages. Being in some respects so obvious, it could not escape the notice of all translators. Hence, in the Arabic version and in the *Annals* of Eutychius, the word *burdí*, the modern Arab name of the papyrus, is given as the synonym of *gómè* in Exod. ii, 3. In Arabic authors on materia medica we find the papyrus mentioned under the three heads of *Fafir*, *Burdí*, and *Chartas*. *Fafir* is said to be the Egyptian name of a kind of *burdí* (bur-reed) of which paper (*charta*) is made; and of *burdí*, the word *fafururs* (evidently a corruption of *papyrus*) is given as the Greek synonym. See PAPER-REED.

(1.) The papyrus is now well known; it belongs to the tribe of *sedges*, or *Cyperaceæ*, and is not a rush or bulrush, as in the A. V. It may be seen growing to the height of six or eight feet, even in tubs in the hot-houses of England, and is described by the ancients as growing in the shallow parts of the Nile. The root is fleshy, thick, and spreading; the stems triangular, eight or ten feet in height, of which two or so are usually under water, thick below, but tapering towards the apex, and destitute of leaves. The base leaves are broad, straight, and sword-shaped, but much shorter than the stem. This last is terminated by an involucl of about eight leaves, sword-shaped and acute, much shorter than the many-rayed umbel which

Cyperus papyrus.

they support. The secondary umbels are composed of only three or four short rays, with an involucl of three awl-shaped leaflets. The flowers are in a short spike at the extremity of each ray. Cassiodorus, as quoted by Carpenter, graphically described it as it appears on the banks of the Nile: "There rises to the view this forest without branches, this thicket without leaves, this harvest of the waters, this ornament of the marshes." It is found in stagnant pools as well as in running streams, in which latter case, according to Bruce, one of its angles is always opposed to the current of the stream.

The papyrus was well known to the ancients as a plant of the waters of Egypt: "Papyrus nascitur in palustribus Ægypti, aut quiescentibus Nili aquis, ubi evagatæ stagnant" (Pliny, xiii, 11). Theophrastus, at a much earlier period, described it as growing not in the deep parts, but where the water was of the depth of two cubits or even less. It was found in almost every part of Egypt inundated by the Nile, in the Delta—especially in the Sebennytic nome—and in the neighborhood of Memphis, etc. By some it was thought peculiar to Egypt; hence the Nile is called by Ovid "amnis papyrifer." So a modern author, Prosper Alpinus (*De Plant. Ægypti*, c. 36): "Papyrus, quam *berd* Ægyptii nominant, est planta fluminis Nili." By others it was thought to be a native, also, of India, of the Euphrates near Babylon, of Syria, and of Sicily. The genus *cyperus*, indeed, to which it is usually referred, abounds in a great variety of large aquatic species, which it is difficult for the generality of observers to distinguish from one another; but there is no reason why it should not grow in the waters of hot countries, as, for instance, near Babylon or in India. In fact, modern botanists having divided the genus *cyperus* into several genera, one of them is called *papyrus* and the original species *P. Nilotica*. Of this genus papyrus there are several species in the waters of India (Wight, *Contributions to the Botany of India*, "Cyperaceæ," p. 88).

The papyrus reed is not now found in Egypt; it grows, however, in Syria. Dr. Hooker saw it on the banks of Lake Tiberias, a few miles north of the town. It appears to have existed there from the earliest times. Theophrastus (*Hist. Plant.* iv, 8, § 4) says, "The papyrus grows also in Syria around the lake in which the sweet-scented reed is found from which Antigonus used to make cordage for his ships." This plant has been found also in a small stream two miles north of Jaffa. Dr. Hooker believes it is common in some parts of Syria. It does not occur anywhere else in Asia. It was seen by lady Callcott on the banks of the Anapus, near Syracuse, and Sir Joseph Banks possessed paper made of papyrus from the lake of Thrasymene (*Script. Herb.* p. 379).

(2.) A brief description of the uses of this plant, as given in the works of the ancients, is thus summed up by Parkinson in his *Herbal*, p. 1207: "The plant, say the ancients, is sweete, and used by the Egyptians, before that bread of corne was known unto them, for their food, and in their time was chewed and the sweetnesse sucked forth, the rest being spit out; the roote serveth them not only for fewell to burne, but to make many sorts of vessels to use, for it yielded much matter for the purpose. *Papyrus ipse* (say they), that is the stalke, is profitable to many uses, as to make ships, and of the barke to weave, and make sailes, mats, carpets, some kinds of garments, and ropes also."

a. The lower part of the papyrus reed was used as food by the ancient Egyptians; "those who wish to eat the byblus dressed in the most delicate way stew it in a hot pan and then eat it" (Herod. ii, 92; see also Theophr. *Hist. Plant.* iv, 9). The statement of Theophrastus with regard to the sweetnesse and flavor of the sap has been confirmed by some writers. The chevalier Landolina made papyrus from the pith of the plant, which, says Heeren (*Hist. Res. Afric. Nat.* ii, 350, note), "is rather clearer than the Egyptian;" but other writers say the stem is neither juicy nor agreeable.

b. The construction of papyrus boats is mentioned by Theophrastus. So Pliny (*Hist. Nat.* vi, 24): "Papyraeis navibus armamentisque Nili;" and again (vii, 56): "Naves primum repertas in Ægypto in Nilo ex papyro." Plutarch, as quoted by Rosenmüller, says, "Isis circumnavigated the marshes in a papyrus wherry for the purpose of collecting the pieces of Osiris's body. From Heliodorus's account it appears that the Ethiopians made use of similar boats, for he relates that the Ethiopians passed in reed wherries over the Astaboras; and he adds that these reed wherries were swift-sailing, being made of a light material, and not capable of carrying more than two or three men." Bruce relates that a similar kind of boat was made in Abyssinia even in his time, having a keel of acacia wood, to which the papyrus plants, first sewed together, are fastened, being gathered up before and behind, and the ends of the plants thus tied together. Representations of some Egyptian boats are given in Kitto's *Pictorial Bible* (ii, 135), where the editor remarks that when a boat is described as being of reeds or rushes or papyrus, as in Egypt, a covering of skin or bitumen is to be understood. Ludolf (*Hist. Æthiop.* i, 8) speaks of the Tzamic lake being navigated "monoxylis lintribus ex typha præcrassa confertis," a kind of sailing, he says, which is attended with considerable danger to the navigators. Wilkinson (*Anc. Ægypt.* ii, 96, ed. 1854) says that the right of growing and selling the papyrus plants belonged to the government, who made a profit by its monopoly, and thinks other species of the *Cyperaceæ* must be understood as affording all the various articles—such as baskets, canoes, sails, sandals, etc., which have been said to have been made from the real papyrus. Considering that Egypt abounds in *Cyperaceæ*, many kinds of which might have served for forming canoes, etc., it is improbable that the papyrus alone should have been used for such a purpose; but that the true papyrus was used for boats there can be no doubt, if the testimony of Theophrastus (*Hist. Plant.* iv, 8, 4), Pliny (*Hist. Nat.* xiii, 11), Plutarch, and other ancient writers is to be believed.

c. From the soft cellular portion of the stem the ancient material called papyrus was made. "Papyri," says Sir G. Wilkinson, "are of the most remote Pharaonic periods. The mode of making them was as follows: the interior of the stalks of the plant, after the rind had been removed, was cut into thin slices in the direction of their length; and these being laid on a flat board in succession, similar slices were placed over them at right angles; and their surfaces being cemented together by a sort of glue and subjected to a proper degree of pressure and well dried, the papyrus was completed. The length of the slices depended, of course, on the breadth of the intended sheet, as that of the sheet on the number of slices placed in succession beside each other, so that though the breadth was limited, the papyrus might be extended to an indefinite length." See WRITING.

Rush, BENJAMIN, M.D., LL.D., a distinguished American physician, was born near Bristol, in the vicinity of Philadelphia, Jan. 5, 1745. At nine years of age he was placed under the tuition of Dr. Samuel Finley, who was subsequently president of Princeton College. By him he was prepared for college, and entered the above-named institution under the presidency of Dr. Davies, and graduated in 1760. The following six years he devoted to the study of medicine under the preceptorship of Dr. John Rodman, of Philadelphia. To perfect himself in the science of medicine, he went to Europe, and attended medical lectures at the University of Edinburgh for two years, and afterwards spent some time in the London hospitals. In 1769 he returned to Philadelphia, with qualifications seldom surpassed, to enter upon the practice of his profession, and was not long in obtaining an extensive and lucrative practice. He was appointed professor of chemistry in the University of Pennsylvania in 1789, and in 1791 professor of the theory and practice of medicine, and subsequently

of the institutes of medicine and clinics, which he held during life. He was elected member of Congress in 1776, and signed the Declaration of Independence. He was appointed surgeon-general of the Middle Department of the army, and also physician-general. He resigned this post in 1778; and, after serving as delegate to the state convention which ratified the Constitution of the United States, he retired from political life and resumed the practice of his profession. His writings are mostly on medical subjects, and were published in five volumes. That on mental diseases, published in 1812, is especially valuable as to its bearing on medical jurisprudence. He was an enlightened and practical Christian, abounding in every good word and work. Dr. Rush died April 18, 1813. He published numerous pamphlets on moral, scientific, and social topics, for which and other literature, see Allibone, *Dict. of Brit. and Amer. Authors*, s. v. (W. P. S.)

Rushton. See RISHTON.

Rusk, James, a minister of the Methodist Episcopal Church, was born in Ireland of Scottish parents, and emigrated to America when twenty-one. He was licensed to exhort at Pleasantville, N. Y., became a teacher in Irving Institute at Tarrytown, and was by the Quarterly Conference of that place licensed to preach. He was admitted on trial in the New York Conference in 1851, and received a supernumerary relation at the Conference of 1857. He took up his residence at Cold Spring, where he died, April 4, 1859. See *Minutes of Annual Conferences*, 1859.

Rusk, John Y., a minister of the Methodist Episcopal Church, was born in Perry County, O., Jan. 10, 1842. He was educated at the Ohio Wesleyan University, graduating June 28, 1866; was licensed to preach by the Uniontown Quarterly Conference, Sept. 15; and was admitted on trial into the Ohio Annual Conference, Sept. 27. He was ordained deacon by bishop Morris in 1868, and was appointed to New Holland, where he died, Sept. 25, 1869. See *Minutes of Annual Conferences*, 1869, p. 229.

Rusling, Joseph, a minister of the Methodist Episcopal Church, was born near Epworth, Lincolnshire, England, May 12, 1788. He came to this country when about seven years of age, and settled in New Jersey. He joined the Church in 1808, commenced preaching in 1812, and in 1814 was admitted on trial in the Philadelphia Conference, of which he remained an active member until his death, July 6, 1839. Mr. Rusling established the first Methodist book-store in Philadelphia. He published a few *Sermons*, and *Hymns for Sunday-schools*. See Sprague, *Annals of the Amer. Pulpit*, vii, 551; Simpson, *Cyclop. of Methodism*, s. v.

Rusling, Sedgwick, a minister of the Methodist Episcopal Church, was born near Hackettstown, N. J., April 24, 1799. He became an exhorter in 1826, and was licensed to preach in November of that year. In 1827 he was admitted on trial into the Philadelphia Conference. He labored actively until 1850, when he became supernumerary because of ill-health. In 1852 he resumed regular work, but in 1855 became supernumerary again, filling, however, a vacancy in Elizabeth City. He died in Lawrenceville, Tioga Co., Pa., March 7, 1876. See *Minutes of Annual Conferences*, 1876, p. 47.

Rusor, in Roman mythology, was an appellative of Pluto, "the god to whom everything returns."

Russalki, in Slavonic mythology, were nymphs of supernatural beauty, who resided in brooks, rivers, and seas. They oftentimes bathed in some sparkling fountain, sported on the grass of some sunny meadow, swung to and fro on the waving trees, or combed their long green hair, and might then be overheard; but woe to him who should so observe them, for they rarely gave their love to any favored swain, and he who had once seen them could afterwards discover no attractive features in a woman of earthly mould.

Russel, James, a distinguished minister of the Methodist Episcopal Church, was born in Mecklenburg County, N. C., about 1786. He was admitted on trial in the South Carolina Conference in 1805, but located, on account of ill-health, in 1815, and died Jan. 16, 1825. Mr. Russel had great power in the pulpit. See Sprague, *Annals of the Amer. Pulpit*, vii, 408.

Russel, John, D.D., an English clergyman, was educated at the Charter House, and thence was elected student of Christ Church, Oxford, graduating in 1806. He was ordained in 1810, was head-master of the Charter House from 1811 to 1832, and canon of Canterbury in 1827. He became rector of St. Botolph's, Bishopsgate, in 1832, and secretary of the Clergy Orphan Corporation in 1849. His death occurred in 1863. He published, *Rudiments of Latin:—English Grammar* (Lond. 1832, 18mo), which has run through eleven editions:—*The Spital Pulpit* (1833, 4to):—*Concio ad Clerum* (1833):—besides *Sermons*, etc.

Russel, Michael, a Scottish prelate, was born at Edinburgh in 1781, and graduated from the University of Glasgow in 1806. He became minister at Alloa in 1808, and of St. James's Chapel, Leith, in 1809, in which charge he continued during life. He was made dean of Edinburgh in 1831, bishop of Glasgow and Galloway in 1837, and died in 1848. Russel wrote, *View of Education in Scotland* (1813, 8vo):—*Connection of Sacred and Profane History*, etc. (Lond. 3 vols, 8vo—vols. i and ii, 1827; vol. iii, 1837):—*Discourses on the Millennium* (1830, 12mo):—*History of the Church in Scotland* (Lond. 1834, 2 vols. sm. 8vo):—besides several other histories. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Russell, Alexander, physician to the English factory at Aleppo, was born and educated at Edinburgh. After a residence of many years in the East, during which he made himself familiar with the Turkish language, and gained great celebrity by his practice, he returned to Europe, and published his *Natural History of Aleppo*, a valuable performance, which has been translated into various languages. In 1759 he was elected physician of St. Thomas's Hospital, which position he retained until his death, in 1770.

Russell, Moses, a Presbyterian minister, was born in Greene County, near Xenia, O., Feb. 29, 1812. He was early operated upon by the influences of the Holy Spirit; he felt his call to the ministry, and God opened up a way for him to follow the desire of his heart. In 1833 he completed his preparatory studies, and in 1837 graduated from Miami University. He pursued a part of his theological studies under the direction of the Rev. John S. Galloway, of Springfield, O., and finished the course at Hanover and Allegheny seminaries. In 1840 he was licensed to preach, and in November of the same year was ordained and installed pastor of the Clifton Presbyterian Church, where he continued to labor until the day of his death, March 22, 1864. During this pastorate of almost a quarter of a century the Church increased greatly in numbers and strength, and erected a large and commodious church edifice. Mr. Russell was an active, faithful minister of the Gospel. His preaching was doctrinal and practical. His sermons were rigidly systematic, formed after a Scripture model. During his life he preached over 3000 times, and has left over 1000 written sermons. See Wilson, *Presb. Hist. Almanac*, 1865, p. 116. (J. L. S.)

Russell, Robert D., a Presbyterian minister, was born in Guilford County, N. C., March 23, 1793. He was educated at the academy at Greensborough, and the University of North Carolina, at Chapel Hill; studied divinity in the Union Theological Seminary at Prince Edward, Va., and was licensed by Orange Presbytery in 1829. In 1832 he labored for Goshen and Olney churches, in Lincoln County, N. C.: in 1834 in Tuscumbia and Russellville, Ala.; and in 1837 he removed to Nanapolis, and was ordained in that year by the South Alabama Presbytery. He was agent for the American Bible So-

ciety, and preached at Geneva, Tompkinsville, London, and Shell Creek, and at Nanapolis, near which place he died, April 16, 1867. See Wilson, *Presb. Hist. Almanac*, 1868, p. 368. (J. L. S.)

Russell, Robert Young, a Presbyterian minister, was born in Antrim County, Ireland, April 18, 1800. In 1801 his parents emigrated to the United States, and settled in York District, S. C. After acquiring a good English education, he commenced the study of the languages under Dr. Samuel Wright, of Turkey Creek; subsequently taught school in order to obtain pecuniary means; and in 1820 entered Salem Academy, in Union District, and thence went to Yorkville, where he completed his academic course under the care of Rev. Robert M. Davis. During this period he had, from honest and earnest convictions of truth and duty, connected himself with the Independent Presbyterian Church; and in view of the apparent necessities of this Church, then in its infancy, he was induced to forego his cherished design of completing his studies, and in 1824 he commenced the study of divinity under Rev. R. M. Davis. He was licensed by Yorkville Presbytery of the Independent Presbyterian Church, Jan. 24, 1825, and ordained by the same presbytery, April 22, 1826. He removed to Mount Tabor, in Union District, where he taught school for a time, and where he organized a Church to which he preached for many years. Thence he removed to the bounds of Bullock Creek Church, and became pastor of that Church in May, 1829, which relation continued for thirty-seven years. He died Nov. 5, 1866. Mr. Russell was a man of untiring zeal and impressive power as a minister of the Gospel. He had the most remarkable success all through his ministry. For thirty years prior to the union of the Independent Presbyterian Church with the Presbyterian Church, he was the acknowledged and honored leader in that branch of the Church in which he had cast his lot. He loved this Church and her peculiar doctrines, and yet in every endeavor which was made to heal the breach he gave his hearty approval and earnest aid. See Wilson, *Presb. Hist. Almanac*, 1867, p. 450. (J. L. S.)

Russia, one of the largest empires of the world, containing in 1881 an area of 8,500,000 square miles, and a population of 103,716,232 souls, has under its rule about one sixth of the entire surface of the earth, and still continues to expand in Asia. It is in point of territory about equalled by the British empire, but is more than twice as large as any other country. Among the Christian nations it is the foremost standard-bearer of the interests of the Greek Church, being not only the only large state in which this Church prevails, but containing within its borders fully seventy-seven per cent. of the aggregate population connected with it. More than any Catholic or Protestant state, the government of Russia uses its political influence for advancing the power of its official Church at home as well as abroad; and has recently not only co-operated in the re-establishment of a number of independent co-religious states in the Balkan peninsula, but is rapidly planting the creed of the Greek Church among the subjected tribes of Asia, and also, to some extent, in the adjacent countries. The Russian empire, by its vast conquests in Europe and Asia, embraces a variety of religions, even the Mohammedan and heathen. The relation of the state to other forms of religion is determined by Article 40 et seq. of the first volume of the Russian law, as follows: "The ruling faith in the Russian empire is the Christian Orthodox Eastern Catholic declaration of belief. Religious liberty is not only assured to Christians of other denominations, but also to Jews, Mohammedans, and pagans, so that all people living in Russia may worship God according to the laws and faith of their ancestors." This law, however, is interpreted in such a manner as to mean that religious liberty is assured only so long as a member of an orthodox Church adheres to the faith in which he was

born; but all unorthodox churches are forbidden to receive as members proselytes from other churches. A severe penalty is imposed upon any one who leaves a Christian for a non-Christian religion.

I. The Russian Church.—1. Its Origin and Progress.—The Russian empire begins with the elevation in 862 of the Norman Ruric to the throne. At that time, the territory inhabited by the Russians was without Christian churches. A Russian tradition, according to which the apostle Andrew had planted the first cross at Kief, cannot be authenticated. Tertullian, Origen, and Chrysostom speak of the triumphs of Christianity among the Scythians and Sarmatians, and a doubtful inference has been drawn from their words that Christianity had also made converts among the Russians at this early period. If really any congregations were organized, they perished during the migration of nations. It is reported that in the 9th century patriarch Ignatius of Constantinople sent again missionaries to the Russians, and patriarch Photius praised them for their enthusiastic desire for the Gospel—a praise which was not verified by subsequent events. In 955, Olga, the widow of Igor (912-945) and regent of Russia during the minority of her son Svatoslav, procured baptism for herself in Constantinople from the patriarch Theophylact, and had her name changed to Helena; but even to the close of her life she could enjoy the services of a Christian priest only in secret. Her pious desire to see her son converted was not fulfilled; but her grandson Vladimir I (980-1014), called *Isapostolos* (apostle-like), not only embraced Christianity himself (988), but at once decided the triumph of Christianity in the empire. After investigating the conflicting claims of Mohammedanism, Judaism, and Christianity, as represented by missionaries of these various creeds, he was won over by the enthusiastic accounts which his ambassadors to Constantinople made of the splendor of the Eastern service in the Church of Sophia. The people cried when the images of Peroun and other gods were cast into the Dnieper, but without active resistance yielded to the demand of Vladimir that the people be baptized. His son Yaroslav (1019-54) nearly completed the conversion of the Russians who remained in close connection with the see of Constantinople. A metropolitan see was established at Kief, which was called a second Constantinople. The fifth metropolitan, Hilarion (1051-72), was elected by order of grand-duke Yaroslav at the Council of Kief without the co-operation of the patriarch of Constantinople. A cave-convent (*Peczera*) at Kief became in the 11th century a famous seminary of the Russian clergy and a flourishing seat of Russian literature. Here the monk Nestor (1056-1111) wrote his *Annals*, the chief source of information for the earliest history of the Russian Church. The rapid growth of the Church, and the great practical strength, which it displayed so soon after its establishment, naturally attract the attention of the Church historians, who attribute it chiefly to the fact that the Church, at its foundation, found the translation of the Bible by Cyril and Methodius into the national Slavonic language ready for use. The practical strength displayed by the Russian Church at so early a period is the more surprising, as Russia alone among the European nations (unless Spain and Hungary be counted exceptions) was Christianized without the agency of missionaries, and chiefly by the direct example, influence, or command of its prince. The Russian Church has dignified its founder, prince Vladimir, with the name of saint, and the same honor has been conferred upon another prince of the 13th century, Alexander Nevski, so called from a victory on the banks of the Neva, in which he repulsed the Swedes. Besides these two saints, two other princes are held in high veneration—the one, Yaroslav (1017), for introducing the Byzantine canon law and the first beginnings of Christian education; the other, Vladimir II, surnamed Monomachos, for being a model of a just and religious ruler. Ivan I transferred (1325) his resi-

dence, and with it the primacy of the Russian Church, from Kief to Moscow. Gradually the metropolitans of the Russian Church became independent of Constantinople. In the middle of the 17th century, Jonah was appointed by the grand-prince metropolitan of Moscow, and recognised by a synod of all the Russian bishops held at Moscow as metropolitan of Russia. He was the first in whose appointment "the great Church" had no direct share. The metropolitan of Moscow remained, however, in close and friendly relations with the patriarchs of the Byzantine empire, and conjointly with them the metropolitan Isidor attended the Union Council of Florence. The fall of Constantinople in 1453 smoothed the way for an entire independence of the Russian Church, which, however, was not fully established until 1587. In that year, the patriarch Jeremiah of Constantinople, while visiting Russia to obtain support, consented to turn the metropolitan of Moscow into a patriarch in the person of Job, the patriarchate of Russia thus taking, in the opinion of the Eastern bishops, the place of the schismatic patriarch of Rome. It was further arranged that the Church of Russia be governed by four metropolitans, six archbishops, and eight bishops. Soon after, the patriarchs of Alexandria and Jerusalem, sixty-five metropolitans and eleven archbishops of the Byzantine Church, declared their concurrence in the independent organization of the Russian Church. The Muscovite patriarchs continued, however, to apply to Constantinople for confirmation until 1657. Soon after, in 1660, the Russian ambassador received from patriarch Dionysius II of Constantinople and the other Greek patriarchs the documentary declaration that the Russian patriarch might in future be elected by his own clergy without needing a confirmation by the Greek patriarchs. The Roman popes of the 16th century, especially Leo X, Clement VII, and Gregory XIII, made renewed efforts for gaining over the Russian Church to a union with Rome. When Ivan Vasilivitch (1533-84) had been defeated by the Poles, he intimated a readiness (1581) to unite with the Roman Catholic Church as long as he needed the help of the emperor and the mediation of the pope. Gregory XIII sent the Jesuit Possevino to the grand-prince, who held a religious disputation with the Russians, in which the grand-prince himself took part. Possevino was, in the end, unsuccessful in Russia; but in those Russian provinces which fell with Lithuania into the hands of the Poles, his efforts had the desired effect. The metropolitan Ragoza of Kief, keenly offended by the patriarchs Jeremiah and Job, convoked the bishops of his metropolitan district to a synod held at Brzesc (1593), where the union with Rome was effected in conformity with the agreement which had been formed in Florence, with a great respect at first for old ancestral usages. Clement VIII announced the union to the Catholic world in his bull *Magnus Dominus ac laudabilis*, and confirmed the metropolitan in the possession of his traditional rights of jurisdiction (1596), including the right of confirming the bishops of his metropolitan diocese; only the metropolitan himself was to apply to the papal nuncio in Poland for confirmation. For that part of the Russian Church which refused to enter into the union with Rome, Peter Mogila was in 1633 elected orthodox metropolitan of Kief, with the approbation of king Vladoslav IV. As a bar against the further advance of Roman Catholic and Protestant views, Mogila composed (1642) a catechism, which was confirmed by all the patriarchs as an official confession of the orthodox Eastern Church.

Important innovations in the liturgy of the Russian Church were made by patriarch Nikon, who has been called by a modern Church historian (Stanley, *History of the Eastern Church*) "the greatest character in the annals of the Russian hierarchy," "a Russian Chrysostom," and also "in coarse and homely proportions a Russian Luther and a Russian Wolsey." The most important among the changes introduced by him was the

revival of preaching, entirely without an example in the other Eastern churches at that time. Among the innovations which he made in the Russian ritual, in order to make it more conform to that of Constantinople, were benedictions with three fingers instead of two, a white altar-cloth instead of an embroidered one, the kissing of pictures to take place only twice a year, a change in the way of signing the cross, and in the inflections in pronouncing the Creed. Many regarded these changes as an apostasy from orthodoxy, and refused to adopt them, but at that time their protests were put down with an iron hand. The man whose energy introduced a new period in Church history was finally himself deposed from his office. His severity had exasperated the clergy, his insolence had enraged the nobles. In 1667 a council of the Eastern patriarchs, convened at Moscow, and presided over by the czar, formally deprived him of his office.

A still greater change was introduced into the Russian Church by Peter the Great. The aim of his life was to civilize the Russian empire and to raise it to a level with the remainder of Europe. While travelling in Europe, he studied the Protestant and Roman Catholic systems of belief. He heard the doctrines and studied the religious belief of all the countries which he passed, but he concluded to remain a prince of the Orthodox faith. He believed, however, he would be guilty of ingratitude to the Most High if, "after having reformed by his gracious assistance the civil and military order, he were to neglect the spiritual," and "if the Impartial Judge should require of him an account of the vast trust which had been reposed in him, he should not be able to give an account." Among the practical reforms which he introduced were the increase of schools, restrictions on the growth of monasteries, and regulations respecting the monastic property. But by far the most radical change was the abolition of the patriarchate and the substitution for it of a permanent synod, consisting of prelates presided over by the emperor or his secretary. After the death of the eleventh patriarch, Hadrian (1702), whose retrograde policy had greatly exasperated him, Peter allowed his see to remain vacant, and transferred the administration of the patriarchate to the metropolitan of Riazan, who as exarch had not the full authority of the patriarch, and was not allowed to exercise all his functions. This semblance of a patriarchal government lasted for twenty years, and during this time various changes were gradually carried through. Taxes were levied on the possessions of cloisters and bishops, the titles and dignities of several episcopal sees which were offensive to the czar were abolished, and the episcopal jurisdiction, which in former times had been wholly unhindered, was now in many respects restricted. A number of reformatory regulations were issued for the government of the religious orders. For the reform of the secular clergy Peter wrote with his own hand twenty-six articles of *Spiritual Regulations*, and for the use of the bishops he issued a pastoral instruction. After having accustomed in this way the clergy and the people to an absolute submission to his all-powerful authority, Peter declared in an assembly of bishops, held in 1720 at Moscow, that a patriarch was neither necessary for the government of the Church nor useful for the State, and that he was determined to introduce another form of Church government which would be intermediate between the government by one person (the patriarch) and a general council, since both forms of Church government were subject in Russia to great inconveniences and difficulties on account of the vast extent of the empire. When some of the bishops objected that the patriarchate of Kiev and of all Russia had been erected with the consent of the Oriental patriarchs, Peter exclaimed, "I am your patriarch!" then, throwing down his hunting-knife on the table, "There is your patriarch!" The plan of Peter was vigorously supported by Theophanes, archbishop of Pskov, and Demetrius of Rostoff, adopted by the

episcopal synod, and sanctioned by the whole body of Eastern patriarchs. In the next year (1721), the Holy Governing Synod of Russia was instituted, and solemnly opened by an address of its vice-president, archbishop Theophanes. Even those who blame Peter for subjecting a Church formerly enjoying the fullest amount of self-government to the rule of the State readily admit that its first members were the best men of the Russian Church, and generally esteemed on account of their character and ability. While the abolition of the patriarchate and the establishment of the Holy Synod fixed the position of the Russian Church among the large national divisions of Christianity, other measures led to the separation from it of a large number of ultra-conservatives, who could not bear the idea of seeing the smallest change in the holy faith of their forefathers. Peter resolutely continued the work of patriarch Nikon, and as the latter had introduced many innovations from Constantinople, Peter introduced new customs from the West. Thus, on the opening of the 18th century the emperor decreed that henceforth the year should no longer begin on the 1st of September and be dated from the creation of the world, but that the Christian era should be adopted and the new year begin on the 1st of January. Still more irritating for the uncompromising opponents of ecclesiastical reforms was Peter's endeavor to assimilate his countrymen to the West by forbidding the use of the beard. The Eastern Church had shown a strong attachment to the beard. Michael Cæsararius had laid it down in the 11th century as one of the primary differences between the Greek and the Latin Church, and "to shave the beard had been pronounced by the Council of Moscow in the 17th century as a sin which even the blood of the martyrs could not expiate." So determined was the opposition which was made to this innovation that even Peter, with all his energy, quailed before it. The nobles and the gentry, after a vain struggle, had to give way and be shaved; but the clergy were too strong for the czar, and the magnificent beards which the Russian priests are known to wear to the present day are the expressive proof of the ecclesiastical victory they gained in this particular over the reforming czar. The implacable enemies to the reforms of Nikon and Peter sullenly withdrew from the communion of the Established Church, and under the name "Raskolniks" (Separatists), or, as they call themselves, "Starover'tzi" (Old Believers), have continued separate ecclesiastical organizations to the present day.

The reigns of most of the successors of Peter during the 18th century have left no marked influence upon the progress of the Russian Church. None of them continued the work of political reform with such energy as Catharine II. She was a friend of Voltaire, but did not deem it expedient to open to the deistic tendencies of Western Europe a road to the National Church of her dominions. During her reign, Ambrose, the learned archbishop of Moscow, came to a violent death (1771) by the populace of that city because he had ordered the removal of a miraculous picture to which the people flocked in immense numbers at a time of frightful pestilence. See AMBROSE. "I send you the incident," wrote the empress Catharine in one of her letters to Voltaire, "that you may record it among your instances of the effects of fanaticism." One of his successors to the see of Moscow, Plato, has attained outside of Russia a greater celebrity than any other Russian bishop. He was the favorite both of the civilized Catharine II and for a time of her savage son, Paul, and in the last years of his life was the trusted comforter of Alexander I in the terrible year of the French invasion. Alexander I made noble efforts to raise the educational standard of the Russian people, and thus contributed much to the improvement of the National Church. Schools were established on all the lands belonging to the crown, improvements made in the theological seminaries, and the respect of the people for the priestly character strength-

ened by exempting the priests from the knout. For a time, Alexander showed himself very favorable to the principles of evangelical Protestantism; and when the British and Foreign Bible Society was formed in London, Alexander requested the society to establish a branch in St. Petersburg. In the labors of the Russian Bible Society he took a warm interest. At his request, the Holy Synod prepared a translation of the New Test. into Russian, and into almost all the other languages spoken in the Russian empire. The emperor's inclination towards Biblical theology and experimental religion was greatly strengthened by the influence which in 1814 the pious and enthusiastic baroness von Krüdener gained over him; but in the latter years of his life the emperor yielded to the growing ecclesiastical opposition to the Bible Society, and it was finally abolished under Nicholas I in 1826. In the same year, Philaret, formerly bishop of Reval and archbishop of Iver, was appointed archbishop of Moscow. He has been called the most gifted and influential archbishop of Russia since Nikon. He revived in the Church the spirit of austere asceticism, inflamed the religious enthusiasm of the people in the wars against the Mohammedan Turks and the Catholic Poles, vigorously aided the emperor in preparing the abolition of Russian serfdom, and made valuable contributions to the theological literature of the Russian Church. During the reign of Alexander I, the Russian Church began to make earnest efforts for the conversion of the Mohammedan and pagan subjects of the vast empire, and inducements were held out to those who might become converts to Christianity. The missionary zeal thus awakened was greatly strengthened during the reign of Nicholas I (1825-55), when schemes were formed and extensively supported for the consolidation of all the tribes of the vast empire into one language and one religion. The Armenian Church, which, in consequence of the conquest of a part of the Persian territory by Russia, saw the seat of its ecclesiastical head, the catholicoi of Etchmiadzin, placed under Russian rule, showed itself disinclined to being incorporated with the Russian Church; but the United Greeks of the formerly Polish provinces, who during Polish rule had been induced to recognise the supremacy of the pope, yielded to the influences brought to bear upon them by the Russian government. These exertions were begun as soon as Catharine II had acquired the possession of the Polish provinces, and it has been calculated that during the reign of this empress about seven millions of United Greeks joined the Russian Church. Little was done for this purpose during the reigns of Paul and Alexander I, but Nicholas I resumed these efforts with extraordinary vigor; and in 1839 the bishops and clergy of the United Greek Church of Lithuania and White Russia were induced at the Synod of Polotsk to declare in favor of a union with the Russian Church. Only one United Greek diocese—Chelm, in Poland—remained in communion with Rome until about 1877, when the majority of its priests and people were reported to have likewise been received into the Russian Church. See ROMAN CATHOLIC CHURCH.

The missions among the pagan tribes of the empire made considerable progress, and especially Innocent, archbishop of Kamtschatka, became a much-praised example of the revived missionary spirit in the Russian empire, traversing to and fro the long chain of pagan islands between North-eastern Asia and North-western America. The reign of Alexander II (since 1855) has been prolific of important reforms in the civil administration of the empire. Some of them, as the total abolition of serfdom, and the organization of a system of public schools, have had a considerable and favorable reaction upon the progress of the national Church. The efforts for Russifying the polyglot and polyreligious tribes of the empire in one tongue and one creed gained in vigor and extent. The great Eastern war of 1877 was proclaimed by the Russian bishops as a holy religious war for the overthrow of the Mohammedan

power over the Orthodox Eastern churches in the Turkish empire, and made the Russian Church appear to a greater extent than ever before as the standard-bearer of all the interests of the Oriental Eastern Church. The increasing missionary zeal of the Church overstepped the boundaries of the empire and founded missions in China and Japan which were prosperous beyond expectation. In many large cities of Western Europe and of the United States, Russian priests were appointed by the Russian government to gather not only the Orthodox Russians, but all persons belonging to the Eastern Oriental Church, into permanent congregations, and in 1879 even a bishop, with his residence in San Francisco, was appointed to exercise the episcopal superintendence over the congregations on the Pacific coast of North America. A strong desire for establishing friendly intercourse and relations with other churches of episcopal constitution made itself felt among many of the most educated and zealous priests and laymen of the Church, and "societies for religious enlightenment" were formed at St. Petersburg and in other cities which proclaimed the promotion of this intercourse as one of their chief objects. The grand-duke Constantine, brother of Alexander II, is an enthusiastic patron of this movement and the president of the St. Petersburg society.

2. *Doctrinal Basis of the Russian Church.*—Although the connection between the Russian Church and the other sections of the Orthodox Eastern Church has for some time been severed, they have remained in entire union with regard to their common doctrine. Some (Schaff, *Creeds of Christendom*, i, 70) regard as "the most hopeful feature of the Russian Church the comparatively free circulation of the Scriptures, which are more highly esteemed and more widely read there than in other parts of the Eastern Church." Hepworth Dixon (*Free Russia*, p. 290) says that the Russians, next to the Scotch and the New-Englanders, are the greatest Bible-readers, but it must be remarked that not more than one out of ten Russians can read at all. Dr. Pinkerton, an English Independent, who for many years resided and travelled in Russia as agent of the British and Foreign Bible Society, takes, in his work on *Russia* (London, 1833), a hopeful view of the future of the Russian Church, "for the Church that permits every one of its members to read the Scriptures in a language which he understands, and acknowledges this Word as the highest tribunal in matters of faith on earth, is possessed of the best reformer of all superstition." It is also noteworthy that the treatise on *The Duty of Parish Priests*, which was composed by archbishop Koninsky of Mohilev, aided by bishop Sopkofsky of Smolensk (St. Petersburg, 1776), and on the contents of which all candidates for holy orders in the Russian seminaries are examined, approaches more nearly the Protestant principle of the supremacy of the Bible in matters of Christian faith and Christian life than any deliverance of the Eastern Church. Thus it says, "All the articles of the faith are contained in the Word of God; that is, in the books of the Old and the New Testament. The Word of God is the source, foundation, and perfect rule, both of our faith and of the good works of the law. The writings of the holy fathers are of great use, but neither the writings of the holy fathers nor the traditions of the Church are to be confounded or equalled with the Word of God and his commandments" (see Schaff, *Creeds of Christendom*, i, 73).

Notwithstanding this respect of the Russian Church for the supreme authority of the Scriptures, it has never been prevailed upon to hold ecclesiastical communion with any other than the several branches of the Orthodox Eastern (commonly called Greek) Church. An interesting attempt to establish intercommunion and co-operation between the Russian Church and some Anglican bishops was made from 1717 to 1723 by two High-Church English bishops, called Nonjurors (for refusing to renounce their oath of allegiance to James

II), in connection with two Scottish bishops. They wrote to this end, in October, 1717, to Peter the Great and the Eastern patriarchs. The patriarchs, in 1723, sent their ultimatum, requiring as a term of communion absolute submission of the British to all the dogmas of the Greek Church. The "Most Holy Governing Synod" of St. Petersburg was more polite, and in transmitting the ultimatum of the Eastern patriarchs proposed, in the name of the czar, "to the most reverend the bishops of the remnant of the Catholic Church in Great Britain, our brethren most beloved in the Lord, that they should send two delegates to Russia to hold a friendly conference, in the name and spirit of Christ, with two members to be chosen by the Russians, that it may be more easily ascertained what may be yielded or given up by one or the other; what, on the other hand, may or ought for conscience' sake to be absolutely denied." The conference, however, was never held, for the death of Peter the Great put an end to the negotiations.

A more serious attempt to effect intercommunion between the Anglican and Russo-Greek churches was begun in 1862, with the authority of the Convocation of Canterbury and the General Convention of the Protestant Episcopal Church in the United States. In the session of the latter held in New York in 1862, a joint committee was appointed "to consider the expediency of opening communication with the Russo-Greek Church, to collect authentic information upon the subject, and to report to the next general convention." Soon afterwards (July 1, 1863) the Convocation of Canterbury appointed a similar committee looking to "such ecclesiastical intercommunion with the Orthodox East as should enable the laity and clergy of either Church to join in the sacraments and offices of the other without forfeiting the communion of their own Church." The Episcopal Church in Scotland likewise fell in with the movement. These committees corresponded with each other, and reported from time to time to their authorities. Two Eastern Church associations were formed, one in England and one in America, for the publication of interesting information on the doctrines and worship of the Russo-Greek Church. Visits were made to Russia, fraternal letters and courtesies were exchanged, and informal conferences between Anglican and Russian dignitaries were held in London, St. Petersburg, and Moscow. The Russians, however, as well as the other branches of the Orthodox Eastern (Greek) Church, did not show the least disposition towards making any concession. A number of Russian divines took an active part in the Old Catholic reunion conferences at Bonn in 1874 and 1875; but although the Anglican and Old Catholic theologians here surrendered to the Orientals as a peace-offering the *filioque* of the Western Creed, the Orientals made no concession on their part.

3. *Ecclesiastical Polity*.—In regard to Church constitution, the organization of the Holy Governing Synod has established a considerable difference between the Russian Church, on the one hand, and all the other sections of the Orthodox Eastern Church, on the other.

(1.) *The Holy Synod*.—The members of the synod are partly priests, partly laymen. All of them are appointed by the czar, who has also the right to dismiss them whenever he pleases. They meet at St. Petersburg in a special part of the large building which has been erected for the high imperial boards. At first the synod had twelve clerical members, one president, two vice-presidents, four councillors, and four assessors. The twelfth member was destined for the synodal office at Moscow. Three of the twelve clerical members had to be bishops, the others were to belong to different degrees of the hierarchy. It was, however, forbidden to appoint an archimandrite or protopresbyter from any diocese the bishop of which was a member of the synod, as it was feared that the former might be influenced by their bishop. According to the pleasure of the czar, the number of the clerical members was, however, some-

times larger, sometimes smaller than twelve. No episcopal see except that of Grusia (Tiflis) confers *ex officio* upon its occupant the right of membership in the Holy Synod, but the metropolitans of St. Petersburg, Moscow, and Kief invariably belong to it. Some of the members are obliged to reside at St. Petersburg, others are absent members who are invited only when matters of prime importance require the presence of all the members. The synod is always presided over by the oldest metropolitan. The most prominent among the lay members is the procurator-general of the synod. He represents the czar, makes the necessary preparations, has the right of veto, and carries out the measures that have been adopted. Every member of the synod, before taking his seat, must bind himself by a solemn oath to discharge faithfully the duties of his office, to be loyal to the czar and his successor, and to recognise the czar as the highest judge in the synod. The salaries of the members of the synod were at first paid from the property of the former patriarchate, which after its abolition was called synodal property. At present they receive a very moderate fixed addition to the salaries which they derive from their regular ecclesiastical office (as archbishops, bishops, or priests). The synod is subject to the emperor, and receives his orders; on the other hand, all prelates and clergymen are subject to the synod. Among the chief duties of the synod are to preserve purity of doctrine, to regulate divine service, and to act as the highest court of appeal in all Church matters. The Synod has to prevent the spreading of heresies, to examine and censure theological books; it is entitled to prescribe ceremonies, and to see to it that they are observed. It has to superintend all churches and convents, to present to the czar suitable candidates for the vacant positions of archimandrites and prelates, and to examine the candidates for episcopal sees. It may transfer bishops to other sees, remove them, or send them to a convent. It acts as a court of appeal from the decisions of the bishops, and receives the complaints of any clergyman against his superiors. It has the right in doubtful cases to give instruction to the prelates; but it can make new laws only with the consent of the czar. It can grant dispensation from ecclesiastical laws, as from the rigid observation of the fasts. All trials which were formerly brought before the court of the patriarch belong now to the jurisdiction of the synod; among them are trials for heresy (against the Raskolniks), blasphemy, astrology; for doubtful, unlawful, and forced marriages; for adultery, divorce. Fornication and abduction are tried before secular courts. In affairs which are partly of an ecclesiastical and partly of a secular character, the synod acts conjointly with the senate, to which it is, in general, co-ordinate. The administrative functions of the synod are divided into two sections, the Economical Department (or College of Economy) and the comptroller's office. All affairs which involve an outlay of money—as the erection of churches, schools, convents, payments, supports of clergymen, and so forth—are first submitted to the Economical Department. The Department of Comptrol has to examine whether the moneys assigned have been properly used, and to examine the accounts. Since 1809 all sums realized by the sale of consecrated candles and other objects which the faithful purchase from the Church, as well as the proceeds of the voluntary offerings of the people, have to be sent by the bishops to the synod, which distributes them among the eparchies according to their several wants. The treasury of the synod, which receives all these moneys, stands under the special control of the two youngest members of the synod, and of a civil officer appointed by the chief procurator.

In 1839 the commission of ecclesiastical schools, which had been established in 1808, was dissolved by the czar, and the Holy Synod was charged with the direction of these schools.

Subordinate to the Holy Synod are—1, the synodal

office of Moscow, which is presided over by the metropolitan of the city, who is assisted by a vicar-general, one archimandrite, and one protopresbyter; 2, the synodal office of Grusia, in which the metropolitan of Tiflis and Grusia presides, being assisted by two archimandrites and one protopresbyter; 3, the college of the former Greek United Church in White Russia and Lithuania, presided over by the archbishop of Lithuania, who is assisted by three members of the secular clergy. The synod has two printing-offices, in St. Petersburg and Moscow, in which all rescripts of the czar and the synod referring to ecclesiastical affairs, all books used at divine service, and, in general, all books, registers, circulars, prayers, pictures, etc., intended for Church use are printed. The synod sends the printed matter to the bishop, who distributes it among the clergy. Every parish priest has to render at the end of the year an account to the bishops of all articles sold, and to remit to him the proceeds. The bishop sends an account of all articles sold within the diocese and remits the amount. The synod has annually from these sales a considerable surplus, which is used for supplying poor eparchies and parishes gratuitously with the books and other objects needed at divine service. Books on theological subjects are not only printed in the offices of the synod, but their contents must be expressly approved by it. For this purpose the Holy Synod is assisted by three committees of censorship, which have their seats at St. Petersburg, Moscow, and Kiev.

(2.) *Orders of the Clergy.*—The higher clergy of the Russian Church consists of metropolitans, archbishops, and bishops. At first Russia had only one metropolitan, at Kiev; when the patriarchate was erected, the archbishops of Novgorod, Kasan, Astrakhan, Rostoff, and Krutizk were raised to the rank of metropolitans. In 1667 the czar Alexis Michaelovitch raised the archbishops of Kasan and Siberia to metropolitans, and appointed a special metropolitan at Astrakhan. Five other metropolitans were appointed by Theodore Alexievitch, and, on the accession of Peter the Great, Russia had, therefore, twelve metropolitans. Peter appointed in the place of the deceased metropolitans and archbishops only bishops, and conferred the title of "metropolitan" and "archbishop" upon any bishops he pleased. Thus the titles "metropolitan" and "archbishop" are now not bound to dioceses of a higher degree, but are only the honorary titles of bishops whom the czar wishes to distinguish by a higher title. It has, however, been customary that the occupants of the eparchies Novgorod-Petersburg, Moscow, and Kiev have the title "metropolitans," and in 1878 no other archbishop had this title. The eparchies are divided into eparchies of the first, second, and third classes, according to the salaries connected with the sees. The three metropolitans of Novgorod-Petersburg, Moscow, and Kiev belong to the first class. According to Silbernagl (*Verfassung und gegenwärtiger Bestand sämtlicher Kirchen des Orients*, 1865), there were seventeen eparchies of the second and thirty of the third class. Not embraced in these numbers are the eparchies of Georgia or Grusia, which territory in 1801 was incorporated with Russia. The country has at present five eparchies, which are not divided into classes, but among which that of Tiflis holds the highest rank. The occupant of the see has the title "exarch of all Georgia," and is always *ex officio* member of the Holy Synod and president of the synodal office at Tiflis. When an episcopal see becomes vacant, the synod, according to the regulations of Peter the Great, presents to the czar two candidates, of whom the czar is to select one. Often, however, the czar himself designates a candidate, whom the synod has to elect. As the bishop has to be unmarried, and all the secular clergy are married, the candidates for the episcopal sees can only be taken from the regular clergy. The first claim belongs to those archimandrites who are members of the Holy Synod, or those to whom affairs of the synod have been intrusted, and who have given proof of their ability. After the

confirmation of the bishop elect by the czar, all the archbishops and bishops present in the capital assemble in the hall of the synod, and the new bishop is proclaimed by the oldest archbishop. The consecration always takes place in the cathedral, and is also attended by all bishops of the capital. The rights and duties of the bishops are fully explained in the *Spiritual Regulations of Peter the Great*. The bishop ordains all the clergymen of his diocese, but he is expected not to ordain more priests, deacons, and other clergymen than are necessary for the celebration of divine service. He has to superintend all the monks under his jurisdiction, and to see that they observe the monastic rules, but he has not the right to punish them without the previous consent of the Holy Synod. The secular clergy, on the other hand, are, also in this respect, wholly under his jurisdiction. Laymen may be excommunicated by the bishop on account of public transgression of the divine commandments, or on account of heresy, but the bishops must previously admonish them three times, and must not involve the family of the culprit in the sentence. The bishop is in particular expected to devote himself zealously to the establishment of schools and seminaries. In order to become acquainted with his eparchy, the bishop shall visit all its parishes at least once every two or three years, and he is not allowed to leave the diocese without the permit of the Holy Synod. In all important or doubtful affairs he is directed to ask for the advice of the Holy Synod. The bishop holds the official rank of a major-general and a councillor of state. According to a ukase of 1764, issued by Catharine II, the property of all bishoprics, convents, and churches of Great Russia was confiscated and transferred for administration to the College of Economy, which now pays to all the bishops a fixed salary. To new eparchies the czar assigns likewise a fixed salary, to be paid by the College of Economy; he also determines, in case two eparchies are united, whether the bishop shall receive the income of one or of both. As has already been stated, the eparchies are divided, according to the amount of the salaries, into eparchies of the first, second, and third class. According to the ukase of Catharine II, the prelates of the first class are to receive a salary of 1500 rubles, those of the second class 1200 rubles, and those of the third class 1000 rubles. Besides, the bishops receive a certain amount of table-money, etc., for defraying the expenses of their household. The table-money of the metropolitans ranges from 2200 to 3900 rubles; the bishops of the second class receive 1000, and those of the third class 800. The bishops generally reside in celebrated convents, which, however, although they are still called convents, are now rather extensive "episcopal houses." Besides the incomes derived from the State, the bishops receive fees for their episcopal functions, as the consecration of new churches, the ordination of priests, for masses for the dead, etc. The eparchies bear their name from the place where the prelate has his residence, rarely from a province. It is common to mention the name of the eparchy by means of adjectives, as the "Muscovite metropolitan" instead of the "metropolitan of Moscow."

Besides bishops, archbishops, and metropolitans, Russia has also vicars of episcopal rank. They were at first appointed in very extensive eparchies, where the prelate found it impossible to perform all the episcopal functions. The first eparchy which had a vicar was Novgorod; in 1764 the empress Catharine II established another for the eparchy of Moscow. The vicars have their own dioceses and full episcopal jurisdiction. They have a consistorial chancery like the other prelates, but an appeal may be taken from their judgments to the metropolitan or archbishop in whose eparchy their district is situated. In regard to salary, they are placed on a level with the prelates of the third class. At present the Russian Church has ten vicariates.

Every prelate is assisted in the administration of his diocese by a consistory which is composed of from five

to seven members. They are presented to the synod by the bishop, and, after their confirmation, can only be removed with the consent of the synod. Each consistory has its own chancery, which generally consists, in eparchies of the first class, of twenty-eight persons, in eparchies of the second, of twenty-one, and in eparchies of the third, of nineteen. The consistory has to take the necessary measures for preserving the purity of the faith. It superintends the sermons and the keeping of the clerical registers, and reports once a year on the condition of the eparchy to the synod. To its jurisdiction belong also matrimonial affairs and the complaints of clergymen and laymen against each other. If secular priests or monks wish to return to the ranks of the laity, the consistory has to subject them to an admonition, the former during three and the latter during six months; it has also to sentence clergymen for important or disgraceful offences. The sentences pronounced against such clergymen are: 1, suspension; 2, degradation to a lower degree of the clergy; 3, entire degradation or deposition. The last-named sentence involves the surrender of the culprit into the army or to the imperial manufactures, and, in criminal cases, to the secular authorities. From the judgment of a consistory an appeal may be taken to the prelate, and from the latter to the Holy Synod. In every large town of the eparchy there are offices called "ecclesiastical directories," generally consisting of two members, which have to receive petitions to the consistory and make reports to it. The bishop appoints, with the consent of the synod, deans for superintending the churches and the clergymen. A dean's district embraces from ten to thirty parish churches. They have to visit the churches of their district, and to revise once every six months the registers of the Church and the lists of baptisms, marriages, and deaths. Under their presidency the parishes elect the church-wardens. In the cities the protopresbyter of the principal church has the superintendence of the entire clergy.

The clergy are divided into the white, or secular, clergy, and the black clergy, or monks. The white clergy chiefly recruits itself from the sons of the priests and other employés of the Church. The admission of persons from other classes of society is surrounded with difficulties. The bishop is forbidden to ordain any one without the necessary knowledge, the requisite age, and good certificates of character, and is not to exceed the number of priests wanted by his eparchy. No one shall be ordained a secular priest without having previously been married to a virgin. The other persons employed for the services of the Church, as sextons, choristers, etc., do not receive any ordination, but are also regarded as a part of the clergy.

(3.) *Schools.*—Peter the Great was the first who commanded the prelates to establish in the capitals of their eparchies ecclesiastical seminaries where boys—especially the sons of priests—might be educated for the priesthood. All that had been required before his time was that the candidates should be able to read, to write a little, and to perform the liturgical functions. Peter the Great also decreed that the chief convents should contribute one twentieth, and the principal churches one thirtieth of their corn for the gratuitous education of the pupils of the ecclesiastical schools. After the confiscation of the Church property in 1764, the support of the seminaries devolved upon the Holy Synod. The ecclesiastical schools are divided into the four school districts of Petersburg, Kief, Moscow, and Kasan. At the head of each of the districts is an ecclesiastical academy. At each academy is a conference consisting of the rector of the academy, one archimandrite, one yeromonach, two secular priests, and several professors, and presided over by the metropolitan or archbishop, who has to superintend the execution of all the decrees of the synod in regard to the education of the clergymen and of the priests. The Conference of the Academy of St. Petersburg constitutes the centre of the scientific life

in the Russian Church, as the conferences of the other school districts receive from it the decisions of the Holy Synod. The system of Church schools, which is under the direct jurisdiction of the Holy Synod, consists of the ecclesiastical academies, the eparchial seminaries, the circuit schools, and the parish schools. Every pupil has first to enter the parish school and to remain there for two years. He then attends in succession the circuit school, the eparchial seminary, and finally the academy, remaining in each of these schools for three or four years.

(4.) *Marriage and Privileges of the Priests.*—As the secular clergy must be married, they cannot ascend to a higher position than that of a protopresbyter. Widower presbyters were required by a canon of Theodosius, metropolitan of Moscow, to resign and withdraw to a convent. The Council of Moscow in 1667 authorized widower clergymen who led a virtuous life in the convent to continue their priestly functions as yeromonach. Peter the Great forbade the bishop to force any widower priest to retire to a convent. By a second rescript, issued in 1724, he provided that widower priests who were good scholars or preachers and who should marry a second time should be employed as rectors of the seminaries or in the chanceries of the bishops. At present the synod can give permission to widower priests to remain in their office.

The secular clergy are exempt from personal taxes and from military duty. For any criminal offence the clergy are subject to the civil court, but the proceedings against them always take place in the presence of deputies of the ecclesiastical court. In the case of any other offence they are judged by the Church courts. No priest or deacon can be subjected to corporal punishment until he has been degraded by his ecclesiastical superior. The wives of priests and other Church employés share the privileges of their husbands as long as they are not married again.

(5.) *Appointment and Support of the Clergy.*—In 1722 and 1723 the synod fixed, conjointly with the senate, the number of clergymen who were to serve at every church. Since the confiscation of the Church property in 1764, the Economy College of the Holy Synod pays fixed salaries to the clergymen and employés of all churches which had real estate, or at least twenty serfs. In case a community wants a larger number of clergymen than the government is bound to pay, it has to make satisfactory provision for a sufficient salary.

Every regiment of the army has its own priest, who is under the jurisdiction of the prelate in whose eparchy the regiment is stationed. Only in time of war all the military priests are placed under the jurisdiction of a superior priest who is specially appointed for this purpose.

The bishop has full freedom in appointing the priests of all churches which have no patron. In the army no priest is to be appointed without the consent of the bishop. The children and relatives of a parish priest must not be appointed at the same church. The nobleman on whose estate a church has been erected has the right of patronage. He may propose a priest whose appointment he desires to the bishop, and without his consent no priest can be appointed. In villages the patrons superintend the church-warden and hold the key to the Church treasury.

(6.) *Monks and Nuns.*—All the convents of Russia follow the rule of St. Basil. No one can become a monk before the fortieth year of age, nor a nun before the fiftieth year. Before the year 1830 the thirtieth year of age was required for monks. The synod grants, however, dispensations in regard to age, especially to young men who, after completing their studies at an ecclesiastical academy, desire to enter a convent with a view to securing as early as possible an appointment as prelate, archimandrite, or professor. Children need the consent of their parents to their entrance into a convent, and many legal precautions have been taken to close the gates of the convents against persons who are un-

willing, or who by entering a convent would violate other duties. In those convents which are supported by the State the limit of the number of monks is fixed by law. The novitiate lasts three years. After its termination the permission of the diocesan bishop is required for admitting the novices to a preparatory degree. On this admission they put on the black habit, from which the monks have received the name of the black clergy. The taking of the monastic vows is connected with solemn rites. There is a third monastic degree, called the "great" or "angelic" habit, but only a few monks are admitted to it.

Every convent of monks is either under an archimandrite or an igumen; smaller convents are under a predstoyatel (president); the female convents are under an igumena. Formerly the superiors of convents were elected by the monks, now they are appointed by the Holy Synod. The monks are divided into two classes, those who have received the order of priests or deacon and are called yeromonachs and yerodeacons, and common monks called monachs. The number of the former is only small. The convents are under the superintendence of the bishop in whose eparchy they are situated; only the lauras, a small class of the most prominent convents, and the stauropigies, or exempt convents, are under the direct jurisdiction of the Holy Synod. The present regulations of the Russian convents date from the time of Peter the Great. By a ukase of 1701 he abolished the institution of the lay brothers, and bound the monks to receive and nurse invalid soldiers and other aged and poor men; the nuns, in the same way, were required to receive aged females, to educate orphans, and teach female handiwork. The regulations are, on the whole, the same as for most of the religious orders of the Eastern and Roman Catholic churches. The monks are admonished to read often in the Bible and to study, and the superiors are required to be well versed in the Scriptures and the monastic rules. The monks are excluded from pastoral duties; only the chaplains of the navy are taken from their ranks. The government has established a college for this special purpose at Balaklava, in the Crimea. To this college monks are called from the various eparchies, and the archimandrite of the convent elects from them chaplains for the men-of-war. As the monks receive, in general, a better education than the secular clergy, the professors in the seminaries and ecclesiastical academies are generally taken from them.

The first Russian convents were established during the reign of Vladimir the Great, but the cradle of all the Russian convents was the Petchersky Laura at Kief, which had been founded by Anthony, a monk of Mount Athos, during the reign of Yaroslav (1036-54). From that time the convents increased rapidly. In 1542 Ivan II Vasilivitch forbade, at the Council of Moscow, the establishing of a convent without the permission of the monarch and the diocesan bishop. Peter the Great not only forbade bishops and other persons to build convents or hermitages, but also ordered the abolition of smaller convents and of all hermitages. Catherine II, in 1764, confiscated the entire property of the convents. At the same time many convents were suppressed, for the empress intended to preserve only the most prominent convents in the large cities and those that were most celebrated. In consequence of numerous petitions addressed to her, the empress allowed the continuance of many convents under the condition that such convents should support themselves or be supported by the voluntary offerings of the people. Since that time two classes of convents have been distinguished, those which are supported by the Economy College and those which are not. The former are, like the eparchies, divided into three classes, according to the number of inmates and the amount of their salaries.

4. *Statistics.*—The procurator-general of the Holy Synod publishes annually an account of the condition of the Russian Church. The following facts are taken

from the report made by the present procurator-general, count Tolstoi, on the state of the Church in 1876, and published in April, 1878. There were in 1875 in all the eparchies, with the exception of the exarchate Grusia, the Alexandro-Neveski Laura (convent of the first rank) of St. Petersburg, and the Petchayevsk-Uspensky Laura at Kief, from which no report had been received, 56 archiepiscopal houses and 380 convents of monks, of which 169 received no support from the State. The total number of monks was 10,512, of whom 4621 were serving brothers. Of nunneries there were 147 (forty of which derived no support from the State), with 14,574 nuns, of whom 10,771 were serving sisters. The number of cathedral churches, including 57 episcopal churches, 562 chief churches of cities, 3 army cathedrals, and 3 navy cathedrals, was 625; of other churches, 39,338; of chapels and oratories, 13,594. Of the churches, 227 parish churches are reported to belong to Raskolniks. The total number of the secular clergy, which includes the sextons, was 98,802. In the course of the year 1876, 323 churches and 170 chapels and oratories were built. There were 87 hospitals with 1192 inmates, and 605 poorhouses with 6763 inmates. The number of persons received into the Russian Church was 12,340, embracing 1192 Roman Catholics, 516 United Greeks, 8 Armenians, 688 Protestants, 2539 Raskolniks, or Old Believers (1498 completely united with the Russian Church, and 1041 reserved the use of the ancient canons), 450 Jews, 219 Mohammedans, and 6728 pagans. The number of divorces was 1023; in 29 cases the cause was remarriage of the one party during the lifetime of the other; in 2, too close consanguinity; in 15, impotence; in 80, adultery; in 650, the unknown residence of one party; in 247, the condemnation of one party to forced labor or exile. The institutions for the education of the clergy, with the number of their teachers and pupils, were as follows:

Institutions.	Number.	Teachers.	Pupils.
Academies.....	4	131	586
Seminaries.....	53	888	12,401
Schools.....	196	1623	27,555
Total.....	243	2642	40,542

The number of schools connected with churches and monasteries was 6811, with an aggregate of 197,191 pupils, of whom 170,461 were male and 26,730 female. The number of Church libraries was 15,770; the number of new libraries established in the course of the year, 235. The Church property under the administration of the procurator-general amounted, on Jan. 1, 1877, to 26,855,858 rubles. The population connected with the Orthodox Russian Church, with the exception of three Asiatic eparchies, the exarchate Grusia, and the army and navy, from which no reports had been received, amounted to 57,701,660. Adding an estimate of the Orthodox population in the districts above named, the total population of the Orthodox Russian Church was in 1876 about 60,100,000. The Orthodox Church prevails in each of the sixty governments into which European Russia is divided, except sixteen, of which twelve are chiefly inhabited by Roman Catholics, three by Protestants, and one by Mohammedans. Of the total Orthodox population about 54,900,000 live in European Russia, 2,100,000 in Caucasia, 3,000,000 in Siberia, and 270,000 in Central Asia. The grand-duchy of Finland has about 37,000 adherents of the Russian Church. Outside of Russia the Russian Church has established missions in China and Japan which are reported as making satisfactory progress, and as counting in each country a population of about 5000 souls.

II. *Other Christian Churches.*—While nearly the entire population in those provinces which have not been under any other than Russian rule belong to the Greek Church, the empire has received a large Roman Catholic population by the partition of Poland, and a considerable Protestant population by the annexation of the Baltic provinces. The conquest of Erivan in

1828 placed under Russian rule not only a considerable portion of the Armenian Church, but the seat of its head, the catholicoi of Etchmiadzin.

1. *Roman Catholics*.—Until 1642 no provision had been made for the few Roman Catholics living in the Russian dominions. In 1642 the Italian embassy to Moscow was attended by a Jesuit, who was followed by twenty Capuchin monks and a præfect. From 1705 to 1715 several other Jesuits were sent to Russia, and a college was established by them at Minsk. Pius VI sent a legate to St. Petersburg, and placed under his jurisdiction the missions of that city, Moscow, Riga, and Reval. As the provinces which were incorporated with Russia at the first partition of Poland contained a considerable Catholic population, Catharine II concluded to erect a bishopric of the Latin rite for her Catholic subjects. This led to the establishment of the archbishopric of Mohilev, which was confirmed in 1783 by Pius VI. By the second and third partitions of Poland, a number of episcopal sees fell under Russian rule, all of which, except that of Livonia, were abolished by Catharine II, who, instead, erected two new ones. Paul I came to an understanding with the pope about a reorganization of the Catholic Church in the new Russian provinces, and accordingly, in 1797, the following dioceses were organized: Mohilev, archbishopric; and Samogitia, Wilna, Luzk, Kaminiac, and Minsk, bishoprics. All these dioceses received a new circumscription by the concordat of Aug. 3, 1847. By the same concordat a sixth episcopal see of Kherson, or Tiraspol, was erected for the Catholics in the southern provinces of European Russia and in the Caucasus. The archbishop of Mohilev is president of the Roman Catholic academy, a kind of central or general seminary for all the Catholic dioceses above referred to. The constitution of this academy is almost the same as that of the four academies of the Orthodox Russian Church already referred to. The diocese of Mohilev embraces all those parts of Russia proper (exclusive of the former kingdom of Poland) which do not belong to one of the six dioceses which have been mentioned, also the Catholics of Finland. Besides the archbishopric of Mohilev, Russia has in the former kingdom of Poland the ecclesiastical province of Warsaw, embracing the archbishopric of Warsaw and the bishoprics of Cracow, Lublin, Yanov or Podlachia, Sandomir, Seyna or Augustovo, and Vladislav-Kalish or Kuyavia. This ecclesiastical organization of Poland dates from the papal bull of June 30, 1818, and was confirmed by another concordat concluded in 1847. The Russian government has pursued, with regard to the Catholic Church of Poland, the same policy as that with regard to the Russian State Church. The Church property was confiscated, and, in return, the clergy were paid and the buildings maintained by the government. The number of convents was greatly reduced, and the remaining ones placed under almost the same regulations as those of the Orthodox Russian Church. As the Russian government, in many cases, carried through new regulations in regard to the Roman Catholic Church without having come to a previous understanding with the pope, frequent conflicts between Russia and the pope have been the consequence. In 1878 the diplomatic relations between Russia and Rome were still interrupted. The active part which a number of the Catholic clergy in the Polish districts have always taken in the national movements of the Poles against the Russian rule has naturally added to the unfriendly feelings which have generally prevailed between Russia and the Roman Catholic Church. Notwithstanding these incessant conflicts, the immense majority of the total population of the former kingdom of Poland has remained in connection with the Roman Catholic Church. In 1878 the Roman Catholics there were reported as numbering 4,597,000 in a total population of 5,210,000, while the Orthodox Russian Church had only a population numbering 34,135 souls.

Exclusive of the kingdom of Poland, Russia proper

in Europe had a Roman Catholic population of 2,898,000 souls; in Caucasia, 25,916; in Siberia, 24,316; in Central Asia, 1316. Only in two governments did they form a majority of the total population—in Kovno, where they constitute 79.5 per cent., and in Wilna, where they constitute 61 per cent.

Besides the Roman Catholic population of the Latin rite, the Polish provinces had formerly a large population belonging to the United Greek Church. Nearly the whole of this population has been induced by the Russian government, in the manner already referred to, to unite with the Russian Church, and to sever its connection with Rome. The Russian government in 1879 reported the Church as nearly extinct. The United Armenians are estimated at about 33,000. They have no bishops of their own, but are under the jurisdiction of the Catholic bishops of the Latin rite.

2. *Protestants*.—By far the most numerous among the Protestant sects represented in Russia are the Lutherans, who, in the Baltic provinces, constitute a considerable majority of the entire population; besides them, there are Reformed, Mennonites, Moravians, and Baptists.

(1.) *The Lutherans*.—Until Peter the Great, Russia had no Protestant congregation outside of Moscow. By the acquisition of the Baltic provinces and of Finland, a numerous Lutheran population was placed under Russian rule. The Russian government did not interfere with their Church constitution. The affairs of the Lutheran Church were superintended by the St. Petersburg College of Justice, and the administration of the several sections was carried on by consistories. In 1810 the Lutheran, with all other non-Russian churches, was placed under the Ministry of Ecclesiastical Affairs; in 1832, under the Ministry of the Interior. In 1829 a committee was appointed in St. Petersburg to draft a new Church constitution, with the greatest possible regard for the existing institutions of the Church. As a fruit of the activity of this committee, a law was published in 1832 for the Evangelical Lutheran Church of Russia, an instruction of the clergy and Church boards, and an agenda for the congregations. All these laws, however, were only intended for Russia proper, not for the grand-duchy of Finland. The clergy and the teachers of theology and religion have to bind themselves by an oath to adhere to the symbolical books. The members of the Church are required to go at least once a year to the Lord's supper. Marriages with pagans are forbidden, but with Jews and Mohammedans permitted. Candidates for the ministry have to pass two examinations—one before the theological faculty at Dorpat, and the other before the consistory—ere they are allowed to preach. A third examination has to be passed before they can be appointed. The appointment is at first for only one, two, or three years; after the expiration of which a new colloquium is required. A number of parishes are united into a district, at the head of which is a *probst* (provost). There is no difference of degree between the titles of superintendent and superintendent-general, but the name of superintendency-general is given to the larger consistorial districts. The title of bishop, which was introduced in 1819, is only honorary, and does not denote a distinct office. The superintendents are the organs of the consistories: they examine the candidates, ordain the preachers, and visit the provosts; only in exceptional cases the pastors. For this office of a provost all the preachers of a district propose two candidates, and the appointment is made by the State ministry upon the recommendation of the consistory. For the superintendent's office two candidates are presented: in Riga and Reval by the magistrate, in Moscow and St. Petersburg by the General Consistory, in the other consistories by the nobility. The appointments are made by the emperor. There are eight consistories: St. Petersburg, Livonia, Courland, Esthonia, Moscow, Oesel, Riga, and Reval. The consistories are composed of an equal number of clerical and lay mem-

bers, and presided over by a layman. All the members must belong to the Lutheran Church. The superintendent is the vice-president. The consistories have jurisdiction in all matrimonial affairs. As the members do not reside in the same place, plenary meetings are only called at intervals for disposing of the more important affairs, while ordinary matters are treated by a committee. The General Consistory of St. Petersburg is the central Church board and court of appeal in matrimonial affairs. It is composed of deputies who meet twice a year in St. Petersburg, and are elected for a term of three years. Candidates for this office are nominated in a similar manner to those for the office of superintendent. The election of one of the candidates is made by the ministry, upon the recommendation of the General Consistory. The presidents are appointed by the emperor. Preachers' synods are held in all the consistorial districts, and one half of the clergy are always required to be present. A Lutheran general synod is to be convoked from time to time as a deliberating assembly. It consists of clerical and lay delegates, who are partly chosen by the consistories, and partly elected by the consistorial districts. The candidates for the ministry receive their theological education at the University of Dorpat. The total number of Lutherans amounts to about 2,400,000 in Russia proper, to 300,000 in Poland, and to 12,000 in Asia.

(2.) *The Reformed Church.*—The membership of this Church in all Russia does not exceed 200,000, about one half of whom live in Lithuania, in the governments of Wilna and Grodno. Lithuania is divided into four districts, at the head of each of which are a superintendent and vice-superintendent. Annually a synod is held, which lasts from three to four weeks. This synod governs the Reformed Church of Lithuania, under the superintendence of the State ministers.

(3.) *Other Protestant Denominations.*—The Mennonites have established a number of flourishing colonies in Tauris (where they numbered in 1876 about 15,000 souls), and on the Volga. Quite recently, when the Russian government had revoked their exemption from military service, they began to emigrate to the United States.

The Moravians have in Livonia and Esthonia prosperous societies, with more than 250 chapels and above 60,000 members. In accordance with the general character of the Moravian societies in the diaspora, the members do not sever their connection with the State churches. See MORAVIANS.

The German Baptists have recently established some missions, chiefly among the Germans of Russia, and they report encouraging progress.

3. *The Gregorian Armenian Church.*—By the conquest of the Persian province of Erivan in 1828 the head of the Armenian Church, the catholicos of Etchmiadzin, became a subject of Russia. When the catholicos Ephrem died, in 1830, the emperor of Russia, who was desirous of restoring the ancient order of election, decreed to leave the election to all the clergymen, and to the most distinguished lay members of the Armenian Church, and that in future also members of the same Church in other states might be admitted. A new regulation for the government of the Armenian Church was drawn up by the St. Petersburg Department of the Ecclesiastical Affairs of Foreign Creeds, on the basis of propositions submitted by two commissions, one consisting of prominent Armenian clergymen and laymen at Tiflis, and the other consisting of Russian officers at St. Petersburg. The draft was examined and commented upon by the commander-in-chief of the Transcaucasian provinces, and sanctioned by the emperor in March, 1836. This new regulation is divided into ten chapters, of which six relate to the administration of eparchies and convents, while the first four treat of the administration of the Armenian Church of Russia in general. According to the first chapter, the Armenian Church and the Armenian clergy enjoy equal rights

with those of other foreign (non-Russian) creeds. The clergy are free from taxes and corporal punishments. The second chapter treats of the privileges and jurisdiction of the catholicos. For this office the clergy and the notables of the nation are to propose several candidates, one of whom is to be appointed by the emperor. The catholicos has the right to send a deputy to the coronation of the emperor. On leaving the palace, he is accompanied by an honorary guard of Armenians. He has the exclusive privilege of preparing and consecrating the holy oil, and of selling it to all Armenian churches. The third chapter refers to the synod, which constitutes the council of the catholicos, but with only a deliberative vote. The synod consists of a number of prominent ecclesiastical dignitaries, who are proposed by the patriarch and appointed by the emperor. An imperial procurator is appointed at Etchmiadzin, as also at the seats of the supreme ecclesiastical authorities of other foreign creeds. The fourth chapter provides that the archbishops and bishops be solely appointed by the catholicos, and that they be responsible for the administration of their eparchies both to the catholicos and to the emperor. The number of eparchies which recognise the authority of the catholicos amounts to about forty, but only six are situated within the Russian empire, namely, Astrakhan, Erivan, Grusia, Nachitshevan, Karabagh, and Shirvan. See also ARMENIAN CHURCH. The number of Gregorian Armenians in 1878, as reported by the Russian government, was 38,720 in European Russia, 595,810 in Caucasia, 15 in Siberia, and 1 in Central Asia.

III. *Non-Christian Religions.*—1. *Jews.*—For the education of Jewish rabbins, Rabbinical schools have been established by the government at Wilna and Shtomir. The government also supports Jewish schools at Odessa, Kishinef, Vinnica, Stara-Constantinof, and Berditchef. The number of Jews of Russia proper in Europe was stated to be, in 1878, 1,944,378; in Poland, 815,433; in Caucasia, 22,732; in Siberia, 11,941; in Central Asia, 3396.

2. *Mohammedans.*—The Mohammedan population has rapidly increased by the progress of the Russians in Central Asia. It now amounts to about 7,500,000, of whom 2,364,000 are found in Russia proper in Europe, 426 in Poland, 1,987,000 in Caucasia, 61,000 in Siberia, and 3,016,000 in Central Asia. The Mohammedans even constitute a majority of the population in one of the European governments—Oofa. There are about 20,000 multtis, mollahs, and teachers, all of whom, except those of Tauris and the Kirghis Cossacks, are subject to the mufti of Orenburg.

Lutherans and Roman Catholics are forbidden to convert to Christianity a Mohammedan who is a Russian subject, while a non-Russian Mohammedan may be received into any of the Christian churches permitted in the empire. These laws have been very strictly executed. On several occasions Tartars who had embraced Christianity and had afterwards returned to their original faith were punished by imprisonment, while no attention was paid to the excuse that the relapse had been occasioned by an unbearable pressure exercised by Orthodox priests, as well as by their avariciousness. On the other hand, the government aids the Orthodox clergy in every possible manner in their efforts to convert the unfaithful. In Kasan, one of the principal seats of the Mohammedan population of European Russia, the Brotherhood of St. Gurij was formed in 1870 for the purpose of converting the Mohammedans and pagans on the Volga. This brotherhood had established up to 1874 115 schools with their own means, which were attended by 1992 male and 339 female Tartars, besides members of other nationalities. The civil rights of the Mohammedans are, like those of the Jews, limited by special laws. They are, indeed, eligible to municipal and government offices under the same conditions as Christians; but in city councils, e. g., the non-Christian members must not exceed one third of the

total number of members, while the office of mayor is entirely closed to them. The criminal statistics are particularly interesting. Among all the inhabitants of the empire, the Mohammedans occupy the lowest rank with regard to the more serious crimes, there being but one conviction among 5779 Mohammedans against 2710 Orthodox Christians. With regard to the less serious offences, the Mohammedans occupy the fifth rank; but even this unfavorable relation is caused by the numerous convictions for evasion of military duty. Theft, however, is also of common occurrence among them. The Mohammedans are generally very prompt in observing their duties to the State, with the exception of those arising from the general liability to military service. The service in the regular army is to this day so unpopular among the Tartars of the Crimea that in 1876 the government was forced to take severe measures to prevent a wholesale emigration to Turkey. An official report states that the Tartars feared, above all things, that they would be forced to fight against their co-religionists the Turks, and that they would be compelled to eat pork, which is to them worse than death. But even before the declaration of war against Turkey, and during this war, the excitement was said to have subsided, and they were, with a few exceptions, loyal. The same was the case with the Mohammedans in Asiatic Russia. In matters pertaining to their religion, the Mohammedans are granted complete liberty, although the government takes care to be informed on the entire *personnel* of the clergy, their actions, etc.

The highest Moslem ecclesiastical body in the governments of European Russia is the Mohammedan Ecclesiastical College of Oofa. This college is elected, and fills all offices under its jurisdiction without the necessity of obtaining the consent of the government. For the Mohammedan clergy of Central Asia, the cities of Bokhara and Samarcand are to this day centres of learning, and the heads of the institutions of learning at these places are regarded as the preservers of the true faith. The colleges for theology and Mohammedan law (*madrassa*, or *medresseh*) number several hundred. (In European Russia there are two hundred and fifty, of which several are attended by hundreds of students.) In these colleges, Mohammedan science flourishes, without ever having been touched by so much as a breath of Western culture. The government does not interfere in any manner in the inner affairs of these schools; does not oppose a journey to Mecca; and even permits priests (mollahs) who have finished their education in Constantinople, Arabia, or Egypt to hold a position upon their return to Russia. It was found that the ulemas (the learned men) connected with the mosques or schools readily submit to any government, as this alone could secure to them the use of their legacies (*vakuf*), their main source of income. Those brethren, however, who have had themselves declared saints have become in all Mohammedan countries a perfect nuisance, and the sworn enemies of a well-regulated government. The title of saint (*ishan*) is easily obtained. The motives to obtain it are, however, very frequently the most dishonorable, while the saints themselves in many cases bear a very poor reputation. In Central Asia, the majority of robberies are committed by the saints, and they are therefore avoided by the stationary population. The nomads, on the other hand, receive them with open arms, and here, among the roving sons of the steppe, they find their true home. The Russian government at first did not oppose them. The decrees of 1781 and 1785, on the contrary, opened to them the newly acquired Kirghis steppes. Their influence here was a very pernicious one. The government, however, treats them at present more strictly. In 1873 a case occurred in Orenburg where such a saint was banished to a government having no Mohammedan inhabitants. In the same manner, the Russian government proceeded against the saints in the Caucasus, while in Turkestan it watches the fanatical order of Nakshbandi very closely.

The popular school system among the Mohammedans was entirely reorganized by an imperial decree of Nov. 20, 1874. This decree placed the schools of the Tartars, the Bashkirs, and Kirghis under the imperial ministry of education, which informed its subordinates of this act as follows: "The subordination of the Tartar non-Russian schools under this ministry is not only important in an educational, but also in a political, point of view. The Mussulmans' schools have been, up to this time, without any government supervision, and therefore promoted among the people an anti-Russian sentiment and a fanaticism which prevented the assimilation of the Tartar, etc., with the other inhabitants of Russia." According to Mohammedan views, every mollah is at the same time a teacher, while the school is near the mosque. Through these schools, the mollahs endeavor to bring their community under their influence, and to keep them away from their Russian neighbors. They are also decidedly opposed to any government supervision of the schools. The government at first tried to establish teachers' seminaries for the education of teachers in these schools; and the decree of 1870, which ordered the establishment of these seminaries, provided, in order to do away with all prejudices, that the teachers of the Russian language should be, as far as possible, Mohammedans, and the mollahs be permitted to attend all the lessons, so that they might convince themselves that nothing objectionable was taught. Even now the teachers in the madrassas of the principal cities, like Kasan, speak Russian fluently, although they are all Mohammedans. The authorities are also actively engaged in the preparation of reading-books containing, besides tales and fables, incidents from Russian history, as well as facts from geography and natural history. This is a decided improvement, as according to all authorities, like Shaw, Lerch, and Vámbéry, the entire Turkish-Tartaric literature breathes "a spirit of religious mysticism, rose-colored sensual love, and reckless bravery emanating from the most bitter hate of the unbelievers." Even such an old library as that of Kasan is completely wanting in works on the history and geography of Mohammedan countries; but it is expected that this want will be relieved in time by the Mohammedan students in the Russian high and secondary schools. In 1871 the Oriental faculty of the University of St. Petersburg was attended by thirty-six students. In the same year there were ninety-two Mohammedan students in the Russian gymnasia, of which the educational district of Kasan, with its forty-three per cent. of the total Mohammedan population, had forty-seven.

3. *Pagans*.—The number of pagans in European Turkey is 258,125; in Poland, 245; in Caucasia, 4683; in Siberia, 286,016; in Central Asia, 14,740.

IV. *Literature*.—On the history of the Russian Church, see Mouravieff, *History of the Russian Church* (transl. by Blackmore [1842] to the year 1710), vol. i; Strahl, *Beiträge zur russischen Kirchengeschichte* (1827), vol. i; id. *Geschichte der russischen Kirche* (1830), vol. i; Schmitt, *Die morgenländisch-griechisch-russische Kirche* (1826); id. *Kritische Geschichte der neu-griech. und der russischen Kirche* (1840); Neale, *History of the Holy Eastern Church* (1850); Stanley, *History of the Eastern Church* (1862); Theiner, *Die Staatskirche Russlands* (1853); Gallitzin [prince A.], *L'Eglise Gréco-Russe* (1861); Boissard, *L'Eglise de Russie* (1867, 2 vols.); Philaret [archbishop of Tchernigoff], *Geschichte der Kirche Russlands* (Germ. transl. by Blumenthal, 1872); Basaroff, *Russische Orthodoxe Kirche* (1873); also the *Occasional Papers of the Eastern Church Association of the Church of England and the Protestant Episcopal Church in the United States* (published in New York and London since 1864). The doctrine of the Orthodox Eastern Church as taught in Russia is set forth in the catechisms of the metropolitans Plato and Philaret of Moscow. An English translation of the larger catechism of Philaret was published by Blackmore (1845).

and republished in Schaff, *Credentials of Christendom* (1877), vol. ii. See also Guettée [a Gallican priest who joined the Russian Church], *Exposition de la Doctrine de l'Eglise Cath. Orthodoxe de Russ.* (1866); Procopowicz, *Theologia Christiana Orthodoxa* (1773-75), 5 vols.; abridg. (1802). On the rites and ceremonies of the Russian Church, see King [Anglican chaplain in St. Petersburg], *The Rites and the Ceremonies of the Greek Church in Russia* (1772); Mouravieff, *Lettres à un Ami sur l'Office Divin* (French transl. by prince Gallitzin). On the constitution and present condition of the Church, see Silbernagl, *Verfassung und gegenwärtiger Bestand sämtlicher Kirchen des Orients* (1865); Neher, *Kirchl. Statistik* (1865), vol. ii. The latest statistics of the Church are found in the annual reports of the procurator-general. A full statistical account of all the religious denominations of the empire is found in the *Statistical Year-book of the Russian Empire* (in the Russian language [St. Petersburg, 1871]), vol. ii. (A. J. S.)

Russia, Versions of, or, rather, VERSIONS IN THE LANGUAGES OF RUSSIA. The praise which has been awarded to ancient Thebes on the Nile by calling it *κατορθωτος*, "the hundred-gated," may be also given to Russia, which, in its geographical dimensions, variety of races, multiplicity of population, and diversity of languages, is a world in itself, and baffles and bewilders the mind at the bare conception that the millions that owe allegiance to the throne of the czar are to be furnished with the Word of God in their own vernaculars. According to the geographical position, we get the following linguistic groups:

I. East Siberian, or Eastern Group:

a, Jakagir; b, Tchukst and Coreak; c, Kamtschatkan; d, Gliak.

II. (A.) Altaic Group:

a, Tungusian; b, Mantchu; c, Aino, or Kurile; d, Aleutian.

(B.) Mongolian Languages:

a, Mongol; b, Buriat; c, Kalmuck.

(C.) Tartar:

a, Jakut; b, Siberian Tartar; c, Kirghise Tartar; d, Bashkir and Meshcherik; e, Nogai and Kumük; f, Turkmenian; g, Aderbedshan; h, Kazan Tartar; i, Tchuvash.

(D.) Samodele:

a, Jarak; b, Tawgy, Samodele.

(E.) Finnish Family:

a, Urian.

a, Ostjak; b, Wogul.

a, Tcheremiseian; b, Morduin.

a, Permian; b, Sirenian; c, Wotjakian.

a, Finnish in the narrower sense, with

1, Carelian; 2, Tschudian; 3, Wotian; 4, Olonetzian.

b, Esthonian; c, Livian; d, Krewingian; e, Laponese.

III. Jeniscan Group:

a, Jeniseo, Ostjakian; b, Kottian.

IV. Caucasian Group:

a, Georgic; b, Lesghic; c, Ristic; d, Tcherkess Families.

V. Shemitic Group:

a, Hebrew; b, Arabic.

VI. Asiatic Group:

a, Persian; b, Kurdish; c, Armenian; d, Ossitirian.

VII. European Group:

(A.) Slavonic Family.

a, Russian; b, Polish; c, Servian; d, Tschechian; e, Bulgarian.

(B.) Lithuanian Family.

a, Lithuanian and Samogitian; b, Lettish.

(C.) Germanic Family.

a, German; b, English; c, Swedish; d, Dutch.

(D.) Græco-Latin Family.

a, Greek; b, Albanian; c, Latin; d, Italian; e, French; f, Ruman.

These are the representatives of the Russian empire.

As to the versions made for these different families, only

a few enjoy this privilege. Following our table, we

must pass over the East Siberians, or Eastern Group, as

none of these people, who are but partially Christians,

have the Scriptures in their vernacular. The same

must be said of the Ainos, or Kuriles, belonging to the Altaic, and of a great many others belonging to the other groups. For a better view, we will speak of the different versions in alphabetical order; and with the help of the linguistic table the reader will be easily guided as to which family the respective version belongs to. As the most important versions have either been given already, or will be given, in this *Cyclopædia*, the reader will be referred to them.

1. Albanian.

2. Aleutian is the language of the inhabitants of the Aleutian Islands. For the most part, they belong to the Greek Church, which had the Gospel of St. Matthew printed for them in the Aleutian, according to the translation prepared by priest John Veniaminoff, in the year 1840, in parallel columns with the Russian version.

3. Arabic.

4. Armenian.

5. Bulgarian. See SLAVONIC VERSIONS.

6. Buriat. The Buriats, residing on Lake Baikal, and numbering about 150,000 individuals, are Lamaists; some are Christians. At a very early time, prince Gallitzin, president of the Russian Bible Society, wrote to the governor of Irkutsk, requesting him to send two learned Buriats to St. Petersburg for the purpose of assisting Dr. Schmidt in the translation of the New Test. Two salsangs, or Buriat nobles, accordingly repaired to St. Petersburg, and, with the consent of their prince and lama, engaged in the work of translation. The Divine Word was blessed in their conversion, and in a letter addressed to their chief they avowed their faith in Jesus. In 1818 the Gospel of St. Matthew was published, which was soon followed by other parts of the New Test. Since 1840 the British and Foreign Bible Society possesses a translation of the entire Bible, which was prepared at the expense of that society.

7. Dutch.

8. English.

9. Esthonian. Esthonia is a maritime government in the north-west of European Russia, and forms one of the Baltic provinces. The language is spoken in two dialects—the Dorpat and Reval Esthonian. The former is spoken in South Esthonia, and the latter prevails in the North. Almost all the Esthonians are of the Lutheran persuasion. As early as 1686 they received the entire New Test. in the Esthonian language, translated by John Fischer, a German professor of divinity and general superintendent of Livonia. This translation was executed at the command of Charles XI. A version of the Old Test., made by the same translator, aided by Gusekenius, appeared in 4to in 1689; but it is uncertain in which dialect these early versions were written, although it was understood throughout Esthonia. Later versions considered both dialects, and thus we have two versions—the *Reval Esthonian* (q. v.) and the *Dorpat Esthonian*. As to the latter dialect, a New Test. was printed in Riga in 1727, which edition was soon exhausted. In 1815, through the exertions of Dr. Paterson, 5000 copies of the New Test. were printed by the British and Foreign Bible Society; and in 1824 the Russian Bible Society had 5000 copies printed, while another edition was undertaken in 1886 by the Dorpat Bible Society. In the same year a version of the Psalms, translated from the Hebrew by the Rev. Ferdinand Meyer, of Carolen, was printed by the aid of the parent society, and the number of copies of the New Test. together with the Psalms which has been distributed is, according to the last report of the British and Foreign Bible Society (1878), 35,000.

10. Finnish. As early as 1548 the New Test. was published at Stockholm. This version was made by Michael Agricola, rector, and afterwards bishop of Abo, a friend of Luther. In 1644 the entire Bible was published under the patronage of queen Christina, to whom the work was also dedicated. Editions of the New Test. from the text of queen Christina's version appeared in 1732, 1740, 1774, and 1776. In 1811 the British and Foreign Bible Society commenced its operations in Finland, and a Bible society was formed at Abo. In 1815 an edition of 8000 copies of the New Test. was published at Abo, and in the following year 5000 copies of the entire Bible left the press in Abo. A quarto edition of the entire Bible, aided by a grant from the British and Foreign Bible Society, was completed in 1827, but the extensive fire which broke out in the same year at Abo destroyed this edition (consisting of 7600 copies). In consequence, another edition of 5000 copies of the New Test. was immediately undertaken by the same society; and this edition was completed at Stockholm in 1829. In 1832 the Bible Society of Abo was again in active operation, and new editions of the entire Bible, as well as of the New Test., left the press. Apart from the Finnish edition printed at Abo, the St. Petersburg Society undertook some editions for the purpose of supplying the Finns in their own neighborhood. The New Test. was printed in 1814 and again in 1822, and the entire Bible was completed in 1817. Many large editions of the Scriptures have subsequently been issued by the joint agency of the Finnish and the British and Foreign Bible societies. According to the latest report for 1878, the former society

had issued since its formation 239,273, and the latter 409,743 copies of the Holy Scriptures.

11. *French*.

12. *Georgian*. By way of supplement we will add that in 1876 the British and Foreign Bible Society decided to print an edition of the Four Gospels, the work being done at Tiflis.

13. *German*.

14. *Greek*.

15. *Hebrew New Testament*.

16. *Italian*.

17. *Judæo-Arabic*.

18. *Judæo-German*.

19. *Judæo-Persic*.

20. *Judæo-Polish* is a language spoken by the Polish Jews, consisting principally of Old German with a mixture of Hebraisms; or at least phrases peculiar to the Jews, with very little Polish in it. In 1820 a translation of the New Test. into this language was undertaken by the London Society for Promoting Christianity among the Jews. An edition was published in 1821 by the British and Foreign Bible Society, the characters being the so-called Rabinic. A new edition in the Hebrew square letters was published by the London society in 1829, while in 1872 the British and Foreign Bible Society undertook a new edition in the pointed Hebrew characters, edited by F. Herndon, which was completed in 1878.

21. *Kalmuckian*. For the Kalmucks near the mouth of the Volga, Mr. Neitz, a missionary of the Moravian Brethren, at the beginning of this century undertook the work of translation, which was continued by Dr. Schmidt, whose version of St. Matthew was printed at St. Petersburg at the expense of the British and Foreign Bible Society. This is the only part which has been translated.

22. *Karatle-Tartar*.

23. *Karelian* is the language of a people dwelling in the government of Tver, in European Russia. As early as the 12th century they joined the Church of Rome, but in a bull published March 14, 1351, by Clement IV, we are told that they were obliged to join the Greek Church, to which they still belong. In 1820 the Russian Bible Society published the Gospel according to St. Matthew for the benefit of this tribe in the modern Russian characters.

24. *Kirghisian*. The Kirghise, belonging to the Tartaric tribes, are the most numerous, their number being given as about 1,500,000. At the expense of the Russian Bible Society at Astrachan, the New Test. was translated in 1818 by Mr. Charles Frazer, a Scottish missionary. Since this mission was abandoned, nothing has been done for the circulation of the Word of God among this people.

25. *Kurdish*. See SLAVONIC VERSIONS.

26. *Lappnese*.

27. *Latin*.

28. *Lettish*

29. *Lithuanian*

30. *Manchû*.

31. *Mordvinian*. The Mordvins occupy a locality lower down the Volga, and their number is, on good authority, supposed to approach 400,000. They are divided into two tribes—the Mokshans and Ersans. The Russian Bible Society translated the New Test. into their language, but the dissolution of that society brought the work to a termination.

32. *Olonetzian*, which is a sub-dialect of Karelian, had a small portion of the Scriptures translated into that dialect. A specimen of this translation was sent in 1820 to Tver to be compared with the dialect spoken in that government, but the suspension of the Russian Bible Society arrested the progress of this undertaking.

33. *Ostjakian* is a dialect spoken by one of the most numerous tribes in Siberia. A translation of the Gospel of St. Matthew into this vernacular exists in a collection at London, prepared at the expense of prince Lucien Bonaparte.

34. *Ossitinian* is the language spoken by the Ossetes, who inhabit the central part of Caucasus, north of Georgia. In 1752 Russian priests established a mission among them, and in 1821 upwards of 30,000 Ossetes had joined the Greek Church. Among the converts was also a nobleman of the name of Jalguside, who, being anxious to provide his countrymen with a version of the Scriptures in their own tongue, proposed to the committee of the Russian Bible Society to prepare a translation of the gospels in the Ossitinian dialect. The proposition was accepted, and in 1824 the work was ordered to be put to press. While the printing was going on, the Russian Bible Society was suspended, and thus the work was discontinued. Forty years later a new translation of the gospels was prepared at Tiflis.

35. *Permian*. The Permians, occupying the seat of the ancient Bjarmaland, are divided into three divisions—the Permians proper, composed of about 50,000 souls, partially Christianized, but without the Scriptures in their language except the Gospel of St. Matthew, which had been executed for prince Louis Lucien Bonaparte, not with a view to circulation, but to aid linguistic studies. The Sirenian and Wotjak will be mentioned in the proper place.

36. *Persian*.

37. *Polish*. See SLAVONIC VERSIONS.

38. *Roumanian*.

39. *Russian*.

40. *Samogitian*.

41. *Slavonic*.

42. *Servian*.

43. *Sirenian*. This dialect is spoken by the Sirenians, another section of the Permians; their number is about 70,000. The Russian Bible Society translated the Gospel of St. Matthew into their language, of which 1400 copies were printed in 1823.

44. *Swedish*. See SCANDINAVIAN VERSIONS.

45. *Syriac in Hebrew Characters*.

46. *Transcaucasian Tartar*.

47. *Tcheremissian* is a dialect spoken by a people dwelling along the banks of the Volga and Kama, in the governments of Kazan and Simbirsk. The complete New Test. appeared in the Tcheremissian language in 1820, being printed at the expense of the Russian Bible Society during the reign of the emperor Alexander. While the work was in progress, the archbishop of Kazan collected a number of the people and read to them from one of the books of the New Test. to ascertain whether it was intelligible to them. The people wept aloud for joy that they had received the Word of Jesus in their own tongue. An edition of 3000 copies was printed, but the dissolution of the Russian Bible Society that followed brought the work to a termination.

48. *Tchuvashian* is spoken by a people inhabiting both sides of the Volga, numbering about 670,000 individuals, partially Christianized. In 1817 an attempt was made by the Russian Bible Society at Simbirsk to translate the New Test. In 1818 the Four Gospels were translated, and two years later the entire Test., under the care of the archbishop of Kazan, to whose diocese the people belong. The edition, consisting of 5000 copies, was printed in Russian characters.

49. *Vogulian* is spoken in the governments of Perm and Tobolsk, in a district between the Tobol, the Bereasov, the Obi, and the Uralian Mountains. A translation of the Gospel of St. Matthew into Vogulian is contained in the collection of prince Lucien Bonaparte.

50. *Wotjakian*. The third section of the Permian race consists of the Wotjaks, about 200,000, located in the Upper Kama, and generally Christianized. In 1820, Lewandowski, a learned Wotjak, commenced a translation of the New Test. The Russian Bible Society encouraged him to continue; and thus under the care and inspection of the Viatska Branch Bible Society, the gospels of SS. Matthew and Mark were completed during the year 1823. From the first sheets of these gospels some portions were read in their churches, and it is related that the people demanded to hear more, but a change came; the Russian society became extinct, and all its printing operations were necessarily suspended.

Besides the *Annual Reports of the British and Foreign Bible Society*, see *The Bible of Every Land*, but especially Dalton, *Das Gebet des Herrn in den Sprachen Russlands* (St. Petersburg, 1870). (B. P.)

Russian Sects. Religious sects abound in Russia, and under the most absolute monarchy in Europe we have the singular phenomenon of large bodies of dissenters defying the sovereign's power, and living in open secession from the National Church. All of these sects are included under the general name of Raskolniks (q. v.), i. e. *Schismatics*. The Raskolniks are divided into two great branches, the Popofschins and the Bezpopofschins, the former having priests and the latter none. (For much of the following article we are indebted to the Rev. F. W. Flocken, missionary to Bulgaria.)

I. The **POPOFTCHINS** are divided into five principal sects.

1. The *Diaconofschins*. This sect was started in 1706 at Veska, under the leadership of Alexander the Deacon, from whom it takes its name.

2. The *Epefyanofschins* (q. v.).

3. The *Peremayanofschins* (q. v.).

4. The *Starovertzis* (men of the ancient faith) is the name assumed by the majority of those who refused to acquiesce in the reforms introduced in the 17th century, especially the revision of the Scriptures and the liturgical books effected by the patriarch Nikon (A.D. 1654). The following are the points which, they strenuously maintain, justify their separation from the National Church: *a*. The service should be according to the old books before their alteration by Nikon. *b*. In the Creed the article on the Holy Ghost should read, "And in the Holy Ghost, the true and living Lord." *c*. The Hallelujah should be sung only twice,

not three times; after the second adding "Glory to God." *d.* The processions around the churches should go with the course of the sun, and not against it. *e.* That the sign of the cross should be made by uniting the fourth and fifth fingers, and not the first three fingers, with the thumb. *f.* To acknowledge, respect, and adore only the eight-ended cross. *g.* The name of Jesus is to be written and pronounced Isus, and not Jesus.

There were other and still smaller points of dispute,

and the tendency to fanaticism so universally found in Russian dissent did not fail to appear among them. They were persecuted under Peter I (A.D. 1689-1725), who laid double taxes on them; but his successors, especially Catharine II and Alexander I, have adopted a milder policy with the hope of winning them back to the Eastern Church. But little success has attended these attempts at reconciliation.

5. *Tchernolutsi*, or *Wjetkaers*, an insignificant body who, during the time of the persecution (A.D. 1730),

Eight-ended Cross of the Raskolniks.

This cross is by all the different Russian Raskolniks considered the only true Christian cross; while by them the four-ended one is considered and declared to be an innovation made by the patriarch Nikon, and consequently anti-Christian.

1. Represents the impression said to have been made by Jesus Christ upon a wet cloth, and by Ananias sent to king Abgarus of Edessa.

2. The letters in it stand for and signify: *ω* for *α* *nebo shedshi*, "from heaven descended;" *ο* for *ο* *ne prinjali*, "they did not receive him;" *и* for *na kreste raspiati*, "on the cross outstretched him."

3. The writing under it is in Old Slavie, and reads *obraz nerukotworennii*, signifying "image not made by hand."

4. Reads *Angeli Gospodni*, signifying "Angels of the Lord."

5. "Zar slavi," "Lord of Glory."

6. "Isus Kristus," "Jesus Christ."

7. "Sin Boshii," "Son of God."

8. "Slnce," "Sun."

9. "Luna," "Moon."

10. "Chresu twoemu poklonenusa wladiko i swetloe woskresenie twoe

slawim, signifying "To thine cross do we bow, Lord, and thy luminous resurrection do we glorify."

11. Reads *Kopie*, signifying "Spear."

12. "Traw," "Hyssop."

13. "Na kreste iskupil krowis Adama," signifying "On the cross redeemed with blood of Adam."

14. "Mesto lobnoe," signifying "Place of skull."

15. "Raspiat Bog," "Crucified God."

16. "Gora Golgotha," "Mount Golgotha."

17. "Glawa Adama," "Head of Adam."

18. The tree of which it is said that it was pointed out to Seth by the archangel Michael, in answer to his prayer for his father Adam (Gospel of Nicodemus, ch. xiv).

19. Reads *Svjataja Maria Magdalena*, signifying "St. Mary Magdalene."

20. "Miter Tawos," "Mother of God."

21. "Svjatoi Joann Bogolow," "St. John the Theologian."

22. "Svjatoi Login Soznic," "St. Logan the Centurion."

* The three little stars signify the perpetual virginity.

A Popofschin Teacher.

took refuge on the islands of the Wjetka, a small river between Russia and Poland, whence their name. Here they formed a separate community and built two monasteries, from which, fifty years later, some of them migrated to Poland and built a church and convent at Tchernoboltz. Their chief distinguishing practices are a refusal to take oaths and to offer prayers for the emperor.

II. The BEZPOPOFTCHINS, as we have said, are dissenters who refuse to have priests, the sacraments being administered and services conducted by lay elders. They recognise no priestly hierarchy, and dislike the national bishops and priests so much that when any

A Popofschin Monk at Home.

A Popofschin Monk in Travelling-dress.

one of these enters their houses they hasten, as soon as he leaves, to wash the seats and walls. They believe that the Church is in a period of decline and apostasy, that the apostolic succession has been interrupted, and that legitimate priests are now impossible. They hold that the world has had four æras: a spring, or morning, from Adam until the building of Solomon's Temple; a summer, or noon, lasting until the birth of Christ; an autumn, or evening, until the appearance of Antichrist, about 1650; and now the cold winter, the dark night, which will continue until the Lord shall descend upon earth to save men. The Bezpopofschins are divided up into very many sects, some of them holding opinions exceedingly absurd. The three principal of these sects are the following:

A Popofschin Nun.

1. *The Pomoryans*.—The founder of this sect was a runaway deacon of the name of Danilo Wiculin. In the year 1695 he founded a monastery on the borders of the Viga, of which for forty years he was the prior, and died in 1735. In the erection of the monastery and in its leadership he was assisted by Andrei Mishtezky, who was of princely origin, and occupied his post until his end, in 1736. Soon after this a monastery for females was organized, of which Salomonina, the sister of Mishtezky, became prioress. The monasteries soon amassed wealth, and were thereby enabled to procure a large library of old Slavic manuscripts, and composed books for the education of singers, writers, painters, and the future leaders of the sect. At the end of the past century these monasteries contained 2000 male and 1000 female inmates. Andrei and Simion Denisow have written several works for the sect, and in general defence of the Raskolniks, of which the *Pomoryan Answers to the Questions of Nerfit* is the principal.

The teachings of the Pomoryans, also called Danilowitchina, consist in the following: *a.* From the time of Nikon, the Antichrist has been reigning, though unseen, in the orthodox Church, and has abolished the true sacraments and priesthood. *b.* Those from the orthodox Church who wish to join the Pomoryans must receive rebaptism, which, like other sacraments, can, in consequence of the fall of the true priesthood, be administered by laymen, and even by females. *c.* As there is no true priesthood, there is no one to solemnize marriages, therefore all are obliged to live in the unmarried state, and those married in the Church must separate. *d.* Monks from the orthodox Church can be acknowledged as such after having been rebaptized, and they may install others in that state and be permitted to serve as priests, even if they have not been such before. *e.* For those in authority no prayers are to be offered. During the reign of Anna Ivanova one of the Pomoryans reported this to the authorities; then, to avoid difficulties with the government, they introduced a prayer for the czar, which they have used ever since. *f.* The crosses not to have the inscription "I. N. R. I.," because this is a Latin heresy, but to have the initial letters of these words: *Zar Slavy Isus Christos Sin Boshii*, "Lord of Glory, Jesus Christ, Son of God," as it had been to the time of Nikon. *g.* The food bought in the market is

not to be considered unclean. *h.* To be ready for suicide by fire for the true faith.

2. *The Fedosejftchins*.—This is the second of the principal sects of the Bezpopofschins, which spread with the same rapidity in another part of the country. The principal promoter of it was a deacon by the name of Fedosei, a contemporary of Danilo Wiculin. Having removed with his family to Poland, he gathered around him in a short time a number of Raskolnik fugitives from Russia, and founded two abodes, one for males and the other for females, among whom he acted as priest. He agreed in all points with the Pomoryans, except two, viz.: *a.* The inscription of "I. N. R. I." is to be retained upon the cross. *b.* The food bought in the markets must be purified by prayer and adoration. These two points gave rise to the sect. The efforts of the Pomoryans to form a union with the Fedosejftchins proved unsuccessful, and an open enmity between the two began, which increased just as soon as the Pomoryans commenced to pray for the czar. In the year 1771 they succeeded, at Moscow, in founding a cenobitical establishment, known as the Preobrashensky Cemetery, which became the principal centre of the sect. The originator, and for thirty-eight years the head of this institution, was Elijah Alexejew Kowilin, a dealer in bricks and wines. During the pestilence at Moscow in 1771, when all the poor workmen who had been there commenced to leave the town to return to their native places, and in that way carried the sickness to all parts of the country, Kowilin, with another merchant, Zenkoff, applied for permission to establish, at their expense, a quarantine on one of the principal roads leading from the city, and with it to connect a cemetery for the burial of those that died. Having received the permission, they established a barrier and building for the purpose proposed. He, with others, fed the hungry, nursed the sick, and comforted the dying. The news of the comfort provided by Kowilin spread very rapidly, and, besides the hungry and sick, the people *en masse* took refuge with him. He, on the other hand, did all he could to instil into the minds of the refugees that this woe from hunger and pestilence was sent upon Moscow by God as a just punishment for the Wikonian heresy, and exhorted them to repent and turn to God. The people, seeing that those dying as orthodox were

A Pomoryan Teacher.

A Fedosejftchin Teacher.

just thrown into a cart and hurled off, while those under Kowilin's care were provided with all the necessities of life, the sacraments in the last hours, and when dead were given a Christian funeral, chose, between the two, the latter, and submitted *en masse* to rebaptism and the conditions of Kowilin. At the same time, they turned over to Kowilin all their movable and real property. When the pestilence ceased, he retained many of his adherents and formed a kind of monastery, which, at the commencement of the present century, contained 1500 persons of both sexes. The sect numbered nearly 10,000 members at Moscow. To perpetuate the institution, he petitioned for assistants under the name of trustees, who were selected from among the members, and were of the richest merchants. The news of the wealth and good order of this establishment and the concern of Kowilin for the good of the Fedosejofschins raised him in the eyes of the sect in other parts of the land, which by degrees placed all their communities under his protection and made them dependent upon the Preobrashensky Cemetery institution, from which they all began to get their leaders and singers, and bought all their books and *ikonas*, and to which they continued to send their annual contributions.

3. *The Philippofschins*.—Besides the general doctrines of the Bezpopofschins, the Philippofschins hold: *a*. That only the eight-ended cross without inscription is to be venerated. *b*. Only the *ikonas* according to the old style, and painted by themselves, are to be worshipped. *c*. No prayers are to be offered for the czar. *d*. Man and wife are to be separated after having been rebaptized. *e*. Suicide by fire or hunger is martyrdom for the true faith. This last point explains why the Philippofschins are sometimes also called Samososhigately (Self-burners) and Morelshtchiky (Starvationists). Even Philip and a number of his followers burned themselves by setting fire to their monastery and remaining in it. See PHILIPPINS.

4. Among the *minor sects* are:

(1.) *The Pastushkoe, or Adamantowa*.—The originator of this sect was a herdsman of Denisow, Adam by name. Pastush, in Russian, means herdsman; and this his calling, combined with his name, forms the name of the sect. He censured the Philippins because of their passion for suicide, the Pomoryans on account of their aversion to eat and drink with others; and taught that it was sinful to walk on paved streets, to handle money, and possess passports, because the first is an invention of the Antichrist, and the last two bear the seal and imprint of the same.

(2.) *The Spasova, or Kusmintchin*.—Its founder was Kusma, an illiterate peasant, and his doctrine was called Netovtchina (a word derived from the Russian word *net*, which means "there is not"), and is used in this form to show that he held that since the time of the correction of the books, and with them the prayers and faith in the orthodox Church, the Antichrist is reigning, and, consequently, "there is no" grace, no sanctity, no sacraments. He taught that there is nothing holy remaining in the world, and that salvation is to be obtained only through the "Spassa," which is the Slavic word for the Russian *Spassitel*, meaning "Saviour." His followers do not rebaptize those that join them, nor do they always baptize their own children, believing that the "Spassa" can save them without it. The marriage-tie, where or whenever performed, is with them considered indissoluble; but, with the approach of age, they are forbidden to make use of its rites. They worship only their own *ikonas* and crosses, which they always carry with them, and which, therefore, are small and made to fold together. This sect is principally to be found in the districts of Nishgorod.

(3.) *The Detoubeitchins (Infanticides)*.—This sect consider it a great misfortune for children to come under the influence of Antichrist (the established Church), and believe it to be the best offering they can make to God

to deliver them from this calamity—by death, if necessary. They do not hesitate, therefore, to commit the crime of infanticide.

(4.) *The Beguny (Deserters), or Stranniky (Wanderers)*.—This sect originated about 1790, in the village of Sopel, district of Jaroslav, from which it is sometimes called Sopelniki. Its founder was Deserter Efimy, who, after having been rebaptized, settled in said village and taught that the Antichrist had ascended his throne long ago: first, one thousand years after Christ he invisibly reigned in the Greek empire under the Greek name of *Appolyen*,* as intimated by John in the Revelation; then, after the lapse of 666 years, which letters compose his name, he appeared in Russia, not yet as czar, but as a false prophet, as stated in the Revelation by John. And this first beast and false prophet was the patriarch Nikon, for he was the first to blaspheme against God by changing the name of *Isus* into *Jesus*,† and, like a beast, persecuted the worshippers of the true Isus; and that he really was the beast spoken of in the Apocalypse is seen from his real or lay name, Nikita, in Greek Νικήτιος,‡ which gives the number 666. After his fall, there appeared the third Antichrist, or the second beast with the two horns, which signify the two imperial names, czar and emperor, the last of which, in Greek, is Ἰεράτορ,§ and also gives the number 666. In this trinity the members of the orthodox Church are baptized and marked with the sign of the cross by three fingers instead of by the two first, as it was of old. To escape eternal punishment, it is necessary, first to wash off this sign and mark by rebaptism, and then flee from every city and village which forms part of this Babel of Antichrist.

(5.) *The Isbraniki, or "Company of the Elect"*.—The cause of the separation of this sect from the Russian Church was not any difference of doctrine or ritual, but a desire to protest against the laxity and inclination to change displayed by the clergy, and to adopt a greater piety and purity of life. They were termed by the orthodox party Roscholschiki (Seditionists). Pinkerton (*On Russian Sects*) identifies them with the Staroverzi.

(6.) *The Bezlovestni* (the dumb), the name given to a not very numerous sect of the 18th century, whose members, after conversion, became perpetually speechless. Very little is known of their tenets.

(7.) *The Istmiye Christianse*. See MALAKANS.

(8.) *The Karabliki*. See No. (18) below.

(9.) *The Khlistie, or Flagellants*.

(10.) *The Malakans* (q. v.).

(11.) *The Martinists* (q. v.).

(12.) *The Moreshiki*.

(13.) *The Netovtshins* (q. v.).

(14.) *The Nicomians* (q. v.).

(15.) *The Njetouschitchini*. See NETOVTSCHINS.

(16.) *The Roscholschiki* (q. v.).

(17.) *The Sabatniki* (q. v.).

(18.) *The Skoptzi* (eunuchs), a name given to this sect because of their practice of self-mutilation, which they supposed to be warranted by Scripture (Matt. xix, 12). The general characteristics of this sect, even among those who do not adopt this extreme course of action, is one of self-mortification and asceticism. They perform self-imposed penances, such as flagellation, wearing hair-cloth shirts, and iron chains and crosses. They profess great respect for Peter III, of whom they keep pictures in their houses, in which he is represented with a scarlet handkerchief tied round his right knee (which is supposed to be one of their Masonic signs). They expect him to revisit the earth as the true Messiah, and, having rung the great bell of the Church of the Ascen-

* The word is rendered Ἀπολλύειν, while it ought to be Ἀπολλύων; the first is equal to 666, the second to 1461.

† Before Nikon's time the two vowels in the word *Jeshua* were left out, so it read *Isus*.

‡ The word is rendered Νικήτιος, equal to 666; while it ought to be Νικήτας, equal to 587.

§ The word is rendered Ἰεράτορ, equal to 666; while it ought to be Ἰμπεράτορ, equal to 706.

Religious Exercise of one of the Skoptzi.

sion in Moscow, to summon the elect, and reign over all the true Skoptzi. They are noted for their anxiety to procure converts, and he who gains twelve is dignified with the title of apostle. Their chief peculiarities of practice and doctrine are the rejection of the resurrection of the body, a refusal to observe Sunday, and the substitution of certain rites invented by themselves in lieu of the sacrament of the eucharist. They are a numerous sect in some governments, as that of Orel, comprising whole villages, and they have many adherents among the jewellers and goldsmiths of St. Petersburg, Moscow, and other large towns.

(19.) *The Strigolniks.* This sect arose in Novgorod at the close of the 14th or early in the 15th century. A Jew named Horie, joined by two Christian priests, Denis and Alexie, and afterwards by an excommunicated deacon named Karp Strigolnik, preached a mixture of Judaism and Christianity, and gained so many followers that a national council was called to suppress him. They regard the payment of money by the clergy to the bishops on ordination as simoniacal, and confession to a priest as unscriptural. Strigolnik himself was thrown into the river and drowned during a riot in Novgorod, but the opposition of his followers to the Russian Church continued for many years after his death.

(20.) *The Wjetkaers.*

(21.) *The Yedinovertzi* (Coreligionists). This name was given to some members of the Starovertzi in the reign of Alexander (1801–25), when strong hopes were entertained of regaining them to the orthodox communion. They assume for themselves the name of *Blagoslovenni*, or “The Blessed.”

For literature, see Dimitri, *Hist. of Russian Sects*; Farlati, *Ilyricum Sacrum*; Grégoire, *Hist. des Sectes Religieuses* (Paris, 1814), vol. iv; Haxthausen, *Studien über Russland* (Han. 1847); Krazinski, *Lectures on Slavonia* (Lond. 1869); Mouravieff, *Hist. of the Church of Russia* (ibid. 1842); Platon, *Present State of the Greek Church in Russia* (Pinkerton's transl. Edinb. 1814; N. Y. 1815); Strahl, *Gesch. der Gründung, etc., der christlichen Lehre in Russland*, etc. (Halle, 1830). See RUSSIA.

RUSSIAN VERSION OF THE SCRIPTURES. The Russian language, which is understood from Archangel to Astrakhan, admits of but two principal divisions, namely, Great Russian—the literary and official language of the nation, spoken in Moscow and the northern parts of the empire—and Little, or Malo, Russian, which contains

many obsolete forms of expression, and is predominant in the south of European Russia, especially towards the east. To this may be added the White, or Polish, Russian, spoken by the common people in parts of Lithuania and in White Russia. The earliest Russian version of the Scriptures was written in White Russian, and in 1517 parts of the Old Test. were printed at Prague, while the Acts and the Epistles appeared at Wilna in 1527. The translator is said to have been Fr. Skorina. At the close of the 17th century another attempt was made to produce a version of the Scriptures in the Great Russian. The promoter of this version was the Lutheran pastor Ernest Glück, of Livonia, who made it from the Old Slavonic text. Unhappily, at the siege of Marienburg, in 1702, the whole of Glück's

MSS. were destroyed. In the year 1816 the Russian Bible Society laid before the emperor Alexander some copies of a new version, and he was much struck at perceiving that, while so many barbarous tribes had been thus put in possession of the oracles of God, “his own Russians still remained destitute of the boon mercifully designed to be freely communicated to all.” At his instigation an order was immediately forwarded through the president of the society to the Holy Synod, enjoining the translation of the New Test. into modern Russ. Under the auspices of the Religious Academy of St. Petersburg, the work was undertaken by the archimandrite Philaret, and, after three years had been devoted to the undertaking, an edition of the Four Gospels was struck off, in parallel columns with the Slavonic text. The preface to the Gospels, which appeared in 1819, was signed by Philaret, Michael, metropolitan of Novgorod, and Seraphim of Moscow. The demand for this work was such that in 1820 the fourth edition of the Gospels was published; in the same year the second edition of the Acts was printed, while the first edition of the entire New Test. did not appear till 1823. As to the order of the books of the New Test., which were reprinted and published by Tauchnitz, of Leipsic, in 1838, and again in London in 1862, it is as follows: Matthew, Mark, Luke, John, Acts; the epistles of James, Peter, John, and Jude; Romans, Philemon, Hebrews, Revelation.

Of the Old Test., only the Psalms were translated by the Rev. Dr. Pavsky, of the Cathedral of St. Petersburg, the first Hebrew scholar in the empire. The first edition appeared in 1822, and consisted of 15,000 copies; yet so great was the demand that within the space of two years no less than 100,000 copies left the press. In 1853 Mr. Tauchnitz, of Leipsic, published an edition in Hebrew and Russian. The edition before us, in Russ alone, was published at London in 1862, and we notice that the word “Selah” is always put in brackets; that the number of verses in the different psalms does not agree with the English, but with the Hebrew, as the superscriptions, which are found in the English Bible in small type, are counted as a verse; Psa. ix and x are translated according to the Sept. as one, and thus, e. g., the xviiith is the xviith Psalm; the cxlviiith Psalm of the Hebrew is divided, as in the Sept., into two—cxlvi, from 1–11, and cxlvii, from 12–20—and thus the usual number of 150 psalms is gained. The translation of the other books of the Old Test. from the

Hebrew proceeded under the direction of the religious academies of St. Petersburg, Moscow, and Kief; and an edition to consist of 10,000 copies of the Pentateuch and the books of Joshua, Judges, and Ruth, was subsequently undertaken; but in 1826 the Russian Bible Society was suspended by the ukase of the emperor Nicholas. A new translation has of late been issued by the Holy Synod, while the British and Foreign Bible Society also published a version, which is largely circulated in Russia. See *The Bible of Every Land*, p. 296 sq.; Dalton, *Das Gebet des Herrn in den Sprachen Russlands*, p. 37 sq.; Reuss, *Geschichte der heiligen Schriften des Neuen Testaments* (Brunswick, 1874), § 490; also the *Annual Reports of the British and Foreign Bible Society*. (B. P.)

Russniaks (also **RUSSINE** and **RUTHENI**), the name of a variety of peoples who form a branch of the great Slavic race, and are sharply distinguished from the Muscovites, or Russians proper, by their language and the entire character of their life. They are divided into the Russniaks of Galicia, North Hungary, Podolia, Volhynia, and Lithuania, and are estimated by Schafarik at 13,000,000. They are almost all agriculturists, and, on the whole, rather uncultivated. Before the 17th century they were a free race, but were then subjugated, partly by the Lithuanians, partly by the Poles, and for a long time belonged to the Polish kingdom. Their language has consequently become closely assimilated to the Polish. In earlier times it was a written speech with quite distinctive characteristics, as may be seen from the translation of the Bible published at Ostrog in 1581, and from various statutes and other literary monuments still extant. Recently, printing in the Russniak tongue has been recommenced. The Russniaks belong, for the most part, to the United Greek Church, but in part also to the Non-united. They preserve many old customs peculiar to themselves, and much folk-lore, prose and poetic, very like that current in Poland and Servia. This has been collected by Vaclav in his *Piesni Polskie i Ruskie* (Lemberg, 1833). Levicki has published a *Grammatik der russinischen Sprache für Deutsche* (Przemysl, 1833).

Russo-Greek Church is the community of Christians subject to the emperor of Russia, using the Slavonic liturgy and following the Russian rite. See **GREEK CHURCH**.

1. *Origin*.—The early history of the Russian Church is involved in much obscurity; but that Christianity was introduced into Russia previous to the middle of the 9th century must be inferred from a letter of Photius (866) in which he says that the people called Russians had forsaken idolatry, received Christianity, and allowed a bishop to be placed over them (*Epistole*, ed. Montcaut, p. 58). Its diffusion, however, was very limited. The princess Olga was baptized about the middle of the 10th century, but by no means succeeded in winning over her son Swätoslav and her people to Christianity. Nor was it till the alliance of Vladimir with the court of Byzantium by his marriage with Anne, sister of the emperor Basil II, and his baptism in 988 (when he took the name of Wassily, or Basil), that the foundation of Christianity can be said to have been regularly laid in Russia. He issued an edict for the destruction of idols and idol temples throughout his dominions; and his subjects were commanded to receive baptism, which they did in very large numbers. Churches were built in all directions, the first of them being dedicated by Vladimir himself. Yaroslav, the next Russian monarch, built convents which he filled with Greek scholars and artists, and many works were translated from Greek into the Slavonic dialects.

2. *Government*.—At first the Russian Church was under the jurisdiction of Rome, and it seems that as late as the Council of Florence (1439) the adherents of the Roman Church throughout Russia were as numerous

as those of the Greek party. Its complete separation from Rome was effected by an archbishop of Kief, named Photius, in the latter part of the same century. For more than a century it continued directly subject to the patriarch of Constantinople; but in 1588 the patriarch Jeremias, being in Russia, held a synod of the Russian bishops and erected the see of Moscow into a patriarchate with jurisdiction over the entire territory. He was also induced in 1589 to consecrate Job, archbishop of Rostov, the first patriarch. This action was afterwards confirmed by a synod held at Constantinople; but, as their junior, the patriarch of Moscow ranked after the patriarchs of Alexandria, Antioch, Jerusalem, and Constantinople. This subordination was acquiesced in until the reign of Alexis Michaelowitz, when the patriarch of Moscow, Nikon, refused to acknowledge it further. When Peter the Great became ruler, he saw that his government was, in fact, divided with the clergy and the patriarch. Upon the death of Adrian, in 1700, when the bishops were assembled to choose his successor, Peter entered and broke up the meeting, declaring himself patriarch of the Russian Church. To wean the clergy by degrees from their established rights, he kept the office open for upwards of twenty years, and abolished it in 1721. The permanent administration of Church affairs was placed under the direction of a council, called the "Holy Synod," or "Permanent Synod," consisting of archbishop, bishops, and archimandrites, all named by the emperor.

3. *Constitution*.—Under the direction of this council, a series of official acts and formularies, and catechetical, doctrinal, and disciplinary treatises, was drawn up, by which the whole scheme of the doctrine, discipline, and Church government of the Russian Church was settled in detail, and to which all the clergy, officials, and dignitaries are required to subscribe. The leading principle of this constitution is the absolute supremacy of the czar, and it has been maintained in substance to the present time. The Holy Synod is considered as one of the great departments of the government, the minister of public worship being *ex officio* a member. This code was enacted in 1551 and received the name of *Stoglar*, or a hundred chapters.

4. *Doctrine*.—As regards doctrine, the Russian Church may be considered as identical with the common body of the Greek Church (q.v.). With that Church it rejects the supremacy of the pope and the double procession of the Holy Ghost. All the great leading characteristics of its discipline, too, are the same; the differences of ceremony being too minute to permit our entering into detail. The discipline as to the marriage of the clergy is the same as that described for the Greek Church; and in carrying out the law which enforces celibacy upon bishops the Russians adopt the same expedient with the Greeks, viz. of selecting the bishops from among the monks, who are celibates by virtue of their vow.

5. *Liturgy*.—The service of the Russian Church was, at its commencement, borrowed from the Greek Church, according to the books translated by Cyril and Methodius into the Slavic, which to this day is the language of the Church. They translated, however, only the most necessary books, the others being translated into Russian since the time of Yaroslav I. In them were found many mistakes which Cyprian and Photius labored to correct; but, as the metropolitans who succeeded them were Russians, and not well versed in the Greek language, errors again crowded in. Maksim, a monk, was called from Athos in 1506 and ordered to revise the Church books, and soon discovered that, by the numerous errors of translation, even the articles of the Creed had been changed in meaning. His work displeasing some, they brought false charges against him, and he was sent to a monastery, deprived of the sacraments, and, after thirty years of suffering, died in 1556. When Nikon became patriarch, he undertook the cor-

rection of the books, and sent to the East the monk Arseny Suchanow for the purpose of collecting ancient Greek and Slavic MSS. This resulted in the correction of the Scriptures and the introduction of the corrected version in the place of the old ones. The Church service itself underwent no change except the addition of some holy days in honor of new saints.

6. *Clergy*.—There are three ranks of episcopacy in the Church—metropolitans, archbishops, and bishops, who each have a peculiar dress. These three classes are called by the general name of *archierei*, or prelates; next to them in degree are the *archimandrites* and *hegoumeni*, or abbots and priors of the monasteries; and last and lowest of all are the monks, who have been either ordained for the priestly office, for the second degree, or

Muscovite Bishop.

diaconate, or are mere lay brothers without having taken the vow. The clergy are divided into two classes, regular and secular. The first are alone entitled to the highest dignities of the Church, are ordained under much stricter vows than the others, and are termed the black clergy from their wearing a black robe. The secular clergy have a brown and blue robe, and are termed the white clergy. Although special provision was made for the Roman Catholics in Poland by the erection of an archbishopric in communion with Rome at Mohilev in 1783, and still later arrangements, yet the whole policy of the Russian government is opposed to the free exercise of worship by its subjects. According to the *Statistical Year-book of the Russian Empire* for 1871, the orthodox adherents of the Russian Church exceeded 53,000,000, the clergy of all ranks numbering about 215,000. Religious sects abound, who all go by the general name of Raskolniks (q. v.). See King, *Travels in Russia*; Krazinski, *Religious History of the Slavonic Nations*; Mouravieff, *History of the Church in Russia*; Ricaut, *History of Greek and Armenian Churches* (1694). See RUSSIA.

Rust (*βρῶσις*, *iōc*) occurs as the translation of two different Greek words in Matt. vi, 19, 20 and James v, 3. In the former passage the word *βρῶσις*, which is joined with *σῆς*, "moth," has by some been understood to denote the larva of some moth injurious to corn, as the *Tineæ granella* (see Stainton, *Insecta*

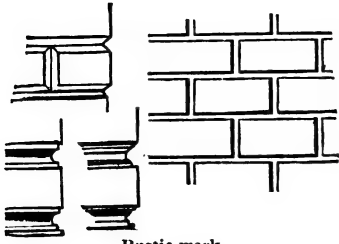

Britan. iii, 30). The Hebrew *שֶׁן* (Isa. l, 9) is rendered *βρῶσις* by Aquila (comp. also *Epist. Jerem.* v, 12, *ἀπὸ τοῦ καὶ βρωμάτων*, "from rust and moths;" A. V. Bar. vi, 12). Scultetus (*Exerc. Evang.* ii, 35; *Crit. Sac.* vol. vi) believes that the words *σῆς καὶ βρῶσις* are a heptadys for *σῆς βρώσκων*. The word can scarcely be taken to signify "rust," for which there is another term, *iōc*, which is used by James to express rather the "tarnish" which overspreads silver than "rust," by which name we now understand "oxide of iron." *βρῶσις* is no doubt intended to have reference, in a general sense, to any corrupting and destroying substance that may attack treasures of any kind which have long been suffered to remain undisturbed. The allusion of James is to the corroding nature of *iōc* on metals. Scultetus correctly observes, "*Æruginē deformantur quidem, sed non corrumpuntur nummi*," but though this is, strictly speaking, true, the ancients, just as ourselves in common parlance, spoke of the corroding nature of "rust" (comp. Hammond, *Annotat.* in Matt. vi, 19).—Smith. Moreover, various writers agree that the gold and silver coins of antiquity were much more liable to corrosion than those of the present, being much more extensively adulterated with alloys.

The word translated "scum" (*חֶלְאָה*, *chelāh*) in Ezek. xxiv, 6, 11, 12 means the rust or corrosion of the pot of brass (or rather copper) which typified Jerusalem. Copper is more liable to corrosion than the other metals, each of which has its own dissolvent; but copper is acted upon by all those solvents, and the corrosion of the copper pot symbolizes the aptitude of Jerusalem to corruptions, which, being shown by Ezekiel to be removed only by the agency of fire, was a type of the awful punishments and fiery purgation awaiting Jerusalem.

Rust, George, a learned English divine, was a native of Cambridge, and educated at Christ's College. On the Restoration, Jeremy Taylor, foreseeing the vacancy in the deanery of Connor, in Ireland, sent to Cambridge to secure a man suitable for that position. Dr. Rust was chosen, and he landed at Dublin about August, 1661. He was preferred to the deanery as soon as it was void, and in 1662 to the rectory of the island of Magee. The bishop dying (Aug. 13, 1667), the bishopric was divided, and Dr. Rust became bishop of Down, which position he held until his death, in December, 1670. He wrote, *A Letter of Resolution concerning Origen*, etc. (Lond. 1661, 4to):—*Discourse of Truth*:—besides several *Sermons*.

Rust, Isaac, a German doctor of theology and member of the consistory in Speyer, was born in 1796 at Mussbach, in Bavaria. In 1820 he was minister in Ungstein, in 1827 he was appointed minister of the French Reformed Church at Erlangen, in 1847 he was called to Munich, and was finally made pastor in Speyer, where he died in 1862. He wrote, *Philosophie und Christenthum, oder Wissen und Glauben* (Mannheim, 1833, 2d ed.):—*Predigten über ausgewählte Texte* (Erlangen, 1830):—*Stimmen der Reformation u. der Reformatoren an die Fürsten u. Völker dieser Zeit* (ibid. 1831):—*De Blasio Pascale Veritatis et Divinitatis Religionis Christiane Vindice* (ibid. 1833), pt. i, ii:—*Jesus Christus gestern u. heute u. derselbe auch in Ewigkeit* (Munich, 1850), sermons. See Winer, *Handbuch der theol. Literatur*, i, 25, 411; ii, 103, 405, 744; Zuchold, *Bibl. Theol.* p. 1101. (B. P.)

Rustic-work, ashlar masonry, the joints of which are worked with grooves, or channels, to render them conspicuous. Sometimes the whole of the joints are worked in this way, and sometimes only the horizontal ones. The grooves are either moulded or plain, and are formed in several different ways. The surface of the work is sometimes left, or purposely made, rough, but at the present day it is usually made even. Rustic-work was never employed in mediæval buildings, but

Rustic-work.

it is said to have had its origin in the buildings of Augustus and Claudius at Rome.—Parker, *Gloss. of Architect.* s. v.

Ruter, Calvin W., a minister of the Methodist Episcopal Church, was born in Bradford, Orange Co., Vt., March 15, 1794. He was received into the Ohio Conference in 1817, and in 1820 was transferred to the Missouri Conference. When the Indiana Conference was formed in 1832, Mr. Ruter was chosen its secretary. He took deep interest in founding the Indiana Asbury University, and was for many years one of its trustees. He took a superannuated relation in 1855, and died June 11, 1859. See *Minutes of Annual Conferences*, 1859, p. 274.

Ruter, Martin, D.D., a minister and instructor of the Methodist Episcopal Church, was born in Charlton, Mass., April 3, 1785. In 1801 he was admitted into the New York Conference, and in 1818 was appointed in charge of the Newmarket Wesleyan Academy, afterwards removed to Wilbraham. In 1828 he became president of Augusta College, where he remained until August, 1832. In 1834 he accepted the position of president of Allegheny College, and held it until 1837, when he was appointed superintendent of the Texas mission, where he formed societies, secured the building of churches, and laid out the greater part of the state in circuits. His death took place May 16, 1838. He published a *Hebrew Grammar*:—a *History of Martyrs*:—an *Ecclesiastical History*:—*Sermons*:—and *Letters*. See Simpson, *Cyclop. of Methodism*, s. v.

Rutgers, Henry, a distinguished Revolutionary patriot, philanthropist, and Christian of New York city, who was severely wounded while serving as an officer in the war of independence, and always stood high in the confidence of the state and general governments, was born in 1746. Possessed of ample wealth, he was noted for his unceasing munificence to various objects of humane and religious charity. He was one of the first managers of the American Bible Society, and was prominent in all the great benevolent movements of his time. By a timely act of liberality, he was to a large degree instrumental in the revival of Queen's College, which since that date (1825) has been honored with his venerated name as *Rutgers College*. In the public movements of his denomination (the Dutch Reformed), he was "a prince and a great man, whose praise is in all the churches." He died Feb. 17, 1830, in the full confidence and triumph of Christian hope. His last words were "Home! home!" (W. J. R. T.)

Ruth (Heb. *Rûth*, רות, probably for רותה, and this for רותה, a *female friend*; Sept. and New Test., *Ρούθ*; Josephus, *Ρούθη*, *Ant.* v, 9, 1), a Moabitess, the wife, first, of Mahlon, secondly of Boaz, and by him mother of Obed, the ancestress of David and of Christ, and one of the four women (Tamar, Rahab, and Uriah's wife being the other three) who are named by Matthew in the genealogy of Christ. She thus came into intimate relation with the stock of Israel, and her history is given in one of the books of the sacred canon which bears her name. The narrative that brings her into the range of inspired story is constructed with idyllic simplicity and pathos, and forms a pleasant relief to the sombre and repulsive shades of the picture which the reader

has just been contemplating in the later annals of the Judges. It is the domestic history of a family compelled, by the urgency of a famine, to abandon the land of Canaan, and seek an asylum in the territories of Moab. Elimelech, the head of the emigrating household, dies in the land of his sojourn, where his two surviving sons "took them wives of the women of Moab; the name of the one was Orpah, and the name of the other Ruth." On the death of the sons, the widowed parent resolving to return to her country and kindred, the filial affection of the daughters-in-law is put to a severe test, and Ruth determines at all hazards to accompany Naomi. "Whither thou goest, I will go, and where thou lodgest, I will lodge; thy people shall be my people, and thy God my God: where thou diest, I will die, and there will I be buried: the Lord do so to me, and more also, if aught but death part thee and me," was the expression of the unalterable attachment of the young Moabitish widow to the mother, to the land, and to the religion of her lost husband. They arrived at Bethlehem just at the beginning of barley harvest, and Ruth, going out to glean for the support of her mother-in-law and herself, chanced to go into the field of Boaz, a wealthy man, the near kinsman of her father-in-law, Elimelech. The story of her virtues and her kindness and fidelity to her mother-in-law, and her preference for the land of her husband's birth, had gone before her; and immediately upon learning who the strange young woman was, Boaz treated her with the utmost kindness and respect, and sent her home laden with corn which she had gleaned. Boaz had bidden her return from day to day, and directed his servants to give her a courteous welcome. An omen so propitious could not but be regarded as a special encouragement to both, and Naomi therefore counselled Ruth to seek an opportunity for intimating to Boaz the claim she had upon him as the nearest kinsman of her deceased husband. A stratagem, which in other circumstances would have been of very doubtful propriety, was adopted for compassing this object; and though Boaz entertained the proposal favorably, yet he replied that there was another person more nearly related to the family than himself, whose title must first be disposed of. Without delay he applied himself to ascertain whether the kinsman in question was inclined to assert his right—a right which extended to a purchase of the ransom (at the Jubilee) of Elimelech's estate. Finding him indisposed to the measure, he obtained from him a release, ratified according to the legal forms of the time, and next proceeded himself to redeem the patrimony of Elimelech, and finally, with all due solemnity, took Ruth to be his wife, amid the blessings and congratulations of their neighbors. As a singular example of virtue and piety in a rude age and among an idolatrous people; as one of the first-fruits of the Gentile harvest gathered into the Church; as the heroine of a story of exquisite beauty and simplicity; as illustrating in her history the workings of Divine Providence, and the truth of the saying that "the eyes of the Lord are over the righteous;" and for the many interesting revelations of ancient domestic and social customs which are associated with her story, Ruth has always held a foremost place among the Scripture characters. Augustine has a curious speculation on the relative blessedness of Ruth, twice married, and by her second marriage becoming the ancestress of Christ, and Anna remaining constant in her widowhood (*De Bono Viduit.*). Jerome observes that we can measure the greatness of Ruth's virtue by the greatness of her reward—"Ex ejus semine Christus oritur" (*Epist. xxi. ad Paulam*).

The period in which the famine above spoken of occurred is a greatly disputed point among commentators. The opinion of Usher, which assigns it to the age of Gideon (B.C. cir. 1360), and which is a mean between the dates fixed upon by others, carries with it the greatest probability. The oppression of the Midianites, mentioned in Judg. vi, 3-6, which was productive of a fam-

ine, and from which Gideon was instrumental in delivering his people, wasted the land and destroyed its increase, "till thou come unto Gaza;" and this embraced the region in which Judah and Bethlehem were situated. The territory of Judah was also adjacent to Moab, and a removal thither was easy and natural. The scourge of Midian endured, moreover, for seven years; and at the expiration of ten years after the deliverance by Gideon was fully consummated, Naomi re-emigrated to her native land (see Henstenberg, *Pentat.* ii, 92, note). Ruth seems in the genealogy of David to have been his great-grandmother; but as Boaz is in the same list set down as the grandson of Nahshon, who flourished at the Exode, we are forced to suppose the omission of some nine generations, which chronologers insert according to their respective schemes. See GENEALOGY OF JESUS CHRIST.

RUTH, BOOK OF. This book is inserted in the canon, according to the English arrangement and that of the Sept., between the book of Judges and the books of Samuel, as a sequel to the former and an introduction to the latter. Among the ancient Jews it was added to the book of Judges, because they supposed that the transactions which it relates happened in the time of the judges of Israel (*Judg.* i, 1). Several of the ancient fathers, moreover, make but one book of Judges and Ruth. In the Hebrew Bible it stands among the *Kethubim*, or Hagiographa. But the modern Jews commonly place, after the Pentateuch, the five Megilloth (q. v.)—1. The Song of Solomon; 2. Ruth; 3. The Lamentations of Jeremiah; 4. Ecclesiastes; 5. Esther. Sometimes Ruth is placed the first of these, sometimes the second, and sometimes the fifth.

1. The true *date and authorship* of the book are alike unknown, though the current of tradition is in favor of Samuel as the writer (*Talmud, Baba Bathra*, 14, 2). That it was written at a time considerably remote from the events it records would appear from the passage in iv, 7, which explains a custom referred to as having been "the manner in former time in Israel, concerning redeeming and concerning changing" (comp. *Deut.* xxv, 9). That it was written, also, at least as late as the establishment of David's house upon the throne appears from the concluding verse, "And Obed begat Jesse, and Jesse begat David." The expression, moreover (i, 1), "when the judges ruled," marking the period of the occurrence of the events, indicates, no doubt, that in the writer's days kings had already begun to reign. Add to this what critics have considered as certain Chaldaisms with which the language is interspersed, denoting its composition at a period considerably later than that of the events themselves. Thus Eichhorn finds a Chaldaism or Syriasm in the use of נ for ה in מִנְחָה though the same form occurs elsewhere. He adverts also to the existence of a superfluous *Yod* in שְׁמֵרַי and יִרְמְיָה (iii, 3) and in שְׁבֵבַרַי (ver. 4). As, however, the language is in other respects, in the main, pure, these few Chaldaisms may have arisen from a slight error of the copyists, and therefore can scarcely be alleged as having any special bearing on the æra of the document. The same remark is to be made of certain idiomatic phrases and forms of expression which occur elsewhere only in the books of Samuel and of Kings, as, "The Lord do so to me, and more also" (*Ruth* i, 17; comp. 1 Sam. iii, 17; xiv, 44; xx, 23; 2 Sam. iii, 9, 35; xix, 13; 1 Kings ii, 23; xix, 2; xx, 10; 2 Kings vi, 31); "I have discovered to your ear," for "I have told you" (*Ruth* iv, 4; comp. 1 Sam. xx, 2; 2 Sam. vii, 27).

2. The canonical authority of Ruth has never been questioned, a sufficient confirmation of it being found in the fact that Ruth, the Moabitess, comes into the genealogy of the Saviour, as distinctly given by the evangelist (*Matt.* i, 6). The principal difficulty in regard to the book arises, however, from this very genealogy, in which it is stated that Boaz, who was the husband of Ruth,

and the great-grandfather of David, was the son of Salmon by Rahab. Now, if by Rahab we suppose to be meant, as is usually understood, Rahab the harlot, who protected the spies, it is not easy to conceive that only three persons—Boaz, Obed, and Jesse—should have intervened between her and David, a period of nearly four hundred years. The solution of Usher is not probable, that the ancestors of David, as persons of pre-eminent piety, were favored with extraordinary longevity. It may be that the sacred writers have mentioned in the genealogy only such names as were distinguished and known among the Jews. But a more reasonable explanation is that some names are omitted, as we know is elsewhere the case in the same genealogy. (See above.)

3. The leading *scope* of the book has been variously understood by different commentators. Umbreit (*Ueber Geist und Zweck des Buches Ruth*, in *Theol. Stud. und Krit.* for 1834, p. 308) thinks it was written with the specific moral design of showing how even a stranger, and that of the hated Moabitish stock, might be sufficiently noble to become the mother of the great king David, because she placed her reliance on the God of Israel. Bertholdt regards the history as a pure fiction, designed to recommend the duty of a man to marry his kinswoman; while Eichhorn conceives that it was composed mainly in honor of the house of David, though it does not conceal the poverty of the family. The more probable design we think to be preintimate, by the recorded adoption of a Gentile woman into the family from which Christ was to derive his origin, the final reception of the Gentile nations into the true Church, as fellow-heirs of the salvation of the Gospel. The moral lessons which it incidentally teaches are of the most interesting and touching character: that private families are as much the objects of divine regard as the houses of princes; that the present life is a life of calamitous changes; that a devout trust in an overruling Providence will never fail of its reward; and that no condition, however adverse or afflicted, is absolutely hopeless, are truths that were never more strikingly illustrated than in the brief and simple narrative before us.

4. The separate commentaries on the entire book are not very numerous. Of the Church fathers we mention the following: Origen, *Fragmentum* (in *Opp.* ii, 478 sq.); Theodoret, *Questiones* (in *Opp.* i, i); Isidore, *Commentaria* (in *Opp.*); Bede, *Questiones* (in *Opp.* viii); Raban, *Commentaria* (in *Opp.*); also Irimpertus, *Expositio* (in *Pez, Thesaur.* IV, i, 141 sq.). By modern expositors there are the following: Bañolas, פְּרִישׁ [includ. Cant. etc.] (finished in 1329; pub. by Markaria, Riva di Trento, 1560, 4to; also in Frankfurter's *Rabbin. Bible*); Bertinoro, פְּרִישׁ (Cracov. s. a. 4to; also in his works, Ven. 1585); Sal. Isaak, פְּרִישׁ (Salon. 1551, 4to); Alkabaz, שְׁפָרַי (Const. 1561; Lubl. 1597, 4to); Mercer, *Versio Syriaca cum Scholiis* (Par. 1564, 4to); Isaak ben-Joseph, פְּרִישׁ (Sabbionetta, 1551, 8vo; Mantua, 1565, 16mo); Strigel, *Scholia* (Lips. 1571, 1572, 8vo); Feuadent, *Commentaria* (Par. 1582; Antw. 1585, 4to); Lavater, *Homilie* (Heidelb. 1586, 8vo; also in English, Lond. 1601, 8vo); De Celada, *Commentarii* (Lugd. 1594, 1651, fol.); Cuper, *Commentarius* [includ. Tobit, etc.] (Mogunt. 1600, 4to); Topsell, *Commentarius* (Lond. 1601, 8vo); also *Lectures* (ibid. 1613, 8vo); Al-scheich, פְּרִישׁ (Ven. 1601, 4to); Manera, *Commentarius* (ibid. 1604, 4to); Heidenreich, *Expositio* [includ. Tobit] (Jen. 1608, 8vo); Serrarius, *Explanatio* [includ. *Judg.*] (Mogunt. 1609, fol.); Bernard, *Commentary* (Lond. 1628, 4to); Sanctius, *Commentarii* [includ. other books] (Lugd. 1628, fol.); Bonifere, *Commentarius* [includ. *Josh.* and *Judg.*] (Par. 1631, 1659, fol.); Crommius, *Commentarii* [includ. *Judg.*, etc.] (Lovan. 1631, 4to); Drusius, *Commentarius* (Amst. 1632, 4to); Schleupner, *Expositio* (Norib. 1632, 8vo); D'Acosta, *Commen-*

tarius (Lugd. 1641, fol.); Fuller, *Commentary* (Lond. 1654, 1668, 8vo); Osiander, *Commentarius* (Tüb. 1682, fol.); Crucius, *Verklaaring* (Haarlem, 1691, 4to); Schmid, *Annotationes* (Argent. 1696, 4to); Carpozov, *Disputationes* [to ii, 10] (Lips. 1703, 4to [Rabbinic]); Werner, *Interpretatio* (Hamb. 1711, 4to); Outhof, *Verklaaring* (Amst. 1711, 4to); Moldenhauer, *Erläuterung* [includ. Josh. and Judg.] (Quedl. 1774, 4to); MacGowan, *Discourse* (Lond. 1781, 8vo); Asulat, *מִקְרָאֵי תַּנְחִיָּה* (Legh. 1782, 4to); Wolfsohn, *בְּאֵר* (Berl. 1788, 8vo); Lawson, *Lectures* (Edinb. 1805, 12mo; Phila. 1870, 8vo); Dereser, *Erklärung* (Fr.-a.-M. 1806, 8vo); Riegler, *Anmerk.* (Witzb. 1812, 8vo); Paur, *Bearbeitung* (Leips. 1815, 8vo); Macartney, *Observations* (Lond. 1841, 8vo); Blücher, *רִבִּי* (Lemb. 1843, 8vo); Philpot, *Lectures* (Lond. 1854, 18mo); Tyng, *History* (N. Y. 1855, 18mo); Metzger, *Interpretatio* (Tüb. 1856, 4to); Roordam, *Versio Syr.-Hexapl. Græce cum Notis* (Havn. 1859 sq., 4to); Wright, *Commentary* (Lond. 1864, 8vo). See OLD TESTAMENT.

Ruthenian Version OF THE HOLY SCRIPTURES. This version, which is of a very recent date, has been prepared for the Ruthenians in Austria, the majority of whom belong to the Orthodox Greek Church, by which the reading of the Holy Scriptures has never been prohibited. In the year 1875 the Gospel according to St. Luke, as prepared by Mr. Kobylanski, was printed, and thus the Word of God was given to the Ruthenian people in their own tongue for the first time. Encouraged by the success of the Ruthenian Gospel of St. Luke, the British and Foreign Bible Society, in the year 1877, resolved to print the Gospel of St. John also, as translated by Mr. Kobylanski, whose translation Prof. Micklovich has critically examined and declared to be a complete success. See the *Annual Reports of the Brit. and For. Bible Soc.* 1875, p. 46; 1877, p. 51. (B. P.)

Rutherford, SAMUEL, a Scottish minister and Covenanter, was born in the parish of Nisbet, Roxburghshire, about 1600. He was ordained minister of Anworth in 1627, but was silenced in 1636 for preaching against the articles of Perth. During the Rebellion he was a zealous defender of Presbyterianism, and in 1639 was appointed professor of divinity in the New College, St. Andrew's. He was commissioner to the assembly of divines at Westminster, 1643-47; principal of New College, St. Andrew's, 1649; and shortly after was raised to the rectorship. He died in 1661. Besides other works, he was the author of *Exercitationes Apologetice pro Divina Gratia*, etc. (Amst. 1636, 8vo; Francf. 1651, 1660, 8vo);—*Plea for Paul's Presbytrie in Scotland* (Lond. 1642);—*Due Rights of Presbyteries* (1644, 1645, 4to);—*Tryal and Triumph of Faith* (1645, 4to; Edinb. 1845, 12mo), twenty-seven sermons;—*Divine Right of Church Government*, etc. (Lond. 1646, 4to);—*Christ's Dying*, etc. (1647, 4to), sermons;—*Survey of the Spiritual Antichrist* (ibid. 1648, 2 parts, 4to);—*A Free Disputation against Pretended Liberty of Conscience* (1649, 4to);—*Disputatio Scholastica de Divina Providentia*, etc. (Edinb. 1649, 1650, 4to);—*Life of Grace* (1659, 4to);—*Joshua Redivivus, or (352) Religious Letters* (1664, 2 parts, 12mo; 1671, 8vo; with his dying words and Mr. M'Ward's preface, Glasg. 1765, 8vo; 9th ed. with biographical sketches, edited by Rev. A. Bonar, 1862, 2 vols. 8vo);—*A Garden of Spices*:—extracts from above by Rev. L. R. Dunn (Cincinnati, 1869, 12mo). See Murray, *Life*, etc.; *Scots Worthies*; Livingston, *Characteristics*; Watt, *Bibl. Brit.*; Thompson, *Biog. Dict. of Eminent Scotsmen*; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Rutherford, THOMAS, an English philosopher and divine, was born in Cambridgeshire, Oct. 13, 1712. He was educated at St. John's, Cambridge, taking his degree of A.B. in 1729 and A.M. in 1733. He was chosen fellow and made B.D. in 1740. Two years after, he was chosen fellow of the Royal Society, and in 1745 was ap-

pointed professor of divinity, took his degree of D.D., and was appointed chaplain to the Prince of Wales. He was afterwards rector of Barrow, in Suffolk; Shennstone, in Essex; Barley, in Hertfordshire; and in 1752 archdeacon of Essex. He died Oct. 5, 1771, and was buried in the church at Barley. He was the author of *Ordo Institutionum Physicarum*, etc. (Camb. 1743, 4to);—*Essay on the Nature and Obligations of Virtue* (Lond. 1744, 8vo);—*System of Natural Philosophy* (Camb. 1748, 2 vols. 4to);—*Credibility of Miracles Defended* (1751, 8vo);—*Institutes of Natural Law* (Lond. 1754-56, 2 vols. 8vo; 2d American ed. Baltimore, 1832), lectures read in St. John's College, Cambridge;—also *Letters, Sermons*, etc. See Hutton, *Dict.*; Nichol, *Lit. Anecdotes*; Watt, *Bibl. Brit.*

Rutherglen Declaration, the name given to a protesting declaration of an armed body of Covenanters who, in 1679, assembled in this old burgh, burned some obnoxious acts of Parliament, and affixed a copy of their protest to the market-cross. Claverhouse was sent, May 31, from Glasgow in search of the party; the battle of Drumclog was fought, and the royalist forces were routed. At the battle of Bothwell Bridge, Sunday, June 22, the Covenanters were defeated and twelve hundred prisoners taken.

Ruthrauff, John F., a Lutheran minister, was born in Northampton County, Pa., Jan. 14, 1764, and began his theological studies with Rev. Jacob Goering in York, 1790. He began to preach in 1793, and had charge of several churches in York County and in Carlisle until June, 1795, when he accepted a call from the Green Castle congregation and several others, in some of which he labored upwards of forty years. His charge embraced McConnelsburg, London, Mercersburg, Waynesboro', Quincy, Smoketown, Jacob's Church, and several in Washington County, Md. He continued his labors until the year before his death, which occurred Dec. 18, 1837. He was a man of strong mental qualities; a fluent, animated, and instructive preacher; and the possessor of substantial Christian excellence. See Sprague, *Annals of the Amer. Pulpit*, ix, 104.

Ruthrauff, Jonathan, a Lutheran minister, was born in Greencastle, Franklin Co., Pa., Aug. 16, 1801, and was son of the preceding. He entered Washington College, Pa., and in 1822 commenced his theological studies under the direction of Rev. Benjamin Kurtz, Hagerstown, Md., and continued them under Rev. Dr. Lochman. He was licensed to preach at Reading, Pa., in 1825, and served as itinerant missionary until Feb. 25, 1827, when he accepted a call from the united churches of Lewistown and vicinity. In 1829 he accepted a call from Hanover, where he labored for eight years. In December, 1837, he assumed charge of the Church at Lebanon, Pa., which he served with great fidelity until 1849, when he was prostrated by disease, which terminated his life, July 23, 1850. Mr. Ruthrauff was of a kind and genial nature; his preaching, which was in both German and English, was eminently practical and pungent. See Sprague, *Annals of the Amer. Pulpit*, ix, 175.

Ruthven, James, a noted ruling elder in the Presbyterian Church, was born in Glasgow, Scotland, Dec. 15, 1783. His father removed to the United States and settled in the city of New York, and attended the ministry of the Rev. John Mason, D.D., of the Scotch Church. In the sixth year of his age James witnessed the inauguration of Washington with indescribable emotions. In 1812 he was ordained a deacon and subsequently an elder in Dr. Mason's church, which was then in Murray Street. He removed in 1842 to Bridgeport, Conn., where his influence was of great value, and returned to New York after an absence of eight years. With him religion was an all-pervading spirit, giving warmth and glow and purity and hope in every experience. A distinguished minister of another Church said of him: "Few persons whom I have ever known

have more deeply impressed me with their absolute excellence, their entire, thorough, and beautifully consistent character." And this character he maintained unblemished for more than half a century. The ripeness and richness of his Biblical piety shone conspicuously in the social meetings, in the community, at the bed of sickness, everywhere. He loved the Church, honored the ministry, consecrated all his wealth to God, and as an almoner of the divine bounty scattered blessings far and wide. For him, "to live was Christ," and for him, "to die was eternal gain." The last words he uttered were, "Dying, and, behold, we live!" He died Nov. 25, 1855. (W. P. S.)

Rutledge, GEORGE, a minister of the Methodist Episcopal Church, was born in Augusta County, Va., Nov. 11, 1811. He professed conversion and joined the Church when twenty years of age. In 1835 he was admitted on trial into the Baltimore Conference, and was immediately transferred to the Illinois Conference. He served as presiding elder on six different districts, and was three times delegate to the General Conference. His death occurred Sept. 7, 1871. See *Minutes of Annual Conferences*, 1871, p. 212.

Ruttenstock, JACOB, Dr., provost and Lateran abbot at Klosterneuburg, in Austria, was born at Vienna, Feb. 10, 1776, and entered the Augustinian convent at Klosterneuburg, Oct. 6, 1795, completing his theological studies partly in the convent and partly at the University of Vienna. He took vows March 30, 1800, and on Sept. 8 of the same year was consecrated to the priesthood. He devoted himself specially to the cure of souls, but steadily employed his leisure hours in the prosecution of theological studies. He was accordingly appointed professor of Church history and canon law in the institute for theological tutors connected with his convent, and in December, 1809, he was made a temporary supply of the chair of Church history at Vienna. In 1811 he became pastor of Klosterneuburg and director of its principal school, but was almost immediately transferred to the high-school at Vienna, where he became ordinary professor of Church history in 1813, and continued during nineteen years to approve himself as a patient inquirer, a thorough scholar, and a capable instructor. The text-book entitled *Institutiones Historiæ Ecclesiasticæ N. T.* (Vienna, 1832-34), in three volumes, and extending to the year 1517, is the only monument of this period of his life that is preserved. He was chosen provost of Klosterneuburg, June 8, 1830, and in that capacity rendered valuable services in completing the convent and adorning the cathedral, etc. In 1832 the emperor Francis I appointed Ruttenstock a councillor of state, director of gymnasial studies in the hereditary states of Austria, etc. In 1842 he received the cross of the Order of Knights of Leopold. He died June 29, 1844, in the convent of Klosterneuburg. It remains to be added that several of Ruttenstock's sermons were published, and that he ranked, wherever known, as an eminent pulpit orator. See Wetzler u. Welte, *Kirchen-Lex.* s. v.

Ruysbroeck (or **Rusbroek**), **JEAN DE**, the most noted of mystics in the Netherlands, was born in A.D. 1293 at Ruysbroeck, near Brussels, and was educated in the latter city under the direction of an Augustinian prebendary who was his relative. His fondness for solitude and day-dreams prevented him from making solid progress, however. His Latin was imperfect, though it is clear that he became acquainted with the earlier mystical writings. He probably did not read the writings of Neo-Platonists, but was certainly not unacquainted with those of the Areopagite. His works suggest the thought that the writings of master Eckart (died 1328), with whom Ruysbroeck was contemporary for thirty-five years, exercised influence over our author's mind. Ruysbroeck became vicar of the Church of St. Gudula at Brussels, where he lived in strict asceticism, enjoying the society of persons who had devoted

themselves to a contemplative life, composing books and exercising benevolence. He contended against the sins of the day, and labored to promote reforms. It is said that Tauler once visited him, attracted by the fame of his sanctity. At the age of sixty he renounced the secular priesthood and entered the new Augustinian convent Gröndendal, in the forest of Soigny, near Brussels, becoming its first prior, and there he died in 1381. His life at once became the subject of legendary tales. The name *Doctor Ecstasticus* was early conferred on him.

The chief of his mystical writings are, *The Ornament of Spiritual Marriage* (Lat. by Gerh. Groot, *Ornatus Spiritualis Desponsionis*, MS. at Strasburg; by another translator, and published by Faber Stapulensis [Paris, 1512], *De Ornatu Spirit. Nuptiarum*, etc.; also in French, Toulouse, 1619; and in Flemish, *'J Cieraet der gheestelcke Bruyloft*, Brussels, 1624):—*Speculum Eternæ Salutis*:—*De Calculo*, an interpretation of the *calculus candidus*, Rev. ii, 17:—*Samuel, sive de Alta Contemplatione*. The other works of Ruysbroeck contain but little more than repetitions of the thoughts expressed in those here mentioned. He wrote in his native language, and rendered to that dialect the same service which accrued to the High German from its use by the mystics of the section where it prevailed. He is still regarded in Holland as "the best prose-writer of the Netherlands in the Middle Ages." His style is characterized by great precision of statement, which becomes impaired, however, whenever his imagination soars, as it often does, to transcendental regions too sublimated for language to describe. His works were accessible until lately only in Latin editions (by Surius, Cologne, 1549, 1552, 1609 [the best], 1692, fol.), or in manuscripts scattered through different libraries in Belgium and Holland. Four of the more important works were published in their original tongue, with prefaces by Ullmann (Hanover, 1848). No complete edition has as yet been undertaken (see Moll, *De Boekerij van het S. Barbara-Klooster te Delft* [Amst. 1857, 4to], p. 41).

Ruysbroeck's mysticism begins with God, descends to man, and returns to God again, in the aim to make man one with God. God is a simple unity, the essence above all being, the immovable, and yet the moving, cause of all existences. The Son is the wisdom, the uncreated image of the Father; the Holy Spirit the love which proceeds from both the Father and the Son, and unites them to each other. Creatures pre-existed in God, in thought; and, as being in God, were God to that extent. Fallen man can only be restored through grace, which elevates him above the conditions of nature. Three stages are to be distinguished: the active, or operative; the subjective, or emotional; and the contemplative life. The first proceeds to conquer sin, and draw near to God through good works; the second consists in introspection, to which ascetic practices may be an aid, and which becomes indifferent to all that is not God. The soul is embraced and penetrated by the Spirit of God, and revels in visions and ecstasies. Higher still is the contemplative state (*vita vitalis*), which is an immediate knowing and possessing of God, leaving no remains of individuality in the consciousness, and concentrating every energy on the contemplation of the eternal and absolute Being. This life is still the gift of grace, and has its essence in the unifying of the soul with God, so that he alone shall work. The soul is led on from glory to glory, until it becomes conscious of its essential unity in God.

Ruysbroeck was constantly desirous of preserving the distinction between the uncreated and created spirits. In the unifying of the soul with God he does not assert an identification of personality, but merely a cessation of the difference in thought and desire, and a giving-up of the independence of the creature. His language was often so strong, however, and his thought often so sublimated, that more cautious thinkers found serious cause to charge his writings with pantheism. This was true of Gerson (*Opp.* vol. i, pt. i, p. 59 sq.). Few mystics

have ascended to the empyrean where Ruysbroeck so constantly dwelt; and the endeavor to compress into forms of speech the visions seen in a state where all clear and real apprehension is at an end occasioned the fault of indefiniteness with which his writings must be charged. His influence over theological and philosophical thought was not so great as that exercised by Eckhart and Tauler, and was chiefly limited to his immediate surroundings. The Brotherhood of the Common Life (q. v.) was founded by Gerhard Groot, one of Ruysbroeck's pupils, and its first inception may perhaps be traced back to Ruysbroeck himself—a proof that he was not wholly indifferent to the conditions of practical life.

See Engelhardt, *Richard v. St. Victor u. J. Ruysbroeck* (Erlang. 1838); Ullmann, *Reformatoren vor der Reformation*, ii, 35 sq.; Schmidt, *Études sur le Mysticisme Allemand au 14me Siècle, in Mémoires de l'Académie des Sciences Morales* (1847); Noack, *Die christliche Mystik*, i, 147 sq.; Böhringer, *Deutsche Mystiker d. 14ten u. 15ten Jahrhunderts*, p. 462 sq.

Ruysbroeck (or **Rubruquis**), **WILLEM DE**, a mediæval traveller and missionary, was born in Brabant about 1220. In 1253 Louis IX of France sent him and two other friars to Tartary. The object of their mission was to propagate Christianity among the Tartars, to search for Prester John, and to visit Sartach, a Tartar chief, who was reported to be a Christian. Ruysbroeck performed this arduous enterprise bravely, and, returning through Persia and Asia Minor, reached home in August, 1255. He died after 1256. He wrote a work, which is divided into two parts, *De Gestis* (or *De Moribus*) *Tartartorum*, and *Itinerarium Orientis*. Hakluyt published one part in his *Principal Navigations* (Lond. 1598–1606, 3 vols. fol.); but the story of Ruysbroeck is found most complete in Purchas's *Pilgrims* (1626, 4 vols. fol.).—Hoefer, *Nouv. Biog. Générale*, s. v.

Ruzé, **GUILLAUME**, a French prelate, was born at Paris about 1530. He taught rhetoric and philosophy in the College of Navarre, where he received the degree of doctor. He was councillor under Henry II, Charles IX, and Henry III, who made him grand almoner. In 1570 he was promoted to the bishopric of Saint-Malo, but resigned it two years later to receive that of Angers. In 1583 he assisted at the Council of Tours, and rendered into French the confession of faith adopted by that council. He was also the author of a French translation of the *Commonitorium adversus Hæreticos* of Vincent de Lerius. Ruzé died Sept. 28, 1587. See *Gallia Christiana*.

Rybaut (or **Ribaut**), **PAUL**, a French Protestant minister, was born near Montpellier in 1718. While the law made the preaching of Protestant doctrine a capital offence, he lived and preached for many years in caves and huts in the forest. He was a man of extensive influence, and often used it to restrain his people from violent measures. He died in 1795.

Ryder, Henry, D.D., an English prelate, a younger son of the earl of Harrowby, was born in 1777, became dean of Wells in 1812, bishop of Gloucester in 1815, and was translated to Lichfield and Coventry in 1824. He died in 1836. He published several *Sermons and Charges* (1806–32). For full obituary, see *Gentleman's Magazine*, 1836, i, 658.

Ryder, James, D.D., a Roman Catholic ecclesiastic, was born in Dublin in 1800, and emigrated to the United States in early youth. He entered the novitiate of the Society of Jesus in 1815, and pursued his secular studies at Georgetown College, Md., from 1815 to 1820, and his theological studies at Rome from 1820 to 1825. He then received holy orders, and occupied the chair of theology and Sacred Scriptures in the College of Spoleto, Italy, from 1825 to 1828. He returned to America in 1828, and was for several years professor of theology and vice-president of Georgetown College. In 1839 he

was pastor of St. Mary's Church, Philadelphia, and also of St. John's Church, Frederick, Md. From 1840 to 1845, and also from 1848 to 1851, he was president of Georgetown College, and from 1845 to 1848 president of the College of the Holy Cross, Worcester, Mass. He was also superior of the Order of Jesuits in the province of North America. Ryder died in 1860. He published occasional *Lectures and Discourses*, and was a contributor to the *Encyclopædia Americana*. See Alibone, *Dict. of Brit. and Amer. Authors*, s. v.

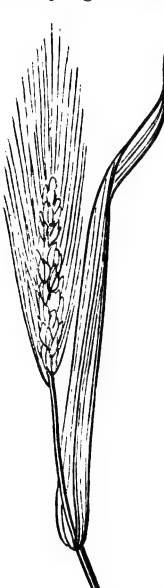

Ryder, William, a minister of the Methodist Episcopal Church, was born in Holliston, Middlesex Co., Mass., June 27, 1805. He joined the Church in Fort Ann, N. Y., in 1824, and in 1830 was licensed to preach. A year or two afterwards he entered the Troy Conference. He was ordained deacon in 1833, but was obliged through ill-health in 1834 to take a superannuated relation. His disease was of a rheumatic-neuralgic nature, and so severe that in 1837 he lost all power of locomotion, and the use of almost every muscle. His sufferings were very intense, and from them he had very little release. He contrived to have a book so placed before him that he could read, and was thus enabled to beguile many painful hours each day. He died in 1849. See Wentworth, *The Superannuate* (N. Y. 1846); *Minutes of Annual Conferences*, 1850, p. 458.

Rye (רֵי, *kussémeth*), occurs in three places of Scripture (Exod. ix, 32; Isa. xxviii, 25; and "fitches" in Ezek. iv, 9); but its true meaning still remains uncertain. It was one of the cultivated grains both of Egypt and of Syria, and one of those employed as an article of diet. It was also sown along with wheat, or, at least, its crop was in the same state of forwardness; for we learn from Exod. ix, 32 that in the seventh plague the hail-storm smote the barley which was in the ear, and the flax which was bolled; but that the wheat and the *kussémeth* were not smitten, for they were not grown up. Respecting the wheat and the barley, we know that they are often sown and come to maturity in different months. Thus Forskål says, "Barley ripens in February, but wheat stands till the end of March" (*Flora Ægypti*, p. 43). The events above referred to probably took place in February (see Kitto, *Pict. Bible*, ad loc.). That *kussémeth* was cultivated in Palestine we learn from Isa. xxviii, 25, where it is mentioned along with *ketsah* (nigella) and *cumin*, wheat and barley; and sown, according to some translators, "on the extreme border (רֵי) of the fields," as a kind of fence for other descriptions of corn. See AGRICULTURE. This is quite an Oriental practice, and may be seen in the case of flax and other crops in India at the present day. The rye is a grain of cold climates, and is not cultivated even in the south of Europe. Korte declares (*Travels*, p. 168) that no rye grows in Egypt; and Shaw states (p. 351) that rye is little known in Barbary and Egypt (Rosenmüller, p. 76). That the *kussémeth* was employed for making bread by the Hebrews we know from Ezek. iv, 9, where the prophet is directed to "take wheat, and barley, and beans, and lentils, and millet, and *kussémeth*, and put them in a vessel, and make bread thereof."

Though it is very unlikely that *kussémeth* can mean rye, it is not easy to say what cultivated grain it denotes. The principal kinds of grain, it is to be observed, are mentioned in the same passages with the *kussémeth*. Celsius has, as usual, with great labor and learning, collected together the different translations which have been given of this difficult word. In the Arabic translation of Exod. ix, 32, it is rendered *julban*: "cicerula, non circula, ut perperam legitur in versione Latina." By other Arabian writers it is considered to mean pease, and also beans. Many translate it *vicia*, or vetches, as in the A. V. of Exod. ix, 32; for according to Maimonides (ad tract. *Shabb.* xx, 3), *carshinin* is a kind of legume, which in the Arabic is called *kirsāna*, but in the

sacred language *kussémeth*. Both *julban* and *kirsána* mean species of pulse, but it is not easy to ascertain the specific kinds. The majority, however, instead of a legume, consider *kussémeth* to indicate one of the cereal grains, as the rye (*secale*), or the oat (*avena*), neither of which it is likely to have been. These have probably been selected because commentators usually adduce such grains as they themselves are acquainted with, or have heard of as commonly cultivated. Celsius, however, informs us that in the Syriac and Chaldean versions *kussémeth* is translated *kunta*; *far* in the Latin Vulg.; *far adorem*, Guisio, tract. *Peah*, viii, 5, and tract. *Chilaim*, i, 1; *ζέα* in the Sept., Isa. xxviii. Aquila, Symmachus, and others render it *spelta*. So Ben-Melech, on Exod. ix and Ezek. iv, says "*kyssémeth*, vulgo *spelta*," and the Sept. has *ὄλυρα*. Upon this Celsius remarks, "All these—that is, *kunta*, *far*, *ador*, *ζέα*, *spelta*, and *ὄλυρα*—are one and the same thing." This he proves satisfactorily by quotations from the ancient authors (*Hierobot.* ii, 100). Dr. Harris states (*Nat. Hist. of the Bible*, s. v.) that the word *kussémeth* seems to be derived from *kasám*, "to have long hairs," and that hence a bearded grain must be intended; which confirms the probability of spelt being the true meaning. Gesenius derives it from *ספץ*, "to shear, to poll," and translates it, "a species of grain like wheat, with a smooth or bald ear, as if shorn."

Dioscorides has stated (ii, 111) that there are two kinds of *ζέα*, one simple, and the other called *dicoccon*. Sprengel concludes that this is, without doubt,

Spelt (*Triticum spelta*).

the *Triticum spelta* of botanists; that the *olyra* was a variety, which Host has called *T. zea*; and also that the simple kind is the *T. monococcon*. That these grains were cultivated in Egypt and Syria, and that they were esteemed as food in those countries, may also be satisfactorily proved. Thus Herodotus states that the Egyptians employ *olyra*, which others call *zea*, as an article of diet. Pliny (*Hist. Nat.* xviii, 8) mentions it as found both in Egypt and in Syria, as it is in more modern times (Dapper, *Description Asia*, p. 130; Johannes Phocas, *De Locis Syr. et Palestinae*, p. 34; Cels. *loc. cit.* p. 100). That it was highly esteemed by the ancients is evident from Dioscorides describing it as more nourishing than barley, and grateful in taste. Pliny also (xviii, 11) and Salmassius prefer it, in some respects, to wheat. The goodness of this grain is also implied from the name of *semen* having been especially applied to it (C. Bauhin, *Pinox*, p. 22).

Triticum spelta, or spelt, is in many respects so closely allied to the common wheats as to have been thought by some old authors to be the original stock of the cultivated kinds; but for this there is no foundation, as the kind cultivated for ages in Europe does not differ from specimens collected in a wild state. These were found by a French botanist, Michaux, in Persia, on a mountain four days' journey to the north of Hamadan. It is cultivated in many parts of Germany, in Switzerland, in the south of France, and in Italy. It is commonly sown in spring, and collected in July and August.—Kitto. There are three kinds of spelt, viz. *T. spelta*, *T. dicoccon* (rice wheat), and *T. monococcon*. In its general appearance the more frequent form of spelt differs little from common bearded wheat (*T. vulgare*). It is equally nutritious, and in its habits more

hardy. It grows on a coarser soil, and requires less care in its cultivation. There is an awnless variety, which is "perhaps the most naked of all the cerealia;" so that, betwixt the smooth sort and the bearded, spelt should conciliate even the etymologists. See Tristram, *Nat. Hist. of the Bible*, p. 479. See CEREALS.

Rye, PETER K., a minister of the Methodist Episcopal Church, was born in Norway in 1839. It is not known at what time he came to the United States; but in 1858, while a resident of Hart Prairie, Wis., he was converted; prosecuted his studies at the Garrett Biblical Institute, and in 1861 was licensed to preach. In 1862 he was admitted on trial into the Rock River Conference, and at the close of the year was transferred to the Wisconsin Conference. In 1864 he was transferred back to the Rock River Conference and made superintendent of the Scandinavian Mission, with his headquarters at Copenhagen, Denmark. He returned to America in 1869, and continued to work until a few weeks before his death, March 16, 1873. See *Minutes of Annual Conferences*, 1873, p. 101.

Rykajoth, in the mythology of the ancient Prussians, was a place in which inferior deities were worshipped, always located under the shade of oak, lime, or elder trees. The superior gods were worshipped in similar places at Romowa (q. v.).

Ryland, WILLIAM, a minister of the Methodist Episcopal Church, was born in the north of Ireland in 1770. He came to the United States at the age of eighteen, and settled in Harford County, Md. He afterwards removed to Baltimore and engaged in commercial pursuits, but in 1802 was admitted on trial in the Baltimore Conference. His ministry comprised a period of forty-four years, the first nine of which were spent on circuits, the next eighteen in cities, and the remaining seventeen as a chaplain in the United States navy. He was five times elected chaplain of the United States Senate, was a friend for many years of general Jackson, and commanded general respect on account of his integrity, his intellectual powers, and pulpit abilities. He died Jan. 10, 1846. See Sprague, *Annals of the Amer. Pulpit*, vii, 392.

Ryora, ALFRED, a Presbyterian minister, was born on Long Island, N. Y., in 1812. He acquired his academical education under the direction of the venerable Dr. Steel, of Abington, Pa.; graduated at Jefferson College, Canonsburg, Pa., in 1835; spent one year as tutor in Lafayette College, Easton; and in 1836 was elected professor of mathematics in the Ohio University at Athens. He was licensed to preach in 1838; retained his professorship in the Ohio University until 1844, when he was elected professor of mathematics in the Indiana University at Bloomington, where he remained until 1848, in which year he was recalled to the Ohio University and elected president. He held this office until 1853, when he left for the Indiana University; became a stated supply of the Church at Madison until, in 1854, he was elected professor of mathematics of Centre College, at Danville, Ky. He died May 8, 1858. Mr. Ryora was an excellent writer, and eminently distinguished for his attainments as a professor. See Wilson, *Presb. Hist. Almanac*, 1860, p. 77. (J. L. S.)

Rysdyck, ISAAC, a (Dutch) Reformed minister, was born in Holland in 1720, and was educated at the University of Groningen. After laboring for ten or fifteen years as a pastor in his native land, he accepted a call to the churches of Poughkeepsie, Fishkill, Hopewell, and New Hackensack, N. Y., which made up one charge, and was installed in September, 1765. The strife between the Cœtus and Conferentie was running high, and the parties were bitterly divided when he arrived. He sided with the Conferentie, but was moderate in spirit and action, and in 1771 was prominent in the convention which settled this sad conflict, and president of the convention of 1772 which formed the "Articles of

Union" between these parties. In 1772 the Poughkeepsie Church separated peacefully from its collegiate relations, and Mr. Rysdyck retained the sole charge of the others until 1783, when the Rev. Isaac Blauvelt was elected his colleague. The aged pastor died in 1789, and was buried beneath the pulpit of his old church in New Hackensack. Mr. Rysdyck was a stately specimen of the gentleman of the olden time—tall, venerable, precise in antique dress and address; punctilious, polite, and commanding universal respect and reverence. His dark complexion indicated Spanish blood in his Dutch veins. He usually rode on horseback when making parochial visits, and wore a cocked hat, white flowing wig, and the customary clerical dress; and when pass-

ing any one on the road, would always lift his hat and give a friendly greeting. Before the Revolutionary War he taught a classical school at Fishkill, and among his pupils was the celebrated Dr. John H. Livingston. He was regarded as the most learned theologian and classical scholar in the Dutch Church. He wrote in Greek and Latin, and was as much at home in Hebrew as in his native tongue. His sermons were textual, analytical, and drawn directly out of the Scriptures, which he expounded with learning and affectionate faithfulness. In the most excited controversies of the Church he was always known as a peace-maker. For a long time he was the only minister in Dutchess County. He left no production in print. (W. J. R. T.)

S.

Sa, MANOEL DE, a Portuguese theologian, was born in 1530 at Villa do Conde. At the age of fifteen he joined the Order of Jesuits, and became instructor in philosophy, first in the University of Coimbra, and afterwards at Gaudia. Being called to Rome in 1557, he spent his time in teaching, preaching, and editing a new version of the Bible, which appeared during the pontificate of Sixtus V. He also founded many religious houses in Upper Italy. After residing for a time at Genoa, he returned to the convent at Arona, where he died, Dec. 30, 1596. Of his works, we have *Aphorismi Confessorum* (1595):—*Scholia in IV Evangelii* (1596):—*Notationes in Totum S. Scripturam* (1598).

Saadhs, a sect in Hindostan who have rejected Hindü idolatry, substituting for it a species of deism. They are found chiefly at Delhi, Agra, Jyepore, and Furruckhabad. Their name implies *Pure*, or *Puritans*. The sect originated in A.D. 1658, with a person named Birbhân. They have no temples, but assemble at stated periods, more especially every full moon, in private houses, or in adjoining courts set apart for this purpose. They wear white garments, use no pigments, nor sectarian marks upon their forehead, and have no chaplets or rosaries or jewels.

Saadia(s), HAG-GAON (הַגָּאון, *the majesty*), ben-Joseph Ha-Pithomi, Ha-Mizri, called in Arabic *Said Ibn-Jaakûb al-Fayûmi*, a learned Jewish rabbin, was born at Fayûm, in Upper Egypt, A.D. 892. His contemporary was the Arabian historian Masudi. Saadia enjoyed the tuition of an eminent Karaite teacher, Salomon ben-Jerucham, an advantage that gave him an enlargement of mind beyond many of his colleagues in the Babylonian schools, though he never embraced the Karaite doctrines, but contended for the necessity of oral tradition. Saadia was distinguished alike as philosopher, Talmudist, theologian, orator, grammarian, and commentator, and, when little more than twenty-two (915), he published his first production, written in Arabic, entitled "A Refutation of Anan," or *Kûtab ar-rud ıla Anan*. This work has not as yet been found, but from Jerucham's rejoinder to it we learn that the import of it was to refute Anan's doctrines, and to show the necessity of the traditional explanation of the Scriptures as contained in the Rabbinic writings. "He urged in support of tradition that the simple words of the Bible are insufficient for the understanding and the performance of the law, since many of the enactments in the Pentateuch are only stated in outline, and require explanation; as in the case of the general prohibition to work on the Sabbath, where the nature of the labor is not defined; that prayer was not at all ordered in the Mosaic law, while the necessity of it is referred to an oral communication; that the advent of the Messiah and the resurrection of the dead are based upon traditional exegesis; and that the history of the Jews is derived entirely from tradition" (comp. Jerucham

against Saadia, Alphabet iii, MS.). The rapid stride of Karaism, and the fact that the Karaites were now almost the sole possessors of the field of Biblical exegesis and grammatical research, while the orthodox Jews were satisfied with taking the Talmud as their rule of faith and practice, determined Saadia to undertake an Arabic translation of the Scriptures, accompanied by short annotations. His Biblical works are, **הַפְסֵקִיר הַיּוֹרֵה**, *A Translation of the Pentateuch*, which he completed A.D. 915-920. The commentary accompanying this translation, and which Aben-Ezra and Saadia himself mention, has not as yet come to light, but the Arabic version has been published, first with the reputed Chaldee paraphrase of Onkelos, the Jewish-Persian version of Jacob Tañs, the Hebrew text, and Rashi's commentary (Constantinople, 1546); then in the Paris and London polyglots, with a Latin version:—**הַפְסֵקִיר יִשְׁעִיָּה**, *A Translation of Isaiah*, which H. E. S. Paulus published from a MS. in the Bodleian Library (Cod. Pococke, No. 32) of the year 1244, under the title *Rabbi Saadiæ Phiumensis Versio Jesaiæ Arabica*, etc. (Jena, 1790-91), and which called forth a number of dissertations and criticisms, as well as corrections, as may be seen in Eichhorn's *Allgem. Bibliothek der biblischen Literatur*, iii, 9 sq., 455 sq.; Michaelis, *Neue orient. Bibliothek*, viii, 75 sq.; Gesenius, *Der Prophet Jesaia*, I, i, 88 sq.; Rappaport, in *Bikkure Ha-Itim*, v, 32, etc.; Muir, *Notice sur Saadia*, etc., p. 29-62:—**הַפְסֵקִיר זְבֹרֵי דָוִד** (שִׁירָה), *A Translation of the Psalms of David*, with annotations; only parts of this commentary, which is still extant in two MSS. of the Bodleian Library (Cod. Pococke, No. 281 [Uri, No. 89], and Cod. Hunt, No. 416 [Uri, No. 49]), and in one Munich MS., were published by Schnurrer, Hanneberg, and Ewald:—**הַפְסֵקִיר אִיּוֹב**, *A Translation of Job*, with annotations, entitled **כְּתָאב אֱלֹתֵנְדֵרִי**, *The Book of Justification, or Theodicea*; excerpts of this version, and annotations from the only MS. extant (Bodleian Library, Cod. Hunt, No. 511), were published by Ewald:—**פִּירוּשׁ כָּל שִׁיר הַשִּׁירָה**, *A Commentary on the Song of Songs*, first published by Isaac Akrisch (Constantinople, about 1579); then separately by Salomon ben-Moses David, under the title **פִּירוּשׁ ר' סַעַדְיָה** (Prague, 1608). Excerpts of the Constantinople edition, with an English translation, were published by Ginsburg in his *Historical and Critical Commentary on the Song of Songs* (Lond. 1857), p. 36, etc. From quotations made by Aben-Ezra, Kimchi, Salomon ben-Jerucham, and other Jewish expositors and lexicographers, we know that Saadia also wrote commentaries on other books, as on Ruth, Lamentations, Ecclesiastes, and Esther, as well as the Minor Prophets and the book of Daniel. Of his grammatical and lexical works, only that on the seventy *ἑπὰς λεγόμενα*, entitled **הַפְסֵקִיר הַלֵּסְבֵּינִי לַפְּנֵה אֱלֹפִירָה**, was published by Dukes,

and again, with important corrections, by Geiger in his *Wissenschaftliche Zeitschrift* (Leips. 1844), v, 317-324.

All these works Saadia wrote before he was thirty-six years of age, i. e. between A.D. 915 and 928. So great was the reputation which these works secured for him that he was called to Sora, in Babylon, where he was appointed gaon of the academy, a dignity which had never before been conferred upon any but the sages of Babylon, who were selected from the learned teachers of their own academies. After occupying this high position a little more than two years (928-930), he was deposed through the jealousy of others and his own unflinching integrity. In the presence of an anti-gaon, he retained his office for nearly three years more (930-933), when he had to relinquish his dignity altogether. In Bagdad, where he now resided as a private individual from 933 to 937, he wrote against the celebrated Masorite Aaron ben-Asher, as well as those two philosophical works, viz. the commentary on the *Book Jezira*, and the treatise commonly entitled *אמנות ודעות*, *Faith and Doctrine*, which were the foundation of the first system of ethical philosophy among the Jews. This latter work, which is intended to demonstrate the reasonableness of the articles of the Jewish faith, and the untenableness of the dogmas and philosophemes opposed to them, consists of ten sections, and discusses the following subjects: section 1, the creation of the world and all things therein; 2, the unity of the creator; 3, law and revelation; 4, obedience to God and disobedience, divine justice and freedom; 5, merit and demerit; 6, the soul and immortality; 7, the resurrection; 8, the redemption; 9, reward and punishment; 10, the moral law. The original of this work, entitled *האמונה והדעות*, and written in Arabic, has not as yet been published. It is in Ibn-Tibbon's Hebrew translation of it, made in 1186, under the title *האמונה והדעות*, and published in Constantinople (1562), Amsterdam (1648), Berlin (1789), in Fürst's German translation (Leipsic, 1845), and in Ph. Bloch's translation in the *Jüdisches Literaturblatt* (Magdeburg, 1878), which shows that this treatise is accessible to scholars. Saadia also wrote an *Agenda*, containing prayers and hymns, which are specified by Fürst. In the year 937 Saadia was reinstalled in his office as gaon of Sura, and died five years afterwards, in 942. See Rappaport,

Saalschütz, JOSEPH LEVIN, a learned German rabbi, was born in Königsberg, March 15, 1801, and was educated in his native place, where he was also made doctor of philosophy in 1824, having presented for this purpose to the faculty an elaborate treatise on the *Urim an. Thummim*. In the following year he published *Von der Form der hebr. Poesie, nebst einer Abhandlung über die Musik der Hebräer* (Königsberg, 1825), which he republished with two additional treatises under the title *Form und Geist der biblisch-hebr. Poesie* (*ibid.* 1853). He then went to Berlin, where he was engaged in the Jewish public school (1825-29), at the same time prosecuting his archæological researches. In 1829 he was called as rabbi to Vienna, where he remained until 1835, when he was called for the same position in his native place. Here he continued the remainder of his life, and published the following works: *Forschungen im Gebiete der hebräisch-ägyptischen Archäologie* (1838-49, 3 vols.)—*Das mosaische Recht* (1846-48, 2 vols.; Berlin, 1863, 2d ed.)—*Archäologie der Hebräer* (1856, 2 vols.)—*Die Ehe nach biblischer Vorstellung* (1858)—*Die klassischen Studien und der Orient* (1850). In 1849 he was appointed privatdocent in philosophy at the University of Königsberg—the first Jew who ever received such an appointment—and was afterwards made honorary professor. He died Aug. 23, 1863. See Fürst, *Bibl. Jud.* iii, 182 sq.; Zuchold, *Bibl. Theologica*, ii, 1103; Kitto, *Cyclop.* s. v.; Jost, *Gesch. d. Judenth. u. s. Secten*, iii, 362; *Theologisches Universal-Lexikon*, s. v.; Kayserling, *Bibliothek jüdischer Kanzelredner*, ii, 85 sq.; Jolowicz, *Gesch. d. Juden in Königsberg* (Posen, 1867), p. 130 sq.; *Ben Chananyá* (1864), p. 749 sq. (B. P.)

Saba or Sabas (Σάβας), the name of several saints of the Roman Catholic Church. See also SABAS.

1. A Gothic soldier who was martyred at Rome with 170 other persons under the emperor Aurelian (*Martyr. Rom.* April 24; Tillemont, *Mémoires*, iv, 363).

2. Another Goth and martyr who suffered many cruel tortures in the persecution under Athanaric, king of the Goths, and was finally drowned in the river Mæsus. His relics, together with a letter from the Gothic to the Cappadocian Church (which is preserved among the epistles of St. Basil), were sent to Cappadocia by the Roman governor on the Scythian border (Basil, *Eyp.* 155, 164, 165; *Martyr. Rom. and Acta SS.* April 12; Stolberg, xii, 209).

3. A hermit of Mount Sinai who, according to a statement by the hermit Ammonius (Combes, *Acta SS.*; Eust., etc. [Paris, 1660]), was mortally wounded in a surprise by the Saracens towards the close of the 4th century (Tillemont, *Mémoires*, vii, 575).

4. The name Sabas or Sabbas (according to Theodoret, *Vit. Patr.* c. ii, equivalent to *πρεσβύτερος*) was conferred upon the hermit Julian of Edessa by the Mesopotamians. Julian was accounted one of the leading hermits by Jerome and Chrysostom. He spent forty years of his life (about A.D. 330-370) in a narrow and damp cave in the desert of Osrène, practicing the utmost austerity, performing miracles—chiefly works of healing and exorcisms, descriptions of which are given by Theodoret—and instructing a band of nearly 100 pupils. The death of Julian the Apostate was revealed to this saint at the moment when that emperor fell in battle (A.D. 363), though twenty days' journey separated him from the scene of conflict (Theodoret, *II. E.* iii, 24). In

the reign of Valens the Arians of Antioch claimed that this hermit, whose fame extended over the entire East, belonged to their party; but Sabas, in response to the request of the Catholics, forsook his solitude for the first time in forty years, and appeared at Antioch to contradict the Arian boast, his journey to that place and back being signalized by the performance of numerous miracles. The recollection of this visit was still fresh when Chrysostom preached at Antioch. Sabas died in his cave, an old man. His festival is observed by the Greeks on Oct. 18 and 28, and by the Latins on Jan. 14 (*Acta SS.* Jan. 14; Tillemont, *Mémoires*, vii, 581; Stolberg, xii, 198).

5. The most noted saint of this name appeared at the beginning of the 6th century in connection with the Monophysite controversy. He was born about A.D. 439 at Mutalasca, in Cappadocia, of good family. At first a monk under the rule of St. Basil, he became a hermit in Palestine before completing the eighteenth year of his age, and was received into favor as a pupil by the hermit Euthymius, to whose prayers he owed the preservation of his life at a subsequent day, when he was dying of thirst in the desert (Stolberg, xvii, 168). He was made a priest in A.D. 484, and placed over all the hermits in the neighborhood of Jerusalem, eventually filling his station with great success, though at first the strictness of his rule gave much dissatisfaction and caused his withdrawal to a distant solitude. At the time of the Monophysite controversy, the patriarch Elias of Jerusalem sent him with other hermits to Constantinople with a view to dispose the emperor Anastasius more favorably towards the Catholic cause, but his mission failed to produce lasting results. Elias having been superseded in the patriarchate by John, who belonged to the party of Severus (q. v.), Sabas and others induced the new primate to renounce his views and acknowledge the Council of Chalcedon. The emperor endeavored to reclaim John, but was met with a spirit of defiant opposition, which found further expression in the pronouncing of a solemn anathema upon Nestorius, Eutyches, Severus, and all other opponents of the Council of Chalcedon. The revolt of Vitalian in the meantime diverted attention from the insubordinate monks, and in 518 the emperor Anastasius died. Sabas afterwards performed a second journey to Constantinople, a year before he died, for the purpose of obtaining a reduction of the oppressive imposts exacted from the population of

Palestine, and also to counteract the influence of Origenism, which began to make itself felt among the monks under his direction. He was received with great pomp, the emperor Justinian sending Epiphanius, the patriarch, and a number of bishops and courtiers in the imperial galleys to meet him, and on his arrival prostrating himself before the aged hermit to receive his blessing. The petition in behalf of Palestine was granted, and a large sum of money was offered to Sabas for the use of his convent; but this Sabas declined to receive, and asked that it be appropriated to other useful purposes in Palestine. Nothing, however, was done against Origenism while Sabas lived. See ORIGENISTIC CONTROVERSY. A joyful welcome awaited him on his return to Palestine, after which he retired to his *laura*, and died Dec. 5, A.D. 531 or 532. There is a Greek liturgy entitled *Tvrión*, etc. (printed at Venice, 1603, 1613, 1643, fol.), attributed to St. Saba, but of unknown authorship. See Cyrilli *Vita S. Sabæ* in Cotelierii, *Monum. Eccl. Gr.* iii, and Latin in Surius, Dec. 5; Tillemont, *Mémoires*, xvi, 701 sq.

SABA (*St.*), MONASTERY OF, now called *Deir Mar Saba*, still exists on the brink of Wady Nâr, the extension of the valley of the Kidron, near the Dead Sea. The surrounding scenery is of the wildest and most romantic character. See KIDRON. The convent hangs on the precipitous side of the ravine, being partly excavated out of the rock, and surrounded by a strong wall, accessible only on one side. The edifices within are extensive and commodious, being occupied by about sixty monks of the Greek rite, who are said to be quite rich. The original cell of the founder is shown, said to have been a cave occupied by a lion, which voluntarily relinquished it to the saint. The convent was plundered by the Persians in 533, and forty-four of the monks were then massacred; but it has survived all the vicissitudes of the Holy Land, of which it is one of the earliest monastic relics. No women are ever admitted within its portals, although the monks are hospitable to male visitors, provided they are furnished with the proper credentials. For a full description, see Robinson, *Researches*, i, 382, 521; Thomson, *Land and Book*, ii, 435; Porter, *Handbook for Pal.* p. 229.

Sabach'thani [many *sabachtha'ni*] (σαβαχθάνι, a Græcized form of the Chaldee *shebaktani*, שְׁבַקְתָּנִי, *thou hast left me*), quoted by our Lord upon the cross

Convent of Mar Saba (from a photograph by the Editor).

(Matt. xvii, 46; Mark xv, 34) from the Targum on Psa. xxii, 2 (where the Heb. has *azabtu'ni*, אָזַבְתָּנִי, "thou hast forsaken me"). See Petersen, *Erforschung des Wortes σαββα* (s. l. 1701). Comp. AGONY.

Sabæ'an. As much confusion has been introduced by the variety of meanings which the name *Sabæans* has been made to bear, it may be proper to specify in this place their distinctive derivations and use. In our Authorized Version of Scripture the term seems to be applied to three different tribes.

1. The *Seba'im* (סְבִימִים, with a *sámech*), the descendants of Seba or Saba, son of Cush, who ultimately settled in Ethiopia. See SEBA.

2. The *Shebaim* (שְׁבַיִם, with a *shin*), the descendants of Sheba, son of Joktan, the *Sabæi* of the Greeks and Romans, who settled in Arabia Felix. They are the "Sabæans" of Joel iii, 8, to whom the Jews were to sell the captives of Tyre. The unpublished Arabic Version, quoted by Pocock, has "the people of Yemen." Hence they are called "a people afar off," the very designation given in Jer. vi, 20 to Sheba, as the country of frankincense and the rich aromatic reed, and also by our Lord in Matt. xii, 42, who says the queen of Sheba, or "the south," came *ik tōw pēpātōw tēs qhēs*, "from the earth's extremes." See SHEBA.

3. Another tribe of *Shebans* (Heb. *sheba'*, שְׁבָא, also with a *shin*), a horde of Bedawin marauders in the days of Job (i, 15); for whether we place the land of Uz in Idumæa or in Ausitis, it is by no means likely that the Arabs of the south would extend their excursions so very far. We must therefore look for this tribe in Desert Arabia; and it is singular enough that, besides the Seba of Cush and the Shaba of Joktan, there is another Sheba, son of Jokshan, and grandson of Abraham, by Keturah (Gen. xxv, 33); and his posterity appear to have been "men of the wilderness," as were their kinsmen of Midian, Ephah, and Dedan. To them, however, the above-cited passage in the prophecy of Joel could not apply, because in respect neither to the lands of Judah nor of Uz could they be correctly described as a people "afar off." As for the *Sabaim* of Ezek. xxiii, 42 (where our version also renders by Sabæans), while the Keri has *Saba'iyam*, סְבִימִים, the Kethib has *Sobe'im*, סְבִימִים, i. e. "drunkards," which better suits the context. See SHABA.

4. Yet, as if to increase the confusion in the use of this name of "Sabæans," it has also been applied to the ancient star-worshippers of Western Asia, though they ought properly to be styled *Tsabitans*, and their religion not Sabæism, but *Tsabæism*, the name being most probably derived from the object of their adoration, *tseba'*, טְּבָא, the host, i. e. of heaven (see an excursus by Gesenius in his translation of Isaiah, *On the Astral Worship of the Chaldeans*, and SABAOOTH).

5. The name of Sabæans, or Sabians, has also been given to a modern sect in the East, the *Mandaites*, or, as they are commonly but incorrectly called, the "Christians" of St. John; for they deny the Messiahship of Christ, and pay superior honor to John the Baptist. They are mentioned in the Koran under the name of *Sabianna*, and it is probable that the Arabs confounded them with the ancient Tsabitans above mentioned. Norberg, however, says that they themselves derive their own name from that which they give to the Baptist, which is *Abo Sabo Zakrio*; from Abo, "father;" Sabo, "to grow old together;" and Zakrio, e. g. Zechariah. "The reason they assign for calling him Sabo is because his father, in his old age, had this son by his wife Aneshbat (Elizabeth), she being also in her old age (see Norberg's *Codex Nasaræus, Liber Adami Appellatus*, and Silvestre de Sacy, in the *Journal des Savans* for 1819). See SABIANISM.

Sabaism. See SABÆAN.

Sabānus (σάβανος, classical σάβανον, a linen

cloth), a white cloth with which the infant was covered in baptism. This was an ancient practice. From the 4th century we find frequent mention of clothing the newly baptized in white garments. These garments, as emblems of purity, were delivered to them with a solemn charge to keep their robes of innocence unspotted till the day of Christ. The neophytes wore this dress from Easter eve until the Sunday after Easter, which was hence called *Dominica in albis*, that is, "the Sunday in white." This garment was usually made of white linen, but sometimes of more costly materials. See ALB; CHRISOME.

Sab'aōth [some *Saba'oth*] (σαβᾶωθ, a Græcized form of the Heb. *tsebaoth'*, צְבָאוֹת, *armies*), a word occurring in this form only in the A. V. in Rom. ix, 29; James v, 4; but in the Heb. of frequent occurrence in the phrase "Jehovah of hosts," or "Jehovah, God of hosts." "It is familiar through its occurrence in the *Sanctus* of the *Te Deum*, 'Holy, Holy, Holy, Lord God of Sabaoth.' It is often considered to be a synonym of, or to have some connection with, *Sabbath*, and to express the idea of rest, and this not only popularly, but in some of our most classical writers. Thus Spenser, *Faery Queene*, canto viii, 2:

'But thenceforth all shall rest eternally
With him that is the God of Sabaoth hight:
O that great Sabaoth God, grant me that Sabaoth's
sight;

also Bacon, *Advancement of Learning*, ii, 24: "... sacred and inspired divinity, the Sabaoth and port of all men's labors and peregrinations;" Johnson, in the first edition of whose *Dictionary* (1755) Sabaoth and Sabbath are treated as the same word; Walter Scott, *Ivanhoe*, vol. i, ch. xi (1st ed.): "a week, aye the space between two Sabaoths." But this connection is quite fictitious. The two words are not only entirely different, but have nothing in common." The Heb. term *tseba'*, צְבָא, signifies an *army* (see Deut. xxiv, 5; Exod. vi, 26). The plural is used in the sense of armies (Exod. vii, 4, and often). The singular is sometimes applied to the company of angels which surround the throne of Jehovah, who are called *צְבָאוֹת הַשָּׁמַיִם*, *tseba' hash-shamayim*, "the host of heaven." The same phrase is also applied to the stars, for the most part as objects of idolatrous worship; indeed, the expression appears to include everything in heaven, both angels and heavenly bodies. Isaiah uses the phrase *צְבָאוֹת הַמָּרוֹם*, *tseba' ham-marōm*, "the Host on High," in opposition to the kings of the earth. God is called *יְהוָה צְבָאוֹת*, *Yehovah elohey' tseba'oth*, "Jehovah God of hosts," which most commentators regard as synonymous with "God of heaven" (see Zenkei *De Synonymis* *צְבָאוֹת et צִלְיוֹן*, Lips. 1763), though others assert that it should be taken in a military sense, as the God of armies or wars. "It designates him" as the supreme head and commander of all the heavenly forces; so that the host of Jehovah is all one with the host of heaven (1 Kings xxii, 19), and must be understood strictly of the angels, who are ever represented as the Lord's immediate and fitting agents, ready on all occasions to execute his will (Psa. ciii, 41; cxlviii, 2). It is never applied to God with reference to the army of Israel. Once, indeed, the companies composing this are called 'the hosts of the Lord' (Exod. xii, 41), because they were under his direction and guardianship; but when employed with the view of heightening the idea of God's greatness and majesty, as the term 'hosts' is in the phrases in question, the hosts can only be those of the angelic or heavenly world (see Gesenius, *Thesaur.* s. v.). See HOST.

Sa'bat (Σαβάρ, v. r. in Esdr. Σαφάρ and Σαφίγ), the Græcized form of three names in the Apocrypha.

1. The head of one of the families of "Solomon's servants" who returned from the captivity with Zerubba-

bel, according to 1 Esdr. v, 34; but the Heb. lists (Ezra ii, 57; Neh. vii, 59) have no corresponding name.

2. The Jewish month SHEBAT (q. v.) (1 Macc. xvi, 14).

Sabatæ'as (Σαβαταῖας v. r. Σαββαταῖας and Σαβαταῖος), a Græcized form (1 Esdr. ix, 48) of the Heb. name (Neh. vii, 7) SABBETHAI (q. v.).

Sabatniki, a sect of Russian Sabatarians, or "Sabbath-honourers," which arose in Novgorod (cir. A.D. 1470), where some clergy and laity were persuaded by a Jew of Kiev, named Zacharias, into a belief that the Mosaic dispensation alone was of divine origin. They accepted the Old Testament only, of which, being unacquainted with Hebrew, they used the Slavonic translation. Like the Jews, they were led to expect the advent of an earthly Messiah. Some of them denied the Resurrection; and, being accused of practicing several cabalistic arts, for which points of Jewish ceremonial may have been mistaken, were regarded by the common people as soothsayers and sorcerers. They were gradually becoming a powerful sect, one of their number, named Zosima, having even been elected archbishop of Moscow, when in A.D. 1490 they were condemned by a synod, and a fierce persecution nearly obliterated them. But here and there, in remote parts of Russia, travellers have within the last century discovered fragmentary communities holding Jewish views, which have been thought to be relics of the older sect of Sabatniki. In Irkutsk they continue to exist under the name of *Sesleneuschchini*. See Platon, *Present State of the Greek Church in Russia* (Pinkerton's transl.), p. 273.

Sab'atus (Σάβατος, v. r. Σάβαςος), a Græcized form (1 Esdr. ix, 28) of the Heb. name (Ezra x, 27) ZABAD (q. v.).

Sabazius, a deity worshipped by the ancient Phrygians, alleged to have sprung from Rhea or Cybele. In later times he was identified both with Dionysus and Zeus. The worship of Sabazius was introduced into Greece, and his festivals, called Sabazia, were mingled with impurities.—Gardner, *Faiths of the World*, s. v. See also Vollmer, *Wörterbuch der Mythol.* s. v.

Sabba. See SABA.

Sabbæ'us (Σαββαῖος, v. r. Σαββαῖας), a corruptly Græcized form (1 Esdr. ix, 22) of the Heb. name (Ezra x, 31) SHEMAIAH (q. v.).

Sab'ban (Σάββανος; Vulg. *Baumi*), a corrupt form (1 Esdr. viii, 63) of the Heb. name (Ezra viii, 33) BIN-NUI (q. v.).

Sabbas, *St.* (*Prince Rasteo*), a mediæval ecclesiastic, was born during the latter part of the 12th century. He was the son of Stephen Nemanja, founder of the kingdom of Servia. Contrary to the wishes of his father, Rasteo embraced the monastic life, and, though young, was soon made abbot. He prevailed upon the patriarch of Constantinople to create a Servian archbishopric, and was himself the first to enjoy the position. He made an extended tour through Egypt and the Holy Land, and, on his return, died at Trnava, in Bulgaria, Jan. 14, 1237. His remains were placed in the monastery at Miléchiwo, but were burned in 1595 by the order of Sikan Pasha. The 14th of January is kept in memory of this saint.

Sabbatarians, those who keep the seventh day as the Sabbath. They are to be found principally, if not wholly, among the Baptists. They object to the reasons which are generally alleged for keeping the first day, and assert that the change from the seventh to the first was effected by Constantine on his conversion to Christianity. The three following propositions contain a summary of their principles as to this article of the Sabbath, by which they are distinguished: 1. That God has required that the seventh, or last, day of every week be observed by mankind universally for

the weekly Sabbath. 2. That this command of God is perpetually binding on man till time shall be no more. 3. That this sacred rest of the seventh-day Sabbath is not (by divine authority) changed from the seventh and last to the first day of the week, or that the Scripture nowhere requires the observance of any other day of the week for the weekly Sabbath but the seventh day only. They hold, in common with other Christians, the distinguishing doctrines of Christianity. See Evans, *Sketches of the Denominations of the Christian World*. See BAPTISTS, SEVENTH-DAY.

Sabbatâti, a name applied sometimes to the *Waldenses* (q. v.), from the circumstance that their teachers wore mean or wooden shoes, which in French are called *sabots*.

Sabbath, JEWISH. The word *Sabbath* is, in Hebrew, *shabbath'*, שַׁבָּת (comp. Ewald, *Ausführl. Lehrb.* p. 400; and see on the form *shabbathôn*, שַׁבְּתוֹן, at the end of this art.); in the Græcized form *σάββατον*, or, in the plural form, *τὰ σάββατα* (comp. Horace, *Sat.* i, 9, 69). The derivation and meaning of the word are well known. Josephus (*Apion*, ii, 2) explains it as a *rest from all labor*, ἀνάπαυσις ἀπὸ παντὸς ἔργου (comp. *Ant.* i, 1, 1). Mistaken etymologies, by those ignorant of Hebrew, are found in Josephus, *Apion*, loc. cit.; Plutarch, *Symp.* iv, 6, 2; Lactantius, *Institut.* vii, 14. On *Sabbath* (Gr. *σάββατα*) in the sense of *week*, see WEEK. It is clear that the word ἑβδομάς (2 Macc. vi, 11) means the *Sabbath* (comp. Josephus, *War*, ii, 8, 9).

This was the seventh day of the Hebrew week, extending from sunset on Friday to sunset on Saturday (comp. Lev. xxiii, 32, and see Lightfoot, *Hor. Hebr.* p. 312 sq.). See DAY. The time during which the sun was going down was the eve of the Sabbath. See PREPARATION. Of course, the commencement and close of the Sabbath varied with the higher or lower position of the observer. Thus, Carpvov quotes from the book *Musar* this statement: "Tiberias lay in a valley, where the sun disappeared half an hour before setting; Zephore was on a mountain, where the sun shone longer than on the plains. The people in the former, therefore, began their Sabbath sooner, in the latter later, than the rest of the nation." By a law of Augustus (Josephus, *Ant.* xvi, 6, 2), the Sabbath began at the ninth hour. According to the disciples of the Gemara, the Sabbath began and ended in all Jewish cities at the sound of the trumpet (comp. Maimon. *Hilkoth Shab.* c. 5). Josephus records this custom of Jerusalem (*War*, iv, 9, 12). In the Temple, the trumpet was to be blown from the "covert for the Sabbath," or *Sabbath-roof*, Heb. *Mesák hash-shabbáth*, מִסְכֵּי הַשַּׁבָּת (2 Kings xvi, 18). See Rhenferd, *Opera Philol.* p. 770 sq.

This day was celebrated by the Hebrews as a holy day (Deut. v, 12), a day of rest and rejoicing (Isa. lviii, 13; comp. Hos. ii, 11; 1 Macc. i, 41), by ceasing from all labor, with their servants and all strangers, as well as cattle (Exod. xx, 10; xxxi, 13 sq.; xxxiv, 21; xxxv, 2, Deut. v, 14, comp. Jer. xvii, 21, 24; Josephus, *Apion*, ii, 39; Dion Cass. xxxvii, 17 [Philo, *Opp.* ii, 137, extends the Sabbath-rest even to plants—they were not to be eared or reaped on that day]), and by a special burnt-offering, presented in the Temple, in addition to the usual daily offering (q. v.)—which was doubled on this day—consisting of two yearling lambs, with the meat-offerings and drink-offerings belonging to it (Numb. xxxviii, 9; comp. 2 Chron. xxxi, 3; Neh. x, 33; Ezek. xli, 4). In the holy place of the Temple, the shewbread was renewed (Lev. xxiv, 8; 1 Chron. ix, 32), and the new division of priests appointed for that week took their places (2 Kings xi, 5, 7, 9; 2 Chron. xxiii, 4). The services of the priests and Levites in and about the tabernacle and Temple were not accounted *labor* (comp. Matt. xii, 5), and continued through the Sabbath. Circumcision, too, as a religious ceremony, took place on the Sabbath, when that was the eighth day

(John vii, 22 sq.; comp. Mishna, *Shab.* c. 19; Schöttgen, *Hor. Hebr.* i, 121; Lightfoot, *Hor. Hebr.* p. 1028).

Deliberate profanation of this day was punished with death (Exod. xxxi, 14 sq.; xxxv, 2), which was inflicted by stoning (Numb. xv, 32 sq.; Mishna, *Sanhedr.* vii, 8). But if the law of the Sabbath was broken through ignorance or mistake, a sin-offering was required, and the offence pardoned (comp. *Shab.* vii, 1; xi, 6; *Chri-thuth*, iii, 10). There were times, too, when the Jews dispensed with the extreme severity of their law (Isa. lvi, 2; lviii, 13; Ezek. xx, 16; xxii, 8; Lam. ii, 6; Neh. xiii, 16); and the legal observance of the Sabbath seems never to have been rigorously enforced until after the Exile. At this time, too, the meaning of the *work* which profaned the Sabbath was first strictly defined, since the lawgiver had left this to be determined by experience, and, in certain doubtful cases, the individual conscience, definitely prohibiting but one act—the kindling of a fire in one's house (Exod. xxxv, 3; comp. Eichhorn, *Repert.* ix, 32; xiii, 258) for cooking (Exod. xvi, 23; Numb. xv, 32; comp. Mishna, *Terum.* ii, 3). This was interpreted by the Jews, however, to include the lighting of lamps, and they used to do this before the Sabbath began (Mishna, *Shab.* ii, 7; xvi, 8; comp. Seneca, *Ep.* 95, p. 423, Bip.). This prohibition compelled the Jews to cook and bake their food for the Sabbath on the preceding day, and it was often kept warm in vessels set in dry hay or chips (Mishna, *Shab.* iv, 1 sq.; comp. also Josephus, *War.* ii, 8, 9, on the Essenes). The intermission of labor was required on feast-days as well as on the Sabbath, except the preparation of food (comp. Exod. xii, 16; see Mishna, *Yom Tob*, v, 2; *Megilla*, i, 5). A later age, which sought to observe painfully the letter of the law, and to confide as little as possible to the judgment and conscience of individuals, extended the meaning of this *work* much further, and strove to complete a formal code for Sabbath observance. Marketing and public trade ceased on the Sabbath, of course (Neh. x, 31; xiii, 15, 16); and it was merely an auxiliary police regulation of Nehemiah to close the gates on that day (Neh. xiii, 19). It was in the spirit of the law, too, that travelling on the Sabbath was forbidden, with reference to Exod. xvi, 29 (comp. Josephus, *Ant.* xiii, 8, 4). See SABBATH-DAY'S JOURNEY. But the conduct of the Jewish armies in refusing to arm on the Sabbath, and suffering their enemies to cut them down, certainly savored of fanaticism (1 Macc. ii, 32 sq.; 2 Macc. vi, 11; Josephus, *Ant.* xii, 6, 2; *War.* ii, 17, 10; *Life*, p. 32; comp. Plutarch, *Superstit.* p. 169). A parallel may be found in the Jewish steersman who left the helm at the moment of a squall because the Sabbath was beginning (Synes. *Ep.* iv, p. 163, ed Petav.). Yet the apprehension of the great advantage which would thus accrue to the enemy led prudent commanders to observe this rest from fighting only so far as to abstain on the Sabbath from offensive operations (1 Macc. xi, 34, 43 sq.; Josephus, *Ant.* xiii, 1, 3; xiv, 4, 2 sq.). Marching armies halted on that day (Josephus, *Ant.* xiii, 8, 4; comp. xiv, 10, 12). The last passage seems to show that the Sabbath law was made a pretext by Jews to escape from foreign military service when they wished (see again *Ant.* xviii, 9, 2; 10, 2; *War.* iv, 2, 3; Michaelis, *Mos. Recht*, iv, 133 sq.). Yet in the last Jewish war less caution was exercised, even in abstaining from offensive movement (Josephus, *War.* ii, 19, 2); and many an artifice was carried on by the aid of the Sabbath and its observances (*ibid.* iv, 2, 3). In this instance, it was less the fear of breaking the law than a shrewd calculation of advantage which prevented the Jews from engaging the enemy on the Sabbath).

The Pharisees gave very minute directions on the observance of the Sabbath; and although different teachers differed in many points, yet in the New-Testament period we find great rigor prevailing. The plucking of single ears of grain in passing (Matt. xii, 2; Mark ii, 23 sq.; Luke vi, 1 sq.), the healing of the sick (Matt. xii, 10; Mark iii, 2; Luke vi, 7; xiii, 14;

John ix, 14, 16; Thilo, *Apocr.* p. 503), the walking of a cured patient with his bed (John v, 10), all were considered as desecrations of the Sabbath by the Pharisees and their disciples; although when property was in danger, many acts which were certainly *work* were freely performed in case of pressing need (Matt. xii, 11; Luke xiv, 5; comp. Gemara, *Shab.* cxxviii, 1); yet even in the care of cattle (comp. Luke xiii, 15) all work was to be shunned which was not really necessary (*Shab.* xxiv, 2 sq.). The Essenes seem to have been yet stricter in observing this day. The Mishna (*Shab.* c. 17) has severe regulations against the removal of goods; yet certain exceptions were allowed (comp. Philo, *Opp.* ii, 569). On the severity of the Samaritans in this respect, see Gesen. *De Theol. Samarit.* p. 35 sq.; comp. Origen, *Princip.* iv, 17; tom. i, p. 176). They refrained from sexual intercourse on the night of the Sabbath (Eichhorn, *Repert.* xiii, 258). The Mishna, in the tract *Shab.* (2d part), which treats the whole subject of this article, names in particular (vii, 2) thirty-nine forms of labor which are forbidden on the Sabbath, each of which has, again, its variations and species. In the twofold Gemara to this tract (the *Tosiph-ta* to the tract *Shab.* is found in Hebrew and Latin in Ugolini *Theaur.* xvii; the tract itself has been separately edited by J. B. Carpzov, Leips. 1661), and in the Rabbinical writings the matter is spun out still further and finer (see Hulsius, *Theol. Jud.* i, 240 sq.; Buxtorf, *Synag. Jud.* c. 16; Schöttgen, *Hor. Hebr.* i, 121 sq.). As to the healing of the sick, the rabbins generally allowed the use of all proper remedies if life was in danger (see Mishna, *Yoma*, viii, 6; Schöttgen, *op. cit.* p. 122 sq.; Danz, *Christi Curatio Sabbathica Vindic.* [Jen. 1699]; also in Meuschen, *N. T.* p. 569 sq.); but those which were only designed to make the sick more comfortable were rigorously forbidden (see, e. g. Gemara, *Berachoth*, p. 11. According to the Mishna [*Shab.* xxii, 6], even a broken bone was not to be set nor dislocations poulticed on the Sabbath; yet see Maimonides, *ad loc.*). On the other forms of labor permitted on the Sabbath (Mishna, *Shab.* xxiv, 5) the reader may consult V. H. Hasenmüller, *Opera Sabbathum Depellantia* (Jen. 1708).

The Sabbath was especially consecrated to devotion and to the law (Josephus, *Ant.* xvi, 2, 4), and frivolous or unclean conversation was accounted a desecration of the day (Gesen. *In Jesa.* ii, 230). Hence in the synagogues everywhere on this day took place the great services of worship (Mark i, 21; vi, 2; Luke iv, 16, 31; vi, 6; xiii, 10; Acts xiii, 44; xvi, 13; xvii, 2; xviii, 4), with prayer and the public reading and expounding of the holy books (Luke iv, 16 sq.; Acts xiii, 27; Josephus, *Apion*, i, 22). This, however, cannot be considered as a Mosaic regulation (see Vitranga, *Synag.* i, 2, 2); but see LAW. Cheerful meals were held (Luke xiv, 1; Philo, *Opp.* ii, 477. The *ariston* [ἀριστον] was taken on the Sabbath about the sixth hour [Josephus, *Life*, p. 54]. On the three meals of the Sabbath, see Mishna, *Shab.* xvi, 2, and Maimon. *ad loc.*; feast-day clothing was put on (Sharbau, *De Luru Sabbathorio*, in his *Observ.* Sacr. iii, 541 sq.); and it was never a fast-day (Jud. viii, 6. Justin's remark [xxxvi, 2], which makes it a fast, is untrue. Comp. Sueton. *Aug.* 76, where Ernesti's explanation does not accord with the usage of speech; Petron. *Fragm.* xxxv, 6. See contra, Maimon. *Hilkoth Shab.* Extr. Comp. P. T. Carpzov, *De Jejun. Sabb. ex Antiq. Hebr.* [Rostoch. 1741]).

When the Jews were under foreign supremacy, except during the reign of Antiochus Epiphanes (1 Macc. i, 45, 48; 2 Macc. vi, 6), their legal Sabbath was confirmed (comp. 1 Macc. x, 34; Josephus, *Ant.* xiv, 10, 20, 21, 23, 25); and even in the composition of the civil law, a conciliatory respect was shown to it (Josephus, *Ant.* xvi, 6, 2 and 4; Philo, *Opera*, ii, 569). It is still a question how far the Jewish legal administration itself regarded the Sabbath (see, among others, Tholuck, *On John*, p. 302 sq.; Bleek, *Beiträge z. Evangelienkritik*, p. 140 sq.). The Mishna (*Yom Tob*, v, 2) says expressly

that no court was held on that day, nor even was a session begun the afternoon preceding, lest it might encroach upon the Sabbath (Mishna, *Shab.* i, 2; comp. Gemara, *Sanhed.* fol. 35, 1; nor can the force of these passages be removed by Gemara, *Sanhed.* fol. 88, 1, even though it referred to this subject). See COUNCIL. It is remarkable that at one time the Jews themselves made an effort in Syria to do away with the observance of the Sabbath (Josephus, *War.* vii, 3, 3). This effort was aided, perhaps, by the view which the Romans took of this weekly rest, often mocking the Jews as slothful (Juvenal, xiv, 105 sq.; Seneca, in Augustine, *Civ. Dei*, vi, 11).

The origin of the Sabbath is usually referred to Moses by the German critics (Ewald, *Gesch. Isr.* ii, 142 sq.) on the ground that Gen. ii, 1 cannot be accepted as a testimony to its earlier institution, since this whole account of the creation, whose date and author are unknown, is plainly designed for the very purpose of presenting the Sabbath to us as an immediate divine ordinance (see Gabler, *Neuer Vers. über die mos. Schöpfungsgesch.* p. 38 sq.; De Wette, *Krit.* p. 40 sq.), just as it is often set forth in later writings in connection with the exode and with the legislation of Sinai (Ezek. xx, 10 sq.; Neh. ix, 13 sq.; comp. Deut. v, 14 sq., with which Exod. xvi, 23 agrees). Reggio, by a peculiar explanation of Gen. ii, 1 sq., arrives at a distinction between the Sabbath appointed here for all mankind and that given to the Jews in their law (*Zeitschrift für d. Judenth.* 1845, p. 102 sq., 121 sq.). The Sabbath is considered as a Mosaic institution also by Eusebius (*H. E.* i, 4, 3; *Prep. Ev.* vii, 6) and most of the rabbins (Selden, *Jus. Nat. et Gent.* iii, 10). Among the more recent writers, this view is adopted by Spencer (*Leg. Rit.* i, 4, 9 sq.); Eichhorn (*Urgesch.* i, 249 sq.); Gabler (*ibid.* p. 58 sq.; *Neuer Versuch.* p. 38 sq.); Bauer (*Gottesdienstl. Verf.* ii, 174 sq., in answer to Hebenstreit, *De Sab. ante Leg. Mos. Existente* [Lips. 1748]); Iken (*Dissert. Theol.* p. 26 sq.); Richter (in the *Biblioth. Brem. Nova*, iii, 310 sq.); Michaelis (*Mos. Recht*, iv, 110 sq.). See SABBATH, CHRISTIAN.

The question may be raised whether the Sabbath was not borrowed by Moses from some other ancient people, as the Egyptians. It is not necessary to discuss the unhistoric suppositions of Philo (ii, 137) and Josephus (*Apion*, ii, 39) that this feast was very widely spread among ancient nations. Yet it appears from Seneca (*Ep.* 95, p. 423, Bip.) and Ovid (*Remed. Amor.* p. 219) that a reverence for the seventh day had found an entrance among the Romans (comp. Ideler, *Chron.* ii, 176). Various strange opinions as to the origin of the Sabbath have been suggested which answer themselves (Plutarch, *Sympos.* iv, 6, 2). (On the pretended Jewish worship of Saturn, see Buttmann, *Mythol.* ii, 44 sq.) It is certain that the Egyptians knew the reckoning by weeks, and even began each successive week with the day of Chronos (Dion Cass. xxxvii, 18, 19). Baur, following Tacitus (*Hist.* v, 5), has connected the Sabbath with the worship of Chronos-Saturn, to whom the Romans also dedicated particularly the seventh day of the week (*Tübinger Zeitschr. für Theol.* 1832, iii, 145 sq.; comp. Movers, *Phöniz.* p. 315); hence the Roman historians compared the Jewish Sabbath with the day of Saturn (Dion Cass. xxxvii, 17, 18; Tibul. i, 3, 17). His view rests on the well-known representation by the Greeks and Romans of the golden age long gone by, the age of rest and equality, under Saturn, and the custom connected with it of giving the slaves a holiday at the Saturnalia (see Syrb, *De Sabbato Gentili in Temp. Helvet.* ii, 527 sq.; and in Ugolini *Thesaur.* vol. xvii; comp. also Wernsdorf, *Diss. de Gentil. Sabbato* [Viteb. 1722]). But this theory is so finespun that it falls to pieces at the first touch, for the passage in Dion Cassius does not do anything towards proving a naming of the days of the week after the planets (see Ideler, *Chronol.* i, 180). And the Western representations of Saturn can so much the less be transferred to the East in that,

even among the Romans, the day of Saturn was counted an unlucky one. Astrologically, too, the day of Saturn is the first, not the seventh, of the week. But, apart from all this, it was more natural for an agricultural people to keep as a festival the last day of the week, after men and beasts had become wearied with toil, in rest, and with ceremonies in accordance with their religious character, particularly with sacrifices. Why should we seek a foreign model for all the Mosaic institutions? Why refer these simple observances to such far-fetched and generally unsuitable explanations? (See especially Bähr, *Symbol.* i, 584 sq. In answer to Von Bohlen, *Genesis*, p. 137, Introd. see Tuch, *Genesis*, p. 14 sq.)

The Sabbath, as the basis of the Israelitish cycle of feast-days, was imitated and repeated, as it were, in several other festivals; e. g. the Sabbath Year, the Seventh New Moon, and the Year of Jubilee. On the subject of the whole article, see Carpzov, *Appar.* p. 382 sq.; Reland, *Ant. Sacr.* iv, 8; Bauer, *op. cit.* ii, 152 sq.; Jahn, iii, 388 sq.; Gisb. Voetii *Dis. Sel.* iii, 1227 sq.; Bähr, *Symbol.* ii, 566 sq., 577 sq.

A figurative use of the word "Sabbath" denotes a solemn festival on which servile work was proscribed; but this occurs only with respect to the great day of annual atonement (Lev. xxiii, 33). The word properly representing such an abstract idea of rest is שַׁבְּתוֹן, *shabbatōn*, σαββατισμός, *sabbatism* (q. v.). The term "Sabbath," however, is frequently applied to a longer hebdomadal cycle than that of the week, e. g. the sabbatic year (q. v.). The Rabbinic or orthodox Jews likewise claim that in Lev. xxiii, 11-16, שַׁבָּת, *Sabbath*, is synonymous with פֶּסַח, *Passover*, and accordingly they reckon Pentecost from the 16th of Nisan, the second day of unleavened bread, instead of the Sabbath following it. See CALENDAR, JEWISH. In this they are upheld by a majority of Christian archaeologists and interpreters. The Karaites, on the contrary, contend that the word "Sabbath" in that ordinance has its regular and usual signification, namely, the seventh day of the week. The arguments advanced for the traditional view and reckoning, formidable as they at first appear, will be found, on a close examination, to be wholly inconclusive. (1.) It is a pure assumption that the phrase שַׁבְּתוֹן הַמָּחָר, *morrow of the Sabbath*, is equivalent to בִּיחֶרֶת הַפֶּסַח, *morrow of the Passover*. The passage in Josh. v, 11, often appealed to in proof, states that on the latter day the Israelites ate the produce of Canaan (עֲבֵרֵי הָאָרֶץ, A. V. erroneously "old corn of the land"), consisting of unleavened cakes and parched ears. From this it has been inferred that, as the Passover had just been celebrated, the wave-sheaf, which was a necessary preliminary to harvest (Lev. xxiii, 14), had already been offered. This, as all parties agree, could not be done before the 16th of Nisan, and hence Keil and others unwarrantably assume that this was the day in question. But we know, from its use elsewhere (Numb. xxiii, 3), that the phrase "morrow after [Heb. of] the Passover" was the day immediately succeeding the Paschal meal, i. e. the 15th of Nisan. The wave-sheaf had not therefore at that time been offered, and the Israelites could not have stood upon ceremony in eating the new grain, probably because they had not yet become settled in their possession to which the law in question was specially applicable (Lev. xxiii, 10; comp. Numb. xv, 18). (2.) The definite art. in שַׁבְּתוֹן in the ordinance under consideration merely indicates it as the one Sabbath of the Paschal week, and cannot refer to any other of the Passover days in the context, which are not (either there or elsewhere) designated by this term. Nor is the word שַׁבָּת, *Sabbath*, ever used in Biblical Hebrew in the sense of a literal week, as the Rabbinical theory assumes. The seven Sabbaths are termed *full* (תְּחִלָּתוֹ, "complete") because they are exclusive of the *terminus a*

quo, contrary to the usual Jewish practice, which is to include both extremes. (3.) The reckoning of Pentecost from the Sabbath proper would not disagree with the classification of the other Jewish feasts by terms of seven, nor tend to displace either that or the Passover in the calendar; for the other feasts were not dependent upon the Pentecost, and the fifty days would be equally regular and harmonious from whatever point reckoned. (4.) The weight of Jewish authority is of little account, and the accession of Christian writers is of still less, since there is known to have been an early difference of opinion and practice on this point. The two instances occurring in the New-Test. history are decidedly adverse to the Rabbinical mode of computation, namely, the "second Sabbath after the first," on which Jesus passed through the fields of standing corn (Luke vi, 1) [see SECOND-FIRST SABBATH], and the first Pentecost of the Christian Church, which by the traditional calendar would have fallen on the Sabbath (the seventh after that of the crucifixion), and not on Sunday, as generally admitted. See PENTECOST; SABBATH, MORROW AFTER.

In Luke vi, 1 we have the above-noted phrase, *σάββατον δευτερόπρωτον*, rendered in the A. V. "The second Sabbath after the first." It is over-hasty, after a few MSS., to blot out the second word as not genuine, though even Meyer does so. Who could have inserted it? And is not the omission of a word which nobody understood easily accounted for in the few instances in which it takes place? To strike out a word simply as *strange* is too uncritical to be borne. The various older interpretations are collected in Wolf, *Cur.* i, 619 sq.; Rus, *Harm. Evang.* p. 639 sq.; Paulus, *Comm.* ii, 32 sq. It is usually regarded as the first Sabbath after the second Easter-day (comp. Lev. xxiii, 15, and the Sept.), since from this day to the Passover seven Sabbaths were reckoned (Lev. i. c.), and these may well have been distinguished by their numbers—the first, second, third, etc., after the second Easter-day (Scaliger, *De Emend. Temp.* p. 557; Casaub. *Exercit. Antibar.* p. 272; Bauer, *op. cit.* ii, 154). Olshausen's objections to this view do not seem to be forcible. His own explanation (following Beza and Paulus), the first Sabbath of two during a feast, is not plausible. A peculiar name would hardly be given to this; and, even if given, would be of no importance to the evangelist. Moreover, in such a case the phrase would be inappropriate at best. Credner's view (*Beitr. z. Einl. ins N. T.* i, 357) is rightly answered by De Wette, *On Luke*, i. c. The objections made by Paulus and others to our interpretation have been well answered by Lückert (in the *Studien u. Krit.* 1835, iii, 664 sq.). Yet he takes no notice of P. Ewald's suggestion (in the *Neu. krit. Journ.* d. Theol. ii, 480) that the phrase may easily be an abridged Hebrew expression for the second Sabbath after the second Paschal day; in which, however, the proof that such a phrase was in use in the age of Jesus is wanting. Hitzig understands it to mean the 15th of Nisan, which, according to Lev. xxiii, 11, was considered as a Sabbath, following the 14th, which had always been a Sabbath. This, however, is unsupported. Wieseler gives (*Chronol. Synop.* p. 231 sq.) an interpretation intimately connected with his whole system, that it is the first Sabbath in the second year of the seven years, reckoned from one sabbatical year to another; i. e. the first Sabbath of Nisan. Here it is assumed that a technical term was appropriated to the first Sabbath of every year in such a series of years; which is the less probable, as the civil year, with which the sabbatical year is connected (comp. Wieseler, p. 204 sq.), began in autumn. Add to this that no mode of reckoning in practical life by Sabbath years has been proved from Josephus (*Ant.* xiv, 10, 5 and 6), nor from the Mishna. In fine, the effort of Redsløb to refer this phrase to the second Sabbath after the second Easter-day by the force of the word *δευτερόπρωτον* (*Hall. Lit.-Z.* 1847; *Int. Bl.* No. 70) seems to be a mistake. See SECOND-FIRST SABBATH.

IX.—N

Of equal regard with the Sabbath, as a day of entire rest, was the first Paschal day and the last (Lev. xxiii, 39), while the great day of reconciliation was a Sabbath of Sabbaths (xvi, 31; xxiii, 32). Accordingly, some would understand the words in John xix, 31 (*ἡν μεγάλη ἡ ἡμέρα ἡκεῖνον τοῦ σαββάτου*, rendered in the A. V. "for that Sabbath day was a high day") of the first Paschal day. But a proper weekly Sabbath seems certainly to be meant, in harmony with the entire relation of John; e. g. with xxi, 1. It is called a *great* or *high* day because the first Paschal day fell upon it (see Carpzov, *App.* p. 384; Bleek, *Beitr. z. Evangelien-Kritik*, p. 31 sq.).

The Sabbath is kept by the modern Jews as a great festival with every demonstration of joy, taking the idea from Isa. xviii, 13, 14: "If thou turn away thy foot from the Sabbath, from doing thy pleasure on my holy day, and call the Sabbath a *delight*, the holy of the Lord, honorable . . . then shalt thou delight thyself in the Lord, and I will cause thee to ride upon the high places of the earth," etc. The Sabbath is held from evening to evening (Lev. xxiii, 32), but they begin it half an hour before sunset on Friday, and prolong it till half an hour after sunset on Saturday, for the benefit of the souls of the damned, who, they believe, are allowed on that day suspension of their sufferings. On Friday afternoon they prepare all the food, etc., that may be wanted, and lay out their best clothes to wear in honor of "Queen Sabbath." Some opulent Jews keep magnificent dresses to be worn on the Sabbath alone. As soon as the Sabbath commences, the mistress of the house lights the Sabbath lamp, which is filled with pure olive-oil, and has from four to seven wicks, and lays on the table the Sabbath bread, shaped like a twisted plait, made of the finest wheaten flour, and sprinkled with poppy seeds. They go to the synagogue, and after their devotions wish each other "a good Sabbath." At supper, the master of the house repeats the commemoration of the Sabbath out of Gen. ii, "Thus the heavens were finished," etc.; thanks God for the Sabbath, blesses the wine, and passes it round. They rise later than usual on the Sabbath morning; and at the synagogue they use some additional devotions, with a commemoration of the dead. They think it right to eat at least three meals on the Sabbath, because the word "to-day" relating to the Sabbath is repeated three times in Exod. xvi, 25. So convinced are they that one way of honoring the Sabbath is by great feasting that they sometimes fast the preceding day to enable them to eat the more at the Sabbath meals (Buxtorf, *Syn. Jud.* c. 15). There is a Jewish maxim, that he is greatly to be commended who honors the Sabbath exceedingly in his body, in his dress, and in eating and drinking. Such are the principal features of the carnal views of the Sabbath from which the early fathers wished to wean the Jewish converts. A full account of the sabbatical ceremonies observed at present by the Jews may be found in Buxtorf's *Synagoga Judaica*, and in Picard's *Religious Ceremonies*.

See, in general, *Journ. of Sac. Lit.* Oct. 1851, p. 70 sq.; Ball, *Horæ Sabbaticæ* (Lond. 1853); and the monographs cited by Volbeding, *Index Programmatum*, p. 112; and by Darling, *Cyclopædia Bibliographica* (see Index). See also the literature referred to under the article following and LORD'S DAY.

SABBATH, CHRISTIAN. Under this head, we propose to treat of the sabbatical institution as one of general and permanent obligation.

I. Concerning the *time* when the Sabbath was first instituted there have been different opinions. Some have maintained that the sanctification of the seventh day mentioned in Gen. ii is only there spoken of *διὰ προλήψεως*, or by anticipation, and is to be understood of the Sabbath afterwards enjoined in the wilderness; and that the historian, writing after it was instituted, there gives the reason of its institution: and this is supposed to be the case, as it is never mentioned during the

patriarchal age. But against this sentiment it is urged (a) that it cannot be easily supposed that the inspired penman would have mentioned the sanctification of the seventh day among the primeval transactions if such sanctification had not taken place until 2500 years afterwards; (b) that, considering Adam was restored to favor through a Mediator, and a religious service instituted which man was required to observe, in testimony not only of his dependence on the Creator, but also of his faith and hope in the promise, it seems reasonable that an institution so grand and solemn, and so necessary to the observance of this service, should be then existent.

Some find the institution of it in the fourth commandment (Exod. xx, 8-11); but the language employed is not apparently that of origination. The command to *remember* the Sabbath seems to imply that the Israelites were already acquainted with its existence and sacredness. But such injunctions, we are told, have often *prospective* significance, e. g. "Remember this day in which ye came out from Egypt" (xiii, 3); "Remember the word which Moses the servant of the Lord commanded you" (Josh. i, 13); "Remember now thy Creator in the days of thy youth" (Eccles. xii, 1). In all these citations the meaning is—remember from this time. To this stricture it may be replied that such injunctions have always relation to the future, but that they also suppose antecedent knowledge. Children, for example, would not be told to remember their Creator unless they had been previously informed about creation—unless they had been instructed that one God has made us, and that we are all his offspring. That an ordinance should be ushered into existence by the requirement to remember it is a strange idea to which facts give no countenance. Besides, the fourth commandment assigns a reason for observing the Sabbath, which, if good for the future, must have been always valid. We do not here enter into any disquisition about the days of creation. It is enough that God, in a manner befitting him, worked six days and rested on the seventh, and has required that, in a manner befitting us, we shall imitate his example. But how was it to be expected that this consideration should weigh much with the Jews in time to come, if, in preceding ages, God himself had made no account of it in his regulation of human conduct?

Some, again, have contended that we do not require to go far back in order to find its commencement; they think they learn when and how it began in Exod. xvi, 19-30: these verses have reference to the gathering and cooking of manna. That an institution so prominent as the Sabbath in the religion of the Jews should have been initiated in a manner so incidental, and almost unobservable, is in contradiction to the whole genius of the economy. Nor does the passage countenance any such notion. "It came to pass," we are told (ver. 22), "that on the sixth day they gathered twice as much bread." In other words, they gathered on the sixth day enough for that day and for the day following. But why provide beforehand for the Sabbath in order to respect and keep its rest, if not in supposed obedience to the will of God, as previously notified? It is alleged, in reply, that the order complied with is presented to us afterwards, and occurs in ver. 23, "This is that which the Lord hath said, To-morrow is the rest of the holy Sabbath unto the Lord: bake that which ye will bake to-day, and seethe that ye will seethe; and that which remaineth over lay up for you, to be kept until the morning." By this exegesis the practice (ver. 22) is first related, and then we come to the injunction (ver. 23), of which it was the fulfilment! In such inversion of natural order there is obvious unlikelihood. But the exposition in question is otherwise untenable. The verses alleged to exhibit first the obedience, and then the statute obeyed, have no such intimacy of connection. They refer, in fact, to different things. Ver. 23 does not touch on the collection of the manna at all, but has regard to

the baking of it—a new subject: and therefore the gathering of it on the sixth day in quantity sufficient also for the seventh day, not being here prescribed, remains without any explanation, except a previous appointment and prevalent knowledge of the sabbatical institution.

It is objected, however, that the Sabbath disappears from the record during the antediluvian and patriarchal periods. Why this protracted silence about it if it had then a place among religious articles and usages? This evidence of its absence is negative, and cannot outweigh express contrary proof of its initiation. Of these times, be it also remarked, we have not detailed accounts, and we must therefore make allowance for great brevity and many omissions. Succeeding annals are more ample, and yet we have no indication of the observance of the Sabbath during four hundred years after its sacredness had been confessedly proclaimed from Mount Sinai. Even if neglect of the day could be established, such negligence would not disprove obligation. The Passover, during protracted periods, fell into disuse, and there was general and continued departure from the marriage relation as originally constituted.

It is not the case, however, that allusion to the Sabbath is wholly wanting during the time alleged. Occasional mention is made of weeks; and we know that the heathen world very extensively distributed days into sevens, with some notion of sacredness belonging to the seventh. This arrangement is traced by some to the lunar month, divided into quarters, each of seven days, by the phases of the moon. But this computation does not accord, except proximately, with fact, as the lunar month exceeds twenty-nine days in duration. It ascribes consequence also to the number *four*, as well as to the number *seven*—partitioning the month into four divisions—and *four* has no distinctive sacredness in any known country or language. The explanation, though ingenious, is simply a guess, without any support from Scripture or other writings, and has like validity with another conjecture, that the assignment of seven days to a week may have been derived from the supposed number of the planets.

II. That the Sabbath owes its maintenance to its morality we will endeavor more expressly to substantiate. Here a consideration of first consequence is that it forms the subject of the fourth commandment. Some deny the ethical character of the decalogue. They allege it to be of a mixed nature, and insist that though particular elements in it are of inherent and enduring worth, yet, as a whole, it belonged to an economy of shadows, and has vanished with them. Therefore the presence of any statute in such a compendium is no decisive evidence of moral force.

1. But the decalogue in its integrity has a very distinctive place and consequence in the Bible. It was proclaimed with extraordinary solemnity, peculiar to itself, from Mount Sinai (Exod. xix, 16-24). God caused it to be written on tables of stone, and he made these stones to be deposited in the ark, representative of himself. "These words," says Moses, "the Lord spake to all your assembly in the mount, out of the midst of the fire, of the cloud, and of the thick darkness, with a great voice, and *he added no more*." The decalogue was frequently called the *covenant*, and the chest containing it the *ark of the covenant*. Would a fragmentary and heterogeneous compound create or warrant any such designation? Again, as often as Christ cited any of these commandments he enforced them emphatically. The Jews seem to have distributed them into greater and less, and to have treated the less as scarcely deserving consideration. But he impressively declared, "Whosoever shall break one of these least commandments, and shall teach men so, he shall be called the least in the kingdom of heaven: but whosoever shall do and teach them shall be called great in the kingdom of heaven." The kingdom of heaven is the Gospel dispensation. Certain statutes our Lord declares to be congenial with that economy, and their observance he characterizes as

a sure constituent or guarantee of its greatness. But what statutes could he speak of which verify this description, and are recognisable from others, unless those composing the decalogue? When, also, he resolved the law into two great commandments, he made evident reference to the two tables of the covenant, for he instituted the same classification of devotional and social duties; and when he further resolved all duty into love, with God and man for its objects, he impressed on the whole code a moral interpretation. What can be more truly or purely moral than *charity*?—charity branching off into piety and benevolence? In a word, the decalogue is reproduced by the apostles. What it enjoins they enjoin in the identical terms, or with only verbal alterations; and how could they more decisively affix their seal to its indelible righteousness?

2. The decalogue, then, as a whole, is moral. See **LAW OF MOSES**. If the Sabbath be an exception, it is the only exception. But when we have found it in a code collectively moral—the morality of which is attested by the clearest and most cumulative proof—and when we find it sharing all the conspicuousness and honors of the allied enactments, it would require strong argument indeed to render credible its exceptional ritualism. Let us see whether good cause for so regarding it be discoverable in *its own nature*, or in *prophecy*, or in *what Christ said of it* expressly, or in the *apostolic epistles*.

(1.) The Sabbath provides for *rest and worship*. Our *sensuous* being requires the one, and our *spiritual* being the other. To deny the laboring population any intermission of toil, or the heir of immortality any time for religious observances, would be to offend against the fundamental conditions of our state of existence. Under these aspects the Sabbath is not arbitrary. It is founded on the essentials and necessities of the human constitution, and nothing here below can be more solid and stable than its groundwork. To speak of our spiritual responsibilities more especially—if it be a moral duty to worship God, it must also be a moral duty to observe that worship to the best advantage. For this the Sabbath provides. It is advantageous for worship that a certain day be set apart for it, and guarded from intrusive distractions. It is advantageous that the worshippers set apart the same day, both to the end that one may not draw another into temporal toil, and that religion may have the aids of social stimulus. It is advantageous that the day recur with suitable frequency. What frequency would be best it might be difficult or impossible for us to determine; but that would not show the proportioning of the time to be a matter of indifference. We can easily perceive that there are extremes to be avoided. If every day were a Sabbath, our terrestrial occupations would be suppressed. If the Sabbath returned once a year, it would be inadequate for the maintenance of habitual devotion. One of these arrangements would have been evidently incompatible with what we owe to this world, and the other with dutiful regard for the world to come. If we can judge thus far of the *too often* and the *too seldom*, why may not God desecrate unerringly the mean, and perceive that one day in seven is the best possible adjustment?—the most conducive to moral good in our existing circumstances? Experience has recommended no other division of time as preferable; on the contrary, every attempt to elongate or contract the week has utterly failed, and has owed the failure to a manifested impracticability or mischievousness. It follows that not only the duty, but the very timing of the duty, is of moral account, and that the Sabbath is entitled, by its nature, to the place it occupies in the decalogue—fitly and justly ranking with statutes which transcend casualties, and will maintain their jurisdiction while the world lasts. On the same principle, if the sacredness of the Sabbath has been enhanced by rendering it commemorative of some great event, such as the natural creation, there may be religious benefit, and therefore moral suitable-

ness, in transferring it to another day of the seven, in order to commemorate another event of analogous but superior consequence—such as the accomplishment of a spiritual creation by the resurrection of Christ from the dead. See **LORD'S DAY**. Even the old economy, notwithstanding its necessary regard to times, did not show any rigid adherence to particular days, when a sufficient reason existed for departing from them. Thus, while circumcision was by the law fixed to the eighth day, the great mass of the people who had grown up in the wilderness were circumcised on the same day (Josh. v, 1-9); and when any obstacle prevented men from the eating the Passover on the 14th of the first month, they were allowed to postpone it to the next (Numb. ix, 6).

(2.) The *prophets*, speaking in the name of God, always express themselves in reverential language of the Sabbath. (See, in particular, Isa. lvi, 6, 7; lviii, 13, 14; also lxvi, 23.)

It is objected that in these and like instances the Sabbath is allied with acknowledged constituents of the Mosaic law, and that such passages would therefore equally prove their permanency. It is in plain accordance, however, with the moral claims of the Sabbath that its continued observance should be foretold, and the absence of such prediction would have been urged in proof of its abrogation. Besides, these prophecies are in no part meaningless. They point to real and to improved worship in such diction as the Jews were familiar with and could alone comprehend. Shall we say, then, that the change in worship would be improvement, and the change as to the Sabbath abolition? We cannot see that this conclusion is called for "by parity of reasoning." On the contrary, these passages, to have sense or truth in any of their clauses, require a perpetuated Sabbath; for the effect would be to sweep away worship altogether if a day for it were not preserved.

(3.) As regards *Christ's express sayings* on this subject, he discouraged, no doubt, such a traditional observance of the Sabbath as would have transformed it into a day of heartless neglects and sanctionless rigors. But he countenanced the keeping of it in its true spirit, as a day of personal privilege and beneficent usefulness—avowing that "the Sabbath was made for man, and not man for the Sabbath." This seems to teach that the Sabbath was made for man not as a Jew or as a Christian, but as *man*, and therefore entitled to his regard in all conditions and through all ages. In reply, however, we are told that the expression in the original is *the man*. This must mean, it is said, "those for whom it was appointed, without specifying who they were, and not at all designating man in general." We see no grounds for such a paraphrase, but very much to demand its rejection. The article in such expressions defines the *individual* or the *species*. No individual man could be thus singled out as having the Sabbath made for him unless it were Adam; and none will assert that it was made for him in any sense exclusive of his posterity. Again, the article may define the species, as we say the horse, the ass, the ostrich. Where the species is defined, all the individuals are comprehended, or such an allegation is made as would apply to any of them indifferently. For example, "If the salt have lost its savor, it is good for nothing but to be trodden under the feet of men"—literally "the men," or the species, men without the distinction of Jew and Gentile. "Let your light so shine before men," literally "the men," in the sense of any or all men. "That which cometh out of the mouth this defileth a man"—literally "the man," equivalent to man or any man. Practically the distinction here attempted to be made is visionary. Since *man* without the article is general, and *the man*, meaning the species man, is also general, the article may be dropped or retained without affecting the sense. Accordingly, these modes of expression are often used interchangeably. When Christ, then, declares that the Sabbath was made for man, we can only understand him as teaching that it was intended and instituted for

our common humanity, and that it is to be so employed as to conduce to man's highest or spiritual good. But he also said that he was "Lord of the Sabbath; which shows," we are told, "that he had power to abrogate it partially or wholly." It seems as if some cannot think of power in connection with the Sabbath unless as exercised in abrogation. If it be placed in Christ's charge, they take for granted that more or less extinction must be the consequence. They speak as if Christ's sceptre were an axe, and the only question were how much it would hew down and devastate! We maintain, on the contrary, that Christ would not be the Lord of the Sabbath to be its destroyer. In the language of the New Testament, this title points to assured prosperity. But though he will not superintend in order to annihilate either worship or worshippers, the designation "Lord" does suppose a *manifested* supremacy, and leads us to expect ameliorating modification with essential preservation—in other words, a Christian Sabbath or Lord's day.

(4.) In the *epistles*, much stress has been laid by opponents of the Sabbath on some expressions of Paul. "One man esteemeth one day above another: another esteemeth every day alike. Let every one be fully persuaded in his own mind" (Rom. xiv. 5). To us this language is vague and seems general; but it had relation to specific disputes, and we do not know, because we have not been told, what days are more particularly intended. They may have been festival days of human appointment, or cherished relics of Judaism unconnected with its Sabbath—perfectly known, without danger of mistake, to the parties addressed. It is admitted that the apostles had stated religious services with assigned seasons for them; and if in the passage commented on we give his words the absolute and exceptionless sense claimed for them, it will follow that he courted contempt for his own ordering of worship. Assuredly he sanctioned no such sweeping indifference to days as would invalidate the injunction, "Forsoke not the assembling of yourselves together, as the manner of some is."

It is said (Col. ii. 16), "Let no man therefore judge you in meat or in drink, or in respect of an holyday, or of the new moon, or of the Sabbath days, which are a shadow of things to come, but the body is of Christ." This passage perfectly accords with a superseding of the Sabbath day as distinguished from the Lord's day, embodying substantially all that prior sabbatical observance had shadowed. In the same relation we would use the same language still. Independently of this answer to the objection, many have held, with bishop Horsley, that the word Sabbath is not here used in its strict acceptance, but with reference to other days observed by the Jewish Church with Sabbath-like solemnity. Even if these passages had more difficulty than they present, two or three doubtful expressions, in relation to local circumstances and usages about which we have little information, are not to be balanced against the weighty and cumulative evidence which has been adduced for the morality of the Sabbath, and its consequent claims on the respect of all countries and ages.

It may appear to some an objection to these views that if the Sabbath were moral, and therefore immutable, it would remain in heaven: whereas first and seventh days equally lose in the heavenly state their distinctive characters. There all duration is Sabbath—all space sanctuary—all engagement worship. It is sufficient to reply that morality supposes facts in demanding conformity to them. Filial duty implies the existing relation of parent and child, and is ever binding while that relation subsists, but is otherwise non-existent. So the Sabbath supposes a sensible world, and in such a world it must ever be a duty to have time expressly for temporal and time expressly for spiritual occupations. But in the world of spirits, where even the natural body becomes a spiritual body, and which flesh and blood cannot inherit, this discrimination disappears. It is the glory of the Sabbath that it prepares us for this con-

summation—for inheriting blessings transcending its own privileges, and even induces approximations to celestial perfection under present adverse circumstances.

III. Under the Christian dispensation, the Sabbath is altered from the seventh to the first day of the week (see Stone, in the *Theol. Eclectic*, iv, 542 sq.). The arguments for the change are these: 1. As the seventh day was observed by the Jewish Church in memory of the rest of God after the works of the creation, and their deliverance from Pharaoh's tyranny, so the first day of the week has always been observed by the Christian Church in memory of Christ's resurrection. 2. Christ conferred particular honor upon it by not only rising from the dead, but also by repeated visits to his disciples on that day. 3. It is called the *Lord's day*, *κυριακή*, a term otherwise only used in the New Test. in reference to the sacred supper (1 Cor. xi, 20), and as in the latter passage it denotes that which specially commemorates the death of our Lord, it seems indisputable that it is applied in the former to that which specially commemorates his resurrection (Rev. i, 10). 4. On this day the apostles were assembled, when the Holy Ghost came down so visibly upon them, to qualify them for the conversion of the world. 5. On this day we find Paul preaching in Troas, when the disciples came to break bread. 6. The directions which the apostles give to the Christians plainly allude to their religious assemblies on the first day. 7. Pliny refers to a certain day of the week being kept as a festival in honor of the resurrection of Christ; and the primitive Christians kept it in the most solemn manner. See LORD'S DAY.

These arguments, it is true, are not satisfactory to some, and it must be confessed that there is no law in the New Test. concerning the first day. However, it may be observed that it is not so much the precise time that is universally binding, as that one day out of seven is to be regarded. "As it is impossible," says Dr. Doddridge, "certainly to determine which is the seventh day from the creation; and as, in consequence of the spherical form of the earth, and the absurdity of the scheme which supposes it one great plain, the change of place will necessarily occasion some alteration in the time of the beginning and ending of any day in question, it being always at the same time, somewhere or other, sunrising and sunset, noon and midnight, it seems very unreasonable to lay such a stress upon the particular day as some do. It seems abundantly sufficient that there should be six days of labor and one of religious rest, which there will be upon the Christian and the Jewish scheme." See SUNDAY.

As soon as Christianity was protected by the civil government, the Lord's day was ordered by law to be kept sacred. All proceedings in courts of law, excepting such as were deemed of absolute necessity, or of charity, as setting slaves at liberty, etc., were strictly forbidden; and all secular business, excepting such as was of necessity or mercy, was prohibited; and by a law of Theodosius senior, and another by Theodosius junior, no public games or shows, no amusements or recreations, were permitted to be practiced on that day (see *Cod. Theod.* lib. ii, tit. 8, "De feriis;" *Cod. Justin.* lib. iii; *Cod. Theod.* lib. xv, "De spectaculis" lit. 5, leg. 2). The day was consecrated by all the primitive Christians to a regular and devout attendance upon the solemnities of public worship, and other religious exercises; and, as Bingham says in his *Christian Antiquities*, "they spent it in such employments as were proper to set forth the glory of the Lord, in holding religious assemblies for the celebration of the several parts of divine service—psalmody, reading the Scriptures, preaching, praying, and receiving the Communion; and such was the flaming zeal of those pious votaries that nothing but sickness, or a great necessity, or imprisonment, or banishment, could detain them from it." A further proof of the sanctity in which they held the Sabbath was their pious and zealous observance of the Saturday

evening, or, rather, from midnight to break of day on the Lord's day. This time the early Christians spent in the exercises of devotion; and persons of all ranks employed it in preparation for the sacred day. It must also be further observed that, in many places, particularly in cities, they usually had sermons twice a day in the churches, and that the evening was as well attended as the morning service; but in such churches as had no evening sermon, there were still the evening prayers, and the Christians of those times thought themselves obliged to attend this service as a necessary part of the public worship and solemnity of the Lord's day. The better to enforce this observance upon such as were ungodly or careless, ecclesiastical censures were inflicted upon them, whether they frequented places of public amusement or spent the day in indolence at home. These observations chiefly refer to the period between the publication of the Gospel by the apostles and the latter end of the 4th century—a period when this day might be expected to be observed more in accordance with the command of Christ and the will of the Holy Ghost.

IV. As the Sabbath is of divine institution, so it is to be kept holy unto the Lord. Numerous have been the days appointed by men for religious services; but these are not binding, because of human institution. Not so the Sabbath. Hence the fourth commandment is ushered in with a peculiar emphasis—"Remember that thou keep holy the Sabbath day." This institution is wise as to its ends: that God may be worshipped, man instructed, nations benefited, and families devoted to the service of God. It is lasting as to its duration. The abolition of it would be unreasonable, unscriptural (Exod. xxxi, 13), and every way disadvantageous to the body, to society, to the soul, and even to the brute creation. It is, however, awfully violated by visiting, feasting, indolence, buying and selling, working, worldly amusements, and travelling. "Look into the streets," says bishop Porteus, "on the Lord's day, and see whether they convey the idea of a day of rest. Do not our servants and our cattle seem to be almost as fully occupied on that day as on any other? As if this were not a sufficient infringement of their rights, we contrive, by needless entertainments at home and needless journeys abroad, which are often by choice and inclination reserved for this very day, to take up all the little remaining part of their leisure time. A Sabbath-day's journey was among the Jews a proverbial expression for a very short one; among us it can have no such meaning affixed to it. That day seems to be considered by too many as set apart, by divine and human authority, for the purpose, not of rest, but of its direct opposite, the labor of travelling, thus adding one day more of torment to those generous but wretched animals whose services they hire; and who, being generally strained beyond their strength the other six days of the week, have, of all creatures under heaven, the best and most equitable claim to suspension of labor on the seventh."

The evils arising from Sabbath-breaking are greatly to be lamented: they are an insult to God, an injury to ourselves, and an awful example to our servants, our children, and our friends. To sanctify this day, we should consider it—(1) a day of rest; not, indeed, to exclude works of mercy and charity, but a cessation from all labor and care; (2) as a day of remembrance; of creation, preservation, redemption; (3) as a day of meditation and prayer, in which we should cultivate communion with God (Rev. i, 10); (4) as a day of public worship (Acts xx, 7; John xx, 19); (5) as a day of joy (Isa. lvi, 2; Psa. cxviii, 24); (6) as a day of praise (Psa. cxvi, 12-14); (7) as a day of anticipation, looking forward to that holy, happy, and eternal Sabbath which remains for the people of God.

V. The literature of the subject is very copious. The following are the chief standard works: Brerewood, *Treatise of the Sabbath*; Prideaux, *Doctrine of the Sabbath*; Bramhall, *Discourses on the Controversy about the*

Sabbath; White, *Treatise of the Sabbath Day*; Heylin, *History of the Sabbath*; Chandler, *Two Sermons on the Sabbath*; Watts, *Perpetuity of the Sabbath*; Kemnicott, *Sermon and Dialogue on the Sabbath*; Paley, *Natural and Political Philosophy*, bk. v, ch. vii; Holden, *Christian Sabbath*; Burnside, *On the Weekly Sabbath*; Burder, *Law of the Sabbath*; Wardlaw, Wilson, and Agnew, severally, *On the Sabbath*; *Modern Sabbath Examined* (1832); James, *On the Sacraments and Sabbath*; Maurice, *On the Sabbath*; Kalisch, *Commentary on Exodus* (ad loc.); Proudhon, *De la Célébration du Dimanche*; Hessey, *Bampton Lecture* (Lond. 1866); Johnstone, *Sunday and the Sabbath* (ibid. 1853); Domville, *Inquiry into the Nature of the Sabbath* (ibid. 1855, 2 vols.); Ellicott, *History and Obligation of the Sabbath* (ibid. 1844; N. Y. 1862); Hill, *The Sabbath Made for Man* (Lond. 1857); Coleman, in the *Bibliotheca Sacra*, i, 526 sq.; and the literature cited by Malcolm, *Theol. Index*, s. v.; and especially by Cox, *Literature of the Sabbath Question* (Edinb. 1865, 2 vols. 8vo). Articles on special points connected with the institution of the Sabbath may be found (in addition to those referred to in Poole's *Index*, s. v.) in the *Meth. Quar. Rev.* Jan. 1849; April, 1857; *Journ. of Sac. Lit.* Oct. 1851; July, 1857; *Theol. and Lit. Journ.* 1852; *North Brit. Rev.* Feb. 1853; *Biblioth. Sacra*, Oct. 1854; *South. Quar. Rev.* July, 1857; *New-Englander*, Aug. 1858; *United Press. Rev.* Jan. 1860; *Amer. Theol. Rev.* April, 1862; *Brit. and For. Ev. Rev.* Jan. 1863; *Princeton Rev.* Oct. 1863. See SUNDAY.

Sabbath, COURT OF THE (הַשְּׁבִיט הַשְּׁבִיט, *musák hash-shabbáth*; Sept. ὁ θημέλιος τῆς καθέρας τῶν σαββάτων; Vulg. *Musach sabbati*, 2 Kings xvi, 18), is understood to mean a canopy under which Ahaz used to stand, at the entrance of the porch of the Temple, when he attended the service; but which he removed when he became an idolater, to show his contempt, and his intention of not resorting thither any more. See COURT. So we see in 2 Chron. xxviii, 24 that "he shut up the doors of the house of God" that none might enter to worship. See AHAS.

Sabbath, MORROW AFTER THE. There has been from early times some difference of opinion as to the meaning of the words מוֹחֶרֶת הַשְּׁבִיט, *mochoráth hash-shabbáth*, thus rendered in the computation of the Passover (Lev. xxiii, 11, 15). It has, however, been generally held, by both Jewish and Christian writers of all ages, that the Sabbath here spoken of is the first day of holy convocation of the Passover, the 15th of Nisan, mentioned in Lev. xxiii, 7. In like manner the word שַׁבָּת is evidently used as a designation of the day of atonement (Lev. xxiii, 32); and שַׁבְּתוֹן (*sabbati observatio*) is applied to the first and eighth days of Tabernacles and to the Feast of Trumpets. That the Sept. so understood the passage in question can hardly be doubted from their calling it "the morrow after the first day" (i. e. of the festival): ἡ ἐπαύριον τῆς πρώτης. The word in ver. 15 and 16 has also been understood as "week," used in the same manner as σαββάρα in the New Test. (Matt. xxviii, 1; Luke xviii, 12; John xx, 1, etc.). But some have insisted on taking the Sabbath to mean nothing but the seventh day of the week, or "the Sabbath of creation," as the Jewish writers have called it; and they see a difficulty in understanding the same word in the general sense of *week* as a period of seven days, contending that it can only mean a regular week, beginning with the first day, and ending with the Sabbath. Hence the Baithusian (or Sadducean) party, and in later times the Karaites, supposed that the omer was offered on the day following that weekly Sabbath which might happen to fall within the seven days of the Passover. The day of Pentecost would thus always fall on the first day of the week. Hitzig (*Ostern und Pfingsten* [Heidelberg, 1837]) has put forth the notion that the Hebrews regularly began a new

week at the commencement of the year, so that the 7th, 14th, and 21st of Nisan were always Sabbath days. He imagines that "the morrow after the Sabbath" from which Pentecost was reckoned was the 22d day of the month, the day after the proper termination of the Passover. He is well answered by Bähr (*Symbolik*, ii, 620), who refers especially to Josh. v, 11, as proving, in connection with the law in Lev. xxiii, 14, that the omer was offered on the 16th of the month. It should be observed that the words in that passage, *בַּיּוֹם הַהוּא*, mean merely *corn of the land*, not, as in the A. V., "the old corn of the land." "The morrow after the Passover" (*מִמָּחָר הַפֶּסַח*) might at first sight seem to express the 15th of Nisan; but the expression may, on the whole, with more probability, be taken as equivalent to "the morrow after the Sabbath," that is, the 16th day. See Keil on Josh. v, 11; Masius and Drusus, on the same text, in the *Crit. Sac.*; Bähr, *Symb.* ii, 621; Selden, *De Anno Civili*, c. vii; Bartenora, in *Chagigah*, ii, 4; Buxtorf, *Syn. Jud.* vol. xx; Fagius, in *Lev. xxiii*, 15; Drusus, *Notæ Majores in Lev. xxiii*, 16. It is worthy of remark that the Sept. omits *τῇ παύσει τοῦ πάσχα*, according to the texts of Tischendorf and Theile. See PASSOVER; PENTECOST. But there is strong ground for the Karaitic interpretation. See SABBATH (*supra*).

Sabbath, SECOND AFTER THE FIRST (Luke vi, 1). See SECOND-FIRST SABBATH.

Sabbathæ'us (Σαββαῖος), a Græcized form (Esdr. ix, 14) of the Heb. name (Ezra x, 15) SHAB-BETHAI (q. v.).

Sabbathai Zebi (i. e. *צִבְיָה*, the gazelle, or beauty, a family adjunct), a famous Jewish impostor, was born in Smyrna, July, 1641. When a child he was sent to a Rabbinic school and instructed in the whole cycle of Rabbiic lore. When fifteen years of age, he betook himself to the study of the Cabala, rapidly mastered its mysteries, and became peerless in his knowledge of "those things which were revealed and those things which were hidden;" and at the age of eighteen obtained the honorable appellation of *sage* (חכם), delivering public lectures, and expounding the divine law and the esoteric doctrine before crowded audiences. At the age of twenty-four, he revealed to his disciples that he was the Messiah, the son of David, the true Redeemer, and that he was to redeem and deliver Israel from their captivity among the Christians and Mohammedans. At the same time he publicly pronounced the Tetragrammaton as it is written, to do which, it is well known, was not permitted, save to the high-priest during the existence of the Temple, when he performed service in the Holy of Holies on the day of atonement, thus braving the rule that "the penalty of death is pronounced on him who utters the Tetragrammaton publicly." When the sad intelligence reached the sages of Smyrna, they sent to him two messengers of the Beth-din (ecclesiastical tribunal) to warn him, and to caution him that if he should so trespass again they would excommunicate him, and even consider it a meritorious action for any one to take his life. But Sabbathai replied that he was allowed to do so, being the anointed of God. Hearing this, the sages of Smyrna were much affrighted, and having deliberated together what to do, they decreed unanimously that he was guilty of death for two reasons: firstly, because he had uttered the name of the Lord according to its letters, and secondly, because he pretended to be the Messiah. Therefore they excommunicated him, and proclaimed it a meritorious action for any one to slay him, and the fine imposed on the slayer by the laws of the Mohammedans they promised to pay. Now, when Sabbathai saw that evil was determined against him, he fled from Smyrna to Salonica, where he was received with great honor, his evil deeds having not yet been known there. Many disciples also

gathered around him to learn the science of the Cabala, and all the inhabitants of Salonica revered him and loved him more than any other man. But after having been there for a considerable time, he fell again into his former error, and repeated his former transgression, uttering the name of the Lord according to its letters in the presence of his disciples; and when his pupils asked him wherefore he did so, he replied that he was the anointed, and that it was therefore lawful for him to do so. The sages of Salonica, having heard of this repeated offence, sent to him two messengers of the Beth-din, ordering him to quit Salonica, otherwise he would be put to death, because he had wrought folly in Israel. Knowing that the Jews had more power at Salonica than in any other country, he secretly fled to Athens, and thence into Morea. But he found no refuge there, for the inhabitants of Morea, being informed that he had been expelled from Salonica, also drove him away. He then went through Greece to Alexandria, from this city to Cairo, and thence to the Holy Land, as far as Jerusalem, where he remained for several years, teaching the Cabala, proclaiming himself as the Messiah, anointing prophets, and converting thousands upon thousands. So numerous were the believers in him that in many places trade was entirely stopped; the Jews wound up their affairs, disposed of their chattels, and made themselves ready to be redeemed from their captivity and led by Sabbathai Zebi back to Jerusalem. The consuls of Europe were ordered to inquire into this extraordinary movement, and the governors of the East reported to the sultan the cessation of commerce. Sabbathai Zebi was then arrested by order of the sultan Mohammed IV, and taken before him at Adrianople. The sultan spoke to him as follows: "I am going to test thy Messiahship. Three poisoned arrows shall be shot into thee, and if they do not kill thee, I too will believe that thou art the Messiah." He saved himself by embracing Islamism in the presence of the sultan, who gave him the name *Effendi*, and appointed him *Kapıdjı-Bashi*. Sabbathai died Sept. 10, 1676, after having ruined thousands upon thousands of Jewish families. The literature on this pseudo-Messiah is very rich. See *Furst, Bibl. Sabbathalists. See SABBATHAI.

Sabbath-day's Journey (σαββατον ὁδός, Acts i, 12; in Talmudical Heb. תַּחֲוֹם הַשַּׁבָּת, *techôm hash-shabbâth*) is a phrase for the prescribed distance which may lawfully be traversed on a Sabbath, and beyond which no Jew can go without violating the sanctity of the day, except he adopts the means appointed for exceeding the canonical boundary.

I. *Distance of a Sabbath-way, and its Origin*.—From the injunction in Exod. xvi, 29, that every man is to "abide in his place," and not "go out of his place" on the Sabbath, the ancient Hebrew legislators deduced that an Israelite must not go 2000 yards, or 12,000 hand-breadths—as the ancient Hebrew yard consisted of six hand-breadths= five Greek stadia, for the Greek stadium measured 2400 hand-breadths—beyond the temporary or permanent place of his abode. Epiphanius's definition of the Sabbath-day's journey at six stadia= 14,400 hand-breadths, or 750 Roman geographical paces (*Her.* p. 66, 82), is most probably based upon the larger yard, which the Jews adopted at a later period. See WEIGHTS AND MEASURES. These 2000 yards are not to be measured from any and every spot, but according to definite and minute rules, the city having always to be reduced to a square. Thus if the Sabbath-day's walk is to be fixed from a circular city,

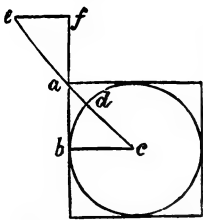

Diagram of a "Sabbath-day's Journey."

an imaginary square must be circumscribed about it, and the measurement is not to be taken from the corner *a* in a diagonal direction—i. e. from *a* to *e*—inasmuch as thereby the distance between *a* *f* will be less than 2000 yards, but from *a* to *f*, whereby the allowable distance is increased in the direction of *a* *e*, as will be seen from the annexed diagram.

The permitted distance seems to have been grounded on the space to be kept between the ark and the people (Josh. iii, 4) in the wilderness, which tradition said was that between the ark and the tents. To repair to the ark being, of course, a duty on the Sabbath, the walking to it was no violation of the day; and it thus was taken as the measure of a lawful Sabbath-day's journey. This prohibition is not repeated in the law, but the whole spirit of the Sabbath institution obviously forbade a Jew to make a proper journey on that day (Josephus, *Ant.* xiii, 8, 4), especially as the beasts of burden and travel were to rest (comp. Matt. xxiv, 20). Whether the earlier Hebrews did or did not regard it thus, is not easy to say. Nevertheless, the natural inference from 2 Kings iv, 23 is against the supposition of such a prohibition being known to the spokesman, Elisha almost certainly living—as may be seen from the whole narrative—much more than a Sabbath-day's journey from Shunem. Heylin infers from the incidents of David's flight from Saul, and Elijah's from Jezebel, that neither felt bound by such a limitation. Their situation, however, being one of extremity, cannot be safely argued from. Our Saviour seems to refer to this law in warning the disciples to pray that their flight from Jerusalem in the time of its judgment should not be "on the Sabbath day" (Matt. xxiv, 20). The Christians of Jerusalem would not, as in the case of Gentiles, feel free from the restrictions on journeying on that day; nor would their situation enable them to comply with the forms whereby such journeying, when necessary, was sanctified; nor would assistance from those around be procurable. The Jewish scruple to go more than 2000 paces from his city on the Sabbath is referred to by Origen (*Περὶ ἀρχαῶν*, iv, 2), by Jerome (*Ad Algasium*, qu. 10), and by Ecumenius—with some apparent difference between them as to the measurement. Jerome gives Akiba, Simeon, and Hillel as the authorities for the lawful distance.

Another reason for fixing the distance of a Sabbath-day's walk or journey at 2000 yards is that the fields of the suburbs for the pasture of the flocks and herds belonging to the Levites measured 2000 cubits or yards, and that in Exod. xxi, 18 it is said, "I will appoint thee a place (מִקְדָּשׁ) whither he shall flee"—i. e. the Levitical suburbs or cities. Now, it is argued, if one who committed murder accidentally was allowed to undertake this journey of 2000 yards on a Sabbath without violating the sanctity of the day, innocent people may do the same. Besides, the place of refuge is termed מִקְדָּשׁ, which is the same word employed in Exod. xvi, 29. As the one מִקְדָּשׁ, place, was 2000 yards distant, it is inferred, according to the rule *the analogy of ideas or words* (גְּזֵרָה שוּוּה) that the command, "Let no man go out of his place (מִמִּקְדָּשׁוֹ) on the seventh day" (Exod. xvi, 29) means not to exceed the distance of the place 2000 yards off (Hillel I, rule ii, in *Erubin*, 51 a; *Maccoth*, 12 b; *Zebachim*, 117 a). Josephus (*War*, v, 2, 3) makes the Mount of Olives to be about six stadia from Jerusalem; and it is the distance between these two places which in Acts i, 12 is given as a Sabbath-day's journey. Josephus elsewhere determines the same distance as five stadia (*Ant.* xx, 8, 6); but both

were probably loose statements rather than measured distances; and both are below the ordinary estimate of 2000 cubits. Taking all circumstances into account, it seems likely that the ordinary Sabbath-day's journey was a somewhat loosely determined distance, seldom more than the whole and seldom less than three quarters of a geographical mile. See Selden, *De Jure Nat. et Gent.* iii, 9; Frischmuth, *Dissert. de Itin. Sabbat.* (1670); Walther, *Dissert. de Itin. Sabbat.*; both in *The-saurus Theolog. Philog.* (Amsterd. 1720).

II. *Cases in which the Limits of a Sabbath-day's Journey could be exceeded.*—Though the laws about the Sabbath-day's journey are very rigorous, and he who walked beyond the 2000 yards, or moved more than four yards farther than his temporary place of abode, when the Sabbath-day's journey had not been determined beforehand, received forty stripes save one; yet in cases of public or private service, when life was in danger, people were allowed to overstep the prescribed boundary (*Mishna, Erubin*, iv; *Rosh-hashanah*, ii, 5). The Pharisees, or the orthodox Jews in the days of our Saviour, also contrived other means whereby the fraternity of this order could exceed the Sabbath-day's walk without transgressing the law. They ordained that all those who wished to join their social gatherings on the Sabbath were to deposit on Friday afternoon some article of food in a certain place at the end of the Sabbath-day's journey, that it might thereby be constituted a domicile, and thus another Sabbath-day's journey could be undertaken from the first terminus. See PHARISEE. This mode of connecting or amalgamating the distances (כִּירּוּב תַּחְנוּמִּין), as it is called, is observed by the orthodox Jews to the present day. Such importance have the Jews, since their return from the Babylonian captivity, attached to the Sabbath-day's journey that a whole tractate in the *Mishna (Erubin)* is devoted to it. Hence the phrase is mentioned in the New Test. (Acts i, 12) as expressive of a well-known law, and the so-called Jerusalem Targum translates Exod. xvi, 29, "And let no man go walking from his place beyond 2000 yards on the seventh day," while the Chaldee paraphrase of Ruth i, 16 makes Naomi say to Ruth, "We are commanded to keep sabbaths and festivals, and not to walk beyond 2000 yards" (comp. *Mishna, Erubin*, c. v; *Rosh-hashanah*, ii, 15; *Babylon Talmud, Erubin*, 56 b, 57 a; Zuckermann, in Frankel's *Monatsschrift für Geschichte und Wissenschaft des Judenthums* [Breslau, 1863], xii, 467 sq.).

Sabbath-school. See SUNDAY-SCHOOL.

Sablatians, a Judaizing section of the Novatians, who owed their origin to Sabbatius, a presbyter that had been ordained by Marcian (Socrat. *Hist. Eccl.* v, 20; vii, 15). They assumed the name of Protopaschites, and refused to communicate with any but those who adopted with them the Quartodeciman rule in regard to the paschal festival. The Sablatians were included among heretics who were condemned in A.D. 381 by the seventh canon of the Council of Constantinople (*Mansi Concil.* iii, 563).

Sabbatic River, a stream of Palestine, described by ancient writers as flowing only on the Sabbath day (Reland, *Palest.* p. 291). Josephus locates it between Arce and Raphanaca (*War*, vii, 24). Thomson thinks that the interminant fountain of Nebo el-Fâar, in the valley of Mar Jirius, west of Kulat Husn, near Tripoli, may have been the origin of the fountain, as it seems to contain a siphon for carrying off the overflow of the water (*Land and Book*, i, 496 sq.).

Sabbatical Year, the septennial rest for the land from all tillage and cultivation enjoined in the Mosaic law (Exod. xxiii, 10, 11; Lev. xxv, 2-7; Deut. xv, 1-11; xxxi, 10-18; comp. Josephus, *Ant.* iii, 12, 3). The regulation appears to have been greatly neglected during the Hebrew occupancy of Palestine (2 Chron. xxxvi, 21).

I. *Names and their Signification.*—In the Mosaic legis-

lation this festival is called by four names, each of which expresses some feature connected with the observance thereof. Thus it is called—(1) שְׁנַת הַמְּנוּחָה, *Rest of entire Rest, or Sabbath of Sabbatism* (Lev. xxv, 4; A. V. "Sabbath of rest"), because the land is to have a complete rest from all tillage and cultivation; (2) שְׁנַת הַמְּנוּחָה, *the Year of Sabbatism or Rest* (Lev. xxv, 5, "year of rest"), because the rest is to extend through the year; (3) שְׁנַת הַפְּדוּתָה, or more fully שְׁנַת הַפְּדוּתָה הַשְּׁמִינִית, "*Release, Remission, or the Year of Release*" (Deut. xv, 1, 2, 9), because on it all debts were remitted; and (4) שְׁנַת הַשְּׁבִיעִית, "*the Seventh Year*" (Deut. xv, 9), because it is to be celebrated every seventh year, for which reason it is called in the Hebrew canons *kar' ἑξοχῆν*, שְׁבִיעִית, *the Seventh* (i. e. שְׁנָה, *Year*), as is also the name of the tractate in the Mishna (*Shebi'ith*) treating on the sabbatical year. Josephus styles it the *ἑβδοματικὸς* or *σαββατικὸς ἑνιαυτός* (*Ant.* xiv, 10, 6; 16, 2; xv, 1, 2); once *ἀργὸν ἔτος* (*War*, i, 2, 4).

II. *The Laws connected with this Festival.*—Like the year of jubilee, the laws respecting the sabbatical year embrace three main enactments—(1) Rest for the soil; (2) care for the poor and for animals; and (3) remission of debts.

The *first* enactment, which is comprised in Exod. xxiii, 10, 11; Lev. xxv, 2-5, enjoins that the soil, the vineyards, and the olive-yards are to have perfect rest; there is to be no tillage or cultivation of any sort, at least in Palestine (comp. Tacit. *Hist.* v, 4, 3). What constitutes tillage and cultivation, and how much of labor was regarded as transgressing the law, may be seen from the following definitions of the Hebrew canons: "The planting even of trees which bear no fruit is not allowed on the sabbatical year; nor may one cut off withered or dried-up boughs of trees, nor break off the withered leaves and branches, nor cover the tops with dust, nor smoke under them to kill the insects, nor besmear the plants with any kind of soil to protect them from being eaten by the birds when they are tender, nor besmear the unripe fruit, etc., etc. And whoso does one of these things in the sabbatical year is to receive the stripes of a transgressor" (Maimonides, *Jad Ha-Chezaka Hilkoth Shemita Ve-Jobel*, i, 5). Anything planted wittingly or unwittingly had to be plucked up by its roots (*Mishna, Terum.* ii, 3). Thus it was a regulation requiring all the land periodically to lie fallow (Philo, *Opp.* ii, 207, 277, 631), and as a year of rest corresponded with the Sabbath or day of rest (*ibid.* ii, 631; Josephus, *l. c.*; *War*, i, 2, 4; Tacit. *l. c.*); in fact, a Sabbath year, just as the Essenes, besides the seventh day, observed a sabbath of weeks each seventh week (Philo, *Opp.* ii, 481).

The *second* enactment, which is contained in Exod. xxiii, 11; Lev. xxv, 5-7, enjoins that the spontaneous growth (קָצִיר) of the fields or of trees (comp. Isa. xxxvii, 30) is to be for the free use of the poor, hirelings, strangers, servants, and cattle (Exod. xxiii, 11; Lev. xxv, 5-7; comp. *Mishna, Edayoth*, v, 1). This law is thus defined by the Jewish canons: "He who locks up his vineyard, or hedges in his field, or gathers all the fruit into his house in the sabbatical year, breaks this positive commandment. Everything is to be left common, and every man has a right to everything in every place, as it is written 'that the poor of thy people may eat' (Exod. xxiii, 11). One may only bring into his house a little at a time, according to the manner of taking things that are in common" (Maimonides, *ibid.* iv, 24). "The fruit of the seventh year, however, may only be eaten by man as long as the same kind is found in the field; for it is written 'and for the cattle and for the beast that are in thy land shall all the increase thereof be meat' (Lev. xxv, 7). Therefore, as long as the animals eat the same kind in the field thou mayest eat of what there is of it in the house; and if the animal has consumed it all in the field, thou art bound to re-

move this kind from the house into the field" (Maimonides, *ibid.* vii, 1). The people, who are enjoined to live upon the harvest of the preceding year, and the spontaneous growth of the sabbatical year, are promised an especially fruitful harvest to precede the fallow year as a reward for obeying the injunction (Lev. xxv, 20-22). That the fields yielded a crop in the sabbatical year, and even in the second fallow year—i. e. in the year of jubilee—has been shown in the art. JUBILEE YEAR.

The *third* enactment, which is contained in Deut. xv, 1-3, enjoins the remission of debts in the sabbatical year. The exceptions laid down are in the case of a foreigner, and that of there being no poor in the land. This latter, however, it is straightway said, is what will never happen. But though debts might not be claimed, it is not said that they might not be voluntarily paid; and it has been questioned whether the release of the seventh year was final or merely lasted through the year. This law is defined by the ancient Hebrew canons as follows: The sabbatical year cancels every debt, whether lent on a bill or not. It does not cancel accounts for goods; daily wages for labor which may be performed in the sabbatical year, unless they have been converted into a loan; or the legal fines imposed upon one who committed a rape, or was guilty of seduction (Exod. xxii, 15, 16), or slander, or any judicial penalties; nor does it set aside a debt contracted on a pledge, or on a פְּרִסְבִּיל = πρὸς βουλῇ (or βουλῆν)—i. e. declaration made before the court of justice at the time of lending not to remit the debt in the sabbatical year. The formula of this legal declaration was as follows: "I, A B, deliver to you, the judges of the district C, the declaration that I may call in at any time I like all debts due to me," and it was signed either by the judges or witnesses. If this *Prosbil* was antedated, it was legal, but it was invalid if postdated. If one borrowed money from five different persons, a *Prosbil* was necessary from each individual; but if, on the contrary, one lent money to five different persons, one *Prosbil* was sufficient for all. This *Prosbil* was first introduced by Hillel (q. v.) the Great (born about B.C. 75), because he found that the warning contained in Deut. xv, 9 was disregarded: the rich would not lend to the poor for fear of the sabbatical year, which seriously impeded commercial and social intercourse (*Mishna, Shebi'ith*, x, 1-5; *Gittin*, iv, 3). This shows beyond the shadow of a doubt that the release of the seventh year did not simply last through the seventh year, as some will have it, but was final. The doctors before and in the time of Christ virtually did away with this law of remitting debts by regarding it as a meritorious act on the part of the debtor not to avail himself of the Mosaic enactment, and pay his debts irrespective of the sabbatical year. But not glaringly to counteract the law, these doctors enacted that the creditor should say, "In accordance with the sabbatical year, I remit thee the debt;" whereunto the debtor had to reply, "I nevertheless wish to pay it," and the creditor then accepted the payment (*Mishna, Shebi'ith*, x, 8). As the Mosaic law excludes the foreigner from the privilege of claiming the remission of his debts in the sabbatical year (Deut. xv, 3), the ancient Jewish canons enacted that even if any Israelite borrows money from a proselyte whose children were converted to Judaism with him, he need not legally repay the debt to his children in case the proselyte dies, because the proselyte, in consequence of his conversion, is regarded as having severed all his family ties, and this dissolution of the ties of nature sets aside mutual inheritance, even if the children professed Judaism with the father. Still the sages regarded it as a meritorious act if the debts were paid to the children (*Mishna, Shebi'ith*, x, 9). It is often said, too, that in the sabbatical year all slaves of Hebrew birth were freed; but the words in Exod. xxi, 2 (comp. Jer. xxxiv, 14 sq.) require only that they be freed in the seventh year of their servitude (Josephus, *Ant.* xvi, 1, 1). Deut. xv, 12

no more relates to the law of the sabbatical year than ver. 19 sq. (comp. Ranke, *Pentat.* ii, 362), and where the sabbatical year is expressly treated of—as in Lev. xxv—nothing is said of such manumission. Nor does Josephus (*Ant.* iii, 12, 3) mention it. Lev. xxxiv, 8 does not refer at all to this institution (yet see Hitzig, *ad loc.*), and ver. 14 refers only to the law in Exod. xxi, 2. See RELEASE.

III. *Time, Observance, and Limit of the Sabbatical Year.*—The sabbatical year, like the year of jubilee, began on the first day of the civil new year—the first of the month *Tisri* (Maimonides, *l. c.* iv, 9). See NEW YEAR. But though this was the time fixed for the celebration of the sabbatical year during the period of the second Temple, yet the tillage and cultivation of certain fields and gardens had already to be left off in the sixth year. Thus it was ordained that fields upon which trees were planted were not to be cultivated after the feast of Pentecost of the sixth year (Mishna, *Shebi'ith*, i, 1–8), while the cultivation of corn-fields was to cease from the feast of Passover (*ibid.* ii, 1). Since the destruction of the Temple, however, the sabbatical year, or, more properly, cessation from tillage and cultivation of all kinds, does not begin till the feast of New Year. According to the Mosaic legislation, the laws of the sabbatical year were to come into operation when the children of Israel had possession of the promised land; and the Talmud, Maimonides, etc., tell us that the first sabbatical year was celebrated in the twenty-first year after they entered Canaan, as the conquest of it recorded in Josh. xiv, 10 occupied seven years, and the division thereof between the different tribes mentioned in Josh. xviii, etc., occupied seven years more, whereupon they had to cultivate it six years, and on the seventh year—the twenty-first after entering therein—the first sabbatical year was celebrated (Babylon Talmud, *Erachan*, 12 b; Maimonides, *l. c.* x, 2). On the feast of Tabernacles of the sabbatical year, certain portions of the law were read in the Temple before the whole congregation (Deut. xxxi, 10–13). As the Pentateuchal enactment assigns the prelection of the law to the priests and college of presbyters (*ibid.*)—viz. the singular *הַכֹּהֲנִים*, “thou shalt read this law before all Israel”—the Hebrew canons ordained that the high-priest, and after the return from Babylon the king, should perform this duty. The manner in which it was read by the monarch is thus described in the Mishna: “At the close of the first day of the feast of Tabernacles in the eighth year—i. e. at the termination of the seventh fallow year—a wooden platform was erected in the outer court, whereon he sat, as it is written, ‘at the end of the seventh year on the festival’ (ver. 10). Thereupon the superintendent of the synagogue took the book of the law and gave it to the head of the synagogue; the head of the synagogue then gave it to the head of the priests, the head of the priests again gave it to the high-priest, and the high-priest finally handed it to the king; the king stood up to receive it, but read it sitting. He read—(1) Deut. i, 1–vi, 3 (*אֵלֶּה הַדְּבָרִים עַד שְׁמַע*); (2) Deut. vi, 4–8 (*שְׁמַע*); (3) Deut. xi, 13–22 (*וַיְהִי אִים שְׁמִיעַ*); (4) Deut. xiv, 22–xxv, 23 (*עֲשֵׂה הַעֲשֹׂר*); (5) Deut. xxvi, 12–19 (*כִּי חִכְלָה לַעֲשֹׂר*); (6) Deut. xvii, 14–20 (*פִּרְשַׁת כִּרְכִּית וּקְלָלוֹת*); and (7) Deut. xxvii, xxviii (*עֵד שְׁנוּמֵר כֹּל הַפִּרְשָׁה*). The king then concluded with the same benediction which the high-priest pronounced, except that he substituted the blessing of the festivals for the absolution of sins” (Mishna, *Sota*, vii, 8). This benediction forms to the present day a part of the blessing pronounced by the maphtar, or the one who is called to the reading of the lesson from the prophets after the reading of the lesson from the law, and is given in an English translation in the art. HAPHTARAH of this *Cyclopædia*, beginning with the words

“For the law, for the divine service,” etc. The sabbatical year, however, was only binding upon the inhabitants of Palestine (*Kiddushin*, i, 9; *Orlah*, iii, 9), the limits of which were determined on the east by the desert of Arabia, on the west by the sea, on the north by Amana, while on the south the boundary was doubtful (comp. Geiger, *Lehr- und Lesebuch zur Sprache der Mishna* [Breslau, 1845], ii, 75, etc.).

As to the obedience to this law, ancient Jewish tradition tells us that it was never kept before the exile, and that it is for this reason that the Jews were seventy years in the Babylonian captivity, to give to the land the seventy years of which it was deprived during the seventy sabbatical years, or the 430 years between the entrance into Canaan and the captivity, as it is written (2 Chron. xxxvi, 20, 21), “until the land had enjoyed her Sabbaths [i. e. sabbatical years], for as long as she lay desolate she kept Sabbath to fulfil threescore and ten years [i. e. sabbatical years]” (comp. *Shabbath*, 13, a; *Seder Olam*, c. xxvi; Rashi on 2 Chron. xxxvi, 20). After the captivity, however, when all the neglected laws were more rigidly observed (see Neh. x, 31), the sabbatical year was duly kept, as is evident from the declaration in 1 Macc. vi, 49 that “they came out of the city, because they had no victuals there to endure the siege, it being a year of rest for the land,” from the fact that both Alexander the Great and Caius Cæsar exempted the Jews from tribute on the seventh year, because it was unlawful for them to sow seed or reap the harvest (Josephus, *Ant.* xiv, 10, 6), and from the sneers of Tacitus about the origin of this festival (*Hist.* v, 2, 4), as well as from the undoubted records and the post-exilic minute regulations about the sabbatical year contained in the ancient Jewish writings. According to 1 Macc. vi, 53, the one hundred and fiftieth year of the Seleucid æra was a sabbatical year (Josephus, *Ant.* xiii, 8, 1, 16, 12; xv, 1, 2; *War.* i, 2, 4; comp. Hitzig, *Isa.* p. 483; Von Bohlen, *Gen.* p. 138 sq., Einleit.). The Samaritans observed it (Josephus, *Ant.* xi, 8, 6). St. Paul, in reproaching the Galatians with their Jewish tendencies, taxes them with observing years as well as days and months and times (Gal. iv, 10), from which we must infer that the teachers who communicated to them those tendencies did more or less the like themselves. Another allusion in the New Test. to the sabbatical year is perhaps to be found in the phrase *ἐν σαββάτῳ δυνευσαντες* (Luke vi, 1). Various explanations have been given of the term, one of them being that it denotes the first Sabbath of the second year in the cycle (Wieseler, quoted by Alford, vol. i). See SECOND-FIRST SABBATH.

IV. *Design of the Regulation.*—The spirit of this law is the same as that of the weekly Sabbath. Both have a beneficent tendency, limiting the rights and checking the sense of property; the one puts in God's claims on time, the other on the land. The land shall “keep a Sabbath unto the Lord.” “The land is mine.” The sabbatical year opened in the sabbatical month. It was thus, like the weekly Sabbath, no mere negative rest, but was to be marked by high and holy occupation, and connected with sacred reflection and sentiment. At the completion of a week of sabbatical years, the sabbatical scale received its completion in the year of jubilee.

This singular institution has the aspect, at first sight, of total impracticability. This, however, wears off when we consider that in no year was the owner allowed to reap the whole harvest (Lev. xix, 9; xxiii, 22). Unless, therefore, the remainder was gleaned very carefully, there may easily have been enough left to insure such spontaneous deposit of seed as in the fertile soil of Syria would produce some amount of crop in the succeeding year, while the vines and olives would of course yield their fruit of themselves. Moreover, it is clear that the owners of land were to lay by corn in previous years for their own and their families' wants. This is the unavoidable inference from Lev. xxv, 20–22. Though the right of property was in abeyance during the sab-

batical year, it has been suggested that this only applied to the fields, and not to the gardens attached to houses. The great physical advantage aimed at in the sabbatical year was doubtless that the land lay fallow, thus increasing the fruitfulness of the six years of cultivation, especially in that ancient period when the artificial use of fertilizers was unknown. But this rest was experienced likewise by men and cattle. Other advantages of more or less importance have been suggested: the encouragement of the chase (comp. Lev. xxv, 7); the securing of the land against famine (Michaelis in the *Comment. Soc. Gotting. Oblat.* [Brem. 1763], v, 9; *Mos. Recht*, ii, 89 sq.); the prevention of exportation and foreign trade (Hug, *Zeitschr. für das Erzbisth. Freiburg*, i, 10 sq.). On the other hand, scarcity did sometimes occur during the sabbatical year (1 Macc. vi, 49, 53; Josephus, *Ant.* xiv, 16, 2), and it is certain that the institution had various inconveniences incident to it (comp. Grever, *Comment. Mis. Syntagma* [Olden. 1794], p. 27 sq.; Von Raumer, *Vorles. über alte Gesch.* i, 138 sq.), which, however, are certainly exaggerated by Von Raumer. Hüllmann, too, has been carried too far by his zeal against this institution (*Staatsverfass. der Israelit.* p. 163 sq.).

V. *Literature.*—Mishna, *Shebi'ith*; the Talmud on this Mishna; Maimonides, *Jad Ha-Chazaka Hilkoth Shemita Ve-Jobel*; Michaelis, *Commentaries on the Laws of Moses*, arts. lxxiv-lxxvii (English transl. [Lond. 1814], i, 387-419); Bähr, *Symbolik des mosaischen Cultus* (Heidelb. 1839), ii, 569 sq., 601 sq.; Maimonides, *Tr. de Jurib. Anni Sept.* Vertit Notisque illustr. J. H. Maius (Frankf.-on-the-Main, 1708); Carpzov, *Appar.* p. 442 sq.; Winer, *Realwörterb.* ii, 349.

Sabbatier, PIERRE, a French Benedictine, was born at Poitiers in 1682. In 1700 he took the habit of St. Benedict at the abbey of St. Faron de Meaux. He was employed by prince Bruinart to edit the fifth volume of the *Annales Benedictines*. At this time he also began to publish the ancient version of the Scriptures, commonly called the Italian Version. The first edition had not appeared when, on account of the part he had taken in the Jansenist quarrels, he was exiled to the abbey of St. Nicaise at Rheims. He did not live to see the work completed, his death occurring on March 24, 1742, but it was finally published by Ballard and Vincent de la Rue under the title of *Biblorum Sacrorum Latine Versiones Antiquae, seu Vetus Italica* (1743).

Sabbatini, Andrea, called *Andrea da Salerno*, an Italian painter, was born at Salerno about 1480. He studied at Rome under Raphael, and, though he remained there but a year, was one of the best imitators of Raphael's style. Among his numerous works at Naples are the frescos and scenes of Santa Maria della Grazia. His best works are at Gaeta and Salerno, and his *Visitation* may be seen at the Louvre, in Paris. He died in 1545.—Hoefler, *Nouv. Biog. Générale*, s. v.

Sabbatini, Lorenzo, called *Lorenzino da Bologna*, another Italian painter, was born about 1533 at Bologna. Being called to Rome under the pontificate of Gregory XIII, he painted in the royal hall of the Vatican *Faith Triumphant over Unbelief*, and other frescos in the Pauline Chapel. These gained for him the position of superintendent of the works in the Vatican, which he held till his death. The principal pictures of Sabbatini are a *Madonna*, in the Louvre; the *Marriage of St. Catharine*, at Dresden; and the *Virgin Enthroned*, at Berlin. He died in 1577.

Sabbatini, Luigi Antonio, an Italian composer of music, was born at Albano in 1739. While young he joined the Order of St. Francis, and received his musical education in the convents at Rome, Bologna, and Padua. His principal teacher was Villotti, whose system of harmony he adopted. He was made musical director of the church of the Twelve Apostles at Rome,

and retained the position till 1780, when he took the place of Villotti in the church of St. Antony at Padua. He composed much sacred music, and was the author of several musical works—*Elementi Teorici della Musica* (1789);—*Vera Idea delle Musicali Numeriche Segnature* (1795)—besides a *Life* of Villotti, and an edition of the *Psalms* of Marcello. He died at Padua Jan. 29, 1809.

Sabbatism (σαββατισμός, Heb. ii, 9, A. V. "rest"), a repose from labor, like that enjoyed by God at creation; a type of the eternal Sabbath of heaven. See REST.

Sabbatum Magnum (*great Sabbath*). The day before Easter was designated as the high Sabbath, partly in imitation of the primitive institution, and partly in token of respect for the time in which our Saviour lay in the grave. This was the only Sabbath eventually continued in the Church and distinguished by peculiar solemnities. It was set apart as a strict fast, probably with reference to the words of Christ, "When the Bridegroom is taken away from them, in those days shall they fast." It was called the *Easter vigil*, and was among the earliest of those established by Christians. From Lactantius, Jerome, and other Christian writers we learn that the early Christians expected the second coming of our Lord on this night, and prepared themselves for it by fasting, prayer, and other spiritual exercises. The Easter vigil was distinguished by the lighting of a large taper (*cereus paschalis*), signifying the resurrection of our Lord, and the consequent rejoicing of the Church; by the baptism of catechumens, particularly in the Greek Church; and by the reading of proper lessons, which took place immediately before the celebration of the baptism. The fast was continued till cock-crowing the next morning, which was supposed to be the time of the resurrection. In the Latin Church the Easter vigil was suppressed, in consequence of the numerous abuses practiced and the injury to the morals of young people.

Sabe'an; Sabe'us. See SABÆAN; SABÆUS.

Sabellianism. See SABELLIUS.

Sabellians. See SABELLIUS.

Sabellius, the author of a heretical doctrine concerning the nature of the Trinity, which disturbed the Church in the 3d century, and has occasionally reappeared, under modified forms, even down to modern times. Sabellius, according to Hippolytus (*Philosophoumena*), spent some time at Rome in the beginning of the 3d century, and was gained by Callistus to patripassianism. Subsequently he appears as a presbyter of Ptolemais, in Egypt. There his doctrine assumed a modified form, and made such progress in the Church that Dionysius, bishop of Alexandria, excommunicated him at a council in that city (A.D. 261), and opposed him so earnestly as to almost fall into the opposite error of a hypostatical independence of the Father and the Son. Thereupon the Sabellians complained of that bishop to Dionysius of Rome, who held a council on the subject in 262, and controverted Sabellianism in a special treatise, taking care also to refute subordinationism and tritheism. The bishop of Alexandria retracted his utterances on these last points. Thus this feature of the strife was largely allayed until the age of Arius, half a century later.

Sabellius is by far the most original and ingenious of the so-called Monarchians. His system is known to us only from a few fragments imperfectly preserved in Athanasius and other fathers. It has been carefully discussed, and even partially revived, by Schleiermacher in modern times (see Schaff, *Church History*, p. 292-294). The beginnings of Sabellianism are found in Noëtus, though there is no evidence of any historical connection between Noëtus and Sabellius. The system seems rather to have sprung out of Judaizing and Gnos-

tic tendencies which were indigenous to Egypt. Sabellius held the Jewish position of a strict monotheism, recognising only a single divine substance and a single hypostasis, which are but two words for the same thing. In themselves they constitute the *monad*. As simple substance, the monad is "the silent God," i. e. it is inoperative and unproductive. It becomes active only through revelation and development, which are sometimes conceived of as an unfolding, sometimes as a speaking. The first form of Sabellianism seems to have held merely to a dyad, to wit, God simple and God speaking, that is, God and the Logos. But this earlier form soon disappears, and gives place to a triad. Thus the monad evolves itself as a triad, as three divine persons, but not in the Nicene sense. The one divine substance simply assumes three forms (the Father, the Son, and the Holy Ghost) in its threefold relation to the world. This is not, however, simply three appellations, but it is three successive forms of manifestation of the one divine substance. In illustration of this, Sabellius compares the Father to the visible globe of the sun, the Son to its illuminating effects, and the Spirit to its warming influence, while the sun, *per se*, would correspond to the simple divine substance. To the first form of manifestation (the Father) is attributed the giving of the law, and in general the whole pre-Christian economy. Thereupon ensued the second form, the incarnation, in which God accomplished our objective redemption. Thereafter he appears under a third phase, the Spirit of sanctification, which exerts its efficiency in the hearts of believers. As the three manifestations are conceived of as successive, so, also, are they but temporary and *transitory*. The divine substance does not manifest itself simultaneously in three forms, but as each new manifestation is made the previous one ceases; and when, finally, all three stages have been passed, the triad will again return into the monad, and the divine substance will again be all and in all. Thus appears the pantheistic tendency of Sabellianism as a whole. God is the abstract substance which evolves itself into the world of reality, traverses the stage of finite life, and eventually retires within itself. The "silent" God speaks forth in the universe, and then returns back into silence. Some of the fathers traced the doctrine of Sabellius to the Stoic system. The only common element, however, is the pantheistic expansion and contraction of the divine nature immanent in the world. Kindred ideas are also found in Pythagoreanism, in the *Gospel of the Egyptians*, and in the *Pseudo-Clementine Homilies*. But this does not affect the vigorous originality of Sabellius. His theory broke the way for the Nicene Church doctrine by its full rejection of subordinationism, and by its complete co-ordination of the three persons. He differs from the orthodox view by his denial of the trinity of essence and the permanence of the threefold manifestation, thus making of the Father, Son, and Spirit simply a transient series of phenomena, which fulfil their mission, and then return into the abstract one divine substance.

See Athanasius, *Contra Arianos Oratio*, iii, 4; *De Synodis*, c. vii; Philastrius, *De Hæres. post Christi Passionem*, lib. xxvi; Theodoret, *Hæret. Fab. Compend.* ii, 9; Augustine, *De Hæres.* lib. xli; Basil, *Epist.* 210, 214; Tillemont, *Mémoires*, iv, 237; Mosheim, *de Rebus Christianis*, sæc. III, § xxxiii; Neander, *Church Hist.* (Rose's ed.), ii, 276; Milman, *Hist. of Latin Christianity*, ii, 429; Schleiermacher, *Ueber den Gegensatz der Sabellianischen und athanasianischen Vorstellung von der Trinität*; Herzog, *Real-Encykl.* xiii, 214-216. (J. P. L.)

Sa'bi [or rather SABI'Ê, as in the earliest editions of the A. V.] (Σαβίη, v. r. Σαβείν), given in 1 Esdr. v, 34 as the head of one of the families of "Solomon's servants" who returned from Jerusalem; apparently a false Græcism for the ZEBAIM (q. v.) of the Heb. lists (Ezra ii, 57; Neh. vii, 59).

Sabians (sometimes confounded with *Sabeans*), a

very ancient sect, said to be named after *Sabi*, son of Enoch, reputed to have been the founder of their religion in its original and purest form. Their creed comprehended the worship of one God, the Governor and Creator of all things, who was to be addressed through a mediator, which office was to be performed by pure and invisible spirits. An admiration of the heavenly bodies, and an undue idea of their influence over earthly objects, soon produced an idolatrous worship of the heavenly luminaries, in which they conceived that the mediative intelligences resided. At first the Sabians worshipped towards the planets, as the residences of the mediating spirits between God and man; hence soon arose star-worship. Then they made images to represent the stars, in which, after consecration, they imagined the intelligences came to reside; they named the images after the planets, and hence arose idolatry and its corruptions. They taught that the sun and moon were superior deities and the stars inferior ones; that the souls of the wicked were punished for nine thousand years, and then pardoned. They highly valued agriculture and cattle, and it was unlawful to kill the latter. The principal seats of Sabianism were Harran and "Ur of the Chaldees." Maimonides says that Abraham was originally a Sabian, till he was converted and left Chaldæa. Maimonides also says that it was very prevalent in the time of Moses. It is to Sabianism that Job alludes (xxxix, 26, 27), "If I beheld the sun when it shined, or the moon walking in brightness; and my heart hath been secretly enticed, or my mouth hath kissed my hand"—i. e. in token of salutation. Also in different parts of the second book of Kings, and in Zeph. i, 5; Jer. xix, 13, the idolatrous worship of the host of heaven is mentioned. The Sabians of later times, when praying, turn towards the north pole; pray at sunrise, noon, and sunset; abstain from many kinds of vegetables; believe in the ultimate pardon of the wicked, after nine thousand years of suffering; keep three yearly fasts—one in February of seven days, one in March of thirty days, and one in December of nine days; offer many burnt-offerings, or holocausts; adore the stars; teach that mediators live in the seven planets, whom they call lords and gods, but the true God they call Lord of lords; each planet, they teach, has his distinct region, office, and objects of guardianship; they believe that an intercourse is kept up between the planetary intelligences and the earth, and that their influence is conveyed by talismanic mystic seals, made with spells and according to astrological rules. They go on pilgrimage to Harran, in Mesopotamia, respect the temple at Mecca, and venerate the pyramids in Egypt, which they believe to be the sepulchres of Seth, Enoch, and Sabi; and they offer there a cock and black calf, and burn incense (Sale, *Koran*). See TSABIANS.

The name of Sabians is often given by the Mohammedans and Eastern Christians to a sect in and about Bagdad and Bassorah, whose proper appellation is *Mendaites*, or "Disciples of John" sometimes improperly called "Christians of St. John," as they have in reality no pretensions to Christianity. The name of their founder is John, but it is not quite clear that he is John the Baptist, as has been supposed by their using a kind of baptism. Their sacred books are a ritual, the book of John, and the book of Adam; the latter has been published, and is extremely mystical and obscure. It sets out with the Gnostic tenet of two eternal, self-existent, independent principles. It teaches that Jesus is one of the seven planets—viz. Mercury; that he was baptized in Jordan by John, but corrupted the doctrines of John, wherefore the good genius Anush delivered him up to be crucified. These Sabians pray at the seventh hour and at sunset; assemble at the place of worship on the first day of the week, on which day they baptize their children; they use extreme unction, decry celibacy, forbid the worship of images, permit all kinds of meat, but abstain from meat dressed by infidels; sign their children with a particular sign, and condemn all reverence

for the planets. The Rev. Joseph Wolf mentions in his *Journal* having met with some of these Sabians, or rather Mendaïtes, about Bassorah; but they evidently wished to impose on him and give a favorable impression of their doctrines. They affected a great reverence for Christ, as the Messiah, and the Word of God; they professed to require the mediation of Christ and John, and to believe that Christians would be saved, and to expect the second advent, and taught that sin was washed away by rebaptizing. Their remaining tenets, such as sealing their children, abstaining from meats cooked by Mohammedans, etc., are the same as have been before quoted. See MENDÆANS.

Sabin (or SABINE). ELIJAH ROBINSON, an early American Methodist minister, was descended from an old Puritan family, and was born in Tolland, Conn., Sept. 10, 1776. Although he never went to school after he was eight years of age, he acquired a tolerable education by night study on his father's farm. He was early converted under Calvinistic influence, but soon joined the Methodists, and began to preach in Vermont in 1798. The next year he was received into what was then the New York Conference, and sent to Needham, Mass. His labors on the Landaff Circuit, in New Hampshire, which was his next appointment, were so severe as to impair his health, and he retired as supernumerary for two years, during which he married. He resumed his ministry in 1805 as presiding elder of the Vermont district, and afterwards presiding elder on the New London district, enduring many hardships and persecutions in the work. He next served on the Needham Circuit, and finally in Boston. In 1811, his health failing, he located and afterwards removed to Penobscot, where he endured the horrors of the ensuing war, being in 1814 temporarily compelled to escape to Landaff. In 1817 he visited the South, and died at Augusta, Ga., May 4, 1818. He was a man of fine figure and commanding address, and at one time was chaplain of the House of Representatives of Massachusetts. He published several small works: *The Road to Happiness*;—*Charles Observer*;—several occasional *Sermons and Tracts*;—and began the collection of materials for a History of Maine. See Sprague, *Annals of the Amer. Pulpit*, vii, 306 sq.

Sabina, POPPÆA, first the mistress and afterwards the wife of Nero. Her father was T. Ollius, who perished at the fall of his patron Sejanus, and her maternal grandfather was Poppæus Sabinus, whose name she assumed. Poppæa had been originally married to Rufius Crispinus, by whom she had a son; but she afterwards became the mistress of Otho, a boon companion of Nero, by whose means she hoped to attract the notice of the emperor. Obtaining a divorce from Rufius, she married Otho. Her husband's lavish praise of her charms made the emperor anxious to see her. Her conduct had the desired effect. Nero removed Otho out of the way by sending him to govern Lusitania, A.D. 58. Poppæa now became the acknowledged mistress of Nero, but was anxious to be his wife. As long, however, as Agrippina, the mother of Nero, was alive, she could scarcely hope to obtain this honor. Through her influence Nero was induced to put his mother to death, in A.D. 59, and in A.D. 62 he put away Octavia, on the plea of barrenness, and married Poppæa a few days afterwards. Not feeling secure as long as Octavia was alive, she worked upon the fears and passions of her husband until she

prevailed upon him to put the unhappy girl to death in the course of the same year. Poppæa was killed by a kick from her husband in a fit of passion (A.D. 65). Her body was not burned, according to the Roman custom, but embalmed, and was deposited in the sepulchre of the Julii. She received the honor of a public funeral, and her funeral oration was pronounced by Nero himself. The only class in the empire who regretted her may have been the Jews, whose cause she had defended (Josephus, *Life*, § 3; *Ant.* xx, 8, 11).

Sabina, *Saint and Martyr*, was a pious and noble widow who had been converted to Christianity by Serapia, a virgin of Antioch who lived in her house (in what station is not known). Serapia was required to sacrifice to the gods, but refused; and when the presiding judge commanded her to offer to Christ instead, she replied, "I sacrifice to him continually, and pray to him day and night." To the inquiry, "Where is the temple of your Christ, and what sacrifices do you offer?" she responded, "I offer myself in chastity and purity, and endeavor to persuade others to the same course; for it is written, 'Ye are the temple of the living God.'" Thereupon the judge delivered her up to two Egyptians that they might violate her chastity; but they were smitten by divine power with blindness and terror, and were unable to accomplish their purpose. This result was attributed to the magical arts of Serapia, and she was subjected to various tortures, and finally beheaded. Sabina had the remains of her sainted teacher interred in her own tomb, and was soon called to suffer a similar fate. She endured joyfully for Christ, and was laid by the side of her companion. The year of their martyrdom was about A.D. 125, as both Tillemont and the Bollandists assume; the place, according to Tillemont, some town in Umbria, but according to the Bollandists, the city of Rome. Roman Catholic scholars are not agreed respecting the character of such ancient "Acts" of this saint as still exist; some, like Baronius, regarding them as "sincerissima," while others, like Tillemont (*Monumenta*, vol. ii), acknowledge them to be ancient, but doubt whether their antiquity reaches back to the time when these martyrs suffered, and also whether interpolations have not been added. The Bollandists decide, "nobis non videntur fide indigna, etiamsi non careant omni nævo" (see the Bollandists, in *Act. SS. MM. Serapie et Sabine* ad 29 Augusti). The relics of the two confessors were transferred in A.D. 430 to a new church erected in their honor at Rome.

Sabinian. See SABINIANUS.

Sabinianus, Pope, was a native of Volterra, and was elected bishop of Rome after the death of Gregory I, or the Great, Sept. 13, A.D. 604. He had been employed on a mission to the court of Phocas, the usurper of the Eastern empire. He is said to have shown himself avaricious and fond of hoarding, and to have thereby incurred the popular hatred. Sabinianus died in about eighteen months after his election (Feb. 22, A.D. 606), and was succeeded, after a vacancy of nearly one year, by Boniface III, the first bishop of Rome who was acknowledged by the imperial court of Constantinople as primate of the whole Church.

Sabotiers, a name given to the Waldenses, from the *sabots* (sandals) worn by the French peasantry. The *sabots* of the Waldenses were, however, distinguished by a painted cross—*insabotati*—or else by sandals tied crosswise. They are described in an epistle of Innocent III as "calcamenta desuper aperta" (Innocent, *Ep.* xv, 137); and other writers speak of the Waldenses as wearing sandals, after the custom of the apostles, and as walking with naked feet. Elbrard speaks of them contemptuously as assuming this name themselves: "Xabatenses a xabata potius, quam Christiani a Christo, se volunt appellari." The custom was doubtless adopted in imitation of the voluntary poverty

Coin, with Bust of Poppæa.

of the apostles, and in accordance with the names "Pau-peres de Lugduno" and "De Lombardia," which they as-sumed (Ebrard, *Contr. Waldens. in Bibl. Lugd.* [1572], xxiv).

Sab'ta (Heb. *Sabta'*, סַבְתָּא, of unknown etymo-logy; Sept. Σαβθα v. r. Σαβθα, 1 Chron. i, 9; in Gen. x, 7 the Heb. [in most MSS.] is *Subtah'*, סַבְתָּא; Sept. Σαβθα; Eng. Vers. "Sabtah"), the third named of the five sons of Cush, the son of Ham. B.C. cir. 2475. His descendants appear to have given name to a region of the Cushites (Gen. x, 7; 1 Chron. i, 9). See CUSH.

In accordance with the identifications of the settle-ments of the Cushites in the art. ARABIA and else-where, Sabtah should be looked for along the southern coast of Arabia. There seem to be no traces in Arabic writers; but the statements of Pliny (vi, 32, § 155; xii, 32), Ptolemy (vi, 7, p. 411), and *Anon. Peripl.* (27), re-specting *Sabbathu*, *Sabota*, or *Sabatole*, metropolis of the Atramiæ (probably the Chatramotitæ), seem to point to a trace of the tribe which descended from Sab-ta, always supposing that this city Sabbatha was not a corruption or dialectic variation of Saba, Seba, or Sheba. See SHEBA. It is only necessary to remark here that the indications afforded by the Greek and Roman writers of Arabian geography require very cau-tious handling, presenting, as they do, a mass of con-tradictions and transparent travellers' tales respecting the unknown regions of Arabia the Happy, Arabia Thurifera, etc. Ptolemy places Sabbatha in long. 77°, lat. 16° 30'. It was an important city, containing no less than sixty temples (Pliny, *N. H.* vi, 23, 32); it was also situate in the territory of king Elisarus, or Eleazus (comp. *Anon. Peripl.* ap. Müller, *Geog. Min.* p. 278, 279), supposed by Fresnel to be identical with "Ascharides," or "Alascharissoun" in Arabic (*Journ. Asiat. Nouv. Série*, x, 191). Winer thinks the identi-fication of Sabta with Sabbatha, etc., to be probable; and it is accepted by Bunsen (*Bibelwerk*, Gen. x, and *Atlas*). It certainly occupies a position in which we should expect to find traces of Sabta, where are traces of Cushitic tribes in very early times, on their way, as we hold, from their earlier colonies in Ethiopia to the Euphrates. Gesenius, who sees in Cush only Ethiopia, "has no doubt that Sabta should be compared with Σαβάρ, Σαβάρ, Σαβάρ (see Strabo, xvi, p. 770, ed. Cas-saub.; Ptolemy, iv, 10), on the shore of the Arabian Gulf, situated just where Arkiko is now, in the neigh-borhood of which the Ptolemies hunted elephants. Among the ancient translators, Pseudo-Jonathan saw the true meaning, rendering it סַבְתָּא, for which read סַבְתָּא, i. e. the *Sembitæ*, whom Strabo (*l. c.* p. 786) places in the same region. Josephus (*Ant.* i, 6, 1) un-derstands it to be the inhabitants of *Astabora*" (Gese-nius, ed. Tregelles, s. v.). Here the etymology of Sab-ta is compared plausibly with Σαβάρ; but when proba-bility is against his being found in Ethiopia, etymology is of small value, especially when it is remembered that Sabat and its variations (Sabax, Sabai) may be related to *Seba*, which certainly was in Ethiopia. On the Rab-binical authorities which he quotes we place no value. It only remains to add that Michaelis (*Suppl.* p. 1712) removes Sabta to *Ceuta*, opposite Gibraltar, called in Arabic *Sebtah* (comp. Marásid, s. v.); and that Bochart (*Phaleg*, i, 114, 115, 252 sq.), while he mentions Sabba-tha, prefers to place Sabta near the western shore of the Persian Gulf, with the Saphtha of Ptolemy, the name also of an island in that gulf.

Sab'tah (Gen. x, 7). See SABTA.

Sab'techa (Heb. *Sabteka'*, סַבְתְּכָא, etymology unknown; Sept. in Gen. Σαβθακα v. r. Σαβθακα; in Chron. A. V. "Sabtechah;" Σαβθεαχ v. r. Σεκαθά), the last named of the five sons of Cush, the son of Ham. B.C. cir. 2475. His descendants seem to have given name to a people in Ethiopia (Gen. x, 7; 1 Chron. i, 9). See CUSH. "Their settlements would probably be near

the Persian Gulf, where are those of Raamah, the next before him in the order of the Cushites. See DEDAN; RAAMAH; SHEBA. He has not been identified with any Arabic place or district, nor satisfactorily with any name given by classical writers. Bochart (who is fol-lowed by Bunsen, *Bibelwerk*, Gen. x, and *Atlas*) argues that he should be placed in Carmania, on the Persian shore of the gulf, comparing Sabtechah with the city of *Samydace* of Steph. Byz. (Σαυδάκη or Σαυκαδῆ of Ptolemy, vi, 8, 7). This etymology appears to be very far-fetched. Gesenius (*Thesaur.* p. 936) merely says that Sabtechah is the proper name of a district of Ethio-pia, and adds the reading of the Targ. Pseudo-Jonathan (זִיגִיטָא, *Zingitani*) (Smith). In confirmation of this latter view the name *Sabatok* has been discovered on the Egyptian monuments (Rosellini, *Monumenta*, ii, 198).

Sab'techah (Gen. x, 7). See SABTECHA.

Sabureans, a class of doctors among the mod-ern Jews, who weakened the authority of the Tal-mud by their doubts and conjectures. They were sometimes termed *Opinionists*. It is said that rabbi Josi was the founder of the sect about twenty-four years before the Talmud was finished. He had some celebrated successors who became heads of the academies of Sora and Pumbeditha. But as these two famous academies were shut up by order of the king of Persia, the sect of the Sabureans be-came extinct about seventy-four years after its es-tablishment.

Sacæa, a festival observed by the ancient Per-sians and Babylonians in commemoration of a victory gained over the Sacæ, a people of Scythia. It lasted five days, and resembled in its mode of observance the Roman saturnalia (q. v.).

Sa'car (Heb. *Sacar'*, סַכָּר, *hire*, as often; Sept. Σαχάρ v. r. Ἀχάρ, and Σαχάρ in 1 Chron. xxvi, 4), the name of two Israelites.

1. The father of Abiam, one of David's mighty men; he is called a Hararite (1 Chron. xi, 35), and is the same man called SHARAR (q. v.) in 2 Sam. xxiii, 33. B.C. ante 1020. See DAVID.

2. The fourth named of the eight sons of Obed-Edom (1 Chron. xxvi, 4). B.C. cir. 1012.

Sacchi, ANDREA, an Italian painter, was born at Rome in 1598. From his father, a mediocre artist, he received his first ideas of art, and by studying the works of Albani he became one of the best artists of the Ro-man school. His works show great care in execution, though they have been criticised by Raphael Mengs as lacking in detail. In the Vatican are four of his paint-ings, which are reproduced in Mosaic in the crypt of St. Peter's. Among his best paintings are the *Miracle of St. Gregory the Great, Noah and his Sons*, and por-traits of Albani and of the artist himself. He died in 1661. His tomb is in the church of St. John Lateran at Rome.

Sacchini, FRANCESCO, an Italian historian, was born in the year 1570 at Paciono, near Perugia. In 1688 he joined the Order of Jesuits, and taught in Rome. He was for seven years the secretary of Vitelleschi, general of his order. His writings were principally historical, as *Historia Soc. Jesu* (5 vols. fol.; the last three of these were published after his death). He also published a volume of ser-mons, and an Italian translation of the life of Paulin de Nole, by Rosweyde. He died at Rome Dec. 16, 1625.

Saccophōri (*sack-carriers*), a name of a small party of professing penitents in the 4th century, who went about always dressed in the coarse apparel which their name implies. They appear to have been a sub-division of the Encratites—those, namely, who thought fit to make an outward profession of their rule. St. Basil puts together the Encratites, Saccophori, and Apotactics

as an offshoot of the Marcionites (Basil, *Can. Epist.* ii, can. 47). Theodosius made a decree, which was renewed by Honorius, that some of the Manichæans, who went by the name of Encratites, Saccophori, or Hydro-parastatæ, should be punished with death (*Cod. Theod.* lib. xvi, tit. 5, "De Hæret." leg. ix).

Both the Marcionites and the Manichæans held the doctrine of Two Principles; and it is no wonder that the Encratites are referred now to one, now to the other of these sects. But their true origin appears to be from the former. St. Basil's Canon is one relating to the baptism of these sects. See ENCRATITES.

Saccus (σακός), a tight sleeveless habit worn by Greek patriarchs and metropolitans.

Sacellānus, The Grand, an officer in the Greek Church, whose title denotes "head-master of the chapel." He exercises inspection over monasteries and nunneries, presents all candidates for ordination to the patriarch or his deputy, and assists the patriarch in the performance of several of the ceremonies of the Church, and in the administration of his judicial functions.

Sacellius (Gr. σακελλάριος), a lay officer of the early Church, acting in the capacity of treasurer, as μέγας σακελλάριος, treasurer of the cloisters. See Coleman, *Christian Antiquities*, p. 129.

Sacellum, a sacred enclosure among the ancient Romans, which was dedicated to a god, and containing an altar and a statue of the deity.

Sacer, GOTTFRIED WILHELM, a German hymnist, was born at Naumberg July 11, 1635, and died Sept. 8, 1699. He was an excellent lawyer, and in his official duties distinguished himself by a strict conscientiousness and the most unbounded benevolence. He is the author of a number of very fine hymns; the greater part he composed while a student at the University of Greifswalde. When these hymns were collected and published in 1714, they immediately procured him the reputation of a distinguished poet. Two of them were also translated into English by Miss E. Cox: *Gott fährt auf gen' Himmel* (*Hymns from the German*, p. 62), "Lo! God to heaven ascendeth," and *So hab' ich abgesieget* (p. 86), "My race is now completed." See Koch, *Geschichte des deutschen Kirchenliedes*, iii, 398 sq.; *Gul. Saceri Memoria*, auctore Joanne Arnold Ballenstedt (Helmst. 1745). (B. P.)

Sacerdos (*priest*), a name by which bishops and presbyters are frequently designated in early writings, bishops being occasionally called *summi sacerdotes*. From the deacons performing only the subordinate ministerial duties, they were early called *sacerdotes secundarii vel tertii ordinis*. See Coleman, *Chris. Antig.* p. 111.

Sacerdotal Cities, the thirteen cities set apart by Joshua for the family of Aaron, which lay in the tribes of Judah, Simeon, and Benjamin (Josh. xxi, 4), and in the vicinity of the holy city. Their names were Hebron (a free city), Libnah, Jattir, Eshtemoa, Holon, Debir, Ain, Juttah, Beth-shemesh, Gibeon, Geba, Anathoth, and Almon; the last four being in the tribe of Benjamin (ver. 10 sq.). After the exile, too, priests dwelt in these cities (Neh. vii, 73), though many were permanently settled in Jerusalem itself (xi, 10 sq.). See CIRR; LEVI; PRIEST.

Sacerdotal Consecration AMONG THE ISRAELITES. Priests and high-priests were consecrated to their offices with a variety of ceremonies, which are described at great length in the sacred books (Exod. xxix, 1-37; Lev. viii, 1-30; Exod. xl, 12-15; comp. Bähr, *Symbolik*, ii, 166 sq.). The service consisted chiefly of two parts (comp. Exod. xxix, 29).

1. The proper consecration consisted of washing the whole body, investment, and anointing with the sacred oil. See UNGUENT. The latter, indeed, in Exod. xxix, 7; Lev. viii, 12, is mentioned only of the high-priests;

but that the common priests were also anointed is clear from Exod. xl, 15 (comp. xxviii, 41); and the peculiarity of the anointing of the high-priest seems to have been simply that the ointment was poured upon his head (xxix, 7; Lev. viii, 10), while the common priests were, perhaps, simply touched with the ointment on the hands, or, as the rabbins say, on the brow.

2. A sacrifice then followed. Three beasts were led to the altar, and the hands of the new-made priest were laid upon them. First a young bull was presented as a sin-offering, and essentially treated as a sin-offering of the first class. See SIN-OFFERING. A ram was slain as a burnt-offering, according to the usual ceremonial; and finally the Ram of Consecration. Blood from this ram was placed on the ear-laps, on the right thumb, and on the great toe of the right foot, and was sprinkled about the altar. The parts of the body touched with blood point out the members chiefly used in sacerdotal service. (On the foot, comp. Exod. xxviii, 35. See Bähr, *op. cit.* p. 425. Comp. the five places touched by the Catholics in extreme unction. Their priests at consecration have only the hands anointed.) Now the bodies and the clothing of the candidates were again sprinkled, this time with a mixture of the blood of the sacrifice and oil. The final ceremony was this: those parts of the ram of consecration which in the case of a thank-offering were raised and waved were placed, with some unleavened bread, upon the hands of the persons consecrated, and waved, and finally burned upon the altar, the "breast of the wave-offering" and the "shoulder of the heave-offering" alone excepted. On the symbolic meaning of this ceremony, see CONSECRATION OFFERING.

The ceremony of consecration, perhaps only the sacrifices of it, was to be repeated seven days (Exod. xxix, 35), and the priests were forbidden during this time to leave the sanctuary. It is not very probable that this minute ceremonial was carried out at the ordination of all Jewish priests. According to the rabbins, it was only necessary at the first institution of the priesthood, and afterwards each common priest, on entering upon his office, was only required to present the meat-offering (Lev. vi, 12, 14 sq.). See CONSECRATION; PRIEST.

Sacerdotal Order (designated in general by the Hebrew word *priests*, *kohanim*, כֹּהֲנִים), for the etymology, see various views in Gesenius, *Thesaur.* ii, 661 sq.). In the patriarchal age the head of a family was its priest (Gen. xxxv, 1 sq. [see JETHRO; MELCHIZEDEK]); but when the children of Israel became a nation, a special tribe of priests was set apart by law for them. This arrangement was so far similar to that of the Egyptians that they too had a separate caste or body of priests, who indeed were their first and highest caste (Herod. ii, 164; Diod. Sic. i, 73. On the Indian Brahmins, see Meiner, *Gesch. d. Religion*, ii, 541 sq.; yet comp. Bähr, *Symbolik*, ii, 32 sq.). By its hereditary nature, the priesthood acquired more firmness and security; the ritual and ceremonial law was more easily preserved and obeyed; and the higher culture which such a caste always secures obtained a more definite and fixed centre.

These priests alone "drew near to God" (Numb. xvi, 5; Exod. xix, 22; Ezek. xlii, 13; comp. Numb. xviii, 3), and hence must alone attend to all the services of the central sanctuary, the penalty of death being denounced against all others who assumed such duties (Numb. iii, 6-10, 38; xvi, 40). These priests, who exercised their office after the division of the kingdom, in Judah alone (1 Kings xiii, 33; 2 Chron. xi, 13 sq.), were confined to the family of Aaron (Exod. xxviii, 1), who were Kohathites (comp. Numb. iv, 2). Hence they are called *the children of Aaron* (Lev. iii, 5, 13; comp. i, 5; ii, 2); although not all the descendants of Aaron who were legally qualified actually served as priests. Thus Benaiah, a priest's son (1 Chron. xxvii, 5), held *military*

office under David (2 Sam. viii, 18; xx, 23; 1 Kings ii, 35). They were required to be without physical defect, as became men who must draw near to God, and mediate between him and his people (Lev. xxi, 17 sq.; comp. Mishna, *Bechoroth*, c. 7; Josephus, *War*, v, 5, 7; see Tholuck, *Zwei Beil. z. Br. a. d. Hebr.* p. 81 sq.). On the examination for priesthood, see Mishna, *Middoth*, v, 4). They must also be of blameless reputation (Josephus, *Ant.* iii, 12, 2; Philo, *Opp.* ii, 225; see Richter, *Physiogn. Sacerd.* [Jena, 1715] ii, 4; Kiesling, *De Legib. Mos. circa Sacerdot. Vitio Corporis Laborantes* [Lips. 1755]), which, indeed, was demanded among other nations (Potter, *Greek Antiq.* i, 292 sq.; Adam, *Rom. Antiq.* i, 529). On the vestals especially, see Aul. Gell. i, 12. The requirements of the canon law as to physical defects in the clergy may be compared.

The law did not fix any definite year of the priest's age in which he should enter upon his office; yet the Gemarists assert that none was ever admitted before his twentieth year. Indeed, this age was required of the Levites (q. v.) before serving. But since, at a later day, even the high-priest might be but a youth (Josephus, *Ant.* xv, 3, 3), it may be that with priests of lower grade no great strictness was ever exercised in this respect. Indeed the Mishna (*Yoma*, i, 7; comp. *Tamid*, i, 1) speaks of youths whose beard was just beginning to grow (if the gloss be right) as already entering the sanctuary in the priestly office. At a later day every one was required to prove his genealogy (comp. Mishna, *Middoth*, v, 4; *Kiddush*, iv, 4 sq.), which led the priests to set great value on their family records (comp. *Ezra* ii, 62; *Neh.* vii, 64; Josephus, *Apion*, i, 7), and the Gemara refers to a special course of instruction for those entering on this office (*Kethuboth*, cvi, 1). The formal consecration to the priesthood consisted in sacrifices, with symbolic ceremonies, purifications, and investment (*Exod.* xxix; *Lev.* viii). See SACERDOTAL CONSECRATION.

The Israelitish priests, during active service (and, according to Jewish tradition, during their stay in the Temple; but see Josephus, *War*, v, 5, 7; according to the Mishna, *Tamid*, i, 1, they were merely prohibited from sleeping in their clothes; these were kept in the Temple under a special officer [Mishna, *Shekal*, v, 1]), wore clothing of white linen (רְבֵד, *bad*), as did the Egyptian priests (Herod. ii, 37), whose white linen garments, the simple expression of purity, were known through the ancient world (see Spencer, *Leg. Rit.* iii, 5; Celsius, *Hierobot.* ii, 290). Bähr supposes the Israelitish priestly garments to have been copied from the Egyptian (*Symbol.* ii, 89 sq.), but on insufficient grounds (comp. Hengstenberg, *Mos.* p. 149 sq.). These garments of the Jewish priests consisted of the following distinct parts, which, however, are not accurately described (*Exod.* xxviii, 40, 42; xxxix, 27 sq.; *Lev.* vi, 3; viii, 13): (1.) מִכְנַסִּים, *miknasim* (Sept. περισκελῆ, A. V. "linen breeches"), which were simply drawers, a covering for the *puḏenda*, extending from the hips to the thighs (so described by Josephus, *Ant.* iii, 7, 1; but comp. Philo, *Opp.* ii, 225). (2.) כֶּתֶרֶת, *ketheneth* (A. V. "coat"), a woven *tunic* for the body. It is described by Josephus (*Ant.* iii, 7, 1) as reaching to the feet and fitting the body, with sleeves tied fast to the arms, and girded to the breast a little above the elbows. (3.) אֲבֵנֶת, *abnét*, the "girdle" used to bind the tunic. It passed round the body several times, beginning at the breast, and was then tied, and hung loosely down to the ankles, save when the priest was serving, when, for convenience, it was thrown over the shoulders. It was broad, loosely woven, and embroidered (Josephus, *Ant.* iii, 7, 2). (4.) מִגְבָּאֵה, *migbaáh* (A. V. "bonnet," *Exod.* xxviii, 40), properly a cap or *turban*, not made conical, but covering rather more than half the head, and so made as to resemble a crown. It was of heavy linen, in many folds, and sewed together, and had a cover of fine

linen, which reached down to the forehead. It was fitted closely to the head (Josephus, *Ant.* iii, 7, 3). But Bähr has made some well-grounded objections to this description of Josephus (*Symbol.* ii, 64 sq.), and the *migbaáh* may, perhaps, have been a real cap, possibly in the form of a flower-cup (comp. especially the extracts from *Schilte Haggibbor*, in Hebrew and German, in Ugolini *Thesaur.* vol. xiii, and Braun, *De Vestitu Sacerdot.* [Amst. 1701]). There is no sufficient reason for supposing the forms of these articles of clothing to have been imitated from Egyptian models. The Israelitish priests seem not to have worn shoes: no mention, at least, is made of them; and the belief prevailed that on a holy place one should tread only with bare feet (*Exod.* iii, 5; *Josh.* v, 15). See SHOE. The Egyptian priests performed their service barefoot (*Sil. Ital.* iii, 28; for other similar examples, see Carpzov, *Appar.* p. 790 sq.; Walch, *De Vet. Relig. ἀντιποδρία* [Jena, 1756], p. 12 sq.; Baldwin, *De Calceo Antiq.* c. 23), though Herodotus ascribes to them sandals of papyrus (ii, 37). The Rabbins assure us expressly that the priests wore no shoes (Bartenora, *Ad Cod. Shekal*, v, 1; Maimonides, *Chele Hamikd.* v, 14; comp. Theodoret, *Ad Exod.* iii, qu. 7; Mishna, *Berachoth*, ix, 5), and refer in part to this cause the frequency of diseases of the bowels among the priests, which rendered it necessary to keep a special physician at the Temple skilled in those diseases (comp. Braun, *Vestit. Sacerd.* i, 3, 33 sq.; Kall, *De Morbis Sacerdot. V. T. ex Ministerii eor. Condit. Oriundis* [Hafn. 1745]).

The priests appear to have been divided by David into twenty-four classes for the daily service (1 Chron. xxiv, 3 sq.; comp. 2 Chron. viii, 14; xxxv, 4 sq.; Josephus, *Ant.* vii, 14, 7), each of which had its president or ruler (2 Chron. xxxvi, 14; *Ezra* x, 5; *Neh.* xii, 7; he is called ἀρχιερέυς by Josephus, *Ant.* xx, 7, 8; *Life*, v, 38, 39; and in the New Test., *Matt.* ii, 4; xvi, 21; *Luke* xxii, 52), and performed the service for one week, from Sabbath to Sabbath (2 Kings xi, 9; 2 Chron. xxiii, 4; comp. *Luke* i, 5; Josephus, *Apion*, ii, 7 sq.); dividing itself further into six sections, one for each day of the week, the whole number acting on the Sabbath. These twenty-four classes still existed in the period after the exile (Josephus, *Life*, p. 1; *Apion*, ii, 7; comp. 1 Macc. ii, 1), and the Talmud asserts (Lightfoot, *Hor. Heb.* p. 708 sq.) that the four priestly families which returned with *Ezra* (*Ezra* ii, 36 sq.) were immediately divided into twenty-four parts by the prophets (comp. Sonntag, *De Sacerd. V. T. Ephem.* [Altorf, 1691]; Maius, *De Ephem. Sacerd. in his Exercit.* i, 20). Herzfeld, however, considers the account of the original division into classes as a fable of the chronicler, yet without reason (*Gesch. des Volkes Israel*, i, 392 sq.). The several duties, as they returned in order, were distributed by lot (*Luke* i, 9; Mishna, *Yoma*, ii, 3 sq.; and *Tamid*; see Lightfoot, *Hor. Heb.* p. 714 sq.), and there was a special officer at the Temple to preside over this distribution (Mishna, *Shekal*, v, 1). The office of priest, in distinction from that of Levite, consisted in "coming nigh" to the vessels of the sanctuary and to the altar (*Numb.* xviii, 3); and included the following special duties: (1.) In the Temple itself, the kindling of the incense (q. v.) morning and evening (*Luke* i, 10); the cleansing of the lamps in the "golden candlestick" and filling them with oil; the weekly renewal of the shew-bread. (2.) In the court of the Temple, the feeding of the continual fire on the altar of burnt-offering (*Lev.* vi, 5), and daily removal of the ashes from it (*Yoma*, ii, 8, iii, 1; *Tamid*, i, 2, 4); all the exclusively priestly services in sacrificing, sprinkling the blood (*Lev.* i, 5, 11; iii, 2, 13; iv, 25; 2 Chron. xxx, 17, etc.); waving the wave-pieces (*Lev.* xiv, 24; xxiii, 11, 20); presenting the sacrifices and gifts upon the altar, and burning those which were to be burned (ii, 2, 8, 16; iii, 11, 16; iv, 26 [see SACRIFICE]); then the sacred ceremonies at the cleansing of the Nazarite, on the final release from his vow (*Numb.* vi), and at the ordeal of a woman suspected of adultery (ver. 12 sq.), and the blowing of the metal

trumpets at set times (Numb. x, 8 sq.; 2 Chron. v, 12; vii, 6; xxix, 26; Neh. xii, 41; Mishna, *Succa*, v, 5; *Arach*, ii, 3). To these were added the examination of the unclean, especially of lepers and their cleansing (Lev. xiii, 14; comp. Deut. xxiv, 8; Matt. viii, 4; Luke xvii, 14 [see PURIFICATION]), the estimation of vows (Lev. xxvii, 8), and the nightly watch of the inner sanctuary (Mishna, *Middoth*, i, 1). How these were related to the priests who kept the threshold (2 Kings xii, 9; xxv, 8; Jer. lii, 28) is uncertain. See THRESHOLD. The overseer of the regular watch of the priests is mentioned (*Middoth*, i, 2); perhaps the same with the *captain of the Temple*, *σπαρτηγός τοῦ ἱεροῦ* (Acts iv, 1; v, 24; comp. Deyling, *Observ.* iii, 302 sq.). But who, then, are the *captains of the Temple*, *σπαρτηγοί*, in the plural (Luke xxii, 52)? Perhaps under-officers of the Levitical Temple-watch (comp. Mishna, *Shekal*. v, 1, 2). See TEMPLE.

The priests were also required to instruct the people in the law, and in certain cases to give judicial answers (Deut. xvii, 8 sq.; xix, 17; xxi, 5; comp. 2 Chron. xxvii, 8 sq.). King Jehoshaphat even established a high tribunal, consisting of priests and Levites, in Jerusalem (2 Chron. xix, 8; comp. Josephus, *Apion*, ii, 21; Diod. Sic. *Ecl.* xl, 1). On the services of priests in armies, see WAR.

The priests were required to perform all their offices in a state of ceremonial purity (Josephus, *War*, v, 5, 6), which led to their oft-repeated washings, especially before each performance of official duty (Exod. xxx, 19 sq.; *Tamid*, i, 2, 4; ii, 1), for which purpose vessels of water for bathing were kept in the court of the sanctuary. (On the duties of priests when rendered unclean, see the Mishna, *Middoth*, ii, 5.) They were not permitted, while engaged in official service, to take wine or any other intoxicating drink (Lev. x, 9 sq.; Ezek. xlv, 21; Josephus, *Ant.* iii, 12, 5; *War*, v, 5, 7). According to Rabbinical regulations, those who had the daily ministration must entirely abstain, and the rest of the weekly division might drink wine only at night, because during the day they were liable to be called on for aid (Mishna, *Taanith*, ii, 7; comp. Josephus, *Apion*, i, 22, p. 457 ed. Haverc.). All extravagant demonstrations of sorrow, as rending the clothes, wounding the body, shaving the head, etc., were forbidden them (Lev. x, 6 sq.; xxi, 5 [see MOURNING]), and they were to avoid with care the touch of a corpse (Lev. xxi, 1 sq.; Ezek. xlv, 25 sq.; Bähr, *Symbol.* ii, 182 sq.). With these restrictions may be compared those enjoined on the *flamen dialis* among the Romans (Aul. Gell. x, 15). They were required in marrying, too, to have regard to priestly dignity; though not compelled to celibacy, as the Egyptian priests (Diod. Sic. i, 80), they could only marry virgins or widows of character (never divorced women, Mishna, *Sota*, viii, 3), and of Israelitish descent (Lev. xxi, 7; Ezek. xlv, 22; comp. Ezra x, 18), though no limit was enjoined as to the particular tribe; and in a later age even the Israelitish descent needed not to be direct (Mishna, *Biccur*, i, 8). Yet intermarriage with the families of priests was especially sought (Luke i, 5; comp. Josephus, *Apion*, i, 7; Mitnch, *De Matrim. Sacerd.* V. T. c. *Filiab. Sacerd.* [Nuremb. 1747]). The law even extended its special care to the dignity and honor of the daughters of the priests (Lev. xxi, 9; comp. xxii, 12; Mishna, *Terumoth*, vii, 2).

It is not difficult to understand how the priests enjoyed the peculiar reverence of the people (comp. Jer. xviii, 18; Sirach vii, 31 sq.; Josephus, *Apion*, ii, 21), although their want of piety, and even their immorality, often called for severe rebukes from the prophets (Jer. v, 31; vi, 13; xxiii, 11; Lam. iv, 13; Ezek. xxii, 26; Hos. vi, 9; Mic. iii, 11; Zeph. iii, 4; Mal. ii). A number of cities (thirteen) were set apart for the residences of the priests, as also for the Levites (Josh. xxi, 4, 10 sq.), which lay near together in the vicinity of the sanctuary, in the tribes of Judah, Simeon, and Benjamin [see SACERDOTAL CITIES], and between which and Je-

rusalem they made their journeys on official duty (comp. Luke x, 31. (On the station or reserve body of priests in Jericho, see Lightfoot, *Hor. Heb.* p. 89, 709.) In the Holy City, the priests inhabited chambers in the neighborhood of the Temple (Neh. xi, 10 sq.).

The priesthood was supported (comp. Numb. xviii; Josephus, *Ant.* iv, 4, 4) by the assigned portions of the sacrifices (Lev. ii, 3, 10; v, 13; vi, 9, 13; vii, 6, 9, 14, 32, 34; x, 12 sq.; Numb. vi, 20; Deut. xviii, 3), as in Egypt (see Herod. ii, 37; and see SACRIFICE; comp. also Schol. ad Aristoph. *Plut.* 1186). This sacred portion was distributed also to those of priestly descent who were infirm, or for other reasons not called into service (Lev. xxi, 22; Josephus, *War*, v, 5, 7; see Hottinger, *Apolog. pro Benigna Lege*, Lev. xxii [Frankf. 1738]; Cremer, in the *Miscell. Groning.* ii, 294 sq.; Deyling, *Observ.* v, 70 sq.). First-fruits, heave-offerings (Numb. xxxi, 29), tithes (q. v.), the shew-bread, when removed (Lev. xxiv, 9; Matt. xii, 4; comp. *Succa*, v, 8), the fines for Levitical transgressions (Numb. v, 6 sq.), the redemption price of the first-born (xviii, 15 sq.), and the subjects of vows, or the price of their redemption (Lev. xxvii; Numb. xviii, 14; see in general Philo, *De Præmiis Sacerd.* in vol. ii of Mangey's *Ausp.* p. 232 sq.), were also perquisites; some of which were only to be enjoyed by the priests themselves, and only then in the vicinity of the sanctuary, as the pieces of the trespass-offering (Lev. vi, 19 sq.) and the shew-bread (xxiv, 9); others only within the Holy City; while the tithes, heave-offerings, etc., were eaten in the sacerdotal cities, and by the entire families of the priests.

In addition to their receipts, the priests were free from taxes and from military service; and the freedom from taxation was granted them even in the period after the exile, and by the foreign rulers of Palestine (Ezra vii, 24; Josephus, *Ant.* xii, 3, 3). In the last period of the Jewish state the rapacity of the high-priests reduced the common priests even to want (Josephus, *Ant.* xx, 9, 2; comp. 8, 8). As the priests and Levites formed one thirteenth of the whole population, the support of this class was no small burden on the productive industry of the nation; yet the constant increase of the Levitical families caused such division of the revenues that the income of a Levite could never have been very great. In relation to this subject, it should be borne in mind, (1) that the tithes and first-fruits, on a soil so fruitful, and with property secured by law, could never be very burdensome; (2) that the other gifts, pieces from the sacrifices, vows, etc., depended in great part on the free choice of worshippers; (3) that, apart from the priests and a few officers of government, the whole people were producers, and, during the early period at least, the body of consumers was not increased by a standing army or a learned class; (4) that the increase in numbers of the Levites themselves did not increase the tithes, which were a fixed percentage of the produce. The true view is that one thirteenth of all the land rightfully belonged to the tribe of Levi; and, as this share was abandoned to the other tribes, their revenues were not payments for their sacerdotal services, but interest or rent for their land.

Thus, until the destruction of the Temple at Jerusalem by the Romans, the priestly order continued as a hereditary and honored body (contrasted with the laity in the Talmud, *Terum.* v, 4), directing and expressing the religious views of the people by symbolic usages, and when their relations to Jehovah were disturbed by sin, restoring them by expiatory sacrifices. It was a kind of nobility (Josephus, *Life*, sec. i). It seems to have been in correspondence with their natural position in the nation that at an early period the priests had an active share in the government as political counsellors (Numb. xxvii, 2, 19; xxxi, 12 sq., 26; xxxii, 2; Deut. xxvii, 9; Josh. xvii, 4). Under the kings, they sometimes mediated between the prince and the people (2 Sam. xix, 11), or were prized as counsellors at court (1 Kings i, 7 sq., 39; iv, 4; 2 Sam. viii, 17); but later

when the corruption of the people and the State became obvious, they allied themselves with kings and princes for the suppression of the bold speaking of the prophets (Jer. xx, 1 sq., xxvi, 7 sq.), for their love of form and ritual would naturally endanger the spirit of faith within them, and place them in opposition to the prophets. See **SEER**.

The rule of the sacerdotal caste in Palestine does not seem to have begun with the settlement of the Israelites there. In the time of the Judges there were family priests appointed by the head of the household (Judg. xvii, 5 sq.; xviii, 3, 27, 30). Those who were not Levites, or at least not priests, offered on altars which they had themselves built (Judg. vi, 26; xiii, 19; 1 Sam. vii, 9; xvi, 5; but Judg. vi, 18 does not belong here; see Rosenmüller, *ad loc.*; so in 1 Sam. vi, 14, as in 2 Sam. vi, 17, though priests are not expressly named); and in Shiloh, near the sanctuary, where a family of priests performed service, the people visited high-places and altars long before consecrated. See **SACRIFICE**. Even under David, it would seem that the Levitical priests were not exclusively intrusted with the sanctuary, for David's sons were priests (2 Sam. viii, 18). It is true that the word כֹּהֲנִים, *kohanim*, is here often rendered *priory-councillors*, or, as in the A. V., "princes;" and so in other places where the priests are named with the people of the court, but without philological grounds (Gesenius, *Thesaur.* ii, 663 sq.). An exclusive priesthood, as a distinct caste, was confirmed by the building of the Temple, and their influence may have been increased by being concentrated within the little kingdom of Judah. According to 2 Chron. xi, 13 (comp. 1 Kings xii, 31; xiii, 33) the priests and Levites left the kingdom of Israel under its first king, and gathered in the kingdom of Judah (but comp. 2 Kings xvii, 27 sq.).

See, in general, Philo, in the first book, *De Monarchia*, p. 225 sq.; Saubert, *De Sacerdot. Hebr.* in his *Op. Posth.* p. 283 sq., and *De Sacrif. Vet.* p. 637 sq.; also in Ugolini *Thesaur.* vol. xii; Krumbholz, *Sacerdot. Hebr.* and Ugolini *Sacerdot. Hebr.* in *Thesaur.* vol. xiii; Carpzov, *Appar.* p. 89 sq.; Reland, *Ant. Sac.* ii, 4 sq. See **PRIEST**.

Sacheverell, HENRY, D.D., a celebrated English divine, son of Joshua, minister of St. Peter's Church, Marlborough, was born about 1672. He was educated at Magdalen College, of which he became a fellow, and appears to have been celebrated and successful as a college tutor. He took his degree of M.A. in 1696, of B.D. in 1707, and of D.D. in 1708. The first living he held was at Cannock, in Staffordshire, but in 1705 he was appointed preacher of St. Saviour's, Southwark. It was while in this situation that he delivered his two famous sermons—the first at the assizes at Derby, Aug. 15, 1709; the other before the lord mayor at St. Paul's, Nov. 5, in the same year. In both sermons he vehemently attacked Low-Churchmen and Dissenters, and asserted that the Church was in imminent danger. In one he was supposed to allude, under the name of Volpone, to lord Godolphin. He was impeached by the House of Commons, and tried before the Lords, found guilty, and suspended for three years, his sermons to be burned by the public hangman. On the expiration of his sentence (1713), the queen presented him to the living of St. Andrew's, Holborn. He died June 5, 1724. He left a number of sermons, principally remarkable because of their connection with his trial. Some excellent Latin poems by him are in the *Musæ Anglicanæ*, vols. ii, iii. See *Secret Memoirs of Sacheverell* (Lond. 1710); *History of Dr. Sacheverell* (ibid. 1711).

Sachs, HANS, an eminent people's poet of Germany, was born at Nuremberg, Nov. 5, 1494. In a Latin school, from 1501 to 1509, he learned the elements of the sciences of the day. Though apprenticed to the trade of a shoemaker in his fifteenth year, and hindered from university training, the beginnings of general knowledge which he obtained in youth were

fruitfully utilized in his after-life. As a schoolboy he was trained to take part in the choral service of the Church; and he enjoyed also the special instruction of the Meistersinger Lienhard Nonnenbeck. Thus he joined to his profession of cobbler that of a Meistersinger. In 1511 he started upon a wandering tour, and in the course of five years became acquainted with most of the cities and eminent persons of Germany. In 1519 he returned to Nuremberg, married, and plied his two trades of cobbler and poet to the end of his life. He died Jan. 20, 1576, at the age of eighty-one.

The career of Sachs falls in the most prosperous period of Nuremberg's history, and covers the whole epoch of the Reformation. Among his townsmen were Dürer, Vischer, Ebner, Spengler, and Osiander. When Luther began to preach, he warmly welcomed the new epoch, and called the reformer the "Wittenberg nightingale." Throughout his fruitful life he labored, directly or indirectly, to promote the new doctrines, and to promote honor and purity among the people. His poetic productiveness began with his return to Nuremberg, in his twenty-fourth year. Thenceforth his fertility is almost marvellous, and comparable only to that of the Spanish poet Lope de Vega. His works embraced thirty-four folio volumes. In 1567 he estimated the number of his poems, short and long, at 6048, and nearly 600 were subsequently added. They were written upon all possible subjects—history, sacred and profane; fable, classic and Gothic; civic life and domestic; animals, birds, and fishes; and in every style—tragedy, comedy, farce, epic, didactic, lyric, elegiac, and descriptive. The greater part of these poems were designed not for the press, but to be used by players in MS., and to be sung on special occasions. The first complete collection of his approved poems appeared at Augsburg, in 3 vols. fol., from 1558 to 1561. A larger edition, at the same place, in 5 vols. fol., in 1570-79. A selection of his better pieces appeared at Nuremberg in 1781, also in 3 vols.; *ibid.* in 1816-24; still another, in 2 vols., in 1856; still another in the 4th, 5th, and 6th vols. of the *Deutsche Dichter des 16. Jahrhunderts*, by Goedeke and Tittmann (Leips. 1870-74). During the dry dogmatic period of the 17th century, Sachs was quite neglected, but Wieland and Goethe brought him again into good repute. A monument was erected to him at Nuremberg in 1874. See Ranisch, *Lebensbeschreibung Hans Sachsens* (Altenburg, 1765); Hoffmann, *Hans Sachs* (Nuremberg, 1847); Herzog, *Real-Encykl.* xx, 636, 658. (J. P. L.)

Sachs, MARCUS, professor of Hebrew and exegetical theology, was born of Jewish parentage at Inowratz-lav, in the duchy of Posen, June 13, 1812. He received his early education at Berlin, in the house of an uncle, who sent him to the gymnasium, where Homer became his delight. Having passed his examination, he entered the university, and gave himself to the study of French literature. Voltaire became his idol. The career of a rabbi was closed to him; and as for a position in any public office, the government of Prussia in those days was not liberal to men of his opinions. As trade also was not to his mind, he determined in 1842 to go to England. After a short sojourn in London he came to Edinburgh, and here it was that, through the instrumentality of the late Dr. John Brown, this Jewish freethinker was brought to Christ. When he had made his public profession, he betook himself to the study for the ministry, and attended the lectures of Dr. Chalmers. Having obtained license as a preacher, he was appointed tutor in Hebrew to the Free Church Divinity Hall in Aberdeen. After having filled the office of tutor for some years, he was raised to the status and obtained the title of professor of Hebrew and exegetical theology. For nearly thirty years he held this honorable position, until he was called home, Sept. 29, 1869. See *Marcus Sachs: In Memoriam* (Aberdeen, 1872); Delitzsch, *Saat auf Hoffnung* (1875), xii, 41 sq. (B. P.)

Sachs, MICHAEL, a German rabbi, was born at

Great-Glogau, Sept. 3, 1808. Owing to his distinguished talents both as a Biblical scholar and a preacher, he was invited to become rabbi preacher of the new temple at Prague in 1836, which office he occupied till 1844, when he was appointed rabbinat assessor to the Jewish community at Berlin, where he remained till his death, Jan. 31, 1864. He published a German translation of the *Psalms*, with annotations (Berlin, 1835):—*Deuteronomy, Joshua, Judges, Samuel, Isaiah, Joel, Amos, Habakkuk, Zephaniah, Haggai, Malachi, the Psalms, the Song of Songs, and Lamentations, as well as part of Jeremiah*, translated from the Hebrew into German, embodied in the *Twenty-four Books of Holy Scripture according to the Massoretic Text*, edited by Zunz, Arnheim, Fürst, and Sachs (ibid. 1838):—*Die religiöse Poesie der Juden in Spanien* (ibid. 1845):—*Stimmen vom Jordan und Euphrat* (ibid. 1853):—*Beiträge zur Sprach- und Alterthumsforschung* (ibid. 1852–54, 2 vols.):—*Festival Prayers of the Israelites*, the Hebrew text with a German translation and notes (ibid. 1856–57, 9 vols.):—*Daily Prayer-book*, the Hebrew text with a German translation (ibid. 1858):—and finally, *Sermons* (ibid. 1867–69, 2 vols., ed. by Dr. D. Rosin), besides a number of valuable essays, published in the *Kerem-Chemed* (ibid. 1856, new ser. vol. ix.). See Fürst, *Bibl. Jud.* iii, 190 sq.; Kitto, *Cyclop.* s. v.; Geiger, *Jüdische Zeitschrift*, 1863, p. 263 sq.; Frankel, *Monatsschrift*, 1864, p. 115 sq.; 1866, p. 301 sq.; Grätz, *Geschichte der Juden*, xi, 571 sq.; Cassel, *Leitfaden der jüdischen Literatur*, p. 114 sq.; *Jewish Messenger* (N. Y.), Aug. 27, 1875. (B. P.)

Sachse, Christian Friedrich Heinrich, D.D., a German Protestant theologian, was born July 2, 1785, at Eisenberg, in Saxe-Altenburg. Having finished his studies at Jena, he was in 1812 appointed deacon in Meuselwitz, near Altenburg. In 1823 he was made court preacher at Altenburg, in 1831 member of consistory, and in 1841 his alma mater honored him with the theological doctorate. In February, 1860, he was obliged, through bodily infirmities, to retire from his important position, and on October 9 he was called to his home. Sachse wrote several very fine hymns, two of which are also translated into English:—*Wohlauf! wohlan! zum letzten Gang*, sung at his own funeral (in *Hymns from the Land of Luther* [p. 108], "Come forth! come on with solemn song!"), and *Lebwohl, die Erde wartet dein* (ibid. p. 154, "Beloved and honored, fare thee well!"). See Koch, *Gesch. des deutschen Kirchenliedes*, vii, 22, 76; Knapp, *Evangel. Liederschatz*, p. 1342, s. v. (B. P.)

Sack, Brethren of the, a religious order, which was established about the beginning of the 13th century, and had monasteries in France, Germany, Italy, and England. The brethren were very austere, for they neither ate flesh nor drank wine. Besides the sack which they wore, and from which they took the name, they went barelegged, and had only wooden sandals on their feet.

Sack, August Friedrich Wilhelm, one of the most eminent German Reformed preachers of the reign of Frederick II of Prussia, was born at Harzgerode, Feb. 4, 1703. In 1722–24 he studied at Frankfort-on-the-Oder. The next two years he passed as tutor in the family of a French preacher at Stettin. Then he studied in Holland. Here he became acquainted with the chief theologians of Arminianism, from which his own views took a permanent coloring. From 1728 to 1731 he was teacher to a young prince in the neighborhood of Magdeburg. In 1731 he began to preach in Magdeburg, and rapidly rose in esteem and in office. In the last year of the old king Frederick William I (1740) he was called to Berlin, where he entered upon his ministry of forty years. It was a noble and fruitful career. He stood independent between the two prevalent parties—the slavishly orthodox and the rationalists—holding to the good in both parties, and esteemed by the best in both. At the outbreak of the Seven Years' War he ac-

companied the royal family to Magdeburg, and there, for three years, was charged with the education of the crown-prince. At the close of the war, he resumed his labors as cathedral preacher in Berlin. He preached his last sermon in 1780. He died April 3, 1786. The chief theological work of Sack is *Der vertheidigte Glaube der Christen* (issued first in 1751, again in 1773), a popular statement and defence of Christian doctrine, which is worthy of attention even to-day. In this work the author ably and safely avoids the two fatal extremes of dynamic determinism as to the action of grace and of the self-regeneration of the Socinians. "The objective conditions of salvation are miraculously prepared in redemption; the subjective appropriation of these conditions is left to human freedom. God cannot convert man without man; man cannot convert himself without God." Of Sack's sermons several volumes appeared (1735 to 1764). They passed through many editions. One volume of them was translated into French by Frederick II's queen, Elizabeth: *Six Sermons de M. Sack* (1775). In character Sack was worthy of his high position. He quailed not before tyrants, and was believing in an age of negation and infidelity. He stood by the side of Spalding, Jerusalem, and Zollikofer, a pillar of the Church, when obscurantist and neologist were laboring to bury it in ruins. His was noble blood; his son and his son's son have followed worthily in his footsteps. See Sack, *Lebensbeschreibung* (by his son [Berlin, 1789, 2 vols.]); Herzog, *Real-Encycl.* x.x, 653–662. (J. P. L.)

Sack, Carl Heinrich, Dr., a German theologian, son of F. S. G. Sack, was born at Berlin, Oct. 17, 1790. He studied at Göttingen and Berlin, and commenced his lectures at the Berlin University in 1817. In 1818 he was made professor extraordinary, and in 1832 professor of theology in Bonn. He died at Pappelsdorf, near Bonn, Oct. 16, 1875. Of his many works we mention *Christliche Apologetik* (Hamb. 1841):—*Christliche Polemik* (ibid. 1838):—*Geschichte der Predigt von Mosheim bis Schleiermacher und Menken* (Heidelberg, 1866):—*Theologische Aufsätze* (Gotha, 1871, etc.). See Zuchold, *Bibliotheca Theologica*, ii, 1106 sq.; *Theologisches Universal-Lexikon*, s. v.; Koch, *Gesch. des deutschen Kirchenliedes*, vii, 353; *Literarischer Handweiser* (1875), p. 433; *Theologisches Jahrbuch* (Bielefeld, 1877), p. 228. (B. P.)

Sack, Friedrich Ferdinand Adolph, brother of the preceding, was born at Berlin, July 16, 1788, and succeeded his father as court and cathedral preacher. He died Oct. 16, 1842. Together with his brother, he published *Sermons* (Bonn, 1835). He is also the author of the beautiful communion hymn *Du ladest, Herr, zu deinem Tisch*. See Koch, *Gesch. des deutschen Kirchenliedes*, vii, 353; Knapp, *Evangel. Liederschatz*, p. 1342, s. v. (B. P.)

Sack, Friedrich Samuel Gottfried, a Prussian theologian, court preacher, and Church governor, was born Sept. 4, 1738. His mother was of a French refugee family, which explains a fondness which Sack had for the French language and literature. He studied at the University of Frankfort-on-the-Oder from 1755 to 1757. The next two years he studied in England, coming into contact with Secker, the archbishop of Canterbury, Kennicott, Lardner, and others. On his return to Germany he acted as tutor to a young nobleman, whom he accompanied to Frankfort-on-the-Oder, and where he again heard lectures. He now associated much with Töllner. After preaching at Magdeburg (1769–77), he was called by Frederick II as fifth court preacher to Berlin. Gradually he rose to the first place. In 1786 he became a member of the high consistory. The years 1804–13 were spent in arduous devotion to the oppressed and suffering people of the capital. In 1816 the king conferred upon him the title of bishop of the Evangelical Church. He died Oct. 2, 1817. In theology Sack was independent of the traditions of orthodoxy, but he

stood firmly on evangelical ground. God as a person and Father; the Son as Redeemer and Offering; the Holy Spirit as comforter; love to God in Christ as the spring of the Christian life—such were the elements of his theology. Though leaning somewhat towards rationalism, he yet firmly opposed the inroads which Kant's and Fichte's speculations made upon evangelical doctrine. He was one of the chief movers towards the union of the Lutheran and Reformed churches of Prussia, which was effected after his death. For some years he stood in the closest relations to the young Schleiermacher, and rejoiced in the promise of good which the latter would bring to the Church. When this young divine first issued his celebrated *Reden* (1799), Sack openly expressed his paternal grief at what seemed to him a leaning towards pantheism in this work. In later editions many of the criticised passages were modified. Sack was not productive; he was chiefly a practical worker. His published works consist of translations from English (Blair's *Sermons*) and Latin (Cicero's *De Amicitia* and *De Senectute*), two collections of *Sermons*, an *Autobiography*, and some minor *Essays*. See Herzog, *Real-Encykl.* xx, 662–667. (J. P. L.)

Sackbut is the rendering in the A. V. of the Chaldee *sabbekâ* (written סַבְבָּקָא in Dan. iii, 5, but סַבְבָּקָא in Dan. iii, 7, 10, 15; thought by Gesenius, *Thesaur.* a.v., to be from סַבְבָּקָא, *to weave*, from the entwined strings), which the Sept. and Vulg. render by the corresponding *σαμβύκη*, *sambuca*, which, in fact, are mere transcriptions of the Chaldee word. The English version has evidently imitated the word. The *sackbut*, however, is an old English name for a wind instrument (see the *Bible Educator*, iv, 150), but the Greek and Roman *sambuca* had strings (see Smith, *Dict. of Class. Antig.* s.v.). "Mr. Chappell says (*Pop. Mus.* i, 35), 'The sackbut was a bass trumpet with a slide, like the modern trombone.' It had a deep note, according to Drayton (*Polyolbion*, iv, 365):

'The hoboy, *sagbut* deep, recorder, and the flite.'

The *sambuca* was a triangular instrument with four or more strings played with the fingers. According to Athenæus (xiv, 633), Masurius described it as having a shrill tone; and Euphorion, in his book on the Isthmian games, said that it was used by the Parthians and Troglodytes, and had four strings. Its invention is attributed to one Sambyx, and to Sibylla its first use (Athen. xiv, 637). Juba, in the 4th book of his *Theatrical History*, says it was discovered in Syria, but Neanthes of Cyzicum, in the first book of the *Hours*, assigns it to the poet Ibycus of Rhegium (*ibid.* iv, 77). This last tradition is followed by Suidas, who describes the *sambuca* as a kind of triangular harp. That it was a foreign instrument is clear from the statement of Strabo (x, 471), who says its name is barbarous. Isidore of Seville (*Origin.* iii, 20) appears to regard it as a wind instrument, for he connects it with the *sambucus*, or elder, a kind of light wood of which pipes were made. The *sambuca* was

early known at Rome, for Plautus (*Stich.* ii, 2, 57) mentions the women who played it (*sambuca*, or *sambucistria*, as they are called in Livy, xxxix, 6). It was a favorite among the Greeks (Polybius, v, 37), and the Rhodian women appear to have been celebrated for their skill on this instrument (Athen. iv, 129). There was an engine called *sambuca* used in siege operations, which derived its name from the musical instrument, because, according to Athenæus (xiv, 634), when raised it had the form of a ship and a ladder combined in one." Rawlinson (*Ancient Monarchies*, iii, 20) thinks that the Chaldee *sabbekâ* was a large harp resting on the ground like that of the Egyptians. See MUSICAL INSTRUMENTS.

Sackcloth (פֶּשֶׁת, *sak*, from its *net-like* or *sieve-like* structure; a word which has descended pure in the Greek *σάκκος* and modern languages) is the name of a coarse material, apparently made of goat's or camel's hair (Rev. vi, 12), and resembling the *cilicium* of the Romans (Gen. xxxvii, 34; 1 Kings xx, 31; 2 Kings xix, 1 sq.; Matt. xi, 21; Luke x, 13; comp. Josephus, *Ant.* vii, 1, 6; Porphyry, *Abstin.* iv, 15; Plutarch, *Superst.* c. 7). It was probably dark brown or black in color (Isa. i, 3; Rev. vi, 12; comp. the *black dresses* of the Greeks: Eurip. *Alc.* 440; *Orest.* 458; *Helen*, 1088; and Romans, Ovid, *Metam.* vi, 568; Tacit. *Annal.* iii, 2; Becker, *Gallus*, ii, 289; see Josephus, *Life*, 28). It was used for the following purposes: (1.) For making sacks for grain, the same word describing both the material and the article (Gen. xlii, 25; Lev. xi, 32; Josh. ix, 4). Sacks are usually made of hair in the East; whence we may understand that where sackcloth is mentioned haircloth is intended. (2.) This material was certainly employed for making the rough garments used by mourners (Esth. iv, 21), which were in extreme cases worn next the skin (1 Kings xxi, 27; 2 Kings vi, 30; Job xvi, 15; Isa. xxxiii, 11), and this even by females (Joel i, 8; 2 Macc. iii, 19), but at other times were worn over the coat or *kethoneth* (Jon. iii, 6) in lieu of the outer garment. The robe probably resembled a sack in shape, thus fitting closer to the person than the usual flowing garments of the Orientals (Niebuhr, *Beschreib.* p. 340), as we may infer from the application of the term פֶּשֶׁת, *to bind*, to the process of putting it on (2 Sam. iii, 31; Ezra vii, 18, etc.). It was confined by a girdle of similar material (Isa. iii, 24). Sometimes it was not laid aside even at night (1 Kings xxi, 27). Prophets and ascetics wore it over the underclothing, to signify the sincerity of their calling (Isa. xx, 2; Matt. iii, 4; see Wetstein, *N. T.* i, 384 sq.). The Apocrypha intimates that this habit of sackcloth was that in which good people clothed themselves when they went to prayers (Baruch iv, 20). The use of haircloth as a penitential dress was retained by the early Oriental monks, hermits, and pilgrims, and was adopted by the Roman Church, which still retains it for the same purposes. Haircloth was, indeed, called "sackcloth" by the early Greek and Latin fathers. It does not appear that sackcloth is now much used in token of grief in the East; but ornaments are relinquished, the usual dress is neglected, or it is laid aside, and one coarse or old assumed in its place (comp. Liske, *De Sacco et Cinere* [Vitimb. 1693]). See MOURNING.

Saconay, GABRIEL DE, a French theologian, was born near Lyons. While quite young, he was made canon of Lyons, and afterwards became dean of the chapter. He was one of the most zealous opponents of the Reformation, and was for some time censor of the city of Lyons. He died Aug. 3, 1580. His writings are principally controversial, and bitter in the extreme. They are, *De la Providence de Dieu sur les Rois de France*, with *L'Histoire des Albigeois* (1568); — *Traité de la Vraie Idolatrie de notre Temps* (1568); — *Discours des Premiers Troubles advenus à Lyons*, written in answer to a Huguenot writing (*La Généalogie et la Fin des Huguenaux*); — and *Découverte du Calvi-*

Ancient Egyptian Triangular and Grand Harp.

nisme. Saconay also published an edition of the treatise of Henry VIII against Luther, to which he wrote a preface full of the most violent expressions. Calvin answered it by a satirical work called *Gratulatio* (1560).

Sacra (*sacred rites*), a general term used by the ancient Romans to denote all that belonged to the worship of the gods. The *sacra* were either public or private, the former applying to the worship conducted at the expense of the State, and the latter at the expense of families or single individuals. In both cases the whole services were performed by the pontiffs, who, in the case of the *sacra publica*, had also the charge of the funds set apart for these services. The *sacra privata* were generally nothing more than sacrifices to the *Penates*, or household gods.

Sacra, Circa, or In sacris. The power of the magistrate is scarcely allowed by any party *in sacris* (in sacred things), but many allow his power *circa sacra* (about sacred things). The 23d chapter of the *Westminster Confession* says, however: "The civil magistrate may not assume to himself the administration of the word and sacraments for the power of the keys of the kingdom of heaven; yet he hath authority, and it is his duty, to take order that unity and peace be preserved in the Church, that the truth of God be kept pure and entire, that all blasphemies and heresies be suppressed, all corruptions and abuses in worship and discipline prevented or reformed, and all the ordinances of God duly settled, administered, and observed. For the better effecting whereof, he hath power to call synods, to be present at them, and to provide that whatsoever is transacted in them be according to the mind of God." It is noteworthy that one of the proof-texts in the *Westminster Confession*, under this head, is Matthew ii, 4, 5, Herod's calling together the sanhedrim when startled by the news of the birth of Christ—a rival prince, as he thought, and whom he proposed to destroy. A large party object to this doctrine of the magistrate's power as Erastian and unsacred, and maintain that the Church should be free of all control on the part of the State, and alike independent of its pay and its patronage. See ERASTIANISM. How the compromise is effected between the two powers in the Church of Scotland may be seen in the way in which the General Assembly is annually dismissed at the end of the statutory period beyond which it cannot prolong its sittings. Thus, in the year 1861, the moderator concluded his address by saying, "As this General Assembly was convened in the name and by authority of the Lord Jesus Christ, so in the same name and by the same authority I now dissolve it, and appoint the next meeting of the General Assembly of the Church of Scotland to be held in this place on Thursday, the 22d day of May, 1862." The lord high commissioner then said: "Right reverend and right honorable, it is now my duty, in my sovereign's name, to dissolve this assembly; and, accordingly, I hereby declare this assembly dissolved in her name, and by the same authority I appoint the next General Assembly to meet on Thursday, the 22d day of May, 1862." See SECULAR POWER.

Sacrament (from the Lat. *sacramentum*, a military oath of enlistment), a word adopted by the writers of the Latin Church to denote those ordinances of religion by which Christians come under an obligation of obedience to God, and which obligation, they supposed, was equally sacred with that of an oath. Considering the simplicity of the manner and the brevity of the terms in which the Lord Jesus Christ instituted certain general and perpetual observances for the Church which he founded, it is difficult to repress amazement at the extent of the discussions and the voluminousness of the controversies that have sprung up in reference to them. Many of those controversies are now obsolete, and all of them shrink to comparative unimpor-

tance when the Word of God is taken as the one only source of authoritative instruction on the subject. In order to make proper distinctions between the divine teachings and human theories, and also to see how doctrines have been promulgated in successive periods without the shadow of scriptural authority, it is well first to note both the letter and the spirit of the New Testament teaching in reference to what we now call sacraments. We may then the more intelligently follow the line of historical development and practice, however that may have been corrupted from the simplicity of the Gospel. A negative lesson of no little significance is taught in the fact that the term *sacrament* is not found in the N. T.; neither is the Greek word *μυστήριον* in any instance applied to either baptism or the Lord's supper, or any other outward observance. That word, however, came subsequently into ecclesiastical usage as the equivalent of the Latin *sacramentum*. The Greek Church still uses it in that sense, designating as the seven *mysteries* what the Roman Church calls the seven *sacraments*.

I. Scriptural Statement of the Subject.—The instructions given by the N. T. in reference to baptism and the Lord's supper are of two kinds: 1. Those found in the example and precepts of Christ himself; 2. Those found in the subsequent practice and teaching of the apostles. Introductory to both is the great fact with which the Gospel history opens, viz. John's baptism: that was distinctly declared to be a baptism of repentance, introductory to the kingdom of God about to be established by the promised Messiah. John's baptism, therefore, is to be regarded as a connecting link between the old and the new dispensation; and as it was prophetic of Christ's immediate advent, so it was sanctioned by the fact of Christ's accepting, indeed demanding, baptism at the hands of John, in order to "fulfil all righteousness." By this expression we may understand that Christ not only fulfilled, in his own person, the law of the Abrahamic covenant in circumcision, but also the spiritual law of Christianity which he was about to establish, and of which baptism was to be the appointed emblem. This view is corroborated in the fact that, in connection with this baptism, not only was the Messiahship of Christ attested by an approving voice from heaven, but by the descent upon him of the Holy Ghost (Matt. iii, 13-17; Mark i, 8-11; Luke iii, 21, 22). This great event occurred at the beginning of Christ's public ministry: and although, in the record of his ministrations, little is said of baptism, yet sufficient is recorded to indicate that the rite was practiced from the first as initiatory to Christian discipleship. It is summarily mentioned in John iv, 1, 2, "that Jesus made and baptized more disciples than John, though Jesus himself baptized not, but his disciples." In the preceding chapter (ver. 22) it had been stated that "Jesus and his disciples came into the land of Judæa; and there he tarried with them, and baptized." Hence we may infer that baptism was fully established as a custom of the initial Church prior to the formal command by which, in the great Commission, its perpetual observance was enjoined (Matt. xxviii, 19). From the first exercise of their appointed office, the apostles preached baptism as a duty (Acts ii, 38), and administered it to those professing Christianity (see Acts ii, 41; viii, 12, 13, 16, 38; ix, 18; xvi, 15, 33; xviii, 8, etc.). See BAPTISM.

The institution of the Lord's supper was, in some respects, similar. In his custom of fulfilling all righteousness, our Lord, on the night before his betrayal, assembled his disciples to eat the Passover (q. v.), in accordance with Jewish law and custom. In that connection he not only identified himself as the true Paschal Lamb, slain from the foundation of the world, but appointed bread and wine to be emblems of his body and blood, to be used by all his followers in perpetual commemoration of his impending sacrificial death (see Matt. xxvi, 26; Mark xiv, 22; Luke xxii, 19; 1 Cor. xi, 23-27). That this institution was observed by the apostles and the

churches founded by them in the simplicity and sacredness of its original appointment is obvious from various statements and allusions in the Acts and Epistles; but we may search the whole New-Testament record in vain for an account of any other appointments of a corresponding character. If, by analysis, we seek to determine what is peculiar and essential to baptism and the Lord's supper, when considered as ordinances of the Christian Church, the following characteristics will be found to inhere in both: 1. They were illustrated by our Lord's own example, and enjoined by his specific command; 2. They were enjoined upon the whole Church, and as of perpetual obligation; 3. They were recognised by the apostles and the New-Testament churches in the character stated, and by them observed in the form and spirit of their appointment; 4. Each of the institutions named had an important significance with reference to the whole scheme of salvation, and was adapted to serve as a means of grace to all Christians. See LORD'S SUPPER. If, now, the ordinances named are to be considered as sacraments of the Christian Church (which has never been questioned or denied), it is evident that nothing else should be considered a sacrament in which the same characteristics do not in like manner inhere. Let the several points named be applied as tests to the five additional observances of the Greek and Roman churches, called by them sacraments—viz. confirmation, matrimony, penance, orders, and extreme unction—and it will be seen how radically defective they all are.

Keeping in view the fact that the term *sacrament* has no sanction from scriptural usage, a question of some importance arises as to how it came to its present significance and general adoption, also whether and to what extent the term itself has become an agency of error. In considering this question, it is well to go back in thought to the post-apostolic age, and trace downward, by successive steps, the development of ideas and customs in the Christian Church. 1. Ideas of peculiar sacredness could not fail to be associated with duties enjoined in the last commands of the Lord Jesus—the recently crucified but now ascended Saviour. 2. These ideas would be intensified in the participation of the Lord's supper, which, by its very design, addressed itself to the tenderest sympathies and highest moral purposes of the human soul. 3. As the act of communion demanded of each believer, not only self-examination as to his faith and spiritual life, but also an actual or implied pledge of future obedience and devotion to Christ, the Captain of our salvation, so that pledge might easily come to be regarded somewhat in the light of an oath. 4. More especially as Christians were taught to regard themselves as soldiers, called to fight the fight of faith and to war a good warfare, it would be natural to regard the act of devotion by which they pledged allegiance to Christ as very analogous to the *sacramentum*, or oath, by which Roman soldiers swore allegiance to their emperor. Hence the Lord's supper came to be called *sacramentum eucharistæ*. 5. In like manner, as baptism was regarded in the light of an enrolment to be a soldier of Jesus Christ, so it came to be called *sacramentum aque*. Thus, or similarly, in point of historic fact, the term *sacrament* became generic and inclusive of the two and only observances enjoined by Christ as of universal and perpetual obligation upon the Church. Moreover, as both sacraments were designed to serve as outward signs of a promised invisible grace, they would naturally be revered as involving much that was incomprehensible to the natural mind, in fact, mysterious. Hence, in the Greek language, the term *μυστήριον* (*mystery*) came to be used as the equivalent of *sacramentum* in the Latin. This term "mystery," however, became misleading by very natural processes. It had for a long time been applied to certain secret ceremonies, practiced specially among the Greeks [see ELEUSINIAN MYSTERIES], and could hardly fail to suggest analogous and corrupting

ideas to Christians at all inclined to a worldly policy. The writers of the New Testament had, in fact, repeatedly used the words *mystery* and *mysteries*, but never in connection with either baptism, the Lord's supper, or any Christian ceremony. They had spoken of the mysteries of the kingdom of God, the mystery of faith, the mystery of godliness, and also of the Gospel as "the revelation of the mystery which was kept secret since the world began, but now is made manifest."

II. *Multiplication of the Sacraments.*—When from such obviously appropriate uses the term *mystery* was, in ecclesiastical language, so far perverted as to be made almost exclusively to represent Christian ceremonies, a wide door was opened for the ingress of erroneous opinions and practice. The very term suggested secrecy where publicity was designed. It obviously prompted the artificial rules of the *disciplina arcanæ* (q. v.), and thus strongly encouraged ceremonial instead of spiritual conversion. It also stimulated the inventiveness of ecclesiastics in the multiplication of so-called sacraments. It gave countenance to priestly pretensions on the part of Christian ministers, and encouraged the imitation of Jewish and pagan rites. Combined with other influences of like nature, it contributed to that great perversion of the sacrament of the Lord's supper by which it came to be regarded as a propitiatory sacrifice—a parent error, from which the mystical ceremonies and the doctrine of transubstantiation were logical outgrowths. Errors also arose from a loose application of the word *sacramentum*. As that term involved the generic idea of sacredness, so it came to be applied to various other usages that sprang up in the Church, with the tendency to attribute to them an importance and sanctity corresponding to those of the sacraments proper. For successive centuries the number of observances called, in this loose sense, sacraments was more or less varied and indefinite; one writer (Damian) enumerated twelve. But by degrees, the sacred number *seven* came to be adopted as the limit, yet not always in application to the same ceremonies or in the same order. The present enumeration of the Roman Church is credited to the schoolman Peter Lombard (d. 1164), although for at least three centuries later more or less controversy was maintained among the schoolmen as to the number and order of the sacraments. It was the General Council of Florence in 1439 that, following Peter Lombard and Thomas Aquinas, first assumed to define authoritatively the number as subsequently maintained by the Church of Rome. The definition or limitation then decreed was promulgated in a synodal epistle from pope Eugenius to the Armenians in 1442. The language of the decree is full and explicit, not only as to the number, but also as to the doctrine of the sacraments. It says:

"The sacraments of the new law are seven—namely, baptism, confirmation, the eucharist, penance, extreme unction, orders, and matrimony—which differ much from the sacraments of the old law: for those do not cause grace, but represent it as only to be given through the passion of Christ; but the sacraments of the new law contain grace, and confer it on those who worthily receive them. The first five are ordained for the spiritual perfection of each man in himself; the last two, for the government and multiplication of the whole Church. . . . All these sacraments are perfected in three ways—namely, by things as to the material, by words as to the form, and by the person of the administrator who confers the sacrament with the intention of doing what the Church does—of which, if any be wanting, the sacrament is not perfected. Among these sacraments there are three—baptism, confirmation, and orders—which impress indelibly on the soul a character: that is, a certain spiritual sign, distinguishing him from others. Hence they are not repeated on the same person. But the other four do not impress a character, and admit of reiteration."

The sacramental theory of the Roman Catholic Church has rarely, if ever, been better stated. As thus formulated, it was an ingenious and authoritative digest of views that had been developed during long centuries in which tradition and superstitious inventiveness had usurped the supreme control in matters of religion.

During that period the living oracles were silent, and nearly all the prevailing influences united to enhance the prerogatives of the clergy by attaching magical or supernatural influence to their supposed priestly functions. Baptism, loaded down with accumulated ceremonies, became the essential agency of regeneration; absolution from sin was given or withheld at the option of a priest; while extreme unction was regarded as an important, if not an essential passport to usher a dying person into the presence of God. But it was the Lord's supper in which all that was most solemn and mysterious was concentrated. That rite had become the holy of holies in the Christianity then prevalent. In it the presence of the Lord Jesus Christ was believed to be secured as often as the priest performed the act of consecration; but the manner of that presence was for a long time undiscussed, being neither defined by canon, agitated before council, nor determined by pope. "During all those centuries no language was thought too strong to express the overpowering awe and reverence of the worshippers. The oratory of the pulpit and the hortatory treatise had indulged freely in the boldest images; the innate poetry of the faith had worked those images into realities." A specimen of the oratorical hyperbole employed in reference to this subject may be taken from Chrysostom, written in his treatise on the priesthood, about A.D. 380: "The priestly office is discharged upon earth, but holds the rank of heavenly things, and very rightly so. . . . For when you behold the Lord sacrificed and prostrate, and the priest standing over the sacrifice, and praying, and all stained with that precious blood, do you then suppose you are among men and standing upon earth? Are you not immediately transported to heaven? . . . Oh, the marvel! Oh, the love of God to man! He who sits with the Father on high is at that moment held in the hands of all, and gives himself to those who are willing to embrace and to receive him!"

For centuries following Chrysostom, the prevalent ideas of the real presence in the eucharist were not only vague, but widely dissimilar, ranging from the border of a just spiritualism to a gross materialism, but with growing tendencies to the latter, until, at length, the more material the conception came to be of an actual and repeated sacrifice, the more it seemed to impress minds wholly uninstructed in Scripture truth. For a long period inquiries into the nature of the sacred mysteries were regarded as presumptuous; but when, at length, speculation arose, the most startling theorists excited the most attention. It was to Paschasius Radbert, a monk of Corvey (A.D. 831), that the Roman Church was indebted for the first clear statement of what came afterwards to be known as the doctrine of transubstantiation. Although Paschasius did not employ that term, he fully set forth the idea which the term was afterwards invented to express. He taught that the substance of the bread and wine was actually annihilated, notwithstanding the corporeal form remained, in passing into and becoming the body and blood of the Redeemer—the actual body and blood of Jesus Christ, which had been resuscitated in the resurrection, and which was now multiplied in countless numbers of times and places. He did not shrink from following out this theory to its grossest consequences, sustaining it by the narration of various miracles, such as the host bleeding and assuming the human form. It is not to be supposed that Paschasius originated this theory; his task was that of formulating it from the still cruder notions of the average popular and priestly mind of his day. But, dark as were the times in which he lived, his theory, when reduced to a connected statement, was too gross to pass unchallenged. A protracted discussion arose, known in ecclesiastical history as the First Eucharistic Controversy.

Against the theory of Paschasius, Frudegard, a monk of another order, and Ratramnus, another monk of Corvey, urged sundry arguments, and quoted many passages

from the fathers, especially from Augustine, showing that the body of Christ in the eucharist could not be the same body as that in which he was born, suffered, and rose again. Ratramnus, in fact, wrote a learned work entitled *De Corpore et Sanguine Domini*, in which he modestly but ably controverted the positions of his abbot, Paschasius. The latter had strongly urged those views of the sacrifice of the mass that had prevailed from the time of Gregory the Great. On the other hand, Ratramnus designated the eucharist as being only a commemorative celebration of Christ's sacrifice, by remembrance of which Christians should make themselves capable of partaking of the divine grace of redemption. Rabanus Maurus, John Scotus Erigena, and others also wrote in opposition to the theory of Radbert. Thus the controversy was protracted into the 10th century, but with a constantly increasing tendency to reject and silence all opposition to the extreme views as heretical. See TRANSUBSTANTIATION.

Notwithstanding the popular drift in the line of transubstantiation, Berengar of Tours (q. v.), about the middle of the 11th century, opened, by his acute and able opposition to the theory of Paschasius Radbert, what has been denominated the Second Eucharistic Controversy. His position was that the substance of the bread and wine was not changed by the consecration, but only their efficacy, thus maintaining a dynamic, as against an actual change. His chief literary opponent was Lanfranc (q. v.), but his ecclesiastical opponents were legion. In the apparent consciousness that he could not be answered, he was summarily arraigned by popes and prelates, before councils and synods, and forced repeatedly to renounce his doctrines on pain of death. As often as he was able to escape from the power of his persecutors, he recanted his successive renunciations of his doctrines respecting the sacraments, until he at length found a refuge in France, where he was permitted, at the age of ninety, to die in peace. His views found many adherents, both in France and Germany, who came to be known and proscribed as Berengarians.

A synod of Rome in 1079 confirmed the doctrine of Paschasius Radbert; and, although for some years afterwards that doctrine was maintained by the use of other terms, it at length found definite expression in the term *transubstantiation*, which is said to have been first used by Hildebert of Tours (about 1134). Steps were now successively taken by which discussion was checked and opposition in the Church practically silenced. Pope Innocent III, at the Lateran Council of 1215, made *transubstantiation* (q. v.) an unchangeable article of the Roman Catholic faith; pope Urban IV, in 1264, instituted the annual festival of Corpus Christi; and pope Clement V, in 1311, reduced the doctrine in question to a liturgical form. By these means, not only the theologians and the clergy of the Church, but also the masses of the people, were committed to the actual deification of the host, or consecrated wafer. The withholding of the cup from the laity was deemed a logical sequence of the doctrine of transubstantiation of more controlling influence than the express command of Christ with reference to the cup—"Drink ye all of it." The precept quoted was thenceforward conveniently limited to the clergy.

From the periods named above, scholasticism was busy in the vindication and explanation, by various ingenious methods, of the new dogma; while in practice, the sacrifice of the mass became more than ever the centre of the Roman ritual. Nor is it easy for Protestants in the 19th century to understand how completely the combined influence of the decrees of the Church, the writings of the schoolmen, the ceremonies of the ritual, and the parade of festivals had blotted out of the public mind the simple scriptural idea of the eucharist, and substituted in its place a vague but blind superstition in reference to this now mutilated sacrament. The efforts made during successive centu-

ries to give reality and impressiveness to the Roman doctrine of the sacraments, and especially that of the eucharist, had not been limited to traditional and preceptive influences; stupendous miracles in demonstration of it had been often and widely proclaimed. "Besides, the very nature of the doctrine itself adapted it singularly to retain its hold on an ignorant and superstitious generation. The notion once impressed upon the multitude that, when they celebrated one of the sacraments of their Church, they actually swallowed the real body and blood—the very person of their God—was too intensely exciting, too attractive to their imagination, too closely connected with their senses, to be abandoned without great reluctance. We might, indeed, wonder how it was found possible to obtain so general a credence for a dogma than which, in its popular sense, no more audacious paradox was ever obtruded on the credulity of man; but, once received, once impressed on the belief, once embraced as an essential truth, it became so entirely essential, so predominant, so engrossing, as to take almost exclusive possession of the soul, and to throw a shade of comparative insignificance over every other tenet. To be deprived of this conviction; to be assured that the consecrated elements hitherto revered and adored as the very body of the Divinity were no more than bread and wine, unchanged by the sacerdotal consecration, either in substance or in accident, was, in the vulgar mind, to part with the portion of religion most nearly touching both feelings and practice. 'That they were robbed of their God' was the first impression produced upon ignorant devotees; and those who had nourished that ignorance, and found their profit in it—the chiefs and champions of the system to which that dogma was so essential—united in one great confederacy to propagate the cry" (Waddington, *History of the Reformation*, ch. xxxi).

III. *Roman Catholic View.*—The full and authoritative statement of the Roman Catholic doctrine concerning the sacraments is given in the Decree of the Council of Trent, as embraced in the following extract of the preface and in thirteen consecutive canons:

"In order to complete the exposition of the wholesome doctrine of justification, published in the last session by the unanimous consent of the fathers, it hath been deemed proper to treat of the holy sacraments of the Church, by which all true righteousness is at first imparted, then increased, and afterwards restored, if lost. For which cause the sacred, holy, oecumenical, and general Council of Trent, lawfully assembled, etc., abiding by the doctrine of the Sacred Scriptures, the tradition of the apostles, and the uniform consent of other councils and of the fathers, hath resolved to frame and decree these following canons, in order to expel and extirpate the errors and heresies respecting the most holy sacraments which have appeared in these times—partly the revival of heresies long ago condemned by our ancestors, partly new inventions—and have proved highly detrimental to the purity of the Catholic Church and the salvation of souls. The remaining canons, necessary to the completion of the work, will be published hereafter, by the help of God.

"Canon 1. Whoever shall affirm that the sacraments of the new law were not all instituted by Jesus Christ our Lord, or that they are more or fewer than seven—namely, baptism, confirmation, eucharist, penance, extreme unction, orders, and matrimony—or that any of these is not truly and properly a sacrament, let him be accursed.

"2. Whoever shall affirm that the sacraments of the new law only differ from those of the old law in that their ceremonies and external rites are different, let him be accursed.

"3. Whoever shall affirm that these seven sacraments are in such sense equal that no one of them is in any respect more honorable than another, let him be accursed.

"4. Whoever shall affirm that the sacraments of the new law are not necessary to salvation, but superfluous, or that men may obtain the grace of justification by faith only, without these sacraments (although it is granted that they are all not necessary to every individual), let him be accursed.

"5. Whoever shall affirm that the sacraments were instituted solely for the purpose of strengthening our faith, let him be accursed.

"6. Whoever shall affirm that the sacraments of the new law do not contain the grace which they signify, or that they do not confer that grace on those who place no obstacle in its way, as if they were only the external signs

of grace or righteousness received by faith, and marks of Christian profession whereby the faithful are distinguished from unbelievers, let him be accursed.

"7. Whoever shall affirm that grace is not always given by these sacraments, and upon all persons, as far as God is concerned, if they be rightly received, but that it is only bestowed sometimes and on some persons, let him be accursed.

"8. Whoever shall affirm that grace is not conferred by the sacraments of the new law, by their own power (*ex opere operato*), but that faith in the divine promise is all that is necessary to obtain grace, let him be accursed.

"9. Whoever shall affirm that a character (that is, a certain spiritual and indelible mark) is not impressed upon the soul by the three sacraments of baptism, confirmation, and orders (for which reason they cannot be repeated), let him be accursed.

"10. Whoever shall affirm that all Christians have power to preach the word and administer all the sacraments, let him be accursed.

"11. Whoever shall affirm that, when ministers perform and confer a sacrament, it is not necessary that they should, at least, have the intention to do what the Church does, let him be accursed.

"12. Whoever shall affirm that a minister who is in a state of mortal sin does not perform or confer a sacrament, although he observes everything that is essential to the performance and bestowment thereof, let him be accursed.

"13. Whoever shall affirm that the received and approved rites of the Catholic Church, commonly used in the solemn administration of the sacraments, may be despised or omitted without sin by the minister, at his pleasure, or that any pastor of a church may change them for others, let him be accursed."

Refutations of the Romanistic theory of the sacraments have been so numerous and detailed in the writings of the Reformers, from the days of Wycliffe down to the present time, that it seems only necessary to present here a brief *résumé* of the standard objections to it: 1. The sacramental theory of the Church of Rome wholly ignores the great scriptural doctrine of salvation by faith. 2. It elevates ceremonies above Christian obedience and duty. 3. It is artificial in naming as sacraments several things which Christ did not appoint as such—e. g. confirmation, penance, orders, extreme unction, and matrimony; which last, instead of being instituted by Jesus Christ, was, in fact, appointed by God from the creation of man. 4. It is arbitrary in dividing the eucharist and denying the cup to the laity. 5. It unduly exalts the functions of the priesthood, making the gift of divine grace dependent on the intention of the administrator of a real or supposed sacrament. 6. It sanctions immorality in the highest offices and most sacred ceremonies of religion by maintaining that wickedness, even to the extent of mortal sin, does not disqualify the celebrant from truly administering the holy sacraments. 7. It gives incentives to bad living, and even to crime, by teaching men that the sacraments impress upon the soul an indelible character of grace and spirituality, irrespective of their personal faith or practice.

The doctrine of the *Old Catholics* (q. v.), as stated in Art. VIII of the *Theses* agreed upon in the Conference at Bonn in 1874, is thus expressed:

"1. We acknowledge that the number of the sacraments was fixed at seven first in the 12th century, and then was received into the general teaching of the Church, not as a tradition coming down from the apostles or from the earliest times, but as the result of theological speculation.

"2. Catholic theologians (i. e. Bellarmine) acknowledge, and we acknowledge with them, that baptism and the eucharist are '*principalia, præcipua, eximia salutis nostræ sacramenta*.'"

IV. *Tenets of the Oriental Churches.*—The Greek Church, including the Russian, teaches that there are seven sacraments (*μυστήρια*), the same as the Roman Catholic—namely, baptism, unction with chrism, the eucharist, penitence, the priesthood, lawful marriage, and extreme unction (*Orthodoxa Confessio* [A. D. 1643], qu. 98; *Dositheï Confessio* [A. D. 1672], decr. 15; *Longer Catechism* [prepared by Philaret, and approved by the Synod of A. D. 1839], qu. 285). That Church holds, indeed, some peculiarities as to the mode of administering certain of these sacraments; but they nevertheless

strenuously maintain the divine character and essential importance of them all. See GREEK CHURCH.

The Armenian and Coptic churches [see each] have substantially the same views upon the subject as the Greek Church. The orthodox Nestorians (q. v.), however, including the Christians of St. Thomas, believe, with Protestants, in two sacraments only, namely, baptism and the Lord's supper; but the "Chaldaean" branch, of course, coincides with the Roman view.

V. *Views of the Lutheran Reformers and of later Protestants.*—Notwithstanding the formidable combination of influences to popularize and maintain the doctrine of transubstantiation, many minds revolted against the absurdities it involved. Some individuals and sects went to the extreme of rejecting the sacraments altogether; others, including most of those known as Reformers before the Reformation, alike objected to the invented and redundant sacraments, and pointed out many errors and abuses connected with the administration of baptism and the eucharist. This opposition, however, was manifested under many restraints and embarrassments, not merely caused by the spirit of persecution that was everywhere so rife, but by those prejudices and habits of mind to which the reformers themselves were subject. Bold and uncompromising as was Luther on most subjects in which Roman errors were involved, he nevertheless on the one topic now in question exhibited weaknesses of character and an infirmity of judgment that can only be accounted for by the influence of his education and early habits of thought. Even after that great man had fully accepted the doctrine of salvation by faith, and rejected the greater number of those errors and inventions by which the Roman system had made void the word and truth of God, he remained so tenacious of the doctrine of Christ's real and corporeal presence in the bread and wine of the eucharist as to make a violent and almost fatal issue with his fellow-Reformers on that point. No argument was sufficient to move him from his fixed adherence to the literal interpretation of the phrase, "This is my body." Hence, not only he, but Melancthon and all those German Reformers who acted with them, while rejecting transubstantiation, rigidly adhered to that slight variation from it known as *consubstantiation* (q. v.). The controversies between Luther and Zwingli and their several adherents unhappily put in jeopardy some of the most important interests of the Reformation, and gave great cause of rejoicing to the partisans of the papacy. But for that unfortunate issue, which, at a very critical period, divided the Reformers and weakened their strength, it cannot be doubted that much more rapid progress would have been made in restoring to the Church the true but long-lost idea of the supper of the Lord as instituted by him and appointed for the confirmation of faith in his atoning sacrifice. But, notwithstanding all hindrances, it is from the period of the Reformation that improvements may be noted in those doctrinal views of the sacraments which found expression in the creeds of representative churches. To show the successive steps of progress made as the result of controversy on the subject, quotations will now be given from several of the more celebrated creeds put forth during the 16th century.

The oldest of all the Protestant confessions of faith is that of Augsburg, of which several articles related to the sacraments. That celebrated document was prepared by Melancthon, and read, June 27, 1530, in the presence of the emperor Charles V and his court, including many prominent Roman Catholic theologians. Although its tone was apologetic, nevertheless its utterances were distinctly Protestant, except in some of the articles relating to the sacraments.

Part I, Art. VIII, allows the validity of the sacraments, although administered by evil men.

Art. IX declares that baptism is necessary to salvation.

Art. X is in these words: "Of the Lord's supper, they (the Lutherans) teach that the [true] body and blood of

Christ are truly present [under the form of bread and wine], and are [there] communicated to those that eat in the Lord's supper."

Art. XIII, *On the Use of the Sacraments*, contains the following language: "They were ordained, not only to be marks of profession among men, but rather that they should be signs and testimonies of the will of God towards us, set forth unto us to stir up and confirm faith in such as use them. Therefore men must use sacraments so as to join faith with them which believes the promises that are offered and declared unto us by the sacraments. Wherefore they (the Lutherans) condemn those that teach that the sacraments do justify by the work done (*ex opere operato*), and do not teach that faith which believes the remission of sins is requisite in the sacraments."

Part II, Art. I, enjoins communion in both kinds, and disapproves the carrying about the elements in procession.

Art. III says: "Our churches are wrongfully accused of having abolished the mass; for the mass is still retained among us, and celebrated with great reverence." Nevertheless, the article proceeds to condemn private masses as being celebrated only for lucre's sake.

The Augsburg Confession does not definitely assert, but clearly implies, that the sacraments are only two in number. The Helvetic Confession of 1536 was explicit on that point, stating, also, that both baptism and the eucharist are only outward signs of the hidden things, or inward graces, spiritually imparted to faith in the promises of God. That confession also denies that the body and blood of Christ are naturally united, locally included, or actually present in the material bread and wine; but it affirms that the bread and wine, by the institution of God, are symbols through which, as from Christ himself, by the ministry of the Church, a true spiritual communication of his body and blood is made, not in perishable food, but for the sustenance of the soul's life.

In the further development of Protestantism, the most noted ecclesiastical statement of the doctrine of the sacraments is found in the Thirty-nine Articles of the Church of England, originally adopted in 1563. The following extracts embrace the more important points:

"Sacraments ordained of Christ be not only badges or tokens of Christian men's profession, but rather they be certain sure witnesses and effectual signs of grace and God's good-will towards us, by the which he doth work invisibly in us, and doth not only quicken, but also strengthen and confirm, our faith in him." "There are two sacraments ordained of Christ our Lord in the Gospel; that is to say, baptism and the supper of the Lord." "Those five commonly called sacraments—that is to say, confirmation, penance, orders, matrimony, and extreme unction—are not to be counted for sacraments of the Gospel, being such as have grown partly of the corrupt following of the apostles, partly are states of life allowed in the Scriptures, but yet have not like nature of sacraments with baptism and the Lord's supper, for that they have not any visible sign or ceremony ordained of God." "The sacraments were not ordained of Christ to be gazed upon, or to be carried about, but that we should duly use them; and in such only as worthily receive the same they have a wholesome effect or operation. . . . Transubstantiation (or the change of the substance of bread and wine) in the supper of the Lord cannot be proved by Holy Writ, but is repugnant to the plain words of Scripture, overthroweth the nature of a sacrament, and hath given occasion to many superstitions. The body of Christ is given, taken, and eaten in the supper only after a heavenly and spiritual manner; and the mean whereby the body of Christ is received and eaten in the supper is faith."

In the three symbols above quoted may be seen the types of doctrine which have prevailed, with slight variations of expression, in all Protestant evangelical churches. The Lutheran churches of Europe and America have alone followed the doctrines of the Augsburg Confession. The Calvinistic churches of all countries have followed, in the main, the Zwinglian doctrine as set forth in the first Helvetic Confession; while the formula of the Church of England has been adopted by the Methodist churches of Great Britain and America and the Protestant Episcopal Church of the United States.

Notwithstanding the variations of views and statements that prevailed among the different branches of early Protestantism, yet so substantial was the unity among all classes of the reformers in rejecting the doc-

trine of the *opus operatum*, and also, as sacraments, all observances besides baptism and the Lord's supper, that the general drift of the Protestant doctrine became widely diffused and accepted during the first period of the Reformation. That the influence of counter-discussion had come to be greatly dreaded by the Roman theologians is obvious from several expressions made use of by the Council of Trent in 1547. Nevertheless, as we have seen, that council proceeded to reaffirm the mediæval theories of the sacraments in their most objectionable forms.

In many points of view, it may be regarded as extremely unfortunate that among the active agents of the Reformation there arose serious differences of views as to the sacraments, and more especially that those differences resulted in actual divisions and oppositions between brethren agreed in general principles and striving for common results. On the other hand, it is not difficult to infer that much discussion was necessary at that period as a means of clearing away the misconceptions of preceding ages, and of bringing out scriptural truth into a prominent light. It is impracticable and quite unnecessary here to outline the successive and protracted controversies with reference to the sacraments which took place between Luther and Zwingli and their successive followers for several generations, or, indeed, the somewhat different controversies that prevailed in Great Britain, bearing upon the same subject. It is, however, only just to remark that the influence of John Calvin in the Protestant sacramental controversy was very opportune and very powerful. As a contemporary and friend both of Luther and Zwingli, he sought to mediate between the extreme views of both. His theory was, in fact, an ingenious compromise between the realism of Luther and the idealism of Zwingli. He adopted the figurative interpretation of Christ's words, *τοῦτό ἐστι τὸ σῶμά μου*, and rejected all carnal and materialistic conceptions of the eucharistic mystery; but he at the same time strongly asserted a spiritual real presence and communion of Christ's body and blood for the nourishment of the soul. "He taught that believers, while they receive with their mouths the visible elements, receive also by faith the spiritual realities signified and sealed thereby—namely, the benefit of the atoning sacrifice on the cross and the life-giving virtue of Christ's glorified humanity in heaven, which the Holy Ghost conveys to the soul in a supernatural manner; while unbelieving or unworthy communicants, having no inward connection with Christ, receive only bread and wine to their own judgment." Luther had always insisted upon the corporeal presence and the oral manducation of the body and blood of Christ by communicants. Calvin substituted for that idea the virtual, or dynamic, presence of Christ's humanity, and a spiritual reception and assimilation of the same by the act of faith and through the mediation of the Holy Spirit. This view was substantially adopted by the writers and adherents of the Heidelberg Catechism, and, in fact, passed into all the leading Reformed confessions of faith. In fact, Melancthon, during the latter period of his life, substantially approved of Calvin's doctrine of the Lord's supper. That circumstance gave rise to a controversy in the bosom of the Lutheran Church, by which it was divided into Lutherans, or, more properly, ultra-Lutherans, and Melancthonians, or Philippists. Luther's doctrine, by a literal interpretation of the words of institution, not only involved the oral manducation, but the practical ubiquity, of the body of Christ. Under the influence of Bucer and Calvin, and a further study of Augustine and of the Holy Scriptures, Melancthon had rejected both these views; although, through modesty and strong personal attachment, he did not separate from Luther or define an opposite theory. Luther, though grieved at these changes of view, nevertheless did not withdraw his friendship from Melancthon; but when both were dead, direct issues were made between their respective followers. A

long and bitter controversy ensued, which extended to several other topics of theology, as well as that relating to the ubiquity, or multipresence, of Christ's body. The high Lutherans insisted upon ubiquity as a necessary result of the real communication of the two natures in Christ; while the Philippists and Calvinists rejected it as inconsistent with the nature of a body, with the reality of Christ's ascension, and with the general principle that the infinite cannot be comprehended or shut up in the finite. At the end of the controversy, the views of the extreme Lutherans became limited to only a portion of the Protestants of Germany; while those of Melancthon and Calvin were adopted by the Reformed churches of Germany, Switzerland, France, and the Netherlands. Practically, the same views were embodied in the later Helvetic confessions, in the creeds and catechisms of the Scotch Kirk, and in the Westminster Confession.

During the last three hundred years a great degree of practical unity has prevailed throughout Protestant Christendom in reference to the theory of the sacraments. This fact may be attributed to the general use and recognised authority of the Word of God. There have, indeed, been some small sects which, following the views of Socinus, have, by their theories, reduced the sacraments to mere commemorative observances, having a certain emblematic significance, but void of any spiritual influence. The Friends, or Quakers, have even rejected the sacraments as not designed for continued observance, at least in an outward form. They claim that the *one* baptism appointed for perpetuity among Christ's followers is the baptism of the Holy Ghost, and the true Lord's supper is that alluded to in Rev. iii, 20: "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me." Aside from such slight exceptions, the great body of Protestants, while rejecting the mass and all other superstitious ceremonies of the Roman Catholic Church, have sought to practice the ordinances of baptism and the Lord's supper both in the form and spirit of their original appointment. It is true that somewhat extended controversies have arisen as to the subjects and the mode of baptism, prompted chiefly by the exclusive claims of those who would reject from the Lord's supper all who have not been baptized by immersion (q. v.; also INFANT BAPTISM). Another form of exception to the general Protestant sentiment has been exhibited by that class of Anglicans and others who have distinguished themselves by those Romanizing tendencies which have so frequently terminated in adhesion to the Church of Rome, with her full list of sacraments.

VI. *Literature*.—Taking into view all the phases of controversy that have been developed in reference to the sacraments, the literature of the subject is exceedingly voluminous; but by far the greater part of it is now obsolete and never likely to be reproduced. That the discussions of the past have, on the whole, had a favorable issue is indicated by the fact that the great majority of modern publications relating to baptism and the Lord's supper are of a practical character, aiming to set forth the design, the obligations to their observance, and the duties growing out of them. Publications of this character are so numerous and so common that an attempt to give a full or even a specimen list of their titles is deemed quite unnecessary. The following are chiefly books which discuss the broader aspects of the sacraments in general, or which furnish historical data respecting the development of sacramental theories: Chrysostom, *On the Priesthood (Homilies)*; Augustine, *On Catechising the Ignorant*; *On Baptism (Sermons 218, 272)*; *On True Religion*; Ambrose, *On the Sacraments*; Gregory Nazianzum, *Oration 60*; Gregory of Nyssa, *Catechetical Orations*; Cyril of Jerusalem, *Catechetical Discourses*; Gregory the Great, *Liturgy*; *Book of Morals*; the so-called *Apostolic Constitutions* (bk. 8); Bingham, *Antiquities of the Christian Church*; Ha-

genbach, *History of Doctrines*; Neander, *Church History*; Gieseler, *Church History*; Melancthon, *Sententia de Cæna Domini*; Calvin, *De Cæna Domini*; Albertin, *De Eucharistia*; Beza, *Discourses*; Cranmer, *Definition of the True Doctrine of the Lord's Supper*; Cudworth, *True Notion of the Lord's Supper*; Halley, *On Symbolic Institutions*; Barrows, *Sermons*; South, *Sermons*; Owen, *Sacramental Discourses*; Brevant, *Sacrament and Sacrifice*; Willet, *Synopsis Papismi*; Elliott, *Romanism*; Bennett, *History of the Eucharist*; Whately, *On the Sacraments*; Adam Clarke, *On the Eucharist*; Luckey, *On the Lord's Supper*; Nevin, *Mystical Presence*; Harbaugh, *Creed and Cultus*; and *Essays* by other authors in *Tercenary Monument of the Heidelberg Catechism*. The authors who have discussed the doctrine of the sacraments as a topic of theology are almost innumerable. See also all Church creeds, e. g. Schaff, *Creeds of the Churches* (N. Y. 1878, 3 vols. 8vo). (D. P. K.)

Sacramental Seal, an expression used by Romish writers to denote the obligation which rests upon the priesthood to conceal those things the knowledge of which is derived from sacramental confession.

Sacramentals, a name given to those rites which are of a sacramental character, but yet are not true sacraments—such as confirmation and matrimony.

Sacramentarians, a controversial name given by the Lutherans to the Zwinglians to designate their belief that the consecrated elements in the eucharist are merely sacramental symbols, and not in any way the means by which the body and blood of Christ are really and truly present to, and conveyed to, the faithful partaker of them. The third volume of Schlüssenburg's *Hæreticorum Catalogus* contains 492 pages "De Secta Sacramentarium qui Cingliani seu Calvinistæ vocantur." See ZWINGLIANS.

Sacramentary, the name of a book in the Romish Church containing the collects, together with the canon, or that part of the sacramental service which is invariable.

Sacraments; Sacramentum. See SACRAMENT.

Sacrarium, a term employed by the ancient Romans to denote any place in which sacred things were deposited. A sacrarium was either public or private, the former being a part of a temple in which the idol stood, and the latter the part of a private house in which the *Penates* were kept. In the early Latin Church the name was given to the chancel or *bema*, and also to the side table (*oblationarium*) on which the offerings of the people were deposited.

Sacred Heart, BROTHERS OF THE, a lay order in the Roman Catholic Church devoted to the instruction of youth, especially in France, where it was founded by the abbé Coindre in 1826, and whence it extended in 1847 to the United States. The Brothers have academies, orphan asylums, and schools, with more than 600 boys under their care, in Kentucky, Mississippi, and Louisiana.

SACRED HEART (of Jesus), FEAST OF THE, a festival of comparatively modern institution in the Roman Catholic Church, and for a time the subject of much controversy among Roman Catholics themselves. Its origin is traced to a vision recorded of a French nun of the Order of the Visitation, named Mary Margaret Alacoque, who lived at Paray-le-Monial, in Burgundy, in the latter half of the 17th century, and whose enthusiasm led her to practice a special devotion to the heart of the Saviour. This devotion was gradually propagated in France, and at length was approved by pope Clement XII in 1732 and 1736, and by Clement XIII in 1765. The festival is held on the Friday after the octave of Corpus Christi.

This festival has for its principal object to excite in the hearts of those who celebrate it a feeling of love to

Jesus. It has doubtless given origin to the societies of cognate title. The instructions to these for each day in the week are peculiar. Thus:

"**Sunday.**—You will enter into the opened heart of Jesus as into a *furnace of love*, there to purify yourself from all stains contracted during the week, and to destroy the life of sin, that you may live the life of pure love, which will transform all into itself. This day will be dedicated to a special homage to the blessed Trinity.

"**Monday.**—You will look on yourself as a *criminal*, who desires to appease his judge by sorrow for his sins, and who is ready to make satisfaction to his justice. You will enter in spirit into the heart of Jesus, in order to enclose yourself in that *prison of love*.

"**Tuesday.**—You will enter into the heart of Jesus as into a *school*, in which you are one of his disciples. In this school is learned the science of the saints, the science of pure love, which makes us forget all worldly sciences.

"**Wednesday.**—You will enter into the heart of Jesus as a *passenger into a ship*.

"**Thursday.**—You will enter into the heart of Jesus Christ as a *friend* who is invited to the *Feast* of his friend. On this day you will perform all your actions in the spirit of love.

"**Friday.**—You will contemplate Jesus on the cross as a *tender mother*, who has brought you forth in his heart, with inexpressible pains; you will repose in his arms as a child in the arms of its mother.

"**Saturday.**—You will offer yourself to the heart of Jesus as a *victim* coming up to the temple to be immolated and led before the sacrificer."

SACRED HEART (of Jesus), LADIES OF THE, a religious congregation of the Roman Catholic Church, founded in Paris Nov. 21, 1800, and devoted to education. In that year Joseph Désiré Varin, superior of the Fathers of the Faith, desirous of establishing a society of women who would devote themselves to the education of young ladies of the higher classes, selected Madeleine Sophie Louise Barat and Octavie Bailly. On Nov. 21 they consecrated themselves to the Heart of Jesus, and opened a school in Paris. They removed to Amiens in 1801, where both their community and pupils increased rapidly. Madame Barat was chosen superior in 1802, branch establishments were founded, and in 1806 a first chapter of the order was held, at which that lady was chosen superior-general, which post she retained till her death, in 1865. Père Varin completed his draft of the proposed constitutions in 1825, and they were approved by Leo XII Dec. 22, 1826. Being invited by the pope to Rome, they established themselves in the convent and church of Trinità de' Monti. They spread thence to the chief cities of Italy, and soon owned flourishing schools in Austria, Bavaria, Prussia, Belgium, England, and Ireland. They had come to the United States in 1817 with bishop Dubourg, of New Orleans, and founded a house near St. Louis, Mo. Their

Outdoor Dress of the Brothers of the Sacred Heart.

increase in this country is chiefly owing to the late archbishop Hughes, to Madame Elizabeth Gallitzin, and especially to Madame Aloysia Hardey, who founded the majority of the American houses. They opened a school at the corner of Houston and Mulberry streets, New York, and now the order has spread to the principal states of the Union, to the Canadian provinces, Cuba, and Chili. The rules and constitutions are closely modelled on those of the Society of Jesus in all that regards the conditions for membership, training, degrees, elections, etc. The members employed in teaching and governing are styled "choir religious," the others "lay sisters." According to Appletons' *Cyclopedia*, the order had (1875): "In France, 8 provinces and 42 establishments, including 1 in Algiers; the province of Belgium and Holland, with 4 establishments; that of England and Ireland, with 5; that of Italy, with 5; that of Spain, with 3; and that of Austria, with 5. In America, they had in the United States 3 provinces, with 21 houses; the province of Canada, with 5; and the province of Chili, with 5, besides an establishment at Havana. The number of 'choir religious' was 2325, and that of lay sisters 1947; total 4272. The central house of the whole order and the residence of the superior-general is in the Boulevard des Invalides, Paris."

Outdoor Dress of the Ladies of the Sacred Heart.

SACRED HEART (*of Mary*), ORDER OF THE, a society of nuns established at Baugé, in France, by the abbé Brault in 1755, and devoted to the care of the infirm and neglected, especially during the French Revolution.

Sacred Hearts (*of Jesus and Mary*), CONGREGATION OF THE, a religious order in the Roman Catholic Church, founded at Poitiers in 1800 by M. Coudrin and Madame Ayme de la Chevalerie, for the cultivation of personal piety (hence it is sometimes styled the *Order of the Perpetual Adoration of the Holy Host*), the education of youth, missionary labors, etc. The Congregation has houses in various parts of France. See Migne, *Dict. des Ordres Religieux*, iv, 1277 sq.

Sacrificati, Christians who, to avoid condemnation before a heathen tribunal, had offered sacrifice to an idol. When such persons, after the persecution was over, returned to the Church, they were obliged to undergo a very rigid penance before they could be readmitted into its fellowship. *Sacrificati* is their denomination as penitents, after their return to the faith. Those who continued in idolatry were simply apostates. See **LITELLATICI**.

Sacrifice, properly so called, is the solemn inflic-

tion of death on a living creature, generally by effusion of its blood, in a way of religious worship; and the presenting of this act to the Deity as a supplication for the pardon of sin, and a supposed mean of compensation for the insult and injury thereby offered to his majesty and government. Among the Hebrews it was an offering made to God on his altar by the hand of a lawful minister. Sacrifice differed from *oblation*: in a sacrifice there was a real change or destruction of the thing offered, whereas an oblation was but a simple offering or gift. In the Mosaic economy it was the main public form of worship. See also **SACRIFICIAL OFFERING**.

I. Scripture Terms.—The following are the original words used in the Bible to express the sacrificial act:

1. מִנְחָה, *minchâh*, from the obsolete root נָתַן, "to give;" used in Gen. xxxii, 13, 20, 21, of a gift from Jacob to Esau (Sept. δῶρον); in 2 Sam. viii, 2, 6 (ξένια), in 1 Kings iv, 21 (δῶρα), in 2 Kings xvii, 4 (μὰνὰ), of a tribute from a vassal king; in Gen. iv, 8, 5, of a sacrifice generally (δῶρον and θυσία, indifferently); and in Lev. ii, 1, 4, 5, 6, joined with the word *korban*, of an unbloody sacrifice, or "meat-offering" (generally δῶρον θυσία). Its derivation and usage point to that idea of sacrifice which represents it as a eucharistic gift to God our King. See **MINCHAH**.

2. קָרַב, *korbân* (derived from the root קָרַב, "to approach," or [in Hiphil] to "make to approach"); used with *minchâh* in Lev. ii, 1, 4, 5, 6 (Sept. δῶρον θυσία), generally rendered δῶρον (see Mark vii, 11, κορβᾶν, ὁ ἔστι δῶρον) or προσφορά. The idea of a gift hardly seems inherent in the root, which rather points to sacrifice, as a symbol of communion or covenant between God and man. See **CORBAN**.

3. זָבַח, *zêbach* (derived from the root זָבַח, to "slaughter animals," especially to "slay in sacrifice"), refers emphatically to a *bloody* sacrifice, one in which the shedding of blood is the essential idea. Thus it is opposed to *minchâh* in Psa. xl, 6 (θυσίαν καὶ προσφοράν), and to *olâh* (the whole burnt-offering) in Exod. x, 25; xviii, 12, etc. With it the expiatory idea of sacrifice is naturally connected. See **VICTIM**.

4. In the New Test. the comprehensive term is θυσία (fromθύω, which seems radically to express the *fuming* up of the sacrificial smoke), which is used both of the victim offered and of the act of immolation, whether literal or figurative.

Distinct from these general terms, and often appended to them, are the words denoting special kinds of sacrifice. See **OFFERING**.

5. עֹלָה, *olâh* (Sept. generally ὀλοκαύτωμα), the "whole burnt-offering." See **BURNT-OFFERING**.

6. שְׁלֵמֶה, *shêlem* (Sept. θυσία σωτηρίου), used frequently with זָבַח, and sometimes called קָרַב, the "peace-" or "thank-offering." See each of these words.

7. חַטָּאת, *chattâth* (Sept. generally περί ἁμαρτίας), the "sin-offering" (q. v.).

8. עֲשָׂה, *ashâm* (Sept. generally πλημμελία), the "trespass-offering" (q. v.).

9. זֶבַע, *ishshêh* (from שָׂא, *fire*), a "sacrifice made by fire;" spoken of every kind of sacrifice and offering, as commonly burned (Lev. ii, 3, 10), and even of those not consumed by fire (xiv, 7, 9); but usually in the ritual formula, "a sacrifice of sweet odor to Jehovah" (i, 9, 13, 17; ii, 2, 9; iii, 5; comp. Exod. xxix, 41; Lev. viii, 21; briefly, Exod. xxix, 18, 25; Lev. ii, 16). See **FIRE**.

10. תְּהִלָּה, *todâh*, is used in a figurative sense only, "a sacrifice of praise." See **PRAISE**.

11. חַג, *châg* (from חָגַג, to *dance* in religious joy), is properly a *festal* only; but by metonymy is occasionally used for the sacrificial victims of such occasions (Exod. xxiii, 18; Psa. cxviii, 27; Mal. ii, 3). See **FESTIVAL**.

The term "sacrifice" is sometimes used figuratively

for deep repentance (Psa. li, 17), for the good works of believers (Phil. iv, 18; Heb. xiii, 16), and for the duties of prayer and praise (Rom. xii, 1; Heb. xiii, 15; 1 Pet. ii, 5).

II. *Origin of Sacrifice.*—Did it arise from a natural instinct of man, sanctioned and guided by God, or was it the subject of some distinct primeval revelation? This is a question the importance of which has probably been exaggerated. There can be no doubt that sacrifice was sanctioned by God's law, with a special typical reference to the atonement of Christ; its universal prevalence, independent of, and often opposed to, man's natural reasonings on his relation to God, shows it to have been primeval, and deeply rooted in the instincts of humanity. Whether it was first enjoined by an external command, or whether it was based on that sense of sin and lost communion with God which is stamped by his hand on the heart of man, is a historical question, perhaps insoluble, probably one which cannot be treated at all, except in connection with some general theory of the method of primeval revelation, but certainly one which does not affect the authority and the meaning of the rite itself. We need not discuss here the theory of the old English deists, such as Blount and Tyndale, that, as cruel men delighted in bloodshed, so they conceived God to be like themselves, and sought to please and appease him by the slaughter of innocent beasts; or the specious improvement of this theory which Spencer (*De Leg. Hebr. Rit.* l. iii, diss. ii) framed, that men sacrificed originally because of the savage wildness of their nature, and that God accepted and ratified their grim worship to restrain them from what was worse. The question is now proposed in this form: Did sacrifice arise from the natural religious instinct of man, with or without (for both views are held) an unconscious inspiration of the Divine Spirit, or did it originate in a distinct divine revelation? Those who advocate the former view speak of sacrifice as the "free expression of the divinely determined nature of man" (Neumann). "Man sacrifices because of his inalienable divine likeness, according to which he cannot cease to seek that communion with God for which he was created, even through such an effectual self-sacrifice as is exhibited in sacrifice. Sacrifices have thus been as little an arbitrary invention of man as prayer. Like prayer, they have originated in an inner necessity to which man freely surrenders himself" (Oehler, in *Herzog's Real-Encykl.* x, 617).

1. One recent writer on the subject (Davison, *Inquiry into the Origin and Intent of Primitive Sacrifice*, 1825) adduces (on the authority of Spencer and Outram) the consent of the fathers in favor of the human origin of primitive patriarchal sacrifice, and alleges that the notion of its divine origin is "a mere modern figment, excogitated in the presumptively speculative age of innovating Puritanism." This assertion has, in part, been met by Faber (*Treatise on the Origin of Expiatory Sacrifice*, 1827), who shows that the only authorities adduced by Outram (*De Sacrificiis*) and Spencer (*De Leg. Hebr.*) are Justin Martyr, Chrysostom, the author of the work called *Apostolical Constitutions*, and the author of the *Questions and Answers to the Orthodox*, commonly printed with the works of Justin Martyr. Of the early theologians thus adduced, the last three are positive and explicit in their assertion, while the sentiments of Justin Martyr are gathered rather by implication than in consequence of any direct avowal. He says, "As circumcision commenced from Abraham, so the Sabbath, and sacrifices, and oblations, and festivals commenced from Moses;" which clearly intimates that he considered primitive sacrifice as a human invention until made by the law a matter of religious obligation. The great body of the fathers are silent as to the origin of sacrifice; but a considerable number of them, cited by Spencer (*De Leg. Hebr.* p. 646 sq.), held that sacrifice was admitted into the law through condescension to the weakness of the people, who had been familiar-

ized with it in Egypt, and, if not allowed to sacrifice to God, would have been tempted to sacrifice to the idols of their heathen neighbors. The ancient writers who held this opinion are Justin Martyr, Origen, Tertullian, Chrysostom, Theodoret, Cyril of Alexandria, Epiphanius of Salamis, Irenaeus, Jerome, Procopius, Eucherius, Anastasius, and the author of the *Apostolical Constitutions*. But out of the entire number, only the four already mentioned allege incidentally the human origin of primitive sacrifice; the rest are silent on this point. Outram, indeed (*De Sacrif.* lib. i, cap. 1, § 6, p. 8, 9), thinks that in giving this opinion they *virtually* deny the divine origin of sacrifice. But it is fairly answered that the assertion, be it right or be it wrong, that sacrifice was introduced into the law from condescension to the Egyptianizing weakness of the people, furnishes no legitimate proof that the persons entertaining this opinion held the mere human origin of primitive patriarchal sacrifice, and affords no ground for alleging the consent of Christian antiquity in favor of that opinion. Such persons could not but have known that the rite of sacrifice existed anterior to the rise of pagan idolatry; and hence the notion which they entertained leaves the question as to the *primitive* origin of sacrifice entirely open, so far as they are concerned. Paganism, whether in Egypt or elsewhere, merely borrowed the rite from pure patriarchism, which already possessed it; and unless a writer expressly declares such to be his opinion, we are not warranted in concluding that he held the human origin of primitive patriarchal sacrifice, simply because he conceives that a system of sacrificial service had been immediately adopted into the law from paganism out of condescension to the weakness of the people. Besides, some of these very fathers held language with respect to primitive sacrifice not much in favor of the interpretation which has, on this ground, been given to their sentiments. Thus, according to Cyril, "God accepted the sacrifice of Abel and rejected the sacrifice of Cain, because it was fitting that posterity should learn from thence how they might blamelessly offer unto God his meet and due honor." If, then, these authorities be taken as neutral on the question, with the four exceptions already indicated, we shall find whatever authority we ascribe to these more than counterbalanced by the testimony of other ancient witnesses in favor of the divine origin of primitive sacrifice. Philo-Judeus says, "Abel brought neither the same oblation as Cain, nor in the same manner; but, instead of things inanimate, he brought things animate; and instead of later and secondary products, he brought the older and the first: for he offered in sacrifice from the firstlings of his flock, and from their fat, according to the most holy command" (*De Sacrif. Abelis et Caini* in *Opp.* p. 145). Augustine, after expressly referring the origin of sacrifice to the divine command, more distinctly evolves his meaning by saying, "The prophetic immolation of blood, testifying, from the very commencement of the human race, the future passion of the Mediator, is a matter of deep antiquity; inasmuch as Abel is found in Holy Scripture to have been the first who offered up this prophetic immolation" (*Cont. Faust. Manich.* in *Opp.* vi, 145). Next we come to Athanasius, who, speaking of the consent of the Old Testament to the fundamental doctrines of the New, says: "What Moses taught, these things his predecessor Abraham had preserved; and what Abraham had preserved, with those things Enoch and Noah were well acquainted; for they made a distinction between the clean and the unclean, and were acceptable to God. Thus, also, in like manner, Abel bore testimony; for he knew what he had learned from Adam, and Adam himself taught only what he had previously learned from the Lord" (*Synod. Nicen. contra Hær. Arian. decret.* in *Opp.* i, 403). Eusebius of Caesarea, in a passage too long for quotation, alleges that animal sacrifice was first of all practiced by the ancient lovers of God (the patriarchs), and that not by accident, but through a certain divine contrivance, under which, as

taught by the Divine Spirit, it became their duty thus to shadow forth the great and venerable victim, really acceptable to God, which was, in time then future, destined to be offered in behalf of the whole human race (*Demonst. Evang.* i, 8, 24, 25).

Among the considerations urged in support of the opinion that sacrifice must have originated in a divine command, it has been suggested as exceedingly doubtful whether, independently of such a command, and as distinguished from vegetable oblations, animal sacrifice, which involves the practice of slaughtering and burning an innocent victim, could ever, under any aspect, have been adopted as a rite likely to gain the favor of God. Our own course of scriptural education prevents us, perhaps, from being competent judges on this point; but we have means of judging how so singular a rite must strike the minds of thinking men not in the same degree prepossessed by early associations. The ancient Greek masters of thought not unfrequently expressed their astonishment how and upon what rational principles so strange an institution as that of animal sacrifice could ever have originated; for as to the notion of its being *pleasing* to the Deity, such a thing struck them as a manifest impossibility (*Iamblic. De Vit. Pythag.* p. 106-118; *Porphyr. De Abstin.* p. 96; *Theophrast. et Porphyr. ap. Euseb. Præp. Evang.* p. 90, 91). Those who do not believe that sacrifices were of divine institution must dispose of this difficulty by alleging that, when men had come to slay animals for their own food, they might think it right to slay them to satisfy their gods; and, in fact, Grotius, who held the human origin of sacrifices, and yet believed that animal food was not used before the Deluge, is reduced to the expedient of contending that Abel's offering was not an animal sacrifice, but only the produce—the milk and wool—of his best sheep. This, however, shows that he believed animal sacrifice to have been impossible before the Deluge without the sanction of a divine command, the existence of which he discredited.

A strong moral argument in favor of the divine institution of sacrifice, somewhat feebly put by Hallet (*Comment. on Heb. xi, 4*, cited by Magee, *On the Atonement*), has been reproduced with increased force by Faber (*Prim. Sacrifice*, p. 183). It amounts to this: (1.) Sacrifice, when uncommanded by God, is a mere act of gratuitous superstition; whence, on the principle of Paul's reprobation of what he denominates *will-worship*, it is neither acceptable nor pleasing to God. (2.) But sacrifice during the patriarchal ages was accepted by God, and was plainly honored with his approbation. (3.) Therefore, sacrifice during the patriarchal ages could not have been an act of superstition uncommanded by God. (4.) If, then, such was the character of primitive sacrifice—that is to say, if primitive sacrifice was *not* a mere act of gratuitous superstition uncommanded by God—it must, in that case, indubitably have been a divine, and not a human, institution. If it be held that any of the ancient sacrifices were expiatory, or piacular, the argument for their divine origin is strengthened, as it is hard to conceive the combination of ideas under which the notion of expiatory sacrifice could be worked out by the human mind. This difficulty is so great that the ablest advocates of the human origin of primitive animal sacrifice feel bound also to deny that such sacrifices as then existed were piacular. It is strongly insisted that the doctrine of an atonement by animal sacrifice cannot be deduced from the light of nature or from the principles of reason. If, therefore, the idea existed, it must either have arisen in the fertile soil of a guessing superstition, or have been divinely appointed. Now, we know that God cannot approve of unwarranted and presumptuous superstition; if, therefore, he can be shown to have received with approbation a species of sacrifice undiscoverable by the light of nature, or from the principles of reason, it follows that it must have been of his own institution.

The question of the existence of expiatory sacrifice

before the law, however, is more difficult, and is denied by Outram, Ernesti, Döderlin, Davison, and many others, who believe that it was revealed under the law, as well as by those who doubt its existence under the Mosaic dispensation. The arguments already stated in favor of the divine institution of primitive sacrifice go equally to support the existence of piacular sacrifice, the idea of which seems more urgently to have required a divine intimation. Besides, expiatory sacrifice is found to have existed among all nations in conjunction with eucharistic and impetratory sacrifices; and it lies at the root of the principle on which human sacrifices were offered among the ancient nations. The expiatory view of sacrifice is frequently produced by heathen writers: "Take heart for heart, fibre for fibre. This life we give you in the place of a better" (*Ovid, Fasti*, vi, 161). This being the case, it is difficult to believe but that the idea was derived, along with animal sacrifice itself, from the practice of Noah, and preserved among his various descendants. This argument, if valid, would show the primitive origin of piacular sacrifice. Now there can be no doubt that the idea of sacrifice which Noah transmitted to the postdiluvian world was the same that he had derived from his pious ancestors, and the same that was evinced by the sacrifice of Abel, to which we are, by the course of the argument, again brought back. Now if that sacrifice was expiatory, we have reason to conclude that it was divinely commanded; and the supposition that it was both expiatory and divinely commanded makes the whole history far more clear and consistent than any other which has been or can be offered. It amounts, then, to this—that Cain, by bringing a eucharistic offering, when his brother brought one which was expiatory, denied virtually that his sins deserved death, or that he needed the blood of atonement. Some go further, and allege that in the text itself God actually commanded Cain to offer a piacular sacrifice. (See this question discussed below.)

2. On the other hand, the great difficulty in the theory which refers it to a distinct command of God is the total silence of Holy Scripture—a silence the more remarkable when contrasted with the distinct reference made in Gen. ii to the origin of the Sabbath. Sacrifice when first mentioned, in the case of Cain and Abel, is referred to as a thing of course; it is said to have been brought by men; there is no hint of any command given by God. This consideration, the strength of which no ingenuity has been able to impair, although it does not actually disprove the formal revelation of sacrifice, yet at least forbids the assertion of it, as of a positive and important doctrine. See, for example (as in Faber's *Origin of Sacrifice*), the elaborate reasoning on the translation of *קורבן* in Gen. iv, 7. Even supposing the version a "sin-offering coucheth at the door" to be correct, on the ground of general usage of the word, of the curious version of the Sept., and of the remarkable grammatical construction of the masculine participle with the feminine noun (as referring to the fact that the sin-offering was actually a male), still it does not settle the matter. The Lord even then speaks of sacrifice as existing, and as known to exist; he does not institute it. The supposition that the "skins of beasts" in Gen. iii, 21 were skins of animals sacrificed by God's command is a pure assumption. The argument on Heb. xi, 4, that faith can rest only on a distinct divine command as to the special occasion of its exercise, is contradicted by the general definition of it given in ver. 1. (See below.)

Nor is the fact of the mysterious and supernatural character of the doctrine of atonement, with which the sacrifices of the O. T. are expressly connected, any conclusive argument on this side of the question. All allow that the eucharistic and deprecatory ideas of sacrifice are perfectly natural to man. The higher view of its expiatory character, dependent, as it is, entirely on

its typical nature, appears but gradually in Scripture. It is veiled under other ideas in the case of the patriarchal sacrifices. It is first distinctly mentioned in the Law (Lev. xvii, 11, etc.); but even then the theory of the sin-offering, and of the classes of sins to which it referred, is allowed to be obscure and difficult; it is only in the N. T. (especially in the Epistle to the Hebrews) that its nature is clearly unfolded. It is as likely that it pleased God gradually to superadd the higher idea to an institution, derived by man from the lower ideas (which must eventually find their justification in the higher), as that he originally commanded the institution when the time for the revelation of its full meaning was not yet come. The rainbow was just as truly the symbol of God's new promise in Gen. ix, 13-17, whether it had or had not existed as a natural phenomenon before the flood. What God sets his seal to he makes a part of his revelation, whatever its origin may be. It is to be noticed (see Warburton, *Div. Leg.* ix, c. 2) that, except in Gen. xv, 9, the method of patriarchal sacrifice is left free, without any direction on the part of God, while in all the Mosaic ritual the limitation and regulation of sacrifice, as to time, place, and material, is a most prominent feature, on which much of its distinction from heathen sacrifice depended. The inference is at least probable that when God sanctioned formally a natural rite, then, and not till then, did he define its method.

See on the question, in addition to the above treatises, Sykes, *Essay on the Nature, Origin, and Design of Sacrifices*; Taylor, *Scripture Doctrine of the Atonement* (1758); Ritchie, *Criticism upon Modern Notions of Sacrifices* (1761); Magee, *Discourses on Atonement and Sacrifices*. See also ATONEMENT.

III. *Biblical History of Sacrifice*.—1. *Ante-Mosaic Instances*.—In examining the various sacrifices recorded in Scripture before the establishment of the law, we find that the words specially denoting expiatory sacrifice (עֹלָה and חַטָּאת) are not applied to them. This fact does not at all show that they were not actually expiatory, nor even that the offerers had not that idea of expiation which must have been vaguely felt in all sacrifices; but it justifies the inference that this idea was not then the prominent one in the doctrine of sacrifice.

The sacrifice of Cain and Abel is called *minchâh*, although in the case of the latter it was a bloody sacrifice. (So in Heb. xi, 4 the word *θυσία* is explained by the *τοῖς ὁσίοις* below.) In the case of both it would appear to have been eucharistic, and the distinction between the offerers to have lain in their "faith" (Heb. xi, 4). Whether that faith of Abel referred to the promise of the Redeemer and was connected with any idea of the typical meaning of sacrifice, or whether it was a simple and humble faith in the unseen God, as the giver and promiser of all good, we are not authorized by Scripture to decide. See CAIN.

The sacrifice of Noah after the flood (Gen. viii, 20) is called burnt-offering (*olâh*). This sacrifice is expressly connected with the institution of the covenant which follows in ix, 8-17. The same ratification of a covenant is seen in the burnt-offering of Abraham, especially enjoined and defined by God in Gen. xv, 9; and is probably to be traced in the "building of altars" by Abraham on entering Canaan at Bethel (Gen. xii, 7, 8) and Mamre (xiii, 18), by Isaac at Beersheba (xxvi, 25), and by Jacob at Shechem (xxxiii, 20), and in Jacob's setting-up and anointing of the pillar at Bethel (xxviii, 18; xxxv, 14). The sacrifice (*zêbach*) of Jacob at Mizpah also marks a covenant with Laban, to which God is called to be a witness and a party. In all these, therefore, the prominent idea seems to have been what is called the *federative*, the recognition of a bond between the sacrificer and God, and the dedication of himself, as represented by the victim, to the service of the Lord. See NOAH.

The sacrifice of Isaac (Gen. xxii, 1-13) stands by itself as the sole instance in which the idea of human sacrifice was even for a moment, and as a trial, countenanced by God. Yet in its principle it appears to have been of the same nature as before: the voluntary surrender of an only son on Abraham's part, and the willing dedication of himself on Isaac's, are in the foreground; the expiatory idea, if recognised at all, holds certainly a secondary position. See ISAAC.

In the burnt-offerings of Job for his children (Job i, 5) and for his three friends (xlii, 8), we, for the first time, find the expression of the desire of expiation for sin accompanied by repentance and prayer, and brought prominently forward. The same is the case in the words of Moses to Pharaoh as to the necessity of sacrifice in the wilderness (Exod. x, 25), where sacrifice (*zêbach*) is distinguished from burnt-offering. Here the main idea is at least deprecatory; the object is to appease the wrath and avert the vengeance of God.

2. *The Sacrifices of the Mosaic Period*.—These are inaugurated by the offering of the Passover and the sacrifice of Exod. xxiv. The Passover, indeed, is unique in its character, and seems to embrace the peculiarities of all the various divisions of sacrifice soon to be established. Its ceremonial, however, most nearly resembles that of the sin-offering in the emphatic use of the blood, which (after the first celebration) was poured at the bottom of the altar (see Lev. iv, 7), and in the care taken that none of the flesh should remain till the morning (see Exod. xii, 10; xxxiv, 25). It was unlike it in that the flesh was to be eaten by all (not burnt, or eaten by the priests alone), in token of their entering into covenant with God, and eating "at his table," as in the case of a peace-offering. Its peculiar position as a historical memorial, and its special reference to the future, naturally mark it out as incapable of being referred to any formal class of sacrifice; but it is clear that the idea of salvation from death by means of sacrifice is brought out in it with a distinctness before unknown. See PASSOVER.

The sacrifice of Exod. xxiv, offered as a solemn inauguration of the covenant of Sinai, has a similarly comprehensive character. It is called a "burnt-offering" and "peace-offering" in ver. 5; but the solemn use of the blood (comp. Heb. ix, 18-22) distinctly marks the idea that expiatory sacrifice was needed for entering into covenant with God, the idea of which the sin and trespass offerings were afterwards the symbols.

The law of Leviticus now unfolds distinctly the various forms of sacrifice:

- (a.) *The burnt-offering.* Self-dedicatory.
- (b.) *The meat-offering (unbloody).* } Eucharistic.
- (c.) *The peace-offering (bloody).* }
- (d.) *The sin-offering.* } Expiatory.
- (e.) *The trespass-offering.* }

(d.) *The incense* offered after sacrifice in the Holy Place, and (on the Day of Atonement) in the Holy of Holies, the symbol of the intercession of the priest (as a type of the Great High-priest), accompanying and making efficacious the prayer of the people.

In the consecration of Aaron and his sons (Lev. viii) we find these offered in what became ever afterwards the appointed order: first came the sin-offering, to prepare access to God; next the burnt-offering, to mark their dedication to his service; and, thirdly, the meat-offering of thanksgiving. The same sacrifices, in the same order, with the addition of a peace-offering (eaten, no doubt, by all the people), were offered a week after for all the congregation, and accepted visibly by the descent of fire upon the burnt-offering. Henceforth the sacrificial system was fixed in all its parts, until He should come whom it typified. It is to be noticed that the law of Leviticus takes the rite of sacrifice for granted (see Lev. i, 2; ii, 1, etc., "If a man bring an offering, ye shall," etc.), and is directed chiefly to guide and limit its exercise. In every case but that of the peace-offering the nature of the victim was carefully prescribed, so as to preserve the ideas symbolized, but so as to avoid the notion (so inherent in heathen sys-

tems, and finding its logical result in human sacrifice) that the more costly the offering, the more surely must it meet with acceptance. At the same time, probably in order to impress this truth on the mind, and also to guard against corruption by heathenish ceremonial, and against the notion that sacrifice in itself, without obedience, could avail (see 1 Sam. xv, 22, 23), the place of offering was expressly limited, first to the Tabernacle, afterwards to the Temple. (For instances of infringement of this rule uncensured, see Judg. ii, 5; vi, 26; xiii, 19; 1 Sam. xi, 15; xvi, 5; 2 Sam. vi, 13; 1 Kings iii, 2, 3. Most of these cases are special, some authorized by special command; but the law probably did not attain to its full strictness till the foundation of the Temple.) This ordinance also necessitated a periodical gathering as one nation before God, and so kept clearly before their minds their relation to him as their national King. Both limitations brought out the great truth that God himself provided the way by which man should approach him, and that the method of reconciliation was initiated by him, and not by them.

In consequence of the peculiarity of the law, it has been argued (as by Outram, Warburton, etc.) that the whole system of sacrifice was only a condescension to the weakness of the people, borrowed, more or less, from the heathen nations, especially from Egypt, in order to guard against worse superstition and positive idolatry. The argument is mainly based (see Warburton, *Div. Leg.* iv, § vi, 2) on Ezek. xx, 25, and similar references in the Old and New Test. to the nullity of all mere ceremonial. Taken as an explanation of the theory of sacrifice, it is weak and superficial; it labors under two fatal difficulties, the historical fact of the primeval existence of sacrifice, and its typical reference to the one atonement of Christ, which was foreordained from the very beginning, and had been already typified, as, for example, in the sacrifice of Isaac. But as giving a reason for the minuteness and elaboration of the Mosaic ceremonial so remarkably contrasted with the freedom of patriarchal sacrifice, and as furnishing an explanation of certain special rites, it may probably have some value. It certainly contains this truth: that the craving for visible tokens of God's presence, and visible rites of worship, from which idolatry proceeds, was provided for and turned into a safe channel by the whole ritual and typical system, of which sacrifice was the centre. The contact with the gigantic system of idolatry which prevailed in Egypt, and which had so deeply tainted the spirit of the Israelites, would doubtless render such provision then especially necessary. It was one part of the prophetic office to guard against its degradation into formalism, and to bring out its spiritual meaning with an ever-increasing clearness.

3. *Post-Mosaic Sacrifices.*—It will not be necessary to pursue, in detail, the history of Post-Mosaic sacrifice, for its main principles were now fixed forever. The most remarkable instances of sacrifice on a large scale are by Solomon at the consecration of the Temple (1 Kings viii, 63), by Jehoiada after the death of Athaliah (2 Chron. xxiii, 18), and by Hezekiah at his great Passover and restoration of the Temple-worship (2 Chron. xxx, 21-24). In each case the lavish use of victims was chiefly in the peace-offerings, which were a sacred national feast to the people at the table of their Great King.

The regular sacrifices in the Temple service were:

(a.) *Burnt-offerings.*

1. The daily burnt-offerings (Exod. xxix, 38-42).
2. The double burnt-offerings on the Sabbath (Numb. xviii, 9, 10).
3. The burnt-offerings at the great festivals (Numb. xviii, 11-xxix, 39).

(b.) *Meat-offerings.*

1. The daily meat-offerings accompanying the daily burnt-offerings (flour, oil, and wine) (Exod. xxix, 40, 41).
2. The shew-bread (twelve loaves with frankincense), renewed every Sabbath (Lev. xxiv, 5-9).
3. The special meat-offerings at the Sabbath and the great festivals (Numb. xviii, xix).

4. The first-fruits, at the Passover (Lev. xxiii, 10-14), at Pentecost (xxiii, 17-20), both "wave-offerings;" the first-fruits of the dough and threshing-floor at the harvest-time (Numb. xv, 20, 21; Deut. xxvi, 1-11), called "heave-offerings."

(c.) *Sin-offerings.*

1. Sin-offering (a kid) each new moon (Numb. xxviii, 16).
2. Sin-offerings at the Passover, Pentecost, Feast of Trumpets, and Tabernacles (Numb. xxviii, 22, 30; xxix, 5, 16, 19, 22, 25, 28, 31, 34, 38).
3. The offering of the two goats (the goat sacrificed, and the scape-goat) for the people, and of the bullock for the priest himself on the Great Day of Atonement (Lev. xvi).

(d.) *Incense.*

1. The morning and evening incense (Exod. xxx, 7, 8).
2. The incense on the Great Day of Atonement (Lev. xvi, 12).

Besides these public sacrifices, there were offerings of the people for themselves individually: at the purification of women (Lev. xii); the presentation of the first-born, and circumcision of all male children; the cleansing of the leprosy (ch. xiv) or any uncleanness (ch. xv); at the fulfilment of Nazaritic and other vows (Numb. vi, 1-21); on occasions of marriage and of burial, etc., besides the frequent offering of private sin-offerings. These must have kept up a constant succession of sacrifices every day, and brought the rite home to every man's thought and to every occasion of human life. See SACRIFICIAL OFFERINGS.

IV. *Significance of the Levitical Sacrifices.*—In examining the doctrine of sacrifice, it is necessary to remember that, in its development, the order of idea is not necessarily the same as the order of time. By the order of sacrifice in its perfect form (as in Lev. viii) it is clear that the sin-offering occupies the most important place, the burnt-offering comes next, and the meat-offering, or peace-offering, last of all. The second could only be offered after the first had been accepted; the third was only a subsidiary part of the second. Yet, in actual order of time, it has been seen that the patriarchal sacrifices partook much more of the nature of the peace-offering and burnt-offering; and that, under the law, by which was "the knowledge of sin" (Rom. iii, 20), the sin-offering was for the first time explicitly set forth. This is but natural, that the deepest ideas should be the last in order of development.

It is also obvious that those who believe in the unity of the Old and New Tests., and the typical nature of the Mosaic covenant, must view the type in constant reference to the antitype, and be prepared, therefore, to find in the former vague and recondite meanings which are fixed and manifested by the latter. The sacrifices must be considered, not merely as they stand in the law, or even as they might have appeared to a pious Israelite, but as they were illustrated by the prophets, and perfectly interpreted in the N. T. (e. g. in the Epistle to the Hebrews). It follows from this that, as belonging to a system which was to embrace all mankind in its influence, they should be also compared and contrasted with the sacrifices and worship of God in other nations, and the ideas which in them were dimly and confusedly expressed.

1. *Contrast with Heathenism.*—It is needless to dwell on the universality of heathen sacrifices (see Magee, *Dis. on Sacrifice*, vol. i, dis. v, and Ernst von Lasaulx, *Treatise on Greek and Roman Sacrifice*, quoted in notes 23, 26 to Thomson's *Bampton Lectures*, 1853), and it is difficult to reduce to any single theory the various ideas involved therein. It is clear that the sacrifice was often looked upon as a gift or tribute to the gods; an idea which, for example, runs through all Greek literature, from the simple conception in Homer to the caricatures of Aristophanes or Lucian, against the perversion of which Paul protested at Athens, when he declared that God needed nothing at human hands (Acts xvii, 25). It is also clear that sacrifices were used as prayers to obtain benefits or to avert wrath, and that this idea was corrupted into the superstition, denounced by heathen satirists as well as by Hebrew prophets, that by

them the gods' favor could be purchased for the wicked, or their "envy" be averted from the prosperous. On the other hand, that they were regarded as thank-offerings, and the feasting on their flesh as a partaking of the "table of the gods" (comp. 1 Cor. x, 20, 21), is equally certain. Nor was the higher idea of sacrifice as a representation of the self-devotion of the offerer, body and soul, to the god, wholly lost, although generally obscured by the grosser and more obvious conceptions of the rite. But, besides all these, there seems always to have been latent the idea of propitiation; that is, the belief in a communion with the gods, natural to man, broken off in some way, and by sacrifice to be restored. The emphatic "shedding of the blood" as the essential part of the sacrifice, while the flesh was often eaten by the priests or the sacrificer, is not capable of a full explanation by any of the ideas above referred to. Whether it represented the death of the sacrificer, or (as in cases of national offering of human victims, and of those self-devoted for their country) an atoning death for him; still, in either case, it contained the idea that "without shedding of blood is no remission," and so had a vague and distorted glimpse of the great central truth of revelation. Such an idea may be, as has been argued, "unnatural," in that it could not be explained by natural reason; but it certainly was not unnatural if frequency of existence and accordance with a deep natural instinct be allowed to preclude that epithet.

Now, the essential difference between these heathen views of sacrifice and the scriptural doctrine of the O. T. is not to be found in its denial of any of these ideas. The very names used in it for sacrifice, as is seen above, involve the conception of the rite as a gift, a form of worship, a thank-offering, a self-devotion, and an atonement. In fact, it brings out, clearly and distinctly, the ideas which, in heathenism, were uncertain, vague, and perverted. But the essential points of distinction are two:

(1.) Whereas the heathen conceived of their gods as alienated in jealousy or anger, to be sought after, and to be appeased by the unaided action of man, Scripture represents God himself as approaching man, as pointing out and sanctioning the way by which the broken covenant should be restored. This was impressed on the Israelites at every step by the minute directions of the law as to time, place, victim, and ceremonial, and by its utterly discountenancing the "will-worship" which in heathenism found full scope, and rioted in the invention of costly or monstrous sacrifices. It is especially to be noted that this particularity is increased as we approach nearer to the deep propitiatory idea; for whereas the patriarchal sacrifices generally seem to have been undefined by God, and, even under the law, the nature of the peace-offerings, and, to some extent, the burnt-offerings, was determined by the sacrificer only, yet the solemn sacrifice of Abraham in the inauguration of his covenant was prescribed to him, and the sin-offerings under the law were most accurately and minutely determined (see, for example, the whole ceremonial of Lev. xvi). It is needless to remark how this essential difference purifies all the ideas above noticed from the corruptions which made them odious or contemptible, and sets on its true basis the relation between God and fallen man.

(2.) The second mark of distinction is closely connected with this, inasmuch as it shows sacrifice to be a scheme proceeding from God, and, in his foreknowledge, connected with the one central fact of all human history. It is to be found in the typical character of all Jewish sacrifices, on which, as the Epistle to the Hebrews argues, all their efficacy depended. It must be remembered that, like other ordinances of the law, they had a twofold effect, depending on the special position of an Israelite as a member of the natural theocracy, and on his general position as a man in relation with God. On the one hand, for example, the sin-offering

was an atonement to the national law for moral offences of negligence, which in "presumptuous"—i. e. deliberate and wilful—crime was rejected (see Numb. xv, 27-31; and comp. Heb. x, 26, 27). On the other hand, it had, as the prophetic writings show us, a distinct spiritual significance as a means of expressing repentance and receiving forgiveness, which could have belonged to it only as a type of the great atonement. How far that typical meaning was recognised at different periods and by different persons, it is useless to speculate; but it would be impossible to doubt, even if we had no testimony on the subject, that, in the face of the high spiritual teaching of the law and the prophets, a pious Israelite must have felt the nullity of material sacrifice in itself, and so believed it to be availing only as an ordinance of God, shadowing out some great spiritual truth or action of his. Nor is it unlikely that, with more or less distinctness, he connected the evolution of this, as of other truths, with the coming of the promised Messiah. But, however this be, we know that, in God's purpose, the whole system was typical; that all its spiritual efficacy depended on the true sacrifice which it represented, and could be received only on condition of faith; and that, therefore, it passed away when the Antitype had come.

2. The nature and meaning of the various kinds of sacrifice are partly gathered from the form of their institution and ceremonial, partly from the teaching of the prophets, and partly from the N. T., especially the Epistle to the Hebrews.

(1.) *Old-Testament Relations.*—Here all had relation, under different aspects, to a covenant between God and man.

(a.) The *sin-offering* represented that covenant as broken by man, and as knit together again, by God's appointment, through the "shedding of blood." Its characteristic ceremony was the sprinkling of the blood before the veil of the sanctuary, the putting some of it on the horns of the altar of incense, and the pouring-out of all the rest at the foot of the altar of burnt-offering. The flesh was in no case touched by the offerer; either it was consumed by fire without the camp, or it was eaten by the priest alone in the holy place, and everything that touched it was holy (קֹדֶשׁ). This latter point marked the distinction from the peace-offering, and showed that the sacrificer had been rendered unworthy of communion with God. The shedding of the blood, the symbol of life, signified that the death of the offender was deserved for sin, but that the death of the victim was accepted for his death by the ordinance of God's mercy. This is seen most clearly in the ceremonial of the Day of Atonement, when, after the sacrifice of the one goat, the high-priest's hand was laid on the head of the scape-goat—which was the other part of the sin-offering—with confession of the sins of the people, that it might visibly bear them away, and so bring out explicitly what in other sin-offerings was but implied. Accordingly, we find (see quotation from the Mishna in Outram, *De Sacr.* i, ch. xv, § 10) that in all cases it was the custom for the offerer to lay his hand on the head of the sin-offering, to confess, generally or specially, his sins, and to say, "Let this be my expiation." Beyond all doubt, the sin-offering distinctly witnessed that sin existed in man, that the "wages of that sin was death," and that God had provided an atonement by the vicarious suffering of an appointed victim. The reference of the Baptist to a "Lamb of God who taketh away the sins of the world" was one understood and hailed at once by a "true Israelite." See SIN-OFFERING.

(b.) The ceremonial and meaning of the *burnt-offering* were very different. The idea of expiation seems not to have been absent from it, for the blood was sprinkled round about the altar of sacrifice; and, before the Levitical ordinance of the sin-offering to precede it, this idea may have been even prominent. But

in the system of Leviticus, it is evidently only secondary. The main idea is the offering of the whole victim to God, representing (as the laying of the hand on its head shows) the devotion of the sacrificer, body and soul, to him. The death of the victim was (so to speak) an incidental feature, to signify the completeness of the devotion; and it is to be noticed that, in all solemn sacrifices, no burnt-offering could be made until a previous sin-offering had brought the sacrificer again into covenant with God. The main idea of this sacrifice must have been representative, not vicarious; and the best comment upon it is the exhortation, in Rom. xii, 1, "to present our bodies a living sacrifice, holy and acceptable to God."

(c.) The *meat-offerings*—the peace- or thank-offering, the first-fruits, etc.—were simply offerings to God of his own best gifts, as a sign of thankful homage, and as a means of maintaining his service and his servants. Whether they were regular or voluntary, individual or national, independent or subsidiary to other offerings, this was still the leading idea. The meat-offering, of flour, oil, and wine, seasoned with salt and hallowed by frankincense, was usually an appendage to the devotion implied in the burnt-offering; and the peace-offerings for the people held the same place in Aaron's first sacrifice (Lev. ix, 22), and in all others of special solemnity. The characteristic ceremony in the peace-offering was the eating of the flesh by the sacrificer (after the fat had been burned before the Lord, and the breast and shoulder given to the priests). It betokened the enjoyment of communion with God at "the table of the Lord," in the gifts which his mercy had bestowed, of which a choice portion was offered to him, to his servants, and to his poor (see Deut. xiv, 28, 29). To this view of sacrifice allusion is made by Paul in Phil. iv, 18; Heb. xiii, 15, 16). It follows naturally from the other two. See MEAT-OFFERING.

It is clear, from this, that the idea of sacrifice is a complex idea, involving the propitiatory, the dedicatory, and the eucharistic elements. Any one of these, taken by itself, would lead to error and superstition. The propitiatory alone would tend to the idea of atonement by sacrifice for sin, as being effectual without any condition of repentance and faith; the self-dedicatory, taken alone, ignores the barrier of sin between man and God, and undermines the whole idea of atonement; the eucharistic, alone, leads to the notion that mere gifts can satisfy God's service, and is easily perverted into the heathenish attempt to "bribe" God by vows and offerings. All three, probably, were more or less implied in each sacrifice, each element predominating in its turn: all must be kept in mind in considering the historical influence, the spiritual meaning, and the typical value of sacrifice.

Now, the Israelites, while they seem always to have retained the ideas of propitiation and of eucharistic offering, even when they perverted these by half-heathenish superstition, constantly ignored the self-dedication which is the link between the two, and which the regular burnt-offering should have impressed upon them as their daily thought and duty. It is, therefore, to this point that the teaching of the prophets is mainly directed; its key-note is contained in the words of Samuel—"Behold, to obey is better than sacrifice, and to hearken than the fat of rams" (1 Sam. xv, 22). So Isaiah declares (as in i, 10-20) that "the Lord delights not in the blood of bullocks, or lambs, or goats;" that to those who "cease to do evil and learn to do well . . . though their sins be as scarlet, they shall be white as snow." Jeremiah reminds them (vii, 22, 23) that the Lord did not "command burnt-offerings or sacrifices" under Moses, but said, "Obey my voice, and I will be your God." Ezekiel is full of indignant protests (see xx, 39-44) against the pollution of God's name by offerings of those whose hearts were with their idols. Hosea sets forth God's requirements (vi, 6) in words which our Lord himself sanctioned: "I desired mercy and not

sacrifice, and the knowledge of God more than burnt-offerings." Amos (v, 21-27) puts it even more strongly, that God "hates" their sacrifices, unless "judgment run down like water, and righteousness like a mighty stream." And Micah (vi, 6-8) answers the question which lies at the root of sacrifice—"Wherewith shall I come before the Lord?" by the words, "What doth the Lord require of thee, but to do justly, and love mercy, and walk humbly with thy God?" All these passages, and many others, are directed to one object—not to discourage sacrifice, but to purify and spiritualize the feelings of the offerers.

The same truth, here enunciated from without, is recognised from within by the Psalmist. Thus he says, in Psa. xl, 8-11, "Sacrifice and meat-offering, burnt-offering and sin-offering, thou hast not required;" and contrasts with them the homage of the heart—"Mine ears hast thou bored," and the active service of life—"Lo! I come to do thy will, O God." In Psa. l, 13, 14, sacrifice is contrasted with prayer and adoration (comp. Psa. cxli, 2): "Thinkest thou that I will eat bulls' flesh, and drink the blood of goats? Offer unto God thanksgiving; and pay thy vows to the Most High: and call upon me in the day of trouble." In Psa. li, 16, 17, it is similarly contrasted with true repentance of the heart: "The sacrifice of God is a troubled spirit, a broken and a contrite heart." Yet here also the next verse shows that sacrifice was not superseded, but purified: "Then shalt thou be pleased with burnt-offerings and oblations; then shall they offer young bullocks upon thine altar." These passages are correlative to the others, expressing the feelings, which those others in God's name require. It is not to be argued from them that this idea of self-dedication is the main one of sacrifice. The idea of propitiation lies below it, taken for granted by the prophets as by the whole people, but still enveloped in mystery until the Antitype should come to make all clear. For the evolution of this doctrine we must look to the N. T.; the preparation for it by the prophets was (so to speak) negative, the pointing out the nullity of all other propitiations in themselves, and then leaving the warnings of the conscience and the cravings of the heart to fix men's hearts on the better atonement to come.

(2.) *New-Testament Explanation.*—Without entering directly on the great subject of the atonement (which would be foreign to the scope of this article), it will be sufficient to refer to the connection established in the N. T. between it and the sacrifices of the Mosaic system. To do this, we need do little more than analyze the Epistle to the Hebrews, which contains the key of the whole sacrificial doctrine.

(a.) In the first place, it follows the prophetic books by stating, in the most emphatic terms, the intrinsic nullity of all mere material sacrifices. The "gifts and sacrifices" of the first tabernacle could "never make the sacrificers perfect in conscience" (*κατὰ συνείδησιν*): they were but "carnal ordinances, imposed on them till the time of reformation" (*διορθώσεως*) (Heb. ix, 9, 10). The very fact of their constant repetition is said to prove this imperfection, which depends on the fundamental principle "that it is impossible that the blood of bulls and goats should take away sin" (x, 4). But it does not lead us to infer that they actually had no spiritual efficacy if offered in repentance and faith. On the contrary, the object of the whole epistle is to show their typical and probationary character, and to assert that in virtue of it alone they had a spiritual meaning. Our Lord is declared (see 1 Pet. i, 20) "to have been foreordained" as a sacrifice "before the foundation of the world;" or (as it is more strikingly expressed in Rev. xiii, 8) "slain from the foundation of the world." The material sacrifices represented this great atonement as already made and accepted in God's foreknowledge; and to those who grasped the ideas of sin, pardon, and self-dedication symbolized in them they were means of entering into the blessings which the one true

sacrifice alone procured. Otherwise the whole sacrificial system could have been only a superstition and a snare. The sins provided for by the sin-offering were certainly in some cases moral. The whole of the Mosaic description of sacrifices clearly implies some real spiritual benefit to be derived from them, besides the temporal privileges belonging to the national theocracy. Just as Paul argues (Gal. iii, 15-29) that the promise and covenant to Abraham were of primary, the law only of secondary importance—so that men had *under* the law more than they had *by* the law—so it must be said of the Levitical sacrifices. They could convey nothing in themselves; yet, as types, they might, if accepted by a true, though necessarily imperfect faith, be means of conveying in some degree the blessings of the Antitype. See TYPE.

(b.) This typical character of all sacrifice being thus set forth, the next point dwelt upon is the union in our Lord's person of the priest, the offerer, and the sacrifice. See PRIEST. The imperfection of all sacrifices, which made them, in themselves, liable to superstition and even inexplicable, lies in this: that, on the one hand, the victim seems arbitrarily chosen to be the substitute for, or the representative of, the sacrificer; and that, on the other, if there be a barrier of sin between man and God, he has no right of approach, or security that his sacrifice will be accepted; that there needs, therefore, to be a mediator, i. e. (according to the definition of Heb. v, 1-4), a true priest, who shall, as being one with man, offer the sacrifice, and accept it, as being one with God. It is shown that this imperfection, which necessarily existed in all types, without which indeed they would have been substitutes, not preparations for the antitype, was altogether done away in him: that in the first place he, as the representative of the whole human race, offered no arbitrarily chosen victim, but the willing sacrifice of his own blood; that in the second place he was ordained by God, by a solemn oath, to be a high-priest forever, "after the order of Melchisedek," one "in all points tempted like as we are, yet without sin," united to our human nature, susceptible to its infirmities and trials, yet, at the same time, the true Son of God, exalted far above all created things, and ever living to make intercession in heaven, now that his sacrifice is over; and that, in the last place, the barrier between man and God is by his mediation done away forever, and the most holy place once for all opened to man. All the points in the doctrine of sacrifice which had before been unintelligible were thus made clear.

(c.) This being the case, it next follows that all the various kinds of sacrifices were, each in its measure, representatives and types of the various aspects of the atonement. It is clear that the atonement in this epistle, as in the N. T. generally, is viewed in a twofold light.

(i.) On the one hand, it is set forth distinctly as a vicarious sacrifice which was rendered necessary by the sin of man, and in which the Lord "bare the sins of many." It is its essential characteristic that in it he stands absolutely alone, offering his sacrifice without any reference to the faith or the conversion of men—offering it, indeed, for those who "were still sinners" and at enmity with God. Moreover, it is called a "propitiation" (ἱλασμός or ἱλαστήριον), Rom. iii, 24; 1 John ii, 2; a "ransom" (ἀπολύτρωσις), Rom. iii, 25; 1 Cor. i, 30, etc.; which, if words mean anything, must imply that it makes a change in the relation between God and man, from separation to union, from wrath to love, and a change in man's state from bondage to freedom. In it, then, he stands out alone as the mediator between God and man; and his sacrifice is offered once for all, never to be imitated or repeated.

Now, this view of the atonement is set forth in the Epistle to the Hebrews as typified by the sin-offering, especially by that particular sin-offering with which the high-priest entered the most holy place on the great day of atonement (ix, 7-12), and by that which

hallowed the inauguration of the Mosaic covenant and cleansed the vessels of its ministration (ix, 13-23). In the same way Christ is called "our Passover, sacrificed for us" (1 Cor. v, 7); and is said, in even more startling language, to have been "made sin for us," though he "knew no sin" (2 Cor. v, 21). This typical relation is pursued even into details, and our Lord's suffering without the city is compared to the burning of the public or priestly sin-offerings without the camp (Heb. xiii, 10-13). The altar of sacrifice (θυσιαστήριον) is said to have its antitype in his passion (xiii, 10). All the expiatory and propitiatory sacrifices of the law are now for the first time brought into full light. Although the principle of vicarious sacrifice still remains, and must remain, a mystery, yet the fact of its existence in him is illustrated by a thousand types. As the sin-offering, though not the earliest, is the most fundamental of all sacrifices, so the aspect of the atonement which it symbolizes is the one on which all others rest.

(ii.) On the other hand, the sacrifice of Christ is set forth to us as the completion of that perfect obedience to the will of the Father which is the natural duty of sinless man, in which he is the representative of all men, and in which he calls upon us, when reconciled to God, to "take up the cross and follow him." "In the days of his flesh he offered up prayers and supplications . . . and was heard, in that he feared; though he were a Son, yet learned he obedience by the things which he suffered: and being made perfect" (by that suffering; see ii, 10), "he became the author of salvation to all them that obey him" (v, 7, 8, 9). In this view his death is not the principal object; we dwell rather on his lowly incarnation, and his life of humility, temptation, and suffering, to which that death was but a fitting close. In the passage above referred to the allusion is not to the cross of Calvary, but to the agony in Gethsemane, which bowed his human will to the will of his Father. The main idea of this view of the atonement is representative rather than vicarious. In the first view the "second Adam" undid by his atoning blood the work of evil which the first Adam did; in the second he, by his perfect obedience, did that which the first Adam left undone, and, by his grace making us like himself, calls upon us to follow him in the same path. This latter view is typified by the burnt-offering; in respect of which the N. T. merely quotes and enforces the language already cited from the O. T., and especially (see Heb. x, 6-9) the words of Psa. xl, 6, etc., which contrast with material sacrifice the "doing the will of God." It is one which cannot be dwelt upon at all without a previous implication of the other: as both were embraced in one act, so are they inseparably connected in idea. Thus it is put forth in Rom. xii, 1, where the "mercies of God" (i. e. the free salvation, through the sin-offering of Christ's blood, dwelt upon in all the preceding part of the epistle) are made the ground for calling on us "to present our bodies, a living sacrifice, holy and acceptable to God," inasmuch as we are all (see v, 5) one with Christ, and members of his body. In this sense it is that we are said to be "crucified with Christ" (Gal. ii, 20; Rom. vi, 6); to have "the sufferings of Christ abound in us" (2 Cor. i, 5); even to "fill up that which is behind" (τὰ ὑστερήματα) thereof (Col. i, 24); and to "be offered" (σπένδενθαι) "upon the sacrifice of the faith" of others (Phil. ii, 17; comp. 2 Tim. iv, 6; 1 John iii, 16). As without the sin-offering of the cross this, our burnt-offering, would be impossible, so also without the burnt-offering the sin-offering will to us be unavailing.

(d.) With these views of our Lord's sacrifice on earth, as typified in the Levitical sacrifices on the outer altar, is also to be connected the offering of his intercession for us in heaven, which was represented by the incense. In the Epistle to the Hebrews, this part of his priestly office is dwelt upon with particular reference to the offering of incense in the most holy place by the high-priest on the great day of atonement (Heb. ix, 24-28;

comp. iv, 14-16; vi, 19, 20; vii, 25). It implies that the sin-offering has been made once for all to rend asunder the veil (of sin) between man and God, and that the continual burnt-offering is now accepted by him for the sake of the great interceding High-priest. That intercession is the strength of our prayers, and "with the smoke of its incense" they rise up to heaven (Rev. viii, 4). See INCENSE.

(e) The typical sense of the meat-offering or peace-offering is less connected with the sacrifice of Christ himself than with those sacrifices of praise, thanksgiving, charity, and devotion which we, as Christians, offer to God, and "with which he is well pleased" (Heb. xiii, 15, 16) as with "an odor of sweet smell, a sacrifice acceptable to God" (Phil. iv, 18). They betoken that through the peace won by the sin-offering we have already been enabled to dedicate ourselves to God, and they are, as it were, the ornaments and accessories of that self-dedication. See PEACE-OFFERING.

Such is a brief sketch of the doctrine of sacrifice. It is seen to have been deeply rooted in men's hearts, and to have been, from the beginning, accepted and sanctioned by God, and made by him one channel of his revelation. In virtue of that sanction it had a value, partly symbolical, partly actual, but in all respects derived from the one true sacrifice, of which it was the type. It involved the expiatory, the self-dedicatory, and the eucharistic ideas, each gradually developed and explained, but all capable of full explanation only by the light reflected back from the antitype.

Literature.—This is very copious, as may be seen from the lists of works cited by Danz (*Wörterb.* s. v. "Opfer"), Darling (*Cyclop. Bibliog.* [see Index]), and Malcolm (*Theol. Index*, s. v.), as also from the references in the following articles. See especially Kurtz, *Der alttestam. Opfercultus* (Mitau, 1862); transl. *Sacrificial Worship of the Old Test.* (Edinb. 1863).

SACRIFICE, HUMAN. The offering of human life, as the most precious thing on earth, came in process of time to be practiced in most countries of the world. All histories and traditions darken our idea of the earlier ages with human sacrifices. But the period when such prevailed was not the earliest in time, though probably the earliest in civilization. The practice was both a result and a token of barbarism more or less gross. In this, too, the dearest object was primitively selected. Human life is the most valuable thing known, and of this most precious possession the most precious portion is the life of a child. Children, therefore, were offered in fire to the false divinities, and in no part of the world with less regard to the claims of natural affection than in the land where, at a later period, the only true God had his peculiar worship and highest honors.

Under these circumstances, it is a striking fact that the Hebrew religion, even in its most rudimental condition, should be free from the contamination of human sacrifices. The case of Isaac and that of Jephthah's daughter cannot impair the general truth that the offering of human beings is neither enjoined, allowed, nor practiced in the Biblical records. On the contrary, such an offering is strictly prohibited by Moses as adverse to the will of God and an abomination of the heathen. "Thou shalt not let any of thy seed pass through the fire to Moloch: defile not yourselves with any of these things" (Lev. xviii, 21; see also xx, 2; Deut. xii, 31; Psa. cvi, 37; Isa. lxvi, 3; Jer. xxiii, 37). Yet in an age in which, like the present, all manner of novelties are broached, and, in some cases, the greater the paradox advanced with the more promptitude and maintained with the greater earnestness, these very clear positions have been withstood, and human sacrifices have been confidently charged on the Hebrew race. In the year 1842, Ghillany, professor at Nuremberg, published a book (*Die Menschenopfer der alten Hebräer*), the object of which was to prove that as the religion of the ancient Hebrews did not differ essentially from that of the Canaanites—so that Moloch, who had been originally a god

common to both, merely in the process of time was softened down and passed into Jehovah, thus becoming the national deity of the people of Israel—so did their altars smoke with human blood, from the time of Abraham down to the fall of both kingdoms of Judah and Israel. In the same year appeared in Germany another work, by Daumer (*Der Feuer- und Molochdienst der alten Hebräer*), intended to prove that the worship of Moloch, involving his bloody rites, was the original, legal, and orthodox worship of the nation of Abraham, Moses, Samuel, and David. To these works a reply was put forth in 1843, by Löwengard (*Jehovah, nicht Moloch, war der Gott der alten Hebräer*), in which he defends the worship of Jehovah from the recent imputations, and strives, by distinguishing between the essential and the unessential, the durable and the temporary, to prepare the way for a reformation of modern Judaism.

We do not think that it requires any deep research or profound learning to ascertain from the Biblical records themselves that the religion of the Bible is wholly free from the shocking abominations of human sacrifices, and we do not therefore hesitate to urge the fact on the attention of the ordinary reader as not least considerable among many proofs not only of the superior character, but of the divine origin, of the Hebrew worship. It was in Egypt where the mind of Moses, and of the generation with whom he had primarily to do, was chiefly formed, so far as heathen influences were concerned. Here offerings were very numerous. Sacrifices of meat-offerings, libations, and incense were of very early date in the Egyptian temples. Oxen, wild goats, pigs, and particularly geese, were among the animal offerings; besides these, there were presented to the gods wine, oil, beer, milk, cakes, grain, ointment, flowers, fruits, vegetables. In these, and in the case of meat-, peace-, and sin-offerings (as well as others), there exists a striking resemblance with similar Hebrew observances, which may be found indicated in detail in Wilkinson (*Manners and Customs of the Ancient Egyptians*, v, 358 sq.; see also ii, 378), who, in agreement with Herodotus, maintains, in opposition to Diodorus, that the Egyptians were never accustomed to sacrifice human beings—a decision which has a favorable aspect on our last position, namely, that the religion of the Israelites, even in its earliest days, was unprofaned by human blood. A remarkable instance of disagreement between the observances of the Egyptians and the Jews in regard to sacrifices is that while the Egyptians received the blood of the slaughtered animal into a vase or basin, to be applied in cookery, the eating of blood was most strictly forbidden to the Israelites (Deut. xv, 23).

Sacrificial Festival (פֶּסַח). This was held with the pieces of the victims laid aside from sacrifices of a joyful nature (*epulae sacrae, dapae*), not only in all ancient heathen nations (Saubert, *De Sacrific.* c. 26; Feith, *Antiq. Hom.* i, 10, 7; Stuck, *Antiq. Conviv.* i, 33; Lakemacher, *Antiq. Græcor. Sacrae*, p. 384 sq.; Douglæi *Annal.* i, 235; on the Romans, see, among others, Josephus, *War*, vii, 1, 3; comp. also Plato, *Leg. v*, p. 738; Herod. vi, 67), but also among the Israelites (Deut. xii, 6 sq.; 1 Sam. ix, 19; xvi, 3, 5; 2 Sam. vi, 19). Only the thank-offerings of individuals, however, among that people gave opportunity for these festivals, since of these alone certain rich portions were consumed on the altar (Lev. iii, 3 sq., 9 sq.; xiv, 15); the breast and the right shoulder belonged to the officiating priests (vii, 31 sq.), and all the rest of the flesh was restored to the offerer (Deut. xxvii, 7). This was to be eaten on the same or the following day (Lev. vii, 16), and in the company of all members of the household and of bidden guests (the Levites especially were often invited) (Deut. xii, 12). Other sacred meals were held at the times of festivals (xvi, 11 sq.). Upon the tithe meal, see TITHES. Heathen sacrificial meals, which were held sometimes in the temples (1 Cor. viii, 10), sometimes in private houses,

are mentioned (Numb. xxv, 2). The participation of an Israelite in these was accounted idolatry (xxv, 3 sq.; Psa. cvi, 28; Tob. i, 12; 1 Cor. x, 20 sq.; Rev. ii, 14); hence, too, the apostles forbade Christians to join them (Acts xv, 29; xxi, 25), or at least warned against them on account of those who were weak in faith (1 Cor. viii, 1 sq.; x, 28 sq.). Such "meat offered to idols," however, was set forth on the table not only at the sacrificial meals (1 Cor. viii, 10; x, 27), but the poor or the avaricious used to preserve it for future use (Theophr. *Char.* x) or sell it to traders (*ibid.* xxiii); hence it might easily happen that one who bought at the meat market received it (1 Cor. x, 25). See FESTIVAL.

Sacrificial Instruments IN THE ISRAELITISH SANCTUARY. For the use of the priests in offering sacrifices, especially those with blood, there were kept in the tabernacle (Exod. xxvii, 3; xxxviii, 3; Numb. iv, 14) and in the Temple (1 Kings vii, 40, 45; 2 Kings xxv, 14 sq.; Jer. lii, 18 sq.) the following implements of brass:

1. **יָאִיִּם**, *ya'im*, shovels, perhaps to free the altar of burnt-offering from its ashes; to which the **סִירוֹת**, *si-roth*, or pots, belonged, into which they were thrown.

2. **בְּזִרְקוֹתַי**, *mizrakoth*', basins, to take up the blood of the victims for sprinkling.

3. **בְּזִלְגוֹתַי**, *mizlagoth*', forks, flesh-forks.

4. **בְּחַתּוֹתַי**, *machtoth*', firepans, in which coals were taken up.

The brazen **מְזַמְמֵרוֹת**, *mezammeroth*' (Jer. lii, 18), may be considered as belonging here, and will then doubtless mean *sacrificial knives*, elsewhere called **מַחֲלָפִיִּם**, *machlaphim*'. See KNIFE. The golden vases or vessels mentioned in 1 Kings vii, 50 are certainly different from those just mentioned (No. 2), and were intended for use in the holy place. See SACRIFICE; TEMPLE.

Sacrificial Offering. There is no doubt that the origin of sacrifices is to be referred to the very earliest ages of humanity, where also the Mosaic history places it (Gen. iv, 3 sq.; viii, 20; xxii, 2; xxxi, 54; xivi, 1; comp. Hottinger, *De Origine Sacrific. Patriarch.* [Marb. 1706]). While men as yet made little distinction between the sensible and the supernatural, they sought to acquire or fix the favor of their gods, or to express their gratitude for their gifts, by thank-offerings, usually of some kind of food, since they attributed to their gods the wants of men (Lev. xxi, 6; xxii, 25; Numb. xxviii, 2; comp. Pliny, ii, 5, p. 73 [ed. Hard.]; Homer, *Iliad*, iv, 48; Aristoph. *Aves*, 1516 sq.; comp. Pauly's *Real-Encyklop.* iv, 839 sq.). (On the meaning and kinds of offerings, see Melancthon, in the *Apol. A. C.* p. 253 sq. A contracted view is taken by Sykes, *Ueber d. Natur. Absicht u. Urspr. d. Opfer* [Halle, 1778]. There is a vain attempt to philosophize, by Rosenkranz, in the *Hall. Encykl.* vol. iii, § iv, p. 74; comp. Baader, *Ueber eine künft. Theorie d. Opfers und Cultus* [Munich, 1836]; Bähr, *Symbol.* ii, 288 sq.) The sensualism of an early age expressed itself, too, in supposing a god to be pleased with the odor of sacrifices (Lev. i, 9, 13; Numb. xv, 7 sq.; Lucian, *Icaromen.* 27). The sacrifices were usually of such food as men themselves most enjoyed, and of the greatest excellence in their kind (1 Sam. xv, 15; Psa. lxi, 15), and were either raw or prepared in such a way as to be most palatable. Hence doubtless the use of salt (q. v.). Perhaps the first offerings were productions of the vegetable kingdom (Plato, *Leg.* vi, 782), and then honey, milk, etc., animals not being offered until later (Theophr. in Porphyry, *Abstinent.* ii, 5, and xxviii, 33; comp. Plato, *Leg.* vi, 782; Ovid, *Fasti*, i, 337; Pausan. viii, 2, 1). For the history informs us that man began with vegetable food, and afterwards to eat flesh (comp. Gen. i, 29; ix, 3; see Schickedanz, *De Natura Sacrific. V. T. ex Seculi Morib. repetend.* [Francf. 1781], and in the *Symbol. Duisb.* II, ii,

493 sq.), and perhaps the sacrifice of animals may have led to the burning of the sacrifices on altars. (See in general Gedicke, *Verm. Schrift.* p. 229 sq.; Wolf, *Verm. Schrift. u. Aufs.* [Halle, 1802], p. 243 sq.; Saubert, *De Sacrific. Vet. Collectanea* [Jen. 1659]; Meiner, *Krit. Gesch. der Religion*, ii, 1 sq.; Baur, *Symbol. u. Mythol.* II, ii, 284 sq.) It is commonly supposed that the first offerings were of immediate divine appointment (Deyling, *Observat.* ii, 53 sq.), but this is not affirmed in the Mosaic history (comp. Wolf, *Homines Mose Velutarios Sponte Sacra fecisse*, etc. [Lips. 1782]), and is rejected by some as anthropopathism. The views of those who seek definite dogmatic relations in the first sacrifices, as Tholuck (2te *Beil. zum Br. a. d. Hebr.* p. 69), do not belong to historical criticism, but to dogmatic theology (see also the *Zeitschr. f. wissenschaftl. Theol.* 1863, iii).

On the ritual of sacrifice among the Hebrews in general, see Lightfoot, *De Ministerio Templi*, in his *Works*, and in Ugolino, vol. ix, ch. viii; Carpzov, *App.* p. 699 sq.; Outram, *De Sacrific. Lib.* (Lond. 1677), vol. ii (only the first book relates to the Jewish sacrifices); Reland, *Antiq. Sacr.* iii, 1; Bauer, *Gottesdienst-Verfuss.* i, 80 sq.; Rosenmüller, *Excursus i, ad Lev.*; Gramberg, *Relig.-Ideen*, i, 94 sq.; Schöll, in the *Württemberg. Stud.* I, ii, 152 sq.; IV, i, 3 sq.; V, i, 108 sq.; Bähr, *Symbol.* ii, 189 sq.; Kurtz, *Das mos. Opfer* (Mitau, 1842). The Jewish views of the ritual of sacrifice are especially set forth in the tracts *Sebachim*, *Menuchoth*, and *Temura*, in the fifth part of the Mishna. From these and the rabbins extracts are given by Otho, *Lex. Talm.* p. 621 sq. The entire Babylonish Gemara to the tract *Sebachim*, and the Tosephta to the same tract, are found in Hebrew and Latin in Ugolini *Thesaur.* vol. xix. Many parallels and explanations are found in the Phœnician table of offerings discovered some years since in Marseilles, and published, with a commentary, by Movers (Breslau, 1847). (On the offerings of other Eastern and Western nations, see Flügel, *Völk.* and Wachter, in the *Hall. Encykl.* iii, § iv, p. 77 sq.)

The law adopted as a model the sacrifices already long in use, and gives exact directions as to the kinds of sacrifices and the ceremonies of offering. (We cannot here discuss the question of how much of this law was Mosaic. In answer to the view of De Wette, Von Bohlen, George, and others that the greater part had a still later origin, see Bleek, in the *Stud. u. Krit.* 1831, iii, 491 sq.; Bähr, *Symbol.* ii, 192 sq.) This law of offerings may be summed up thus:

1. The subjects to be sacrificed, in the proper sense of the word, which were laid, that is, on the burning altar of Jehovah, must be borrowed as well out of the vegetable as the animal kingdom. (In the wider sense of offering, even tithes, first-fruits, and incense are included. Comp. the offering of wood, Neh. x, 35.) Hence there is a distinction between offerings without blood (**מְנוּחֹת**, *menuchoth*, *προσφοραι*, *dōpa*) and offerings with blood (**זְבָחִים**, *zebachim*, *ضحايا*). See 1 Sam. ii, 29; iii, 14; Psa. xl, 7; Heb. viii, 3. The latter were considered the more important. But salt, a mineral, was added to every distinct sacrifice of either kind. The vegetable products offered were both solid and fluid; of the former, roasted grain, flour, cakes with olive-oil (the cakes always without leaven or honey), and incense as an accompaniment, formed the meat-offerings (the **מִנְחָה**, *minchah*, in the proper sense); of the latter, wine formed the drink-offerings (**נֶסֶךְ**, *nések*). The animals offered must be clean, and such as were fit for food (Josephus *Ant.* xii, 5, 4; comp. Gen. viii, 20), and must be tame beasts, as cattle (Bochart, *Hieroz.* i, 326 sq.), goat, sheep, and sometimes turtle-doves and young pigeons but never fishes. They must be altogether free from deformity (*spotless, perfect*, *ἀνομιος, τέλειος*, Lev. xxi, 20 sq.; comp. Mal. i, 8, 14; Herod. ii, 38; Plutarch, *Oron. Def.* p. 49; Ovid, *Met.* xv, 130; Virgil, *Æn.* iv, 57; Pline, viii, 70; Athen. xv, 674; Tertull. *Apol.* c. 14; with the

passage in Plutarch may be compared Polluc. *Onom.* i, 1, 29; Schol. ad Aristoph. *Acarn.* p. 785; on the expressions in Lev. xxii, 20 sq., see Bochart, *Hieroz.* i, 594 sq.; comp. Baldinger, præf. Hottinger, *De Victim. Integritate et Mystero* [Heidelb. 1781]). Except the doves, they must be at least eight days old, because younger flesh is unfit for food (Exod. xxii, 30; Lev. xxii, 27), the smaller cattle being usually yearlings (sheep, goats, calves, Exod. xxix, 38; Lev. ix, 3; xii, 6; xiv, 10; xxiii, 12, 18 sq.; Numb. xv, 27; xxviii, 9 sq.), while the larger were young, perhaps usually three years old (yet Judg. vi, 25 mentions a bull of seven years as a sacrifice; comp. Pliny, viii, 77; Herod. ii, 38). The sex of four-footed beasts for sacrifice was sometimes indifferent (as in thank- and sin-offerings; comp. Lev. iii, 1, 6; yet in all public offerings the Mishna requires males, *Temura*, ii, 1), and sometimes males were required, as in burnt-offerings; for the male sex was considered the superior. The choice of the kind of beast was free in the burnt-offerings and thank-offerings (Lev. i, 2; iii, 1, 6), but was determined by law in the trespass- and sin-offerings (iv, 3). Human sacrifices, as heathenish (xviii, 21; xx, 2 sq.; Deut. xii, 31), were avoided by the pious Israelites (Psa. cvi, 37), although their sacred history contained an example of the purposed sacrifice of a son by his father (Gen. xxii), and in the unsettled days of the judges a daughter fell under the sacrificial knife of her superstitious father (Judg. xi). On the human sacrifices of other nations, see Baur, *Mythology*, II, ii, 293 sq.; Wachsmuth, *Hellen. Alterth.* ii, 549 sq.; and on those of the apostate Israelites, see MOLOCH. The slanderous statement that the Jews slaughtered strangers and drank their blood arose about the time of Antiochus Epiphanes (see Josephus, *Apion*, ii, 8; Ghillany, *Die Menschenopfer der alten Heb.* [Nuremberg, 1842]; *Hall. Lit. Zeit.* 1844, No. 220-223). The legal and regular circle of sacrificial beasts is explicable from the agricultural pursuits of the Israelites: oxen, goats, and sheep were the usual stock of farmers, and corn, oil, and wine were the chief productions of the soil for the commonest wants of life. The addition of doves springs from the fact that scarcely any creatures with life suitable for sacrifice could be found save among birds, and doves were the most common domestic birds. But why not chickens; and why, according to the rabbins, could not chickens be kept in the holy city? (comp. Eskuche, *De Gallis et Gallinis ad Aram Jove non Factis* [Rint. 1741]). See FATTED FOWL. Each person was required to furnish his own sacrifices, and those who lived near enough drove them from their own herds. But later there arose in Jerusalem traders in beasts for sacrifice (*victimarii negotiatores*; Pliny, *H. N.* vii, 10; Mishna, *Shekal*, vii, 2), and at the time of Jesus a regular market for this purpose stood in the vicinity of the Temple (q. v.).

2. The place where alone sacrifices might be presented was the court of the national sanctuary—the tabernacle first and afterwards the Temple (Deut. xii, 5 sq., 11), and every offering elsewhere was to be punished with death (Lev. xvii, 4 sq.; Deut. xii, 13; comp. 1 Kings xii, 27). The place is more exactly called “the door of the tabernacle of the congregation” (Lev. i, 3; iii, 2-8; iv, 4, 14); and, according to the Mishna (*Sebach.* c. 5), the offerings were slain, part on the north side of the altar, part, the less holy, at any place in the court indifferently (comp. Plato, *Leges*, x, 910). These regulations were designed to prevent the idolatrous worship which might have been concealed under the mask of the legal ritual. Besides, the common place of worship must have had a beneficial influence on the spirit of a nation so torn into factions (comp. 1 Kings xii, 27). This common place of sacrifice was not always observed in the time of the judges, nor even of David (1 Kings iii, 2, 3). Sacrifices were made away from the tabernacle (Judg. ii, 5; 1 Sam. vii, 17; 1 Kings i, 9), especially on high-places (Judg. vi, 26; xiii, 19; Hos. iv, 13). Even the law-abiding Samuel did this (1 Sam.

ii, c.), and David tolerated it (1 Kings iii, 2 sq.). These sacrifices on high-places lasted after Solomon's time, even under theocratic kings. In the kingdom of Israel the common place of sacrifice was abandoned. In the time of the judges the irregularity sprang from the confusion of jurisdiction and the unsettled condition of the people, everywhere pressed by their enemies; yet it is, on the whole, probable that such entire exclusiveness of locality was not so severely demanded by the Mosaic law as later, after the unfortunate consequences of private and voluntary sacrifices were seen.

3. The purpose of the sacrifices was special—either to thank God for benefits received, or to propitiate him because of sins and errors. Hence the distinction of thank-offerings and sin- and trespass-offerings. The burnt-offerings had a more general tendency (comp. the division of sacrifices in Philo, *Opp.* ii, 240; see Scholl, in Klaiber's *Studien*, iv, 1, 36 sq.). The Hebrew sacrifices are enumerated, though not defined with exactness, in Numb. xv, 3 sq.; Deut. xii, 6; Jer. xvii, 26. On the classes of Carthaginian sacrifices, see Movers (*Phöniz.* p. 19, 41). These various offerings produced great variety of ceremonies, as now in the masses of the Roman Catholics. On great public festivals, great collective offerings like hecatombs are mentioned (1 Kings viii, 5, 63 sq.; 2 Chron. xxix, 32 sq.; xxx, 24; xxxv, 7 sq.; comp. Herod. vii, 43; Xenoph. *Hell.* vi, 4, 29; Sueton. *Calig.* 14; Capitol. in Maxim. et Balbin. c. 11).

Offerings were sometimes public (comp. Herod. vi, 57; Xenoph. *Athen.* ii, 9), sometimes private, sometimes prescribed, sometimes voluntary; the latter were sometimes family sacrifices (1 Sam. i, 21; xx, 6). One person had sacrifices offered for another, as the Catholics with masses (Job i, 5; 2 Macc. iii, 32). Not only the Israelites, but the heathen, were permitted to sacrifice to Jehovah (Numb. xv, 14; 2 Macc. iii, 35; xiii, 23; Philo, *Opp.* ii, 569; Josephus, *Apion*, ii, 5; Mishna, *Shekal*, vii, 6), and the Jews even made sacrifices for heathen princes on the altars of Jehovah (1 Macc. vii, 33; Josephus, *Ant.* xii, 2, 5). Originally they were offered only for the living, sometimes when death was near (Sir. xxxviii, 11); but after the resurrection became a general belief sacrifices for the dead arose (2 Macc. xii, 43). There is, indeed, no other instance, and perhaps they never were customary, especially as they are not in harmony with the law (see Grotius, *ad loc.*). The polemic writers against the Catholic masses for the dead repudiate them indignantly (Chemnitz, *Exam. Concil. Trid.* p. 736 sq. [ed. Franc.]; Pfaff, *Num. ex 2 Macc. xii, 39 sq. adstrui possint Missæ et Preces pro Defunctis* [Tubing. 1749]), or suppose that the narrator forged the account (Hyper. in the *Miscell. Duisburg.* i, 453).

4. In the sacrifice of offerings with blood the owner himself (see Hottinger, *De Function. Laic. circa Victim.* [Marburg, 1706]), after being cleansed and sanctified (1 Sam. xvi, 5; Job i, 5; comp. Josephus, *Apion*, ii, 23; Hesiod, *Opp.* p. 724 sq.; Ovid, *Metam.* x, 434 sq.; Tibul. ii, 1, 11; Herod. ii, 37), led the beast to the altar (Lev. iii, 1, 12; iv, 14; xvii, 4). Among the Greeks and Romans the horns of the beast were gilded (Homer, *Iliad*, x, 294; *Odys.* iii, 384, 426; Plato, *Alcib.* ii, c. 20; Virgil, *Æn.* ix, 927; Macrob. *Sat.* i, 17, p. 29, ed. Bip.) and crowned (comp. Acts xiv, 13; see Ovid, *Metam.* xv, 131; Lucian, *Sacrif.* vol. xii; Lycophron, *Alex.* p. 327; Statius, *Theb.* iv, 449; Pliny, xvi, 4; Strabo, xv, 732; Athen. xvi, 674; see Wetstein, ii, 543; Walch, *Dissert. ad Acta Apost.* iii, 200). That this custom prevailed among the Jews, at least with the thank-offerings, is less clear from Josephus (*Ant.* xiii, 8, 2) than from the Mishna (*Bikkurim*, iii, 2 sq.; comp. in general Lakemacher, *Observ.* i, 79 sq.). The owner laid his hand upon the head of the beast (Lev. i, 4; iii, 2; iv, 4, 15, 24; viii, 18; comp. the Egyptian custom, Herod. ii, 40). If the sacrifice was that of a community, the elders performed this duty (Lev. iv, 15); but when the offering was public, i. e. in the name of the whole people, the

ritual mentions this imposition of the hand but in one case (xvi, 21; comp. the Mishna, *Menach.* ix, 7; yet see 2 Chron. xxix, 23), this ceremony being the formal consecration of the beast to Jehovah; not the laying of the penalty due to sin upon the sacrifice, as Bochart thinks (*Hieroz.* i, 330), for the ceremony occurs in the case of the thank-offering. According to the rabbins, a regular form of words was used in laying the hands on the victim (Maimon. *Hilch. Korban*, iii, 9); then it was slain (Lev. iii, 2; iv, 4, 15, 24; viii, 15, 19), but this might be, and in later times actually was, done by the priests (2 Chron. xxix, 24); perhaps even by the Levites, but 2 Chron. xxx, 17 does not prove this. Among the Romans, officers called *pope* or *victimarii* slew the victim (Bochart, *Hieroz.* i, 330). The blood was then taken up, and in different sacrifices variously sprinkled or poured out by the priest (Hottinger, *De Function. Sacer. circa Victim.* [Marb. 1706]). According to the varying character of the offering, the blood was sprinkled, or brought into the Temple and there sprinkled upon the ark of the covenant, and put on the horns of the altar of burnt-offering, and the remainder thrown out at the foot of the altar of burnt-offering. The sacrificer (yet comp. 2 Chron. xxix, 34) then took off the skin of the victim (Lev. i, 6), which belonged, when not burned (iv, 11), either to the priests (vii, 8; only said of the burnt-offering) or to the offerer (comp. the directions in the Talmud—Mishna, *Sebach*, xii, 2 sq.). So, too, among the Carthaginians (see the lists of offerings found in Marseilles, 3, 4, 8, 10). In Sparta the skins of public sacrifices belonged to the kings (Herod. vi, 57). The victim was cut to pieces (Lev. i, 6; viii, 20), which were, in various sacrifices, either all (as the burnt-offerings), or certain specially valued pieces (in all other offerings; comp. Isa. i, 11; Strabo, xv, 732; Catull. xl, 5), burned by the priest upon the altar. In the latter case the flesh belonged to the priests or to the sacrificer, or must be burned outside of the city. (On the ceremony of offering the doves, see Lev. i, 14 sq.; v, 8; comp. Hottinger, *De Sacr. Avium* [Marb. 1706].) The ceremonies of heaving and waving took place in some sacrifices either before or after the victim was killed. See HEAVE-OFFERING; WAVE-OFFERING.

5. The yearly expense of sacrifices, both by individuals and the whole people, was not trifling; yet householders had at hand most of the necessary offerings, and wood was brought from the forests. (On the limits within which wood was obtained for Temple use in the later age, see the Mishna, *Taanith*, iv, 5. For the trees used as sacrificial wood, see the tract *Tamid*, ii, 3.) Later, foreign princes who desired the favor of the Jews applied from their revenues a portion to public sacrifices (Ezra vi, 9; 1 Macc. x, 39; 2 Macc. iii, 3; ix, 16; Josephus, *Ant.* xii, 3, 3). (On a peculiar festival of carrying wood, see Josephus, *War*, ii, 17, 6. It was held in the beginning of the month Elul.)

6. As an expression of pious gratitude and of reverence towards Jehovah (Psa. lxxvi, 15; cx, 3; Sir. xxxviii, 4; comp. Matt. viii, 4; Acts xxi, 26), sacrifices were presented in abundance by the Hebrews through all antiquity, and he who offered none was accounted irreligious (Eccles. ix, 2; comp. Isa. xliii, 23 sq.). Oaths were made by the offerings (Matt. xxiii, 18), and in descriptions of golden antiquity the ideally magnified splendor of the sacrificial ritual appears (Isa. xix, 21; lvi, 7; lx, 7; Zech. xiv, 21; Jer. xvii, 26; xxxiii, 18), while the want of sacrifice is among the terrors of threatened exile (Hos. iii, 4). Yet the Israelites often forgot in the symbol the higher affection of the heart, and their offerings became an *opus operatum*. Accordingly the prophets occasionally give warning against overvaluing sacrifices, and strive to call forth a pious disposition, as more pleasing to God than they are, since in them the heart feels nothing (Isa. i, 11; Jer. vi, 20; vii, 21 sq.; Hos. vi, 6; Amos v, 22; Mic. vi, 6 sq.; comp. Psa. xl, 7; 1, 9 sq.; li, 18 sq.; Prov. xxi, 3; Matt. v, 23 sq.; Sir. xxxv, 1; comp. Plato, *Alcib.* ii, 150;

Diod. Sic. xii, 20; Ovid, *Heroid.* xx, 181 sq.; Seneca, *Benef.* i, 6; comp. Siebelis *Disput.* p. 121 sq.). Such representations do not justify us in denying to the older Israelites the anthropopathic view of sacrifices, and forcing upon ancient simplicity an artificial doctrine. Yet this is done by Bähr (*Symbol.* ii, 198 sq.; comp. Hoff, *Die mos. Opfer nach ihrer sim- u. vorbildl. Bedeut.* [Warsaw, 1845]), who, starting with the statement that offerings with blood were the germ of all (in reference to Lev. xvii, 11), finds in the Mosaic sacrifices the doctrine of symbolic substitution. "The offering and bringing near of the *nephesh*, or life, in the sacrificial blood upon the altar, as the place of the presence and revelation of God, is a symbol of the offering of the *nephesh*, or life, of the sacrificer to Jehovah. As this presentation of the blood is a giving-up to death of the animal life, so must also the spiritual life of self, as opposed to God, be given up and die. But since the giving-up is to Jehovah, the Holy One, it is not merely a *ceasing*, something negative, but a dying, which in the very act is a becoming alive," etc. Apart from all the assumption in this theory, it is entirely too artificial, one might say too Christian, for Israelitish antiquity. It is necessary, too, to assume that the sacrifices with blood were the original ones, which is not proven; and the doctrine cannot be extended without violence to any but sin-offerings (see Kurtz, *Mos. Opfer*, p. 7 sq.), in which it cannot be denied that the idea of substitution is found.

In the period after the exile arose the Essenes, who went further than the prophets, and retained of the outward ritual only the lustrations, not offering sacrifices at all (Josephus, *Ant.* xviii, 1, 5). It is well known that all the ceremonial of sacrifice has been given up by the Jews, since they no longer possess the Temple mountain; yet the Samaritans still yearly offer seven lambs on Mount Gerizim at the Passover (Robinson, iii, 98 sq.). See OFFERING.

The fact that every individual who brought a sacrifice had to be present in the Temple when it was offered gave rise to the opinion that the daily morning and evening sacrifices which were brought for the whole congregation of Israel required that the congregation should be represented in the Temple at the offering of these national sacrifices. Hence the whole people was divided into twenty-four divisions or orders, corresponding to the divisions of the priests and Levites. Every division chose a number of representatives (*אנשי המצטרף*), one of whom was appointed chief (*המזכיר*), and in turn sent up some of them as a deputation to Jerusalem to represent the nation at the daily sacrifices in the Temple, and pronounce the prayers and blessings in behalf of the people while the sacrifices were offered. They had also to fast four days (i. e. the second, third, fourth, and fifth day) during the week of their representation. Those of the representatives who remained at home assembled in a synagogue to pray during the time of sacrifice. See TEMPLE.

It will be observed from the above notices that there was one grand point of difference between the Jews and the heathens: the sacrificial rites of the former were never stained with human blood, than which nothing could be conceived more abhorrent to all the attributes of Jehovah (Jephthah's daughter is no exception, for it cannot be proved with certainty that she was sacrificed; on the contrary, many interpreters think that she was solemnly dedicated to the service of God). But the testimony of innumerable writers proves that no heathen nation has been free from human sacrifices; such having occurred, even among civilized people, at some period of their history, especially on some great occasion, to expiate a great sin or avert some dreadful calamity. Even to this day among the Hindus, whose tenets forbid blood-shedding, human self-immolations, or sacrificial suicides, are common. Another point of difference is found in the animal sacrifices, which, among the heathens, were frequently of such as were particu-

larly forbidden in the Mosaic law—unclean animals and beasts of prey; such as dogs offered to Hecate, swine to Mars (in the *Suovetaurilia*), and wolves to Apollo. Heathens in their sacrifices poured oil over the beast, which the Jews did not; they (the former) burned only a portion of the frankincense presented; the Jews burned all. The Greeks offered honey to the sun; in Jewish sacrifices it was forbidden; and the Sabian idolaters ate the blood of their sacrifices, which Maimonides thinks was one of the reasons why it was so particularly prohibited to the Jews. Their bread-offerings also were leavened. Some points of similarity are to be found between the Jewish and heathen sacrifices. The heathens brought their victims to the temples, chose them without blemish, poured out libations of wine, cut the animal's throat, flayed and dissected it, caught the blood in a vessel, and poured it on and round the altar; and they used salt by mixing some with meal, and sprinkling it on the head of the animal, on which they also laid their hands. In the early times the sacrifice was burned whole, the skin being given to the priest; but later, part only was consumed and the rest given to the sacrificers (if it was an eatable animal) to feast upon. The thighs and fat were the share of the gods. The victims among the Greeks and Romans were crowned with garlands and adorned with fillets and ribbons, and the horns of large animals were gilded. None of these decorations are enjoined in the Jewish sacrifices. See SACRIFICE.

Roman Sacrifice of the *Suovetaurilia*.

Sacrilege (*ἱεροσολέω*, to rob a temple, Rom. ii, 22; so the noun *ἱεροσολος*, "robber of churches," Acts xix, 37), the violation or profanation of holy places, persons, or things. Though the word sacrilege is not used elsewhere than as above in our version of the canonical Scriptures, yet we find the crime itself often alluded to; e. g. "profaning the sanctuary" (Lev. xxi, 22), "profaning hallowed things" (Lev. xix, 8), "profaning the covenant" (Mal. ii, 10). The first sacrilegious act we read of is that of Esau selling his birthright (Gen. xxv, 33), for which he is called "profane" by Paul (Heb. xii, 16). Instances of this under the Mosaic economy (which sternly forbade it [Exod. xxv, 14]) were the cases of Nadab and Abihu (Lev. x), the men of Bethshemesh (1 Sam. v), Uzzah (2 Sam. vi, 67), Uzziah (2 Chron. xxvi). The Jews at a later period of their history were eminently guilty in this particular, inasmuch as they withheld the tithes and offerings which God required of them (Mal. iii, 8-10), and converted his holy temple into a market (Matt. xxi, 12, 13). This profanation is forbidden in the Talmud (Lightfoot, *ad loc.*). See TEMPLE. Yet they pretended to be punctiliously scrupulous in their reverence for the interior building (Matt. xxvi, 61). So the grand accusation against Stephen was that he spoke disrespectfully of the Temple (Acts vi, 13). An uproar was excited against Paul in Jerusalem on the charge that he brought Greeks into the Temple and polluted the holy place (Acts xxi, 28, 29), though daily profanations were

committed by the affected zealots with impunity. At length, in the closing scenes of Jerusalem, such were the multitude and the magnitude of the sacrileges that Josephus says if the Romans had not taken the city of Jerusalem he would have expected it to have been swallowed up like Sodom, or have had some other dreadful judgment. The jealousy of the Almighty respecting things dedicated to him, and his punishment of the profanation of them, are alluded to by Paul (1 Cor. iii, 17): "If any man defile the temple of God, him shall God destroy; for the temple of God is holy, which temple ye are." We read but little else in the N. T. pertaining to sacrilege except Paul's rebuke of the Corinthians for their profane conduct at the celebration of the Lord's supper (1 Cor. xi, 29). In that early period of the Christian Church, it had not been able as yet regularly to establish sacred places and things; but as soon as circumstances permitted, we shall find in the Church history of every nation a due respect for consecrated things, and laws for their preservation. Even the heathens, particularly the Greeks and Romans, were not without their rules concerning sacrilege, the penalty of which was usually death. Thus it was held sacrilege for the polluted to pass beyond the porch of the temple, to spit or wipe the nose in a temple, to cut down consecrated trees, to build upon or till any spot of ground where a thunderbolt had fallen, to suffer a man to witness the ceremonies of the Bona Dea, or Good Goddess, or to suffer a woman to enter the temple of Diana in the *Vicus Patricius* in Rome, to suffer a birth or death to occur in the holy isle of Delos, to steal anything belonging to a temple, to approach a sacrifice without being sprinkled by the priest with the lustral water, to consecrate a blemished man to the priesthood (compare with the Jewish law, Lev. xxi, 21), and many other instances which will occur to the classical reader.

SACRILEGE, CHRISTIAN VIEW OF. The ancient Church distinguished several sorts of sacrilege: 1st, the diverting things appropriated to sacred purposes to other uses; to break or burn the furniture of the Church, or deliver it to be broken or burned; 2d, robbing the graves or defacing and spoiling the monuments of the dead; 3d, those were considered as sacrilegious persons who delivered up their Bibles and the sacred utensils of the Church to the pagans in the time of the Diocletian persecution; 4th, profaning the sacraments, churches, altars, etc.; 5th, molesting or hindering a clergyman in the performance of his office; 6th, depriving men of the use of the Scriptures or the sacraments, particularly the cup in the eucharist, the last being condemned by Gelasius and pope Leo, and yet not recognised as sacrilege by the Romish casuists. See SACRILEGIUM. In England sacrilege is not now a legal, but a popular term, used to denote the breaking into a place of worship and stealing therefrom. The legal offence comes generally under the head of burglary or house-breaking. A less punishment applies to the offence when committed in dissenting chapels. In Scotland there is no increase of severity in the punishment by reason of the sacred character of the things stolen.

Sacrilegium, in Roman Catholic theology, is a term denoting contempt of God or of divine and holy things when expressed in act, the utterance of such feeling in speech being characterized by the word *blasphemy* (q. v.). This crime may be committed either directly against the holiest objects by unworthy partaking of the consecrated bread and wine or otherwise desecrating their character (*sacrilegium immediatum*); or indirectly against consecrated persons, things, or places (*sacrilegium mediatum*). The latter form is consequently either *personale*, incurred through violation of the

privilegium canonis, or assault on the persons of individuals belonging to the clerical and monastic orders [see *PRIVILEGIUM CANONIS*], with intent to do bodily harm, or through violations of the law of chastity by persons of rank in such orders (*sacrilegium carnale*); or it is *sacrilegium reale*, consisting in the employment of sacred edifices and their decorations, vessels, utensils, etc., for common or even wicked purposes; the purloining of things which have been set apart for the use of a church by consecration or benediction (q. v.), or which have been placed in a church for protection and safe-keeping; the alienating from or denying to the Church of legal and customary revenues; the voluntary transfer of objects used in the worship and other services of the Church to the enemies of Christianity, particularly in times of persecution, etc.; and the receiving of any "sacrament of the living" (q. v.) while in a state of mortal sin, and without having previously been absolved: or, lastly, the *sacrilegium* is *locale*, and may be committed by consciously violating an ecclesiastical asylum [see *ASYLUM*], by breaking a local interdict (q. v.) with armed force, by desecrating holy places with murder, the guilty spilling of human blood or human sperm, the interment of unbelievers and excommunicated persons in churches and burial-grounds belonging to the Church, etc.

The punishments denounced against this crime have been severe under every code. According to the canon law, sacrilege committed against the *venerabile* itself was visited with the anathema; against other sacred things, with the ban; and in case of obstinate contumacy, with the denial of Christian burial (c. 2, x, "De Rapt." v, 17; c. 22, x, "De Sent. Excomm." v, 39). The Roman law punished robbery of churches, unless mitigating circumstances intervened, with death (*Inst.* § 9, "De Publ. Jud." iv, 18). The criminal code of Charles V decreed the punishment of death by fire against the theft of a *monstrance* or a *ciborium* (q. v.) containing the host, and death in a milder form against the theft of other sacred objects belonging to the altar and used in worship. Plundering an alms-chest might be punished by either corporal inflictions or death, and the abstraction of unconsecrated objects from churches and sacristies (unless accompanied with violence or committed at night) by the infliction of penalties denounced upon ordinary burglaries (CC. C. of 1532, art. 172-175). The more recent administration of criminal law in Germany likewise invariably imposes severe penalties upon crimes committed against the Church. Licentiousness on the part of clergymen belonging to the higher orders is punished by suspension and penances; if committed by monks, by confinement and severe penances. The violator of a nun, if a clergyman, is deposed [see *DEPOSITION*]; if a layman, is excommunicated; and the nun herself is subjected to close confinement and mortifications of the body (c. 6, 21; c. xxvii, qu. i). Under the Roman law the violator of a consecrated female was beheaded (lib. 2, cod. "De Episc. et Cler." i, 3, Nov. 123, c. 43), and this penalty was retained under the code of the German empire.

Sacring-bell (*campanella, timbele*) was rung at the elevation inside the church, in England, by the Constitutions of Cantelupe in 1240, as a warning of devotion. Becon says while the elements were blessed the serving-boy or parish clerk rang the little sacring-bell, at which the people knelt down while the host was elevated. The second sacring was the crossing of the chalice with the host. The custom has been attributed to cardinal Grey when legate in Germany, cir. 1203; it was confirmed by Gregory IX in 1259. At the beginning of the 13th century, at Paris, the bells were rung at this time. The Armenians use a cymbal, with little bells, called the *quechouez*. A sacring-bell was found in the wall of Deddington church, and that of Hawstead still hangs above the roodscreen. The use of this bell has been traced back to the 11th

century; and before 1114, Ivo, bishop of Chartres, thanked queen Maud of England for the bells which she had given to Chartres, and says they were rung at the elevation. The custom is confined to Western Christendom, and is unknown at Rome. In Spain they use a melodious peal of bells, which chime a silvery music, instead of the ordinary tinkling of a single bell, at the moment of consecration, when the divine words of institution are recited by the celebrant; and, at the elevation of the host, Aubrey mentions that at Brokenborough, Wilts, there were eighteen little bells rung by pulling one wheel. Such wheels, it is believed, are still preserved at Yaxley and Long Stratton. In the Roman Church it is rung thrice at the *Sanctus*, once before and three times at the elevation of the host, three times at the elevation of the chalice, and at the *Domine non sum dignus*, and once before the *Pater* (the latter dating from the 16th century), and also at benediction with the sacrament.

Sacris solemnibus JUNCTA SINT GAUDIA is the beginning of a festival hymn composed by Thomas Aquinas, of which the first stanza runs thus:

"Sacris solemnibus juncta sint gaudia,
Et ex præcordiis sonent præconia;
Recedant vetera, nova sint omnia,
Corda, voces, et opera."

There is an English translation by Chambers in the *Lyra Eucharistica*, p. 70:

"Let this our solemn feast
With holy joys be crowned," etc.;

and another by Caswall in *Hymns and Poems, Original and Translated*, p. 54:

"Let old things pass away,
Let all be fresh and bright," etc.

There is also a German translation of this hymn in Büssler's *Auswahl altchristlicher Lieder* (Berlin, 1858), p. 116, and a second one in Rambach, *Anthologie christlicher Gesänge*, i, 311. (B. P.)

Sacristan. (1.) The monastic treasurer and churchwarden. He provided all the necessities for divine service; was keeper of the church keys, relics, fabric, plate, furniture, and ornaments; secretary, and chancellor. He arranged the way of processions for the præcentor, superintended the bell-ringers, and received the rents, oblations, and burial-fees. At Canterbury he delivered the crosier to the new archbishop. At Ely he received the candle-corn (one sheaf of corn in every acre), to supply the lights, and, as the bishop's vicar, exercised archidiaconal jurisdiction over the city chaplains. At Peterborough his fee were the horses of a knight buried in the minster, if under four marks in value, otherwise they accrued to the abbot; and at Worcester, the abbots of Gloucester, Tewkesbury, Pershore, and Evesham gave him a cope of profession at their benediction. (2.) Vice-custos, the vicar of the treasurer, or sub-treasurer at York in 1230. He opened the doors of the sacristy in the morning, admitted the rectors of choir and sick members who desired to say the Hours privately. He warned canons of chapter, kept the doors shut during its session, rang the bells, and led the procession. Bishop Storey mentions the use of the word *sacrist* in an inferior sense as recent in the 15th century. Where there was no permanent sacristan in a cathedral, a canon was appointed, called præfect of sacristy. In the *Decretals* of Gregory IX and at Lyons (1269) the sacrist was the inferior of the sacristan. In the new foundations he furnished the sacred elements, administered sacraments, officiated at marriages and burials, was the curate of the chapter, like the foreign *parochus*, and had charge of the bells, church goods, furniture, and lights. At Girgenti there are four sacristis; at Mayence he was a vicar, and at Angers a cubicular, or chamberlain, who administered the sacraments to sick canons and the choir clergy. (3.) The sacristan at mass has charge of the vessels, and attends in a surplice at the credence-table, which is placed on the

south side of the altar, and arranges on it the chalice, covered with the linen cloth called the purifier; and also the paten, which is covered with a stiff cloth and a rich veil of silk; the cruets for wine and water; the Gospel and Epistle books; the ewer, basin, and water for washing the celebrant's fingers; the corporal, or cloth on which the chalice and host are placed, and contained in a burse, or embroidered case; a crucifix, and two tapers. (4.) A church servant, now called sexton.

Sacristy, an apartment in a church or convent in which are kept the sacred objects used in the public worship, and in which the clergy and other public functionaries who take part in the service assemble and prepare for the ceremonies on which they are about to enter. In many churches the sacristy is a spacious and costly building.

Sacrobosco, Christopher, a native of Dublin, Ireland, in the early part of the 17th century, is chiefly known as the author of the work *Defensio Decreti Tridentini et Sententiæ Rob. Bellarmini et Authoritæ Vulgatæ Editionis Latine contra Whitakerum*, etc. (1604, 8vo).

Sacrobosco (or HOLYWOOD), **John de**, an English ecclesiastic of the 13th century, is supposed to have been born at Halifax, in Yorkshire, but is claimed also as a native of Ireland and Scotland. He became a canon regular of the Order of St. Augustine in the monastery of Holywood, in Nithsdale. He afterwards went to Paris, and became professor of mathematics. His death occurred in 1256. His principal work was *Sphæra Mundi* (1648, 8vo). Other works were, *De Anni Ratione, seu de Computo Ecclesiastico*:—*De Algorismo*.

Sacy, Antoine Isaac Silvestre de, Baron, a celebrated French Orientalist, was born at Paris Sept. 21, 1758. At an early age he showed great aptitude for the study of languages; but it was mainly from self-instruction, with the help of irregular private lessons, that his immense learning was acquired. In Hebrew he was helped by a Jew; in Arabic, by a Benedictine monk, Berthereau. Having entered upon the practice of the law at the age of twenty-three, he retired in 1789, at the age of thirty, and devoted several years to private study. During the Reign of Terror, he lived very humbly among peasants, and could make but furtive visits to the libraries of Paris. Early in his learned career he had opened correspondence with the chief Orientalists of Europe—with J. D. Michaelis, Sir Wm. Jones, Eichhorn, and others. To Eichhorn's *Repertorium* he contributed frequent essays. In France he published in 1785 an essay on the origin of Arabic literature, and in 1787 an abridgment of the *Natural History* of Demiri. Still more valuable and erudite was his work *Mémoires sur Diverses Antiquités de la Perse* (1798). In 1792 he was made a member of the Académie des Inscriptions; and when, in 1795, the Convention founded a school for the study of modern Oriental languages, De Sacy was made professor of Arabic, a post which he held till his death. In 1806 he became also professor of Persian at the Collège de France. From this time he was very productive in all the branches of Oriental learning. Many of his works have had a very fruitful influence upon Biblical criticism. We mention particularly a translation of Makrisi's treatise *On Mohammedan Medals* (1797):—*The Outlines of Universal Grammar* (1799):—his *Chrestomathie Arabe* (1806, 3 vols.):—his large *Arabic Grammar* (1810):—*Calila-re-Dimna*, the Arabic text of the *Fables* of Pilpay (1816):—the *Pend-Naméh* (Book of Counsels), a Persian didactic poem (1819):—*The Sessions of Hariri*, a romance in Arabic (1821):—and his work *On the Religion of the Druids* (1838, 2 vols.). The amount of learning which these works contain and imply can only be appreciated by Oriental specialists. Besides the works mentioned, he contributed scores of essays to learned journals in Germany and elsewhere. His style is simple and direct. The chief

defect is a lack of poetic delicacy and of rhetorical polish. De Sacy, though beginning his career in obscurity, was finally abundantly honored. In 1808 he was given the honorary position of membership in the *Corps Législatif*. In 1813 he was made a baron. In 1814 he became rector of the University of Paris. After the Revolution of 1830 he was made a peer of France and a grand officer of the Legion of Honor. Honors from abroad also came upon him in abundance. He founded chairs for the Sanscrit and the Chinese language at the Collège de France; and he continued his public lectures, six per week (an unusual number for a Parisian savant) down to the day of his sickness. In politics he was conservative, in character upright, in religion Catholic. On Feb. 19, 1838, he was stricken with apoplexy on the street, and died three days after. See two biographical sketches in the *Zogel Asiatique*, 1838; *Encycl. Brit.* vol. xix; Herzog, *Real-Encyklop.* xiii, 287-289. (J. P. L.)

Sacy, Louis Isaac le Maistre de, an eminently pious and learned Port-Royalist divine and Biblical critic, was born at Paris in 1613. He was shut up in the Bastille on account of his Jansenist doctrines, and died in 1684. The New Test. translated by De Sacy, and known as the Testament de Mons, was condemned by pope Clement IX in 1668. De Sacy's version of Thomas à Kempis's *De Imitatione* has had 150 editions. His commentary on the Scriptures has continued to maintain a high character. It is essentially valuable for unfolding the spiritual meaning of the sacred text. De Sacy was assisted in the work by Du Fossé, Charles Huré, and Le Tourneaux. Many editions have been printed, both of the original work and of abridgments. The edition of 1692 is the best; that of 1705-30, bound variously in 40, 45, or 54 vols. 12mo, is esteemed for its convenient form; that of 1781, printed at Nismes, in 25 vols. 8vo, has the advantage of being edited, with additions, by Rondet. De Sacy also wrote *Lettres Chrétiennes et Spirituelles* (Paris, 1690, 2 vols. 8vo).

Sadami'as (Vulg. *Sadamias*, the Greek original being lost), given in the Apocrypha (2 Esdr. i, 1) instead of SHALLUM (q. v.) in the ancestry of Ezra (Ezra vii, 2).

Sadanana (*the god with six faces*), in Hindû mythology, is a surname of the twelve-handed Skanda, who was born to Shiva the Destroyer by the two sisters Ganga and Ulma. Sadanana slew the giant Torake by cutting him through the middle, and then transformed half of the body into a peacock, upon which he rides. He is greatly revered in India, and has many pagodas.

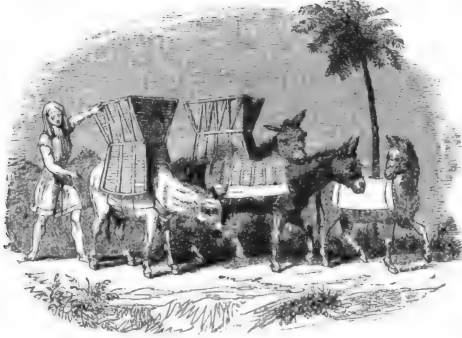

Sa'das (Σαδᾶς v. r. Ἀσάι, Ἀργαί), a corrupt Græcized form (1 Esdr. v, 13) of the name AZGAD (q. v.) of the Heb. text (Ezra ii, 12).

Saddæ'us (or rather *Daddæ'us* [as in 1 Esdr. viii, 46], Δαδδαῖος, v. r. Δολδαῖος, Λοδδαῖος, and Λοδαῖος), a corrupt Græcized form (1 Esdr. viii, 45) of the name INDO (q. v.) of the Hebrew text (Ezra viii, 17).

Saddle (מֶרְכָבָה, *merkáb*, a "chariot" [1 Kings iv, 26; Heb. v, 6]; also a *seat* in a chariot or other vehicle, "saddle" [Lev. xv, 9]; "covering" of a palanquin [Cant. iii, 10]). See CHARIOT.

The word which our translators elsewhere (Gen. xxii, 3; Numb. xxii, 21; Judg. xix, 10; 2 Sam. xvi, 1; xvii, 23; 1 Kings ii, 40; xiii, 13, 23, 27; 2 Kings iv, 24) render by "to saddle" literally signifies "to bind about" (as Exod. xxix, 9; Jon. ii, 6, and often)—namely, with the bags or panniers used for riding or carrying burdens. It is certain that saddles were unknown for many ages after the custom of riding had been introduced. Those who did not ride bareback were contented with placing a piece of leather or cloth between them and their steed. As luxury advanced, a soft cushion was introduced, to these were added various ornamental trappings, and these were soon carried to a ridiculous excess

of ostentation. Saddles, properly so called, were in all probability invented by the Persians, perhaps for the sake of giving a steady seat to their mounted archers, a part of their military force to which they always paid the greatest attention. Pack-saddles must have been a much earlier invention, for something was obviously

Ancient Egyptian Saddles.

necessary to prevent the backs of animals bearing heavy burdens from being chafed by the loads (see Kitto, *Pict. Bible*, at Judg. xix, 10). See ASS; CAMEL; HORSE. The ordinary pack-saddles of the camels were high, and made of wood; carpets, cloths, etc., were heaped upon it, to form a comfortable seat for ladies who do not use the cradle, or hamper, while travelling. The cloths, etc., were removed at the end of the day's journey, and, being laid on the ground, served as a sort of mattress in the tent, on which a person might sit or lie down, while he reclined against the pack-saddle itself (Gen. xxxi, 34).

Sad'duc (or rather *Saddu'cus*, Σάδδουκος, v. r. Σαδδούλουκος), the Græcized form (1 Esdr. viii, 2) of the name of ZADOK (q. v.), the high-priest, one of Ezra's ancestors (Ezra vii, 2).

Sad'ducee (strictly *Sadduce'an*, Σαδδουκαῖος [Matt. iii, 7; xvi, 1, 6, 11, 12; xxii, 23, 34; Mark xii, 18; Luke xx, 27; Acts iv, 1; v, 17; xxiii, 6, 7, 8]), the usual designation of one of the three sects or orders of Judaism in the time of Christ, the other two being the Essenes and the Pharisees. They were originally a religious party, if such free-thinkers could fairly be so designated. See SECTS, JEWISH.

I. *Name of the Sect and its Signification.*—According to the current tradition of the Jews, the appellation Σαδδουκαῖος, *Saddukim*, of which Σαδδουκαῖος = *Sadducei* is the Greek form (used by Josephus and the New Test. as above), is derived from Zadok, the name of the founder of this sect, who was a disciple of Antigonus of Soho, B.C. 200–170. See SCHOOL. This is not only declared in the *Aboth di Rabbi Nathan* (cap. v), but by Saadia Gaon, 892–942 A.D.; by R. Nathan (cir. 1030–1106 A.D.), in his lexicon called *Aruch*, s. v. בריהוסיך; by Maimonides (1135–1204 A.D.), in his commentary on *Aboth* (i, 8), but by the greatest Jewish authorities since the 9th century of the Christian æra. Dr. Geiger, who, in his *Urschrift und Uebersetzungen der Bibel* (p. 105), argues in a most elaborate manner that there are not sufficient historical data for deriving the name Sadducee from Zadok, a disciple of Antigonus of Soho, derives it, nevertheless, from this proper name, which he assigns to another person of an earlier date, as will be seen in the sequel. Epiphanius, however, seems to derive it from a double source—viz. from a proper name *Zadok*, and from the Hebrew noun צַדִּיק, *righteousness*. He says that they call themselves Sadducees because this name is derived from *righteousness*, as *Zedek* denotes *righteousness* (Ἐπονομάζουσιν ἑαυτοὺς Σαδδουκαῖους ὅτις ἐκ τοῦ δαικαίου τῆς ἐπικλήσεως ὀρμωμένης· σεδὶκ γὰρ ἐρμηνεύεται δαικαίου), and that there was also anciently a priest named *Zadok*, but they did not continue

in the doctrines of their (ἐπιστάρτης) chief (*Adversus Hæreses*, i, 14). Dr. Löw rejects altogether the derivation of Sadducee from the proper name *Zadok*, for the following reasons: (1.) Because there is no precedent in the whole ancient Jewish history for the followers of a sect to be called by the name of the chief of the sect, and that it is as contrary to the genius of the Hebrew if צַדִּיק is taken as the proper name צַדִּיק, with י appended, to translate it a follower of *Zadok*, as it would be to render ירבעמי, a follower of *Jeroboam*. (2.) The older Talmudic literature knows nothing of *Zadok* and *Boethus*, the supposed originators of the Sadducees. (3.) The Sadducees, as is evident from ancient sources, called themselves צַדִּיקִים, the *righteous* (Epiphanius, *Adversus Hæreses*, i, 1, 4). Hence Dr. Löw concludes that, in harmony with his Hebrew name צַדִּיק, the Sadducee called himself in Greek εὐθύς, the straightforward, open, honest, righteous, and that the opponents of this sect changed both the honorable Hebrew appellation צַדִּיקִים into צַדִּוּקִים (hence the singular צַדִּוּק = *Sadducee*), and the Greek name εὐθύς, which is written in Hebrew אַבְרָהָם (according to the analogy of אַבְרָהָם = εὐεργής),

into בִּרְיָהוּס, from which originated בִּרְיָהוּסִים, *Boethusians*. He moreover maintains that it is for this reason that the Talmud makes no distinction between the Sadducees and the Boethusians (*Ben-Chananja*, i, 346 sq.). This definition of the appellation *Sadducee* is entirely speculative, and its soundness must be determined by an examination of the rise, progress, and doctrines of the Sadducees. Besides, the first objection against the derivation of צַדִּיק from the proper name צַדִּיק is set aside by the fact that the first Karaites called themselves עַנְנִיִּים, followers of *Anan*, *Ananites*; so that עַנְנִי, an *Ananite*, is an exact parallel to צַדִּיק, a *Zadokite*. Still more speculative, and altogether unique, is the opinion of Köster that "*Sadducee* is simply a different form of *Stoic*" (*Studien und Kritiken*, 1837, p. 164). According to some readings the Sadducees also called themselves קְרָאִים, *Scripturalists*, *Bible-followers*, *Karaites* (*Megilla*, 24 b; *Jerusalem Megilla*, iv, 9), because they adhered to the written law. This is in perfect accordance with the ancient custom of calling a Biblical student by the honorable Hebrew appellation קְרָא (formed according to the analogy of קָרָא); or by the Aramaic form קְרִי (defective of קְרִי), or קְרִי, formed according to the analogy of קְרִי. Thus Chanina, Abba Chalfai, Eliezer ben-Simon, and Levi ben-Sisi, were designated by this title (*Taanith*, 27 b; *Baba Bathra*, 123; *Midrash Rabba on Levit.* cap. xxx; Jalkut, *On the Song of Songs*, § 533); and the Talmud tells us that those were deemed worthy of this name "who understood how to read accurately the law, the prophets, and the Hagiographa" (comp. *Kiddushin*, 42; Fürst, *Karæerthum*, p. 129).

II. *Scripture Notices.*—Although frequently mentioned in the New Test. in conjunction with the Pharisees, they do not throw such vivid light as their great antagonists on the real significance of Christianity. Except on one occasion, when they united with the Pharisees in insidiously asking for a sign from heaven (Matt. xvi, 1, 4, 6), Christ never assailed the Sadducees with the same bitter denunciations which he uttered against the Pharisees; and they do not, like the Pharisees, seem to have taken active measures for causing him to be put to death. In this respect, and in many others, they have not been so influential as the Pharisees in the world's history; but still they deserve attention, as representing Jewish ideas before the Pharisees became triumphant, and as illustrating one phase of Jewish thought at the time when the new religion of Christianity, destined to produce such a momentous revolution in the opinions of mankind, issued from Judæa.

The Sadducees are not spoken of at all in the fourth Gospel, where the Pharisees are frequently mentioned (John vii, 32, 45; xi, 47, 57; xviii, 3; viii, 3, 13-19; ix, 13); an omission which, as Geiger suggests, is not unimportant in reference to the criticism of the Gospels (*ut sup.* p. 107). Moreover, while Paul had been a Pharisee and was the son of a Pharisee, while Josephus was a Pharisee, and the Mishna was a Pharisaical digest of Pharisaical opinions and practices, not a single undoubted writing of an acknowledged Sadducee has come down to us, so that for an acquaintance with their opinions we are mainly dependent on their antagonists. This point should always be borne in mind in judging their opinions and forming an estimate of their character, and its full bearing will be duly appreciated by those who reflect that even at the present day, with all the checks against misrepresentation arising from publicity and the invention of printing, probably no religious or political party in any country would be content to accept the statements of an opponent as giving a correct view of its opinions.

III. *The Tenets and Practices of the Sadducees.*—To apprehend duly the doctrines and usages of this sect, it must be borne in mind that the Sadducees were the aristocratic and conservative priestly party, who clung to their ancient prerogatives and resisted every innovation which the ever-shifting circumstances of the commonwealth demanded; while their opponents, the Pharisees, were the liberals, the representatives of the people—their principle being so to develop and modify the Mosaic law as to adapt it to the requirements of the time, and to make the people at large realize that they were “a people of priests, a holy nation.” Thus, standing immovably upon the ancient basis, the Sadducees, whose differences were at first chiefly political, afterwards extended these differences to doctrinal, legal, and ritual questions.

A. *Political Opinions.*—The primary political difference between the two sects was that the Sadducees maintained that a man's destiny is in his own hands, and that human ingenuity and statecraft are therefore to be resorted to in political matters; while the Pharisees clung to the conviction that the political relations with foreign nations, like the theocracy at home, are under the immediate control of the holy one of Israel (Josephus, *Ant.* xiii, 5, 9; xviii, 1, 4, with *War*, ii, 8, 14; Mishna, *Berachoth*, 33 b; *Nidah*, 16, 72). That the Sadducees, who were the real aristocracy (Josephus, *Ant.* xviii, 1, 4) and the successful warriors in the Maccabean struggles (*ibid.* xiii, 16, 2; *War*, i, 5, 3), should have espoused such political views was the natural result of their political success. Moreover, the doctrine that what a man possesses is what he deserves was peculiarly gratifying to the successful and aristocratic caste. Besides, in this respect, as in all other matters, the Sadducees showed their conservatism in abiding by the Pentateuchal views that a man is rewarded in this world according to his deeds, and that prosperity and adversity are a test of piety and wickedness (*Deut.* xxviii, 1-68, with *Psa.* xxxvii, 25).

B. *Doctrinal Views.*—1. *Rejection of the Oral Law.*—Foremost among the doctrines of the Sadducees is the tenet that the Hebrew Scriptures, with the authoritative explanations and glosses which developed themselves in the course of time, are the sole rule of faith and practice, thus denying that there existed any orally transmitted law to supplement the written law, to which their opponents the Pharisees laid claim; or, as Josephus states it, “the Pharisees have given to the people many statutes from the traditions of the fathers which are not written in the law of Moses; and it is for this reason that the Sadducees reject them, saying that it is only the written observances which are binding, but those which are transmitted by the fathers are not to be observed” (*Ant.* xiii, 10, 6). For the better understanding of this important question, it must be remarked that the Pharisees and the orthodox Jews to the present day

have an oral law in addition to the written law. This oral law consists of sundry religious, ceremonial, and social practices which obtained in the course of time, and which were called forth either through the obscurity, conciseness, and apparent contradiction of some of the written enactments, or through the inapplicability of some of the Mosaic statutes to the ever-changing circumstances of the commonwealth. Some of the enactments contained in this oral code are undoubtedly as old as the original laws which they supplement and explain, so as to adapt them to exceptional cases not specified in the Mosaic law; others, again, were introduced by the spiritual heads of the nation after the return from the Babylonian captivity, because the altered state of the nation absolutely required these regulations, although there was no basis in the Mosaic law for them; while others originated in party feeling, to shield the pious against even approaching the limits of transgression. Now the *Sopherim* (i. e. scribes and the lawyers), after the Babylonian captivity, who found this accumulated traditional code, tried to classify and arrange it. Those practices which could be deduced from or introduced into the text of Holy Writ by analogy, combination, or otherwise, were regarded as the legitimate and authoritative traditional exposition of the law [see *MIDRASH*]; while those practices which obtained in the course of time, which were venerated and esteemed by the people both for their antiquity and utility, but for which neither author nor apparent reason could be found in the written law, were denominated *A traditional law of Moses from Sinai* (הלכה למשה מסיני), because from their antiquity and importance it was thought that they must have come down orally from the lawgiver himself. It is this oral law which the Sadducees rejected; and in their conservatism they adhered to the ancient Hebrew Scriptures, as well as to those time-honored explanations and practices (הלכות) which were not at variance with the text of the Bible. It must be distinctly borne in mind that by their rejecting traditions is not meant that the Sadducees rejected all the traditional comments upon the law and the ancestral practices not found in the Bible. Even the Talmud itself only charges them with rejecting some things (*Sanhedrin*, 33 b; *Horajoth*, 4 a), and there is but little doubt that those practices which they rejected were originated by the Pharisees, the liberal party whose innovations the conservative Sadducees disliked, and regarded as an encroachment upon their priestly and aristocratic rights. In the Mishna specific points of difference between the Pharisees and Sadducees are mentioned, which are unimportant—such, e. g., as whether touching the Holy Scriptures made the hands technically “unclean,” in the Levitical sense, and whether the stream which flows when water is poured from a clean vessel into an unclean one is itself technically “clean” or “unclean” (*Yadain*, iv, 6, 7). If the Pharisees and Sadducees had differed on all matters not directly contained in the Pentateuch, it would scarcely have been necessary to particularize points of difference such as these, which to Christians imbued with the genuine spirit of Christ's teaching (*Matt.* xv, 11: *Luke* xi, 37-40) must appear so trifling as almost to resemble the products of a diseased imagination. Indeed, it will be seen in the course of this article, from the enumeration of their distinctive tenets, that the theological views of the two sects were not so much at variance as might have been supposed, and that the Sadducees in many cases actually adhered to ancient traditions, while the Pharisees abandoned these traditions and introduced new statutes in order to raise the people, whose true representatives they were, to a nation of kings and priests. See *TRADITION*.

That the Sadducees also rejected the prophets and Hagiographa, and only believed in the Pentateuch, as is asserted by Epiphanius (*Adversus Hæreses*, xiv), Origen (*Cels.* i, 49), Jerome (*Comment. on Math.* xxii, 31-33), and followed by some modern writers, is utterly

at variance with the Jewish records of this sect, and has evidently arisen from a confusion of the Sadducees with the Samaritans.

2. *Denial of the Resurrection, etc.*—Next in importance in point of doctrine is their eschatology. The Sadducees denied that the dead will rise to receive their reward and punishment. Josephus, who specifies this second cardinal difference between the Pharisees and the Sadducees, describes their respective doctrines of a future reward and punishment in such a manner as to infer that the former, believing in a future judgment, also believed in the immortality of the soul; while the latter, by denying a future judgment, also denied the survival of the soul after the death of the body (*Ψυχῆς τετὴν διαμονὴν καὶ τὰς κατ' ἄδον τιμωρίας καὶ τιμὰς ἀναρροῦσι* [*War*, ii, 8, 14]). In another place, again, where this historian mentions the distinctive eschatological views of the Sadducees, he plainly says, "Their doctrine is that souls perish with the bodies" (*Σαδδουκαῖοις δὲ τὰς ψυχὰς ὁ λόγος συναφανίζει τοῖς σώμασι* [*Ant.* xviii, 1, 4]). But in the Talmud and in the New Test. we are told that they simply denied the resurrection (comp. *Sanhedrin*, 90 b with Luke xx, 27; Mark xii, 18; see also Matt. xxii, 23), which by no means involves the immortality of the soul; and it cannot be supposed that if the Sadducees had actually denied the immortality of the soul, so vital a point would be passed over in silence by the Talmudic doctors, when unimportant differences are minutely specified. There can, therefore, be no doubt that Josephus, in his vanity to depict to the Greeks the Jewish sects in such colors as to make them correspond to the different philosophical schools among the Greeks, did injustice to the Sadducees by assigning to them the doctrines of the Stoics. The misrepresentation of the Sadducees will appear all the more evident when it is borne in mind how defectively Josephus describes the Pharisaic eschatology in the very same section. He there represents the Pharisees, who were his own party, as believing that the resurrection is to be confined to the righteous, while the wicked are to be detained in everlasting punishment in Hades under the earth (*Ant.* xviii, 1, 3); whereas it is well known that this opinion was only entertained by some of the later doctors, while the Pharisees generally believed in the resurrection of both the righteous and the wicked (*Dan.* xii, 2), and this was the common doctrine as late as the second book of Maccabees (comp. xii, 40-45). The reason which the Sadducees assigned for not believing in the resurrection of the dead to receive their reward and punishment is that it is not taught in the law of Moses (*Sanhedrin*, 90 b), which simply promises temporal rewards and punishments for obedience and disobedience (*Exod.* xx, 12; xxiii, 25, 26; *Deut.* vii, 12-15; xxviii, 1-68). The very quotation made by our Saviour (*Matt.* xxii, 31, 32; *Mark* xii, 26, 27; *Luke* xx, 37) of *Exod.* iii, 6, 15, which it is only natural to suppose is the most cogent text in the law, nevertheless does no more than suggest an inference on this doctrine. The Sadducees, however, did not admit the inference, and they simply regarded this mode of proving the resurrection from the law as Pharisaic, as they were in the habit of hearing similar inferences deduced by the Pharisees from other passages. Thus the Talmud relates: "The Sadducees asked Rabbi Gamaliel, Whence do you know that the holy one, blessed be he, will raise the dead? To which he replied, From the law, the prophets, and the Hagiographa: from the law because it is written, 'And the Lord said to Moses, Behold, thou shalt lie down with thy fathers (*וְיָסְדָּהוּ אִתְּךָ אֲבֹתֶיךָ*), and this people shall rise again' (*Deut.* xxxi, 16): from the prophets because it is written, 'Thy dead men shall live,' etc. (*Isa.* xxvi, 19); and from the Hagiographa because it is written, 'And the roof of thy mouth,' etc. (*Song of Songs*, vii, 9). The Sadducees, however, would not accept these passages till he quoted the passage, 'The land which the Lord swore unto your fathers to give it to

them' (*Deut.* xi, 21). He promised it to them (*לָהֶם*)—i. e. to the living, and not to the dead; but as they were now dead, it is evident that there will be a resurrection if the promise is to be fulfilled" (*Sanhedrin*, 90 b).

We are also told in the New Test. that the Sadducees say that there is "neither angel nor spirit" (*Acts* xxiii, 8); but this can by no means imply that they altogether denied the existence of angelic and spiritual beings, since the Sadducees were firm believers in the divinity of the Mosaic law, where the appearance of angels is again and again recorded (*Gen.* xvi, 7; xix, 1; xxii, 11; xxviii, 12; *Exod.* xxiii, 20; *Numb.* xxii, 23 et al.), and neither Josephus nor the Talmudic writings charge them with this unbelief. What they denied is the incarnation and manifestation of *dæmoniac* powers and angelic beings in later days, as believed and described in the Jewish writings and in the New Test.

3. The opinions of the Sadducees respecting the *freedom of the will*, and the way in which those opinions are treated by Josephus (*Ant.* xiii, 5, 9), have been noticed elsewhere. See PHARISEES. It may here be added that possibly the great stress laid by the Sadducees on the freedom of the will may have had some connection with their forming such a large portion of that class from which criminal judges were selected. Jewish philosophers, in their study, although they knew that punishments as an instrument of good were unavoidable, might indulge in reflections that man seemed to be the creature of circumstances, and might regard with compassion the punishments inflicted on individuals whom a wiser moral training and a more happily balanced nature might have made useful members of society. Those Jews who were almost exclusively religious teachers would naturally insist on the inability of man to do anything good if God's Holy Spirit were taken away from him (*Psa.* li, 11, 12), and would enlarge on the perils which surrounded man from the temptations of Satan and evil angels or spirits (*1 Chron.* xxi, 1; *Tob.* iii, 17). But it is likely that the tendencies of the judicial class would be more practical and direct, and more strictly in accordance with the ideas of the Levitical prophet Ezekiel (*xxxiii*, 11-19) in a well-known passage in which he gives the responsibility of bad actions, and seems to attribute the power of performing good actions exclusively to the individual agent. Hence the sentiment of the lines,

"Our acts our angels are, or good or ill,
Our fatal shadows that walk by us still,"

would express that portion of truth on which the Sadducees, in inflicting punishments, would dwell with most emphasis; and as, in some sense, they disbelieved in angels, these lines have a peculiar claim to be regarded as a correct exponent of Sadducean thought. Yet perhaps, if writings were extant in which the Sadducees explained their own ideas, we might find that they recognised these principles, as we may be certain that Ezekiel did, with other passages apparently of a different import in the Old Test., and that the line of demarcation between them and the Pharisees was not, in theory, so very sharply marked as the account of Josephus would lead us to suppose.

C. *Legal Matters.*—1. The Sadducees restricted the *Levirate law* to cases of betrothal (*אֲרוּסָה*), but denied its obligation when the marriage was consummated (*נִשְׁאוּתָה*). Thus, for instance, though they regarded a betrothed woman (*אֲרוּסָה*) as a *wife*, and treated her as a married woman in accordance with the Mosaic legislation [see MARRIAGE], yet, when her betrothed husband died without cohabiting with her, his surviving brother could perform the duty of *Levir* without committing incest, as she was still a virgin. In this respect, too, the Sadducees, as the erudite Geiger has shown, followed the ancient *Levirate law*, which is based upon *Gen.* xxxviii, 7-10, and which—inferred from the similarity of expression used in ver. 7 and 10 that Er too had acted wickedly and not properly con-

summed the marriage with Tamar—enacted that the Levir is only then to perform the duty towards his deceased brother when the marriage has not been consummated (*Yebamoth*, 34 b; *Beresith Rubba*, lxxv.; Geiger, *Jüdische Zeitschrift* [Breslau, 1862], i, 30, etc.). It is to be remarked that the Samaritans of old restricted the Levirate law (Deut. xxv, 5, etc.) in the same manner, and that the Talmud which records it tells us that in support of this restriction the Samaritans appealed to the expression *הוהצרה*, which they translated *outer*, and regarded as the adjective of *חמה*, construing it with the preceding *חמה*, while they took *הוהצרה* as explicative of the preceding by way of repetition, translating the whole passage “The wife of the deceased who is outside (i. e. the consummation of the marriage) is not to be for another man” (*Jerusalem Yebamoth*, i, 6; Kirchheim, *Karne Shomron*, p. 36). The Karaites, who may be regarded as modern Sadducees, explain the Levirate law in the same manner. This restriction of the Levirate law on the part of the Sadducees imparts additional force to the incident recorded in the Gospels (Matt. xxii, 23, etc.; Mark xii, 18, etc.; Luke xx, 27, etc.). Here we are told that the Sadducees, not believing in a resurrection, put the following question to our Saviour: The first of seven brothers married a wife and died childless, whereupon the second brother performed the duty of Levir, and he too died without issue; then the third, fourth, fifth, sixth, and seventh brother successively performed the duty of Levir, so that she alternately became the wife of seven husbands—now, whose wife is she to be at the resurrection? With the restricted application of the Levirate law before us, it will be seen that though this ironical question was chiefly directed against the doctrine of the resurrection, yet it at the same time also attacks the orthodox Pharisaic view of the Levirate law which was undoubtedly shared by our Saviour. What the Sadducees thereby say is, as Geiger rightly remarks, that according to their application of the Levirate law, which restricts it to the betrothed woman (*אירסה*), apart from the extremely rare occurrence of death between the betrothal and connubial intercourse (*נשיאה*), especially several times under similar circumstances, the relation of the woman to her last husband who consummated the marriage is far more intimate than to any of the other husbands to whom she was simply betrothed. Supposing, therefore, for argument's sake, that there will be a resurrection, and that the woman will rise with all the seven brothers, no difficulty will be experienced according to the restricted application of this law, inasmuch as she will be the wife of the last husband who alone consummated the marriage. According to the Pharisaic practice, however, the Levirs have to marry the widow after the marriage has been consummated, so that she is the real wife of all the seven brothers; hence the ironical question put to our Saviour, “According to the Pharisaic doctrine of the Levirate law, in which you believe, the difficulty will be to decide whose wife she is to be.”

2. The ceremony of *taking off the shoe* (*הלצה*), in case the surviving brother refuses to perform the duty of Levir towards the widow of his deceased brother, is explained most rigidly by the Sadducees insisting upon the letter of the law, that the rejected widow is to spit into the man's face (*בפניו*, Deut. xxv, 9); while the Pharisees, adapting the law to the requirements of the time, regarded the spitting *before his face* as satisfying the demands of the injunction, and hence explained the passage accordingly (*Taanith*, iv).

3. The same conservatism and rigor the Sadducees manifested in the *right of retaliation*, insisting upon the literal carrying-out of the law, “eye for eye, tooth for tooth, hand for hand, foot for foot,” etc. (Exod. xxi, 23, etc.); while the Pharisees, with a due regard for the

interests of the people, maintained that pecuniary compensation is sufficient (*Baba Kama*, 53 b; 34 a, b; *Taanith*, iv, 2).

4. For the same reason the Sadducees also insisted upon the literal explanation of the law in Deut. xix, 21, maintaining that false witnesses are only then to be executed when the sentence of the falsely accused had actually been carried out, in which case alone the words “life for life” receive their literal fulfilment; whereas the Pharisees concluded, from Deut. xix, 19, that if they are found out, even before the sentence has been carried out, they are to be executed; for it is there said, “Ye shall do unto him as he intended to do unto his brother.” Hence the intention is to be visited with capital punishment (*Mishna, Maccoth*, i, 6; *Tosiphtu Sanhedrin*, vi).

5. The law of inheritance formed another distinctive feature of the Sadducees. According to the Mosaic law, the son alone is the rightful heir; and in case there is no son, the daughter inherits the father's property (Numb. xxvii, 1–11). Now, the Sadducees maintained that in case the son, who is the heir presumptive, has sisters, and he dies, leaving a daughter, the property is not to go entirely to his female issue, but that the deceased's sisters are to have an equal share with his issue, urging that the deceased son's daughter is only the second degree, while his sisters are the first degree. The Pharisees, on the contrary, maintained that the deceased brother's daughter is the rightful and sole heir, inasmuch as she is the descendant of the male heir, whose simple existence disinherited his sisters (*Mishna, Baba Bathra*, viii, 1; *Babylonian Baba Bathra*, 115 b; 116; *Taanith*, v, 2).

6. From the law that the owner of cattle is responsible for damages done by his animals (Exod. xxi, 28, 29), the Sadducees maintained that a master is responsible for damages done by his slave, submitting that he is far more answerable for him than his cattle, inasmuch as he is to watch over his moral conduct. The Pharisees, on the other hand, denied this, submitting that the slave is a rational, and hence a responsible, creature; and that if the master be held answerable for his conduct, the dissatisfied slave might, out of spite, commit ravages in order to make his master pay (*Mishna, Yadaim*, iv, 7).

D. *Ritual Questions*.—1. The first important distinction in this department to be mentioned is the great stress which the Sadducees laid on the ritual purity of the person of the officiating priest. He had to keep aloof from the very appearance of uncleanness. Hence they required that the burning of the red heifer, from the ashes of which the water of absolution was prepared, should not be performed by any priest who had been defiled, although he had immersed, because he does not become undefiled before sunset (*מציריב שמש*). The Pharisees, on the other hand, disregarding the person and regarding the thing, opposed this great ado about the aristocratic priest. “They prepared a baptistry on the Mount of Olives, where the burning of the red heifer took place, and designedly defiled the priest who was to burn it, so that the Sadducees should not be able to say that the heifer is not to be prepared by such as had not become pure by the sun-setting” (*Mishna, Para*, iii, 7).

2. The Sadducees, again, did not believe that the sacred vessels in the Temple are to be subjected to the strict laws of Levitical purity, which the Pharisees stoutly maintained. So strict were their views on this subject that the Pharisees had all the sacred vessels immersed at the conclusion of every festival, because some unclean priest might have touched them. Hence, when the Pharisees, on one occasion, immersed even the golden candlestick after a festivity, the Sadducees tauntingly exclaimed, “Behold, the Pharisees will at last also purify the sun!” (*Jerusalem Chagigah*, 79 d). That the Pharisees should have thus guarded the sanctity of the vessels against the possible touch

of a defiled priest must have been all the more annoying to the priestly Sadducees, since in other things which did not affect this aristocratic fraternity, but conduced to the comfort of the people at large, the Pharisees were less rigorous with regard to the laws of Levitical purity than the Sadducees, as may be seen from the following instance.

3. The Sadducees interpreted the injunction in Lev. xi, 39, 40 most rigidly, maintaining that it is not only the carcass of an animal which died a natural death that defiles by touching it, but also its sundry parts, such as the skin, bones, sinews, etc.; while the Pharisees restricted this defilement by contact simply to the *flesh*, except the parts of a dead human body, and of a few reptiles, in which the skin and the flesh are, to a certain extent, identical.

4. As a necessary and vital consequence of the foregoing view, the Sadducees maintained that the skin and the other parts of an animal not legally slaughtered—i. e. both of all those animals which the law permits to be eaten when legally slaughtered, but which have died a natural death, and of those which the law does not permit to be eaten—are not allowed to be made into different articles of use; and that leather, parchment, or any other of the numerous articles made from the skin, bones, veins, etc., is defiling. This rigid view obliged the Sadducees to explain Lev. vii, 24 in an unnatural manner, by taking the expression נבלה to denote *an animal approaching the condition of becoming a carcass*—i. e. being so weak that it must soon expire—and to urge that an animal in such a condition may be slaughtered before it breathes its last. In such a case, though its flesh is a defiling carcass, and must not be eaten, the fat, skin, bones, etc., may be used for divers purposes (*Jerusalem Megilla*, i, 9; *Babylon Sabbath*, 108 a). The Pharisees, on the other hand, as the representatives of the people, whose interests they had at heart, allowed the sundry parts of such animals to be used as materials for different utensils. They even allowed the Sacred Scriptures, the phylacteries, and the *mezuzah* (q. v.) to be written on parchment prepared from the skin of an animal which either died a natural death or was torn by wild beasts, but not on parchment prepared from the skin of an unclean animal (*ibid.* and *Torah* ad init.; *Sopherim* ad init.). Bearing in mind this difference of opinion, we shall understand the import of the two discussions, recorded in the Mishna, between the Sadducees and the Pharisees, based thereupon. The Sadducees, we are told, said, "We complain of you Pharisees because you say the Sacred Scriptures, when touched, defile the hands, but the books of Homer do not defile the hands." Jochanan ben-Zakkai said, "And have we nothing else to object to the Pharisees but this? Do they not also assert that the bones of an ass are clean, but that the bones of Jochanan the high-priest are unclean?" (*Yuda'im*, iv, 6). Now, according to the Sadducees, contact with sacred things, so far from defiling, actually sanctified; while the Pharisees, in order to guard the sacred things against contact, ordained that contact with such holy things defiles. On the other hand, the Sadducees regarded the touching of foreign books as defiling, because they are written upon parchment made from skins of unclean animals, or of clean animals not legally slaughtered, which, with them, were like carcasses, and which, as we have seen, the Pharisees did not admit. Hence the charge of the Sadducees that the Pharisees assign a superiority to profane books over the Sacred Scriptures, which Jochanan ben-Zakkai rebuts by ironically enhancing this charge, and saying that this is not the only accusation against the Pharisees, inasmuch as he shows thereby a similar consequence arising from Pharisaic views. The bones of a dead man, he submits, are unclean, according to the express declaration of the Bible, even if they happen to be the bones of such a man as John Hyrcanus, the patron of the Sadducees; whereas the bones of an animal,

even if it be unclean, and such a contemptible one as an ass, are clean; thus showing that the defiling power of an object does not always betoken a degradation in its nature, but, on the contrary, because it is of an elevating nature, therefore it defiles more easily. The other discussion, also arising from this difference of opinion, is recorded in the Talmud, where the law of the Pharisaic sages is recorded, that the Sacred Scriptures, the phylacteries, and the *mezuzah* may be written upon parchment prepared from the skin of an animal which died a natural death, but not from an unclean beast. Whereupon a Boethusian [=Sadducee] asked Rabbi Joshua Ha-Garsi, "Where can you show that the phylacteries are not to be written on the skin of an unclean animal?" *R. Joshua*. "Because it is written [Exod. xiii, 9, where the phylacteries are enjoined] that the law of the Lord be in thy mouth; that is to say, prepared from animals allowed to be put into the mouth." *The Sadducee*. "But, according to this, they ought not to be written on the skin of an animal which died or was torn [because these, too, must be put into the mouth, or be eaten]." To which he replied, "I will tell thee a parable, to show the distinction between the two: Two men are guilty of death; one is killed by the king himself, and the other by the executioner. Whose lot is preferable?" *Reply*. "That one's whom the king executed." [So is the carcass of a clean animal killed by the hand of the King of kings to be preferred to the unclean animal which is already stamped with defilement while alive.] "But, according to this," said the Sadducee, "the carcass ought also to be eaten." To this he replied, "The law says ye shall not eat of anything that died [Deut. xiv, 21]; and sayest thou that it should be eaten?" To this the Sadducee replied, "Bravo!" (קאלים) = καλῶς [*Sabbath*, 108 a].

5. The Sadducees, who stood upon their priestly dignity and ancient prerogatives, rejected the artificial mode of *amalgamating the distances* (צירוב הנחומים) introduced by the Pharisees to enable the members of their order to walk beyond the Sabbath-day's journey without infringing on the sanctity of the day, so as to join the social meal which was instituted in imitation of the priestly social repast. See PHARISEE; SABBATH-DAY'S JOURNEY.

6. As priests, the Sadducees were not subject to the stringent Sabbatical laws, and could therefore enjoy their meals comfortably, inasmuch as they regarded the work requisite for their preparation as part of their sacerdotal duties, which set aside the Sabbatic regulations; whereas upon the people they imposed the most rigorous observance. Thus, in accordance with Exod. xxv, 3, they insisted that lights must not be kindled on Sabbath eve, and that the supper should be eaten in the dark (*Sabbath*, 55 b; Rashi, on *Tosiphta* in *Sabbath*, *ibid.*; Maimonides, *Yad Hachezaka*, *Hilchoth Sabbath*, vi, 1; *Tanchuma*, lviii); they prohibited the eating of any food which was either kept warm since the preparation-day (צירב שבת), or was warmed on the Sabbath (*Responses of the Gaonim*, called *Shaare Teshuba*, No. xxxiv); and forbade connubial intercourse because of the exertion connected therewith, and of its not being holy work, according to Exod. xix, 10, 15 (comp. *Baba Kama*, 82 a).

7. The Sadducees, who, as the priestly party, regarded the Temple treasury as their own, demanded that the daily morning and evening sacrifices should be procured from the private and voluntary gifts of each individual, basing their opinion upon the expression of the law (Numb. xxviii, 4); while the Pharisees, on the other hand, also basing their opinion upon the letter of the law (*ibid.* xxviii, 2), and wishing to protect the interests of the people, maintained that the sacrifices were national, and that they ought to be procured with the money of the Temple treasury. Accordingly, the Pharisees ordered a special Temple-tax, which was collected every spring, and deposited in three distinct boxes in

the Temple treasury, on which was indicated that the money therein contained was destined for the sacrifices for all Israel. The required money was taken out of the boxes three times a year—on the three great festivals, i. e. on the feast of Passover, Pentecost, and Tabernacles. From the first box it was taken with the announcement that it was "in the name of the whole land of Israel;" from the second, with the express declaration, "in the name of its surrounding cities;" and from the third, "in the name of Babylon, in the name of Media, and in the name of the distant countries generally;" so that all the Israelites, including even those who did not contribute to this tax, were represented in this daily sacrifice (*Shekalim*, iii, 1-3; Maimonides, *Shekalim*). So hotly was this point contested between them that it lasted eight days (Nisan, 1-8, year not mentioned), and that the Pharisees, to mark their victory over the Sadducees, appointed these eight days half-festivals, during which no mourning should take place (*Menachoth*, p. 65 a).

8. Regarding the sacrifices as their own, or as belonging to their priestly party, the Sadducees maintained that the priests might eat of the meat-offerings which were connected with the free-will animal sacrifices (Numb. xv, 2, etc.); while the Pharisees maintained that they must be burned on the altar, and carried their opinion into a law, for which reason they again instituted a half-festival in commemoration of their victory.

9. Taking the expression *במחרת השבת* (Lev. xxiii, 11, 15, 16) literally, the Sadducees maintained that the Omer ought to be offered on the first day following the weekly Sabbath; so that the feast of Pentecost is always to be on the first day of the week (Mishna, *Menachoth*, x, 3; Gemara on the same, 65 a; *Taanith*, i, 1). See PENTECOST.

10. The Sadducees rejected the old custom of pouring water on the altar every day at the morning sacrifice during the feast of Tabernacles (*ניסוך המים*) and so opposed were they to this ceremony that it became the cause of separation between the Sadducean king Alexander Jannæus and the Pharisees (*Succa*, 48 b, with Josephus, *Ant. xiii*, 5; Grätz, *Geschichte der Juden*, iii, 473, 2d ed.).

11. They also objected to the procession of the people round the altar holding willow branches in their hands on the feast of Tabernacles (*Yoma*, 43 b). See TABERNACLES, FEAST OF.

12. They maintained that the incense which the high-priest was to carry into the holy of holies on the great day of atonement ought to be kindled outside, and thus to be carried into the sanctuary; because they deemed it improper to do work in the presence of the Lord, and because it was more in accordance with the words *כִּי בַעֲנַן אֵרָאָה עַל הַכַּפֹּרֶת* (Lev. xvi, 2), which they interpreted to mean "only in the cloud" (i. e. rising from the burning incense) "will I be seen on the cover." The cloud thus arising from the burning incense was to conceal the manifested Deity, whereas if the high-priest were to enter before this cloud began to ascend, he would see God and die. The Pharisees considered this as violating the express command of the text, which plainly requires that the frankincense should be put on the burning coals in the holy of holies. So particular were they about it that they exacted an oath from the high-priest, before the Day of Atonement, to perform everything in strict accordance with their enactments (*Siphra*, Pericope *בְּיַד אֶחָד*, iii; *Jerusalem Yoma*, i, 5; *Babylon Yoma*, 19 b, 53 a).

13. Though admitting that Exod. xiii, 6 enjoins phylacteries, the Sadducees rejected the Pharisaic regulations about the making and weaving of them (*Sanhedrin*, 88 b; Maimonides, *Yad Hachezaka*, *Hilchoth Tephillin*, iv, 3). See PHYLACTERY.

14. Based upon the law that a lying-in woman is not

to touch holy things nor to go into the Temple during the thirty-three days following the first seven days after the birth of a boy, and during the sixty-six days following the first fourteen days after the birth of a girl (Lev. xii, 2-8), the Sadducees maintained that this law excludes the woman from the enjoyment of her conjugal rights all these days; while the Pharisees, who always endeavored to relieve the people as much as possible from the burden of the law, did not transfer the holiness of the things and of the Temple to the persons, thus granting to the wife and to the husband the enjoyment of their rights. Hence, while they held every other appearance of blood in the woman as defiling, they regarded it, in this instance, as the effects of the birth, and as pure blood (*דְּמֵי נְהִירָה*). It is for this reason that the *ז* in *נְהִירָה* (Lev. xii, 4, 5) has not the *Mappik*, thus denoting *pure blood*, as the present Masoretic text is the Pharisaic text; and that the rendering of it in the A. V. by "the blood of her purifying," though agreeing with the Sadducean text, which is undoubtedly the original one, is at variance with the *textus receptus* (comp. Geiger, *He-Chaluz*, v, 29; vi, 28 sq.; *Jüdische Zeitschrift*, i, 51; ii, 27, etc.).

It must not, however, be concluded that these are the only distinctive features of the Sadducees, although not many more are mentioned by their opponents, the Pharisees.

IV. *History of the Sadducees.*—1. *Their Origin.*—The oldest record pretending to describe the source of this sect (*אבות דרבי נתן*) is the commentary of Rabbi Nathan Ha-Babli (q. v.) on the tractate of the Mishna entitled *Aboth* (*אבות*) = *the Moral Sayings of the Ancient Fathers*. In this commentary on the saying of Antigonus of Soho (B.C. 200-170)—"Be not like servants who serve their master for the sake of receiving wages, but be like servants who serve their master without expecting to receive wages, and let the fear of the Lord be upon you" (Mishna, *Aboth*, i, 3)—Rabbi Nathan remarks as follows: "Antigonus of Soho had two disciples who propounded his maxim; they taught it to their disciples, and their disciples, again, taught it to their disciples. Thereupon they began to examine it after them, and said, 'What did our fathers purport to teach by this maxim? Is the laborer to work all day, and not receive his wages in the evening? Surely, if our fathers had known that there is another world, and believed in a resurrection of the dead, they would not have spoken thus.' They then separated themselves from the law, and two sects arose from them—the Zadokites [= Sadducees] and the Boethusians. The Zadokites are called after Zadok, and the Boethusians after Boethus. They used vessels of silver and vessels of gold all their days, not because they were proud, but because the Sadducees said that the Pharisees had a tradition that they are to afflict themselves in this world, and yet they have nothing in the world to come" (*Aboth di Rabbi Nathan*, cap. v). That Zadok and Boethus were contemporaries of Antigonus of Soho, that they opposed the doctrines of the sages, and that the sages ordained laws to obviate the cavils of their opponents, is also declared by Saadia Gaon (q. v.) (A.D. 892-942). Thus Isaac Israeli tells us: "Saadia says, the contemporaries and the tribunal of Antigonus of Soho ordained it as a law that the beginning of the month is to be determined by the appearance of the new moon, to do away with the cavils of Zadok and Boethus, who disputed against the sages about the fixing of the new moon" (*Yesod Olam*, iv, 6, p. 9 [ed. Berlin, 1848]). Similar in import to Rabbi Nathan's statement on *Aboth*, i, 3 is the remark of Maimonides (A.D. 1135-1204) on the same passage. "Antigonus," says this great authority, "had two disciples, one named Zadok and the other Boethus, who, when they heard this sage propound this maxim, left him, saying one to the other, the Rabbi distinctly declares that there is neither a fut-

ure state of reward and punishment, nor any hope for man—because they misunderstood his maxim. Thereupon they strengthened each other's hands, separated themselves from the congregation, and left the observance of the law, when one sect followed the one, and another sect followed the other, whom the sages respectively called the Zadokites and the Boethusians" (*Comment. on Aboth*, i, 3). It must be added that the greatest Jewish authorities since the 9th century of the Christian æra have regarded Zadok and Boethus as the heretical leaders who originated two sects. Modern critics, however, reject this current account of the origin of the Sadducees from Zadok and Boethus, the disciples of Antigonus of Soho, as unhistorical, because (a) it is not mentioned either in Josephus, the Mishna, or the Gemara; (b) the original account of Rabbi Nathan neither says that Zadok and Boethus themselves misunderstood Antigonus's maxim, nor that they were the chiefs of these sects, but that their disciples misinterpreted the import of the maxim, and separated themselves from the congregation; and (c) it is illogical to suppose that the disciples of Zadok, who, according to Rabbi Nathan's account, did not misunderstand Antigonus, but simply continued to propound his master maxim, would call themselves, or be called, Zadokites = Sadducees, and not Antigonites, seeing that the maxim belongs to Antigonus and not to Zadok. The second and third reasons, however, are of little value, since the present text of Rabbi Nathan's *Aboth* is obscure, and since Saadia Gaon, the *Aruch*, Maimonides, and all the ancient Jewish authorities who lived centuries ago, and who had better means of procuring correct codices, understood the passage to mean, and also derived it from independent sources, that Zadok and Boethus themselves misunderstood their master Antigonus, and that they were the originators of the sects. It is the first reason which, coupled with the fact that the oldest records are perfectly silent about Zadok and Boethus as disciples of Antigonus, goes far to show that the passage in the *Aboth of Rabbi Nathan*, like many other pieces in the same work, is by a later hand; and that its author, who most probably flourished towards the end of the 7th century, though possessing the right information that the Zadokites and Boethusians were the followers of Zadok and Boethus, misstated the fact by making these two chiefs, who lived at different times, contemporaries, and by describing them as disciples of Antigonus. This mistake is all the more natural since the real and essential differences between the Sadducees and the Pharisees actually began to develop themselves in the time of Antigonus; and it is not at all improbable that, though the Sadducees, as we shall presently see, derived their early sentiments and distinctive name from a much older leader named Zadok, a distinguished descendant of that leader, bearing the same name, may have lived in the time of Antigonus, and may have contributed greatly to the final separation of the Sadducees from the Pharisees.

2. *Development of the Sect.*—We have seen from their tenets and practices that the Sadducees were the ancient priestly aristocracy, and that they persisted in maintaining their conservative notions, as well as in retaining their pristine prerogatives, against the voice of the people. It is therefore natural, in tracing their origin, to look for a leader among the priests themselves, as their strong conservative sentiments would, as a matter of course, make them centre around a representative and a name of their own caste celebrated in the records of the Sacred Scriptures. Such a chief, answering all the conditions required, we find, as Geiger has elaborately shown, in the eminent priest Zadok, the tenth in descent from the high-priest Aaron, who declared for the succession of Solomon to the throne when Abiathar took the part of Adonijah (1 Kings i, 32-45), and whose line of descendants, or "house" as it is termed in the Bible, henceforth retained a pre-eminence in the future history of the Jew-

ish people. Thus when Hezekiah put a question to the priests and Levites generally, the answer was given by Azariah, "the chief-priest of the house of Zadok" (2 Chron. xxxi, 10); and Ezekiel, in his prophetic vision of the future temple, pre-eminently distinguishes "the sons of Zadok," and "the priests and the Levites of the seed of Zadok," as the faithful guardians of the Lord's sanctuary when the children of Israel went astray (Ezek. xl, 46; xliii, 19; xlv, 15; xlviii, 11). When the Jews returned from the Babylonian captivity, this sacerdotal aristocracy, and especially the "priests of the seed of Zadok," the "sons of Zadok," or, which comes to the same thing, "the Zadokites" = Sadducees, naturally continued to form the centre of the newly formed state, and to be the time-honored guardians both of God's sacred heritage and their holy religion. The high-priests were also the chief functionaries of state. Their maxim, however, that statecraft and ingenuity are to be employed in political transactions with foreign nations, as well as the conduct of the chiefs among this sacerdotal aristocracy based upon this maxim, threatened to destroy both the nationality and the religion of the Jews. Hellenism—which gradually found its way into Judæa after its occupation by Alexander the Great—Grecian sports, and political alliances with the heathen, were advocated by the highest of the land, and openly espoused by multitudes (1 Macc. i, 11-15). The very high-priest, who hitherto was the centre of religion, did all he could to denationalize the people of his charge (2 Macc. iv, 1-19). The people, who saw their sanctuary ravished by the Syrians while their aristocracy were engaged in their ruinous statecraft, became embittered against both the foreigners abroad and the rulers at home. We cannot do better than continue the description of the Sadducees in the powerful words of Geiger: "It was then that a pliable priestly family made itself the hand and the mouthpiece of this discontent; it conquered and crushed the foreign sway, overthrew the governing families at home, and assumed the pre-eminence. But the aristocracy soon surrounded the new sun of the Maccabees, and the Zadokites, who themselves had hitherto been the sun, now became its satellites, as Sadducees. The party struggle increased with continued success to the Pharisees. The internal struggles, however, made the interference of the Romans easy, and paved the way of the keenly ambitious Herod to the throne. He was neither a priest nor a born Israelite; but, like all upstarts, he was anxious to ally himself with the ancient aristocracy. His connection with Mariamne supported a Maccabean family in the court itself, which, in opposition thereunto, had popular sympathies because it had its root among the people in consequence of its celebrated past; hence the eternal court intrigues and the consequent brutalities. It was for this reason that Herod sought for another alliance with the sacerdotal aristocracy which should both legitimize him and be his faithful followers, and which he, on his part, would raise by being connected with the sovereign. For this purpose he selected the family of Boethus, a sacerdotal family to whom the functions of the high-priesthood did not belong. He married the daughter of Simon Boethus, whom he made high-priest. Thus was a new high aristocracy created, which, being of ancient aristocratic blood, was blended with the high aristocracy, but which, nevertheless, owed its elevation to the sovereign, and was allied to his house. These were the Boethusians. Their double character, being both upstarts and yet claiming to be ancient aristocracy, enhanced their arrogance" (*Jüdische Zeitschrift*, ii, 34 sq.). They are the Herodians, and for this reason are alternately called Herodians and Sadducees in the New Test. (comp. Matt. xvi, 6 with Mark viii, 15). Thus we are told that the Pharisees took counsel with the Herodians—i. e. with the Boethusian branch of the Sadducees—how they might destroy Jesus (Mark iii, 6), as these Herodians, from their alliance with the reigning dynasty, had

the temporal power for their aid. Again, in Mark xi, 27; xii, 13, it is stated that the chief-priests, the scribes, and the elders, sent unto Jesus certain of the Pharisees and of the Herodians to catch him in his words; and after they had conjointly put to him the question about the tribute-money (xii, 14-17), each of the representatives of the two sects—i. e. of the Sadducees and the Pharisees—tried to entrap him with questions in harmony with their sectarian tenets. Accordingly, the Sadducean portion of the deputation, which are called in ver. 13 Herodians and in ver. 19 Sadducees, came forward first and asked him the question about the seven brothers, which bore upon the Sadducean doctrine of the resurrection and the Levirate law (xii, 19-27). When they were silenced, one of the scribes—i. e. of the Pharisaic portion of the deputation—who was pleased with the manner in which Jesus put down the cavils of the Herodians, came forward and tried to entangle our Saviour with a question from a Pharisaic point of view (xii, 28-37). The reason why our Saviour, who so frequently rebuked the extravagances of some of the Pharisees, did not expose the doctrines of the Sadducees is that at his advent their tenets had been thoroughly refuted by their opponents the Pharisees; and that although, through their alliance with the court, they wielded the temporal arm (Acts v, 17), they exercised no religious influence whatever upon the mass of the Jewish people, with whom the Pharisees were all in all (Joseph. *Ant.* xiii, 10, 5). But even their political influence soon ceased, for with the destruction of the Jewish state by the Romans the Sadducees lost their temporal significance; and though their doctrines continued to be held by a small fraction of the dispersed Jews, yet they were deemed of so little influence that Jehudah the Holy (163-193), in his redaction of the Mishna, only rarely and sparingly takes notice of the different opinions upon the various Jewish enactments held by the Sadducees and the Boethusians. It is for this reason that the Sadducees are also mentioned so little in the Talmud and the Midrashim, and that their origin was forgotten in the 7th century, when the above-quoted passage relating to their rise was introduced into the *Aboth of Rabbi Nathan*.

3. *Their Eventual Fate*.—The fact of the rapid disappearance of the Sadducees from history after the 1st century, and the subsequent predominance among the Jews of the opinions of the Pharisees, remains to be considered. Two circumstances indirectly but powerfully contributed to produce this result: 1st, the state of the Jews after the capture of Jerusalem by Titus; and, 2d, the growth of the Christian religion. As to the first point it is difficult to overestimate the consternation and dismay which the destruction of Jerusalem occasioned in the minds of sincerely religious Jews. Their holy city was in ruins; their holy and beautiful Temple, the centre of their worship and their love, had been ruthlessly burned to the ground, and not one stone of it was left upon another; their magnificent hopes, either of an ideal king who was to restore the empire of David, or of a Son of Man who was to appear to them in the clouds of heaven, seemed to them for a while like empty dreams; and the whole visible world was, to their imagination, black with desolation and despair. In this their hour of darkness and anguish, they naturally turned to the consolations and hopes of a future state; and the doctrine of the Sadducees that there was nothing beyond the present life would have appeared to them cold, heartless, and hateful. Again, while they were sunk in the lowest depths of depression, a new religion which they despised as a heresy and a superstition, of which one of their own nation was the object, and another the unrivalled missionary to the heathen, was gradually making its way among the subjects of their detested conquerors, the Romans. One of the causes of its success was undoubtedly the vivid belief in the resurrection of Jesus, and a consequent resurrection of all mankind, which was accepted

by its heathen converts with a passionate earnestness, of which those who at the present day are familiar from infancy with the doctrine of the resurrection of the dead can form only a faint idea. To attempt to check the progress of this new religion among the Jews by an appeal to the temporary rewards and punishments of the Pentateuch would have been as idle as an endeavour to check an explosive power by ordinary mechanical restraints. Consciously, therefore, or unconsciously, many circumstances combined to induce the Jews, who were not Pharisees, but who resisted the new heresy, to rally round the standard of the oral law, and to assert that their holy legislator, Moses, had transmitted to his faithful people by word of mouth, although not in writing, the revelation of a future state of rewards and punishments. A great belief was thus built up on a great fiction; early teaching and custom supplied the place of evidence; faith in an imaginary fact produced results as striking as could have flowed from the fact itself; and the doctrine of a Mosaic oral law, enshrining convictions and hopes deeply rooted in the human heart, has triumphed for nearly eighteen centuries in the ideas of the Jewish people. See RABBINISM.

4. *Their Modern Representations*.—Many leading Jewish writers (Pinsker, Geiger, Fürst, etc.) claim the Karaites as lineal descendants of the Sadducees; and this identity is quietly assumed by Ginsburg in the art. in Kitto's *Cyclopædia*, which we have thus far mainly followed. It is true the modern Karaite Jews hold, in common with the Sadducees, the decided rejection of the oral law. Less important coincidences are also pointed out, such as their views of worldly policy, their notions respecting the Levirate law, retaliation, inheritance, defilement, the Sabbath, phylacteries, etc.; but these particulars, if indeed not merely accidental, are certainly not conclusive, in the absence of any link of historical connection between the two sects. On the other hand, the failure of agreement in the marked tenet respecting the resurrection is a sufficient offset to these other marks of identity. See KARAITES.

V. The *literature* is nearly the same as that for the Pharisees (q. v.). The following monographs, however, may be specified: Cellarius, *De Causis cur Sadducei Angelos negarint* (Ziz. 1637); Reiske, *De Sadduceis* (Jen. 1666); Mieg, *De Argumento Christ. adversus Sadduceos* (Heidelb. 1677); Willemer, *De Sadduceis* (Viteb. 1680); Barthel, *De Sadduceis* (Lips. 1680); Lund, *De Phariseis, Sadduceis et Essenis* (Aboæ, 1689); Salden, *De Sadduceis et Phariseis* (in his *Otia Theol.* p. 554); Buding, *De Sadduceismo Annæ et Caiaphæ* (Buding. 1719); Cobius, *Argum. Jes. Chr. contra Sadduceos* (Viteb. 1727); Walther, *De Immortalitate Animarum a Sadduceis negata* (Neubrand. 1776); Schultze, *Conjectura Hist.-critica de Sadduceis* (Hal. 1779); Schäffer, *Oratio ἀρχιεπιστοῦ in Ecclesia Hebræa Sadduceæ* (Jen. s. a.); Harenberg, *Nervus Demonstrationis a Christo in Sadduceos susceptæ* (in Iken's *Thesaur.* ii, 242); Gade, *De Sadduceorum in Gente Judaica Auctoritate* (in the *Miscell.* Lips. Nov. ii, 13; v, 440); Gildenapfel, *Josephi de Sadduceorum Canone Sententia* (Jen. 1804); Grossman, *De Philosophia Sadduceorum* (Lips. 1836-39, 4 vols.); Hanne, *Die Pharisäer u. Sadducæer als polit. Parteien* (in Hilgenfeld's *Zeitschrift*, 1867). See PHILOSOPHY.

Sade, Jean Baptiste de, a French prelate, nephew of Richard, was born at Avignon in 1632. After the death of his uncle he became bishop of Caumont, and died Dec. 21, 1707. He left several religious works: *Instructions Chrétiennes et Morales* (1696); *—Réflexions Chrétiennes sur les Psaumes Pénitenciaux Trouvées dans la Cassette d'Antoine I, Roi de Portugal* (1698).

Sade, Pons de, a French prelate. He was first professor in the University of Avignon, and in 1445 was made bishop of Vaison. He died at Vaison in 1469.

Sade, Richard de, a French ecclesiastic, was successively chamberlain of pope Urban VIII, vice-govern-

or of Tivoli and Ravenna, and after 1660 bishop of Ca-vaillon. He died at Rome, June 27, 1668.

Sadeel (prop. **Chandieu**), ANTOINE, one of the promoters of the Reformation, was born, 1534, at the castle of Chabot, in the Maconnais. At the age of twenty he was invited to preach to a congregation of the Reformed at Paris. Attacked by the priests, he was employed by the Protestants to draw up a vindication, was imprisoned the next year, 1558, but was released by the king of Navarre. He went to Orleans, where, in 1562, he presided at a national synod. He then went to Berne, and finally to Geneva, where, from 1589, he labored as preacher and professor of Hebrew until his death, Feb. 23, 1591. He wrote against the Jesuits, *Sophismata F. Turriani*, etc. (1577):—*Index Repetitionum Turriani* (1583, 8vo):—*De Legitima Vocatione Pastorum Ecclesiæ Reformatæ* (1583, 8vo):—*Response à la Profession de Foy* (1593, 8vo):—*Opera Theologica* (1592, fol.).

Sadhyas, in Hindû mythology, are demi-gods, all of whom are descended from the first Menu.

Sadir Jug, in Hindû mythology, is a period in Hindû chronology which embraces four world-periods, or twelve thousand divine years of three hundred and sixty solar years each.

Sadleir, FRANCIS, D.D., provost of Trinity College, Dublin, from 1837 until his death in 1851, was a lineal descendant of Sir Ralph Sadleir. His *Sermons* and *Lectures* (*Donnellan Lectures*) were published in Dublin (1821–22, 2 vols. 8vo).

Sadler, Anthony, D.D., chaplain to Charles II, died about 1680. His published works are, *Inquisitio Anglicana* (Lond. 1654, 4to):—*The Loyal Mourner* (1660, 4to):—*The Subject's Joy for the King's Restoration: a Masque* (1660, 4to):—*Strange News Indeed* (1664, 4to):—*Schema Sacrum*, etc. (1683). Also single *Sermons*. See Bliss's *Wood*, *Athen. Oxon.* iii, 1267.

Sadler, John, an English divine and author, who died 1595, is known principally by his work, *Sacred Records of the History of Christ* (Lond. 8vo).

Sadler, Michael Thomas, an English statesman and philanthropist, was a native of Snelston, Derbyshire, and was born in 1780. He was for some time a merchant of Leeds, was member of Parliament for Newark-upon-Trent, 1829–30, and in 1831 for Aldborough, Yorkshire. He was noted for his philanthropic interest on behalf of the agricultural poor and children in factories, and his opposition to Roman Catholic emancipation and parliamentary reform. He died in 1835. The following are some of his principal works: *Ireland: its Evils and Remedies* (Lond. 1828, 8vo):—*Speech in the House of Commons on the Roman Catholic Relief Bill*, March 17, 1829; *Second Speech*, March 30, 1829 (Lond. 1829).

Sa'doc, the Greek form of the name ZADOK (q. v.) in the Apocrypha and New Test.

1. (Vulg. *Sadoch*, the Greek original being lost). The high-priest Zadok (2 Esdr. i, 1); one of Ezra's ancestors (Ezra vii, 2).

2. (Σαδώκ, Vulg. *Sadoc*). The son (great-grandson) of Azor and father of Achim (Matt. i, 14) in Christ's ancestry. B.C. cir. 220. See GENEALOGY (OF CHRIST).

Sadoletto, Jacopo, a Roman cardinal and bishop, noted for his learning, ability, purity, and liberality, born at Modena in 1477. His father, a professor at Pisa, then at Ferrara, gave him an excellent education. While yet a mere youth he heard lectures on Aristotle, and was introduced to the riches of classical literature. Philosophy and eloquence were his favorite studies; and Aristotle and Cicero his masters. His first publication was *Philosophicæ Consolationes et Meditationes in Adversis* (1502). He also made a promising start in poetry, as his *De Cajo Curtio* and *De Laocoonis Statua* testify. On leaving the university he went to Rome, and soon won the esteem of all scholars and of several eminent prelates. Cardinal Caraffa had him

made a canon of San Lorenzo, a place which he held until 1517. Leo X, on his accession, chose Sadoletto and Peter Bembo as his secretaries. In this position Sadoletto rendered his Church faithful services and won great reputation. In 1517, while on a pilgrimage to Loretto, he was appointed bishop of Carpentras, near Avignon. After vainly declining this honor, he accepted it, and fulfilled its duties with exemplary diligence. Leo's successor, Adrian VI, did not esteem him so highly as Leo. But Clement VII recalled him to Rome—a call which he accepted on condition of being permitted to return to his see after three years. He now became one of Clement's most trusted counsellors, and exerted a very beneficent influence. But he endeavored in vain to dissuade the pope from his league against Charles V (1526). Foreseeing the calamities which would result, he begged to be permitted to retire to his diocese. Scarcely twenty days after his departure, Rome was sacked and the pope a prisoner. He now gave his earnest attention to the management of his diocese, removing unworthy pastors, appointing faithful ones, establishing schools, and endeavoring to make the Reformation unnecessary by removing abuses. Here he came into correspondence with some of the most eminent Protestants—Martin Bucer, John Sturm, and Melancthon. He appreciated the motives of the Reformers; but he regarded their doctrine of justification by faith alone as an excessive statement of a good Catholic doctrine, and as liable to Antinomian abuse. His position was that of a mediator; and to all persecution of the Protestants he was utterly opposed. During his stay at Carpentras he entered afresh upon literary labors. Here he wrote a work on education: *De Liberis recte Instituendis* (Ven. 1533; new ed. Paris, 1855) and a commentary, *In Pauli Epistolam ad Romanos* (Ven. 1535). This commentary is his most important doctrinal utterance. His purpose was to present the general Catholic doctrine on faith, good works, justification, predestination, and free will. He mainly followed Chrysostom and Theophylact, and opposed the determinism of Augustine. Man is not passive in the process of regeneration, but must personally co-operate with the grace of God. Faith and good works are inseparable; but works without faith are of no worth. In so far as he opposed justification by faith alone, he opposed only its abuse. He also opposed the excessive fasts and asceticism of the Roman Church. The book was severely censured at Rome. Sadoletto modified some of its utterances, and issued a new edition in 1536. At this period he wrote also an *Interpretatio* of some of the Psalms. On the accession of Paul III, Sadoletto was called to Rome to give counsel as to measures of Church reform. The pope now raised him to the cardinalate (1536), retained him at Rome, and charged him with preparations for the contemplated Council of Trent. In 1538 he attended the pope when he met Charles V at Nice. Here he labored to bring about a peace between the emperor and Francis I. An armistice having been effected, he obtained permission to retire to his bishopric. Here he wrote his elegant work *De Philosophia*. In 1539 he wrote his celebrated *Epistolam ad Senatam Populumque Genevensem*, an eloquent and affectionate appeal to the Genevese Protestants, whom he styles "his beloved brethren in Christ," to return into the unity of the Church. Here he also began his irenical work, *De Exstructione Cath. Eccl.* At this period he gave a signal proof of his Christian liberality. Francis I had issued an order of persecution against all dissenters in Provence; thereupon some of them drew up a statement of their belief, sent it to Sadoletto, and asked his intercession. He candidly made the examination, suggested a few changes, and promised to use his utmost endeavors to rescue them from persecution. War breaking out afresh between Francis I and Charles V, Sadoletto was called to Rome (1542) to act as peace commissioner. This work done, he retired for a few months to Carpentras; but in the summer of 1543 he

returned to Rome to aid the pope further in his preparations for the Council of Trent. The next year he was called on to meet the emperor and the pope at Buseto in an endeavor to effect a peace with France. This was among the last of Sadoletto's labors. He was now far advanced in years; his health gave way in the summer of 1547, and on Oct. 18 he entered into rest. Sadoletto was one of the noblest characters of the age; he belonged to that select circle of high Roman prelates who sincerely desired to do away with the corruptions of their Church, but whose influence was largely counteracted by the worldly-minded majority. His works, which are very elegantly written, were printed in 1607: *Sadoletti Opera quæ extant Omnia* (Mogunt.). His collected works, except his *Letters*, were again issued at Verona in 1737-38, in 4 vols. 4to; his *Epistolarum Libri XVII*, at Lyons in 1550; a better edition of these *Letters*, at Rome, 1759, in 5 vols. 8vo; his work on philosophy, at Paris in 1853. See his *Life* by Florellus; Joly, *Étude sur Sadolet* (Caen, 1857); Herzog, *Real-Encyclop.* xiii, 297-301; Hoefer, *Nouv. Biog. Générale*, a. v. (J. P. L.)

Sadoletto, Paolo, an Italian prelate, nephew of the preceding, was born at Modena, 1508. He studied literature and ancient languages at Ferrara, and was in 1533 made assistant of his uncle at the siege of Carpentras, and in 1541 governor of Venaissin. In 1544 he succeeded his uncle as bishop, and went to Rome as secretary of pope Julius III. At the death of that pontiff, in 1555, he returned to his diocese, and twice again was charged with the governorship of Venaissin, 1560, 1567. He died Feb. 26, 1572, deplored by his people for his excellent qualities and erudition. His *Letters* and *Later Poems* were published by abbé Costanzi at the end of his uncle's *Letters*. See Tiraboschi, *Storia della Letteratura Italiana*, vii; Barjavel, *Dict. Hist. du Faucuse*.

Sadr, in Scandinavian mythology, is a surname of *Odin*, the principal deity.

Sæwulf, supposed to have been a merchant of Gloucester, flourished in 1102, and is noticed by William of Malmesbury. He left in manuscript an account of his travels in the Holy Land, A.D. 1102-3, under the title, *Relatio de Peregrinatione Sæwulfi ad Hierosolimam et Terram Sanctam*, etc. A French translation was published in Paris, 1839, under the title, *Relation des Voyages de Sæwulf à Jérusalem et en Terre-Sainte*; and an English translation is included in Thomas Wright's *Early Travels in Palestine* (Lond. 1848).

Saffron (סַפְרַנִּת, *kurkôm'*, Sept. *κρόκος*) occurs only once in the O. T., viz. in Cant. iv, 14, where it is mentioned along with several fragrant and stimulant substances, such as spikenard, calamus, and cinnamon, trees of frankincense, myrrh, and aloes (*ahalim*): we may therefore suppose that it was some substance possessed of similar properties. The name, however, is so similar to the Persian *karkam* (see Castelli, *Lex. Hept. Col.* 1808) and the Greek *κρόκος* that we have no difficulty in tracing the Hebrew *karkôm* to the modern *crocus* or saffron. It is also probable that all three names had one common origin, saffron having from the earliest times been cultivated in Asiatic countries, as it still is in Persia and Cashmere (comp. Theophr. *Plant.* vi, 6; Pliny, xxi, 17), and especially in ancient Cilicia (Strabo, xiv, 6, 71; Dioscor. i, 25). *Crocus* is mentioned by Hippocrates and Theophrastus. Dioscorides describes the different kinds of it, and Pliny states that the benches of the public theatres were strewn with saffron; indeed, "the ancients frequently made use of this flower in perfumes. Not only saloons, theatres, and places which were to be filled with a pleasant fragrance were strewn with this substance, but all sorts of vinous tinctures retaining the scent were made of it, and this costly perfume was poured into small fountains, which diffused the odor which was so highly esteemed. Even fruit and confitures placed before guests, and the

ornaments of the rooms, were spread over with it. It was used for the same purposes as the modern *pot-pourri*" (Rosenmüller, *Bibl. Bot.* p. 138). In the present day a very high price is given in India for saffron imported from Cashmere; native dishes are often colored and flavored with it, and it is in high esteem as a stimulant medicine. The common name, saffron, is no doubt derived from the Arabic *zafran*, as are the corresponding terms in most of the languages of Europe. To this it may be added that it was a favorite pigment or dye. "Saffron-vested" (*κρόκοπεπλος*) is a Homeric epithet for aurora or morning, and the *crocota* was a robe of delicate texture and bright-yellow color, occasionally worn by actors and Roman ladies. Its beauty in the landscape is referred to by Homer (*Iliad*, xiv, 399), Virgil (*Georg.* iv, 182), and Milton (*Par. Lost*, iv, 700). Nothing, therefore, was more likely than that saffron should be associated with the foregoing fragrant substances in the passage of Canticles, as it still continues to be esteemed by Asiatic nations, and, as we have seen, to be cultivated by them. Hasselquist also (*Trav.* p. 36), in reference to this Biblical plant, describes the ground between Smyrna and Magnesia as in some places covered with saffron; and Rauwolf mentions gardens and fields of *crocus* in the neighborhood of Aleppo, and particularizes a fragrant variety in Syria. Kitto (*Phys. Hist. of Palest.* p. 321) says that the safflower (*Carthamus tinctorius*), a very different plant from the *crocus*, is cultivated in Syria for the sake of the flowers which are used in dyeing; but the *kurkôm*, no doubt, denotes the *Crocus sativus*.

Saffron belongs to the flag or iris order (*Iridaceæ*). The different members of the *crocus* family are great favorites: the purple and golden varieties (*Crocus vernus*, Willd., and *C. aureus*, Sm.), which, on English flower borders, are the first to follow the snowdrop, and often fill with a flush of coming spring the earliest days of March; and the lonely, fragile sort (*C. nudiflorus*, Sm.), which, with its own leaves still underground, comes up amid the drifting foliage of autumn, making a mournful effort to cheer the last days of October. These, and other species now naturalized in various localities, are regarded by some as only varieties of the *C. sativus* of

Saffron (*Crocus sativus*).

Linnaeus, the true or saffron-yielding crocus—a plant of plentiful occurrence in Greece and Asia Minor. The name *saffron*, as usually applied, does not denote the whole plant, nor even the whole flower, of *Crocus sativus*, but only the stigmas, with part of the style, which, being plucked out, are carefully dried. (Comp. *Halle Encycl.* i, § xx, 165 sq., and plates in Plenck, *Icones Plantar. Med.* i, plate 32.) These, when prepared, are dry, narrow, thread-like, and twisted together, of an orange-yellow color, having a peculiar aromatic and penetrating odor, with a bitterish and somewhat aromatic taste, tingling the mouth and saliva of a yellow color. Sometimes the stigmas are prepared by being submitted to pressure, and thus made into what is called *cake saffron*, a form in which it is still imported from Persia into India. Hay saffron is obtained chiefly from France and Spain, though it is also sometimes prepared from the native crocus cultivated for this purpose. Saffron was formerly highly esteemed as a stimulant medicine, and still enjoys high repute in Eastern countries both as a medicine and as a condiment. See, further, Beckmann, *Geschichte der Erfind.* ii, 79 sq.; Celsius, *Hierobot.* ii, 11 sq.; Bod. a Stapel. *Comment. in Theophr.* p. 663 sq.; Hertodt, *Crocologia* (Jen. 1670); Tristram, *Nat. Hist. of the Bible*, p. 496.

Saga, in Scandinavian mythology, possibly identical with *Laga*, is a deity who at least shares the dwelling-place of *Laga* in the cooling waters of Soquabekr, and participates in the love of Odin, who pays her daily visits. *Saga* is one of the *Asins*, whose songs commemorate the deeds of the heroes. See NORSE MYTHOLOGY.

Sagan (סגן, a *præfect*), the second priest of the Jews, who acted as deputy of the high-priest, often officiating for him in the sacred service of the Temple. He was sometimes called high-priest, and was identical with the ruler of the Temple. See PRIEST.

Sagaren, or **Sangaren**, in Hindû mythology, was a famous king, belonging to the race of Children of the Sun, whose sixty thousand sons were turned to ashes by an angry glance of the white penitent Kabiler.

Sagaris, in Greek mythology, was a Trojan who accompanied Æneas to Italy, where he was slain by Turnus.

Sagaritis, in Phœnician mythology, was a dryad who induced Atys to violate his faith with Cybele, to punish which the latter cut down the tree of Sagaritis, and thus caused her death.

Sagatrakawaxen, in Hindû mythology, was a monstrous giant who sprang from the blood of Brahma, when that god was decapitated by the angry Siva, and who was provided with five hundred heads and a thousand arms.

Sage, JOHN, a bishop of the Episcopal Church of Scotland, was born (1652) in the parish of Creich, Fife. He was educated at the University of St. Andrews (M.A. 1672), and was ordained in 1684. He officiated at Glasgow until the Revolution in 1688, and was consecrated a bishop for Scotland, 1705. He died in 1711. The following are his principal works: *The Fundamental Charter of Presbytery* (Lond. 1695, 8vo); *The Principles of the Cyprianic Age with regard to Episcopal Power*, etc. (1695, 4to; 1717, 8vo); *A Vindication of the same* (1701, 4to). These, together with his *Life*, were republished, in three octavo volumes, by the Spottiswoode Society (Edin. 1844-46). See Allibone, *Dict. of Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Sagittarius, CASPAR, historiographer of the duchy of Saxony, professor of history at the University of Jena, and, according to his biographer, J. A. Schmidt, one of the most excellent, erudite, and industrious men of his time, was born Sept. 23, 1643. His father, a pastor, taught him with care, and sent him, when fifteen, to the gymnasium at Lübeck. At this early age he published an essay, *De Ritibus Veterum Romanorum*

Nuptialibus, and began his annotations on Justin. Here also he wrote an erudite history of the Passion of Jesus. After three years at the gymnasium, he entered the University of Helmstädt, and heard lectures on the whole field of human knowledge—exegesis, church history, metaphysics, logic, ethics, politics, physics, history, geography, and anatomy—thus laying a foundation for the character of *polyhistor* which he subsequently bore. He also preached and travelled in various parts of Germany, and formed relations with many learned men. He next prepared his work, *De Calceis et Nudipedalibus Veterum*. At the age of twenty-five he became rector of the school at Saalfeld (1668), where he not only distinguished himself as an educator, but also continued his literary productiveness. In 1671 he was called to a professorship at Jena. After writing various philological treatises and theological disputations—one of them *De Martyrum Cruciatibus in Primitiva Ecclesia*—he succeeded (1674) to the chair of J. A. Bøse as professor of history. The next year he published a very learned work on the history and customs of Thuringia. In 1676 he visited the libraries of Germany and Copenhagen; in 1678 he issued his *Compendium Historiæ Saxonice*, and was made a doctor of theology; in the following years he appeared as a polemic, defending Lutheranism against the Jesuit Schönmann. Thereupon followed various works on Pietism, which he boldly defended, and for which he was bitterly assailed by the staid orthodox party. Among the best of his works in this strife is his *Christlicher Neujahrswunsch an alle evangelische Theologen, die die Beförderung des thätigen Christenthums sich angelegen seyn lassen* (Jena, 1692). Among his later writings were his *Historia Vitæ Georgii Spalatini* (Jena, 1693), and an *Introductio in Historiam Ecclesiasticam*, which he did not live to finish. He died March 9, 1694. For a complete list of the works of Sagittarius, see Joan. Andr. Schmidii *Commentarius de Vita et Scriptis Caspari Sagitarii* (Jena, 1713). See Herzog, *Real-Encycl.* xiii, 301-304. (J. P. L.)

Sagui, in Hindû mythology, is the second stage of blessedness in the paradise of Vishnu. See HINDUISM.

Sahadûtha. See JEGAR-SAHADUTHA.

Sahidic (or THEBAIC) **Version**. See EGYPTIAN VERSIONS.

Sahuguet, MARC RENÉ, abbé d'Espagnac, was born at Brives, in 1753. Being destined for the Church, he received orders, and was soon appointed canon of Paris. He gave himself principally to literary pursuits, and his earlier essays have received just praise. In 1782 he became advisory clerk of Parliament, and soon developed a great love of riches. The agent and friend of Calonne, he only engaged in those enterprises which would increase his wealth. Among his operations was a speculation in shares of the East India Company, which was so scandalous as to oblige the government to cancel the whole bargain. After the disgrace of Calonne, the abbé d'Espagnac was exiled, though he was still canon of Notre Dame. In 1789 he returned to Paris and associated himself with the so-called *Club* of 1789. At the same time he was a friend of the Jacobins, whose influence procured for him the office of purveyor to the army of the Alps. He was very soon denounced by Cambon and put under sentence of arrest for engaging in fraudulent business transactions, but succeeded in clearing himself. Having gained his liberty, he attached himself to the army of Dumouriez, and by various means acquired an immense fortune. But at the revolt of Dumouriez, Sahuguet was arrested, and tried as an accomplice in a conspiracy to corrupt the government. He was found guilty, and executed at Paris, April 5, 1794. Of his literary works there are a few remaining which show considerable ability. The most noticeable are *L'Éloge de Catinat*, who was crowned by the French Academy in 1775, and *Réflexions sur l'Abbé Suger et sur son Siècle* (1780).—Hofer, *Nouv. Biog. Générale*, s. v.

Sail is the incorrect rendering in the passages Isa. xxxiii, 23; Ezek. xxvii, 7, of the Hebrew **סָף**, *sés*, usually a *standard* or *flag-staff*, and in the passages in question a *flag* of a ship. In Acts xxvii, 17 it stands vaguely for **σκάφος** (a *vessel* or *implement* of any kind), which there designates the *tackling*, or sailing-apparatus in general of a ship. See, also, MAIN-SAIL.

Sailer, JOHANN MICHAEL, a Roman Catholic bishop of Ratisbon, the originator of a tendency in German Catholicism, and one of the purest and noblest theologians of the Church universal. His life lies between Nov. 17, 1751, and May 20, 1832. He was born near Schrobenhausen, in the bishopric of Augsburg, of upright, devout parents. His mother left upon his young heart an impression for which he expressed public thanks to the end of his days. His readiness in learning induced his father to send him in his tenth year to school at Munich. For five or six years he earned his way as attendant on a young nobleman. Having finished his gymnasium studies at the age of nineteen, he entered as novitiate into the Jesuit Society at Landsberg, and passed three very studious years. On the dissolution of the order (1773), he went to Ingolstadt, and pursued philosophy and theology until 1777, when he was consecrated to the priesthood.

Up to his sixteenth year, Sailer suffered under a tender and often upbraiding conscience. But, finding a wise spiritual guide, he was now led to a clear, evangelical conversion. At his eighteenth year he was troubled with historical doubts. An aged missionary from India helped him, happily, over these. But other, even severer, temptations beset him subsequently. In 1777 he became *repetitor publicus* of philosophy and theology at Ingolstadt. Here he formed intimate bonds with the zealous and devout pastor Feneberg, and with Winkelhofer, the German Fénelon. In 1780 he was promoted to the chair of dogmatics. He now began his public literary activity, and published notes to the *Imitatio Christi*, also a prayer-book, which has enjoyed great popularity, and a discussion of the province of reason. From 1784 to 1794 he served as professor of pastoral theology at the University of Dillingen—a very fruitful period. He planted evangelical principles in the hearts of thousands of students, who in turn spread them throughout German Catholicism. He formed religious friendships with many eminent Protestants, especially Lavater, and with all who were earnestly upholding religion against the inflooding of rationalism. This finally brought persecution upon Sailer, and in 1794 he was abruptly dismissed from his chair. For a while he shared the hospitality of Winkelhofer in Munich, but then retired into greater privacy at Ebersberg. The next six years brought to Sailer great spiritual temptations. He was brought into the stream of earnest evangelical mysticism which centred in Martin Boos; but he was not entirely carried captive by it. Partially convinced that he still retained something of the Pharisee and formalist, yet unable to break entirely away from Catholic tradition, he finally sought refuge and consolation in fervent prayer and active labor upon the souls of men. Not fully rising to the subjective self-assertion of Luther, he yet clung with his whole heart to Christ, and followed the examples of Fénelon and Francis de Sales. His piety resembled that of Charles Wesley, while his adhesion to Catholicism, though less passionate, was yet of the same type as Charles Wesley's devotion to the Establishment. In 1799, Sailer was again favored with a chair in Ingolstadt. The next year the university was removed to Landshut. Here he labored with great fruitfulness until 1821. He lectured on ethics, pastoral theology, homiletics, pedagogics, liturgics, and served as university preacher. His pen was also very busy. He attracted students from every part of Germany, and received many tempting calls to other fields, one of them to the archbishopric of Cologne; but he declined them

all. Even yet he did not entirely escape persecution and abuse; but he bore it all with the greatest patience, holding as his motto the words of the prophet (Jer. xxx, 15), "In spe et silentio erit fortitudo vestra." While Napoleon accused him of being a bigoted papist, the pope distrusted him and refused to confirm him as bishop of Augsburg. Accused of mysticism and of fraternization with Protestants, he published, in 1820, a detailed defence of all that he had done or taught, and submitted the whole to the judgment of the pope, "following the example of the great Fénelon." This document did not fully satisfy Rome, and it was only after considerable negotiation that the king of Bavaria obtained papal consent to his ecclesiastical preferment. In 1821 he was made prebendary of Ratisbon, and in 1822 vicar-general and coadjutor of the aged bishop Von Wolf; at the same time he was made bishop *in partibus* of Germanicopolis. With great conscientiousness he now entered upon the weighty duties of this great diocese of Ratisbon. Everywhere he endeavored to look into matters with his own eyes, and to correct all abuses to the extent of his ability. He held regular meetings with all his clergy, and endeavored to improve the popular education. In 1829 he became in name what he had long been in reality, bishop of Ratisbon. Three years later he died at the age of eighty-one. A complete edition of his works was published by J. Widmer (Sulzb. 1830-42) in forty volumes. Among them the following deserve special mention: *Briefe aus allen Jahrhunderten* (1800-4):—*Grundlehren der Religion*:—*Moralphilosophie*:—*Erziehung für Erzieher*:—*Die Weisheit auf der Gasse*:—*Pastoraltheologie*:—and many sermons and addresses. Though lacking in profound speculative power, Sailer's writings have yet had a very wide and very stimulating influence. He has been compared to Herder, but he had far more respect than Herder for the objective fruit of ecclesiastical thought. He endeavored in all things to practice the maxim *In necessariis unitus, in dubiis libertas, in omnibus caritas*. Of a school of theology as springing from Sailer, we cannot properly speak. He did not leave a school, but only a spiritual impulse. He was of decidedly irenic tendency. Full of Christian love, his ideal was a "mild orthodoxy," equally opposed to rationalism, on the one hand, and to a stiff, arid, Roman orthodoxy, on the other. Among the most eminent followers of Sailer was Melchior Diepenbrock (1798-1851), his companion at Ratisbon, and subsequently prince-bishop of Breslau and cardinal-priest. See Hagenbach, *Church in the 18th and 19th Centuries*; but especially Herzog, *Real-Encykl.* xiii, 305-313. (J. P. L.)

Sailly, THOMAS, a Belgian theologian, was born at Brussels in 1553, where he died in 1623. At the age of seventeen, having been already ordained priest, he went to Rome to enter the Society of Jesus. When hardly out of his novitiate, he was sent by Gregory XIII on an embassy to the czar Ivan. On account of his health he was recalled, and became confessor to prince Alexander of Parma. In 1597 he was made superior of a military mission, and in 1606 he went to Rome as procurator-general of the Belgian provinces. In 1620 he took part as missionary in the campaign of Spinola. He was the author of works in Latin, Flemish, and French: *Guidon et Pratique Spirituelle du Soldat Chrétien* (1590):—*Narratio Itineris Fr. de Mendoza, Admirantis Aragonie, in Legatione sua* (1598):—*Thesaurus Litanarum ac Orationum Sacer* (1598):—*Den nieuwen Morghenwekker* (1612). He also translated several religious treatises into his native language.

Saint, an epithet applied to (1) a person eminent for piety and virtue; (2) a consecrated or sanctified person. There are two words in the Hebrew Scripture used to express the above, both of which are rendered in our translation by the single expression *Saint*. **קָדֹשׁ**, *qados* (like the Gr. **ἅγιος**), denotes a mental quality; its most certain acceptation being pious, just, godly, etc. It is

spoken of pious Hebrews (Psa. iv, 3; xxx, 4; xxxi, 23; xxxvii, 28; i, 5; lii, 9; lxxix, 2; xcvi, 10; cxvi, 15). On the other hand, קָדוֹשׁ, *kadôsh*, and also the Greek word ἅγιος, signifies *pure, clean*, in reference to physical purity and cleanliness; they are also used of moral purity, *holy, hallowed, sacred*—applied to persons consecrated to the service of God: the priests (Exod. xxviii, 41; xxix, 1; Lev. xxi, 6; 1 Sam. vii, 1; 1 Pet. ii, 5); the first-born (Exod. xiii, 2; Luke ii, 23; Rom. xi, 16); and the people of Israel (Exod. xix, 10, 14; Isa. xiii, 3); prophets and apostles (Luke i, 70; Acts iii, 21; 2 Pet. i, 21; Eph. iii, 5); the pious Israelites, the *saints* (Deut. xxxiii, 3; Psa. xvi, 3; xxxiv, 9; lxxxix, 5, 7; Zech. xiv, 5; Dan. vii, 18, 21, 25, 27; Matt. xxvii, 52); and the angels (Job v, 1; xv, 15; Dan. viii, 13; Matt. xxv, 31; 1 Thess. iii, 13). The latter Greek word is also used of those who are purified and sanctified by the Holy Spirit; and as this is assumed of all who profess the Christian name, Christians are called *saints* (Acts ix, 13, 14, 32, 41; xxvi, 10; Rom. i, 7; viii, 27). It may here be observed that the Hebrew word for a consecrated prostitute is קַדְשָׁה, *kedeshâh*, derived from קָדַשׁ, *kadôsh*, in its signification of separated, dedicated, because such women among idolaters were devoted to the service of the temples of their false deities, particularly those of Venus, and to the ancient priests of Bel, or Belus. Of such female devotees, instances are to be found in the present day attached to the Hindû temples.

The later Jews have their *saints* as well as the Christian Church; the word they use is קָדוֹשׁ, *kadôsh*. Their most celebrated saint is rabbi Judah Hak-kadôsh (rabbi Judah the Holy). He lived about one hundred and twenty years after the destruction of the second Temple, and was the author of the Mishna (or text) of the Babylonian Talmud. They have also their devout men (חסידים, *chasidim*), who devote themselves to a religious life and to the study of their law, visit the dying, perform the rites for the dead, etc. Of such kind were the "devout persons" with whom Paul disputed (Acts xvii, 17). In the New Test. the word ἅγιος, as above, is used throughout wherever our version has "saint," and with the same signification as in the Sept.—viz. separated, dedicated, sanctified by consecration—because the Christians were then especially dedicated to God's service, in separation from the Jews and pagans, as the Jews had been before the "holy people" separated from the Gentiles. See HOLINESS.

After the Christian era, the martyrs were considered as dignified saints in the same rank as the apostles—i. e. saints by profession and office, as distinguished from the saints, or holy and pious by character and conduct, such as have been eminent for religion and virtue, but not canonized. After some time canonization was extended also to confessors—that is, persons who during the persecutions against the Christians had made a resolute avowal and defence of their faith, and had suffered torture, banishment, or confiscation in consequence, but not actual martyrdom (see the monographs cited by Volbeding, *Index Programmatum*, p. 169). For some centuries there was no regular canonization in the Christian Church. By a tacit consent of the clergy the names of martyrs, etc., were inserted as saints in a kind of ecclesiastical register, called a *diptych*. It was not till about the 9th century that solemn and formal canonization, with its particular ceremonies, began to be regularly practiced. At present, in the Church of Rome, the ceremony of beatification, or being pronounced blessed by the pope, must precede canonization, and cannot take place till fifty years after death. See CANONIZATION. The word is generally applied by us to the apostles and other holy persons mentioned in the Scriptures; but the Romanists make its application much more extensive, as, according to them, all who are canonized are made saints of a high degree. Protestants, in applying this

term to the sacred writers, are very inconsistent; for though they say St. John, St. Peter, St. David, they never use St. Isaiah, St. Habakkuk, etc. The practice has even extended to naming churches after certain saints. See PATRON SAINTS.

Concerning the bodies of the saints which arose and came out of their graves after the resurrection of Christ (Matt. xxvii, 50), it is believed that they were persons who believed in him and waited for him in hope, as old Simeon had done (Luke ii, 25), but who had died before his resurrection, and who were thus favored to be an example of the general resurrection, and to whom Christ alluded (John v, 25), "The hour is coming, and now is, when the dead shall hear the voice of the Son of God, and they that hear shall live;" and of whom Paul speaks, "Now is Christ risen from the dead, and become the first-fruits of them that slept," because his resurrection was the signal for theirs. It appears that these persons must have been deceased during the then present generation; for they went into Jerusalem, and appeared unto many, who could not have recognised them had they been much longer dead. We may here observe that when the word saint or saints (ἅγιος, ἅγιοι) is used in the New Test. relative to persons deceased, it is to be understood of the spirits of the just (without any distinction of office or character) made perfect. See RESURRECTION.

Saint-Amour, LOUIS GORIN DE, a French theologian, was born at Paris, Oct. 27, 1619. He was educated at the University of Paris, and afterwards became its rector, and in 1644 was made professor at the Sorbonne. His profound learning and the vigor of his argumentative powers soon made him conspicuous in the assemblies of the faculty. When the Jesuits obtained the condemnation of the five propositions of the book of Jansenius, Saint-Amour became one of the most powerful adversaries of the decision. He was one of the doctors who went to Rome to obtain its reversal, but was obliged to return without having succeeded. By his defence of Arnauld he was excluded from the assemblies of the Sorbonne, and, being arrested by the order of the Council of State, he was in 1684 burned at the stake. He published a *Journal de ce qui c'est passé à Rome touchant les cinq Propositions depuis 1646 jusqu'en 1653* (1662), edited by Arnauld and De Sacy from the notes of Saint-Amour and the abbé Salaine.

Saint-George, ARTHUR, D.D., dean of Rosse, died 1772. His only published work is *The Archdeacon's Examination of Candidates for Holy Orders*, etc., edited by W. Wotton, D.D. (Lond. 1751, 12mo).

Saint John, KNIGHTS HOSPITALLERS OF (also called *Knights of Rhodes*, and *Knights of Malta*), a religious and military order, originating in the middle of the 11th century. Some citizens of Amalfi, while trading with Palestine, had (1048) founded two hospitals for the reception of pilgrims to Jerusalem—one for men, and the other for women. The hospital for men bore the name of St. John the Almoner, a native of Cyprus and patriarch of Alexandria, who sent aid to Jerusalem in 614, after it had been sacked by Chosroes II. The confraternity who did service in the hospital was under the direction of Gerard. They displayed such heroic charity when Jerusalem was captured by the Crusaders, July 15, 1099, that several knights—among them Raymond du Puy—joined them as hospitaliers. The lordship of Montboire, in Brabant, was bestowed upon them by Godfrey de Bouillon. When peace was restored to the city, Gerard and his associates pledged themselves to labor forever in the hospitals "as the servants of the poor and of Christ," the members of both sexes assuming as their habit the black robe of the Augustinians, with a white linen cross of eight points on the left breast. The order received the papal approbation from pope Paschal II, Feb. 15, 1113, under the appellation of "Brothers Hospitaliers

of St. John in Jerusalem." A magnificent church was erected to St. John the Baptist on the traditional site of his parents' abode. Gerard took the title of Guardian and Provost of the order, and built, for the accommodation of pilgrims, hospitals in the chief maritime towns of Western Europe; these afterwards became commanderies of the order. Gerard died in 1118, and was succeeded by Raymond du Puy, who to their former duty of hospitality and attendance upon the sick added that of knighthood, in opposition to infidels; and this soon became the principal object of the order. Raymond divided the order into knights, priests, and brother servants; and there grew up, also, a numerous intermediate class of sergeants (old Fr. *serfgeints*, serving-men), who rendered valuable service in field and hospital, and were, in course of time, assigned separate commanderies. The order, under its new organization, was called after St. John the Baptist; and Raymond exchanged the title of guardian for that of master. The title of grand-master was first assumed by Hugues de Revel, 1267. The constitutions, based on the Augustinian rule, were drawn up by Raymond, and approved by pope Calixtus II, 1120. The great influx of members caused the order to be divided according to nationalities, or "languages"—those of Provence, Auvergne, France, Italy, Aragon, Germany, and England—to which were added the languages of Castile and Portugal. The order became famous by its delivering Antioch from the Moslems, raising the siege of Jaffa, assisting powerfully in the fall of Tyre, driving the enemy from Cœle-Syria and Phœnicia, and contributing to the fall of Ascalon, in 1153. Amaury, king of Jerusalem, bribed them, in 1168, to promise to violate a solemn treaty and engage in an expedition against Egypt. The order was nearly annihilated in 1187 by Saladin in the battle of Tiberias. After the fall of Jerusalem, it was established at the castle of Margat (Markat), the female branch of the order retiring to Europe. The Kharemsians nearly exterminated the order in 1244 at the battle of Gaza. When the Saracens took Acre (1291), the hospitallers removed to Limisso, in Cyprus, where originated their naval character, as their vessels conveyed pilgrims to the Holy Land. Having conquered Rhodes in 1309 (or 1310), they afterwards made it the principal seat of their order, and were hence called Knights of Rhodes. They sustained there two sieges, the first, in 1480, under the grand-master D'Aubusson, proving disastrous to the besiegers; and the second, under L'Isle-Adam, in 1522, ending (after a heroic defence of six months) in the defeat of the knights and evacuation of the island. After taking refuge successively in Candia, Messina, and the mainland of Italy, they were put in possession of the islands of Gozo and Malta and the city of Tripoli by emperor Charles V. They made Malta one of the strongest places in the world, and it gave its name to the order. They repelled attacks from the Turks in 1551 and 1565, and held the island until June, 1798, when it was taken by Bonaparte, the grand-master Hompesch having abdicated and been sent to Trieste. Since that event the order has existed only in name. It was for a time under the protection of Paul I of Russia, whose reported conversion to Romanism led to his being elected grand-master. The seat of the order was removed to Catania in 1801, to Ferrara in 1826, and to Rome in 1834. See HOSPITALIERS.

Saint-John, Pawlett, D.D., rector of Yelden, Beds, prebendary of Hereford, and chaplain in ordinary. He received the degree of M.A. in 1706, and D.D. in 1716, and died 1732. "His sermons were written in a forcible yet simple style." Fourteen of them, on practical subjects, were published (Lond. 1737, 8vo). See Darling, *Cyclop. Bibliog.* s. v.

Saint-John, Theophilus, D.D., a pseudonym. The real author was the Rev. Samuel Clapham, A.M. His *Sermons* were of a highly popular and useful char-

acter, two volumes of which were published (Lond. 1812, 8vo).

Saint-Jure, JEAN BAPTISTE DE, an ascetic author, was born, in 1588, at Metz. At the age of sixteen he joined the Jesuits, and was superior successively of the monasteries at Amiens, Alençon, Orléans, and Paris. He was one of the Jesuits who went into England during the reign of Charles I; but the condition of the country was so unsettled that he returned to his native land. He died at Paris, April 30, 1657. He wrote several works which have been reprinted, even at the present day. We mention *De la Connaissance et de l'Amour de Jésus-Christ* (1634):—*Méthode pour bien mourir* (1640):—*L'Homme Spirituel* (1646):—*L'Idée d'un Parfait Chrétien, ou la Vie de M. de Renty* (1651):—*L'Homme Religieux* (1657).

Saint-Maur. See MAUR (*St.*), CONGREGATION OF.

Saint-Pard (PIERRE NICHOLAS VAN BLOTAQUE), *Abbé de*, a Belgian ascetic writer, was born, Feb. 9, 1734, at Givet-Saint-Hilaire. He studied with the Jesuits at Diman, joined their order, and was sent to teach in various colleges. At the time of the suppression of the society he was at Vennes, but went to Paris; and, learning of the interdict of Parliament, he changed his name to that of *Saint-Pard*, which he retained till his death, which occurred at Paris, Dec. 1, 1824. During the Revolution he remained in Paris, and, though obliged to conceal himself, he still exercised his ministerial functions. Under the Directory he became bolder, and was twice imprisoned for preaching in public. In 1801 he became honorary canon of Notre Dame, and had charge of the parish of St. Jacques de Haut-Pas, which he held during the remainder of his life. Of his writings we have *Retraite de dix Jours* (1773):—*L'Âme Chrétienne formée sur les Maximes de l'Évangile* (1774):—*Exercices de l'Amour du Péniét* (1799). He abridged and re-edited *Le Livre des Elus* (1759), and *La Connaissance de Jésus-Christ* (1772).

Saint-Pierre, CHARLES IRÉNÉE CASTEL, a French ecclesiastic, was born near Barfleur, Normandy, Feb. 18, 1658. He was educated by the Jesuits at Caen, and joined the priesthood. He went to Paris in 1686, and succeeded Bergeret in the Academy, 1695. He became chaplain of the bishop of Orleans in 1702, and received, through him, the abbey of Tiron. He attended the Congress of Utrecht with cardinal Polignac in 1712. In some of his writings (*Discours sur la Polysynodie*) he severely judged Louis XIV, and advocated a constitutional government. For this he was expelled from the Academy; but an association known as the *Club de l'Entresol* gave him opportunities to expound his humanitarian schemes. It was closed seven years after (1731) by cardinal Fleury. He died April 29, 1743. Most of his writings are included in his *Ouvrages de Politique et de Morale* (Rotterdam, 1738-41, 18 vols.).

Saint-Simon, Claude (the younger), a French prelate, was born in 1695. In 1716 he became superior of the abbey of Jumièges. Being made bishop of Noyon, he was afterwards (in 1733) transferred to Metz: he there founded a seminary which bears his name, and in which he died, Feb. 29, 1760.

Saint-Simon, Claude Henri, *Count of*, one of the most eminent so-called socialistic or communistic philosophers of modern times. He was born at Paris of an ancient and noble family, April 17, 1760. Grown up in the midst of religious and social agitation, he entered the army and was made a captain at the age of seventeen. In 1779 he went to America, fought under Bouillé and Washington, was captured with the count de Grasse in 1782, and, at the conclusion of the war, returned to France and was promoted to a colonelcy. In 1785 he visited Holland and endeavored to induce the government to join with France in an expedition against the English in the East Indies. He then went to Spain with an eccentric project of uniting Madrid by a canal

with the sea. Failing in both schemes, he returned to Paris, and, finding the Revolution in full blaze, laid aside his aristocratic name, and fell in with the popular current. By speculating in confiscated property he found himself, in 1797, in possession of 144,000 francs in specie. With this capital he led, the next ten years, a life of travel, study, experiment, and pleasure, and, in the intervals, brooded over a fanciful scheme of regenerating human society. Locating himself in the Latin Quarter, Paris, he studied the whole circle of physical and social sciences. This was his theoretical education; but he wanted also an experimental education. In order to this, he endeavored to realize in his own person the whole circle of human experiences, joys, and sorrows. He entered society; he gave banquets and balls; he gambled, drank, and debauched himself; he courted contagious diseases; he tried to keep off old age by medicaments and paint; he set all moral law aside, justifying it by the maxim that the end sanctified the means. It was right for him, the reformer, to do this. How could he apply the remedy if he had not himself felt the pain! He married in 1801, but, soon dissatisfied, he put away his young wife and sought out another. From this state of dissipation and theorizing he awoke just in time to find that his money was all gone, and that poverty was staring him in the face. The germs of Saint-Simon's system are given in his first publication, *Lettres d'un Habitant à Genève* (1802). All men of thought were to form the spiritual order, all men of action the temporal order—an adaptation to modern society of the mediæval distinction of the Romish Church. This work was followed in 1807 by his *Introduction aux Travaux Scientifiques du 19^{ème} Siècle* (Paris, 1807, 2 vols.). The novelty of these views attracted to Saint-Simon a circle of admiring youth, among whom were Olinde Rodrigues, Augustin Thierry, and Auguste Comte. This was the beginning of organized Saint-Simonism. In co-operation with these disciples, he now produced in rapid succession a *Prospectus d'une Nouvelle Encyclopédie* (1810):—*De la Réorganisation de la Société Européenne* (1814):—*L'Industrie* (1817):—*L'Organisateur* (1819):—*Système Industriel* (1821–22):—*Catéchisme des Industriels* (1823):—*Opinions Littéraires, Philosophiques et Industrielles* (1825). But these ambitious works did not produce the revolution in society which Saint-Simon looked for. They fell still-born from the press, or were left unread. The pretended saviour of mankind was oppressed with poverty and discouragement. Reaching the lowest depths in March, 1823, he made a fruitless attempt at suicide, but succeeded only in blowing out one of his eyes. Recovering from his wounds and despondency, he now summoned up his last powers in an endeavor to give the world a new religion. The result was his *Nouveau Christianisme* (Paris, 1825). In this he used many thoughts from the Bible. God is the infinite, universal being; he is the all; everything is in him and by him; his central essence is love; he reveals himself as reason, understanding, wisdom, strength, beauty. Man is his highest revelation. Man's ideal essence is also love. The ideal condition of humanity is not the enslaving of the one by the other, but the improvement of each by the other, and the transformation of earth into a paradise. By this process all evil is to be overcome and all bliss to be attained; men are to yield obedience to the authority of wisdom; all are to labor for the happiness of all. But the God of Saint-Simon was a vague abstraction; the system was simply materialism with a slight tincture of naturalistic pantheism. Material well-being was the ideal paradise; Saint-Simonism was hedonism; Christianity was but a transient form of man's endeavor to find happiness. Catholicism did a good work in its day, so also did Protestantism; but Saint-Simonism was now to supersede all previous systems. The new era was to be brought about by two principles—an end and a means. The end was, the most rapid possible amelioration, physical and moral,

of the condition of the class the most numerous and poor. The means was, to each man a vocation according to his capacity, and to each capacity a reward according to its works. The result aimed at was a sort of democratic epicureanism. It was an outbirth of a one-sided brooding over the conflict between capital and labor, noble and peasant, priest and devotee. It sprang of fanatical enthusiasm for a vaguely comprehended good; it was devoid of high ethical thoughts: it had no just appreciation of the philosophy of history: hence it was of a highly artificial and sentimental character, and its speedy collapse was a matter of logical necessity. So soon, therefore, as Saint-Simon died (May 19, 1825), and the enthusiasm of his first disciples had occasion to come into contact with the practical facts of society, the system as a whole vanished into thin air. Dissensions arose. Rodrigues, Enfantin, Leroux, Bazard, Comte, each interpreted the master for himself, and each went his own way. The last remnant of organized Saint-Simonism was dispersed by decree of a civil court in August, 1832. After this date most of the members returned to the ranks of ordinary life, and the system became simply a matter of social history. See Carové, *Der Saint-Simonismus* (Leipzig, 1831); Veit, *Saint-Simon* (ibid. 1834); Matter, in *Stud. u. Krit.* (1832); Herzog, *Real-Encyclop.* xiii, 317–320; *Encycl. Brit.* (8th ed.), vol. xix. (J. P. L.)

Saint-worship. See INVOCATION OF SAINTS.

Sainte-Aulaire, MARTIAL LOUIS DE BEAUFOIL DE, a French prelate, was born in 1720, and in 1759 he was called to the bishopric of Poitiers, and made deputy to the state assembly of 1789. He was adverse to all innovations, and strongly opposed to the requirements of the law in obliging ecclesiastics to take the civil oath. In 1791 he went to England and afterwards to Switzerland, where he died in 1798.

Sainte-Beuve, JACQUES DE, a French theologian, was born at Paris, April 26, 1613. He received his degree in 1638 at the Sorbonne, and became royal professor of theology in that institution, where his learning gained for him so wide a reputation that he was considered one of the most ready casuists of his time. His refusal to subscribe to the censure passed upon two propositions of Arnault caused him to lose his professorship in 1656. He was also deprived of his authority as preacher; but as he afterwards showed more submission to the dictates of the Church by signing the new formula prescribed Feb. 15, 1665, by Alexander VII, he was chosen theologian of the French clergy. This position brought him a pension, and also obliged him to write a *Théologie Morale* for the assembly at Mantes. Sainte-Beuve lived in Paris in retirement, but was sought for consultation by all the dignitaries of his time. It was said that he not only ruled all of one city, but a whole kingdom. He died Dec. 15, 1677. His writings are, *De Confirmatione* (1686):—*De Extrema Unctione* (1686):—*Décisions de Cas de Conscience* (1686). These works were edited after his death by his brother Jérôme.

Sainte-Marthe, CLAUDE DE, a French ascetic author, was born at Paris, June 8, 1620. He entered the priesthood in early life, and lived for a time in solitude. After being for some years curé of Mondeville, in the diocese of Sens, he entered the order of Port-Royal des Champs. Twice he was obliged to leave on account of persecution, and finally, in 1679, went to live at his château at Courbeville, where he died Oct. 11, 1690. His writings are, *Défense des Religieuses de Port-Royal et de leur Directeurs* (1667):—*Traité de Piété* (1702):—*Lettres de Piété et de Morale* (1709). He wrote part of the *Morale Pratique des Jésuites*, and was engaged in the translation of the New Testament by Mons. Besides these, he left many petty works, sermons, and letters.

Sainte-Valier, JEAN BAPTISTE DE LACROIX DE,

a French prelate, was born at Grenoble, Nov. 14, 1653. He became chaplain to Louis XIV, and in 1684 was appointed vicar-general of Quebec by bishop Laval. He arrived in Canada July 30, 1685, returned to France Nov. 1687; was consecrated bishop of Quebec, Jan. 25, 1688, and went back to Canada in August of the same year; founded the general hospital at Quebec, was captured by the English at sea while returning from a visit to France, July, 1704, and remained a prisoner until 1709. He died at Quebec, Dec. 26, 1727. He was the author of *État Présent de l'Eglise et de la Colonie Française dans la Nouvelle France* (1688).

Saïr. See SATYR.

Saitis, in Greek mythology, is a surname of *Minerva*, under which she possessed a temple on the mountain Pontinus, near Lerna, in Argolis. This Saitic worship was doubtless derived from Sais, in Egypt, where the goddess Neith was adored, the latter service being incorporated with that of *Minerva* by the Greeks.

Saitons, in Prussian mythology, were persons who inflicted wounds on themselves, and spilled their blood in the sacred groves, in order to make atonement to the gods for the sins of other people.

Saivas, the general name given to those among the Hindûs who worship Siva the Destroyer, one of the members of the Trimurti. The only form under which this deity is worshipped is that of the *Linga*, which they adore either in temples, in their houses, or on the side of a sacred stream. "The worship of Siva seems to have been, from a remote period, rather that of the learned and speculative classes than that of the masses of the people. In a renowned work called the *Sankaradigvijaya*, or the victory of Sankara over the world, composed by Anandagiri, one of the disciples of Sankara, several subdivisions of the Saivas are named—viz. the *Saivas*, properly so called, who wore the impression of the *Linga* on both arms; the *Raudras*, who had a trident stamped on the forehead; the *Ugras*, who had the drum of Siva on their arms; the *Bhaktas*, with an impression of the *Linga* on their foreheads; the *Jangamas*, who carried a figure of the *Linga* on their heads; and the *Pasupatas*, who imprinted the same symbol on the forehead, breast, navel, and arms. The present divisions of the Saivas, however, are the following: the Dandins and Dasnâmi-Dandins; the Yogins; the J ngamas; the Paramahansas; the Aghorins; the Urdhabâhus; the Akâsmukhins and Nakhins; the Gûdaras; the Rûkharas, Sûkharas, and Ukharas; the Karalingins; the Bramachârins; and the Nagas." Each division is characterized by some peculiarities of dress, self-torture, tenets, etc. (see Wilson, *Religious Sects of the Hindûs* [Lond. 1862], i, 188 sq.).

Saivo Oniak, in Lapp mythology, was a mountain deity worshipped under the symbols of peculiarly shaped stones or mountains.

Sajotkatta, a term given by the North American Indians to those persons who enjoy the special favor of their patron spirits, and are through such aid enabled to discover things that are hidden, to foretell future events, to bewitch other persons, to perform extended journeys in the soul while absent from the body, etc.—in short, the most cunning impostors in the tribes. The Iroquois equivalent for this title is *Agottsimachs*, i. e. seers.

Sakar, in Mohammedan writers, is one of the seven hells, which serves as the place in which Parsees are punished for being what they are.

Sakhi Bhavas, a Hindû sect who worship Radha as the personification of the *Sakti* or *Krishna*.

They assume the female garb, and adopt not only the dress and ornaments, but the manners and occupations of women. The sect are held in little estimation, and are very few in number. They occasionally lead a mendicant life, but are rarely met with. It is said that the only place where they are to be found in any number is Jaypur. There are a few at Benares, and a few scattered throughout several parts of Bengal.

Sakhtar is the Parsee name for the heaven which encloses the heaven of the fixed stars, and which is immovable and inhabited by Ormuzd alone.

Sakia, in Arabian mythology, is a Mohammedan name for the god of a primeval race of giants and demons who dwelt in Arabia Petræa, and who drew down rain to the earth.

Sakin, in Scandinavian mythology, is one of the thirty-seven rivers of hell.

Sakkuto, ABRAHAM BEN-SAMUEL, a learned Jewish writer, was born at Salamanca about A.D. 1450. He was a celebrated astronomer, mathematician, historian, and lexicographer, and his distinguished talents secured for him the professional chair of astronomy at Saragossa. When he had to quit Spain, in 1492, he repaired to Portugal, where king Emmanuel appointed him chronographer and astronomer royal. On the banishment of the Jews from Portugal, he retired to Tunis. It was here that he completed, in 1504, the famous chronicle entitled סֵפֶר יְהוֹשֻׁעַ (The Book of Genealogies), which comprises a chronological history of the Jews from the creation to A.M. 5260 = A.D. 1500. In this elaborate work Sakkuto gives an account of the oral law as transmitted from Moses through the elders, prophets, sages, etc.; the acts and monuments of the kings of Israel, as well as of the surrounding nations, in chronological order; the Babylonian colleges at Sora and Pumbedita; the events which occurred during the period of the second Temple; the different sects of that period—viz. the Pharisees, Sadducees, Essenes, and Nazarites; the princes of the captivity, and the rectors of the colleges after the close of the Talmud; and the period down to the end of the 15th century. Sakkuto's work, which is an encyclopædia of Jewish literature, was first published at Constantinople (1566): then, with many additions and glosses, at Cracow (1581), Amsterdam (1717), Königsberg (1857), and from a MS. in the Bodleian Library, with many corrections, additions, etc., by Filipowski (Lond. 1857). Sakkuto also wrote a Rabbinic Aramaic lexicon to the Chaldeé paraphrases, the Midrashim, and Talmud, entitled הַפְּסֻקִּים לְסֵפֶר הַיְּהוֹשֻׁעַ (i. e. *Supplements to the Book Aruch*), of which an account is given by Geiger in the *Zeitschrift der D. M. G.* xii, 144 sq. (Leips. 1858): מְהוּרָה לְנֶפֶשׁ (Sweet to the Soul), on the future state, the separation of spirit from body, etc. (Constantinople, 1516). See Fürst, *Bibl. Jud.* iii, 200 sq.; Rossi, *Dizionario Storico* (Germ. transl.), p. 334; Steinschneider, *Catalogus Librorum Hebr. in Bibl. Bodl.* p. 706 sq.; Kitto, *Cyclop. s. v.*; Lindo, *Hist. of the Jews*, p. 267; Finn, *Sephardim*, p. 452; Da Costa, *Israel and the Gentiles*, p. 284; Etheridge, *Introd. to Hebr. Literature*, p. 451 sq.; Grätz, *Gesch. d. Juden*, ix, 18 sq., 418, 458, 474; Jost, *Gesch. d. Judenth. u. s. Secten*, iii, 113. (B. P.)

Saktas, the worshippers of the *Sakti* (q. v.); the female principle, or the divine nature in action, which is personified under different forms, according as the worshippers incline towards the adoration of Vishnu or Siva—Saraswati being the *Sakti*, or wife, of Brahma; Lakshmi the *Sakti*, or wife, of Vishnu; and Devi or Durga the *Sakti*, or wife, of Siva. Since Siva is the type of destruction, his energy, or wife, becomes still more the type of all that is terrific. As a consequence, her worship is based on the assumption that she can be propitiated only by practices which involve the destruction of life, and in which she herself delights.

Such a worship leads to brutalism and licentiousness, and it became the worst of all forms which the various aberrations of the Hindû mind assumed. Appealing to the superstitions of the vulgar mind, it has its professors chiefly among the lowest classes. The works from which the tenets and rites of this religion are derived are known by the collective name of *Tantras*; but as in some of these works the ritual enjoined does not comprehend all the impure practices which are recommended in others, the sect became divided into two leading branches—the *Dakshinacharins* and *Vamacharins*, or the followers of the right-hand and left-hand ritual. The *Dakshinacharins* are the more respectable of the two, although they indulge in practices contrary to the Vedic ritual. The *Vamacharins* adopt a ritual of the grossest impurities. Their object is, by reverencing Devi, who is one with Siva, to obtain supernatural powers in this life, and to be identified after death with Siva and his consort. The worship of Sakti requires the presence of a female as the living representative and type of the goddess, and is mostly celebrated in a mixed society—the men representing Bhairava (or Siva as the Terrific), and the women Bhairavi (or Sakti as the Terrific). The ceremony generally terminated with the most scandalous orgies among the votaries. The members of the sect are very numerous, especially among the Brahminical caste. All classes are, however, admissible and equal at these ceremonies. The particular insignia of the Saktas are a semicircular line or lines on the forehead of red sanders or vermilion, or a red streak up the middle of the forehead, with a circular spot of red at the root of the nose. They use a rosary made of the seeds of the el-oarpus or of coral beads, but of no greater length than may be concealed in the hand. In worshipping they wear a piece of red silk round the loins and decorate themselves with garlands of crimson flowers. Two other sects are likewise mentioned as belonging to the Saktas, but it is doubtful whether they are still in existence. See Wilson, *Sketch of Religious Sects of the Hindûs*, i, 240 sq.

Sakti, the active volition or omnipotent energy of any one of the members of the Hindû Trimurti. It may exist separately from the essence of Deity, and in such a case it is conceived to be invested with a species of personality, and to be capable of exerting an independent agency. When viewed as the cause of phenomena, or sensible appearances, it is called *MAYA* (q. v.). The Sakti is worshipped by many Hindûs, being personated by a naked female, to whom meat and wine are offered.

Sakti Sodhana, a religious ceremony in connection with the *Sakti*, or personified energy of Deity among the Hindûs. The object of worship in this case should be a dancing-girl, a harlot, a washerwoman, or barber's wife, a female of the Brahminical or Sudra tribe, a flower-girl, or a milkmaid. The ceremony is performed at midnight with a party of eight, nine, or eleven couples. Appropriate *mantras* are to be used, according to the description of the person selected for the Sakti, who is then to be worshipped according to the prescribed form. She is placed disrobed, but richly ornamented, on the left of a circle described for the purpose, with various *mantras* and gesticulations, and is to be rendered pure by the repetition of different formulas. Being finally sprinkled over with wine, the act being sanctified by the peculiar mantra, the Sakti is now purified; but if not previously initiated, she is further to be made an adept by the communication of the radical mantra whispered thrice in her ear, when the object of the ceremony is complete.

Sakuntala, one of the most pleasing female characters of Hindû mythology. She is mentioned as a water-nymph in the *Yajurveda*, is the subject of a beautiful episode of the *Mahabharata*, and is spoken of in the *Purânas*. Her name has become specially familiar in Europe through the celebrated drama of *Kali-*

dâsa, which, introduced to us by Sir William Jones in 1789, became the starting-point of Sanscrit philology in Europe.

Sakyamuni, or SAINT SAKYA, a name of *Buddha* (q. v.), the founder of the Buddhist religion.

Sa'la (Σαλά), the Greek form (Luke iii, 35) of the name of the patriarch SALAH (q. v.), the father of Eber (Gen. x, 24).

Salaam. See SALUTATION.

Salacia, in Roman mythology, was a goddess of the salt waters, the wife of Neptune, and mother of Triton.

Saladin, the name given by Western writers to SALAH ED-DIN YUSSEF IBN-AYUB, the sultan of Egypt and Syria, and the founder of the Ayubite dynasty in those countries. As the great Moslem hero of the third crusade, and the beau-ideal of Moslem chivalry, he is one of the most interesting characters presented to us by the history of that period. He belonged to the Kurdish tribe of Kavad, and was born at Tekrit (a town on the Tigris, of which his father, Ayub, was *kutub*, or governor, under the Seljuks) in 1137. Following the example of his father and uncle, he entered the service of Nouredin (q. v.), prince of Syria, and accompanied his uncle in his various expeditions to Egypt in command of Nouredin's army. Saladin was at this time much addicted to wine and gambling, and it was not till, at the head of a small detachment of the Syrian army, he was beleaguered in Alexandria by the combined Christians of Palestine and the Egyptians, that he gave indications of possessing the qualities requisite for a great captain. On the death of his uncle, Shirkoh, Saladin became grand-vizier of the Fatimite caliph, and received the title of *El-melek el-nasr*, "the Victorious Prince." But the Christians of Syria and Palestine, alarmed at the elevation of a Syrian emir to supreme power in Egypt, made a combined and vigorous attack on the new vizier. Saladin foiled them at Damietta, and transferred the contest to Palestine, taking several fortresses, and defeating his assailants near Gaza; but about the same time his new-born power was exposed to a still more formidable danger from his master, Nouredin, whose jealousy of the talents and ambition of his able young lieutenant required all the skill and wariness at Saladin's command to allay. On Nouredin's death, in 1174, Saladin began a struggle with his successor, which ended in his establishing himself as the sultan of Egypt and Syria, a title which was confirmed to him by the caliph of Bagdad. The next ten years were occupied in petty wars with the Christians, and in the arrangement and consolidation of his now extensive dominion. The plundering by the Christians of a rich pilgrim caravan on its way to Mecca, an infringement of the treaty with Saladin, brought down upon them the latter's vengeance. Their army suffered a dreadful defeat at Tiberias (July 4, 1187). The king of Jerusalem, the two grand-masters, and many other warriors of high rank were taken captive; Jerusalem was stormed (Oct. 2), and almost every other fortified place in Palestine was taken. The news of this great success of the infidels being brought to Western Europe, aroused the enthusiasm of the Christians to its highest pitch, and a powerful army of crusaders, headed by the kings of France and England, speedily made their appearance on the scene of strife. They captured Acre in 1191, and Richard Cœur-de-Lion, at the head of that portion of the crusading army which adhered to him, continued the war with success, twice defeated Saladin, took Casarea and Jaffa, and finally obtained a treaty for three years (Aug. 1192), by which the coast from Jaffa to Tyre was yielded to the Christians. In the following year, Saladin died at Damascus of a disease under which he had long suffered. Saladin was not a mere soldier; his wise administration left behind it traces which endured for centuries; and the citadel of Cairo and sundry canals, dikes, and roads are existing evidences of his careful attention to

the wants of his subjects. In him the warrior instinct of the Kurd was united to a high intelligence; and even his opponents frankly attribute to him the noblest qualities of mediæval chivalry, invincible courage, inviolable fidelity to treaties, greatness of soul, piety, justice, and moderation.

Salagramma, in Hindû mythology, was a stone into which Vishnu was transformed by the curse of a virtuous woman after he had violated her chastity in the guise of her husband.

Sa'lah (Heb. *She'lach*, שֶׁלַח, something sent forth, as a *javelin* or a *sprout*; Sept. and New Test. Σαλά, but Σάλα in 1 Chron. i, 24; A. V. "Shelah" in 1 Chron. i, 18, 24), the only named son of the patriarch Arphaxad, and the father of Eber (Gen. x, 24; xi, 12, 13, 14, 15; 1 Chron. i, 18, 24), B.C. cir. 2478. See **SALA**. "The name is significant of *extension*, the cognate verb (שֶׁלַח) being applied to the spreading-out of the roots and branches of trees (Jer. xvii, 8; Ezek. xvii, 6). It thus seems to imply the historical fact of the gradual extension of a branch of the Shemitic race from its original seat in Northern Assyria towards the river Euphrates. A place with a similar name in Northern Mesopotamia is noticed by Syrian writers (Knobel, in *Gen. xi*); but we can hardly assume its identity with the *Salah* of the Bible. Ewald (*Gesch.* i, 354) and Von Bohlen (*Introd.* to *Gen.* ii, 205) regard the name as purely fictitious, the former explaining it as a *son* or *offspring*, the latter as the *father* of a race. That the name is significant does not prove it fictitious, and the conclusions drawn by these writers are unwarranted."

Salai, or **Salaino**, ANDREA, an Italian painter, was born about the year 1500, but the time of his death is not known. From an humble position in the studio of Leonardo da Vinci, he finally became the favorite pupil of his master, and his pictures show the same softness which characterizes those of the great artist. In Milan may be seen his *Holy Family* and *St. John in the Desert*, and at Paris an *Adoration of the Magi*, besides many others scattered through Europe.

Salamander, a kind of imaginary beings belonging rather to the physico-philosophical systems of the Cabalists than to the mythology of any particular people. They were supposed to inhabit fire as their proper element, as the Undines made their home in water; and this idea probably gave rise to the notion that the amphibious, lizard-like reptiles of the species which are dotted with black, yellow, or red spots are likewise able to resist the destructive power of fire.

Salaminus, in Greek mythology, is a surname of *Jupiter*, derived from Salamis, in Cyprus, where a temple was erected to him by Teucer.

Salāmis, in Greek mythology, was a daughter of the river-god Asopus, whose name was transferred to the island of Salamis, and who became by Neptune the mother of Cychreus.

Sal'amis (Σαλαμίς, perhaps from ἅλς, *salt*, as being on the sea), a city at the east end of the island of Cyprus, and the first place visited by Paul and Barnabas on the first missionary journey after leaving the mainland at Seleucia. See **PAUL**. Two reasons why they took this course obviously suggest themselves, viz. the fact that Cyprus (and probably Salamis) was the native place of Barnabas, and the geographical proximity of this end of the island to Antioch. But a further reason is indicated by a circumstance in the narrative (Acts xiii, 5). Here alone, among all the Greek cities visited by Paul, we read expressly of "synagogues" in the plural. Hence we conclude that there were many Jews in Cyprus. This is in harmony with what we read elsewhere. To say nothing of possible mercantile relations in very early times (see CHITTIM), Jewish residents in the island are mentioned during the period

when the Seleucidae reigned at Antioch (1 Macc. xv, 23). In the reign of Augustus, the Cyprian copper-mines were farmed to Herod the Great (Josephus, *Ant.* xvi, 4, 5), and this would probably attract many Hebrew families: to which we may add evidence to the same effect from Philo (*Legat. ad Caium*) at the very time of Paul's journey. Again, at a later period, in the reign of Trajan, we are informed of dreadful tumults here, caused by a vast multitude of Jews, in the course of which "the whole populous city of Salamis became a desert" (Milman, *Hist. of the Jews*, iii, 111, 112). Hadrian, afterwards emperor, came to the aid of the Cypriots. He overcame the Jews, and expelled them from the island, forbidding any of that nation to approach its coasts; and so strictly was this carried out that if a Jew were ever cast by shipwreck on the island, he was put to death. We may well believe that from the Jews of Salamis came some of those early Cypriot Christians who are so prominently mentioned in the account of the first spreading of the Gospel beyond Palestine (Acts xi, 19, 20) even before the first missionary expedition. Mnason (xxi, 16) might be one of them. Nor ought Mark to be forgotten here. He was at Salamis with Paul and his own kinsman Barnabas; and again he was there with the same kinsman after the misunderstanding with Paul and the separation (xv, 39). See **MARK**.

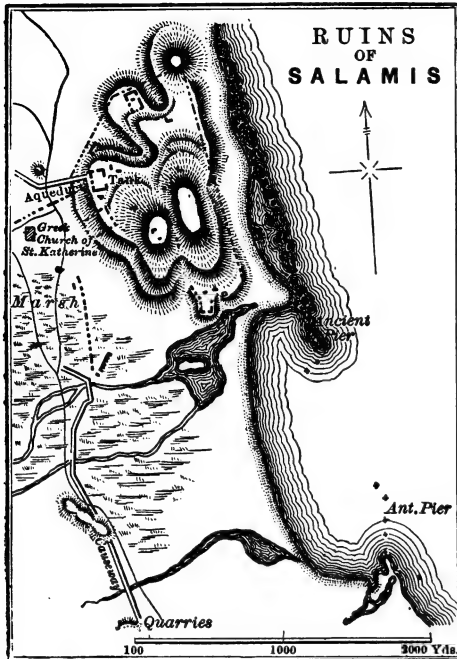

Coin of Salamis with the head of Ptolemy V.

Salamis was not far from the modern Famagosta. Legend ascribed its origin to the Æacid Teucer. After various fortunes in the connections of the Greek states, it finally fell under the power of the Ptolemies. It was situated on a bight of the coast, a little to the north of a river called the Pedæus, on low ground, which is, in fact, a continuation of the plain (anciently called Salaminia) running up into the interior towards the place where Nicosia, the present capital of Cyprus, stands. We must notice in regard to Salamis that its harbor is spoken of by Greek writers as very good; and that one of the ancient tables lays down a road between this city and Paphos (q. v.), the next place which Paul and Barnabas visited on their journey. Salamis again has rather an eminent position in subsequent Christian history. Constantine or his successor rebuilt it and called it *Constantia*, and, while it had this name, Epiphanius was one of its bishops. In the reign of Heraclius the new town was destroyed by the Saracens. See **CYPRUS**.

Very little of the ancient city is now standing; but on the outside of the city recent travellers have seen the remains of a building two hundred feet in length, and six or eight feet high; also a stone church and portions of an aqueduct by which water was brought to the city from a distance of thirty miles. Of the travellers who have visited and described Salamis we must particularly mention Pococke (*Descr. of the East*, ii, 214) and Ross (*Reisen nach Kos, Halikarnassos, Rhodos, und Cypern*, p. 118-125). These travellers notice, in the neighborhood of Salamis, a village named *St. Sergius*, which is doubtless a reminiscence of Sergius Paulus, and a large Byzantine church bearing the name of *St. Barnabas*, and associated with a legend concerning the discovery of his relics. The legend will be found in Cedrenus (i, 618, ed. Bonn). See **BARNABAS**; **SERGIUS PAULUS**. See Smith, *Dict. of Class. Geog.* ii, 876 sq; Conybeare and Howson, *Life and Epistles of*

St. Paul, i, 169; *Lewin, St. Paul*, i, 120 sq. On the coins of *Salamis*, see *Eckhel*, iii, 87.

Salary (Lat. *salarium*, salt-money, salt being part of the pay of the Roman soldier), an annual or periodical payment for services. Nothing like the provisions of the Levitical law, for the maintenance of the clergy, was known in the primitive Church. The duty, however, of the Church to maintain her religious teachers is implied in the New Test. "The workman is worthy of his meat," says Christ (Matt. x, 10), to which the apostle appeals, "Even so hath the Lord ordained that they which preach the Gospel should live of the Gospel" (1 Cor. ix, 14). In the apostolic age the maintenance of the clergy consisted merely in the supply of their personal wants (2 Cor. xi, 7, 8; Phil. iv, 16-18). There were probably in early times no fixed stipends for the ministers because the Church did not possess property; and when at length specific provision was made for the support of the clergy, it was not by any ordinance of the Church, but by the law of the State. Fees paid to the clergy for services rendered were called *sportæ*, *sportellæ*, and *sportulæ*; probably in allusion to the bringing of the first-fruits in a basket, *sportula*. They were not the same as the *jura stolæ*, surplice fees (q. v.), which were unknown in the primitive Church. It was an established rule that no fees should be received for religious services. The first departure from it began with the celebration of religious ordinances in a private manner, in which the individual, at whose request this private celebration was performed, was required to pay something as an equivalent for the public and voluntary oblations that would otherwise have been made. So far as the clergy of the primitive Church can be said to have had any salary, it was paid, either according to their necessities or according to some general rule, from the treasury of the Church, which was supplied chiefly from voluntary contributions. Various rules were, from time to time, given for the distribution of funds. One required that they should be divided into three equal parts, one of which was to be paid to the bishops, another to the clergy, and the third was to be expended in making repairs, etc.

In the 4th century the Church and clergy came into the possession of real property. By a law of Constan-

tine in the year 321, the clergy were permitted to receive donations and bequests. Liberal grants were also made by Constantine and by Gratian, Theodosius the Great, and other emperors. By other means also the revenues of the Church were enriched: 1. On the demolition of heathen temples by Theodosius the Great and his sons, the proceeds were applied to the benefit of the clergy, or appropriated to religious uses. 2. On the same principle, the property belonging to heretics was sequestered. 3. The property of such clergy as died without heirs, and of all who relinquished their duties without sufficient cause, became the property of the Church. 4. The Church was made heir-at-law of all martyrs and confessors who died without near relations. 5. By tithes and first-fruits, which, however, were unknown until the 4th or 5th century. Charlemagne first required the payment of tithes by statute law, and enforced the duty by severe penalties. His successors confirmed and completed the system of tithe by law which was subsequently introduced into England and Sweden. In the Eastern Church the support of religion was never legally enforced, but was urged as a religious duty, and tithes were paid as a voluntary offering. See Coleman, *Christ. Antiquities*, p. 148 sq.

Salasad'ai (Σαλασαδαι, v. r. Σαρασαδαι, etc., a corruption from the Sept. Σουρισαδαι, for *Zurishaddai*, in Numb. i, 6), a name given (Jud. viii, 1) as that of an Israelite, father of Samael, in the ancestry of Judith (q. v.).

Sala'thiel (Heb. *Shealtiel*, שְׁאֲלִיֵּאל, asked of God; Sept. and New Test. Σαλαθιηλ; more correctly, "Shealtiel," in the A. V. in Ezra iii, 2; Neh. xii, 1; Hag. i, 12, 14; ii, 2). It is customary to distinguish two of this name, from the apparent difference of parentage in Matt. i, 12 and Luke iii, 27, but probably they were one, and the manner of keeping the Jewish records will readily suggest methods of reconciling the passages (comp. Strong, *Harmony and Expos. of the Gospels*, p. 16). See GENEALOGY OF CHRIST. Sala-thiel was the son of Jeconiah, perhaps grandson of Neri (Luke iii, 27), and father of Zerubbabel (1 Chron. iii, 17; Ezra iii, 2; Neh. xii, 1; Hag. i, 12, 14; ii, 2; Matt. i, 12; Luke iii, 27. See SHEALTIEL.

Sal'cah (Heb. *Salkah*, סַלְכָּה, from an Arabic root, signifying migration; Sept. Σελχά, v. r. Σελά, Σελχάι, Ἐλχά, etc.; A. V. "Salchah," in Deut. iii, 10 [*Targum Pseudo-Jon.* gives it סֶלֻכְיָה, i. e. *Seleucia*; though which Seleucia they can have supposed was here intended it is difficult to imagine]), a city named in the early records of Israel as the extreme limit of Bashan (Deut. iii, 10; Josh. xiii, 11). This city appears to have been one of the old capitals of Og's kingdom (Josh. xii, 5). A statement in 1 Chron. v, 11 seems to show that Salchah was upon the eastern confines of both Manasseh and Gad, although it was really beyond the bounds of Palestine as occupied by the Hebrews. On another occasion the name seems to denote a district rather than a town (Josh. xii, 5). In later Jewish history the name is never mentioned, and the probability is that the city soon fell into the hands of the original inhabitants. By Eusebius and Jerome it is merely mentioned, apparently without their having had any real knowledge of it.

Salchah is, doubtless, identical with the present town of *Sülkhad*, which stands at the southern extremity of the Jebel Hauran, twenty miles south of Kunawat (the ancient Kenath), which was the southern outpost of the Leja, the Argob of the Bible. *Sülkhad* is named by both the Christian and Mohammedan historians of the Middle Ages (Will. of Tyre, xvi, 8, "Selcath;" Abulfeda [*Tab. Syr.* p. 106; also in Schultens's *Index Geogr.* "Sarchad"). It was visited by Burckhardt (*Syria*, Nov. 22, 1810), Seetzen, and others, and more recently by Porter, who describes it at some length (*Five Years in Damascus*, ii, 176-216). Its identification with Salchah

seems to be due to Gesenius (Burckhardt, *Reisen*, p. 507). Immediately below Sülkhad commences the plain of the great Euphrates desert, which appears to stretch, with hardly an undulation, from here to Busra, on the Persian Gulf. The town is of considerable size, from two to three miles in circumference; it occupies a strong and commanding position on a conical hill. On the summit stands the castle, a circular building of great size and strength, surrounded by a deep moat. The external walls are still tolerably perfect, and were evidently founded not later than the Roman age, though the upper portions are Saracenic. The sides of the cone immediately beneath the walls are steep and smooth, and are covered with light cinders and blocks of lava, showing that it was originally a volcano. The city occupies the lower slopes on the south, extending to the plain. A large number of the houses are still perfect, with their stone roofs and stone doors, though they have been long deserted. On the walls of the castle, and among the ruins, there are Greek inscriptions, bearing dates equivalent to A.D. 246 and 370; while an Arabic record on the walls of a large mosque shows that it was built in the year A.D. 1224, and a minaret near it about four centuries later. The latter appears to be the newest building in the place. The country round Salcah is now without inhabitants; but traces of former industry and wealth, and of a dense population, are visible. The roads, the fields, the terraces, the vineyards, and the fig-orchards are there, but man is gone. The view from the summit of the castle of Salcah is one of the most remarkable for desolation in all Palestine. See Porter, *Handbook for Syria*, p. 488; Schwarz, *Palestine*, p. 222. See BASHAN.

Sal'chah (Deut. ii, 10). See SALCAH.

Sale, JOHN, a Methodist Episcopal minister, and "one of the most heroic evangelists and founders of Western Methodism," was born in Virginia in 1769. In 1796 he joined the itinerancy, and was sent to Swaino Circuit, "in the wilds of Virginia, where he had his courage and fidelity tested in breasting the dangers and hardships of a pioneer preacher." His next circuit was the Mattamuskeet, Va.; in 1799 he went to Holston Circuit; in 1803, to the north-western territory of Virginia, where, for nearly a quarter of a century, he alternated between Ohio and Kentucky, a successful circuit preacher and a commanding presiding elder. He died Jan. 15, 1827, exclaiming, "My last battle is fought, and the victory sure! hallelujah!" Mr. Sale was an eminently useful man, and he adorned every relation that he sustained to the Church. See *Minutes of Conferences*, i, 572; Stevens, *Hist. of the M. E. Church*, iv, 106, 148, 149, 338, 431; Sprague, *Annals of the Amer. Pulpit*, vii; Finley, *Sketches*, p. 185, 186; Bangs, *Hist. of the M. E. Church*, ii, 111. (J. L. S.)

Sa'lem (Heb. *Shalem'*, שָׁלֵם, *peaceful*, i. e. uninjured, or whole, as often) occurs in a few passages of Scripture, and in several other notices, as the name of one or more places, although some writers doubt whether it should not in all cases be translated as a simple appellative. It has likewise been usually regarded as commemorated in the name *Jerusalem*. See also SHALEM.

1. (Sept. Σαλήμ, and so N. T.) The place of which Melchizedek was king (Gen. xiv, 18; Heb. vii, 1, 2). Some have inferred, from the circumstances of the narrative (e. g. Bochart, *Phaleg*, ii, 4; Ewald, *Gesch.* i, 410), that it lay between Damascus and Sodom; but although it is said that the king of Sodom—who had probably regained his own city after the retreat of the Assyrians—went out to meet (לִקְרָא) Abraham, yet it is also distinctly stated that this was *after Abraham had returned* (אַחֲרֵי שֶׁבָּרַח) from the slaughter of the kings. The only clue is that afforded by the mention of the valley of Shaveh (q. v.), which seems to have been the "King's Dale" near Jerusalem. See ABSALOM'S PILLAR.

Dr. Wolff, in a striking passage, implies that Salem was—what the author of the Epistle to the Hebrews understood it to be—a title, not the name of a place. "Melchizedek of old . . . had a royal title: he was 'King of Righteousness' (in Hebrew, *Melchi-zedek*); he was also 'King of Peace' (*Melek-Salem*). When Abraham came to his tent, he came forth with bread and wine, and was called 'the Priest of the Highest,' and Abraham gave him a portion of his spoil. Just so Wolff's friend, in the desert of Meru, in the kingdom of Khiva . . . whose name is Abd-er-Rahman, which means 'Slave of the merciful God,' . . . has also a royal title. He is called Shahe-Adaalat, 'King of Righteousness'—the same as *Melchizedek* in Hebrew. When he makes peace between kings, he bears the title Shahe Sülkh, 'King of Peace' (in Hebrew, *Melek-Salem*)."

The main opinion, however, current from the earliest ages of interpretation, is that of the Jewish commentators, who, from Onkelos (*Targum*) and Josephus (*War*, vi, 10; *Ant.* i, 10, 2; vii, 3, 2) to Kalisch (*Comm. on Gen.* p. 360), with one voice affirm that Salem is *Jerusalem*, on the ground that Jerusalem is so called in Psa. lxxvi, 2, the Psalmist, after the manner of poets, or from some exigency of his poem, making use of the archaic name in preference to that in common use (see Reland, *Palæstina*, p. 833). The Christians of the 4th century held the same belief with the Jews, as is evident from an expression of Jerome ("nostri omnes," *Ep. ad Evangelum*, § 7), and Eusebius (in the *Onomast.* s. v.).

Here it is sufficient to say (1) that Jerusalem suits the circumstances of the narrative rather better than any place farther north, or more in the heart of the country. It would be quite as much in Abraham's road, going from the sources of Jordan to his home under the oaks of Hebron, and it would be more suitable for the visit of the king of Sodom. In fact, we know that, in later times at least, the usual route from Damascus avoided the central highlands of the country and the neighborhood of Shechem, where *Salim* is now shown (see Pompey's route in Josephus, *Ant.* xiv, 3, 4; 4, 1). (2) It is, perhaps, some confirmation of the identity—at any rate, it is a remarkable coincidence—that the king of Jerusalem in the time of Joshua should bear the title Adoni-zedek—almost precisely the same as that of Melchizedek.

2. Jerome himself, however, is not of the same opinion. He states (*Ep. ad Evang.* § 7) without hesitation, though apparently (as just observed) alone in his belief, that the Salem of Melchizedek was not Jerusalem, but a town near Scythopolis, which in his day was still called *Salem*, and where the vast ruins of the palace of Melchizedek were still to be seen. Elsewhere (*Onomast.* s. v. Salem) he locates it more precisely at eight Roman miles from Scythopolis, and gives it then name as *Salumias*. Further, he identifies this Salem with the Salim (q. v.) (Σαλειμ) of John the Baptist. That a Salem existed where Jerome thus places it there need be no doubt; indeed, the name has been recovered at the identical distance below Beisân by Van de Velde, at a spot otherwise suitable for Ænon. But that this Salem, Salim, or Salumias was the Salem of Melchizedek is even more uncertain than that Jerusalem was so. The ruins were probably as much the ruins of Melchizedek's palace as the remains at Ramet el-Khalil, three miles north of Hebron, are those of "Abraham's house." Nor is the decision assisted by a consideration of Abraham's homeward route. He probably brought back his party by the road along the Ghôr as far as Jericho, and then, turning to the right, ascended to the upper level of the country in the direction of Mamre; but whether he crossed the Jordan at the Jisr Benat Yakub, above the Lake of Gennesaret, or at the Jisr Mejamia, below it, he would equally pass by both Scythopolis and Jerusalem. At the same time, it must be confessed that the distance of Salem (at least eighty miles from the probable position of Sodom) makes it difficult to suppose that the king of Sodom can have advanced so far to

meet Abraham, adds its weight to the statement that the meeting took place after Abraham had returned—not during his return, and is thus so far in favor of Salem being Jerusalem. See MELCHIZEDEK.

3. Professor Ewald (*Geschichte*, i, 410, note) pronounces that Salem is a town on the further side of Jordan, on the road from Damascus to Sodom, quoting at the same time John iii, 23; but there seems to be no authority for this, nor any notice of the existence of the name in that direction either in former or recent times.

4. A tradition given by Eupolemus, a writer known only through fragments preserved in the *Preparatio Evangelica* of Eusebius (ix, 17), differs in some important points from the Biblical account. According to this, the meeting took place in the sanctuary of the city Argarizin, which is interpreted by Eupolemus to mean "the Mountain of the Most High." "Argarizin" (Pliny uses nearly the same form—Argaris, *H. N.* v, 14) is, of course, *har-Gerizzin*, Mount Gerizim. The source of the tradition is, therefore, probably Samaritan, since the encounter of Abraham and Melchizedek is one of the events to which the Samaritans lay claim for Mount Gerizim. But it may also proceed from the identification of Salem with Shechem, which, lying at the foot of Gerizim, would easily be confounded with the mountain itself. See SHALEM.

5. A Salem is mentioned in Jud. iv, 4 among the places which were seized and fortified by the Jews on the approach of Holofernes. "The valley of Salem," as it appears in the A. V. (τὸν αὐλῶνα Σαλήμ), is possibly, as Reland has ingeniously suggested (*Palest.* p. 977), a corruption of εἰς αὐλῶνα εἰς Σαλήμ—"into the plain to Salem." If αὐλῶν is here, according to frequent usage, the Jordan valley, then the Salem referred to must surely be that mentioned by Jerome and already noticed. But in this passage it may be with equal probability the broad plain of the Mukhna which stretches from Ebal and Gerizim, on the one hand, to the hills on which Salim stands, on the other, which is said to be still called the "plain of Salim" (Porter, *Handbook*, p. 340 a), and through which runs the central north road of the country. Or, as is perhaps still more likely, it refers to another Salim near Zertn (Jezreel), and to the plain which runs up between those two places as far as Jenin, and which lay directly in the route of the Assyrian army. There is nothing to show that the invaders reached as far into the interior of the country as the plain of the Mukhna. The other places enumerated in the verse seem, as far as they can be recognised, to be points which guarded the main approaches to the interior (one of the chief of which was by Jezreel and Engannin), not towns in the interior itself, like Shechem or the Salem near it. See JUDITH, BOOK OF.

6. (Sept. ἐν εἰρήνῃ; Vulg. in pace), Ps. lxxvi, 2. It seems to be agreed on all hands that Salem is here employed for Jerusalem, but whether as a mere abbreviation to suit some exigency of the poetry and point the allusion to the peace (*shalôm*) which the city enjoyed through the protection of God, or whether, after a well-known habit of poets, it is an antique name preferred to the more modern and familiar one, is a question not yet decided. The latter is the opinion of the Jewish commentators, but it is grounded on their belief that the Salem of Melchizedek was the city which afterwards became Jerusalem. (See above.) See a remarkable passage in Geiger's *Urschrift*, etc. p. 74-76. The antithesis in ver. 1 between "Judah" and "Israel" might seem to some to imply that some sacred place in the northern kingdom is here contrasted with Zion, the sanctuary of the south. If there were in the Bible any sanction to the identification of Salem with Shechem (noticed above), the passage might be taken as referring to the continued relation of God to the kingdom of Israel. But the parallelism is rather one of agreement than contrast. Hence, Zion the sanctuary being named in the one member of the verse, it is tolerably certain

that Salem, in the other, must denote the same city. See JERUSALEM.

Salema, in Arabic mythology, is the god of health worshipped by a race of giants who are said to have inhabited Arabia.

Sales, FRANCIS DE. See FRANCIS OF SALES.

Salesians, an order of recluse nuns, otherwise known as *Visitants*. Its founder was count Francis of Sales (q. v.), who conceived the idea of providing an asylum for widows and other females in distress, and of devoting them to the service of the sick and to a religious life. A vision encouraged him to carry forward his purpose, and the active co-operation of a noble widow (saint), Francisca du Chantal, enabled him to succeed. The order of the *Visitation of Mary*, or Salesians, was the result. The first house for their use was secured in 1610, at Annecy, and the second in 1615, at Lyons. Their rules (given by St. Francis) were mild, and intended rather to promote spiritual dispositions and works of mercy than to encourage outward asceticism. The sisters were required to take only the simple vows; strict retirement was imposed only during the period of the novitiate; their apparel was not required to be different from that of ordinary females, except that it should be of black color and modest appearance. In 1618 pope Paul V raised the congregation into an order *De Visitatione B. V. M.* under the rule of St. Augustine, and conferred on it all the privileges accorded to other religious orders, making its special mission the training of female children. The convents were placed under the supervision of the diocesan bishops by the will of their founder. Their number increased rapidly, the first being established at Paris, in 1619; thirteen before Francis died in 1622, and eighty-seven during the life of mother du Chantal (died 1641). The order gradually spread also over Italy, Germany, Poland, Austria, Switzerland, Syria, and North America. It is now one of the most important in the Roman Catholic Church, having one hundred convents with at least three thousand inmates.

The members of the order are classed as choristers, associates, and house companions, the first of which classes performs the duties of the choir, while the last takes charge of the domestic administration of the house. The modern rule is not especially strict, but few special fasts being prescribed. The habit of the order is black, with a black band crossing the forehead, and a small white breast-cloth pendent from the neck, under which a silver cross is suspended from a black band.

Salgameus, in Greek mythology, is an appellative of *Apollo*, derived from the Boeotian town of the same name.

Salian, JACQUES, a learned French Jesuit, was born at Avignon in 1557. He was admitted in 1578 into the Institute of St. Ignatius, where he taught theology, and also in the province of Lyons. He was rector of the College of Besançon, and while on a visit to Paris died of apoplexy, Jan. 23, 1640. His principal work is entitled *Annales Ecclesiastici V. T.* (1619).

Saliana. See SALESIA NS.

Salier, JACQUES, a French theologian, was born at Saulien in the year 1615. He belonged to the order of the Minimes. After having taught theology, he became provincial, and finally assistant of the general of his order. He died at Dijon, Aug. 20, 1707. He wrote, *De Eucharisticis* (1687):—*Cacocephalus* (1694):—*Pensées sur le Paradis et sur l'Âme Raisonnable*, in which there is very little about paradise.

Salig, CHRISTIAN AUGUST, a German theologian of great learning and mystical tendency, was born near Magdeburg, April 6, 1692. His father, a pastor, instructed him in Latin, Greek, and Hebrew. In 1707 he

began to study at Halle, and heard lectures from A. H. Franke, P. Anton, Christian Wolf, and others, also taking frequent part in public disputations against Socinianism and Romanism. From 1710 to 1712 he studied at Jena, under J. F. Buddeus, J. A. Danz, and others, and took his master's degree. In 1714 he delivered lectures, philosophical, theological, and historical, at Halle. The same year he published *Philosophumena Veterum et Recentiorum de Anima et ejus Immortalitate*, at Halle, a work which drew to him the attention of Thomasius. In 1717 he became corrector of the school at Wolfenbüttel, and entered upon his duties with a dissertation, *De Neru Corruptionis ac Instaurationis Ecclesiæ ac Scholarum*. Here the excellent library furnished him welcome means of productive study. In 1723 he issued his work *De Eutychnismo ante Eutychem*, in which he treated also of the history of Nestorianism. For this work he was fiercely accused of Nestorianism himself. The second centenary of the Augsburg Confession occasioned the preparation of Salig's master-work, a complete history of the Augsburg Confession and Apology (Halle, 1730). In 1733 he issued an additional work on the history of Protestantism outside of Lutheranism. In 1735 he published an account of the inner growth and strifes of Lutheranism, which was bitterly assailed because of its frank presentation of men and things as they actually were. As a continuation of his labors in the same field, he undertook a complete history of the Council of Trent, but did not live to finish it. He died at Wolfenbüttel in 1735. He wrote, also, *Notus Prædestinationis Solutus*. See Ballenstedt, *De Vita et Obitu C. A. Saligii* (Helmst. 1738); Herzog, *Real-Encykl.* xiii, 323-325. (J. P. L.)

Salii were priests of Mars Gradivus, and are said to have been instituted by Numa. They were twelve in number, chosen from the patriarchs, and had charge of the sacred shields (*ancilia*), which were kept in the Temple of Mars on the Palatine Hill. The distinguishing dress of the salii was an embroidered tunic bound with a brazen belt, the trabea, and the apex, also worn by the flamines. Each had a sword by his side, and in his right hand a spear or staff. The festival of Mars was celebrated by the salii on the 1st of March, and for several successive days, on which occasion they were accustomed to go through the city in their official dress, carrying the ancilia, singing and dancing. The members of the collegium were elected by co-optation. Tullus Hostilius established another collegium of salii. These were twelve in number, were chosen from the patricians, and appear to have been dedicated to the service of Quirinus. They were called the *Salii Collini, Agonales*, or *Agonenses*.

Sa'lim (Σαλειμ v. r. Σαλλειμ; Vulg. *Salim*), a place named (John iii, 23) to denote the situation of Ænon, the scene of John's last baptisms—Salim being the well-known town or spot, and Ænon a place of fountains, or other water, near it. Christ was in Judæa (ver. 22), and the whole scope of the passage certainly conveys the impression that John was near him, and consequently Salim was either in Judæa or close to its borders. The only direct testimony we possess is that of Eusebius and Jerome, who both affirm unhesitatingly (*Onom.* "Ænon") that it existed in their day near the Jordan, eight Roman miles south of Scythopolis. Jerome adds (under "Salem") that its name was then *Salumias*. Elsewhere (*Ep. ad Evangelum*, § 7, 8) he states that it was identical with the Salem of Melchizedek. A tradition is mentioned by Reland (*Palestina*, p. 978) that Salim was the native place of Simon Zelotes. This in itself seems to imply that its position was, at the date of the tradition, believed to be nearer to Galilee than to Judæa. Various attempts have been more recently made to determine the locality of this interesting spot, but the question can hardly yet be regarded as definitely settled.

1. Some (as Alford, *Greek Test.* ad loc.) propose Shilhim and Ain, in the arid country far in the south of Judæa, entirely out of the circle of associations of John or our Lord. Others identify it with the Shalim of 1 Sam. ix, 4; but this latter place is itself unknown, and the name in Hebrew contains ש, to correspond with which the name in John should be Σεγαλειμ or Σααλειμ.

2. Dr. Robinson (*Bibl. Researches*, iii, 333) suggests the modern village of *Salim*, three miles east of Nablûs; but this is no less out of the circle of John's ministrations, and is too near the Samaritans; and although there is some reason to believe that the village contains "two sources of living water" (*ibid.* p. 298), yet this is hardly sufficient for the abundance of deep water implied in the narrative. A writer in the *Colonial Ch. Chron.* No. cxxvi, 464, who concurs in this opinion of Dr. Robinson, was told of a village an hour east (?) of Salim "named Ain-ûn, with a copious stream of water." Lieut. Conder says (*Tent Work in Palestine*, i, 92) that Wady Farah, in the locality in question, contains a succession of little but perennial springs, from which the water gushes out in a fine stream over a stony bed, and that the village of Ain-ûn lies five miles north of the stream.

3. Dr. Barclay (*City of the Great King*, p. 564) is filled with an "assured conviction" that Salim is to be found in *Wady Seilem*, and Ænon in the copious springs of Ain Farah (*ibid.* p. 559), among the deep and intricate ravines some five miles north-east of Jerusalem. This certainly has the name in its favor, and, if the glowing description and pictorial wood-cut of Dr. Barclay may be trusted, has water enough (*ὕδρα πολλά*) and of sufficient depth for the purpose. But the proximity to Jerusalem is a decided objection. See ÆNON.

4. There is said to be a village called *Salim* in the plain of Mukhna, east of Nablûs, which is probably the Shalem of Gen. xxxiii, 18 (Porter, *Handbook*, p. 340; Robinson, *Bibl. Researches*, ii, 279); but it is too far north to suit the Gospel narrative; and, besides, it cannot be said of it "there is much water there." See SHALEM.

5. The name of *Salim* has been lately discovered by Van de Velde (*Syr. and Pal.* ii, 345) in a position exactly in accordance with the notice of Eusebius, viz. six English miles south of Beisân and two miles west of the Jordan. On the northern base of Tell Redghah is a site of ruins, and near it a Mussulman tomb, which is called by the Arabs Sheik Salim (see also *Memoir*, p. 345). Dr. Robinson (*Bibl. Researches*, iii, 333) complains that the name is attached only to a Mussulman sanctuary, and also that no ruins of any extent are to be found on the spot; but with regard to the first objection, even Dr. Robinson does not dispute that the name is there, and that the locality is in the closest agreement with the notice of Eusebius. As to the second, it is only necessary to point to Keft-Saba, where a town (Antipatris), which so late as the time of the destruction of Jerusalem was of great size and extensively fortified, has absolutely disappeared. The career of the Baptist has been examined in a former part of this work, and it has been shown with great probability that his progress was from south to north, and that the scene of his last baptisms was not far distant from the spot indicated by Eusebius, and now recovered by Van de Velde. See JOHN; JORDAN. Salim fulfils also the conditions implied in the name of Ænon (springs), and the direct statement of the text that the place contained abundance of water. "The brook of Wady Chusneh runs close to it, a splendid fountain gushes out beside the Wely, and rivulets wind about in all directions. . . . Of few places in Palestine could it so truly be said, 'Here is much water'" (*Syr. and Pal.* ii, 346). Drake, however, avers that "inquiries of the Arabs and fellahin of the district resulted in not a man of them even having heard of either of these places," i. e. Bir Salim and Sheik Salim (*Quar. Report of the Pal. Explor. Fund*, Jan. 1875, p. 32). See SALEM.

Salimbeni, Arcangelo, an Italian painter, was born at Sienna, and flourished from the year 1557 to 1579. He was a pupil of Sozzi, and enriched his native town with a great number of pictures. His best are a *Holy Family* and a *Martyrdom of St. Peter*.

Salimbeni, Simondio, son of the following, was born in 1597, and died in 1643. In one of the churches in Sienna are four frescos by this artist.

Salimbeni, Ventura, called the *Cavaliere Bevilacqua*, son of Arcangelo, was born at Sienna in 1567. He studied with his father, and at last went to Rome, where he executed many of his best frescos. The number of these is very large, and in the church of St. Catharine at Sienna are some of the finest. At Florence may be seen his *Apparition of St. Michael*, and in Vienna a *Holy Family*. He died in 1618.

Salisbury, John. See JOHN OF SALISBURY.

Salisbury, Nathaniel, a Methodist minister, was born in Vermont in 1794, and converted in Scipio, Tompkins County, N. Y., at the age of twenty-five years. He was admitted into the Genesee Conference on trial in 1822, ordained deacon in 1824, and elder in 1826. He was employed on circuits eleven years, on stations seventeen years, and on districts, as presiding elder, fifteen years, and was on the supernumerary list eleven years. He was in 1832 a member of the General Conference from the Oneida Conference. He was a man of fine preaching abilities, a safe counsellor, and was greatly beloved by the people. He died in Rome, N. Y., Feb. 18, 1876. See *Minutes of Conferences*, 1876, p. 63.

Salius, in Greek mythology, was one of the companions of Æneas, who secured a prize, consisting of the skin of a lion, in the races.

Salkeld, John, who flourished from 1575 to 1659, was educated partly at Oxford, and, after being for many years a Jesuit in Spain and Portugal, was converted by the eloquence of James I, and by him made vicar of Wellington, Somersetshire. From 1635 to 1645 he was minister of the church at Taunton, Devonshire, from which he was ejected in the civil wars. He published, *A Treatise of Angels* (Lond. 1613, 8vo):—*Treatise of Paradise, of the Serpent, Cherubim*, etc. (1617, 12mo). See *Allibone, Dict. of Authors*, s. v.

Sal'lai (Heb. שַׁלְלַי, *Sallay'*, perhaps *lifted up*, from שָׁלַל, *salál*; or *basket-maker*; Sept. Σηλεί, Σαλαί, v. r. Σηλί), the name of two Hebrews.

1. One of the leaders of the sons of Benjamin, who settled at Jerusalem with 928 tribesmen on the return from captivity (Neh. xi, 8), B.C. cir. 459.

2. One of the chiefs of the priests who returned to Jerusalem with Zerubbabel (Neh. xii, 20), B.C. cir. 459. He is elsewhere (Neh. xii, 7) called SALLU (q. v.).

Sal'lu, the name of two Hebrews, differently spelled in the original.

1. (Heb. שַׁלְלֻ, *Sallu'* [שָׁלַל in Neh. xi, 7], *weighed*; Sept. Σαλώ, v. r. Σηλώ, Σαλώμ.) A Benjaminite, son of Meshullam, dwelling in Jerusalem after the return from exile (Neh. xi, 7; 1 Chron. ix, 7), B.C. cir. 459.

2. (Heb. שָׁלֻ, *Sallu'*, *weighed*; Sept. Σαλού v. r. Σαλλουαί.) Another name (Neh. xii, 7) for SALLAI (Neh. xii, 20), No. 2 (q. v.).

Sallu'mus (Σαλλούμος v. r. Σαλοῦμος), a Græcized form (1 Esdr. ix, 25) of the name SHALLUM (q. v.) of the Heb. (Ezra x, 24).

Sal'ma (Heb. שַׁלְמָא, *Salma'*, a *garment*; Sept. Σαλμάν, Σαλωμών, v. r. Σαλμών), the name of two men.

1. An ancestor of David and Christ (1 Chron. ii, 11); elsewhere SALMON (q. v.).

2. The second-named of three sons of Caleb the son of Hur, called the "father" (i. e. founder) of Bethlehem and

of the Netophathites (1 Chron. ii, 51, 54), B.C. ante 1500. Lord Hervey (*Genealogy of Our Lord*, ch. iv, ix) confounds this person with the preceding (see Keil, *ad loc.*).

Salmácis, in Greek mythology, was the nymph of a fountain of the same name in Caria. She loved Hermaphroditus, the son of Mercury and Venus, who was possessed of extraordinary beauty; but he avoided her and despised her prayers. She therefore seized him in her embraces at a time when he was bathing in her fountain, and besought the gods to join her inseparably with him in case he should not listen to her plea. The prayer was heard, and Hermaphroditus, previously a man, thereafter united both the sexes in his person.

Salmana'sar (Vulg. *Salmanasar*, for the Gr. text is lost), a less correct form (2 Esdr. xiii, 40) of the name of the Assyrian king SHALMANESER (q. v.).

Salmantican (sc. *theologi*), a collection of theological "Summæ" emanating from the college of Discalceate Carmelites at Salamanca, and highly esteemed in the Roman Catholic Church. The work, in arrangement and execution, is wholly in the style of Thomas Aquinas, and its teaching is emphatic in defending the views of the Angelical Doctor to the utmost, particularly with reference to the doctrine of grace. Its authors directed their argument especially against the system of Molina [see MOLINA, LUIS], which was then a subject of controversy. In this course they were supported by the whole weight of the University of Salamanca, which not only clung to the Thomist doctrines in their utmost strictness, but whose faculty bound itself with a unanimous oath to present only the doctrines of Augustine and Aquinas in their public lectures. A work containing the philosophical system of Aquinas had previously been issued by the Barefooted Carmelites of the College of Alcalá, under the title *Complutensis Artium Cursus*, which served as a preliminary to the Salmantican theology. The authors of the above works are not definitely known, though Antonius, in *Bibl. Hispan.*, mentions a Carmelite father Antonius as the principal author of both—a statement which is disproved by the preface to the *Theology*. The first volume of the Salmantican theologians appeared in 1631, and nine volumes are now known to exist (Pfaff, *Introd. in Hist. Theol. Literar.* p. 208, mentions ten), the last of which contains the tract *De Incarnatione*.

A smaller work on moral theology, *Cursus Theol. Moral*is (Venet. 1728, complete in 6 vols.), was published by the same order and school, whose authors were, without exception, Probabilists. See PROBABILISM. Their names are given in the book. The work has been highly commended by Roman Catholic theologians in the department of morals, e. g. by Gury.

Salmasius, CLAUDIUS (*Claude de Saumaise*), one of the greatest French scholars of the 17th century, was born at Sémur-en-Auxois, in Burgundy, April 15, 1588. His father, a jurist, gave him the first elements of his classic knowledge; his mother, a Calvinist, impressed upon him her practical religion. At the age of ten he wrote Latin and Greek. At sixteen he went to the University of Paris, and was greatly stimulated by intercourse with those great classic scholars, Joseph Scaliger and Isaac Casaubon. To his Greek and Latin he now added Hebrew, Arabic, and Coptic, which he learned without a teacher. In 1606 he resorted to the University of Heidelberg to study jurisprudence under Gothofredus, but he found the most attraction in the rich library, and especially in its rare manuscripts. He now gave up jurisprudence as a specialty, and devoted himself to universal erudition. At the age of twenty-one he brought out his richly annotated edition of Florus, a work which gave him a name among the scholars of the age. In 1611 he printed at Paris his *Scriptures Historiæ Augustæ*. In 1623 he married, and lived for some years near Paris, working upon his essays on Pliny and Solinus. They appeared in Paris in 1629 in two

folio volumes, under the title *Plinianæ Dissertationes in Cuius Julii Solini Polyhistori*, and obtained for their author wide fame and calls to many foreign universities. In 1632 he accepted an honorary professorship at Leyden, with a comfortable pension, devoting himself to erudite labor, and declining many tempting invitations to return to France. Even the offer by Richelieu of six times as great a salary if he would come to Paris and become the great statesman's biographer was respectfully declined, with the remark that he could not consent to devote his pen to the work of flattery. His work on the primacy of the pope (1645) involved him in trouble with the Roman clergy; but the consequences of his *Defensio Regia pro Carolo Primo* (Leyden, 1649), which he had written at the request of the banished king Charles II, were much more serious, for it not only called forth the able and passionate rejoinder of Milton, *Defensio pro Populo Anglicano* (1650), but it brought upon its author the disapproval of his republican patrons in Holland. Wounded at this, Salmasius hastily accepted an invitation of Christina of Sweden to enter her service; but, his expectations not being met, he returned to Holland in 1651. But his health was now completely broken. Salmasius became a Protestant at Heidelberg while still a youth, and held fast to his faith at no little self-sacrifice throughout life. He died at Spa Sept. 6, 1653, and was buried at Maestricht. Among his writings which bear upon religion, we may mention *De Episcopis et Presbyteris*:—*De Cæsarie Virorum et Mulierum Coma*:—*Super Herodis Infanticida*:—*De Transubstantione*:—*De Cruce et Hyssopo*. See Papillon, *Bibliothèque des Auteurs de Bourgogne*; Paquot, *Mémoires*; Herzog, *Real-Encyklop.* xiii, 328-331. (J. P. L.)

SalmeGGia, ENEA, an Italian painter, was born at Bergamo. He was a pupil of Campi at Cremona, afterwards went to Rome, and for fourteen years gave himself to the study of the works of Raffaele. His works show the effect of this study. Many of his pictures are at Bergamo, but the best may be seen in Milan, as *St. Victor, Christ in the Garden*, and others. He died in 1626.

Salmeron, ALPHONSO, one of the original six who associated themselves with Loyola in founding the Society of Jesus. He was born at Toledo in 1515. Having learned the ancient languages at Alcalá, he repaired to the University of Paris to study philosophy and theology. There he became attached to Loyola, and was soon one of his most zealous and efficient disciples. Subsequently he visited Italy, and promoted the cause of the new order by enthusiastic public labors of every kind. His talent for controversy was of a high order. The pope rewarded his zeal by conferring on him the title of Apostolic Nuncio of Ireland. He was charged by the popes Paul III, Julius III, and Pius IV with the function of papal theologian and orator at the Council of Trent. In co-operation with Lainez, he prepared a statement of the so-called erroneous teachings of the

Reformers, accompanying each one with citations from the fathers, popes, and councils which refuted and condemned them. After the Council of Trent he returned to Italy, and retired into the college which he had founded at Naples. There, as president of the provincial section of his order in Naples, he closed his days, in 1585, combating all forms of heresy, and preparing his extensive commentary on the Bible. His works were published, in sixteen volumes folio, at Madrid, Mantua, Brixen, and Cologne (1597-1612). Some of the titles of the separate volumes are, *Prolegomenon in Universam Scripturam*:—*De Incarnatione Verbi*:—*De Sermone Domini in Monte*:—*De Christi Miraculis*:—*De Passione et Morte Domini*:—*De Resurrectione et Ascensione Domini*. See Herzog, *Real-Encyklop.* xiii, 331. (J. P. L.)

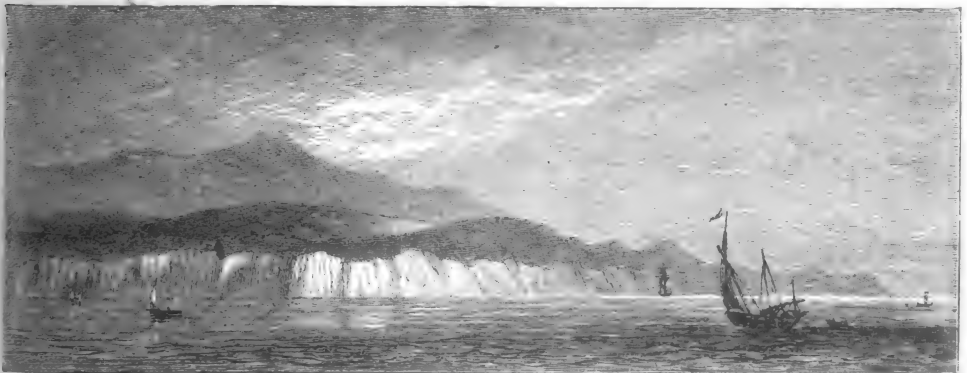

Sal'mon, the name of a man and of a hill.

1. (Heb. *Salmon'*, שַׁלְמוֹן, *clothing*, Ruth iv, 21, Sept. Σαλμών v. r. Σαλμάν; but *Salma'*, שַׁלְמָה, *id.* 1 Chron. ii, 11, Sept. Σαλμάν v. r. Σαλωμών, A. V. "*Salma*;" and *Salmah'*, שַׁלְמָה, *id.* Ruth iv, 20, Sept. Σαλμών v. r. Σαλμάν, A. V. "*Salmon*;" N. T. Σαλμών). The son of Nahshon and the ancestor of Boaz, of the family of Judah and David (Ruth iv, 20, 21; 1 Chron. ii, 11; Matt. i, 4, 5; Luke iii, 32). B.C. cir. 1660. See GENEALOGY OF CHRIST.

2. (Heb. *Tsalmon*, שַׁלְמוֹן, *shady*.) A place named (Psa. lxxviii, 14) as a battle-field, apparently during the Israelites' conquest of Canaan; probably the Mount ZALMON (q. v.) elsewhere (Judg. ix, 48) referred to.

Salmon, NATHANIEL, an English clergyman and physician, son of the Rev. Thomas Salmon, was educated at Cambridge. He entered holy orders, but after a while abandoned the clerical profession for that of medicine, in the practice of which, and in the study of antiquities, he passed the remainder of his life. He died April 2, 1742. His principal works were, *Lives of the English Bishops* (Lond. 1733, 8vo):—*History of Hertfordshire* (*ibid.* 1728); and others on history and antiquities.

Salme'nè (Σαλμώνη, of unknown etymology), a promontory in Crete, apparently forming the north-east point of the island, mentioned thus in the narrative of Paul's voyage and shipwreck: "When we had scarce come over against Cnidus, the wind not suffering us, we sailed under Crete, over against Salmone" (Acts xxvii, 7). Capt. Smith (of Jordanhill) has shown the naturalness and accuracy of this notice in his own peculiar way. The direct course of the ship, he states, from Myra to Italy, after reaching Cnidus, lay by the north side of Crete; but the wind at the time did not suffer that, blowing, as he shows, from a point somewhat to the west of north-west—a wind very prevalent in the Archipelago in late summer. Then he says, "With north-west winds the ship could work up from

View of Cape Salmone.

Myra to Cnidus; because, until she reached that point, she had the advantage of a weather shore, under the lee of which she would have smooth water and a westerly current; but it would be slowly and with difficulty. At Cnidus that advantage ceased; and unless she had put into that harbor and waited for a fair wind, her only course was to run under the lee of Crete, *κατὰ Σαλμώνην*, in the direction of Salmone, which is the eastern extremity of that island" (*Paul's Voyage and Shipwreck*, ch. ii). They passed the point, the evangelist says, with some difficulty; and the same modern writer mentions the case of a squadron (a portion of the British fleet from Abûkir) which tried to take the same course, but had the wind too westerly to admit of their doing so (see Lewin, *St. Paul*, ii, 191). See SHIPWRECK (*of St. Paul*).

The classical name for the headland is *Salmonium*, *Sammonium*, or *Samonium* (*Σαλμώνιον*, *Σαμμώνιον*, *Σαμώνιον*, Ptolem. iii, 15, § 5; Strabo, ii, 106; x, 474, 475, 478, 489; comp. Pomp. Mel. ii, 7, § 12; Pliny, iv, 20, § 21). The name *Point Salomon* is now usually applied to the end of Cape Sidero, the easternmost extreme of Crete (Höck, *Crete*, i, 427); but Spratt (*Researches in Crete* [Lond. 1865]) thinks it is rather a southern extension of that headland called *Cape Plaka*. See CRETE.

Salmoneus, in Greek mythology, was a son of Æolus and Enarete, and brother of Sisyphus. He was king in Elia (where he built Salmone), and husband, first of Alcidece, the mother of Tyro, and afterwards of Sidero. Such was his vanity that he demanded to be recognised and worshipped as Jupiter, and that, to deceive the populace, he attempted to imitate the lightnings of Jove by causing flaming torches to be thrown about him, and the thunders of the god by driving over sounding bridges of brass with heavy war-chariots, or by dragging vessels filled with air behind his chariot. He was even charged with having murdered people, that he might pretend that they had fallen beneath his thunderbolts. Jupiter at length became wearied of his madness, and smote him with his bolt, besides destroying the entire city of Salmone.

Sal'om (Σαλώμ), a Greek form in the Apocrypha, (*a*) incorrectly (1 Macc. ii, 26), for *SALU* (q. v.), the father of Zimri (Numb. xxv, 14); (*b*) less correctly (Bar. i, 7), for *SHALLUM* (q. v.), the father of Hilkiah (1 Chron. vi, 13).

Salomè (Σαλώμη, from the Heb. שָׁלֹמִי, i. e. *peaceful*), the name of several women mentioned or alluded to in the N. T. and by Josephus.

1. Called also *Alexandra*, the wife of Aristobulus I, king of the Jews, on whose death (B.C. 106) she released her brothers, who had been thrown by him into prison, and advanced the eldest of them (Alexander Jannæus) to the throne (Josephus, *Ant.* xiii, 12, 1; *War.* i, 4, 1). By some she has been identified with *Alexandra*, the wife of Alexander Jannæus. See ALEXANDRA.

2. A daughter of Antipater by his wife Cypros, and sister of Herod the Great, one of the most wicked of women. She first married Joseph, whom she accused of familiarities with Mariamne, wife of Herod, and thus procured his death (B.C. 34). She afterwards married Costobarus; but, being disgusted with him, she put him away—a license till then unheard of among the Jews, whose law (says Josephus) allows men to put away their wives, but does not allow women equal liberty (B.C. 26). After this she accused him of treason against Herod, who put him to death. She caused much division and trouble in Herod's family by her calumnies and mischievous informations; and she may be considered as the chief author of the death of the princes Alexander and Aristobulus, and of their mother Mariamne. See ARISTOBULUS. She afterwards conceived a violent passion for an Arabian prince, called Sillaus, whom she would have married against her brother Herod's con-

sent; and even after she was married to Alexas, her inclination for Silleus was notorious. Salome survived Herod, who left her, by will, the cities of Jamnia, Azoth, and Phasaelis, with fifty thousand pieces of money. She favored Antipas against Archelaus, and died A.D. 9, a little after Archelaus had been banished to Vienne, in Dauphiny. Salome had five children by Alexas—Berenice, Antipater, Calles, and a son and a daughter whose names are not mentioned (Josephus, *Ant.* xv, 4; xvii, 8). See HEROD.

3. A daughter of Herod the Great by Elpis. In addition to what her father bequeathed to her, Augustus gave her a considerable dowry, and married her to one of the sons of Pheroras, Herod's brother (Josephus, *Ant.* xvii, 1; *War.* i, 28, etc.). See HEROD.

4. The wife of Zebedee, as appears from comparing Matt. xxvii, 56 with Mark xv, 40. It is further the opinion of many modern critics that she was that sister of Mary, the mother of Jesus, to whom reference is made in John xix, 25. The words admit, however, of another and hitherto generally received explanation, according to which they refer to the "Mary the wife of Cleophas" immediately afterwards mentioned. In behalf of the former view, it may be urged that it gets rid of the difficulty arising out of two sisters having the same name; that it harmonizes John's narrative with those of Matthew and Mark; that this circuitous manner of describing his own mother is in character with John's manner of describing himself; that the absence of any connecting link between the second and third designations may be accounted for on the ground that the four are arranged in two distinct couplets; and, lastly, that the Peshito, the Persian, and the Æthiopic versions mark the distinction between the second and third by interpolating a conjunction. On the other hand, it may be urged that the difficulty arising out of the name may be disposed of by assuming a double marriage on the part of the father; that there is no necessity to harmonize John with Matthew and Mark, for that the time and the place in which the groups are noticed differ materially; that the language addressed to John—"Behold thy mother!"—favors the idea of the absence rather than of the presence of his natural mother; and that the varying traditions current in the early Church as to Salome's parents, worthless as they are in themselves, yet bear a negative testimony against the idea of her being related to the mother of Jesus. (According to one account, she was the daughter of Joseph by a former marriage [Epiphani. *Har.* lxxviii, 8]; according to another, the wife of Joseph [Niceph. *H. E.* ii, 3].) Altogether, we can hardly regard the point as settled, though the weight of modern criticism is decidedly in favor of the former view (see Wieseler, in the *Stud. u. Krit.* [1840] p. 648). The only events recorded of Salome are that she preferred a request, on behalf of her two sons, for seats of honor in the kingdom of heaven (Matt. xx, 20); that she attended at the crucifixion of Jesus (Mark xv, 40); and that she visited his sepulchre (Mark xvi, 1) (A.D. 26-28). She is mentioned by name only on the two latter occasions. See ZEBEDEE.

5. The daughter of Herodias by her first husband, Herod Philip (Josephus, *Ant.* xviii, 5, 4). She is the "daughter of Herodias" noticed in Matt. xiv, 6 as dancing before Herod Antipas, and as procuring, at her mother's instigation, the death of John the Baptist. See HERODIAS. She was married, in the first place, to Philip, the tetrarch of Trachonitis, her paternal uncle, who died childless; and, secondly, to her cousin Aristobulus, son of Herod, the king of Chalcis, by whom she had three sons. The legendary account of her death (Niceph. *H. E.* i, 20) is a clumsy invention to the effect that Salome accompanied her mother Herodias, and her father-in-law Herod, in their banishment to Vienne, in Dauphiny; and that, the emperor having obliged them to go into Spain, as she passed over a river that was frozen, the ice broke under her feet, and she sank in up

to her neck, when, the ice uniting again, she remained thus suspended by it, and suffered the same punishment she had made John the Baptist undergo. See **HEROD**.

Salomon, Gotthold, a German rabbi, was born at Sandersleben, in the duchy of Anhalt-Dessau, Nov. 1, 1784. Up to his sixteenth year he was educated in Talmudic lore and literature, according to the custom of that time. After this he acquired the rudiments of the German language, especially through the efforts of the chaplain Bobbe, who not only allowed him to come to his school, but also gave him private lessons. He then went to Dessau, to attend the lectures at the Jewish college, employing, however, all his spare time in acquainting himself with German literature. In 1802 he became tutor of German and Hebrew at the Franz school, and afterwards he was intrusted with the religious instruction. In 1806 he delivered his maiden speech, which was very highly spoken of by Christians who heard him. Salomon never lost sight of his intention to become a preacher; and in this he was encouraged by his Christian friends, who not only supplied him with the sermons of Zollikofer and Reinhardt, but even corrected his compositions in accordance with the rules of homiletics. In 1815 he went to Berlin, where he delivered his first discourse in Jacobsohn's Temple. He now became known to his coreligionists; and when, in 1818, the Temple of the Reformed party at Hamburg was dedicated, Salomon was elected assistant preacher. In the year 1844 he dedicated the "New Temple," and attended the assemblies of the rabbins at Brunswick, Frankfurt, and Breslau. In the year 1857 he retired from his duties, and died Nov. 17, 1862. Of his numerous publications we mention: *Auswahl von Predigten* (Dessau, 1818);—*Predigten* (Hamburg, 1819-29);—*Moses*, in 21 sermons (ibid. 1835);—*David, as Man, Israelite, and King*, 26 sermons (ibid. 1837);—*Elias, the Champion of Light and Truth*, in 19 sermons (ibid. 1840);—*Der Berg des Herrn*, 17 sermons on the Decalogue (ibid. 1846);—*בְּחִירָה*, comments upon Haggai and Zechariah (Dessau, 1805);—The Pentateuch, according to the Masoretic text, with a German translation and short glosses (Krotoschin, 1848-49, 5 vols.). Some of his sermons were also translated into English by Miss A. M. Goldsmid (London, 1839). See FÜRST, *Bibl. Jud.* iii, 226 sq.; Kayserling, *Bibliothek jüdischer Kanzelredner*, i, 142-277; Jost, *Gesch. d. Judenth. u. s. Secten*, iii, 365, 371; Grätz, *Gesch. d. Juden*, xi, 416 sq.; Ph. Philippson, *Biographische Skizzen* (Leips. 1866, 3 pts.); Geiger, in the *Zeitschrift für jüdische Theologie*, ii, 127 sq.; iii, 91-102; *Unsere Zeit*, vii, 396; Steinschneider, *Hebr. Bibliographie*, vi, 17; L. Philippson, *Predigt- und Schul-Magazin*, ii, 253-269. (B. P.)

Salomon, John, professor of Hebrew, was a native of Posen, where he was born in 1623. He embraced Christianity at Dantzic, Jan. 22, 1657. Two years later he was appointed professor of the Oriental languages at

the gymnasium there, and died July 1, 1683. He wrote, *Demonstrationes XXXVIII contra Judæos* (Frankfort, 1660);—*Programma Hebr. ad Audiendam Orationem Hebr. de Præstantia et Utilitate Lingua Hebr.* (Dantzic, 1666);—*Programma de Jubileis Hebræorum* (ibid. 1658, etc.). See FÜRST, *Bibl. Judaica*, ii, 97; iii, 229; Steinschneider, *Bibliograph. Handbuch*, p. 123; id. *Catalogus Librorum Hebr. in Bibl. Bodl.* p. 2397; Wolf, *Bibl. Hebr.* i, 480; Delitzsch, *Wissenschaft, Kunst und Judenthum*, p. 139, 301; Basnage, *Histoire des Juifs* (Taylor's transl.), p. 735. (B. P.)

Salonius, Sr., bishop of Geneva in the middle of the 5th century, was the son of Eucher, afterwards bishop of Lyons. At the early age of ten, he entered the monastery of Lerins, and there studied under Hilary, Honorat, and Vincent. It is not positively known whether Salonius had charge of the church at Vienna or Geneva, but it was probably the latter. He is supposed to have assisted, with his father, at the Council of Orange in 441. He died about 470. There remains a writing of Salonius, called *Expositio Mystica in Parabolas Salomonis et Ecclesiasten*. The style is simple, and the most of the exposition relates to ethics.

Salpinx (*a trumpet*), in Greek mythology, was a surname of *Minerva*. Hegeleos, the son of Tyrsenus, dedicated to her a temple with the above name after his father had invented the trumpet.

Salt (מֶלַח, *mélach*; ἅλς), the chloride of sodium of modern chemistry. Indispensable as salt is to ourselves, it was even more so to the Hebrews, being to them not only an appetizing condiment in the food both of man (Job vi, 6) and beast (Isa. xxx, 24; see margin), and a most valuable antidote to the effects of the heat of the climate on animal food, but also entering largely into their religious services as an accompaniment to the various offerings presented on the altar (Lev. ii, 13). They possessed an inexhaustible and ready supply of it on the southern shores of the Dead Sea. In the same manner the Arabs of the present day procure their supply of salt from the deposits of the Dead Sea, and carry on a considerable trade in that article throughout Syria. Here may have been situated the Valley of Salt (2 Sam. viii, 13), in proximity to the mountain of fossil salt which Robinson (*Researches*, ii, 108) describes as five miles in length, and as the chief source of the salt in the sea itself. See SALT, VALLEY OF. Here were the salt-pits (Zeph. ii, 9), probably formed in the marshes at the southern end of the lake, which are completely coated with salt, deposited periodically by the rising of the waters; and here also were the successive pillars of salt which tradition has from time to time identified with Lot's wife (Wisd. x, 7; Josephus, *Ant.* i, 11, 4). See DEAD SEA. Salt might also be procured from the Mediterranean Sea, and from this source the Phœnicians would naturally obtain the supply necessary for salting fish (Neh. xiii, 16) and for other purposes. The Jews appear to have distinguished between rock-salt and that which was gained by evaporation, as the Talmudists particularize one species (probably the latter) as the "salt of Sodom" (Carpov, *Appar.* p. 718). The notion that this expression means bitumen rests on no foundation. The salt-pits formed an important source of revenue to the rulers of the country (Josephus, *Ant.* xiii, 4, 9), and Antiochus conferred a valuable boon on Jerusalem by presenting the city with 375 bushels of salt for the Temple service (*ibid.* xii, 3, 3). In addition to the uses of salt already specified, the inferior sorts were applied as a manure to the soil, or to hasten the decomposition of dung (Matt. v, 13; Luke xiv, 35). Too large an admixture, however, was held to produce sterility, as exemplified on the shores of the Dead Sea (Deut. xxix, 23; Zeph. ii, 9); hence a "salt" land was synonymous with barrenness (Job xxxix, 6; see margin; Jer. xvii, 6; comp. Josephus, *War*, iv, 8, 2. ἀλμυ-

ρωσης και ἄγονος); and hence also arose the custom of sowing with salt the foundations of a destroyed city (Judg. ix, 45), as a token of its irretrievable ruin. It was the belief of the Jews that salt would, by exposure to the air, lose its virtue (μωρανθῆ, Matt. v, 13), and become saltless (ἀναλον, Mark ix, 50). The same fact is implied in the expressions of Pliny, *sal iners* (xxxii, 39), *sal tabescere* (xxxii, 44); and Maundrell (*Early Travels* [ed. Bohn], p. 512) asserts that he found the surface of a salt rock in this condition (see Hackett, *Illustrat. of Script.* p. 48 sq.).
